Fred Ward is racing three horses this year that are all out of the mare La Belle by Sidney that took a two-year-old record of 2:16 at Sacramento in 1894. La Belle has considerable of the hot blood in her make-up, her grandam being the thoroughbred mare Pacheco by Hubbard. The three of her produce that Ward is racing are the pacers Conqueror 2:10½ and Amado 2:16, full brothers by Direct Heir, and the three-year-old trotter Pegasus 2:19½, winner of the three-year-old trot at Portland.

Mamie Alwin, the handsome three-year-old filly owned by A. L. Scott of this city and with which Jos. Cuicello has won a couple of races up north already, has taken a mark of 2:19½ trotting. She is by Lord Alwin, brother to John A. McKerron 2:04½ and her dam is Louise Carter (3) 2:24 by Chestnut Tom 2:15, second dam Ingar, the dam of John A. McKerron. She can be called intensely inbred as her sire is by Nutwood Wilkes, out of Ingar by Director, while her dam is by a son of Nutwood Wilkes, that is out of Zeta Carter by Director, and her second dam is dam of her sire.

FOUR PACE IN 2:00 IN ONE HEAT.

The most wonderful heat ever paced by four horses was in a race at the Indiana State Fair last Monday when Minor Heir set a new world's race record of 1:59 flat. This lowers the world's pacing record for horses in a race one full second, Minor Heir having paced a mile in a special race at Galesburg, Ill., last week in 2:00 flat. Time by quarters was as follows: .29¾, .59, 1:29½, and 1:59. But the most wonderful part of the performance is the fact that all four horses in the race finished close together and the time made by the hindmost horse was 2:00. Lady Maud C. was second in 1:59½, George Gano third in 1:59¾ and Hedgewood Boy fourth in 2:00. A tire on the last named horse's sulky went flat in the last quarter of this mile. Hedgewood Boy was but 40 feet behind Minor Heir at the finish and the other two were beaten a length and two lengths respectively.

CALIFORNIA STATE FAIR RACES.

Outside the two three-year-old stakes, the Occident and Stanford, there were but four regular harness racing events on the card at the California State Fair this year, a few cup races for amateurs providing the rest of the meagre program. The amusement end of the week's program was made up of flights by an aviator costing \$12,000, and cowboy stunts by a troupe of Wyoming performers for which \$22,000 was paid. Whether it was these attractions, or systematic advertising and hoosting by the citizens of Sacramento city and valley that drew the crowds during the week, we do not know, but the fact remains that no such attendance was ever before seen at this fair, and the reports show that an average of 14,000 paid to enter the gates each day. Three big grand stands, seating probably ten or twelve thousand people, were packed each day, one uncovered stand being free to the public, admission to the other two being fifty cents per head. There was harness racing every day except Wednesday. On Monday the Occident Stake was decided, an account of which was given in last week's Breeder and Sportsman. Seven three-year-olds started in that stake and on the following Saturday all but Sweet Bow started in the Stanford Stake. The Stanford proved to be the best and fastest three-year-old race ever trotted on the Pacific Coast. It was won by W. E. Detels' colt Bon Guy in three straight heats. It was thought by the majority of the horsemen present that Donasham would be returned the winner of this race, but Bon Guy was on edge, and when he was just right at any time this summer there was not a three-year-old in California that could heat him. He won the first heat in 2:12½, the fastest heat ever trotted in the Occident or Stanford, and came back the next heat in 2:11½, a still further reduction of the record, then trotted the third and final heat in 2:12½. In the first heat Donasham led until within 75 yards of the wire when Bon Guy came from behind and beat Donasham a neck at the finish. Bon Guy took the lead at the start of the second heat and maintained it to the wire in 2:11½, the fastest time ever made by a three-year-old trotter on this coast. Donasham was nearly two lengths back at the finish. In the third heat Bon Guy won handily and while Donasham made a strong bid for second position again, he broke and Pal finished second not over a half length behind the winner. There are four moneys in the Stanford Stake, and they were awarded in the following order: Bon Guy, Donasham, Pal and Expedio.

During the entire week there was but one heat as fast as 2:10 and that was paced in 2:09½ by the little brown mare Vera Hal when she won the second heat of the 2:15 pace. She is by Expressive Mac 2:25½ and out of a mare by Tennessee Hal. This is the first 2:10 performer for Expressive Mac, who is by McKinney 2:11½, dam Expressive (3) 2:12½ by Electioneer, and a young stallion that is bound to make a name as a producer of speed.

Lijero, the magnificent big son of James Madison, owned by Frank E. Wright of Sacramento, won two races during the week, getting a record of 2:15 in the second heat of the 2:15 trot. His three-year-old daughter, the handsome filly, Expedio, took a record of 2:14½ during the week, getting second money in the Occident and fourth money in the Stanford Stake. The results of the races at the State Fair were as follows:

Monday, Sept. 5.

Occident Stake; three-year-old trotters; \$2900:
Donasham, b. c. by Athadon-Cora Wickersham (W. G. Durfee)1 1 2 1
Expedio, br. f. by Lijero (Ivey)7 6 1 2
Bon Guy, h. c. by Bon Voyage (Twhig)2 4 4
Pal, b. c. by Palite (Chadbourne)4 2 5
Strathhoule, blk. c. by Stamboulet (Walton)3 3 3
Sweet Bow, b. f. by Bon Voyage (Quinn)5 7 6
Babe Verne, blk. c. by Jules Verne (Hoy)6 5 7
Time—2:13½, 2:14, 2:14½, 2:17½.

Trotting, 2:20 class:
Lijero, b. s. by James Madison (Wright)1 1 1
Harold K., b. g. by William Harold (Hoy)2 3 2
Bobby H., b. g. (Hamilton)3 2 3
Little Branch, b. m. by Nutwood Wilkes (Bunch)4 4 4
Time—2:22, 2:22, 2:20½.

Tuesday, Sept. 6.

Pacing, 2:20 class; \$800:
Vera Hal, h. m. by Expressive Mac (Leggett)2 1 1 1
T. W. D., h. g. by Nutwood Wilkes (Kemp)1 2 3 2
Ice Man, h. s. by William Harold (Jackson)3 3 2
Diogen, h. g. (Doyle)6 4 4
Paterly, b. g. (Hoy)4 6 5
Alto Genoa, Jr., h. s. (Peirano)5 5 6
Time—2:13½, 2:15½, 2:14½, 2:14½.

Amateur race, class C pace:
Joe Dick, br. g. (Heenan)1 3 1 1
Princess Flora B., b. m. (Burge)2 1 3 2
Mae B., br. m. (Powell)3 2 2 3
Time—2:22½, 2:22, 2:30, 2:22½.

Thursday, Sept. 8.

Trotting, 2:15 class; \$800:
Lijero, br. s. by James Madison (Wright)1 1 1
Modicum, b. m. by George Ayers (Boyle)2 2 2
Wenja, blk. m. by Zolock (Davey)3 3 ds
Time—2:18½, 2:15, 2:16½.

Friday, Sept. 9.

Pacing, 2:15 class; \$500:
Little Dick, ch. g. by Dictatus (Verhilac)4 2 1 1 1

Vera Hal, hr. m. by Expressive Mac (Leggett)1 1 2 2 2
Choro Prince, s. h. (Hamilton)2 3 4
Alto Genoa, br. g. (Pirano)3 3 3
Normono, b. m. (Quinn)5 5 d
Time—2:11½, 2:09½, 2:12½, 2:13, 2:14½.

Saturday, Sept. 10.

Stanford Stake, three-year-old trotters, \$1500:
Bon Guy, h. c. by Bon Voyage-La Moscovita (Twhig)1 1 1
Donasham, b. c. by Athadon (W. G. Durfee)2 2 6
Pal, h. c. by Palite (Chadbourne)5 3 2
Expedio, b. f. by Lijero (Ivey)3 4 3
Babe Verne, blk. c. by Jules Verne (Hoy)4 6 5
Strathhoule, blk. c. by Stamboulet (Walton)6 5 4
Time—2:12½, 2:11½, 2:12½.

Amateur pace:
Kermit, ch. g. by Henry Nutwood (Cowell)1 1 1
The Jewess, h. m. (Lavenson)2 2 2
Alice Roosevelt (Hunt)3 3 3
Time—2:14, 2:12½, 2:14.

Special cup race:
Wild Bell, b. g. by Wildnut (Ruhstaller)1 1 1
Modicum, b. m. by Geo. Ayers (Boyle)2 2 2
Siesta, b. c. by Iran Alto (Davey)3 3 3
Time—2:14½, 2:14, 2:18.

WILLY 2:08½.

When a horse produced on foreign shores from an ancestry of American bred stock returns to the land of his parental nativity and performs achievements to render him illustrious there is much more than a usual interest connected with him. This is the case with the 2:10 trotter Willy 2:08½, sent by Mr. Winans from England to make a campaign in this country during the season of 1910. Both the sire and dam of Willy were American bred and were exported to Europe where they were united and produced the good trotter now gathering in coin stamped with the American Eagle. Willy was sired by the 2:27 trotting record stallion Wilburn M. 29017, a bay horse foaled in 1892, given his record and sold and shipped across the big pond. Wilburn M. was sired by the good trotter and sire, Wilton 2:19½, that was by George Wilkes 2:22, out of Alley, great brood mare, by Hambletonian 10, dam Lady Griswold by Flying Morgan. The dam of Wilburn M. 2:27 was Rose Leyburn, pacing record 2:15½, dam of four trotters and three pacers, by Onward 2:25½. The second dam was Mamie, dam of three, by Star Almont 6673, that was by Almont 33, out of a mare by Blood's Black Hawk and running-bred mare by Saxe Welmer. The next dams of Wilburn M. were by Long's American Boy and Rogers Highlander, good foundation material for a trotting superstructure. It will be seen thus that Wilburn M. 2:27 was a richly pedigreed horse from noted producers on both sides, line-bred Wilkes—Wilton on sire's side, and Onward on dam's, and rested in blue blood at the base.

The dam of Willy 2:08½ is also a well pedigreed mare, registered as Fantissima, with a two-year-old speed credit of 2:33½, sired by the stout progenitor, Sidney 2:19½ by Santa Claus 2:25½ by Strathmore 408; first dam of Sidney, the trotting mare Sweetness 2:21½ by Volunteer 55; next dam Lady Merritt by Edward Everett 81. The dams of both Volunteer and Edward Everett were thoroughbred in origin, nearly or quite so, while Santa Claus had an outcross dam largely in running strains. The second dam of Fantissima was Faustine by Crown Point 2:24, a son of Speculation 928. The third dam was Dell Foster by A. W. Richmond 1687, chiefly "blood of the desert" again. Thus it appears that Willy, while trotting-bred from performing and producing ancestors, is well founded and re-inforced with "blue blood" derived from the running race horse speed trihe, the origin of all speed horses.

Willy 2:08½ is said to resemble his grandsire Wilton 2:19½ in very positive manner, a very stoutly built, compact horse, with abundant substance, and handsome, with the Morgan characteristics clearly discernable. His double Wilkes through the sire would tend to produce such, though Onward was of a different order individually. However, the inbreeding would revert back to George Wilkes as the dominating influence. Willy is a stallion, greatly admired by those who have seen and written concerning him, and said to be capable of speed much faster than he has been called so far to put forth. He is another refutation of the prating that standard-bred horses are wanting in symmetrical conformation, smoothness of finish, and style. Some are, no doubt, but there are also very many that will size up favorably with any class of horses of the speed order. There came with Willy from Europe to race, Allen Winter, winner of the first great handicap; Silko by Wilton and Dora, all trotters of more than average merit, all belonging to the gentleman sportsman, Mr. Louis Winans, of London, England, who races good stables regularly in his own country.—Spirit of the West.

Since the close of the stud season John E. Madden has sent to the Lexington track the two grandly bred young trotters, The Native (3) 2:17½, and Peter Leyburn 2:26½. The former was sent to John Splan and the Leyburn stallion to George B. Hayes. The Native is a full brother to the champion two-year-old Native Belle (2) 2:07½, and will be trained with a view of reducing his record. Peter Leyburn is a son of Peter The Great 2:07½, and will also be given a fast record.

Drink Jackson's Napa Soda.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DOWITT.

RANDOM NOTES.

[By Loch Laddie.]

You cannot go to a town in the United States where some sportsman keeps a bird dog or two but what some particular owner did not at one time or another have the greatest dog living. It is extremely interesting to hear the tales told about the wonderful field work he has performed under all conditions. The narrator firmly believes in the animal he is describing, so I always repeat to myself, it was certainly the greatest dog in his estimation, for the highest of all laws to judge a dog by in another man's opinion is, how will it please him. Champions of this kind are champions only in their master's mind. But what's the odds, for this dog will please him more than any real field trial champion, especially so if he has trained the dog himself.

The aphorism, no two men are alike, applies strongly to man's canine companions, for in my own experience I have never seen two dogs perfectly alike in field characteristics. While in conformation and marking I have seen two dogs that could not be distinguished apart, the minute they were put into the field all likeness disappeared.

The question of similarity in dogs brings to my mind the peculiarities of many dogs that I have handled. The dog that within my knowledge could stand the greatest amount of heat and go the longest without water, was a large pointer named Fad, a son of Faskally Bragg. Contrary to the usual type of hot weather dogs, Fad was very fleshy and no amount of work could take a pound of fatty tissue off of him. He weighed 60 pounds but was a very close coupled dog of coarse appearance. When put down in the morning he went to his work in a very sluggish manner. It took a full hour to awaken him and then he struck a fast wide gait which he kept up all the day, possibly increasing speed and range as the day wore on. No amount of heat affected him as far as I could judge. At noon, on approaching a stream he would sip water slowly for fully ten minutes, until his sides were so distended that the usual proportions of the dog wore the appearance of an animal that had swallowed something larger than itself. The filling of his gigantic water tank apparently had no visible effect on his going for he could go three hours over ground barren of water without any signs of suffering, but on reaching a drinking hole the same performance was repeated. As I worked him during an exceptionally drouthy period, he had ample opportunities for displaying his gifts in this line.

One of the greatest pointer bitches I ever saw was a daughter of a Hallie's Pearl bitch, very small and wiry, and extremely deaf. I was the means of curing her of gun shyness but her great field abilities came naturally with her breeding and the opportunities to display it. It was impossible for her to keep quiet a moment; in the shooting season, when her handler was resting from a long tramp, "Sis" would try to catch the leaves as they fell from the trees. She did this while you were resting, or if by the side of some stream she put in her time swimming after the water bugs that floated lazily on the current and was disappointed at her failure to catch one and ready to settle to work in the field again as soon as the gun was shouldered. The most noticeable thing about her, besides her unusual speed, was the manner in which she hunted her dead birds, being exceptionally conceited in her powers of marking them. After the bird had fallen and she was given the order to hunt head she ascribed a wide circle; going at full speed she narrowed it within another circle and so on, each time diminishing the circle until she found the bird, which she brought to you in a hurry. It was an accomplishment which she developed herself; peculiar as the method was she never failed to find her dead bird.

There is no dog that possesses greater desirable qualities for shooting purposes than the Pape strain of black pointers. They possess every characteristic desirable in a great dog, yet the color has always been dead against them. Few people have hunted sufficiently with this strain to find that the mere matter of color is so heavily weighted down with good qualities as to make them a desirable addition to any string of shooting dogs. Their dark color—black as a crow—has given so many the impression that they are difficult objects to see, of course this is not to be overlooked. When one possesses a pair, the ability to see these black fellows, no matter where, becomes a habit, as the eyes become accustomed to distinguish them from dark surroundings.

Truly their field qualifications are up to the standard of any breed, and in one particular I consider them the superior of any field dog of the day, i. e., nose. A great nose with them is not a rarity, but a predominating feature of the strain. They have speed as well as any other breed and their endurance is remarkable. The peculiarity of carriage while at work at first leads one to the impression that they are trailing; but no dog living has a greater ability to solve the wind problem than this robust strain. A peculiar swinging motion and low pose of the head while at work as they glide swiftly over the ground, is the reason of this false impression.

Notwithstanding that inbreeding has been followed to the limit among these pointers, physical defects have not resulted from it. They are large-boned, deep-chested dogs, that can stand work where another dog often shows the white feather. The formation of the soles of their feet is so thick that the rocky formation in many billy countries has no effect whatever on their going; and it may be said that a lame Pape dog is a rarity.

The dogs are large, big-boned fellows, with a bold, willing look about them, though while young often have a coarse appearance, but the rough looking edges disappear with age. The bitches are strongly made, though as a rule on finer lines than the dogs, as they get older are inclined to put on fat too quickly unless given plenty of work. All I have seen are natural bird dogs, and bird sense is a quality that predominates the first experience they get on game, and water has little terrors for them. The majority the writer has seen and handled are inveterate self-hunters, and unless kenneled are seldom at home when likely hunting grounds are in the vicinity. Even puppies of six months will often self hunt if given liberty until they are mere shadows of their former selves.

We are often requested to decide whether it is proper that a dog or man should flush the birds. The custom is a relic of brush shooting—a great deal may be written on this subject, but suffice it to say that unless you are capable of controlling your dog—this method of training will cause disastrous results, especially so in young dogs, who are asked to absorb too much knowledge in a few months, for the youngster's natural inclination to put up the birds himself may overbalance his staunchness and he will begin to put up birds before the shooter gets up to proper distance for a shot at the covey when flushed. Again, if persisted in prior to his knowing what actual staunchness is, he will develop a love for breaking in at shot, a habit that might not be so easy to cure as acquire.

Of course in very heavy brush the man behind the gun values this accomplishment highly, for it may save him many a hard battle with green briar, blackberry or other thorny covert which is much easier to pull through on paper than in a bottom field.

Another thing which will develop a youngster into the flushing habit is forcing him to catch every cripple. This habit is certainly, from humane motives, the best, as it saves the bird from perishing from a wound, huddled away somewhere in a bunch of grass to die, no benefit to man, or for what nature intended it. The best thing to do with a crippled bird is to shoot it, though sportsmen detest to take this mean advantage of a bird on the ground. To try to catch one yourself is only exposing all the awkward points of the human anatomy. I have often seen portraits and statues, showing them as the types of extreme gracefulness, but I often wondered if even they would not throw aside their elegant contour for the moment if actually endowed with life—they were forced to catch a winged quail in a field of heavy grass. The great difficulty with a youngster on cripples is after he has caught one, on the next single bird point he makes he imagines the same job is on hand and after a few seconds he makes a dash to grab it before it can get away. He has not yet learned the difference between the unharmed living bird that he should point and the cripple. Time alone aids in this, for when he reaches the proper time of discernment his catching cripples increases his value to his owner. But, as stated before, do not anticipate to develop everything in a puppy in a few weeks' time, nor anticipate that he will develop into a paragon of field work unless you give as much attention to his training as you do to the act of killing game. Make both things balance and you will be astonished to see your youngster develop. It is a nice time to work him now, but don't do too much of it or he may disappoint you. Do not take the youngster out in the heat of the day and expect him to find birds staunchly. Either take the pup out very early in the cool of the morning or late in the evening. You will find more birds out; they are feeding and naturally chances of picking up scent are increased.

As your dog has had sufficient work on game to show signs of some steadiness, the first point now to look after is steadying him to wing; that is, teaching him to stop when the bird flushes. The check cord is resorted to with success by many, and in the usual run of work it is the easiest method to snap him into steadiness and after he has had a few checks severe enough to form an impression on his memory he is likely to be staunch to his point, until the sense of restriction wears off. To obviate this many dogs are made to carry their leads snapped to their collar while at work to refreshen their memory when temptation to go up in the air occurs. As in everything else constant application to the one point makes obedience in the matter second nature and when the youngster's reasoning powers assert themselves he will readily learn the reason of everything and become easily moulded to his master's wishes.

There is another youngster who is so ambitious and over-anxious, together with confidence in his ability through great running powers to get ahead of his trainer and do as he pleases. He possibly may be a paragon in obedience until the opportunity offers to safely chase a bird and he does it. The best method of getting ahead of this fellow is to ride on a horse and ride up to him every time he makes a point. The dog will not then be convinced that he can keep from his handler and chase with impunity, for when he is caught in the act a few times unexpectedly, and forced to drop to wing by a sharp cut on his haunches with a whip, using word, "down," or "drop"—The instinct of obedience will assert itself instead of the contrary.

Many young dogs both to gun and wing are staunch on covies, but seem to be erratic on singles. That is, on one find they will be steady as possible and on the next nervous and over-anxious to see it in the air. Generally this comes from a young dog being obliged to catch cripples. He imagines every bird a cripple and is anxious to catch all for he is young and is not yet able to distinguish between the two. So if after catching a cripple for you at your own wish do not be surprised if he runs for the next bird he puts up before you get near him. His judgment is not as yet perfect and only his experience will teach him to distinguish between the two.

It is but justice to the farmer or rancher on whose place you hunt that your dog should be thoroughly broken of the habit of killing or chasing the domestic fowls of the agriculturist. Many unpleasant scenes between the rural dweller and the sportsman have been brought about through some young dog of the latter taking a chase after chickens. It could easily be avoided and it certainly ought to. Insist if your dog is sent to a trainer that he should be cured of the chicken habit if he has it and if you have undertaken the task yourself you should likewise break him. It is natural to the bird dog, be he either pointer or setter, to catch chickens and very few there are that will not do it unless corrected. In raising a puppy if you will have him continually associating with chickens it will not be likely after a few reprimands that he will ever develop the habit unless he is encouraged in it. They get old to him and social affiliation with them makes them appear as something that ought to be met with in the daily routine of life. But if he has the real reek in him and they appear strange to him, it is just as likely as not that at the first opportunity he will make a dash and capture the prize. If the dead chicken is fastened securely to him so he cannot in any manner tear it from his neck, and then left until it fairly ripens, his sense of disgust will be so offended that he usually is cured for good. The writer has, since the last few years, chickens always among his dogs and in two years only one has ever been killed. Considering strange dogs arriving and letters from owners warning me of their proclivities for chickens, it seems strange to me that I have not had more fatalities, but when a stranger arrives no precautions whatever are taken with the chickens, the dog is allowed to run with them at once. I presume they try to reason that if the other dogs won't chase them there would be no necessity for them attempting it.

Young puppies are generally the worst offenders, beginning by playfully capturing the tail feathers of some hen as a prize they are encouraged to go further until they get within close proximity of a hen with a young brood. Here biddy gives them such a warm reception that they begin at once to reason out the losing side.

The whip is of use at times, but as you can seldom catch the offender at the proper psychological moment, you resort to profanity, while if it don't correct the dog it soothes your offended pride, as Fido put a patch of bushes between himself and the whip. If you have your puppy under good control, it will not be hard, though he has never seen chickens before, to keep him from temptation. I have always believed that sheep would seldom be killed by dogs if they were more together, one to learn the other. Fortunately, bird dogs are not often offenders in the mutton line, for these depredations are usually committed at night (though not always), and bird dogs are not generally inclined to roam at night, and many cannot be gotten to even follow their devoted master at night. In fact, some fear the dark. Many years ago the writer possessed a pointer out of old Osborne Ale and this peculiarity was so deeply instilled in him that the moment the sun went down he would leave for home. It did not matter where you were or how birdy looking the country, he simply was afraid of the dark. It is also said by many that a dog will not return and eat off a carcass of a sheep that has been killed by himself. So it is in all likelihood that the shepherd that soaks the dead carcass of a sheep with strychnine often gets more dogs than committed the crime.

Most dogs are great pets, they like to be fondled and made much over by the owner or any person who is kindly disposed to pat them on the head and say "nice doggie" to them. One of the common habits of canines on such occasions is to stand up on their hind legs and place their fore feet upon the person petting them. This is a very bad habit and especially so when the dog's feet are dirty or muddy, and nice clothes are thoroughly soiled. An easy way to break any dog from this habit is to bend forward and gently step on the dog's hind feet. The animal will immediately jump back to save his toes and if this is repeated every time he tries to put his muddy feet on your shirt front or vest you will shortly break him of the habit.

ON A GERMAN GAME PRESERVE.

Sport as it is enjoyed on the famous old game preserves in various parts of Europe is unknown to most sportsmen in this country. In a general way it is understood that the foreign gentleman who wishes to entertain a party of friends with a day's shooting, conducts them to a favorable spot where, with attendants at hand to empty and reload guns, they wait until the driven game appears. Beaters or wardens form a skirmishing line in the thickest part of the preserve and beat their way toward the hunters, the game of all kinds fleeing before them. While this method of hunting may not be in accord with American ideas of sound sportsmanship, it will be admitted, after reading the following account of a week's shooting on a game preserve in Hertenstein, Germany, that there are many interesting features connected with the methods and customs of the gentlemen sportsmen abroad. The appended account was written by Pete Thorsen of San Mateo, who was at the time in Hertenstein, to a friend in this city:

"The grounds surrounding the castle are a dense jungle of what we would call brush, but which really are well-selected trees and shrubs which give the most beautiful effect in the spring, summer and fall. In this jungle are rabbits, hares, pheasants and partridges. In the parks or pasture lands near the castle many deer can be seen each day. They are the red deer and are the deer of which so many pictures are made. They are larger than any American deer, but are smaller than our elk. I counted 74 in one bunch the other day and there are many more which could not be seen. Only at certain times are they hunted and they are always safe in the parks near the castle for they are never shot. They know they are safe there for this rule is never broken, but when they go into the forests, then it is different, and if one is seen he runs at the sight of man. There are also many roebuck on the estate. There are also a species of small deer, of which there are none in America. They have peculiar short horns, but at this time of the year (March) they have none and therefore we will shoot none of these.

"I had always heard that the people in England and in Germany killed their game in what seemed to us a very unsportsmanlike manner, that is, driving it past the hunter. This is only done with the smaller game and I have changed my mind about it being sportsmanlike, but it certainly does result in a large amount of game being killed. The answer to this is that the game is grown for this one purpose—to be killed.

"I shall now describe one of these hunts, as for the last ten days I have hunted each day and we are to stay four days here. We are now at an estate in the mountains southeast of Cologne and are staying at an old castle belonging to my friend. The party consists also of my friend's brother, a Russian baron and a German baron. Immediately after breakfast we start out to an appointed spot, accompanied by about eight game keepers and foresters. My friend, the count, is absolute ruler of the day and the greatest honor is shown him. Whenever he addresses any of the game keepers or foresters they take off their hats until he has finished.

"As the beat or drive will take place along a wooded hill we are each given a station at the end of the hill or a spot commanding a ravine through which the game must pass. Then the word to start is given. The beaters, 30 in number, then walk through the woods, beating the ground or trees with sticks and all game hurries away, and toward the hunters. From the hunter's standpoint he does not know what game will come. The most common is the hare, which is perhaps a little larger than our jack rabbit and which runs like the wind. Perhaps it is a pheasant, partridge or woodcock. Jays and crows are also shot. The woods ring with the shots and one must keep his eyes wide open or the game will get past. To add to the interest the roebuck are driven by the beaters and dash past the hunters with wild, frightened eyes. Some days at least 20 passed me.

"The most sought for animal is the fox, and I have been the fortunate one to shoot three. To shoot a fox you must keep absolutely quiet, you must not make a move or the fox will see you and escape back through the beaters. One day I got two, and one came up within 20 feet of me before I made a move. Then he was away like lightning before I could shoot but I brought him down. These foxes are much larger than ours. They named me the 'Fox King,' for only one other had been shot.

"When one beat is over we move to another station and so the sport goes on until dark. Many miles are walked and we return to a big dinner and a feather bed, one mattress below and one above.

"A perfect record is kept of all shots fired and all game killed. This is given us at night after we return and such a record is always kept and has been kept for years back. Thousands of small game have been killed and hundreds of deer and roebuck. My friend's home is filled with the antlers of deer killed by himself and his ancestors. Every head is marked with the name of the hunter, the date and the place where the game was killed. Some go back to 1650. In some of the rooms they form the only ornaments on the walls.

"We took dinner today with a baron at Siegburg and in his dining room were the antlers of over 200 deer and many roebuck. He owned an estate in the Alps and had the horns of over 80 chamois on the walls. Deer and roebuck are never killed in beats. They are stalked and it is therefore an uncertain thing whether or not one gets within shooting distance. My first stag was killed on the eighth of the month. It was stalked in the forest and came down with the

first shot. Only one shot is ever allowed. If a miss then it is a distance, but the deer, if wounded, must always be finished with the knife. Upon my arrival I was presented with a long sword-like hunting knife. This must be carried always."

THE PERSISTENCE OF THE HUNTER.

[By Black Jack.]

What is the compelling desire that prompts or rather excites the courage, or, as many who never have experienced the irresistible desire express it, the reckless, foolhardy indifference that sends the hunter out to face danger, jeopardizing and risking limbs, health and life for the sake of bringing down to his feet the birds of swift wing, the fleet-footed deer or the more ferocious animals, the mountain lynx, or grizzly bear here in our North American fields of sport and in the jungles of India, Asia and Africa? Hunters will leave all the luxuries of earth, the presence of fair women; will go forth glad-hearted, enduring all manner of hardships to face the great, ferocious, human-devouring animals with an eagerness equal to that which the home-loving husband or father will greet his loved ones.

Many have asked what is it that prompts the hunter to raise his rifle and send death to a hawk that is soaring far up in the clear, rarified air? He sends death to this bird through the blue, serenely sacred peace of the still heavens, while sailing gracefully, beautifully along, evidently happy in the find of his might that Providence has given him above humanity.

The clear crack of the hunter's rifle echoes back from cliff to cliff. 'Tis the death note of the hawk, who falls into an abyss out of reach and if reached were of no value. He but amused himself for the moment and tested his skill—followed that unexplainable desire to deal out death to wild animal or bird life.

It is not that the hunter is cruel at heart, though he will, on the impulse of the moment, commit such acts. As generally hunters are extremely tender hearted, their associations and communication with nature creates a sympathy in their bosoms for all helpless things, and if asked to explain why he shoots the hawk he would find it a difficult task to do so. Had he come upon the hawk wounded the chances are he would have provided a meal for the wounded bird.

The careless regard for the life of bird or animal is not confined to the power he can exert over such. He is just as careless of his own life in following an instinct born in him. Hunters are not made, they are born. Why men will stand for hours, nearly frozen, wet and hungry, to get a shot at a bear, turkey or duck, they cannot tell, or why they will go forth on the trail of game which they know will rend their bodies into fragments, or tempt other dangers for the sake of coming in contact with the former.

In 1866 I was living in the city of Chihuahua, Mexico. This was during the time Prince Maximilian was invading Mexico, and Chihuahua was the most northern stronghold of his army. The country surrounding the city was overrun, not only with Apache Indians, but also by roving bands of Mexican bandits, who claimed adherence to the Juarez or Mexican army, and were little better than the Indians—as far as the life and property of an American (Gingos as they termed us) went. We took care of our own lives and looked to no laws for protection.

The Sierra Madres (mother mountains) almost circle the city. Running along the base of the eastern range is the El Sato river. At all times of the year its waters were covered with all kinds of waterfowl and quail abounded in every direction, besides deer, mountain lions and black bears.

Twenty-six foreigners of all nations, constituted the foreign element. Among them were a few who loved to hunt, and the dreaded Apache and bandits were a secondary consideration when it came to getting out to enjoy our sport, which we did often in spite of the danger of being killed or made prisoners by the bandits or pierced with a poisoned arrow from an Apache Indian's bow.

We always went out in parties of from three to six, well mounted on fleet-footed horses, a pair of heavy pistols, shotguns, and if there had been recent reports of depredations—our rifles were a part of the outfit.

Our best hunting points lay about eight or nine miles up the river and at that distance we were well out among the Indians. We used the greatest precaution, keeping in the openings as much as possible, taking turns at shooting. Half of our time was spent in scanning our surroundings, keeping constant watch, but this only gave zest to our sport and go out we would, in face of all dangers.

As redheads, canvasbacks and mallards, plover, curlews and the festive little jacksnipe, with many others, such as geese, sand hill cranes, swans and pelicans, were in abundance all around us, and at times we would almost forget our foes.

On one occasion three of us went out to our favorite ground, Fritz Moleman, one of the party, went up the river some three hundred yards above Mr. McManus and myself. Presently we heard him give a regular Comanche yell and saw him coming toward us at breakneck speed, moving his arm towards the opposite side of the river, the shore of which was thickly studded with boulders.

Our horses were hitched to some willows nearby and in short order we were in our saddles, shotguns having been thrust into scabbards we carried for the purpose, and out flew our 44 Colts. By this time Moleman had reached us. He did not have to explain

his haste, for nearly opposite on the other side nine Apaches let out a warwhoop that started all the ducks down the river. The Indians were some 250 yards away. We rode up just out of range of the arrows and sent six or eight 44s in among the rocks where they were concealed. They were foot Indians and we had little fear of them. Our shots quieted them. They had evidently made an attempt to sneak up on Moleman, thinking him alone. On discovering there were three of us they made no further demonstration. We then rode down the river two or three miles and got among the ducks again—and continued our shooting to our hearts' content.

I have never been able to determine what it is, or whence comes this reckless desire in he who finds the excitement so enjoyable, so absorbing, that no danger is too great to prevent him from seeking out the game he desires.

HOME MADE RODS AND TACKLE.

Fishermen are notoriously fastidious regarding the quality, style of manufacture and care of their tackle. Always characteristic of the trout angler is the carefully made fly, tied often by the same hand that wields the rod; closely selected and neatly tied leaders also go with the part. The craze has the charm of novelty, although a few enthusiasts for years have tied their own flies, made their own rods and cast their own sinkers, partly from a love of it and partly because they thought they got better results in that way. We know of one veteran disciple of Walton who makes every bit of tackle he uses except his line and the gut leaders on his hooks. He even manufactures his own reels.

Several years ago a great craze for making tackle developed among the salt water fishermen of California. Since the light-rod movement was started many of them have been unable to secure anything from the makers that suited them, no matter how carefully worded was the order. They want rods made according to their own specifications but few are satisfied with the manufactured efforts.

The chief complaint about the light rods being sent out was that they were of flimsy construction, sacrificing everything to lightness. The anglers want German silver mountings and not thin-drawn nickle-sheer brass. They want a joint at the reel and want it of large caliber with the grip on the tip rather than in the butt. This adds rigidity. It may increase the weight a little but adds to the life of the rod.

The makers are progressing rapidly in the class of work they are sending out in the medium weight rods, however, and before long it is likely that the sea anglers can get about what they want without having to make it themselves. Rough bethabara, greenheart or lancewood can be obtained from any of the big eastern houses or from San Francisco sporting goods dealers at a reasonable rate and anyone fairly handy with tools can make himself a rod in his spare hours, finding it both pleasant work and profitable.

Some fairly serviceable rods have been made of hickory, although its tendency to take a "set" is a severe drawback. It is well enough to practice upon, however, and one has a big advantage—it is practically unbreakable.

Lancewood is the ideal rod stock. It is more reliable than greenheart, not so unyielding as solid cane, and less likely to go wrong in a pinch. Carefully selected and carefully built cane rods are excellent tools but they require constant attention in the matter of varnish, and should have a dozen thin coats before they are put into use at all. Once the water penetrates the coating of varnish and loosens the glue that holds the sections together, trouble is in store; the rod may not show it at once, but sooner or later it will fail to respond. Then it will snap like glass.

In making a rod, agate mountings should be used. They are enough better to warrant the expense. German silver for double funnel guides are next best. Making reels is too much of a job for anyone but an expert mechanic, preferably a watchmaker. Even such have not the appliances for cutting gears to advantage.

Every angler, even if inexperienced in handling tools, can make up his own hooks. The turn-down eyed hooks of the Pennell or Carlisle type suggest several gut fastenings in which the loose end can be whipped to the shank, or against the snell with fine gauge copper wire. Properly made these hooks are better than any that can be bought, made up; they last a long time and are worth taking care of when once made.

Every fisherman should carry a little file or piece of oilstone to fetch up the points of his hooks. It also pays big interest on the time involved. Good hooks will take as fine a point as any needle.

In handling gut the novice must not forget to soak it thoroughly in tepid water until perfectly pliable and to tie the knots under water when possible. Otherwise the gut is likely to crack and a bad job is the result, for under such circumstances the tackle parts at a slight strain, and the tyro convinces himself that tackle making is a failure. Casting sinkers used to be necessary when one wanted a certain shape, but is no longer, as good ones can be had for a little more than the price of the lead. If one wishes to cast them he can make a mold of plaster of paris which will very soon turn him out all the sinkers he can use.

There is plenty of pleasure in it these coming long winter evenings.

Drink Jackson's Napa Soda

FIELD VS. TRAP SHOOTING.

We frequently hear it stated that trap shooting is detrimental to good field shooting. This is a most common statement by those who do not indulge in the sport, but has few supporters in the ranks of the trap shooters. It is claimed that the conditions of trap shooting are entirely different from field shooting and that frequently very poor trap shots are excellent field shots. It is pointed out that the trap shooter eventually gets into a certain routine of practice which are unlike the field conditions and that the habit thus acquired is hard to change.

We do not believe the non-trap shooter can prove his claims by facts. The true reason for many field shooters making such claims can generally be found in the fact that they have not taken sufficient part in trap shooting events and are therefore not qualified as experts to condemn the game. The various kinds of game shooting are not exactly alike. A man may be a fairly good shot at quail and snipe and yet be unable to make even an ordinary bag at duck shooting, and yet he would not venture the assertion that one interfered with the other. Some ordinary field shots always bring in a good bag of game, while some much better field shots do not get a large bag, though shot for shot, the man with the smaller bag may have a very much higher average of kills. One is a good shot, but he is not a close observer of the habits of the game he pursues and he does not find so much game to shoot at. The other is a close observer of the habits of game and both finds and misses more. If the better shot happens to be an ardent trap shooter the really poorer field shot will exhibit his larger bag of game as an example of what effect trap shooting has upon field shooting.

There are many shooters who are proficient at either field or trap, but we believe there is no just ground for claiming one kind of shooting interferes with the other, nor does it prove that a person may be proficient at one and not at the other. Some shooters make an excellent score on a certain variety of birds and do not do so well on others. They have not carefully studied the details required and mastered them. Again, some persons shoot poorly on one day and perhaps much better at another time at either or both, targets or game, and various "reasons" are advanced for failure to hit. The particular brand of powder, the size of shot, make of shell or gun, generally comes in for a share of the blame. Seldom, indeed, does "the man behind the gun" get his just deserts for the failure to make good. The good field shot who has not learned the trap shooting game does not like to appear before the traps and make a long score of goose eggs in competition with proficient trap shooters who had previously shown their lack of education in game shooting. It is much like the city boy visiting the farm and the country boy visiting the city, each finds new conditions which he must learn or appear as a source of innocent amusement to the other. Either can readily learn and adapt himself to the changed conditions and be greatly benefited as a result.

AT THE TRAPS.

The Topperweins were at Modesto last Sunday. Mrs. Topp broke 99 out of 100, 85 straight, then dropped one and cleaned up without a miss.

The Blue Rock Club of Nevada City held a shoot on the 4th inst. Frank Evans and Roy Hays tied with 19 breaks out of 20 in the club race.

Two team shoots, 20 targets per man were shot. The scores were:

Evans' Team—Evans 19, Schumaker 15, Morgan 12, Hicks 17, Hays 19; total 82.

McKaig's Team—McKaig 18, Stone 18, Rex 15, Schmidt 13, McCutcheon 12; total 76.

Tom Blight, who was a guest of the club, tried his eye and broke 45 out of a possible 50. The following score was made by members of the club and some outsider who did not participate in the shoot between the two teams: Kendricks 13, Hooper 17, Blight 22, Petter 8, Evans 20, Rex 16, Schmidt 16, Evans 22, Blight 23, McCutcheon 12.

The team shoot, 25 targets per man, for the Lahor Day prize was won by the Evans team, 89 to 88. The scores were:

Evans Team—Evans 23, Schmidt 18, Tamblin 16, Morgan 16, Morgan 14, Schumaker 18.

McKaig Team—McKaig 20, Stone 22, Rex 15, Hays 17, Hicks 18.

Ralph Miller certainly had it all his own way at the West Seattle Gun Club's regular weekly practice shoot on August 28, so states a Seattle exchange. He lost three out of the first frame of 15, then he made a run of 102 without a miss, establishing a new amateur record for the club, and getting a win on the Ballistic Cup after shooting off a tie with Arnold and Ross. He also won the Selby watch event after shooting off ties with Williams and Canuck.

Williams was next high amateur with 92 out of a possible 100, D. Reid, Arnold and Canuck tying for third place with 90 each.

"Bill" Hillis was high professional with 96, Barkley second with 93 out of 100.

J. W. Considine Sr. and Jr. were out for the first time since their return from Europe. J. W. Sr. brought an elegant pair of Purdy guns back with him and was trying them out. That accounts for his only scoring 80, but then that is not at all bad for the first time with a strange gun.

J. W. Jr. started out to shoot the regular score of 100, but had to quit at 65 on account of his shoulder giving out; and when he gets one of those new Purdeys restocked to fit him he will undoubtedly do much better.

"Father" Garrison, is certainly a very useful man to have around a shoot. He is always ready to score, referee or even pull traps if necessary to keep the game going. He did not shoot on this occasion, because the manufacturers will allow only one of their men to shoot at a practice shoot at a time, and Hillis being a visitor in his territory, Garrison extended that courtesy to him.

Randlett did not shoot up to his regular form but when he gets used to that new pair of 34-inch barrels he will sure have the rest of the boys handicapped.

No. 1 squad in the fifth event each made straight, with the exception of one man. He dropped one target and as a result had to carry all five guns back to the club house.

There were twenty-four shooters present. Following are the scores:

Targets	15	15	20	15	15	20	100
Hillis	13	15	19	14	15	20	96
Barkley	13	15	19	14	14	18	93
Peterson	13	13	15	13	15	14	83
Smith	13	11	19	14	15	17	89
Reid	12	13	19	13	15	18	90
Nelson	11	13	19	14	10	16	83
McKinnon	7	11	15	10	8	16	67
Stadtfeld	8	11	9	11	9	12	60
Kelleher	11	12	12	12	12	18	77
Williams	13	14	20	13	12	20	92
Randlett	14	12	19	15	13	15	88
Considine Sr.	10	12	17	10	15	16	80
Babcock	11	11	19	13	10	17	81
Miller	12	15	20	15	15	20	97
Arnold	13	15	18	13	12	19	90
Canuck	13	13	20	14	14	16	90
Robb	13	11	14	13	13	13	77
Donald	11	14	18	12	13	16	84
Hopkins	13	12	16	13	12	18	84
Considine Jr.	5	11	17	6	1	1	39
Brown	6	1	7	1	1	1	14
Ross	14	15	18	1	1	1	47
Newcomb	14	13	16	1	1	1	25
Hall	14	13	16	1	1	1	43

The Grand Chicago Handicap under the auspices of the Chicago Gun Club, August 29, 30 and September 1, was held under very successful and pleasing conditions.

The feature of the meeting was the performance of J. R. Graham of Long Lake, Ill., who made a world's trap shooting record by breaking 417 targets continuously at 16 yards rise.

The feature event of the shoot was the Grand Chicago Handicap, Wednesday, August 31, in which 103 shooters participated.

The 100 targets in this event were shot right down the line. At the finish Hugh Clark of Urbana, Ill., shooting at 20 yards rise, and Albert Southard of Pocatonia, Ill., 19 yards, were tied with 94 birds each, for the \$500 trophy and first two moneys. The purse moneys were divided and then a 20-target race took place for the trophy. Southard scored 16 to Clark's 12, both men shot way below the mark they had in the main race.

The secondary feature of the tourney was a 50-target match on the last day, 16 yards rise. J. B. Barto of Chicago broke 49 and won. Throughout the shooting a strong wind prevailed. Billy Crosby scored 50 straight in this event.

The club added \$200, divided into 19 parts, the first day; \$100 the second day, divided in 14 parts, \$400 in the Grand Chicago Handicap, divided into 16 parts; \$100 the third day, divided into 12 parts, and \$100, divided into 8 parts, for the special event—\$900 in added money is a pretty bunch of coin to shoot for.

J. R. Graham broke 200 straight the first day, 100 straight the second day and 149 out of 150 the third day—449 out of 450, this is going some with a shotgun.

Grand Chicago Handicap, 100 targets per man, in five 20 target sections, handicap 16 to 23 yards:

Young	22	87	Hicks	16	81
Graham, J. R.	23	91	Holtz	16	80
Barto	21	88	D. Miller	18	79
G. Roll	21	84	Humphreys	18	85

U. M. C.—Remington Notes.

At the first annual Grand Chicago Handicap all amateur world's records were broken with the U. M. C. Remington combination. Mr. J. R. Graham, the great amateur shot, broke 432 targets without a miss, shooting U. M. C. steel lined shells and a Remington pump gun.

This phenomenal record again demonstrates the merit of U. M. C. steel lined shells—the winners of 10 straight Interstate Handicaps (every event for two years)—also the efficiency and dependability of Remington guns, winners of 50 per cent of the Interstate Handicaps for the past two years—as many winnings as were made by all other guns combined.

Now is the time for duck hunters to line up with the best amateur trap shots of this country and specify U. M. C. steel lined shells in ordering their duck loads for the season.

On the Pacific Coast U. M. C. steel lined shells are furnished in Selby loads—the Arrow brand in Challenge grade and the Nitro Club in Superior grade.

The powder charge in the shells rest against the steel lining, protecting it from moisture, therefore insuring uniform loads in all kinds of weather.

Peters Points.

At Greenville, Ala., September 1st, Mr. H. D. Freeman, shooting Peters factory loaded shells, broke the entire program, 200 straight. Mr. Freeman is a steady 95 per cent shooter, but is liable at any time to pull off a spectacular performance such as the score recited above, and his 99 out of 100 from 21 yards in the Southern Handicap at Columbus, Ga., last spring.

At Denver, Colo., August 30th to September 1st, Mr. O. E. Searles won second professional average, 384 out of 400 with Mr. Max Hensler third, 383 out of 400. Both gentlemen using Peters factory loaded shells.

At Wilmot, Ohio, September 2d, Mr. W. R. Chamberlain won second professional average, 134 out of 150, using Peters factory loaded shells.

At Dows, Iowa, August 31st, to September 1st, Mr. L. H. Fitzsimmons won high professional average, scoring 185 out of 200, with Peters factory loaded shells.

At Niles, Ohio, September 5th, Mr. Sam Belsin of New Brighton, Pa., won high general and high amateur average, 148 out of 160. Mr. W. R. Chamberlain was high professional, 142 out of 160. Messrs. Chamberlain and Belsin both used Peters factory loads.

[Continued from page 5.]

Neck and neck at the drawgate became nose and nose at the wire and, after a long deliberation over it, the judges gave the heat to Helen Stiles but there were scores inclined to dispute the verdict. I could not be one of them for the reason that I sat about seventy yards above the wire and no one can determine the finish of a race correctly from such an angle. You must be at the wire, either over it or under it, to get a view that is absolutely perfect; and, having been a judge myself and, having had my decisions on several occasions severely censured by men who were standing from twenty to fifty feet from the wire, I don't feel much like criticising other men's verdicts. My own belief is that most of the growling came from men who had bet upon the brown horse and were arguing from interested motives. The time was 2:09½ and that took the shine out of Prince Lot. The verdict of fourth for Lee Crawford and third for Lady Inez, shut out more competitors, these being Kingbrook, Katalina, Mayo, Alfreda B., Tell Tale and Zombronut, they not having won one heat in three.

Fourth Heat.

As the horses came out I had a good look at both the leaders in the third heat. Helen Stiles was breathing fresh and strong, while Prince Lot had hung out a call for the bellows-mender. Six horses had gone to the stable, and now there was plenty of room for the quartette. At the first attempt Helen Stiles and Prince Lot got off well together, but Durfee, knowing his mare did not do so well on curved ground, kept her just so far behind Prince Lot that he could not possibly take the track away from her. As they swung into the back stretch she went away from him an open length and kept him doing his best to stay anywhere near her. Around the turn they came, the mare going easily and Lot pegging along like the sturdy Trojan that he is. Once in the stretch Spencer made a final rally and got Lot up to the mare's wheel, amid deafening cheers from the bleachers but their applause was short-lived, for Charley gave the mare her head and she soon came away easily. The official time was 2:11½ and there were several private watches got it at 2:11. My old ticker said 2:10 4-5, but I sat at an angle and could not well claim to be correct. It was now evident that nothing but a miracle could defeat Durfee's mare and she went out and won the fifth heat cleverly in 2:14. Lee Crawford coming in second, Prince Lot third and Lady Inez last. This did not, of course, affect the official placing of the horses, as Prince Lot had taken the two first heats which insured him the second money. Some people near me expressed a belief that Prince Lot could beat Helen Stiles at a mile and repeat, but they should remember that Durfee made no effort whatever for the first heat, being content to get fifth place in that heat to insure him a position in the front rank for the next heat; and what Helen Stiles did after that is a matter of turf history. She is a grand-looking mare, of magnificent proportions and her gait is simply "The poetry of motion." I have just one objection to her and that is that I do not own her myself.

The Consolation Purse.

For this class of horses was trotted on Saturday, the 10th inst., and under very different environments from the contest of Thursday. In the articles of the \$10,000 offering, it was distinctly stated that \$2000 of this money was to be reserved as a consolation purse, Saturday. In the main race on Thursday, Henry Grey, an old gray gelding by Zolock, finished eighth in the first heat and was distanced in the second. But the venerable gray has had bad legs and cannot do himself justice on a firm track. But Saturday brought a change of weather and, to borrow the language of Aytown

"The morning dawned full darkly,
The rain came plashing down;
And the jagged streak of the levin bolt
Lit up the gloomy town."

It poured at breakfast time as hard as I ever saw it in semi-tropical Los Angeles. At 10 o'clock the sun was shining brightly and again, just after the noon hour, another shower came on which made the turns and back stretch ankle deep in mud, while the home stretch was simply a quagmire. To give the harness horses a chance, McCarthy sent off two sprint races of gallopers, in order to give the track time to dry out. There was one heat of a pacing race won by Sherlock Holmes in 2:15 quite easily; and then came the consolation purse of \$2000, in which Kingbrook, Freddie C. Jr. and Zombronut were scratched. I ask how any man could have pictured the winner of this race from the showing made by the several contestants, in the main race of Thursday, which was as follows:

Katalina	9	4	8
Mayo	6	7	6
Alfreda B	4	10	9
Tell Tale	11	8	7
Goldennut	7	ds	
Henry Grey	8	ds	

But as the Hastings horses bred by August Belmont nearly all of which have bad legs and feet—win most of their races at the early spring meetings when the tracks are muddy, so Henry Grey, Alfreda B. and Goldennut reversed the showing of Thursday on Saturday's muddy track. Joinder drove Henry Grey and gave a most startling exhibition of coming from behind in the final half-mile of each heat and winning like a hero. He was forty yards behind

at the half-mile in the first heat; sixty in the second; and not less than eighty-five in the third, when everybody around me said he would be distanced. But just about the time these sad prophecies were uttered, the driver called on the gallant gray and the grandson of McKinney 2:11¼ responded as his grandsire did at Los Angeles twenty years ago, winning the race in straight heats, the third being the fastest of the race. In this he won by the shortest of heads and must have trotted the last half somewhere close to 1:08.

HIDALGO.

GRAND CIRCUIT AT HARTFORD.

Hartford, Sept. 7.—After two days' postponement on account of rain, two races were decided today on a heavy track, with the following results:

2:14 trot; purse, \$1000.	
Biza, b. m. by Bingara-Komura, by Kremlin (Cox)	1
Borvaldo, b. g. (Murphy)	2
Olive F., br. m. (Gahagan)	3
Orlean, b. (Benyon)	ds
Husky Harry, br. h. (Skaheen)	ds
Time—2:11¼, 2:10¾.	

2:12 pace; purse, \$1000.	
Joy Boy, blk. g., by Millerton-Miss Aerito (Leary)	1
Mike Wilcox, br. g. (Opdyke)	2
Dr. Fox, b. g. (Gahagan)	3
Time—2:11¼, 2:11¼, 2:11¼.	

Sept. 8.—The flying sulkies drew a full house at the Grand Circuit meeting today, but the many thousands who came to see Uhlán were not treated to a sight of the champion trotter at speed. His owner, C. K. G. Billings, who came here to drive the black horse to wagon, found the footing at the pole too soft for a satisfactory performance and decided to wait until tomorrow for the trial, when he will endeavor to reduce the track record of 2:04¼. Four good contests consoled the big crowd for the non-appearance of the two-minute trotter and the famous old Charter Oak stake was the star attraction.

General H., a sturdy bay stallion from Calgary, Canada, carried off the honors and earned \$5500 by leading his field three times, the limit of the contest. The bantam Hoosier candidate, Gamar, was the dangerous member, though he was very sick with distemper on Monday. He was well up in the first heat when Binvol slipped through at the pole and stole the place from him. In the second round Gamar led most of the way and only surrendered in the last furlong. This told on him and he gave up earlier in the third heat, while Arie Leyburn, from Arkansas and Demarest, in Geer's stable, led to the home stretch. Then the Canadian challenged and in a rattling brush with Soprano, John E. Madden's filly, won by a length.

Six horses divided the prize money, Gamar getting \$1500, the next share to General H.'s large slice, while Alice Roosevelt, owned by W. H. Moffitt, New York, received \$1200; Soprano and Binvol \$750 each and Teasel got \$300. This was the twenty-fifth contest for the Charter Oak stake.

The other two trotting classes also were settled off-hand, though Creighton, with a new pilot in W. J. Andrews, put up a great argument for the 2:20 trot, and it took every ounce out of Captain Cute to shake off the Boston horse. Startle, from Ohio, won the faster event cleverly, and Earl Jr. was the master of the 2:05 pace, in which he equaled his mark each time.

Governor Frank B. Weeks made a formal visit while the race was on with his staff, and occupied the box next to Mr. Billings. Summaries:

2:09 trot; Charter Oak; purse \$10,000:	
General H., b. h. by Combineer-Jessie Wallace, by Midvale (G. Hoag)	1
Gamar, b. h. (Harrison)	2
Alice Roosevelt, ch. m. (T. Murphy)	3
Soprano, ch. m. (Andrews)	6
Binvol, b. h. (Snedecker)	8
Teasel, c. m. (Benyon)	4
Demarest, b. g. (Geers)	7
Arie Leyburn, br. h. (Rosmire)	5
Grey Gem, g. g. (Gahagan)	dr
Aquin, b. h. (A. McDonald)	ds
Silence, b. h. (Thomas)	ds
Time—2:08¾, 2:08, 2:09.	

2:20 trot; purse \$1000:	
Captain Cute, blk. g. by Dan Court-Geraldine by Kaiser (Gahagan)	1
Creighton, b. g. (Laselle)	2
Henry Winter, b. h. (A. McDonald)	5
Betsy G., b. m. (Cox)	3
Helen Richmond, b. m. (Hendrickson)	4
Border Guard, b. h. (Miller)	6
Time—2:11, 2:09¾, 2:09½.	

2:11 trot; purse \$1000:	
Startle, b. g., by William Wilkes-Cuba, by Red Wilkes (Gahagan)	1
Justo, b. h. (A. McDonald)	2
Melva J., b. m. (Cox)	3
Dora, ch. m. (Pennock)	4
Time—2:16½, 2:11, 2:12.	

2:05 pace; purse \$1000:	
Earl Jr., g. h. by The Earl-Jennie, by Sagasta (Cox)	1
Jennie W., b. m. (Sunderlin)	2
Ella Ambulate, b. m. (Murphy)	4
Walter W., b. g. (Geers)	3
Time—2:05¼, 2:05¼.	

Sept. 9.—The breaking of the world's trotting record in an exhibition mile by a horse driven to

wagon and without shield was the feat accomplished at Charter Oak park this afternoon by Uhlán 1:59¼, driven by C. H. K. Billings of New York. Uhlán was paced by a runner, and negotiated the mile in 2:01 1-5. The task undertaken was to break the record established by Hamburg Belle of 2:04¼.

The performance of the gelding today is considered the best of his career, all things considered. The mark of 1:58¾ was made at Cleveland under track conditions decidedly more favorable than those of today, for the under surface of the course here was soft, owing to the heavy rains of the early week. A strong wind also swept the course.

The mile was traveled today in magnificent form, and the great crowd was on its feet most of the time. As the horses swept into the stretch the runner found it difficult to maintain a lead, and as Uhlán passed under the wire a great cheer arose from the grand stand, although it was not then known that the track record had been broken. When the figures were flashed the enthusiasm was renewed nad Mr. Billings was given an ovation. The time by quarters was as follows: First, 1:30¼; second, 1:00¼; third, 1:32¼; fourth, 2:01¼.

Sensational horse racing brought to a close today the Grand Circuit meet, held in connection with the Connecticut State fair at Charter Oak park. The other feature was the breaking of the track record by The Harvester in the free-for-all trot. The track events were the finest of the week.

The Harvester won in straight heats, the time in the second and final heat being 2:03, which broke the track record of 2:04¼ made by Hamburg Belle.

The honors in the 2:16 pace and the 2:16 trot went in straight heats to Sara Ann Patch and Dudie Archdale. The first heat of the 2:17 trot was won by Senator Hale in a close finish. Rebecca G. took the second and the two winners fought it out alone in the final heat, the mare winning easily. Summaries:

2:16 pace; purse \$1000; three in five:	
Sara Ann Patch, blk. m. Joe Patchen-Sara Ann, by Thistle (Cox)	1
Dirl, b. h. (Thomas)	2
Major Strong, g. g. (Brusie)	5
Buster Brown, b. g. (Pope)	3
Sallel Mate, b. m. (Murphy)	4
Time—2:08½, 2:09½, 2:10.	

2:16 trot; purse \$2500; three in five:	
Dudie Archdale, blk. m. Archdale-Dudie-Egmont, by Egmont (Jones)	1
Willy, b. h. (Waterson)	2
Sable Maid, blk. m. (Hoelet)	3
Baron Dell, b. g. (Deverson)	ds
Time—2:10, 2:10, 2:09¾.	

Free-for-all trot; purse \$2500; two in three:	
The Harvester, br. h. Walnut Hall-Notelet, by Make (Geers)	1
Bob Douglas, g. h. (McDonald)	2
Sonoma Girl, b. m. (Cox)	3
Jack Leyburn, ch. g. (Gody)	5
Baron May, br. h. (Sayles)	4
Time—2:06, 2:03.	

2:17 trot; purse \$1000; two in three:	
Rebecca G., b. m. Infact-Clara Simmons, by Jay Bird (Milan)	1
Senator Hale, br. h. (Kelty)	4
Orienta, b. m. (Benyon)	5
Arlington, b. h. (Walsh)	6
Major Wellington, br. g. (McDonald)	3
Miss Winter, blk. m. (Bennock)	5
Time—2:12¼, 2:11¼, 2:15.	

BETTING ON THE GRAND CIRCUIT.

At all the Grand Circuit meetings this year book-making has been tabooed, says Field and Farm. The running turf never could stand it but the trotters can and this through the liberality of the men who keep the sport going and make it so popular all over the land. However, even harness racing without this adjunct is a bit like a thick porterhouse and no salt, but the Indians ate dog without flavoring and the whites are trying it. Speculation is allowed on some of the tracks in the Middle West, and hand books are still in vogue around the lobbies at night. At Grand Rapids, about \$50,000 was sold in the auctions and at Kalamazoo the amount ran up to about \$80,000. Then came the blue ribbon meeting with its crowd from all over the country and everybody flush. In the five afternoons at Detroit the auction box handled \$300,000 and the bookmakers were kept busy in spite of odds which would make a running track follower call for help. At Cleveland, where they tried to stop pool-selling late in the week, the game was very fair. Only a small percentage of the people who go to the trots pay any attention to the beating. There are more questions about breeding than about odds and this is far more interesting.

RESULTS FROM ABSORBINE ARE GRATIFYING.

ABSORBINE has recently cleaned up a case of Bog Spavin on a horse owned by Dr. O. R. Bushfield of Iola, Kansas, who reported under date of May 16, 1910, as follows: "The young horse I wrote you about some time ago is now sound as his mate. He surely was a promising case for 'Bog' if I ever saw one. Strained the leg while playing and it was badly swollen and very feverish at the time you advised me as to treatment of case. Got a bottle of ABSORBINE from local dealer. Only used about one-third of it. Results so quick and satisfactory are very gratifying. Shall keep a bottle of ABSORBINE around my stable hereafter." ABSORBINE for treating Bog or Bone Spavin, Thoroughpin, Rheumatism, Capped Hock, Fistula, Swollen Glands, etc. On sale at druggists at \$2.00 per bottle or sent direct upon receipt of price. Write for pamphlet giving detailed information.

W. F. YOUNG, P. D. F., 54 Temple Street, Springfield, Mass.

THE FARM

TRANSMISSIBLE

HORSE DISEASES.

One of the interesting lectures before a class of farmers recently at the Colorado university farm was by Dr. Lipp of the veterinary division, on the subject of transmissible diseases among horses. He divided spavin and kindred bony diseases into two classes. In the first class he placed those that result from injury, and in the second those that result from faulty conformation.

A sound horse of sound conformation that receives a kick and then develops a bony disease would clearly belong to the first class. There would be very little danger of such disease being transmitted to offspring. On the other hand if by reason of faulty conformation a horse develops a spavin, when employed at ordinary work, the offspring from such a horse would not inherit spavin, but would be predisposed to the disease on account of an inherited faulty conformation.

He then applied the same reasoning to various other diseases, and showed that the disease itself is not transmitted, which frequently requires but a short time to develop into the diseases under favorable conditions. To sum up the doctor cautioned the farmers against using not only unsound animals for breeding stock, but advised most strongly against using animals of faulty conformation.

In reply to a question, Dr. Lipp discussed navel diseases at some length. This disease is caused by the entrance of germs into the colt's body through the stump of the navel cord. The germs causing the navel disease live in the stable, on the walls, in manure and filth on the floor and sometimes on the skin of the dam herself. He advised perfect sanitary conditions about the barn and stalls as the best preventive.

He would thoroughly clean the stall in which the mare is to foal, and disinfect with whitewash in which crude carbolic acid was added. He would cover the floor with clean straw and have the mare thoroughly washed about the root of the tail as late as possible before foaling, so that her parts may be free from germs and the possibility of germs entering the navel through contact with the mare would be reduced to a minimum.

Then he would handage the colt's body with antiseptically clean swaths, using also antiseptic cotton as a pad on the navel, which a 6 per cent solution of carbolic acid—one ounce of the acid to nineteen of the water—is used. The handage is also a support to the young animal's body, preventing an undue strain on the abdomen.

FALL FOALS.

It is claimed by many breeders and farmers of experience that the fall foal will do better than the one coming in spring. One advantage at least in having the foal to come in the fall is that the mare will not have so much work and heat to endure during the lactation period and that she will be in a better condition to supply more nourishment to the foal. The special advantage at this season will be that the mare will not likely become excessively heated at work, and hence the digestion of the foal is not apt to be deranged.

Where the mare is bred in the fall the time should be delayed so that the foal will come after most of the flies have died, as many flies hitting a young animal will worry it and cause it to become

stunted sooner than anything else. Also, as soon as the fall foal begins to eat solid food it should be encouraged and fed liberally so that it will grow and be in good flesh for the coldest part of winter. Provide it and the mare with a warm and dry stall during the winter, and feed some bran and oats regularly to furnish milk forming material and mineral matter for good frame.

It is better to breed mares in the fall than to allow them to skip a year, yet on the whole better results will be secured by breeding them in the spring, and the earlier the foal comes the better it will be for both it and the mare. The early spring foal comes at a time when the mare is not hrdened with the heat and heavy work of summer, and all young animals do apparently better at this season than at any other. The main point in developing the spring foal is to get it well started during the first cool months, so that it will not become stunted with hot weather and the flies. If it comes early in spring it will be old enough to eat grass as soon as pastures are good, and it will make a good growth during the summer and fall, being strong and in good flesh for the rigors of winter.

KEEPING UP THE DAIRY HERD.

The success of dairy farming depends largely upon certain fundamental conditions. First, the owner of the dairy or the man that has it under his control and management. He must have a fondness for animals and especially dairy cattle, that prompts to kind treatment as well as good judgment in selecting, breeding and caring for them; he may be a good horseman and have a liking in general for cattle, but this is not sufficient. For the best results he must have a special fondness for dairy cows and the dairy business.

Second, the cattle must be good of their kind and of a variety suited to the work, they must be dairy cattle and not of the beef breed.

Third, the farm must be suited to that branch of farming, as there are many good farms that are adapted to almost every branch of farming except dairying and are not at all suited to that business.

Fourth, the character of the accessible markets and the means of communications should be closely observed, location and the line of dairying may be chiefly controlled by the markets. After all the above have been carefully considered the next important thing is in the selection of the herd. Dairymen differ to some extent on the kind of cow which is most profitable; some prefer a general purpose cow, one that is mixed with the milk producing family and the beef breed of cattle. Such cows are of large build and easily fattened when not in milk, and should one prove unprofitable she can be put on the market for beef at a good price; such cows, too, have large calves that are profitable at the proper age for veal or to keep over until they are two years old, then sell to cattle dealers.

Some prefer (myself included) cattle of the distinct type especially adapted to milk producing. This class includes several families or breeds of cattle but all have the marked characteristics of milk producers. The best way to keep up the herd to its desired number of good cows is by breeding and raising the calves from the best milkers of the herd.

I do not like the idea of buying and bringing new cows into the herd as it is dangerous and many a herd have had disease brought among them by the purchase of a single cow and bringing her into the herd. I always save the fourth or fifth calf of my best milkers and breed them at two year olds and at the same time weed out the cows that are unprofitable.

The Most Perfect Colt Bit Made

EVERY COLT

Should wear the **ELLIS IMPROVED HUTTON PATENT CHECKING DEVICE** from the very beginning of its training, as it is the easiest, most comfortable and most humane bit on the market. With its use the colt will not fret, worry, pull, toss its head and get into the bad habits so often caused by the use of other bits and checking devices that inflict punishment or keep it under too much restraint, and at the same time you will have absolute control over it at all times.

Patented Aug. 11, 1896. Patent No. 565,681

BEWARE of worthless infringements and Checking Devices claimed to be as good as the **ELLIS IMPROVED HUTTON PATENT CHECKING DEVICE**. Illustrations of some of these check bits and devices are made to look as near like the genuine as possible, but the article itself is very different, and will not give the same results.

ALL GENUINE are stamped **G. S. ELLIS & SON** on the supporting strap and back part of Check Rein. Any that are not so stamped are not genuine.

FREE—Our new Catalogue No. 45, with wholesale discount sheet, the largest, finest and most complete Horse Goods Catalogue ever published, is ready for distribution. It contains illustrations, descriptions, and guaranteed to be lowest prices on Harness, Horse Boots, Horse Clothing and Tack Goods of every description. Every horseman should have a copy. You can save many a dollar during the season by buying direct from us, as we are now selling direct to horsemen, allowing them from 30 to 50 per cent discount from retail prices. Write us today for a copy and we will take pleasure in sending it to you all charges paid.

The choice of the hull is of very great importance, and the saying that the hull is half the herd should not be forgotten by the dairyman, as every calf added to the herd takes half its blood from the hull. One cow may prove a poor dam and fail to breed for a season and yet give a profit in milk. Such a fault is but a trivial one and can be easily corrected, but if the hull proves a poor sire, the increase for a whole year is lost. It can be readily seen that it pays to purchase a good hull and one that has been tried.

The temperament of the hull depends largely on the kind of treatment he receives and the way he is handled from calfhood up. I have reared a few hulls and kept some of them until considered too old for service and I always begin by inserting the nose ring before the calf is a year old and by always keeping it under subjection, never allowing it to realize its strength.—Farm and Ranch.

TYPES OF DAIRY FARMING.

There are three more or less distinct types of dairy farming, namely, (1) the selling of milk and cream, (2) the production of milk for butter and cheese making, and (3) the raising of pure-bred dairy stock for sale as breeders. Generally speaking, when dairy farming is intelligently conducted it is quite profitable, though it requires more labor than other forms of live stock farming and a larger investment of capital. Beginning in a small way the capital necessary can be earned, and this is usually done by men who embark in dairy farming. In fact, it is much safer to begin any intensive form of farming on a small scale in order to learn the details of the business with as little risk as possible. Dairy farming maintains the fertility of the soil perhaps better than most other types of farming. This is especially true where only the coarser feeds are grown and the

concentrates are bought. In recent years the prices of farm labor and concentrated feeds have risen to such an extent as to reduce materially the profit from dairying, but it is still one of the best forms of live stock farming for the beginner.

By having a good garden and plenty of small fruits, the small dairy farmer has most of his living at home, thus being assured against want. It is best to start in with a good quality of grade cows rather than to begin by purchasing high-priced, registered stock. But it is highly important to use pure-bred sires in building up and maintaining the efficiency of the herd. Generally it is not

Warranted to give satisfaction.

GOMBAULT'S CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a **HUMAN REMEDY** for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

Every bottle of **Caustic Balsam** sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

PHENOMENAL SCORES

MADE WITH

Peters Loaded Shells.

Mr. J. S. Day of Midland, Texas, attended a series of Texas tournaments from Aug. 8th to 18th, and **BROKE ALL AMATEUR RECORDS.** His scores follow:

August 8-9, Midland, Texas,	484 ex 500	August 15-16, Gorman, Texas,	398 ex 400
August 10-11, Big Springs, Texas,	442 ex 450	August 17-18, Walnut Springs, Texas,	397 ex 400
August 12-13, Cisco, Texas,	395 ex 400		

From this it will be seen that Mr. Day averaged **98.4** per cent on **2150** targets and **99.16** per cent on his last **1200** targets.

He used **PETERS** regular factory loads, **NOT SPECIAL**, but bought from Texas dealers—the same quality goods anyone can buy anywhere.

San Francisco: 608-612 Howard St., J. S. French, Mgr.
New Orleans: 321 Magazine St., P. R. Litzke, Mgr.

safe to depend upon maintaining a herd by buying regularly. It is much more satisfactory to raise the cows on the farm.

As between the various types of dairy farming, local conditions must determine which is most desirable. If one is located near a large city or near a railway station which gives direct connection with the city, the selling of milk or cream is the usual form of dairying followed. In sections where a market for milk is not to be had, butter making is the more usual type of dairying. Even near the large cities a few farmers find it desirable to make butter for supplying private customers, and this form of the industry is a very satisfactory one where the butter can be sold at a reasonable price. Cheese making is not often conducted on the farm, but is usually confined to factories. Most of the butter is also made in factories, and even where milk can not be sent to a city in most regions where dairy farming prevails it can be sold at a local creamery or cheese factory. Concerning the raising of purebred dairy stock for sale as breeders the same principles apply as in the raising of other classes of stock. It is only the breeder who has the reputation who can sell his young stock for high prices. Most of these breeders began in a small way, purchasing a few registered cows and gradually allowing their produce to replace the grade cows in their herds.—Yearbook, Department of Agriculture.

SHEEP FACTS.

If too many sheep are confined on a pasture they will eat the grass roots right out of the ground.

Ensilage is not considered good for sheep, and if it is fed at all it should be given very sparsely, and at intervals of two or three days.

Too many farmers treat their sheep as they do their orchards—give them a little boost at the start and then let them take care of themselves.

The largest profits in mutton are from the lambs that are pushed from the beginning, and sold when they are just at the top-notch condition.

Turnips, carrots, and sugar beets make fine feed for sheep, and no matter how small the flock, every farmer should raise some roots for winter feeding.

Some people assert that sheep do not drink water at all, but it may be because they do not have a chance to get clean water and must subsist on the dew on the grass.

Western sheepmen, who for years did not seem to know the difference between good wool and poor, are now greatly improving their flocks because they have learned where the profits in the wool business lies.

Dairy products rise with the coming of cold weather. Keep up the flow of milk to secure some of the profits.

TAINTED MILK.

The following are twelve causes of tainted milk:

- 1—Poor, decayed fodders or irrational methods of feeding.
- 2—Poor, dirty water used for drinking water or for the washing of utensils.
- 3—Foul air in cow stables, or the cows lying in their own dung.
- 4—Lack of cleanliness in milking; manure particles on udder.
- 5—Keeping the milk too long in warm, poorly ventilated and dirty places.
- 6—Neglecting to cool the milk rapidly, directly after milking.
- 7—Lack of cleanliness in the care of the milk, from which cause the greater number of milk taints arise.
- 8—Poor transportation facilities.
- 9—Sick cows, udder diseases, etc.

CLOTHING AND MEN'S FURNISHINGS

696 THIRD STREET

San Bernardino, California

Schleisingerville, Wis., May 28, 1910.
Troy Chemical Co., Binghamton, N. Y.:
Gentlemen: I would like to ask your advice on a lame horse that I purchased, etc., etc.

I have used your "Save-the-Horse" Spavin Cure and find it to be just as represented.
Thanking you in advance, I remain,
Yours truly, THEO. KORTEMEYER.

Office of the Clerk of District Court,
Franklin County, Iowa.
Hampton, Iowa, June 28 1910.

Troy Chemical Co., Binghamton, N. Y.:
My son and nephew have been using your horse liniment and they find it does the work. Yours truly,
E. M. GILLETTE.

Victor, N. Y., July 1, 1910.

Troy Chemical Co., Binghamton, N. Y.:
Dear Sir: My horse has been afflicted four months, etc., etc. Do you think you can cure or even help?
There is a man in Canandaigua, seven miles from where I live, that has cured two horses with one bottle of Save-the-Horse. His name is Cooper.
Let me know what you think of it in my case. Yours truly,
MAX BENKE, R. F. D. No. 2.

"Save-the-Horse" permanently cures bone and bog spavin, ringbone (except low ringbone), curb, thoroughpin, splint, shoe boil, windpuff, injured tendons, and all lameness, without scar or loss of hair. Horse may work as usual. \$5.00 per bottle, with a written guarantee as binding to protect you as the best legal talent could make it. Send for copy and booklet.
At all druggists and dealers, or express paid.

TROY CHEMICAL COMPANY,

Binghamton, N. Y.

SAN JOSE DOG SHOW

The San Jose Kennel Club announces its Annual Dog Show, to be held in the spacious Auditorium Rink, opposite City Hall Park, **SAN JOSE, OCT. 6-8, 1910.**

It will be the seventh show held under practically the same management. As heretofore no effort will be spared to make it pleasing to exhibitors, of whom you are most cordially invited to be one.

Judges: Cocker Spaniels, Mr. J. Hervey Jones, President of the California Cocker Club. Unassigned Classes, Mr. Thos. Blight of San Francisco. All other classes, Mr. Theed Pearse, of Victoria, B. C.

The reputation of these men is sufficient guarantee that the dogs, not their owners, will be judged. Send now for a copy of the Prize List and Rules.

- 10—Cows being in heat.
- 11—Mixing fresh and old milk in the same can.
- 12—Rusty tin pails and tin pans.

It is always seasonable to purchase a cream separator if you have none. The amount of cream saved will soon pay for the machine.

In filling the silo one man should place the silage with a fork and tramp it firmly around the edges as the silo is filled, to insure even settling.

Remember that the man counts more for success in dairying than any other factor. Have a purpose in working with the cows, and make everything else subordinate to that purpose.

First you must have good dairy cows, and then you must feed them well for the cows to produce at their highest capacity.

Veal calves coming in late summer and early fall when the weather is cooler and flies begin to diminish will grow well and bring good money if they are fed and cared for well.

When purchasing dairy animals be sure that they are sound and healthy. One diseased animal may be the cause of infecting and ruining the entire herd.

FOR SALE—Diablos 2:11 by Diablo 2:09½; has stepped half in 1:01, quarters in 29½. When ready will step in 2:07 or 2:08. Ask any Fresno trainer about her. Price \$400. Have leased ranch and sold stock. For particulars write A. S. Kellogg, 3040 Wash. Ave., Fresno, Cal.

LEARN WIRELESS & R. R. TELEGRAPHY!—Shortage of fully 10,000 operators on account of 8-hour law and extensive "wireless" developments. We operate under direct supervision of Telegraph Officials and positively place all students, when qualified. Write for catalog. National Telegraph Inst., Cincinnati, Philadelphia, Memphis, Davenport, Ia., Columbia, S. C., Portland, Ore.

TO THOROUGHbred HORSE-OWNERS.
FOR SALE AT A SACRIFICE.

First six volumes of Bruce's American Stud Book, practically unused. Cost \$10 per volume. Hard to get.

Two volumes of American Horse Breeders' Guide and Hand Book, with 100 tabulated pedigrees of leading stallions (work now out of print).

The American Thoroughbred, by Capt. Thos. B. Merry.

Two volumes Goodwin's Turf Guide for 1907. Cost \$12.

About 50 thoroughbred catalogues, including Rancho del Paso, Palo Alto, Ranocas, McGrathiana, Nursery Stud, Marcus Daly and all the great stock-farms of the country. These are handier than a studbook, because they are tabulated.

Price, \$60 for all these works.

POULTRY DISEASE.

I started to say that the very first enemy with which the newly hatched chick has to contend is lice, but second thought suggested a more vital, more far-reaching in its ravages, than any other ailment a chicken can have—a weak heredity. The offspring of a weak parentage, the new chick commences life handicapped. He may live; under suitable surroundings he may do apparently well, but it remains a fact, whether you know it or not, he never will be quite the bird he might have been, had his ancestors been different.

Give young Chanticleer a father and mother that are healthy, vigorous, busy and brave; parents that are quick, alert, watchful; parents whose fore-bearers can trace their "good, healthy points" way back to the chicken Adam, and you'll arm young Chanticleer with an inner invulnerable something that can almost cause him to defy disease—to live anyhow. Then the first enemies that attack the chicks after they are hatched are lice. These are on the mother. A preventive is the best cure. I know no better or surer remedy than plain old snuff sprinkled freely on the hen and in the nest. After the little chicks are hatched rub just a little sweet cream on the top of their heads. This will kill any lice that may be on their heads. Don't grease their heads with lard or other "greasy" grasses. It will kill them nearly every time. Try and keep the lice off the large chickens, so there won't be any to get on the little ones.

Some people think lice stay on the roosts, nests, etc. I don't think so. I think they stay on the fowls. Of course, a stray few may drop off on the perches or other places, but these are exceptions and not the rule.

Mites stay on the roosts, perches, nests, walls, floor, ground, fence or anywhere else the chickens stay, and they can multiply by the millions in a short time. Fore-warned is fore-armed in this case. Anticipate their coming—and never let them come. Let them once get a start and before you know it they are all over the place. You, or the children, can't go out about your work or play, but you don't soon feel one or two crawling on your neck, etc., or maybe all over you. They are one of the biggest nuisances in the chicken business. Remedy—good, vigorous strokes, right now. Burn all the old nests. Spray the walls, every crack and crevice, with a hot white-wash, made of lime, water, kerosene oil and carbolic acid. If these are not handy, use boiling water. Shut up the chicken house awhile and let the chickens roost somewhere else.

Then there's chicken fleas, roup and cholera. The best remedy I know of for the first is to let them run their course. We have them some years, again we don't. Of course, we must fight them and try to keep them down. Change of quarters sometimes helps. Sprays of quarters sometimes helps. Sprays don't do much good, as the "stick-tights" hop beyond the range of these spray and keep on multiplying. Pick the fleas off the chicken's face the best you can and rub on some kind of ointment. A speck of vaseline is good. Remove the chickens to new quarters, so the fleas will starve out, but remember they can hop, and you'll have to keep hopping after them.

As for roup, sore-head and cholera, if the chickens are very sick, kill and burn them, or bury them so deep nothing will dig them up. It doesn't pay to try to cure a real sick chicken. If it gets well it's repulsive to think of ever eating it, and if you try to breed from it, you are right back at the beginning of this article. Positively don't breed from weak stock, no matter how much your breeders cost; you will lose both time and money. But I'm off my subject.

All these contagious diseases, take the sick from the well ones, and the well ones in clean, new surroundings as nearly as possible. Give both sick and well clean water, fresh air and no food, wholesome food, gravel, green stuff, etc. If penned awhile, turn them've been running everywhere that you turn them a few days and

feed them. Change helps chickens, as well as people.

One of the most disgusting poultry diseases is limberneck. You know the cause—eating worms that breed in dead carcasses and out-house filth. Prevention—keep the premises cleaned up. Burn or bury deep all such stuff. Keep your chickens at home, if your neighbors allow such filth. Cure—for bad cases the hatchet. Epsom salts, wet just a little and forced down the chicken's throat, will sometimes give relief.

If your chickens, in spite of all your efforts, persist in dying, quit the business. Maybe the whole place is contaminated with disease germs to such an extent that you can't eradicate them, so stop the business for a year. If possible, cultivate all the ground which they've been using. Plant a garden on the old chicken yard site. Turn some of that rich germ-laden soil into heans, peas, lettuce, etc. Stir the ground. Starve out the mites, fleas and lice.—Farm and Ranch.

SCOURS IN CALVES.

One of our readers wants to know how he can successfully combat scours in calves.

Scours in calves, or calf cholera, in many instances differs from diarrhoea in grown animals, and has special features of its own, taking the form of infectious intestinal catarrh which is far more serious than the diarrhoea of the full grown animal.

Scours in calves generally appear suddenly. A perfectly healthy calf may be seized all at once, apparently, without any change in food or care. The symptoms of this infantile diarrhoea usually appear during the first two or three weeks of life. In many cases scours appear within a few hours after the animal is born, and the calf may die within twenty-four to forty-eight hours unless it receives prompt and proper treatment.

It is common for the calf to be afflicted with scours immediately at birth, even before it has had time to suck or take any nourishment whatever. The faeces, or manure, is then very thin and watery. It has a sour, disagreeable odor and is usually light colored. The evacuations are frequent and expelled with force. The first indication of scours is the soiled condition of the tail, loss of appetite, sunken eyes; sometimes the saliva flows from the mouth, no attempt being made to swallow. Such calves have a staring coat, grow thin, and lose strength rapidly.

Death usually follows in twelve to twenty-four hours unless prompt measures are taken to check the disease. If allowed to continue for any length of time the scouring will be accompanied by congestion and ulceration of the intestinal mucous membrane caused by the irritating secretions. As a result of this disease partial or double blindness is sometimes brought on.

To prevent scours in calves, proper care should be given to the mother while pregnant, that she may be able to give birth to a healthy calf. As scours is a germ disease, it is important that the calf be free from this disease when born. Cows afflicted with the disease of abortion convey this disease to their offspring. It is for this reason that calves so often die of scours before they have taken nourishment. It is therefore very necessary that the cow be kept free from disease in order to obtain healthy calves.

The National Feeders and Breeders' show have made quite a change in sheep awards for next year. Heretofore only three sections have been included in the sheep department. The additions consist of offering prizes for lambs under six months old in car lots are respectively \$100, \$75, 50 and 25, for those in pens of five \$25, \$15, \$10 and \$5.

After skim milk calves are no longer fed milk they will thrive on oats and corn mixed. Shorts are also good in the mixture, and hay or fodder should be used for furnishing bulk to the ration.

Take time to do everything connected with dairying in the most approved way. Test and weigh the milk at regular times.

Let quiet prevail in the stable at milking time. Don't get the cow to stand over by giving her a kick or a jab with your fist. Place your hand on her flanks and tell her to get over in a kindly voice. Unless she is spoiled by brutality she will do it, and do it willingly, for she wants to get rid of the milk in her udder as badly as you want to get it.

It is a good plan to breed the cows to have some fresh ones at all seasons of the year. The calves will do better where not too many are together, and the fresh cows will do as well at one season as at another, if she is given good feed and other proper attention. Better results can be obtained from the skim milk and other products if there is a reasonable constant quantity of it on hand at all times.

The sheepy taste often found in mutton does not come from contact of the flesh with the wool, but from some peculiar flavor in the inner or secondary skin, which is released by cooking. The Tunis sheep is entirely free from objectionable flavor, as are all breeds of fat-tailed sheep.

YOU MAY NOW OWN THE GREATEST OF ALL OF LUXE BOOKS ON THE DOG FOR ONLY \$1.00 DOWN AND \$1.00 PER MONTH

And you need not keep the volumes unless you are fully satisfied. We know you will be, but if you should not, return them to us and we will refund your money.

We Guarantee Satisfaction.

Every page is of practical utility and written by a noted authority, and the work, as a whole, is acknowledged by every owner to be the finest in illustration and printing and the most valuable and practical Dog Book ever published, either here or abroad.

THE NEW BOOK OF THE DOG

EDITED BY ROBERT LEIGHTON, Assisted by forty eminent authorities on the various breeds in two superbly illustrated volumes. Some notable contributors: Walter S. Glynn, W. J. Stubbs, Robert Leighton, F. S. Hignett, George S. Low, Frederick Gresham, Colonel R. Claude Cane, Major S. E. Borman, W. Gordon Stables, E. W. H. Blagg, Desmond O'Connell, Lady Algon Gordon-Lennox, Captain W. Wilmer and many others.

THE SECRETS OF SUCCESS IN DOG-KEEPING.

Quarto, with 25 full-page plates in color and over 600 magnificent illustrations of famous dogs, printed on heavy plate paper throughout and handsomely bound in red silk cloth and gold. Size of each volume, 8x11 1/2 inches. Every important breed is here fully illustrated and described in about 90 individual chapters, and the secrets of success in dog-keeping are here given in full. We want you to judge for yourself the practical money-making value of the great articles on Breeding, Selling, Feeding, Exercise, Kennels, Diet, Management, Whelping, Canine Medicine and Surgery, Rules for Prescribing, How to Recognize Symptoms, the Proper Time to Administer Medicine, Instructions for Simple Surgical Operations, etc., etc. These are but a few of the hundreds of important topics discussed. You will quickly agree the work is worth very many times the price.

SPECIAL OFFER TO READERS OF "THE BREEDER AND SPORTSMAN."

We want you to see and examine this great work for yourself. The price is \$11.00. Send us the Coupon, inclosing \$1.00, and we will forward the books to you carriage prepaid. Keep them five days. If you do not want them notify us and hold them subject to our order. If you keep them, pay us the balance \$1.00 a month until settled in full.

Cassell & Company,

New Edition of John Splan's Book

"Life With the Trotter"

Price, \$3.00, Postpaid.

"Life With the Trotter" gives us a clear insight into the ways and means to be adopted to increase pace, and preserve it when obtained. This work is replete with interest, and should be read by all sections of society, as it inculcates the doctrines of kindness to the horse from start to finish. Address, BREEDER AND SPORTSMAN, I. O. Drawer 447, San Francisco, Cal. Pacific Bldg., Cor. Market and Fourth Sts.

Three-Legged Horses

are not curiosities by any means. The country is full of them. The fourth leg is there all right but it is not worth anything because of a curb, splint, spavin or other like bunch. You can cure the horse of any of these ailments and put another sound leg under him by the use of

Quinn's Ointment.

It is time tried and reliable. When a horse is cured with Quinn's Ointment he stays cured. Mr. E. F. Burke of Springfield, Mo., writes as follows: "I have been using Quinn's Ointment for several years and have effected many marvelous cures; it will go deeper and cause less pain than any blister ever used. I thought it my duty for the benefit of horses to recommend your Ointment. I am never without it." This is the general verdict by all who give Quinn's Ointment a trial. For curbs, splints, spavins, windups, and all bunches it is unequalled. Price \$1 per bottle at all druggists or sent by mail. Send for circulars, testimonials, &c.

SPORTSMEN!

Write to-day for the 1910 Game Laws.

A booklet of invaluable information to every sportsman. Complete Game Laws revised July 1, 1910, of every State in the Union and Canada. Also list of guides who know every haunt of birds, game and fish in New York and Maine hunting regions.

WINCHESTER

.351 Caliber, High-Power Self-Loading Rifle

THERE is nothing to take your mind off the game if you shoot a Winchester Self-Loading Rifle. The recoil does the reloading for you, which places the complete control of the gun under the trigger finger. You can shoot six shots as fast as you can pull the trigger and without taking your eye off the sights. As this rifle is made with a detachable magazine, you can replace an exhausted one with a loaded one in a jiffy and continue shooting. No recoil-operated rifle but the Winchester offers this advantage. The .351 Caliber, High-Power Cartridge has great killing power, making it heavy enough for the largest game.

ASK TO SEE THE WINCHESTER TRIGGER-CONTROLLED REPEATER.

Every Horse Should Be Clipped in Season

It is the wise thing to do for the clipped horse not only is easier to clean and looks better, but clipping does much to make him immune from coughs, colds and the usual ills that come to a horse from standing in a coat of long, wet hair after any hard exertion. The perspiration evaporates quickly from the clipped animal and leaves him dry. On cold days a blanket when he stands keeps him comfortable.

The Best Clipping Machine the World has ever Seen is the Stewart Ball Bearing Enclosed Gear Machine

It is the easiest turning, fastest clipping and most enduring of all machines. The materials in it are all of better quality, the workmanship is superior. All file hard cut steel gears, protected from dust and dirt and running constantly in oil. It couldn't be better for twice the money.

\$1000 for Three-Year-Old Pacers.
200 for Nominator on whose entry is named the Dam of Winner of Three-Year-Old Pace.
750 for Two-Year-Old Pacers.
200 for Nominator on whose entry is named the Dam of Winner of Two-Year-Old Pace.
100 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when mare was bred.

ENTRANCE AND PAYMENTS—\$2 to nominate mare on December 1, 1909, when name, color, description of mare and stallion bred to must be given; \$5 May 2, 1910; \$5 October 1, 1910; \$10 on Yearlings, April 1, 1911; \$10 on Two-Year-Olds, April 1, 1912; \$10 on Three-Year-Olds, April 1, 1913.

STARTING PAYMENTS—\$25 to start in the Two-Year-Old Pace; \$35 to start in the Two-Year-Old Trot; \$35 to start in the Three-Year-Old Pace; \$50 to start in the Three-Year-Old Trot. All Starting Payments to be made ten days before the first day of the meeting at which the race is to take place.

Colts that start at two years old are not barred from starting again in the three-year-old divisions.

Be Sure and Make Payments in Time.

A CHANCE FOR THOSE WHO FAILED TO ENTER.

SUBSTITUTIONS—A few of the original nominators of Pacific Breeders' Futurity Stakes for foals of 1910 have advised us that, because of barrenness of the mare or death of the foal, they wish to dispose of their entries. If you own one or more whose dams you failed to name when entries closed, by making the payments due any time on or before April 1, 1911, which covers payments to April 1, 1912, the few substitutions to be disposed of will be awarded in the order in which remittances are received. Prompt attention will secure for you this rich engagement. Address all communications to the Secretary.

F. W. KELLEY, Secretary, 306 Pacific Bldg., San Francisco, Cal.

HARNESS RACING DATES.

California Circuit.

Fresno County Fair	Oct. 3-8
Kings County Fair, Hanford	Oct. 10-15
North Pacific Circuit.	
Centralia	Sept. 20-24
North Yakima, Wash.	Sept. 26-Oct. 1
Spokane, Wash.	Oct. 3-8
Lewiston and Boise, Idaho	Oct. 10-15
Grand Circuit.	
Columbus	Sept. 19-30
Great Western Circuit.	
*Columbus	Sept. 19-30
Springfield	Oct. 3-8
Oklahoma City	Oct. 10-15
Dallas	Oct. 17-22
El Paso	Nov. 1-5
Phoenix	Nov. 5-12

*Member of Grand Circuit.

HARNESS RACING has proved itself very popular with the public this year in every locality where it has been conducted in an up-to-date and proper manner. Reports from the eastern and middle western States are that the crowds attending the trots this season are larger than ever. At many of the places where trotting meetings have been given with no other attractions whatever, the grandstands have been found totally inadequate to accommodate the enormous crowds that came out to see the sport. At some of the half mile tracks through the Mississippi valley as many as 40,000 persons have paid to see the races in one day, showing that the sport of harness racing has as strong a hold on the people as ever. Here in California there have been larger crowds in attendance at some of the minor meetings than were present at the places where the large purses were given, and there is little doubt that were a circuit of district fairs and race meetings to be organized, the people would turn out in sufficient numbers to make properly managed fairs financially successful. An effort is being made by the California Harness Horse and Live Stock Association to have the district fairs restored and aided by the State. The next legislature will be asked to pass a bill to that effect. Every livestock breeder in California should lend his personal aid to the passage of such a bill. The time to begin active work is now. See that the assemblyman and senator from your district favors the measure. District fairs, properly managed will do much to build up the farming and livestock interests of California, and their cost will be trivial compared to the good they will do.

COLORADO E. (3) 2:05½ outclasses any and all three-year-old trotters that have thus far been produced, and while he stands out as the best and fastest trotter of his age ever seen, it is not detracting anything from his greatness to predict that before many years a greater than he will appear and that the time is not far distant when the two-minute three-year-old trotter will be announced. The champion three-year-old trotter is a result of the inauguration and giving of rich futurity stakes. Had Colorado E. not been entered and eligible to the majority of these big futurities, Mr. Estabrook would not have cared to buy him and no one would have expended much money in training him. He showed speed as a yearling and two-year-old and being well staked was given every opportunity to prove that his speed and endurance were of the stake winning sort. Colt stakes are the hulwark of the trotting horse breeding industry, and the showing made by Colorado E. this year has added a new impetus to it, and increased the value of all well staked colts that show speed. The futurity stake enables a colt to have a large earning capacity at a comparatively small outlay. In the class races for aged trotters and pacers the entry fees are too large for the amount of money that can be won.

Some plan could be devised by which aged horses could be staked at a cost of not over two per cent in races where they would have a chance to earn as much money as a well staked three-year-old can earn if he wins a majority of his engagements. It is the earning capacity that makes a race horse valuable and the greater the earning power the higher figure he will bring.

THE PRICES OF HORSES that can work are still well up and a good useful animal can be sold readily in any State in the Union at a fair price. Horse breeders and farmers need have no fear that the supply of work animals is going to catch up with the demand very soon. All over the western country and especially on the Pacific Slope, the large farms are being cut up into smaller ones. Here in California during the past year many immense tracts of land formerly farmed almost entirely with traction engines for a motive power have been cut up into small farms of 10, 20 or 40 acres, each requiring from two to eight head of horses. There has been a large demand for horses in the farming sections of California for the past year and the demand is increasing and will continue to increase. Horse values are not coming down, and at present quotations it will pay the farmer to breed and raise good work animals for farm or city use. The horseless age is a very long way off.

AN ELECTIONEER YEAR.

Since, thirty years ago, Fred Crocker, the first of the famous colt trotters sired by Electioneer, startled the turf world, the family founded by the son of Hambletonian and Green Mountain Maid has occupied a dominant position in American trotting history. No year has passed without sensational performances by his sons and daughters, grandsons and granddaughters, or other of his descendants, and, although it will be twenty years next December since his death, such is the potency of his blood that its influence in the development and evolution of trotting speed has known no diminution—it "still goes marching on," foremost in the attacks which, each fresh season, are made upon the Scythe-hearer, and with new victories constantly inscribed upon its banner.

Electioneer is the only trotting sire whose get have ever simultaneously held all the world's trotting records, for every age from yearlings to aged performers, including the stallion record also; he having accomplished his feat in 1891, when his daughter Bell Bird 2:26¼ held the yearling record; his son Arion 2:10¾ the two-year-old record; his daughter Sunol the three-year-old record at 2:10¾, the four-year-old record at 2:10¾, and the all-aged championship at 2:08¼, and his son Palo Alto 2:08¾ the stallion championship—all these records having been made to high-wheel sulky. Electioneer was the first stallion to sire 100 standard performers and the first to sire 100 standard trotters; he was the first to sire two 2:10 trotters and the first to sire three 2:10 trotters as well. He is the only one that has ever sired a 2:10 trotter from a thoroughbred dam. As a source of extreme early speed and as an action-controller, capable of implanting the trot in his offspring from mares of all descriptions, no other trotting progenitor has at yet approached him—and it seems improbable that any other ever will.

While every year sheds fresh luster upon Electioneer and his family, this present one of 1910 is to be a greater extent an "Electioneer year" than any other since his "annus mirabilis" of 1891. For many seasons past the majority of the turf's highest honors have gone either to the Electioneer or the Wilkes family, and the Wilkeses, owing to their numerical strength, have usually led. But, while that tribe is this season splendidly represented, the house of the "monarch of Palo Alto" has provided us with the majority of the record-breakers and star performers whose names are now upon every tongue. To begin with, there is the peerless Uhlán 1:58¾, who has at last reached the goal by so many deemed unattainable and placed his name upon record as the first horse to trot a mile in two minutes or better "in the open." Uhlán is by Bingen 2:06¼, he by May King 2:20, son of Electioneer. Second only to Uhlán in public estimation is The Harvester 2:01, the new world's champion trotting stallion, and, if a vote were taken, the horse that would probably, on the score of individuality, breeding, speed and public performances, be chosen as the most perfect trotter that has yet been seen. The Harvester is by Walnut Hall 2:08¼, he by Conductor 2:14¼, son of Electioneer. Passing to a consideration of the leading money-winners, we find the honors to rest with Dudie Archdale 2:06¼. She is by Archdale, he by Expedition 2:15¾, son of Electioneer. Next to her is Hailworthy 2:06¼. He is a Wilkes in the male line, but his dam is by Altivo 2:18¼, a son of Electioneer. Dudie Archdale and Hailworthy are the leading money-winning mare and gelding of the year to date. The leader among the stallions is General H. 2:07¼, winner last week of the historic \$10,000 Charter Oak stake, at Hartford. General H. is by Combiner, he by Commoner, son of Electioneer.

The blood of Electioneer has from the first been distinguished as trotting blood. The pacing inclination was never strong in his sons and daughters, and

in the succeeding generations his family has not been as prolific of pacing sensations as have other ones. Nevertheless, the leading money-winning pacer of the year to date, The Ahbe 2:04, is by Chimes, son of Electioneer; while Ess H. Kay 2:02¼, who fairly divides the Grand Circuit pacing honors of the season with The Ahbe, is out of a mare by Chimes.

In addition to these items, we may state that according to reports thus far received the four leading sires of new standard performers for 1910 to date are four male-line Electioneer horses—his grandson Bingen 2:06¼, and three of that horse's sons. Todd 2:14¼, Bigara and Admiral Dewey 2:04¼.—Horse Review.

The Electioneer family has made a great showing here in California as well as on the Grand Circuit. Matawan (2) 2:19¼ and Donasham (3) 2:13¼, both stake winners, are out of a mare by Junio 2:22, son of Electioneer; Bon Guy (3) 2:11¼, winner of two stakes and the fastest three-year-old trotter on the coast is by a grandson of Electioneer, while Jean Valjean 2:10, the fastest three-year-old pacer on the coast and also a stake winner, is by the same horse. Prince Lot 2:10¼, winner of several races, and of second money in the \$10,000 and \$5000 stakes up north, is also by a grandson of Electioneer, while Lijero, only beaten a nose in 2:10¼ is a great grandson of the same horse. Electioneer blood has been in the front ever since the palmy days of Palo Alto Farm.

LIVESTOCK PRICES IN ARGENTINA.

J. V. Fernandez, Consul-General of Argentina at New York, has transmitted to Boutwell Dunlap, Pacific consular representative of Argentina at San Francisco, the following cabled prices of live stock at the sale of the famous Argentine Rural Society at Buenos Aires:

	American money.
1 Durham steer, winner Armour Cup	\$4,272.30
5 Durham steers, 1st prize, 2½ years old	21,150.00
202 Durham steers	75,886.20
Average price of the 202 steers	375.25
5 Hereford steers	24,332.50
46 Hereford steers	58,686.95
Average price of the 46 steers	1,274.97
5 Angus steers	8,460.00
28 Angus steers	13,332.96
Average price of the 28 steers	476.17
A total of 276 steers brought	\$147,868.11
Average price of the above 276 steers	571.98
10 Black-face sheep	583.34
10 Black-face sheep, milk teeth, each	46.53
10 Black-face sheep, four teeth, each	44.32
60 Black-face sheep, four teeth, each	2,664.90
Average price of the 60 sheep	44.41
90 Lincoln sheep	1,797.75
Average price of the 90 sheep	19.97

FRESNO ENTRIES.

But two of the harness races advertised by the Fresno County Agricultural Association to close September 15th were declared filled. The entries to these events are the following:

Pacing, 2:30 class, \$200:

Chas. Clark's Dan C. by Athahlo, T. J. Smith's Anona by Prince Almont, C. L. Chaffin's Margaret Derby by Chas. Derby, Geo. Youter's Firehaugh by Welcome, A. Reynolds's Sadie M. by Athly, Mrs. M. Lipson's Milmont by Milton Gear, P. McCart's Dolly Varden by Welcome, J. H. Nelson's Bretta Mac by Expressive Mac.

Pacing, 2:25 class, \$200:

P. McCart's Dolly Varden by Welcome, T. J. Smith's Anona by Prince Almont, C. L. Chaffin's Margaret Derby by Chas. Derby, A. Reynolds's Sadie M. by Athly, Geo. Youter's Firehaugh by Welcome, Chas. Clark's Dan C. by Athahlo, J. H. Nelson's Bretta Mac by Expressive Mac.

ANSWERS TO CORRESPONDENTS.

W. D. Kinney, Bisbee, Arizona—Cochise is by Lecco 2:09¼, first dam Winnie Wilkes 2:17½ by Rey Wilkes, second dam Pet by Cresco, third dam Topsy by Gen. Taylor. Cochise was bred by Mr. R. P. M. Greeley of Oakland, Cal., and sold by him to Mr. J. H. Jack of Bisbee, Arizona.

Prince Lot, the gelding by Prince Ansel (2) 2:20¼ dam Lottie 2:15 by San Diego, has been a most consistent race horse this year. At San Jose he was 3-4-3 to Helen Stiles in 2:11, 2:11 and 2:10¼ on Wednesday, and on Friday of the same week won the 2:15 trot in 2:12, 2:12¾ and 2:14. Two weeks later at Woodland he won the 2:20 class trot in 2:11¼, 2:10¼ and 2:10¾, and was then shipped to Portland where he started in the \$10,000 2:12 trot, winning the first two heats in 2:12 and 2:10¾ and only being beaten an eyelash the next heat in 2:09¾, getting second money in the race. The following week at Salem he was 2-2-4 to Helen Stiles in 2:09¼, 2:09¾ and 2:09¼ in the \$5000 purse for the 2:12 class. Up to the close of that meeting he had won eight heats in from 2:14 to 2:10¼. The dam of Prince Lot was out of the mare Flora B. 2:27 by Whippleton and Flora B.'s dam's breeding could never be traced.

OREGON STATE FAIR RACES.

Great Racing Until Rain Falls and Makes a Muddy Track and Slow Time.

Salem, Sept. 12.—A big crowd, fine weather and a good track greeted the horsemen on the opening day of the Oregon State Fair at Salem, Monday, Sept. 12th. Three harness races were on the card, supplemented by a couple of running races. The Oregon Futurity for two-year-old trotters was the first race to be decided and Star Patch, owned by Victor Martin of Vancouver, won in straight heats in very slow time. The winner is by Oregon Patch. William Hogoboom drove Applaya and won second money, while third money went to Rabenstein owned by the Lumsden Estate of Portland.

In the 2:12 class pace for a purse of \$800 the bay mare Francona, by Gray Stone, owned by Al Russell of North Dakota, won from a good field in straight heats, all in 2:11 or better. In the second heat, pushed by Judge Dillard, Francona took a record of 2:10.

The 2:25 trot was a good race, and while the black gelding Kingbrook had easy sailing the first two heats, he made a break in the third heat, but showed his class by making up six or seven lengths and winning in 2:14. In this race the Nutwood Wilkes trotter, Professor Heald, was second in the first two heats and then finished further back because he had second money won anyhow and could not beat Kingbrook.

College Maid, the guideless pacer, was brought out during the afternoon and pleased the crowd by negotiating a mile in 2:13. Summaries:

Two-year-old trot, Oregon futurity, \$900:
Star Patch, br. g. by Oregon Patch (Davis).....1 1
Applaya, ch. m. (Hogoboom).....2 2
Rabenstein, b. c. (Rabenstein) (Squires).....3 3
Time—3:04½, 2:57.

2:12 pace, Capital City purse; \$800:
Francona, b. m. by Graystone (Russell).....1 1
Judge Dillard, ch. s., Hal Dillard (Childs).....2 3
Amado, blk. s., Direct Heir (Ward).....3 5 6
Bridal, r. m., Bridalex (Sebastian).....6 4 3
Time—2:10½, 2:10, 2:11.

2:25 trot, purse \$800:
Kingbrook, blk. g., The King Red (Higgins).....1 1
Prof. Heald, ch. s., Nutwood Wilkes (Cuicello).....2 6
Babe H., blk. m., Coeur d'Alene (Woodcock).....5 6 2
Nada, blk. m., Nushagak (Spencer).....3 4 3
Judge Dillon, c. s., Sidney Dillon (Maben).....4 5 5
Mrs. Herbert, c. m., Constantine (Wilson).....6 ds
Time—2:14½, 2:14, 2:14.

Sept. 13.—All the excitement was centered in the 2:25 pace today at the State Fair races. Kit Crawford, an Albany mare, with Woodcock up, succeeded in winning first money, after Oswald West's Ab. Bender had pulled down two heats, the second one of the prettiest heats all around the track ever seen here. Lack of endurance was all that sent West's horse back, for second money.

The track was heavy with the opening heats because of a drizzling rain during the morning, but later in the afternoon was pounded down and fairly good time marked some of the races.

The 2:15 trot was a walkaway in every heat for Alfreda, a Spokane mare. Mayo, also a Spokane horse, took second money, but at no time did Alfreda have a contender. Considerable interest was manifest in the three-year-old Futurity trot, which Mamie Alwin, owned by Mr. A. L. Scott of San Francisco, took in straight heats. This race was also an easy one for first money. Summaries:

2:25 pace; purse \$500:
Kit Crawford, br. m. by James Crawford (Woodcock).....2 2 1 1 1
A. B. Bender, b. s., by Diablo (Whitehead).....1 1 2 3 4
Haltamont, b. m. by Hal B. (Lindsay).....4 4 3 2 2
Ella Erickson, b. m. by Diablo (McGuire).....3 5 4 3
Tom S., by Yakimont (Sebastian).....5 3 5 5 d
Time—2:14½, 2:13½, 2:15, 2:19½, 2:19½.

2:15 trot, Farmers' purse, \$1000:
Alfreda B., b. m. by Bob Fitzsimmons (Jeffries).....1 1
Mayo, b. g. by Zombro (Childs).....2 3 2
Lady Sunrise, b. m. by Sunrise (Marion).....3 2 4
Lady W., br. m. by King Alexis (McDonald).....4 4
Belle N., br. m. by Bonnie Direct (Norton).....5 5 5
Paul W., b. g. by Zombro (Ward).....6 6 d
Doc Munday, b. g. by Zombro (Wilson).....7 ds
Stalene, br. m., by Stam B. (Wilson).....ds
Blacksmith, ch. s. (Cox).....ds
Time—2:14½, 2:15, 2:14½.

2:25 trot, three-year-olds; Inland Empire purse, \$500:
Mamie Alwin, ch. m. by Lord Alwin (Cuicello).....1 1
Pegasus, h. s. by Zombro (Ward).....2 2
Phyllis Wynn, b. m. by Bon Voyage (Wilson).....3 3
Lizterine (Mauzey).....4 4
Time—2:20½, 2:21.

Sept. 14.—In one of the greatest races ever paced on Lone Oaks track, Allerdaw, by Allertonian, with Russell up, pulled down the big end of the Greater Oregon \$5000 purse by winning in the fifth heat, after Solano Boy had captured two heats. Solano Boy took the fourth heat in one of the prettiest finishes ever seen here. In practically every heat there was something exciting.

In the fifth and last heat, Allerdaw showed his metal when he came up from the third position at the three-quarters post and passed Solano Boy in the stretch. Though a terrible burst of speed was shown

in catching Solano Boy, Allerdaw nosed himself under the wire almost without a drive.

The fourth and first heats were probably the best in the race. In the fourth heat was a stiff drive on the stretch between Solano Boy and Allerdaw which was a sensation.

In the first heat the battle was between Happy Dentist and Solano Boy, and it is doubtful if such a pretty heat, especially at the finish, has ever been before seen on the State Fair grounds track. Past the three-quarters, there was some lively pacing. Happy Dentist opened the race with a big lead, Conqueror being awarded the pole, but Happy Dentist put in easily a length at the quarter. This heat seemed to belong from the start to Durfee and his clever gelding, but when Solano Boy nosed him out it proved to be a big sensation.

One peculiarity in connection with the races today was a lack of enthusiasm, regardless of the fact that some of the heats were the most exciting that have been witnessed here and the crowd was probably one of the largest.

The three-year-old pace was a "hummer," but was Lizzie Dillon's in straight heats. In the 2:30 trot Honey Boy, after being driven a fifth in the first heat, carried away the next three straight handily in good time.

The track, according to the horsemen, was the fastest today of any they have seen in the Northwest for years. Summary:

2:30 trot; purse \$500:
Honey Boy, by Unknown (Hogoboom).....5 1 1 1
Sweet Adena, by Zombro (Mauzey).....2 5 2 2
Velma Z., b. m. by Zombro (Sawyer).....3 2 4 4
Ora May, bl. m., by Ora Guy (Wilson).....4 3 3 3
Clambake, c. g. by Diablo (Todd).....1 4 5 5
Time—2:18½, 2:19½, 2:18½, 2:20½.

2:20 three-year-old pace; Valley purse, \$500:
Lizzie Dillon, b. m. by Sidney Dillon (Hogoboom).....1 1
Waverly, b. m. by Tidal Wave (Lindsey).....3 2
Night Spook, b. h. by Spokane (Vaughn).....2 3
Time—2:15½, 2:16½.

2:08 pace, Greater Oregon purse, \$5000:
Allerdaw, b. s. by Allertonian (Russell).....9 1 1 2 1
Solano Boy, br. g., by Father McKinnon (Daniels).....1 2 7 1 2
Happy Dentist, ch. g., by Nutwood Wilkes (Durfee).....2 4 6 4 4
Judge Dillard, ch. s. by Hal Dillard (Marvin).....6 6 2 3 3
Josephine, h. m. by Zolock (Childs).....5 3 8 d
Conqueror, br. g. by Direct Heir (Ward).....4 9 5 d
Ray o' Light, br. h. by Searchlight (Lindsey).....8 10 9 d
Lord Lovelace, b. s., by Lovelace (Wilson).....3 7 4 ds
George Woodard, b. g. by Senator B. (Duncan).....7 8 3 d
General Huertis, h. s. by Alexis (Hogoboom).....11 5 10 10 d
Time—2:07, 2:09½, 2:09½, 2:10, 2:13.

Sept. 15.—Trotting the three fastest heats ever witnessed on an Oregon track, and in every heat breaking the track record of 2:10½ held by Daybreak, Helen Stiles, Durfee's wonderful California mare captured first money in the Lewis and Clark 2:12 trot, purse \$5000, at the State Fair track today before the greatest crowd ever seen at the Oregon State Fair races. Helen Stiles' best time was 2:09½.

Two of the heats presented spectacular drives and the final heat set the visitors wild. In this drive, Henry Gray passed five horses in the back stretch and passed Helen Stiles, leading by half a length.

Well in the stretch, Henry Gray stumbled, and both Helen Stiles and Kingbrook passed him. The crowd was cheering frantically for the big gray, which is a great favorite here, and when he stumbled a groan went up from the grandstand.

In the second heat, Durfee was compelled to extend his mare to win against Prince Lot, who took second money. The first heat went to Helen Stiles by a good margin and she led under the wire by nearly a length. In the back stretch, however, this was one of the feature heats of the day.

Prince Lot gave the California mare a beautiful drive for nearly a quarter and at the three-quarters was still hugging her close, but Helen Stiles came down the stretch in the lead in a whirlwind trot.

The Oregon Futurity for two-year-old pacers was won easily by the beautiful filly Ruby Light, owned by Mrs. Shreve. The time was slow but Ruby could have gone faster if necessary.

After Sunny Jim had taken two heats of the 2:20 pace the California pacer Geo. Woodard took the next three and the race, getting a record of 2:12. All three of the harness races were won by California bred horses. Summaries:

Two-year-old pace; Oregon Futurity No. 1; purse \$400:
Ruby Light, br. f. by Aerolite (Wilson).....1 1
Amy Zolock, b. m. (Hogoboom).....2 2
Nancy Lovelace, blk. f. (Quister).....3 4
Della McK. (Sebastian).....4 3
Time—2:27½, 2:30½.

2:20 pace; purse \$800:
George Woodard, b. g. by Senator B......4 3 1 1 1
Sunny Jim, b. s. (Davis).....1 4 2 2
King Bird, b. m. (Young).....3 2 3 3
Sadie Hal, blk. m. (Rose).....2 10 8 4 4
Baron Lovelace, c. s. (Hogoboom).....10 5
Nique (Wilson).....7 8 3
Harry Luft, br. g. (Replinger).....6 9
Zoe W., b. g. (Howard).....8 11 ds

Bonnie Antrim, blk. g. (Sawyer).....5 4 6
Marin, unknown.....9 12 7
Time—2:11½, 2:11½, 2:12, 2:13½, 2:15½.

2:12 trot, Lewis and Clark purse, \$5000:
Helen Stiles, b. m. Sidney Dillon (Durfee).....1 1 1
Prince Lot, b. g., Prince Ansel (Spencer).....2 2 4
Kingbrook, b. g., The King Red (Higgins).....6 3 2
Lee Crawford (McGuire).....3 5 6
Lady Malcolm (Kirkland).....9 12 9
Henry Gray, g. g. (Hartnagle).....11 7 3
Zombro, b. h. (Ward).....4 5 3
Katalina, b. m. (Daniels).....10 9 7
Lady Sunrise, b. m. (Childs).....8 8 8
Goldennut, ch. h. (Rutherford).....5 10 10
Lida Carter, b. m. (Hogoboom).....12 11 11
Densmore, b. h. (Russell).....7 12 dr
Tell Tale.....13 13 ds
Alfred B., b. m., C. D. Jeffries; Rapidan Dillon, b. m., Maben, and Lucile Patchen, br. m., Higgins, were all distanced in the first heat.

Time—2:09½, 2:09½, 2:09½.

Sept. 16.—Almost swimming, rather than trotting, or pacing, small fields battled against a sea of mud at the State Fair races today. Rain all day spoiled the track. The condition of the track is indicated by the time in the fastest heat of the 2:05 special pace won by Sherlock Holmes, in 2:24 3-4.

Texas Rooker and Tommy Gratton had a mud fight for the special pace, Sherlock Holmes winning two straight heats and then giving two to the Gratton horse, finally pulling down the final heat in the slowest time of the race, well along toward the three-minute mark.

The Consolation pace, looked forward to as one of the most exciting events of the week, was also traveled in snail time. Lord Lovelace picked off the first money in three straight heats, but could do no better than 2:23½.

The second heat of the 2:20 trot was really the feature. Dollie McKinney waded away from shore for a big lead but in the back stretch Professor Heald swam past her and crossed the wire in a dog trot several lengths to the good. Summary:

2:30 trot; purse \$800:
Professor Heald, ch. s. by Nutwood Wilkes (Costello).....1 1 1
Dollie McKinney, b. m., Washington McKinney (Clark).....2 2 3
Dan McKinney, c. h., Kinney Lou (McGuire).....5 3 2
Babe H., blk. m., Coeur d'Alene (Woodcock).....3 4 4
Aneta, b. m., by Antrim (Wehb).....4 5 dr
May Mason, b. m., Major Mason (Young).....6 dr
Time—2:31½, 2:29½, 2:32.

Consolation 2:08 pace; purse \$1000:
Lord Lovelace, b. s., by Lovelace (Wilson).....1 1 1
Josephine, n. m., by Zolock (Childs).....3 2 2
Ray o' Light, br. h., by Searchlight (Whitehead).....2 3 3
General Huertis, b. s., by Alexis (Hogoboom).....4 4 4
Time—2:23½, 2:24½, 2:24½.

Sherlock Holmes, ch. h., by Zolock (McGuire).....1 2 2 1
Texas Rooker, by Rooker (Rutherford).....2 1 1 2
Solano Boy, br. h., by Father McKinnon (Daniels).....3 3 3 ds
Tommy Gratton, b. g., by Gratton (Connors).....4 ds
Time—2:24½, 2:25½, 2:26½, 2:30, 2:39½.

Sept. 17.—With a muddy closing, Henry Gray, exceptionally slow time and a small dog proved to be features of the races today, which completed the program for the week at the Oregon State Fair.

The track was never so muddy nor the time ever so slow. Daybreak, who up to the beautiful trotting of Helen Stiles Thursday, held the track record for three years at 2:10½, trotted his best mile in 2:41 flat, and could do no better than 2:46 in the last and winning heat of the free-for-all trot.

The only real contest of the day was the 2:12 consolation \$1000 purse. Henry Gray made a magnificent finish in the second heat was bested by Lady Sunrise. The third heat developed one of the interesting incidents when Henry Gray apparently had it won, but in the stretch a small dog ran across the track and the lengthy gray stepped on him. This resulted in a loss of the lead and Lady Sunrise again crossed the wire first. He got the next two heats, however.

Dan Patch, Jr., was slayed by the horsemen to win the 2:15 pace, State Fair purse, and did capture the first heat, but after that Lou Miller showed her metal and had no difficulty. Summary:

Free-for all trot; purse \$1000:
Daybreak, b. g.....1 1 2 1
Belle N., b. m.....2 2 1 2
Zomdell, b. g.....3 3 3 3
Time—2:41, 2:42½, 2:43, 2:46.

2:15 pace, State Fair, purse, \$1000:
Lou Miller, s. m.....3 1 1 1
Dan Patch Jr., blk. s.....1 2 2 2
Capt. Apperson, b. g.....2 3 3 3
Miss Jerusha, blk. m.....5 dr
Nellie Ash, b. m.....4 ds
Time—2:32½, 2:30, 2:29, 2:36½.

2:12 trot, consolation purse, \$1000:
Henry Gray, g. g.....1 2 2 1 1
Lady Sunrise, b. m.....2 1 3 3
Lady Malcolm, b. m.....5 4 3 2 2
Katalina, b. m.....4 3 5 4 4
Alfreda B., b. m.....7 6 4 dr
Rapidan Dillon, b. m.....6 8 ds
Lady Inez, b. m.....3 7 7
Goldennut, ch. m.....8 5 6
Time—2:26½, 2:30, 2:29½, 2:31, 2:33½.

GRAND CIRCUIT AT SYRACUSE.

Sept. 12.—The Ahbe, unbeaten this year, won his eighth victory of the season today in capturing the Syracuse Stake, the feature of the opening day of the Grand Circuit races, in connection with the week's exhibition of the New York State Fair.

Ed Geers had no trouble in sending the black whirlwind through for a straight three-heat victory. Lady Isle was a stubborn contender in the first two heats, and in the second she forced the Geers entry for the latter part of the journey to his best clip, he traveling the final quarter in :29 flat and landing a hare length in front of Lady Isle. In the final Evelyn W., in a hot drive, outstepped Lady Isle for the place.

The Ka-No-No Stake for young 2:25 trotters went to Lionel in straight heats, Enara, which was generally fancied to win, dividing second money with Grace.

The 2:18 trot was a triumph of endurance for Henry Winters. Wataga, owned by Ernest I. White of Syracuse, took the first two heats in commanding style, but tired in the third and was eased up by Driver Rathbun coming in last. She came back strong in the two last heats, finishing second, but Henry Winters won with ease. The summaries:

Three-year-olds, trotting two in three; purse \$1000:

Lionel, br. s., Bellini-Cecil McGregor, by Robert McGregor (J. Dickerson)	1	1
Enara, br. f. (Henry)	2	3
Grace, c. m. (M. McDevitt)	3	2

Time—2:14½, 2:14½.

2:12 pace; three in five; purse \$5000:

The Abbe, blk. g., Chimes-Nettie King, by Mambrino King (Geers)	1	1
Lady Isle, hr. m. (Cox)	2	3
Evelyn W., p. m. (Shank)	4	2
Mike Wilcox, br. g. (Opdyke)	3	4
St. Patrick, r. g. (Rhodes)	5	5

Time—2:05¼, 2:06¼, 2:05¼.

2:18 trotting; three in five; purse \$1200:

Henry Winters, b. h., Ed Winters-Charming Bunker (McDonald)	3	3	1	1
Wataga, h. m. (Rathbun)	1	1	5	2
Peter Dorsey, b. g. (McDevitt)	2	2	3	3
Oriana, br. m. (Benyon)	6	5	2	4
Miss Winter, blk. m. (Pennock)	4	4	4	dr
Better One, b. g. (Blanchard)	5	ds		

Time—2:12¼, 2:11¼, 2:10¼, 2:12¼, 2:12¼.

Sept. 14.—Billy Burke, driven by Benyon, today won the Empire State stakes of \$10,000 for 2:14 trotters at the Grand Circuit meet. The trotting division of the Horse World stallion stake was easily won by Colorado E., while Baroness Eva won in the pacing division of that event. Summaries:

Horse World stallion purse \$9925; three-year-old trotting; 80 per cent for trotters:

Colorado E., h. h. sire The Bondsman (Macey)	1	1
Emily Ellen, blk. f. (McDonald)	3	2
Eva Bellini, b. m. (Dickerson)	2	3

Time—2:13¼, 2:08¼.

The Empire State stake; 2:14 trot; \$10,000; three in five:

Billy Burke, br. h. by Silent Brook (Benyon)	1	7	1	1
Hailworthy, b. g. (Nottingham)	3	1	2	2
Joan, b. m. (McDevitt)	2	2	6	3
Bisa, b. m. (Cox)	7	3	3	4
Major Strong, b. g. (Snyder)	4	5	5	ro
Ario Leyburn, br. h. (Rosemire)	5	4	4	ro
Captain Cute, blk. g. (Skahen)	6	6	dr	

Time—2:09½, 2:09½, 2:08¼, 2:08¼.

2:18 pacing; three in five; \$1200:

Rirl, h. h. sire Ulrect (Thomas)	1	1	1
Jingo, ch. g. (Ernest)	2	2	3
Dan S., br. g. (Hillsinger)	3	3	2
Marjory Wilkes, ro. m. (Carpenter)	4	4	4
John Fullerton, b. g. (Lyman)	5	5	5

Time—2:13¼, 2:15¼, 2:16¼.

The Onondaga, 2:06 pacing; two in three; purse \$2000:

Ess H. Kay, b. h., sire Direct Hal (White)	1	1
Ella Ambulator, b. m. (Murphy)	3	2
Major Brino, blk. b. (Hudson)	2	3
The Friend, blk. h. (Brawley)	4	4

Time—2:08, 2:07.

Horse World stallion stake, three-year-old, pacing division; two in three; purse \$9925; 20 per cent for pacers. First, \$1107; second, \$461.25; third, \$276.75:

Baroness Eva, ro. f., sire Baron Review (McDonald)	1	2	1
Directum Regent, br. h. (Milan)	3	1	2
Leftwich, b. m. (Healy)	2	3	ro

Time—2:12¼, 2:09¼, 2:13¼.

Sept. 15.—At the State Fair track today The Harvester, the great brown horse owned by August Uhlein of Milwaukee, piloted by Ed Geers, broke his own and the world's record for trotting stallions of 2:02 by stepping a mile, paced by a runner, in 2:01¼. Horse and driver were given a great demonstration by the great throng which jammed the stands and overflowed against the track fences to the turns.

The Chamber of Commerce stake of \$2000 for 2:09 trotters, unfinished from Wednesday, developed a genuine sensation and gave Ed Geers another honor for what proved one of the happiest days of his life. Three heats of this event had been raced at sundown Wednesday. Soprano, the oak-hearted daughter of Bellini, had taken the first two heats and was just brushed out by Oro Bellini in the third. The wise ones figured that the finish on Thursday would be

between Soprano and Oro. However, at the resumption along came Geers' Demarest and took three heats and the race. He earned his victory too, for in each instance the great Soprano carried him down the stretch to the wire at a heartbreaking clip, and the last time the crowd was in doubt of the winner until the judges announced the result.

Stirring finishes were well nigh the unbroken order of the day. In the 2:04 trot, after Bob Douglas had easily taken the first heat when Sonoma Girl went to a bad break at the first turn and barely saved her distance, Cox electrified the crowd by a magnificent drive in the second which almost landed the girl a winner. There were ding-dong finishes, too, in the 2:08 trot, captured by General H., and in the 2:04 pace, in which May Day heat out Earl Jr., in great time.

The course was in perfect order for the record-breaking attempt of The Harvester, the air being warm and there being little wind. Geers nodded for the word on the second attempt. The Harvester trotted a grand mile, never faltering nor making the semblance of a skip, and finishing strong. There was a great demonstration when the time was hung out.

2:09 trotting; three in five; purse \$2000; three heats Wednesday.

Demarest, b. g. by Ariel Highwood (Geers)	3	3	4	1	1	1
Soprano, ch. m. (Andrews)	1	1	2	2	2	2
Oro Bellini, br. g. (Dickerson)	2	2	1	3	4	4
Alice Roosevelt, ch. m. (Murphy)	4	4	3	4	3	3

Time—2:08¼, 2:07¼, 2:08¼, 2:06¼, 2:07¼, 2:09.

2:04 trotting, two in three; purse \$1200:

Bob Douglas, gr. h. by Todd (McDonald)	1	1
Jack Leyburn, ch. g. (Grady)	3	2
Sonoma Girl, b. m. (Cox)	2	3

Time—2:12¼, 2:04¼.

2:21 trotting, three in five; purse \$1200:

Betsy G., b. m. (Cox)	5	2	2
Border Guard, b. h. (Miller)	2	5	5
Henry Winters, h. h. (McDonald)	3	3	4
Captain Cute, h. h. (Skaheen)	4	4	3

Time—2:11½, 2:10¼, 2:09¼.

Time—2:11¼, 2:10¼, 2:09¼.

2:08 trotting; purse \$1200:

General H., b. h. by Combineer (Hoag)	1	3	1
Lady Statly, h. m. (McDonald)	3	1	2
Willy, b. h. (Dickerson)	2	2	ro
Leonardo, r. g. (Dickerson)	4	4	ro
Baron May, blk. h. (Sayles)	ds		

Time—2:05¼, 2:06¼, 2:06¼.

2:04 pacing; purse \$1200; two in three:

May Day, b. m. by Commutation (Murphy)	1	1
Earl Jr., g. h. (Cox)	2	2
Ethan Roberts, h. g. (Healy)	3	3

Time—2:04¼, 2:03¼.

Special against time, trotting, to heat world's stallion record held by himself:

The Harvester, br. h. by Walnut Hal 2:08¼ (Geers)	Won
Time—2:01¼. Time by Quarters—:30¼, 1:00¼, 1:30¼, 2:01¼.	

Sept. 16.—The most successful Grand Circuit meeting Syracuse has had closed today with four good races, in which close finishes and fast time abounded. Summary:

2:15 pace, purse \$1200:	
Sarah Ann Patch, blk. m., by Joe Patchen-Sara Ann (Cox)	1
Direct Adair, ch. h. (Camp)	2
Oakland, b. g. (Ernest)	4
Charles F., h. g. (McCall)	3
Time—2:10 1/4 2:09 1/4	

Time—2:10¼, 2:09¼.

Startle, b. g. by William Wilkes-Cuba (Gahagan)	4	1	1
Justo, b. h. (McDonald)	1	4	2
Melva J., h. m. (Cox)	2	2	3
Bervado, h. g. (Murphy)	3	3	4

Sable Maid and Tealoline also started.

Time—2:08¼, 2:08¼, 2:10¼.

2:11 pace; purse \$1200:

Locust Boy, b. g. by Oakland-Vandetta (Ernest)	1	3	1
Dr. Fox, b. g. (Gahagan)	2	1	2
Joe Boy, blk. g. (Leary)	3	2	dr
Nancy Allen, b. m. (Rathbun)	4	4	dr

Gentley also started.

Time—2:09¼, 2:08¼, 2:09¼.

Major Dorsey, b. g., by Moving Star (McDevitt).....	1
Peter Wallingham, b. g. (McDonald).....	7
Baron Alcyone, b. g. (Rathbun).....	2
Nanco, g. g. (Ernest).....	4
Fuzz Johnson, b. h. (Geers).....	3
Oxford Boy Jr., Miss Winters and Orlean also started.	

Oxford Boy Jr., Miss Winters and Orlean also started.

Time—2:10¼, 2:10¼.

GREAT WESTERN CIRCUIT AT MILWAUKEE.

Milwaukee, Wis., Sept. 13.—2:15 pace; purse \$1000:

Walton Boy, br. h. (Dean)	1	1	1
Henry Winters, b. h. (Avery)	3	2	2
Lady Hontas, ch. m. (Steernemann)	2	6	5
Gender Mack, b. h. (Bernard)	4	3	4
Redlight, b. g. (De Ryder)	5	4	3
French Girl, b. m. (Harris)	6	5	6

Time—2:11¼, 2:12¼, 2:14¼.

2:35 pace; purse \$1000:

Floreta, h. m. (Fenelon)	1	3	1	1
Bessie Woodland, b. m. (Pricketto)	2	1	2	3
Ty Cobb, ch. g. (Colly)	3	2	3	2

Time—2:14¼, 2:14¼, 2:11½, 2:14¼.

Two-year-old, trot; purse \$500:

Jack Swift, hr. c. (Kaine)	1	1
Sister Ella, ch. f. (J. B. Chandler)	3	2
Mary E. Patch, b. f. (McCarry)	2	3
Galemore, ch. h. (S. Chandler)	4	4

Time—1:10, 1:07¼.

2:09 trot; purse \$1000:

Don Labor, br. g. by Labor Day (McGinnis)	2	1	1	1
Bertha C., br. m. (Chandler)	1	2	2	2
Countess Mack, b. m. (Fenelon)	3	3	3	3

Time—2:12¼, 2:12¼, 2:12¼, 2:12¼.

2:06 pace; purse \$1000; three in five:

Bland C., b. h. (Barnes)	1	1	1
R. F. D., blk. h. (Robinson)	2	2	3
Tony Swift, blk. h. (Dean)	4	3	2
Adam G., b. g. (De Ryder)	3	4	4

Time—2:05¼, 2:05¼, 2:06¼.

Three-year-old pace; purse \$500; two in three:

Countess Marie, b. L. F. C. Kaine, Knoxville, Tenn. (Kaine)	1	1
Lauretta Patch, b. f. (McKarr)	2	2

Time—2:14¼, 2:14¼.

2:20 pace; purse \$1000; two in three:

Denervo, b. g. by Demonio (De Ryder)	1	1	1
Morton G., blk. h. (Dean)	2	2	3
Bessie Woodland, h. m. (Pryckett)	3	3	3
Silverneer, h. g. (Dovenberg)	4	4	4

Time—2:12¼, 2:13¼, 2:15.

Sept. 14.—2:15 trot; purse \$2000:

Henry H., b. g. by Gregory the Great (Dean)	1	1	1
Lewis Forest, blk. g. (Loomis)	3	2	2
Vestale, br. m. (Tiffany)	2	4	4
Johnnie G., ch. s. (Brown)	4	3	3
Jessie Alltell, br. m. (Forsythe)	5	5	5

Time—2:10, 2:09¼, 2:10¼.

2:30 trot; purse \$1000:

The Angelus, hr. s. by Zombro (Colby)	2	1	2	1	1
Castle Dome, b. h. (Chandler)	1	2	1	2	2
Monarch, br. g. (Fenelon)	ds				
Altro C., b. c. (Forsythe)	ds				

Time—2:19¼, 2:13, 2:14¼, 2:13¼, 2:12.

Two-year-old pace; purse \$500:

Laura Patch, b. f. by Dan Patch (McGarry)	1	1
Princess Patch, b. f. (Bay)	2	3
Anna Oakley, r. m. (Steernemann)	3	2
H. N. Gentry, b. h. (Bills)	4	4

Time—1:07, 1:05¼.

Sept. 15.—2:10 pace; purse \$1000:

Knight of Strathmore, ch. s. by Twelfth Night (Frost)	1	1	1
Auctioneer, blk. h. (Taylor)	2	2	3
Fly by Night, b. g. (Longley)	5	3	2
Oscar Wilde, ch. h. (Fenelon)	3	4	5
Mark Knight, blk. h. (Hall)	4	5	4

Time—2:06¼, 2:07¼, 2:08¼.

2:17 trot; purse \$1000:

Howard, b. g. by Don Sphinx (Colby)	1	1	1
Wilma M., b. m. (Dickerson)	2	2	2
La France, ch. h. (Wilkinson)	3	3	3
Belle Colbert, b. m. (Fenelon)	ds		

Time—2:16¼, 2:15¼, 2:18¼.

Three-year-old trot, purse \$500; best two in three:

Jane Jones, h. f. (Chandler)	1	1
Loop Wood, b. s. (Peacock)	3	2
Peter Clay, b. c. (eDan)	2	3

Time—2:14, 2:19¼.

2:13 pace; purse \$1000; best three in five heats:

Carter G., s. h. W. L. Hill, Arapahoe (Hill)	1	7	1	1
Nathan B., hr. s. (Putnam)	8	8	1	3
Walton Boy, hr. h. (Dean)	2	4	2	2
Dean Oakley, s. g. (De Ryder)	4	2	3	4
Ira Gay, h. g. (Boyer)	3	3	4	
Tom Grundy, b. s. (Allen)	5	7	5	
Evan H., br. s. (Halla)	7	6	8	
Harry Weaver, b. h. (Kaine)	6	9	6	
Prince Albert, g. g. (Harris)	9	5	9	

Time—2:08¼, 2:07¼, 2:07¼, 2:08¼.

Sept. 16.—2:15 pace; purse \$1000:

Alta Coast, h. m. (Dempsey)	1	7	1	1
Gracie R., h. m. (De Ryder)	6	1	8	2
Bird Gratton, hr. m. (Kimlin)	4	2	3	3
Lady Hontas, ch. m. (Steernemann)	2	3	4	4

Time—2:09¼, 2:10¼, 2:10¼, 2:13¼.

Peark Pick, Van Spangle, Gender Mack and Sid Dell also started.

NOTES AND NEWS

Colorado E. (3) 2:05¼.

In the second heat of a race.

The two-minute three-year-old trotter is on the way.

Bon Guy (3) 2:11¾ was bred to ten mares last spring and nine of them are certainly in foal.

The official summary of the California State Fair races this year will be found in another column.

The Angelus 2:10¼ by Zombro is getting very close to the record that will make him a member of the "exclusive set."

The Fresno Fair will be the next meeting of the harness horses. It will open on Monday, October 3d and continue during that week.

Sam Norris has sent a useful pair of brown geldings, five and six years old to the Chase sale next Monday night. They are well broken.

A 9000-acre stock ranch in Mexico is offered for sale at \$2 per acre. Read the advertisement in this issue of the Breeder and Sportsman.

Chase's first fall combination sale will be held next Monday evening beginning at 7:45 o'clock. Fifty head of good useful horses are to be offered.

The Abbe 2:04 won his tenth race of the season at Columbus last Monday when he took the 2:14 pace in straight heats. He is unbeaten this year.

Uhlan 1:58¾, just to keep his foot in, trotted a mile on the Allentown half mile track last Wednesday in 2:05¼, a new world's record.

An offer of \$5000 was declined for Helen Stiles 2:09¼ at Salem. The offer was made by a Washington horseman.

Helen Stiles 2:09¼ by Sidney Dillon won both the big trotting stakes up north and Henry Gray by Zombro won the consolation divisions of both stakes.

Lou Crellins' five-year-old mare by Searchlight-Bertha (full sister to C The Limit 2:06¼) has a foal at foot by Charley D. 2:06¼ and is in foal to Jim Logan (3) 2:05½.

Portland's meeting was such a success this year that the officials of the Country Club are seriously considering the advisability of giving two \$10,000 purses next year—one for trotters and one for pacers.

Sister Fly, a three-year-old full sister to High Fly 2:04¼, is one of the promising young horses to be sold at Chase's next Monday evening. She is well broken single and double and a fine gaited, stylish mare.

At Indianapolis on Thursday of last week Country Jay won a three-heat race in 2:08¼, 2:09 and 2:09. There were but three starters in the event and Nancy Boyce was second in each heat and Sterling McKinney third.

Dolly Varden who attended the fair at Newman last week tripped in her new hopped skirt while on the track and fell heavily to the ground. No bones were broken, and aside from a few bruises Miss Dolly was not injured, but her escort Moody Liggett, induced her to retire to her apartments and take no further part in the sports of the afternoon.

Tommy Mac, a two-year-old brown colt by Milbrae 2:16½, dam by Geo. W. Archer, a son of Allerton 2:09¼, second dam by Chas. Derby, third and fourth dams producers by Del Sur and Clark Chief, will be offered at Chase's first fall combination sale next Monday evening. This colt is broken and is a natural trotter that will go fast if trained.

There are now six stakes for colt trotters and pacers on this coast. The Pacific Breeders' Futurity, the California Breeders' Futurity, the Oregon Futurity, the California State Fair Futurity, the Occident and Stanford stakes. The value of these stakes range from \$5000 to \$7250. The Occident and Stanford stakes are only for three-year-old trotters, the others having pacing and trotting divisions for two and three-year-olds.

Moko Hall, the stallion owned by Mr. Frank Ruhstaller of Sacramento is very closely related to the world's champion trotter, The Harvester 2:01¼. Both are by Walnut Hall 2:08¼ and out of mares by Moko. The grandam of Moko Hall is by Simmons and the grandam of The Harvester is by Cuyler. As Cuyler sired no 2:10 performers and the dams of but two, while Simmons sired four in 2:10 and the dams of eight, including the dam of Hamburg Belle 2:01¼, Moko Hall's breeding can be said to be fully as good as The Harvester's.

A black mare, hackney bred, and a perfect lady's park animal, has been consigned to Chase's sale for Monday evening next by William Watt, of Napa.

The bay gelding Longitude by Meridian is consigned to Chase's sale next Monday evening. The gelding is a fast trotter and has trotted a trial in 2:15½. He will make a good horse for the matinees.

The fair and race meeting at Newman last week was a big success. The gate receipts showed a big attendance, \$640 being taken in on Friday, the opening day, \$760 on Saturday and \$450 on Sunday.

The gate receipts of the Oregon State Fair last week were \$27,500, showing an attendance of about fifty thousand persons during the week.

With Colorado E., Native Belle, J. Malcolm Forbes and several others of the best three-year-old trotters in America entered in the Kentucky Futurity, that classic should be the greatest three-year-old race ever seen on an American trotting track this year.

Fresno races received very few entries, only two of the advertised events filling. There are plenty of horses at the Fresno track however and special purses will be given.

Joan, the black filly by Directum Spier beat Dudie Archdale and several other trotters at Columbus this week in 2:06¼. Joan is a four-year-old and the fastest of her age and sex.

Harold Dillon, a son of Sidney Dillon, owned in New Zealand, is attracting great attention in his new home as a sire of early speed. Dr. C. E. Farum of this city owns in Dillcara a full brother to Harold Dillon.

Sam Norris sends a gelding by Washington McKinney to Chase's sale that is broke both single and double, weighs 1200 pounds and is a good all around horse. Sale next Monday evening.

Helen Stiles 2:09¼ has earned something over \$6000 so far for her owners and should put a few thousands more on the right side of the ledger before she returns home.

Joe Twobig will move to Pleasanton next month. He has engaged to train about ten head of horses this winter—mostly young horses. His fast mare May T. 2:12¼ is safely in foal to Bon Guy 2:11¾ and he has already had several offers for the prospective foal.

A bay horse that any lady can drive and that is well enough bred for a race horse, will be sold at Chase's next Monday night. He is by Wayland W. 2:12½ out of the mare Nellie by Dawn 2:18¼, second dam by Whippleton. He weighs 1260 pounds and can show a 2:30 gait.

It is said that Happy Dentist 2:08 developed a slight curb after his winning race at Portland, and was consequently not worked between that time and his start in the \$5000 pace at Salem. Being short of work he was unable to carry his speed the full mile and was beaten.

Mr. Hugh Boyle has lost his fast pacer Diodens. The horse got out of the pasture and stepped on the third rail of the electric road that passes by Mr. Boyle's place in Mill Valley, Marin county, getting a shock that killed him instantly. Diodens was a valuable animal, being a very fast pacer and has won many matinee races in San Francisco and elsewhere.

The Los Angeles Harness Horse Association, the Pacific Coast Trotting Horse Breeders' Association, the California State Fair, the Portland Country Club, the Oregon State Fair, the Washington State Fair and the Spokane Inter-State Fair could, were they to act together, form a circuit of harness racing for the summer of 1911, that would assure large fields of the best and fastest horses in the country.

The California State Agricultural Society made a good bargain with the Citizens Committee of Sacramento in regard to a division of the receipts for the recent State Fair at Sacramento. As a result the Agricultural Society will have a profit of about \$6000, while the Citizens' Committee will have to put up about 25 per cent of the subscription of \$60,000 guaranteed by the merchants and business men of Sacramento.

Governor Hughes gave the following endorsement of the New York meeting: "I am very glad to know that an effort is being made to hold such a meeting as you propose, as I have always believed that it was entirely possible to conduct meetings in an unobjectionable way and to put racing upon the basis of true sport without the evils of bookmaking."

Baron May 2:07¼, by Baron Wilkes, is trotting in good form this year. He was second to Country Jay in 2:06¼ at Cleveland, and at Buffalo, when The Harvester broke the world's stallion record by trotting in 2:02 the third heat, Baron May was second. Baron May is out of the Palo Alto bred mare Nellie May by Electioneer, second day Lady Ellen 2:29¼ by Carr's Mamhrino.

When George H. Estabrook bought Colorado E. from W. L. Spears and the late Will Evans in the fall of 1908, Mrs. Evans remarked to him that he had purchased a real champion. "If he ever hangs up a championship record, you shall have a present," responded Mr. Estabrook. A day or so ago Mrs. Evans received a check for \$750 from Mr. Estabrook and with it a short note congratulating her upon her good judgment.

Bon Voyage 2:12¼ has made a great showing this year as a sire of futurity winners. His colt Bon Guy (3) 2:11¼ is the winner of two stakes and is the fastest three-year-old trotter as well as the biggest money winning colt on the coast. His colt Jean Valjean 2:10 is the fastest three-year-old pacer on the coast this year and won the California Breeders' Futurity. We do not know of another coast stallion that has two three-year-olds to take records below 2:12 this year.

Denervo won again for Charley De Ryder at Milwaukee on Thursday of last week. The same day he started Adam G. in the 2:06 pace. There were four starters and Adam G. was fourth in the summary. The time was fast in this event, 2:05¼, 2:05¼ and 2:06¼. Adam G. has had the misfortune to meet the hottest kind of company in all his starts this year. Charley D. 2:06¼ has not been started this year. De Ryder had him fired a few weeks ago and he may start at Lexington.

Capt. T. P. McCann of Hood River has bought from Dick Wilson the great race horse and successful sire The Patchen Boy (3) 2:10¾. The Patchen Boy is a stallion of attractive individuality, plenty of substance and is a son of Wilkes Boy 2:24¼, one of the best sons of George Wilkes, out of the famous brood mare Betty Brown by Mamhrino Patchen 58. The Patchen Boy is out of the great brood mare Lady Clay, by Metropolitan, son of Hambletonian 10, out of Clara, dam of Dexter, etc., by American Star 14. The Patchen Boy was the greatest three-year-old of his year.—Rural Spirit.

J. L. McCarthy, who started the horses so successfully at Portland and Salem has returned home. He states that both meetings were successful financially and otherwise and that the Portland Country Club is so elated over the outcome of their fair that they propose giving another that is even better next year. The \$10,000 purse for trotters will be given again and well advertised in the east. If the California fair association would join the Oregon and Washington fairs in the organization of a circuit, Pacific Coast racing would attract some of the best eastern horses.

Mr. J. H. McKowen, the well known insurance adjuster of Los Angeles, who formerly resided in Oregon, has had his share of bad luck this year. His horses landed in Los Angeles about the 11th of May. Soon after his grandly bred mare Aleno, in foal to R. Ambush 2:09¼, died leaving a foal a month old by Zolock 2:05¼. On July 25th this colt fell in a big hole that had been dug for a telephone pole and left uncovered, and was found dead. It was a natural pacer and was a fine looking and very promising youngster. On the 13th of August a two-year-old filly by Sherlock Holmes 2:06 and out of Aleno, died, and as Mr. McKowen writes that this is enough bad luck for one man to have.

La Moscovita by Guy Wilkes is destined to be one of our great broodmares. She is owned by C. L. Crellin, of Ruby Hill Vineyard, Pleasanton, and has quite a numerous family already. She is the dam of Yolanda 2:14¼ and of the great three-year-old Bon Guy 2:11¼ winner of the California Breeders' Futurity and the Stanford stakes this year, also of the four-year-old gelding Guy Light, now owned at Portland, Oregon, where he is used in matinee racing and has shown miles below 2:20. La Moscovita has a colt by her side now that is by Henry Helman's royally bred horse Alconda Jay, and is in foal to him again. She also has a daughter by McKinney called Daphne McKinney, that was bred to Bon Voyage and produced Bon McKinney, a colt now owned by Ted Hayes of San Jose, that is pronounced a crackerjack by all who have seen him and is already a standard performer, though but two years old.

It is only when the men most deeply interested in harness racing devise some way to actually put a stop to the annoying scoring which characterizes almost every race that this branch of racing will attain the standing in popular favor which it deserves. If an earnest effort was made to do away with scoring it could be done. If a rule should be adopted requiring horses to turn much nearer the start than they do now and limiting the scores before a heat or two, it is dollars to doughnuts that the trainers would adapt themselves to the conditions such a rule would bring about, and the start would be on the first score more times than it would be on the second. With every driver trying to jockey to get the best of the start and a starting judge who thinks he is filling the position by waiting for the drivers to get in line of their own accord, scoring becomes so prolonged and so tiresome to the spectators that it does more harm to the racing interests than any other one condition that can be mentioned.—Horse World.

BREEDING OF VERA HAL'S DAM.

Melrose, Sept. 20, 1910.
Breeder and Sportsman:—In the Breeder and Sportsman of last week I notice that you give the breeding of Vera Hal's dam as being by Tennessee Hal. This is a mistake as I bred Vera Hal and owned her until she was a yearling. Her dam I brought from Colorado to California in 1904 and bred her to Expressive Mc., the product being Vera Hal 2:09½. The dam of Vera Hal is Carmen by Newsboy, be by Billy Slasber, be by the beautiful pacing stallion Mountain Slasber, and Newsboy's dam was by Prince Pulaski, sire of the old pacing queen Mattie Hunter 2:12¾. Carmen's dam was Sky Blue by Tom Hal 16934.

Carmen is also dam of Roan Hal 2:12½, trial as a three-year-old and which Mr. De Ryder sold over east for \$2000 some few weeks ago. These two colts are the only ones out of Carmen that were ever handled for speed and it is a pity that a mare like Carmen was neglected in her young days and not given a chance to show what her produce could do. She is now 22 years old but vigorous and strong and is liable to yet be among the great brood mares. She has a horse colt by Expressive Mc. and a filly by Athadon that will be heard from later on as both show speed at the pace.

Yours very truly,

A. EDSTROM.

MEAGER PROGRAM OF AMATEUR RACES.

Of the four races announced for last Saturday's matinee of the Park Amateur Driving Club, but two came off, and in one of these there were but two starters and Mr. A. Ottinger owned both. The fact that the previous week contained two holidays and that several of the club horses had been racing at Sacramento during that time made the list of starters very small, and only the class A trot and the free-for-all trot were decided. In the class A trot there were four starters, Mr. H. C. Ahler's handsome mare Sunset Belle winning in straight heats, the fastest in 2:20.

In the free-for-all trot Mike Kelly owned by A. Ottinger and a bay trotter recently purchased by that gentleman were the only two to show up and they made a clever exhibition, the bay winning. The summaries of the two races follow:

First race, Class A trotters; one mile:

H. C. Ahler's Sunset Belle	1	1
Capt. W. Matson's Bird Eye	2	2
F. W. Thompson's Lady Washington	3	3
J. W. Smedley's Red Velvet	4	4

Time—2:23, 2:20.

Second race, free-for-all trotters; one mile:

A. Ottinger's Bay Trotter	1	1
A. Ottinger's Mike Kelly	2	2

Time—2:24, 2:21.

DISPLAY OF SPORTSMANSHIP.

That was a rare display of sportsmanship which was given by George H. Estabrook of Denver before the trotting division of The Horse World Stake, at Syracuse was started. In Colorado El, the crack three-year-old of the year, Mr. Estabrook had a horse that could easily have distanced his two competitors, Emily Ellen and Eva Bellini, had he been fully extended. And Mr. Estabrook had merely to say the word to have Macey send the great young horse through for all he was worth and thereby annex the entire 80 per cent of the total stake of \$9925 put up for the Futurity, this 80 per cent being the portion reserved for trotters, while the remaining 20 per cent went to the pacers. And Estabrook had merely to say the word to gather unto himself the three moneys, or the modest total of \$7380.

And here's where Estabrook's sportsmanship came in. He decided that first money, \$4428, was enough for him. He personally requested the judges to waive the distance flag, thereby letting the two others struggle for second and third moneys, \$1845 and \$1107, unimpeded. And Colorado E. went on and won with utmost ease, while Emily Ellen and Eva Bellini had a great fight for second and third moneys between them.—Syracuse Post-Standard.

FAST KINNEY LOU YEARLING.

Mr. F. W. Holloway, manager of the Hemet Stock Farm, writes us under date of September 20th, as follows:

"I wrote you some time ago about our yearling Wilbur Lou by Kinney Lou 2:07¾, dam Louise Carter 2:24, trotting a mile over our half mile track in 2:37½. Now I dropped him down a mile here yesterday, Sept. 19th, in 2:27¾. He trotted it nicely and finished good and strong, and we are very "high" on him. I calculate, if everything goes well, to take him to Phoenix this fall and see how fast he can trot on a good mile track.

Yours very truly,

F. H. HOLLOWAY.

The matinee pacer Guy Vernon won a good race at the Stockton Driving Club's matinee last Sunday. Driven by W. H. Parker he defeated the Nutwood Wilson pacer T. D. W. that has been racing through the circuit and the Stockton mare Blanche A., in straight heats, time 2:10½ and 2:12. Guy Vernon has no record and should be good enough to race in the green classes next year.

OFFICIAL SUMMARIES SACRAMENTO RACES.

Following are the official records of the trotting and pacing races held at Sacramento during the California State Fair of 1910, as taken from the Judges' Book:

Monday, Sept. 5.

Occident Stake; three-year-old trotters; \$2900:		
Donasbam, b. c. by Athadon-Cora Wicker-		
sbam (W. G. Durfee)	1	2 1
Expedio, br. f. by Lijero (Ivey)	7	6 1 2
Bon Guy, b. c. by Bon Voyage (Twohig)	2	4 4
Pal, b. c. by Palite (Chadbourne)	4	2 5
Strathboule, blk. c. by Stamboulet (Wal-		
ton)	3	3 3
Sweet Bow, b. f. by Bon Voyage (Quinn)	5	7 6
Babe Verne, blk. c. by Jules Verne (Hoy)	6	5 7

Time—2:13½, 2:14, 2:14½, 2:17½.

Trotting, 2:20 class:

Lijero, b. s. by James Madison (Wright)	1	1 1
Harold K., b. g. by William Harold (Hoy)	2	3 2
Bobby H., b. g. (Hamilton)	3	2 3
Little Branch, b. m. by Nutwood Wilkes		
(Bunch)	4	4 4

Time—2:22, 2:22, 2:20½.

Tuesday, Sept. 6.

Pacing, 2:20 class; \$800:		
Vera Hal, b. m. by Expressive Mac (Leg-		
gett)	2	1 1 1
T. W. D., b. g. by Nutwood Wilkes (Kemp)	1	2 3 2
Ice Man, b. s. by William Harold (Jackson)	3	3 2
Diogen, b. g. (Doyle)	6	4 4
Patery, b. g. (Hoy)	4	6 5
Alto Genoa, Jr., b. s. (Peirano)	5	5 6

Time—2:13½, 2:15¼, 2:14½, 2:17½.

Amateur race, class C pace:

Joe Dick, br. g. (Heenan)	1	3 1 1
Princess Flora B., b. m. (Burge)	2	1 3 2
Mae B., br. m. (Powell)	3	2 2 3

Time—2:22½, 2:22, 2:30, 2:22¾.

Wednesday, Sept. 7.

Trotting, 2:18 class, \$200:		
Mogolore, br. g. by Iran Alto (Davey)	1	1 1
Harold K., br. g. by William Harold (Hoy)	3	2 2
Crisis, br. h. by Zombro (Williams)	2	4 3
Bobby H., b. h. by Hanford Medium (Hamilton)	4	3 4

Time—2:22¼, 2:21¼, 2:21¼.

Trotting to beat 2:30¼:

De Oro, s. h. by Demoniah-Hanora (Quinn)	1	
--	---	--

Time—2:22½.

Thursday, Sept. 8.

Trotting, 2:15 class; \$800:		
Lijero, br. s. by James Madison (Wright)	1	1 1
Modicum, b. m. by George Ayers (Boyle)	2	2 2
Wenja, blk. m. by Zolock (Davey)	3	3 3

Time—2:18½, 2:15½, 2:16½.

Friday, Sept. 9.

Pacing, 2:15 class; \$500:		
Little Dick, ch. g. by Dictatus (Verhilac)	4	2 1 1 1
Vera Hal, br. m. by Expressive Mac		
(Leggett)	1	1 2 2 2
Choro Prince, s. b. (Hamilton)	2	3 4
Alto Genoa, br. g. (Piriano)	3	3 3
Normono, b. m. (Quinn)	5	d

Time—2:11½, 2:09½, 2:12½, 2:13, 2:14½.

Saturday, Sept. 10.

Stanford Stake, three-year-old trotters, \$1500:		
Bon Guy, b. c. by Bon Voyage-La Moscovita		
(Twohig)	1	1 1
Donasbam, b. c. by Athadon (W. G. Durfee)	2	2 6
Pal, b. c. by Palite (Chadbourne)	5	3 2
Expedio, b. f. by Lijero (Ivey)	3	4 3
Babe Verne, blk. c. by Jules Verne (Hoy)	4	6 5
Strathboule, blk. c. by Stamboulet (Walton)	6	5 4

Time—2:12½, 2:11¾, 2:12½.

Amateur pace:

Kermit, ch. g. by Henry Nutwood (Cowell)	1	1 1
The Jewess, b. m. (Lavenson)	2	2 2
Alice Roosevelt (Hunt)	3	3 3

Time—2:14, 2:12½, 2:14.

Special cup race:

Wild Bell, b. g. by Wildnut (Rubstaller)	1	1 1
Modicum, b. m. by Geo. Ayers (Boyle)	2	2 2
Siesta, b. c. by Iran Alto (Davey)	3	3 3

Time—2:14½, 2:14, 2:18.

CALIFORNIA HAY FOR PHILIPPINES.

Washington, Sept. 20.—San Francisco won the big hay contract for the Philippines over competitors from St. Paul, New York, Kansas City, Seattle and other wholesale centers yesterday. W. A. Miller is the successful bidder. His figure was \$1.04 per hundred for 10,000 tons of grain hay, or a total of \$208,000.

For some time there has been a ban on California hay at the War Department, and participation in the Philippine bids was absolutely refused. Inferior shipments sent to the islands, as reported by the army officers, had given the State's product a black eye.

A protest was made to Secretary Dickinson last winter. It was demanded that a sample be sent to the Philippines and also a test of the hay be made at the Agricultural Department. The Californians won and the report of the Agricultural Department on the samples submitted was that it was as good as is grown anywhere in the United States.

Roland Drake, one of the best known trainers in Kentucky, has been secured by United States Senator J. W. Bailey to train his horses.

Drink Jackson's Napa Soda.

THE NEWMAN FAIR AND RACES.

A fair and race meeting was held at Newman, California, on the last three days of last week that was very largely attended and a credit to the country on the west side of the San Joaquin river that is tributary to the thriving little town of Newman. There was a stock show that was worthy of larger fairs and there was active management shown throughout the week that was excellent in every particular.

The racing extended over three days. It was announced to begin on Thursday, but an unexpected rain fell which compelled the opening of the racing program being postponed until Friday, consequently the last day's races were on Sunday.

W. J. Kenney of San Francisco, acted as starter for the races and his work was excellent. The results of the different events during the three days were as follows:

Friday's Races.

2:20 pace, purse \$250:		
Margaretta Derby (Cbaffin)	2	1 1 1
Cricket (Ford)	1	2 3 4
Cbancellor (Best)	4	3 2 2
Easter (Benson)	6	5 4 5
Little Medium (Boyle)	8	6 5 3
Cole Direct (Brown)	3	4 dis
Firebaugh (Gruber)	5	6 dis
Dolly Varden (Liggett)		fell

Time—2:20, 2:18½, 2:17½, 2:16½.

2:40 pace and trot, purse \$150:		
Queen B. (Best)	1	1 1
Frances K. (Hommett)	2	2 2
Prince Del Monte (Imhoff)	3	3 3
Arona (Brown)	4	dis

Time—2:28, 2:32¾, 2:37½.

Running, half mile dash, purse \$75:
Samar won, Interlude second, Tully Roan third, Ar-gregor, Gold Ledge and White Star also ran.

Saturday's Races.

Free-for-all pace, purse \$400:		
Vera Hal, b. m. by Expressive Mac		
(Liggett)	3	4 1 1 1
Cboro Prince (Hamilton)	1	1 3 2 2
Firebaugh (Best)	2	2 2 3 3
Tom (Hammett)	4	3 4 4 4

Time—2:21, 2:23, 2:16, 2:15, 2:18½.

2:20 trot, purse \$250:		
Derby Lass (Best)	2	1 1 1
Della Lou (Imhof)	1	2 3 3
Bobby H. (Hamilton)	3	3 2 2
Sister (Allen)	4	4 4 4

Time—2:26½, 2:25, 2:25, 2:22½.

Sunday's Races.

2:30 pace, purse \$150:		
Margaretta Derby (Liggett)	2	1 1 1
Las Banos Boy (Allen)	1	2 2 3
Cricket (Palmer)	3	3 3 2
Dolly Varden (Bernard)	4	4 4 4

Time—2:21, 2:16, 2:17½, 2:18½.

Trot and pace for local horses, purse \$150:		
Tom (Tinnin)	1	1 1
Queen B. (Borta)	2	2 2
Frances K. (Kobr)	3	3 3
Experiment (Erchus)	4	4 5
Lady Clayton (Dobrzensky)	5	5 4

Time—1:11½, 1:09, 1:10½.

MATINEE AT STOCKTON.

There was a large crowd out to see the matinee races of the San Joaquin Valley Driving Club at Stockton last Sunday and while the fields were small there were four very good races. In the free-for-all pace the unmarked stallion Guy Vernon met the tried campaigner T. D. W. and beat him handily in fast time. Guy Vernon looks like a 2:05 pacer if trained next year. Results:

First race, 2:30 class, mixed:		
Lloyd A., pacer (Acker)	1	1
Pickaninny (Nance)	2	2

Time—2:43, 2:48½.

Second race, 2:15 class, pacing:		
Newport (Morris)	1	2
Chappo (Donovan)	2	1

Time—2:27½, 2:27.

Third race, free-for-all pace:		
Guy Vernon (Parker)	1	1
T. D. W. (Kemp)	2	2
Blanche A. (Acker)	3	3

Time—2:10½, 2:12.

Fourth race, 2:40 class, mixed:		
Lady Lou, trotter (Leiginger)	1	1
Black Beauty (Nance)	2	3
Laura J. (Carroll)	3	2

Time—2:43½, 2:31½.

Judges—F. Lieginger, A. W. Cowell, F. H. Johnson. Timers—Joseph Foley, W. J. Miller and F. Madden. Starter—F. Lieginger.

FALL CLIPPING INCREASING.

In most sections of the country the practice of clipping horses in the fall months is growing rapidly. Perhaps one reason for this increase in clipping, since owners recognize its advantages, is the fact that it can be done very quickly and with little exertion through the use of the modern clipping machine. One large manufacturer makes a machine that is generally conceded to be superior to anything else on the market and, as this outfit complete lists at only \$8.50, it is no hardship for any owner to have one in his stable.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT.

CARELESSNESS RESPONSIBLE FOR ACCIDENTS.

Since the open deer season, in this State, has prevailed, several fatalities and injuries, due to carelessness with firearms, have been reported. Now that the fall shooting will soon be on, what the aggregate list will be when the seasons are over is a matter of some conjecture. A careless, or excited, man and a loaded firearm comprise a deadly combination, and probably no amount of preaching will serve to remedy the situation.

In this respect, however, we offer some hints from an old hunter, who has compiled a few "don'ts" for those who go out to slay or be slain. These suggestions may not be new to many, but they are seasonal:

Don't grasp a gun by the barrel and drag it after you out of a boat, through a fence, or anywhere else; unless you want to test the truth of the saying that a man has more lives than a cat—and then don't. One discharge may blow them all out.

Don't carry more than a small quantity of whisky with you on your hunt. It's poor stuff to shoot on, and the devil who engineers the "deplorable accidents" you read of frequently while the hunting season is on has no more potent ally than the product of the still.

Don't under any circumstances allow your gun muzzle to point for one single instant at any living thing you do not mean to kill.

Don't allow yourself to carry a cocked gun in your hands, not even if you are alone. A sudden stumble may fire it, and you can never tell where the contents may go.

Don't carry a loaded gun into your camp or stopping place. And be absolutely sure that every cartridge is taken out of it before you go near the door.

If the sportsman who shot poor Jones through the heart across his own camp table had heeded that don't and the other regarding the muzzle of the gun pointing at any one, Jones would have been alive today. You see, he took a hammerless rifle into Jones' camp and laid it down on the table on the other side of which his host was sitting, talked for a while, picked up his rifle—and killed Jones instantly. He has never been able to understand how.

Don't shoot at a noise.

Don't shoot at a moving bush.

If, the other day, the sportsman who stood in Smith's backyard and killed his chum who was coming through the high brush 80 rods away, had heeded these don'ts the luckless chum wouldn't have been hurled into eternity without a moment's warning, and the still more luckless survivor would not today be a helpless maniac. These are don'ts worth heeding.

Don't shoot at small game such as rabbits, quail or squirrels with big ammunition. The man who shot at a rabbit with a high-power rifle last season and killed a woodchopper half a mile distant has wished many times since that he had heeded that don't.

Don't go away from your camp before you have familiarized yourself with the lay of the land and the landmarks within at least a radius of half a mile.

Don't go out without a good supply of matches, part of them in a waterproof case as an emergency supply; a good, heavy, hunting knife, a well-ground hunting ax or hatchet, a pocket compass and a lunch. There is always such a thing as getting lost among the possibilities.

Don't lose your head if you do lose your bearings; that is if you get lost. Sit down, take a smoke, get your mind out of the first panic into which the fact that you don't know where you are sure to throw it, and as soon as it is in normal working order way back. If you could do that you would not have don't make a fool of yourself in trying to find your got lost in the first place.

Don't give yourself up for lost, however. Get busy. Gather a heap of wood in case you have to camp out all night. Make a fire. Then sit down and wait for the guide or your comrade to find you. That's what they are sure to be trying to do, so don't make it harder for him by getting away from him as rapidly as panic speed can effect it. A good thing to do is to keep on top of the ridges.

Don't shoot at running game or any other unless you can clearly see three things—the game, the front sight of your gun and the rear ditto, and all three in conjunction, mind.

Don't jerk the trigger when you do see these three things in conjunction; press it. Then you won't throw the gun barrel up the least trifle when you fire; the veriest trifle elevation at that moment spoils the shot.

And lastly: Don't forget a single one of these don'ts.

Don't forget to observe them so rigidly that their observance becomes a second nature to you.

Don't forget to preach the like observance to your fellow sportsmen, and you will find them the best pieces of wood lore you ever learned.

THE ALEUTIAN HUNTER TAKES RISKS.

Unalaska, westward of the Aleutian chain of islands, and Kadiak, just south of the great Alaskan peninsula, were the two main points whence radiated the hunting flotillas for the sea otter grounds. Formerly a single Russian schooner or packet boat would lead the way with a procession of a thousand bidarkas. Later schooners, 30 or 40 of them, gathered the hunters at some main fur post, stowed the light skin canoes in piles on the decks and carried the Aleuts to the otter grounds. This might be at Adka, where the finest otter hunters in the world lived, or on the south shore of Unalaska, or in Cook inlet, where the rip of the tide runs a mill race, or just off Kadiak on the south coast, where 20 miles of beach boulders and surf waters and little islets of sea kelp provide ideal fields for the sea otter. Here the sweeping tides and booming backwash keep up such a roar of tumbling seas that the shy, wary otter, alert as an eagle, does not easily get scent or sound of human intruder. Surf washes out the scent of the man track. Surf outounds noise of the man killer, and no fires are lighted, be it winter or summer, unless the wind is straight from the southward, for the sea otter always frequents the south shores. The only provisions on the carrying schooner are hams, rancid butter or grease, some rye bread and flour; the only clothing what the Aleut hunters wear.

No sooner has the schooner sheered off the hunting grounds than the Aleuts are over decks with the agility of performing monkeys, the schooner captain wishing each good luck, the eager hunters leaping into their bidarkas following the lead of a chief. The schooner then returns to the home harbor, leaving the hunters on islands as bare as a planed board for two, three, four months. Upon the Commander group otter hunters are now restricted to the use of the net alone, but formerly the nature of the hunting was determined entirely by the weather. If a tide ran with heavy surf and wind landward to conceal sound and sight the hunters lined along shore of the kelp beds and engaged in the hunt known as surf shooting. Their rifles would carry 1000 yards. Whoever saw the little round black head bob above the surface of the water shot, and the surf wash carried in the dead body.

If the weather was dead calm, fog or clear, bands of 20 or 30 men deployed in a circle to spear their quarry. This was the spearing surround. Or if such a hurricane gale was churning the sea that gusty spray and sleet storm washed out every outline, sweeping the kelp beds naked one minute, inundating them with mountainous rollers that thundered up the rocks the next, the Aleut hunters risked life, scudded out on the back of the raging storm, now riding the rollers, now dipping to the trough of the sea, now scooting with lightning paddle strokes right through the blasts of spray athwart wave wash and trough, straight for the kelp beds or rocky boulders, where the sea otter must have been driven for refuge by the storm.

This hunting is the very incarnation of the storm spirit itself, for the wilder the gale the more sea otters have come ashore, the less likely they will be to see or hear or smell the hunter. Gaff or paddle in hand, the Aleut leaps from rock to rock or dashes among the tumbling beds of tossed kelp. A quick blow of the bludgeon—the otter never knows how death came. This is the club hunt. But where the shore is honeycombed with caves and narrow inlets of kelp fields there is a safer kind of hunting. Huge nets, now made of twine, formerly of sinew, with wooden floaters above, iron sinkers below, are spread athwart the kelp fields. The tide sweeps in, washing the net flat. And the sea otter swims in with the tide. The tide sweeps out, washing the net up, but the otters are enmeshed in a tangle that holds neck and feet. This is perhaps the best kind of otter hunting, for the females and young can be thrown back in the sea.

No landsman's still hunt affords the thrilling excitement of the otter hunter's spearing surrounds. Fifteen or 25 little skin skiffs, with two or three men in each, paddle out under a chief elected by common consent. Whether fog or clear, the spearing is done only in calm weather.

The long line of bidarkas circles silently over the silver sea. Not a word is spoken, not a paddle blade allowed to click against the bone gunwales of the skiff. Double-bladed paddles are frequently used, so shift of paddle is made from side to side of the canoes without a change of hands. The skin bidarkas take to the water as noiselessly as the glide of a duck. Yonder, where the boulders lie mile on mile awash in the surf kelp rafts—forest of seaweed—lift and fall with the rhythmic wash of the tide. Hither the otter hunters steer, silent as shadows.

Then when the proper ground is reached the boats spread out in one large or several smaller circles. When the quarry is located the surround closes in with shouts and the luckless otter is too confused to select a break in the ranks of the spearmen. But a few seconds elapse before a hurthing spear is sent unerringly in its direction.

For provisions the Aleut has brought very little from the ship. He will depend on the winds driving in a dead whale or on the fish of the shore or on the eggs of the sea birds that nest on these rocks millions upon millions, such myriads of birds they seem to crowd each other for foot room, and the noise of their wings is like a great wind. He himself is what any race of men would become in generations of such a life. His skin is more like bronze than leather. His chest is like a bellows, but his legs are ill developed from the cramped posture of knees in the manhole.

WHY WE TAKE TO THE WOODS.

The general run of people are nowadays coming to realize that the success of a hunting party is not to be judged entirely by the amount of game killed. A few years back the inevitable question asked of a man returning from the woods was: "How many deer did you kill?" Now, it more frequently is: "Did you have a good time?" A man doesn't go through hardships innumerable and spend a month's salary just to get a few score pounds of meat. He can buy his meat at home. He goes into the woods not merely to kill, but to get some enjoyment out of life, and that enjoyment comes whether he kills anything or not. There is fun in the chase, but the average sportsman feels that his time has been well invested whether he gets a shot at game or not. There is nothing like a week or two in the pine forests to tone a man up and give him an appetite for food and sleep. It offers a complete change and relaxation and is worth whatever price is paid for it. Such a trip will do more for a man than any amount of money spent in doctor's bills. Of course, there are some tenderfeet who catch bad colds and have an unpleasant time on hunting trips, but this just shows that a little more forest life is just what they need. If they lived long enough in the woods and mountains they would get over their tenderness altogether. Such a life toughens a man up in good shape and puts him in a position where he can sit around all day with feet thoroughly soaked, and not feel the slightest ill-effects. There must of necessity be some attraction in the way of deer and moose or other big game, to draw men into the wilds, and it will be a shame and a blow to the health of the nation when the hunting is a thing of the past, for then the outdoor life of the average city man will be confined to summer resorts, and life at such a place generally is as much or more of a drag on a person's health than the bustle of the city. There isn't such a chance there for complete rest. Fishing is also a mighty good thing because of the way it gets men into the wilderness, but it isn't to be compared with hunting in this respect, for it takes comparatively few away from civilization entirely, the way hunting does. The fishing resorts, too, commonly have good hotel accommodations, and all that sort of thing.

NOTE: Event 1—Distance casting, feet. Event 2—Accuracy casting, percentage. Event 3—Delicacy casting; a, accuracy percentage; b, delicacy percentage; c, net percentage. Event 4—Lure casting. Event 5—Long distance lure casting, average.

Fractions in Event 2, fifteenths; in Event 3, sixtieths; in lure casting, tenths.

Booth, the Los Angeles crack on taxidermy, says that the deer season down south should not open until September 15. The deer have not got their full coat of hair until that time, and the meat is not fit to eat till late in the summer. There is some talk of changing the game laws of this section so the season will open the middle of September, as it would benefit the game as well as the hunter.

THE THRILL OF A BLACK SEA BASS FIGHT.

To "land" a black sea bass is the ambition of every deep-sea fisherman worthy of the sport, and Catalina is the home of the big black. Of course, a "tuna hunt" is more exciting and usually means a longer and harder fight, but the tuna is becoming so rare in Pacific waters that only occasionally is one caught, fought and landed. He travels in schools like his first cousin, the beautiful albacore, and when you see a mile away a school of him playing leapfrog, and you command your boatman to steam over to them, the chances of a "strike" are about one in 50, writes Edwin K. Johnston in the San Jose Mercury. Once caught, however, the fight is the most glorious known to the fishing game. To see a 200-pound fish rush several hundred feet and hear the click of the reel as the line rolls off, then see him leap clear of the water from eight to twelve feet, and to realize that this performance must continue for from four to six hours before Mr. Tuna has felt the final thrust of the gaff, is a thrill not soon to be forgotten.

A few weeks ago at Catalina a gentleman hooked a tuna and fought him for six hours and ten minutes, and then lost him. The big fellow fights till the last kick is out of his body. After an hour the angler's hands become numb and half-paralyzed, and a rest of a moment or two is taken—that is to say, he holds his game steady, keeping the rod securely in the pouch of his chair. The moment he resumes, the tuna, rested, too, is as fresh as when the fight began, and away he rushes and leaps again much as a Texas steer freshly lassoed. Nor is the angler the busiest man in the boat. The boatman must keep up with the fight too. He enters into the game with the zest of a tenderfoot, but with the experience of a man who has seen hundreds of these finned monsters in action. He steers his launch always toward the fish, so as to prevent the snapping of the line, and if possible lessen the strain on the angler.

Away they go, out into the ocean—sometimes a distance of 20 miles is covered before the battle ends—and schools of flying-fish shoot by and a score of boats filled with enthusiasts follow to see the fight out, the exhilaration of the experience, the tenseness of the nerves, is quite beyond the skill of words to describe. Finally your fish surrenders, you reel up, and with the gesticulations of an African native when a lion is brought into camp, your boatman, shouting and swearing, gaffs his quarry, ropes him, and, with the help of the now completely exhausted angler, draws him across the bow of the boat, ropes him again and prepares for the return to waiting Avalon. But before starting your proud boatman, with expanded chest, reaches into a little box, takes out a white flag and hoists it to the breeze. It tells passing anglers and the hundreds waiting on the Avalon pier that a tuna is aboard. At the pier the fish is drawn up to the wharf proper and weighed. Charlie, the photographer, is sent for, then the taxidermist, who comes down with a wheelbarrow and proudly wheels the great fish to his shop, where he mounts him for a fat fee and later sends him to the owner's home. If the angler's tackle has been properly certified he becomes at once a member of the Tuna Club and is presented with a gold button for his catch.

I had "Mexican Joe" with me the morning I caught the big bass. He it was who ran the launch when Gifford Pinchot had his battle with a swordfish weighing 180 pounds, a year ago. He is an interesting character, is "Mexican Joe." Proud of his Mexican ancestry, he boasts of having spent 52 years of his life fishing in the waters of the Catalina Islands. He is in his 65th year now, but still a swarthy, agile figure who knows as much about the fighting habits of big fish as Frederick Selous knows of the big game of Africa. During three seasons I have had "Joe" as my boatman. And for several reasons: First, for his sporting spirit; second, for his infallible knowledge of the game; third, for his familiarity with every likely spot in that part of the ocean; and fourth, for his skill as a cook, a requisite not to be despised when one sails off to the West Coast (25 miles from Avalon, as I and my Chicago friend did) where the fish are numerous, or San Clement at the other end of the island, where large yellowtail abound. Joe is clean and capable as a cook, and when the evening meal is over and pipes are lighted around the campfire, he easily holds the center of the stage as he recites the adventures of a lifetime with the big fish of Avalon Bay. With an unflinching memory, a fisherman's vocabulary, and a true sport from head to foot, he is a picturesque figure as he squats on the beach before the fire and spins his fascinating yarns. Pinchot he calls "Pinch," and Roosevelt, whom "Pinch" has promised to bring to him sometime, he calls "Teddy."

But the bass—We left the pier at Avalon about 7:30 in the morning and went straight to a point between Silver Canyon and Seal Rocks. "I'll dig up a bass here," said Joe, as he prepared to cast anchor. We had albacore for bait, and as the meat is soft, smaller fish kept eating it off about as fast as the bait was dropped in. Finally Joe threw a line in for a small rock bass and got one in a moment; I reeled up, and with as little injury to the rock bass as possible, Joe hooked him through the back and tossed the line in, with the remark that "The little fish will not chaw that up." Perhaps not five minutes had passed when I felt a vicious tug, then another and another, and the fight was on. The singing of the clicking reel as the big fish rushed off was the music I had waited for, and I ordered Joe to pull in his anchor, as I had a sea bass on, and a mighty good one. But, to my surprise, Joe just watched the fight a moment, and then, with an oath, declared I had a shark. It was now about 9 o'clock. I played

my game cautiously, holding the handle of the drag reel firmly and keeping the slack reeled up at every opportunity. The sea was a trifle high, and by this time Joe had his anchor out of the water and the boat close upon the heels of the fish, no matter in which direction he moved. When I insisted it was a seabass Joe angrily declared it was an "infernal shark," and finally I told him he would see when the fight was over. It was a battle royal. We had been virtually towed out to sea a mile or two, and as we dipped into the pit of the wave, then rose to its crest, then dipped again and rose still higher, with the salt surf occasionally breaking over the sides of the boat and Joe always swearing and gesticulating, while I kept "pumping" (lifting the rod as high as possible) and reeling rapidly to the surface, as the fish tore through the sea, one realized it was the sport of a life-time, and that the fishing in the little bay at home near the Madawaska, much as it fascinated the barefooted lad who put in Saturdays (and sometimes Sundays) catching suckers and mud-pout, with an occasional pickerel, was after all a tame affair compared with this.

At the end of an hour I had my fish to the boat's side, and there, to my astonishment, was a tremendous shark, a shovel-nose about eight feet in length, and weighing perhaps 300 pounds. Joe knew it; of course he knew it all the time, and now I knew it. Nevertheless I wanted him gaffed, but Joe refused. "If I put a hook into him," he said, "that will be an end of my luck," and drawing his butcher-knife he cut the line and away went my prize. The boat was turned about at once and started back to the seabass grounds, where Joe assured me "With that devil (the shark) out of the way we will soon land a bass." The tackle was fixed up, and having obtained a yellowtail from a passing boat we used a fourth of it (about five pounds) for our first bait. The yellowtail is tough, and the smaller fish cannot damage it. It was now about 10:20. At 10:30 I felt the first tug below, then another, the line went out, click, click, click, click, slow enough, and finally a z—, and with an upward hoist of the rod I hooked him fast. He was on sure enough.

"You've got a seabass," said Joe, "and a good one. Keep cool." The anchor was again lifted, my hand held firmly the handle of the big drag reel, and I determined to take my time and husband my strength as far as possible. When I tried to lift the rod it was as though a locomotive were on the other end, but finally I got it up, reeled down to the water's edge, then held fast with one hand while I opened and closed the other as a means of inducing circulation and preventing numbness. But the rushes of the big bass were quite as strenuous as those of the shark, albeit the latter was perhaps a trifle quicker in his movements. As a rule the seabass swallows the bait and is hooked in the vitals, and I supposed this one was so hooked. At the expiration of three-quarters of an hour we were fully three miles out to sea, and as the fight progressed anglers returning from Silver Canyon formed a circle around us to watch the battle. The water was still rough, but since the boat is a good-sized steam launch and there is no danger of being swamped, that was no objection. It added picturesqueness to an already spectacular scene. The big fish was putting up a tremendous fight, but after a half-hour I had learned his methods and had no difficulty beyond the strain upon nerves and muscles in controlling him. At 12:03, one hour and 33 minutes after the "strike," I reeled in and slowly drew the now completely exhausted fish toward the boat. He was a beauty—the picture of an overgrown fresh water black bass—and lay upon the face of the sea as though dead. Joe reached his gaff for him and, drawing him to the side of the boat, put a rope through the great gills and swung him around to the stern, where, with my assistance, he was drawn up over the deck, roped securely thereto, and away we started back to Avalon. The boat went on its way, Joe reached into his "what-not," drew forth a red flag and hoisted it to the breeze. It told the watchers on the pier that a seabass was coming, and greatly to my satisfaction and pleasure when we reached the crowded landing the first one to recognize me was the handsome, broad-shouldered eldest son of Mr. Sanford E. Smith, who in a fine spirit greeted me with "Hurrah for San Jose!" The fish, which we had guessed at 275 pounds, was quickly drawn up to the pier proper and hooked hanging to the scales. It weighed an even 225, the largest qualified bass of the season up to that time. A little later a 425-pound one was landed, and doubtless many more of a larger size than mine have since been caught.

Hunter's Lodge at Catalina—A hunters lodge is to be opened at Middle ranch, on Catalina Island, at the beginning of the quail shooting season, October 1, for the accommodation of the many hunters who will be attracted there this fall and winter on account of the splendid quail shooting. This kind of game has been protected by the Banning Company for a number of years. As a result quail are found there in vast numbers.

The lodge, which will have a capacity sufficient for the accommodation of thirty guests at one time, will be under the supervisions of N. M. Kirkpatrick and J. H. Splittstoesser. A stage coach will make the round trip, twenty-four miles each day and besides carrying passengers will also carry the mail and supplies for the guests of the lodge. Telephonic communication between Avalon and Middle Ranch will further keep the hunters in close touch with the world.

Drink Jackson's Napa Soda.

RANDOM NOTES.

[By Loch Laddie.]

The subject of feeding dogs is often asked and answered. Where one or two dogs are kept it is not much trouble to solve the question, but where a great number are kept together the problem becomes more difficult as the environments and facilities of obtaining food are taken into consideration. Again a food that dogs will thrive on in a northern climate and which will there keep their coats in good condition, further south would bring the opposite results to those desired, and I believe this is a proposition that should be thoroughly looked into by one who intends keeping a number of dogs together. Not only does improper food cause complications to arise that are not desirable, but the fact of feeding a number of dogs together encourages bolting of food and with it indigestion. One dog tries to eat as fast as possible to get a larger proportion than his kennel mates and to this fact we can trace one source of the kennel scourge—eczema. So the practice of chaining dogs and feeding them separately is a practice to be looked on with favor; also it gives the timid dog a chance to eat and become quicker adapted to his quarters so the meal time is not looked forward to with terror. While all admit that a dog in its natural state is carnivorous it is not always that a meat dish is obtainable and we then begin to think that, like any other animal, the dog should have a balanced ration, one a fat producer and the other containing sufficient protein to furnish the necessary bone and muscle, without which the makeup of a dog is in poor condition to do his share of field work.

The usual fat producer is cornmeal, and this has been the cause of more supposed outbreaks of mange than anything else. A continued diet of corn meal without change is a sure producer of eczema; in fact, almost any diet without change may produce the same results, but more so from improper cooking than anything else—as we have all learned by experience. Well-cooked corn meal with a liberal share of meat and some oats boiled with it to furnish the necessary protein, is a meal not to be lightly overlooked. But continued feeding of mush made of meal and cracklings heats the blood of working dogs to such a point as to cause skin eruptions which are greatly aggravated by keeping the animals at work when in that condition, and only rest, change of diet and a cooling tonic can restore his coat to its original lustre. When hot water is simply thickened with meal the danger becomes greater, for the numerous stir-about feeds are made this way; as the task of actually cooking corn meal is a tedious job of stirring steadily for two or three hours.

After offering the usual criticisms against meal, the next question is suggested: What is a good cheap food for the ordinary field dogs? If one is situated in the country and is trying to keep a string of dogs (and the necessary outlay for their care should not be too great). I will offer as a substitute rice in place of meal and clean beef scraps or pork cracklings. I am not needlessly prejudiced against pork cracklings, for in themselves, if of good quality, they are a good source of protein, but ordinarily the quality is poor and when clean and fresh the hydraulic press of the present day in the lard factories removes every particle of digestible matter, leaving a brittle mass as a residue and when cooked, aside from its flavor, as a tempter of vitiated appetites—it is but a useless pulp. Then some, at times, will feed cracklings raw, which often causes serious bowel troubles, for when pressed some particles are hard and sharp as glass, so the intestines suffer from contact with it. I then suggest beef, the meat removed from the bones, and the larger bones fed separately, as they will furnish the necessary phosphates for making bone, and also be the sole dentifrice needed. Stale bread is also another food that makes a desirable change and should be soaked in buttermilk or in beef broth, made from the heads, necks and less costly parts of the animal. Regarding stale bread, it is usually obtained from the large bakeries at very reasonable figures, but all pieces that become mildewed or show the least signs of mold should be at once discarded.

Care must be used to prevent this, which is an extremely difficult task during wet periods of summer. Eggs are splendid conditioners and milk also, but are not really such great sources of nourishment as many writers claim, I can remember one instance of a dog that had passed through the severest ordeals of distemper. Milk and eggs were given him to build up his system. While he devoured them with relish he remained a living skeleton until a native of southeast Missouri suggested pork and beans. The diet was offered to the dog as a man grasps at the last straw. From the first day he began to mend and in a month was in perfect condition to stand the ordinary routine of field work.

All domestic animals have some fatal disease peculiar to their tribe, which comes as an epidemic and carries off a great number, and our canine friends are not the least exempt from disease of a fatal nature, no matter how much care may be bestowed on them, and precaution in the shape of disinfectants and the dosing with preventives does not seem to decrease the number of deaths from disease. Many writers lay great stress on the allegation that animals in a wild state are free from disease, and even if exposed to it will not contract same. To this I beg to take issue and speak from personal experience. I had a severe siege of distemper among my dogs.

Prior to that some boys at a nearby mill camp had reared four timber wolf puppies, and when they had reached about sixty pounds they left their homes to enter into a wild state once more. About the only pretense they made toward domestication was that when they saw the boys who reared them they would invariably follow them as old acquaintances, and when reaching the outskirts of the town they would disappear in the woods. In this manner they contracted distemper from some of my dogs and in a few days returned to their homes at the mill camp suffering badly from the disease and shortly afterward died. So we can but hold the opinion that all animals, even in a wild state, suffer from some disease, though their ability for secreting themselves so well rarely gives us an opportunity to find them when suffering from disease. Few dogs reach twenty months of age without going through a siege of distemper, and notwithstanding the number of complaints against the so-called cures widely heralded in the different sporting papers, the majority of them are of great help, but too often precautions for the dogs are neglected and the disease has already claimed its victim. I would not go into a description of the different symptoms of a case of true distemper—they are too well known—and for that very reason every cough caused by worms or indigestion is put down immediately as distemper in its first stages and then of course the pup is forced to swallow every cure known.

I must confess that to diagnose a case of distemper in its first day or two is beyond my power, for the symptoms are as different as can be, but what I generally go by is the peculiar odor prevalent when a dog is seized by this scourge of the kennel. Good nursing is the main thing—and I believe the several standard advertised cures will avail more than any preparation the amateur can put up himself. Also I would not advise force in feeding when the animal refuses to eat, for the stomach, being unable to digest food, is of but little help. Two different things to tempt the appetite. On one occasion a dog would not be tempted by anything until fish was offered him and he accepted it with a relish and for three days he was kept alive on boiled fish and milk, the bones having been carefully picked from the meat. In this a dog reminds one of a human being, for even we, when in a severe illness, refuse all kinds of food and often we readily accept something for which we never had any liking for prior to our sickness.

The after effects of distemper are almost as dangerous as the disease itself. Some contract pleurisy or pneumonia, others paralysis and the dread chorea. The latter is admitted incurable by medicines, only the wearing off with age seems to effect any change in the animal. Two years ago I luckily stumbled across a cure, at least for the two cases where I used it—and two months from the first time it was used in neither case were the least signs of twitching perceptible. This is no private cure and as it is never going to be advertised as a cure for chorea I will give it to the readers of *The Breeder and Sportsman*. Fluid extract of black wash, 10 drops; three times per day. It won't hurt to try and it may be of great assistance in conditioning some poor sufferer who is already a nervous wreck. A prominent eastern specialist in canine diseases made the statement that any dog over two years of age who showed symptoms of distemper was not suffering from distemper, but from some other disease. Had he said that more dogs were treated for distemper when suffering from something else I think he would have been far more to the point.

ECHOES FROM THE NORTHWEST.

[By August Wolf.]

Guides report there are more ducks in Spokane county and other districts in eastern Washington, where the season opened on September 15, than at any other year since 1900. The season, closing on December 31, is also open in Adams, Douglas, Ferry, Grant, Lincoln, Okanogan, Stevens and Whitman counties on plover, curlew, snipe, rail, and other shore birds, geese, brant and swan. It is always unlawful to kill geese, brant or other waterfowl on the Columbia and Snake rivers in Klickitat, Walla Walla, Franklin, Yakima, Kittitas, Douglas, Garfield and Whitman counties.

The elimination of spring waterfowl shooting is alone accountable for the large number of ducks and geese this season, according to sportsmen who have made a careful study of the situation. For the first time in the history of waterfowl shooting the shotgun artists were barred from their customary goose shooting in the spring of 1909; hence the increased number of ducks.

There is really little excuse for the slaughter of ducks, a protected bird, while on a goose shoot, but it is estimated that the spring goose shooting east of the Cascade mountains resulted in the death of more ducks than geese. For every pair of ducks killed in the spring the hunter is robbed of a flock in the fall, or for every duck killed such is the result, for it is a well known fact that survivors do not remate during a season.

At the session of the Eastern Washington Game Commission in Spokane on September 7, several sportsmen complained of the loss of the spring goose shooting, but so irrefutable was the evidence advanced by others present of the value of the new law that the complainants were quickly silenced. Spring goose shooting is a thing of the past as the

commission holds that it is better to serve the interests of the large body of sportsmen and protect the ducks in the spring, rather than drive the waterfowl from this district for the sake of a short spring goose season for a few hunters.

Two changes of the game law of vital importance to Spokane county hunters will probably be made as a result of the advisory session in Spokane, presided over by State Senator Charles E. Meyers. The first affects quail, and gives the hunters an open season of a few weeks in 1911, while the second puts the ban on prairie chicken shooting until 1915.

The present law protects quail until 1912. However, quail have increased much more rapidly than anticipated during the past years, under strict protection, and the experts agree that a few weeks' open season, while it will result in the death of a large number of birds, will result in a much higher rate of propagation through cross-breeding. In other words, heaves deteriorate when unmolested, but increase more rapidly when scattered.

Prairie chickens, a fast-disappearing bird, is on the other hand, in danger of annihilation unless protected beyond the date provided by law—1912. Hence Spokane hunters will probably be unable to unlimber their shotguns in the chicken belt of this county until 1915, with the probabilities of a similar law in all counties east of the Cascades, in line with reforms tending to make the game laws of all counties in this section identical.

The uniformity of the game laws in eastern Washington is a problem which will probably be worked out this winter, resulting in laws which will not protect the game of one section and allow the extermination of the same kind in another.

GOSSIP FOR SPORTSMEN.

One week from today the open season for ducks, shore birds, snipe and quail will be on.

Reports from almost all of the bay counties duck shooting resorts state that not only home bred birds were never more plentiful, but also that the northern birds are surprisingly numerous. Should fair weather continue for a week, this season will be a

The season is never untimely for the trout angler. As the fall approaches most people entertain the thought that the angler's rod is ready for the shelf. Not so, however, for during this month trout fishing, at various resorts, has not only been excellent, but the promise for fine sport during the October days is most pleasing.

Among other good tidings are the reports from Eel river, where steelhead angling is excellent, particularly so near Gregg's. State Fish Commissioner M. J. Conell, Frank Maskey, Charles F. Breidenstein and other local anglers are now on the river enjoying the sport.

Other distant trout waters will be visited by William F. Hillegass and William Eaton, who will try the Little Shasta. Harry Walker is at Grant's Pass, Ore., where there is fine fishing in the Rogue river.

Floyd Judah recently enjoyed excellent angling sport in the Klamath river near the Hot Springs. One day two eight-pound salmon were caught on a light rod. Larger ones were in the stream for his tackle was cleaned out. Trout fishing in Jenny creek could not have been better while Judah, Otto Feudner and Dr. Wiborn were in camp on the creek.

The steelhead fishing nearer home, however, is not to be overlooked. The run of steelhead in Monterey bay, off Santa Cruz and Capitola is phenomenal. The fish, good sized and heavy, have been seen daily jumping in water a mile or more from shore and have afforded grand sport to many anglers. Walter Burlingame a week ago made a splendid catch of these game fish off Capitola. Roswell Welch expressed a box of two-pounders to Charles H. Kewell during the week that are regarded as the finest conditioned catch of steelhead sent to this city in years.

Heretofore Santa Cruz steelhead angling has been mainly confined to fishing in the San Lorenzo and Soquel rivers, near their mouths and up-stream. The anglers waited until the fish ran up the river. Recent developments, however, show an unexpected condition, the opportunity of enjoying the sport in the waters, a mile and more off shore, something novel in steelhead angling and decidedly agreeable. This proves an assertion that we have made repeatedly during the past decade—our local anglers have yet to develop properly the saltwater fishing. Fifteen years ago, for instance, we advocated trolling for salmon in the bay waters. That our salmon were susceptible to the lure of the spoon was discovered by the pioneers in striped bass trolling, now this sport is eagerly looked for whenever the fish are running.

Steelhead fishing in Pescadero lagoon is also of the best. Recently Charles G. Breidenstein and Fred Sarcander, in a short time, landed twelve fish averaging two pounds each. These trout eschewed the usual lures, flies, spoons, sandfleas, etc., but fell to the angler's wiles when tempting pieces of small salt water catfish baited the hooks.

Truckee angling is of inducing enough sport to tempt numerous city anglers to the fly-casting club's lodge and to the various river resorts. The veteran flycaster, James Watt, and Dave Sells have recently whipped the river with satisfying results.

The lakes of the Tahoe region are also reported to be in line for good trout fishing at present.

Salmon anglers will now observe the close season which prevails from September 17th to October 23d. Some of the salt water fishermen have been under

the impression that the close season applies only to the commercial salmon fishermen. The statute forbids the possession of fresh salmon during this period, and that settles the question for the rod and line sportsman. A close season, above tide water, will also ensue from October 23d until November 15th; this applies particularly to the net men.

The fleet of trolling launches outside the last Sunday of the open season with but few exceptions all returned to port early in the forenoon, the weather being entirely too boisterous for small craft. What few salmon were taken were found to be gorged with anchovies. The fish were seen in large schools here and there in the ocean, but discretion apparently directed a course inside to smoother waters for the fishermen.

The best catch reported was made by Al Larsen, George Beibesheimer, J. Bareillies and Joe Gabarino—the Sebellville piscators—their boat stayed outside until midday. Eight salmon, with a forty-two pounder as the largest, was the catch. Big fish cleaned out the tackle three different times. The other boats averaged from two to five salmon.

The salmon fishermen hanks his faith on several patterns of spoons, brass, copper or shell. A large sized anchovy or sardine is also used as a spinning bait. The shell should be plentifully equipped with swivels.

The balance of the outfit, it may be just as well to state here, consists of a heavy rod of split bamboo or green-heart from six and a half to nine feet in length. The favorite pattern is a rod having but one long joint, six or seven feet, which sets into an eighteen or twenty-four inch butt—a tuna model, in fact. Needless to say, a proper reel is absolutely necessary, one that is built for hard usage and that will hold from 200 to 300 yards of cuttyhunk linen line. Some anglers fancy No. 12 strand line, others use 15 or 18, even as heavy as 26 strand. No. 15, however, properly tanned and paraffined, will respond to any call in the salmon line.

A big run of striped bass at Vallejo Junction is reported by John Gollobeck of Crockett. One day last week four anglers caught ninety-six striped bass, and local fishermen of the Carquinez straits points have been making big catches for two weeks past.

Rodeo is also slightly on the fishing map again. Charles Arp, Louis Daverkosen, Charles Cate, Frank Hittell and others have made good catches at this resort.

San Pablo has been indifferent in bass returns. The clam casters who prospected Wingo and San Antone a week ago, met with but ordinary luck. Jim Lynch was high hook at San Antone with a catch of five fish.

Tihuron lagoon has been in fairly good shape for bass fishing now for several weeks. E. Medau caught twelve fish during the week, none weighing over six pounds.

At nearly all of the bass fishing resorts a noticeable predominance of small bass has been the rule. Some observers contend that this is a result arising from the stopping of the net fishermen's raids with small meshed nets.

The "rock cod" season is now in full swing and will continue until about September 5th. Two weeks ago the tide was just right for the sport and hundreds of pounds of large-sized rock cod were caught at all of the Marin shore fishing grounds and about Angel Island. Returning fishermen carried baskets, bags and festoons of this toothsome pan fish. These excellent bay fishing conditions existed nearly all of the past week.

Sea-shore anglers have also had most excellent sport at the San Mateo beach resorts.

Next month the spawning season will be over for the surf fish and all the local rod and reel experts will come into their own after a lull of over three weeks. There are great numbers of these members of the finny tribe along the southern coast and next month promises some good sport.

John Davis, a well known Deputy Fish Commissioner up to three years ago, has been appointed, it is reported, to take charge of the State Fish Commission launch Quinnet. Jake Christianson, a local angler, has been appointed engineer of the Quinnet.

Deputy Schaeffle will, it is also reported, look after Fish Commission affairs in and about the local fish markets and fisherman's wharf.

Leon F. Douglass and John J. Deane joined a party of hunters who were camping in the Mendocino mountains and bagged eight fine bucks during a stay of six days. While these mountains are rather thickly timbered, making work for the hunters somewhat strenuous, the game is so plentiful that it is well worth the effort. Messrs. Douglass and Deane returned highly elated over their success.

A Shark Adventure.—Hundreds of people viewed a monster shark last week on the Avalon pier. It was 14 feet long and weighed 264 pounds. This giant was brought to gaff in 50 minutes by B. F. Kierulff of Los Angeles. He was fishing in the launch *Adele* off Magic Isle when the mammoth hammerhead struck and was off, towing the launch in its wake. But the fish battled so fiercely that it was tired out in three-quarters of an hour and in another five minutes it was brought close enough for Captain Staples to gaff it. The fish caused all the more furor because it was a light fishing day, not a single "hutton" fish having been brought in.

A VETERAN HORSEMAN'S OPINIONS.

What intelligent persons see to criticise and commend at fairs and race meetings should always be matters of interest to those who manage the same and there is much to be learned from the written or spoken observations of those who attend them. The following from the pen of the veteran horseman Dr. J. W. Day, of Rochester, New York, recently appeared in the Horse World of Buffalo and is worth reading:

I took a vacation from the overwork from my professional duties the first three weeks of August. I selected that date for one great reason to me. I anticipated seeing the greatest trotting events in the history of the trotting world, namely, the breaking of nearly all records, and it is needless to say I was not disappointed.

It is easy to say I told you so, but I think I was one of the principal supporters of the belief that the two-minute trotter would eventually appear. I find in one of my old catalogs that I predicted during the '80s that I expected to live to see the two-minute trotter in this country. It has been 25 years since then, but I lived to see it, and I expected it when I left home the last day of July. I did not expect to see the trotting gait predominate over the pacing gait, but I saw the trotting colt stakes all beat the pacers, and Uhlan beat all the pacers in the world as well as trotters. When I made my prediction I did not expect to include any scheme like the wind-shield—the assistance of which should never have been allowed on any track or in any register, for it is not proof of any merit. It does not look much like the horseless age, but I never had any fear of that, and it will never arrive. I had the most enjoyable three weeks that I have had in a long time.

After visiting Detroit and Cleveland, I had decided to go to Goshen, in Orange county, to attend a betless meeting in New York State and see how the plan worked. I had another reason for going there. I was born on Sugar Loaf Mountain, in Orange county, about eight miles from Goshen. I wanted to go back to see what few relatives I had left there and visit my birthplace once more. Right here I want to say to any of your readers who have never visited Orange county that they have missed a good deal, for Orange county is one of the most beautifully picturesque counties in the State of New York or any other place I have ever visited. It has the finest roads, most beautiful homes. Every farm house looks like a beautiful summer home of some city millionaire. It is beautiful beyond comparison. You ought to see Mount Eve and Mount Adam and all the rest of the saintly-named hills. I enjoyed them immensely, but there were some sad thoughts, of course. I had not been there in 20 years, and there was no grandfather nor grandmother, no uncles or aunts. They had all passed across the Great Divide, and I remembered that I had passed from my youthful days; but there were a few cousins and a score of second cousins and I was happy to see them. But now to the races.

Goshen is one of the most beautiful villages of its size in any country, with its beautiful streets and residences, and the track is in the very heart of the village, its gates being within 100 yards of the beautiful court house and within five minutes' walk of the business part of the town and hotels. When you walk into the gates you see the most beautiful buildings, secretary's office, grandstand, stables, judges' stand, track and lawn that can be found anywhere. The lawn inside the track is as fine as you would find in front of any mansion. I was there early in the morning, and a gentleman who was a general attendant of the Grand Circuit races, when looking up into the grandstand, said to me: "Well, Doctor, did you ever see the like of this; look up into that grand stand." "Well," I replied, "they are cleaning it." "Cleaning it," he said, "why they are mopping it and washing the seats." A half-dozen men and women were actually doing it, and they repeated that every morning, and any lady could walk into that stand every day of the meeting dressed in her evening clothes without soiling them. Everything at Goshen is conducted on this plan. To myself, I wished that every secretary of a racetrack could have seen it and have taken a hint as to what would make the gate receipts better at a trotting meeting, whither it was a betless or a betting meeting.

Mr. Weston is the right man in the right place. He is the head and front of the whole arrangement and has had a life-long experience in the racing game under the old plans, but is carrying out the will and wishes of the great financier and lover of good horses, the late E. H. Harriman and his family, and he had able assistance in every department. Orange county, and Goshen especially, is a horse-loving place and the trotting horse rules there as much as he does in Lexington, Ky. I saw more beautiful horses hitched to fine rigs and driven by beautiful women than I have ever seen anywhere in my whole life.

There was not an automobile allowed on the grounds, but they were not neglected. They were all parked on the lawn by the court house and guarded by officials, and the first arrival to the latest departure knew that it was perfectly safe for the owners to leave their wraps and everything in charge of the officers. The inside grounds were lined with beautiful horses and carriages, and at four o'clock the starting judge announced that all the ladies were invited to take tea in the beautiful park inclosure.

I saw the best races that I have seen in a long time; good fields of horses, racing for the money

without the sign of a job. There were no less than 8000 to 12,000 persons on the grounds every day. The admission charge to everyone was the same as on the Grand Circuit, one dollar admission to the grounds and grandstand, but the tickets were sold separately, and as soon as they sold as many as the stand would comfortably hold the sale ceased. Standing room, to obstruct the view of those that paid for seats, was not allowed (another good hint), and the guests did not invariably stand up and then climb on the seats to see the races.

The judges' stand was occupied by men who knew their business and performed it, if they were not so-called professionals, and the starting judge, George Mills (who was born and raised and lives in Goshen, and was brought up in the horse business), knows how to start horses, and does it. I know three or four other starting judges that can do the same, and I often wonder why it is that the great Grand Circuit meetings so seldom find such a man to fill the position.

It is needless to say that the meeting was a grand success in every way, financially, and especially socially. I expect to live even now to see many such meetings all over this country as I saw at Goshen. Any track, under proper management, in the State of New York, I believe, can have the same kind of a meeting.

I expect to go to Lexington, and while I do not expect to see a betless meeting I expect to see everything else under very similar conditions as at Goshen, for I expect to see a starting judge who can start horses and I expect to see crowds of people and the finest races in the world attended by the most hospitable people of any country to entertain the visitors, as Goshen did, and the whole arrangement equal to any other place, with all the fine horses and beautiful women; and if one should be sick and need a stimulant he can get the best whisky in the land. Of course, I don't expect anybody would go down there just to be sick and get a drink. I only added the above for a provision. I further expect to see the world's trotting record still further reduced. I expect to see the stallion record lowered to about two minutes, and I expect to see the three-year-old trotting record lowered to about 2:05 or better.

I have made this letter too long, but this vacation trip has brought on a little of the old horse fever, and I hope it may prove a good hint that will help out the grand old trotting game in the future and that I may live to see my hopes and wishes fulfilled.

A SHETLAND PONY THAT DIED AT FORTY-FOUR

In the London Live Stock Journal there recently appeared a photograph of a handsome Shetland mare called Topsy, that died a few weeks ago at the age of 44 years. Accompanying the picture was a brief sketch of this rather remarkable pony, which was as follows:

"Topsy was a pure-bred Shetland pony which lived to the extraordinary age of 44 years. Where her foalhood and fillyhood were spent we do not know, but, like many another 'child of the mist,' she first appeared before the public amid all the noise and commotion of a Falkirk Tryst when only 2½ years of age. The seller, however, represented her to be a year older, and he sold her to an old traveling tinker. At this early age Topsy started on her working career somewhat ignominiously, carrying the tinker's goods and chattels around the country.

"The venture was not a success, for the old man was very deaf, and mischievous boys used to play pranks on him and Topsy, which forced him to sell her. The change was a lucky one for the pony, for she became the property of that genial, large-hearted Scottish farmer Mr. Abernethy, The Hall, Penicuik. Here she was properly trained and treated, and she remained in his hands until she was 26 years of age, when she came into the possession of Mr. Waldie, Muircleuch, Lauder—where some famous Clydesdales have been reared—and as she passed the remainder of her long life there her age can be quite easily authenticated. She was in regular work until she was 35 years of age, and intermittently for two years longer, after that getting a well-earned old-age pension. Mr. Abernethy exhibited at numerous shows in the class for ponies under 12 hands, and she was never beaten. During most of her working years she was one of the gamest and fastest animals on the road, and, unless she was too severely handicapped, she would not allow any horse to pass her. Even to the last she declined the cooing that would have been lavishly bestowed upon her, and preferred to roam on the bleak hill of Muircleuch, 1000 feet above sea level, in company with a number of horses. Here could be witnessed one of those interesting cases of friendship amongst animals which are often met with, for the horses all showed the greatest attachment to Topsy, and when a strange animal was put out on the hill it was never allowed to go near her for days.

"All through that long and faithful life she never had an ailment, only for two days at the close she appeared just a little out of sorts, but nothing to warrant any special treatment. She seemed to have no disease whatever, but the machine was worn out. Topsy's long race was run, and quietly and apparently painlessly this wonderful little animal lay down on her beloved moor and passed into her last long sleep.

"As the peewits were plaintively calling, And the hill lamb uttered a piteous cry, While her little friend lark sang a requiem o'er her head From somewhere up in the sky."

THE JUDGES' STAND.

With each recurring season of trotting sport comes up the old, old chorus of incompetency in the occupants of the judges' stand. This complaint is not confined to the minor or half mile tracks, but has been loud and deep at some of the big meetings. A common sentence in a report with regard to a horse not being driven to win a certain heat is "Every one saw it but the judges," and it is a generally accepted fact that the judges have looked with a blind eye on many leading horsemen who notoriously evade or rather deliberately ignore the rule against laying up heats. We have for many years been opposed to the old three-in-five system with an unlimited number of heats and have had the pleasure during the last decade of seeing a variety of systems tried, all with the same end in view, of shortening the race and though it has its drawbacks, probably the best practical conditions is that all races should end with the fifth heat, yet even then if two horses have each two heats there is the sporting desire of the crowd to see a final heat between the two. But if we must have the three-in-five system and as long as we do have it, drivers will lay up heats and take their chances of beating the judges. As for the public, that does not enter into the calculations at all.

Nor must it be supposed that only the unscrupulous driver who is willing to make a deal or be a helper or pull a heat for a little sure money is the only offender. A well known driver of high reputation who always drives to win a race, once boldly made this public declaration: "If I am compelled to win three heats in five to win the race and find I cannot do it in straight heats I consider I have a perfect right to pick the three heats I can win." Now that sounds logical and honest. He possibly wins the first heat in a hard finish, is doubtful if he can keep up the clip and decides to lay up the next. His reputation is so good that the innocent betters back him for the second, the public in the grandstand are all watching him, he drives an easy mile, possibly indulges in a little break on the top turn and comes home in the field. He possibly repeats this performance in the next heat and then comes out and wins the race. The few horsemen in the inside could read the race from start to finish, but the great crowd of spectators are not satisfied. Yet it must be borne in mind that the trainer has got to think of his and his owner's interest and that the paramount object is to win the race and if he thinks he cannot win in straight heats he must drop one or two. It is the law which is in fault which at times compels the best men to evade it, while it enables the dishonest driver to do a great deal of crooked work.

General Grant once said the best way to get rid of a bad law was to strictly enforce it and if the judges would apply the rules strictly with regard to laying up heats, the rule would be quickly repealed, or old three-in-five would go out of existence. The difficulty is in enforcing the rule. The judges, as a rule, do not do it. After a score of flagrant cases have passed under the eyes of the judges some bold offender gets reckless and pulls so openly that even the program boys notice it, and the driver is fined. He has probably made ten times the amount of the fine. The amateur judge, or the judge who only goes into a stand two or three times during the season rarely sees intelligently that a driver is laying up a heat and even if he thinks, seldom has the backbone to apply the rule. It requires more genuine ability, clear eyesight, nerve and knowledge of the rules to be a presiding judge than to be the umpire at baseball games. In all other sports and pastimes known experts are employed at good salaries and the rules are enforced. A judge should be licensed by the parent associations and be responsible to them for a faithful application of the rules. He should be known and respected by horsemen of high reputation, of keen eye and absolutely just and fearless. That he should understand the rules and their practice is understood. But in order to do good work he should be employed from the beginning to the end of the season and should go through entire circuits. No matter how keen and clever he may be, the first meeting will be experimental with him, but he will get some idea of the horses and a little later down the line he will have a very clear idea of the position of affairs and will be able to pick out the men who do not want records and the clever knights of the sulky who like to manipulate the market. Then the axe will fall and after a few examples the balance of the drivers will fall into line and he will have no trouble through the other meetings of the circuit. As to the question of expense, that flag was madly waved when a paid professional starting judge was first proposed. The small associations declared they could not afford it. Now they all have them and would not be without them. When they get the competent paid presiding judge and have tried him they will wonder how they managed without him—Chicago Horseman.

W. B. Taylor, Sedalia, Mo., has sold and shipped to parties in Australia his fast trotting stallion Bellbar 2:13¼, by Escohar 2:13¼; first dam Rhodena, dam of Bizzy Izzy 2:13¼, by Edward F. Bell 2:19¼, son of Ashland Wilkes 2:17¼, next dams by Pillatoga 2:20¼, and Norman Medium 2:20. Bellbar is a horse of fine size and style and showed speed to promise a fast record, and was sold at a good figure.

THE FARM

THE DISEASE BREEDING

HOUSE FLY.

The house fly can well be called the most dangerous animal in the world. At least it kills more people every year than all other animals taken together. It is small and looks innocent. That, however, does not stamp it as harmless. The small things are often the most dangerous.

Most people die from diseases caused by bacteria, things so small that it takes the best of microscopes to see them and it is these that the flies carry and that makes them so dangerous.

When wolves take a few sheep a bue and a cry is raised and they are hunted to death, and yet we let the fly, which is a hundred times more dangerous, live, let it walk over our food, over baby's face and bands, and it kills a hundred babies and human beings for every sheep that a wolf or coyote kills, and we don't do a thing but take it as a matter of fate. Why not take action?

The American Civic Association of Washington has a Fly Fighting Committee which has sent out the suggestions given below as how to lessen the number of flies:

The house fly breeds in horse manure, kitchen offal, and the like. Dispose of these in such a way that the fly can not propagate.

Screen all windows and doors and insist that your grocer, butcher, baker, and everyone from whom you buy food stuffs does the same.

There is more health in a well-screened house than in many a doctor's visit.

After you have cleaned up your own premises inspect the neighborhood for fly-breeding places. Call the attention of the owner to them and if he does not remove them, complain to the board of health.

Not less than 95 per cent of the pests are bred in the stable.

All stables should have a manure-bin with a door at the side and a wire screen on the top, that the larvae deposited in the manure before it was placed in the bin will be screened when hatched, and as flies seek light and come to the top of the bin, they can be easily killed by burning paper or some other device.

The fly has a thirst equaled only by his hunger; place a dish of poisoned water in the stable and a greater part of the flies hatched there will be killed.

Wherever absolute cleanliness prevails there will be no flies. Look after the garbage cans. See that they are cleaned, sprinkled with lime or kerosene oil and closely covered.

Remove all manure from stables every three or four days, and when removed, keep in a tight pit or vault, so flies can not breed in it. Lye, chloride of lime, or blue vitrol water, crude carbolic acid, or any kind of disinfectant may be used.

To clear rooms of flies carbolic acid may be used as follows: Heat a shovel or any similar article and drop thereon twenty drops of carbolic acid. The vapor kills the flies.

A cheap and perfectly reliable fly-poison, one which is not dangerous to human life, is bicbromate of potash in solution. Dissolve one dram, which can be bought at any drug store, in two ounces of water, and add a little sugar. Put some of this solution in shallow dishes, and distribute them about the house.

A spoonful of formalin or formaldehyde in water, put into a quarter of a pint of water and exposed in the room will be enough to kill all the flies.

To quickly clear the room where there are many flies, burn pyrethrum powder in the room. This stupefies the flies and they may be swept up and burned.

If there are flies in the dining room of your hotel, restaurant, or boarding house, complain to the proprietor that the premises are not clean.

Everyone that values his life or that of his neighbors should make a careful study of this program. Cut it out and paste it up where it can be read every day, and practice what it advises. This will not be as fascinating as hunting wolves, but it will result in more good. It will take concerted action to make the work effective as in the wolf hunt. Every town ought to have a fly-fighting brigade and to be most effective it should be composed of everybody in the town or city.

SAVING MANURE

SAVES DOLLARS.

The manure should be saved, liquid and all. What we want to do is to save all of the manure, make all of the gutters tight every time we clean them, fill them with horse manure and other absorbents, in order to save all of the liquids.

Common dry dirt or dust will serve as an excellent nitrogen-trap, and will save the expense of buying plaster or other absorbents.

This saving method should also be applied to the horse stable and the hog house. The urine of swine has value of over \$2 per ton, while that of a horse has a value of over \$7 per ton, and it is often the case that farmers do not take any pains to save either, even among those who appreciate the value of both.

Land plaster is useful in all stables; it has power to keep the offensive odors down and while it does not contain any plant-food in itself, nevertheless it has the power of adding to the fertility in an indirect manner by catching and holding the liquid fertilizers until they are taken up by the soil.

It also has the power, when united with the soil, of unlocking or setting free, certain elements already in the soil, thus making them directly available for plant-food.

With the manure thus carefully saved, we should investigate how to use it with the greatest benefit and at the least possible expense.

These investigations should be made for a term of years. It will not do to jump at conclusions from the fact that a

The Most Perfect Colt Bit Made

EVERY COLT

Should wear the **ELLIS IMPROVED HUTTON PATENT CHECKING DEVICE** from the very beginning of its training, as it is the easiest, most comfortable and most humane bit on the market. With its use the colt will not fret, worry, pull, toss its head and get into the bad habits so often caused by the use of other bits and checking devices that inflict punishment or keep it under too much restraint, and at the same time you will have absolute control over it at all times.

The **ELLIS IMPROVED HUTTON PATENT CHECKING DEVICE** is in a class by itself. It is the only Checking Device or Bit sold on a positive Guarantee to REFUND YOUR MONEY IN CASE IT FAILS TO DO ALL THAT WE CLAIM FOR IT. If the Ellis Improved Hutton Patent Checking Device is used on a colt from the very beginning of its training, we guarantee it will never get any of the following bad habits.

If, however, your colt or aged horse has acquired the following bad habits, the Ellis Improved Hutton Patent Checking Device will correct them, and if it fails we will refund your money. GUARANTEED to stop your horse from Pulling, Tossing the Head, Tongue Lolling, Side Pulling, Bit Fighting, or any other bad habits caused by the use of other Bits or Checking Devices that inflict punishment, or keep a horse under too much restraint.

PRICE \$5 for complete Device. Mailed free to any part of the world when cash accompanies order.

BEWARE of worthless imitations and Checking Devices claimed to be as good as the **ELLIS IMPROVED HUTTON PATENT CHECKING DEVICE**. Illustrations of some of these check bits and devices are made to look as near like the genuine as possible, but the article itself is very different, and will not give the same results.

ALL GENUINE are stamped G. S. ELLIS & SON on the supporting strap and back part of Check Rein. Any that are not so stamped are not genuine. FREE—Our new Catalogue No. 45, with wholesale discount sheet, the largest, finest and most complete Horse Goods Catalogue ever published, is ready for distribution. It contains illustrations, descriptions, and guaranteed to be lowest prices on Harness, Horse Boots, Horse Clothing and Tack Goods of every description. Every horseman should have a copy. You can save many a dollar during the season by buying direct from us, as we are now selling direct to horsemen, allowing them from 30 to 50 per cent discount from retail prices. Write us today for a copy and we will take pleasure in sending it to you all charges paid.

Awarded Gold Medal at California State Fair, 1892. Every horse owner who values his stock should constantly have a supply of it on hand. It improves and keeps stock in the pink of condition. Ask your grocers or dealers for it. Positively cures Colic, Scouring and Indigestion. Manhattan Food Co., C. P. Kertel, Pres., 1001-1003 E. 14th St., Oakland, Cal.

certain experiment proved best for one year. This mistake often leads to failures when a series of experiments would have reached successful results.

The number of farmers who haul the manure directly from their stables to the field and spread it, has been greatly increased during the past few years.

Early prejudice against this method has rapidly been yielding to argument in its favor, which claims a reduction in the cost of handling manure at a season when the farm work is less imperative, and also saving it for use a month or six months earlier than when baled out at one time.

By spreading in this manner it becomes better mixed with the soil that is plowed, and the liquids that have drained into the soil are turned up by the plowing and are available for plant-food as soon as the seeds are planted.—W. M. Kelley.

I want to see agriculture introduced into all colleges and universities as rapidly as is consistent with good work, says L. H. Bailey. The presumption, however, is still against successful agricultural work in the literary institutions, because such teaching demands a point of view on education that the men in these institutions are likely not to possess. Agriculture can not be introduced in the same way that a department or chair of history or mathematics can be organized; it requires a different order of equipment and of activities, and its own type of administration.

It is a pretty safe rule to select breeding pigs from the largest litters. A pig is a runt simply because it is starved. Give him a chance to stuff himself and he will develop into as good a hog as the bunch.

Warranted to give satisfaction.

GOMBAULT'S CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeny, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Sprain, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

Every bottle of Gombault's Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

FIRST HONORS AT CAMP PERRY WON WITH PETERS AMMUNITION.

The Herrick Trophy Match

is conceded to be the most important event of the annual Camp Perry competition; teams of 8 men, 15 shots per man at each range, 800, 900 and 1000 yards; each man permitted to choose his gun, sights and ammunition.

The 1910 Herrick Match was won by the Ohio Team No. 1, score 1689.

This was the crucial test of men, guns and ammunition. PETERS .30 Government cartridges (180 gr. bullet) were found NOT WANTING and were proven superior to all others used in this premier event.

COST OF GROWING PIGS.

A reader hands us a statement containing his record of the cost of growing two litters of pigs until they were eight weeks old. The cost of the sows' feed alone was not reckoned, but the total amount of feed consumed by the sows and their litters was included. One litter consisted of six pigs, farrowed by an old sow on April 10.

The record began one week before farrowing time, and continued until the pigs were eight weeks old. Everything fed the sows and pigs was charged at the market price of the locality. The ration consisted of middlings at \$1.70 per 100; corn, oats and buckwheat ground together, at \$2 per 100; corn meal at \$2 per 100, and whole corn, charged at \$1 a bushel for a little over a bushel and one-quarter. The total cost of the feed during this period was \$14.39, and this divided by the number of pigs makes approximately \$1.20 for each pig at 8 weeks old. The pigs averaged at the end of the experimental period 30 pounds each, and a total cost shows that the live pork produced was at the rate of considerably less than 5 cents per pound, and the owner estimates that the cost of each pig to six weeks old was about 85 cents, while he was offered \$3 per head for them.

Other figures by other feeders will show a difference in results because of the different combinations in feeds. We should like to hear from our readers as to the results they have obtained in their own feed lots.—Kansas Farmer.

HAVE A CALF LOT.

Don't let the calf run with its mother, even if it does have on a patent weaner. That is not the best way. The mother worries about the calf and the calf annoys the mother with its futile attempts to get milk.

A case of this kind came under my observation recently. The calf was taken from the mother shortly after birth and taught to drink skim milk. It was kept in a stall for some time and then turned into a small pasture lot.

In due time the owner thought the calf would do better on a wider range of pasture and so after putting on a wire weaner muzzle turned it out with the cows.

For some weeks there was but little trouble. The calf may have slipped its muzzle once or twice and stolen a breakfast, but that was all. The weaning seemed to be complete and the little fellow learned to eat grass and grew rapidly.

Yet a day or two ago this calf broke a hole in its muzzle so it could get its tongue through, and it learned again to take refreshments from the original fountain. Its great exuberance in coming again to its own caused it to hunch

its mother unmercifully and thus, with possibly the assistance of the broken muzzle, the cow's udder was so injured that her life is now in danger and her milk flow reduced to nearly zero. This lesson teaches us to always have a large grass lot for the calf and keep it there.

Clover is a better feed for horses than timothy, but not so much of the former is required. Clover and timothy mixed are a good hay feed for colts or work horses.

When the horses are not doing much at this season let them have the run of a pasture or stubble field. If the picking is at all good they will enjoy it and take on flesh with less dry feed.

INBREEDING.

All great breeders of domestic animals have used inbreeding with great success in fixing the type of the animals they wished to produce. Here is the way one of the great families of Shorthorns was bred by Chas. Collings of England, in the early part of the 17th century. The bull, Favorite 262, was the produce of Bolingbroke 86 and his sister, Phoenix. Favorite was one of the most famous Shorthorn bulls of history. Speaking of him, Prof. Chas. Plumb, in his "Types and Breeds of Farm Animals," says:

"Favorite was dropped in 1793 and died in 1809. He was mated to his nearest relatives in the herd of Chas. Collings and, bred to his dam, sired the heifer Young Phoenix which he was in turn bred to, resulting in the bull, Comet. This last bull was very beautiful and reached such public favor that at the dispersion sale of Chas. Collings in 1810 he brought one thousand guineas (\$5000) which was the highest price paid up to that time."

The average farmer has altogether too much prejudice against inbreeding. Where a farmer has a fine, strongly prepotent bull, it is always well to breed his daughters back to him, providing they are strong and vigorous. This kind of breeding creates a powerful prepotency in the body of all females so bred so that when mated with good bulls they give progeny of very decided character.

The farmer who does not separate the milk from the cream and feed the skim milk to his pigs, is simply selling his ground out from under him.

Although a hog does not possess much sense, it can be taught to be gentle.

Not only for your own sat- isfaction but for your profit as well

you should have tabulated pedigrees of your horses. If you want to sell them the pedigrees will help you to make the sale and get you a better price.

We will trace the breeding and send you a tabulated type written pedigree showing the records of the produce of the sires and dams represented and make it up to date, handsomely executed in two colors suitable for framing, for \$3. It is more than worth the money.

A Colorado farmer feeds cut alfalfa hay with a portion of good barley and wheat, feeding about one pound of grain daily, and all the alfalfa they will eat. This farmer says he can feed this at a cost of about 50 cents per month, and the pigs make fine growth.

There is no reason why good, clean swill from the family table should not be given to the pigs, but it is had practice to force the pigs to eat sour and fermented swill.

The beauty of hog-raising is that with good management these animals are always as good as cash in the bank, because there is always a sale for them.

Clean, sound oats make an excellent ration for the pigs. If this is fed to them regularly during the fattening period, the pork will be superior.

A handful of shelled grain is always more effective than a cluh in inducing a pig to travel where you want it.

Lifting live hogs from the ground to the wagon is an unpleasant job. Three dollars will build a crate which will do the work better and safer.

A brood-sow should be well nourished, but it is a great mistake to allow her to become very fat, as a fat sow will lose litters, or produce weaklings.

The only way to make good pork and make it cheaply, is to crowd the pigs from the time they are able to eat grain.

Every Horse Should Be Clipped in Season

It is the wise thing to do for the clipped horse not only is easier to clean and looks better, but clipping does much to make him immune from coughs, colds and the usual ills that come to a horse from standing in a coat of long, wet hair after any hard exertion. The perspiration evaporates quickly from the clipped animal and leaves him dry. On cold days a blanket when he stands keeps him comfortable.

The Best Clipping Machine the World has ever Seen is the Stewart Ball Bearing Enclosed Gear Machine

It is the easiest turning, fastest clipping and most enduring of all machines. The materials in it are all of better quality, the workmanship is superior. All file hard cut steel gears, protected from dust and dirt and running constantly in oil. It couldn't be better for twice the money.

THE FINAL FIGURES of the receipts and expenditures of the California State Fair and "Fiesta of the Dawn of Gold" have been submitted to the citizens committee of Sacramento. This committee guaranteed the fair any part of a fund of \$64,853.10 necessary to secure it against loss, and has been informed that 42 per cent of the amount, or \$27,250.90 will be required. The Sacramento Bee states that a majority of those who subscribed the guarantee will pay it willingly and if they could purchase the same results each year for the same amount they will cheerfully subscribe. This is pleasing news and shows that the immense crowds that were in Sacramento during fair week spent their money there among the merchants and made the week a very profitable one for Sacramentans. While the Fiesta Committee paid out immense sums for the attractions secured for the week, in the majority of instances they were worth the money. The Paine fireworks cost \$7812.50, and they doubtless drew more money than that at the gate. Charles Hamilton, the aviator, cost the association \$12,214.07, and it was this attraction that drew more money at the gate than anything else, in the writer's opinion. It seems a large sum to pay but flying machines are the greatest novelty at present, and the chances of losing one's life at the game are many. The Wild West Show was also a drawing card but the \$23,805.14 it cost was about twice what it was worth. \$1000 a day for such a show would have been ample. The riding, steer throwing, roping, etc., were well done and greatly pleased the people, but the Sioux Indians, and the races in which the cowboys participated, were very tame and not worth the money they cost. Ever since the California State Fair was organized, running and harness races have heretofore been the principal features of the amusement end of the fair, but for some reason the present board of directors does not place much faith in them as a drawing card. They have cut out the running races entirely (a great mistake) and the program of harness events has been so arranged that the best trotters and pacers with the exception of the three-year-olds, go to Oregon to race during the week the Sacramento Fair is held. It is the history of every big fair given east of the Rocky Mountains, as well as those in Oregon and Washington, that running, trotting and pacing races draw more money at the gate for the money they cost than any other sort of amusement, and at the same time these races do much to improve the breeds of horses. There is no reason why these races, properly managed and properly advertised should not attract as large crowds in proportion to the population here in California as they do elsewhere and in slighting them the State Fair management is neglecting one of the largest breeding industries of the State. While the crowds of people that visited the California State Fair this year were the largest in its history, the cost of the show was greater than the results justified. The directors and the Sacramento merchants both seemed pleased with the results however, and as the fair association cleared about \$6000 on the week, and the merchants say they

are willing to again subscribe \$27,000 to get the same crowds in town, there is no reason why anybody else should object to a renewal of the program. We do think, however, that the horse owners of the State deserve a little more consideration when future programs are arranged.

THE PACIFIC BREEDERS FUTURITY, inaugurated ten years ago has done more to keep up the interest in trotting horse breeding in California than anything every suggested. Since the first stake was decided every renewal has aroused enthusiasm among the admirers of fast young trotters and pacers, and the stakes have been the principal features of each year's circuit races. The training of colts and fillies for these events has developed many high class performers. Among the trotters that have made their maiden appearance in the Pacific Breeders' Futurity are such good ones as Carlockin 2:08½, Athasham 2:09¼, R. Amhush 2:09¼, Bellemont 2:09¼, North Star 2:11¼, Della Derby 2:11½, Nogi 2:10½, Prince Lot 2:10¼, Katalina 2:11¼, Cleo Dillon 2:13¼, Dr. Lecco 2:11½, Helen Stiles 2:09¼, Volante 2:13¼, Bon Guy 2:11¼, Strathhoul 2:13½, Donasham 2:13¼ and many others. The pacers entered that have won renown either in the stake or after attaining maturity are also numerous. Among them are such great ones as Mona Wilkes 2:03¼, Delilah 2:06½, Deviletta 2:10, Magladi 2:07, Aerolite 2:11¼, three-year-old trial 2:05½, Hymettus 2:07¼, Ray o' Light 2:08¼, Moortrix 2:07½, Conqueror 2:10½, Jim Logan 2:05½ (champion three-year-old), Jean Valjean 2:10, Ben Rush 2:10½, and many others. When we consider the value of these horses, and prices at which they could have been sold, it is evident that the Pacific Breeders' Futurities, besides giving the owners of the best colt trotters and pacers of each year an opportunity to earn a large amount of money with them, has added a very large amount to the trotting and pacing horse values of this coast. Since the Pacific Breeders' Futurity was inaugurated other futurities have been started by associations at Los Angeles, Sacramento and Salem, Oregon, which with the Occident and Stanford Stakes have made the earning capacity of a colt entered in all of them close on to \$10,000 as a three-year-old. On December 1st, 1910, Pacific Breeders' Futurity No. 11 will close for the nomination of mares bred this year. It is very evident that the number of mares mated with stallions on this coast, has been smaller this year than for any previous year for a long time, consequently the owner who nominates a mare in stake No. 11 will have a better chance to win than ever before. It only costs \$2 to nominate a mare in the stake. Let every owner who bred a mare in 1910 to a good trotting or pacing stallion nominate her in this stake. It will pay if you wish to sell, and it will pay if you wish to race the produce. October 1st is the date of closing. Don't let it escape your notice at the time.

STATE FAIR REPORT.

[Sac. Bee, Sept. 24]

The financial report of the outcome of the State Fair, shows that the Society will net upwards of \$6000, the largest amount ever cleared in a State Fair and sufficient for operating expenses for the ensuing year.

The receipts, aggregating \$46,055.30, which went to the Agricultural Society, were composed of: \$15,000 from the admission gate; one-half grandstands, \$6,888.37; one-half box seats, \$775; concessions, \$3391.93; State appropriation, \$20,000.

The expenses of the Society, including the taking over of the stables, erected under the supervision of George W. Peltier in three hours' time, and also the expense of the south grandstand, will amount to a few dollars over \$40,444 when all hills have been taken care of—leaving the balance of \$6000 a net profit.

It is probable that a portion of this sum will eventually be used to assist in a reduction of the deficit of the Fiesta of the Dawn of Gold Committee.

For its share the Committee will receive, as the figures now stand, \$37,473.04, and with the Agricultural Society taking over the grandstand expense the estimated expenses of the Committee, about \$56,000, will be reduced to such an extent that the draft upon the guarantee fund will not be as large as was, previously anticipated. The Fiesta Committee will meet next Monday night at Pioneer Hall, accept the statement of the Agricultural Society and plan for the Fair of 1911. It is probable that the Committee will go before the next Legislature in an effort to secure an appropriation for the Society which will enable it to adequately prepare the Fair Grounds for the large number of exhibitors and attendants promised for the next Fair.

The members of the Agricultural Society attending the meeting were: Messrs. Jastro, Kiesel, Ram-

sey, Martin, Chenu, Paine and Gier. Secretaries Filcher and Miller were also on hand.

That the 1911 Fair will far outclass the one just closed, especially in point of exhibits, is demonstrated by the fact that requests for space are already being received. The first of the counties to request reservation is Butte—one of the counties which failed to participate in the 1910 institution.

The date of the 1911 State Fair, set for September 2d to 9th—including both Labor and Admission Days—was arranged last night in order not to conflict with any of the Middle West Fairs. Complaint has been made to the members of the Society, in previous years, that the date of the California State Fair—when decided on later in the year—often conflicted with the dates chosen by the other States.

[Sac. Bee, Sept. 27.]

With the final figures in and accepted as satisfactory by the Committee of the Fiesta of the Dawn of Gold, at its meeting in Pioneer Hall last night, the Committee is anxious to know the opinion of the different mercantile interests which contributed to make up the sum of \$64,853.10 guaranteed. To this end a letter has been appended to the statement which will today be mailed to the contributors, asking that they tell explicitly their opinion of the project held in connection with the State Fair.

That the majority of return letters will be favorable is evidenced by the satisfactory comments made to representatives of the Bee, since the closing of the Fair, by the leading merchants of Sacramento, all of whom would willingly purchase the Fair results every week in the year, making the same guarantee and paying 100 per cent instead of 42 per cent which was adopted at last night's meeting.

Although no definite action was taken at the meeting of the Committee, which was but scantily attended, it will remain intact until after the meeting of the next session of the Legislature, at which time it will work with the Directors of the State Fair Society in an effort to secure a large appropriation for the improvement of the Fair grounds. It is the desire of both the Fiesta and State Fair people that accommodations be provided, before next year's Fair, for a crowd of at least 50,000; it being expected that in 1911 the attendance will be many times larger than during the Fair recently held.

Provided the legislative work proves successful and the desired appropriation is made it is more than probable that the Committee of Twenty-five will resolve itself into a permanent organization; working all the year round for successful State Fairs. This action is the earnest desire of the business interests of Sacramento and also of the State Fair Directors.

The correct figures of expenditure, receipt and shortage on the part of the Fiesta Committee are: Receipts, \$30,315.17; expenditures, \$57,478.19; donations, \$375; amount due from subscribers, \$27,250.90; making it necessary to draft upon the subscription fund of \$64,853.10 to the extent of 42 per cent.

Amongst the chief items of expense were:

Publicity Department, \$9033.21, consisting in part of salary for F. E. Bowie, editor, \$483.32; Miss Grace Norse, stenographer, salary, \$105; Greer's Concert Band, advertising, \$257; Donaldson Lithographing Company, \$996.10; Caswell Company, \$3455.54; A. L. Crane, trip to Los Angeles, \$101.86; News Publishing Company, \$1024.45; Crocker Company, \$583.45; advertising, newspapers, etc., \$1021.45; postage, \$100.

General Committee, \$2303.64, including: H. L. Shafer, looking up Sutter record, \$105; H. L. Shafer, auditor, salary, two months, \$400; grandstand construction, \$1178.96; administration and entertainment tent, \$317.25.

Other items of expense were: Room Committee, \$1395.04; Paine's fireworks, \$7812.50; Wild West Show and prizes, \$23,805.14; athletic meet, expenses and trophies, \$614.95; Charles K. Hamilton, and incidental, \$12,214.07; Professor L. L. Hill, \$102.74; Blondin, the Fearless, \$205.

BON McKINNEY SOLD FOR \$4000.

Ted Hayes says it pays to keep a tabulated pedigree of a good horse on hand if one wants to sell. A little over a year ago Ted bought a yearling colt by Bon Voyage for \$600, paying that amount for looks and breeding, the colt being unbroken. He said the breeding was so good and the looks so fine that the colt would do for a sire. He broke and trained him and this year gave him a standard record at the trot as a two-year-old just to put him in the list. Last Wednesday W. A. Clark Jr., owner of Bon Voyage, returned from a European trip and went to San Jose to look at his stallion that has made such a reputation as a sire of stake winners. Mr. Clark saw the colt, liked his looks, and asked Hayes if he was for sale. Hayes was willing provided he got \$4000 for the youngster. Mr. Clark asked if he had a tabulated pedigree. Hayes had one and Mr. Clark sat down and looked it over. It showed that the dam of the colt was Daphne McKinney by the great McKinney 2:11¼, second dam La Moscova, dam of Bon Guy (3) 2:11¼, Yolanda 2:14¼, etc., by Guy Wilkes, third dam Moscova, great brood mare, by Belmont 64, fourth dam Mosa, another great brood mare by Woodford Mambrino, fifth dam another great brood mare by Edwin Forrest, and so on. Mr. Clark did not need to study much over the tabulation, as it showed everything at a glance, and he wrote Ted Hayes a check for \$4000 and took the colt. He proposes to keep Bon Voyage a private stallion in 1911, and put Bon McKinney in his place. Bon McKinney was bred to six or seven very choice mares this year and all are in foal.

SAN FRANCISCO DRIVING CLUB.

Big Crowd Enjoys Seven Good Races at the Stadium Track on Sunday.

It was a long program that the San Francisco Driving Club pulled off at the three-quarter track in Golden Gate Park last Sunday, but the racing began at noon and was all finished before dark and there was a big crowd at the finish. On Sunday so many people visit the park that when the races are on the people are coming and going all the time, but this sport holds a crowd longer than any other amusement offered the Sunday visitors. The grand stand is not half large enough and more seating room is sadly needed.

Of the seven events during the afternoon four were won in straight heats, but in the other three there was an argument each time that was not settled in one, two order.

In the 2:30 trot Clottere's Monk won the first heat in 2:26, but Ayer's Dalla A. got the next two in slower time by being steady.

The 2:16 pace had a field of five fast horses, but the work horse W. J. K. owned by President W. J. Kenney, of the club, won the race handily after losing the first heat to Rey McGregor in 2:14. W. J. K.'s heats were in 2:14½ and 2:16½, being the fastest race he has yet paced. This rather tall, rawboned gelding is a race horse. He is by Dexter Prince out of Venus II 2:11¼ by Cupid 2:18, full brother to Sidney Dillon, and while all his immediate ancestors were trotters he is a pacer that goes without anything but a harness, a sulky and a driver. Mr. Kenney drives himself now-a-days and he is getting to be quite a Jehu. During the week W. J. K. pulls a spring wagon about town, delivering tires, sulkies, etc., from Kenney's manufacturing establishment at 531 Valencia street. He is one of the most level-headed horses ever seen on the track.

Little Dick, the son of Dictatus, that Luke Marisch sent around the California circuit this year in charge of Victor Verilhac, during which trip he won a neat sum and took a record of 2:09¾, won the free-for-all pace in straight heats pacing the second heat in 2:12 flat, the fastest time of the afternoon.

The last race of the day, the 2:20 trot, was a very interesting contest, Galindo's Harold K. and Ahler's Sunset Belle each getting a heat, but being beaten for the blue ribbon by Ottinger's gray gelding Mike Kelly, by Gossiper, who was either first or second in each of the four heats. The results of the day's races were as follows:

First race, 2:25 pace:
George Giannini's Geo. Gin (Buckley).....1 1
S. H. Burns' Dickens B. (Burns).....2 2
H. D. Chase's Don C. (Schwartz).....4 3
T. D. Sexton's Alfred E. (Sexton).....3 4
Time—2:20½, 2:23.

Second race, 2:30 trot:
E. T. Ayres' Delta A. (Ayres).....2 1 1
Fred Clottere's Monk (Clottere).....1 2 3
M. M. Bates' Lassie M. (Bates).....4 3 2
G. Tassi's Steve D. (Tassi).....3 4 4
W. P. Hammer's Clara W. (Hammer).....5 5 5
Time—2:26½, 2:29, 2:29.

Third race, free-for-all:
Luke Marisch's Little Dick (Verilhac).....1 1
John Kramer's Celia K. (Burton, Schwartz).....4 2
P. Kohn's Alfred D. (McGrath).....2 4
D. E. Hoffman's Dictatum (Frelson).....3 3
Time—2:16, 2:12.

Fourth race, free-for-all trot; unattached horses:
Pasey's Davey's Laddy G. (Davey).....1 1
Ted Hayes' Siesta (Hayes).....2 2
J. W. Smedley's Red Velvet (Smedley).....3 3
Time—2:20½, 2:20½.

Fifth race, 2:16 pace:
W. J. Kenney's W. J. K. (Kenney).....4 1 1
C. James' Rey McGregor (James).....1 2 2
Jas. O'Kane's King V. (O'Kane).....2 3 3
Shorty Roberts' Charley J. (Roberts).....3 5 5
T. H. Corcoran's Caliente Girl (Benson).....5 4 4
J. V. Galindo's Patery (Burton).....fell

Sixth race, 2:20 trot:
Time—2:14, 2:14½, 2:16½.
A. Ottinger's Mike Kelly (Ottinger).....2 2 1 1
H. C. Ahler's Sunset Belle (Ahlers).....1 3 2 2
J. V. Galindo's Harold K. (Galindo).....4 1 2 3
E. Buckley's Walter G. (Buckley).....3 4 4 w
Time—2:24½, 2:19, 2:20, 2:20.

BON VIVANT TROTS IN 2:10¼.

At Columbus, Ohio, on Thursday of last week, the three-year-old colt Bon Vivant by Bon Voyage, was sent to lower his record of 2:16¼ trotting, made as a two-year-old last season, and trotted the mile in 2:10¼. Bon Vivant is out of Reina del Diahlo, dam of Chiquita 2:09½, second dam Miss Sidney by Sidney, and was sold a year ago last winter by Ted Hayes to Dick McMahon who purchased the colt for Mr. McDoel of Chicago.

This makes the third Bon Voyage three-year-old that has taken a record below 2:12 this year. The three are the trotters Bon Vivant 2:10¼ and Bon Guy 2:11½ and the pacer Jean Valjean 2:10. We believe this is a world's record for an eight-year-old sire.

This has been a great year for the Electioneer family. The Harvester 2:01¼, champion trotting stallion of the world and Uhlan 1:58¾, world's champion trotting gelding, are both lineal descendants of Electioneer in the male line. As there were very few outside mares ever bred to Electioneer, the showing he has made as a speed progenitor is pretty good evidence that Senator Stanford chose wisely in selecting mares to mate with the son of Hambletonian and Green Mountain Maid.

NEWS FROM LOS ANGELES.

Walter Maben and his string (excepting Rapidan Dillon which was sold at Salem) have returned to Los Angeles. Walter will ship a number to Santa Ana this week among which will be several eligible to the races at Phoenix, November 7th to 12th.

Donasham 2:13¼, Mr. Canfield's Occident Stake winner is to be retired for a while. This fellow should be a useful trotter in his class next year. In my opinion he is a 2:10 trotter now and as he is perfectly mannered and gaited, it is only reasonable to expect him to improve with age and a very little improvement will make him a great trotter.

I understand that the Del Coronado mare Rubell that showed so well for Maben this spring is to go into training again soon. The Southern California contingent are unanimous in their good opinion of her.

Mr. William Morgan's string of about eight, in charge of Frank Williams, moved to Santa Ana this week; they also will be prepared for the trip to Phoenix. Mr. Williams is enthusiastic over the conditions at Santa Ana.

Mr. J. S. Stewart is busy with about fifteen head, the star of which is the fast Zomhro pacing mare Lady Mc. This mare has shown her ability to heat 2:10 considerably, goes without hobbles, is sound and working perfectly and should be hard to heat in another season.

In Durfee's stable are about twenty-five, part at Los Angeles and the others at Santa Ana. Copa de Oro seems better than ever. He recently worked a mile in 2:04¼, the last half in 58½ seconds. He is a hundred pounds heavier than at this time last year, is perfectly sound and has more speed than ever. Durfee believes him to be the fastest harness horse living (although Minor Heir's 1:58½ makes him respect him a lot). Unfortunately Copa de Oro has only one chance to get a new record this year and that will be at Phoenix. Should he be a little off, or the conditions for fast time unfavorable during the week of the Arizona Territorial Fair, his chances for doing anything sensational would be wiped out so far as this season is concerned. A half at present in 57 seconds or better is certainly within his ability, and as his gameness has never been questioned one is justified in expecting him to perform well enough to entitle him to rating with the very best.

Carlokin also has shown excellent form to date, having been two miles in 2:09½ which seemed to be simply a jog for him. He worked a half a few days ago quite handy in 1:01½ and faced a stiff breeze. He is entered in the 2:09 and free-for-all trots at Phoenix, and I believe that whoever heats him there will win. Unless Carlokin trots in 2:05 I shall be greatly disappointed, and harring had luck 2:05 won't stop him.

Zom Woolsey and Leonor McKinney, both green pacers, worked a mile in 2:07¼ seconds recently. Aviator, a three-year-old pacer belonging to Clarence Berry, worked in 2:12¼ very easily. This fellow has a world of speed, is good mannered and acts like a really good one. He is booked to go a good mile in a few days, after which he will be retired for the season. I look for a mile around 2:08, maybe better. Mr. Berry has a genuine fondness for a good horse and has several exceptionally promising ones. He started in the game on the right lines, having procured some really high class mares, and crossed them with the best stallions he could find.

Tom Moko, the young Moko stallion owned by Loftus and Durfee, recently worked a mile in 2:17¼. This fellow is only four years old; his dam is by Nutwood and in the great broodmare list. He is of excellent type and should be a very useful horse in the west.

Crescendo B., the four-year-old trotter, full brother to Copa de Oro, worked in 2:15¼ recently, a half in 1:04. The rail birds all like him very much, and I have noticed that the railbirds are mighty often correct in their estimation of a horse. At any rate Crescendo B. has a license to be good; his breeding is par excellence, he is good headed, has extreme speed, is a good doer and a good looker. The youngsters here are all coming along nicely though none are being worked real hard.

Mr. F. D. Myers has returned from the East and reports that the trotters were going "great guns" over there this year. He also reports that the market for good ones is excellent. His sale of Margin 2:05½ to Mr. Giuseppe Lamma of Florence, Italy, for about \$8000 shows that a really good one has a good value even if outclassed. Margin has been unable to win this year, and as Mr. Myers could get no glory in winning second money he had simply withdrawn her from her late engagements rather than send her against such trotters as The Harvester. Margin has shown better than her record and was much sought after by the foreign buyers.

It looks as though the new track work here would begin in a few days; bids will be passed upon this week and the contract let. Plans for the new stables have also been decided on, and work on them should begin soon.

Yours truly,

ANGELENO.

Los Angeles, Sept. 24, 1910.

Trainer Stinson, who for years had charge of the racing stable of Miss Katherine Wilks, was engaged last week by General Watts to train his yearlings. He has engaged stable room at the Lexington track and has moved the youngsters into their new quarters. They are mostly by General Watts and are a likely looking lot.

BRIGHT OUTLOOK AT PLEASANTON.

Present indications, says the Pleasanton Times, point to a large quota of race horses to be trained on the Pleasanton track during the coming winter. J. Harris Cox, clerk at the park, has roughly estimated from information received to date, that the number this year would be twice that of last. Joe Twohig is to be here with his string, having already engaged stalls. Charles James of San Francisco, who trained last year on the Stadium circle, will be here with eight to ten head of youngsters. Dick Wilson of Portland, who generally has from ten to twelve head in his string, has sent down word from the north to prepare a place for his fourfooters, and S. S. Bailey of Albany, Oregon, has signified his intention of training in California this year, although he has not stated he will come to Pleasanton. At the present time negotiations are on with him to locate here. Charles DeRyder, who is on the Great Western Circuit in the east at this time, has purchased a large quantity of hay and is making plans to train one of the longest strings he has ever had.

A letter from Mr. Armstrong, owner of the Park, who is now east, says it may be stated he will bring back with him three or four eastern men with their strings, having induced them to come to California since going east.

Stalls at the track are being whitewashed and a general cleaning up of the grounds is going on, preparatory to the winter's work. Unquestionably the success of so many Pleasanton trained horses on the coast this year has done a great deal toward inducing new trainers to select this place for their next season's location. The Pleasanton Training Park is the most feasible in all California for horse training purposes now that it has connections with two railroads, will soon have trains running directly into town from the city of San Francisco and thereby provides plenty of opportunity for owners to travel back and forth at times when it suits their convenience. The worn argument used by many of the "knockers" can no longer be resorted to. Pleasanton has as good a rail connection today as any point on the hay district, all points considered.

ANCESTRY OF HELEN STILES.

In 1892 there appeared at the State Fair races at Sacramento in the two-year-old trotting stake, a brown colt by California Lambert out of Torser, by Hawthorne. The colt was owned by L. U. Shippee and won second money in the race which was won by Palo Alto Stock Farm's filly Rowena by Azmoor in 2:32½ and 2:19½. Wiseburn farm's filly Adelaide McGregor being third in each heat. In this race Rowena broke the world's race record for two-year-old trotters, although Arion's record of 2:10¼ against time was made the year previous. Aaron S. was second in both heats of this race. The next week at Stockton Aaron S. and Mojave started for a purse of \$300 and the former won in straight heats, the fastest of which was 2:33¾. In October of that year Aaron S. was started to beat 2:33 at the Stockton track and won in 2:29, but in company with all the other records made at that ill-fated meeting, the record was rejected by the American Trotting Register Association.

The above history of the brief racing record of Aaron S. is interesting by reason of the fact that his dam Torser by Hawthorne is the granddam of the mare Helen Stiles 2:09¼ that has won more money than any horse raced on the Pacific Coast this year and has won every race in which she has started this season.

Torser is given in the catalogue of the late L. U. Shippee as a chestnut mare, foaled in 1886 by Hawthorne 10935, dam Trused by Trused, said to be by imported Trustee Jr. No further breeding is given in the catalogue. Torser was afterward bred to Silver Bow 2:16 and produced the mare Silver Haw, now owned by Mr. S. S. Stiles, of Oakland, who bred her to Sidney Dillon, the produce being Helen Stiles 2:09¼.

RESULTS AT WALLA WALLA.

Sept. 19.—2:18 trot, \$500—Densmore won, Professor Heald second, Lida Carter third. Best time, 2:13¼.

Sept. 20.—2:25 pace, \$500—Don Densmore won, George Woodard second, Buck third. Best time, 2:12¼.

Sept. 21.—2:25 trot, \$500—Kingbrook won, Don McKinney second, Dr. Lecco third. Best time, 2:14¼. Free-for-all pace, \$1000—Josephine won, Sherlock Holmes second, Lord Lovelace third, Texas Rooker fourth. Best time, 2:09¼.

Sept. 22.—2:14 trot, \$1500—Helen Stiles won, Alfreda second, Prince Lot third. Best time, 2:10. 2:20 pace, \$700—Miss Jerusha won, Buck second, Geo. Woodard third. Best time, 2:11¼.

Three-year-old trot, \$200—Al McK. won, Lady Lou and Princess Del Norte divided second and third money. Best time, 2:45.

Sept. 23.—2:10 trot, \$1000—Daybreak won, Zomhronut second, Golden Nut third. Best time, 2:10¼. 2:15 pace, \$500—Lou Miller won, Dan Patch Jr. second, Francona third. Best time, 2:10.

Sept. 24.—2:10 pace, \$1000—Allerday won, Happy Dentist second, Conqueror third. Best time, 2:09¼. 2:30 trot, \$500—Kingbrook won, Nada second, Honey Boy third. Best time, 2:16¼.

2:16 pace, \$500—Lizzie Dillon won, Garvin Wilkes second, Knight Spook third. Best time, 2:15½.

GRAND CIRCUIT RACES AT COLUMBUS.

Columbus, Ohio, Sept. 19.—Buffalo owned pacers gathered in the two stakes which made up the major portion of the program for the opening day of the last Grand Circuit meeting of the year. Both were odds-on favorite. Ess H. Kay took the Board of Trade event away from Merry Widow, but lost the third heat to her, breaking after the turn for home had been made.

The Abbe landed his tenth straight race when he won the Hotel Hartman \$5000 stake from Evelyn W., the Cleveland mare that beat him in one heat this year. At times the Geers entry was hard pressed by his rival, being lapped for the greater part of the last hundred yards in the second mile. The final quarter of the third mile was timed officially in :28 and the last half in 1:01½.

General H. easily won the 2:10 trot, Ora Bellini and Direct Tone being unable to get to him when they tried in the stretch.

Independence Boy, Illinois-bred but owned in Columbus, was about an equal choice with Dickie C for the 2:11 pace. He moved away from his opponents when the lead was desired and finished first each time with plenty to spare. Summaries:

Board of Trade Stake; 2:06 pace; three heats; purse \$3000:

Ess H. Kay, blk. h. by Direct Hal (White).....	1	1	4
Merry Widow, h. m. (McMahon).....	2	3	1
R. F. D., blk. g. (Robinson).....	4	2	2
Baron Whips, ch. g. (Murphy).....	3	4	3
Maconda, b. m. (Alhni).....	ds		

Time—2:05, 2:05½, 2:04½.

Hotel Hartman Stake; 2:14 pace; three heats; purse \$5000:

The Abbe, blk. h. by Chimes (Geers).....	1	1	1
Evelyn W., b. m. (Shank).....	2	2	2
Braughman, b. h. (Walker).....	4	3	3
Rena Patch, b. m. (Hersey).....	6	4	5
Colonel Forest, b. h. (McMahon).....	5	7	4
Sister Florentine, h. m. (Ross).....	7	5	6
May Day, b. m. (Murphy).....	3	6	dr

Time—2:04½, 2:04½, 2:08½.

2:10 class; trotting; three in five; \$1200:

General H., b. h. by Combineer (Haag).....	1	1	1
Ora Bellini, br. g. (Dickerson).....	2	2	2
Direct Tone, h. g. (Ryan).....	3	3	3

Time—2:12½, 2:09½, 2:08½.

2:11 class, pacing; three in five; \$1200:

Independence Boy, ch. g. by Thistle (Valentine).....	1	1	1
Dickie C., ch. g. (Crocker).....	3	2	2
Lucius Todd, b. h. (Earing).....	6	3	3
Dajo, blk. h. (Creamer).....	2	6	6
Manuella, h. m. (Corbin).....	4	4	5
Lowanda, blk. h. (H. Jamison).....	5	5	4
Nellie Temple, h. m. (Proctor).....	8	7	8
Mark Knight, blk. h. (Hall).....	9	7	8
Kid Logan, hr. s. (Ruhle).....	7	9	dr

Sept. 20.—Joan, 4 years old, owned by David Shaw of Cleveland and driven by M. McDevitt, today became a world's champion race trotter for fillies of her age, when she defeated Dudie Archdale in a gruelling race for the Hoster Columbus stakes, the last \$10,000 prize that the Grand Circuit has to offer this year. Both heats were done in 2:06½, time never before made by a trotter of Joan's class.

Dudie Archdale, from whom stiff opposition came, won the last heat in 2:06½. The Geers mare was the original favorite at \$100 to \$75 for the entire field, a small one. She tried trailing Joan in the first heat, but was stalled off at the finish, the final quarter being trotted in :29½, with both drivers whipping some.

In the second heat Dudie Archdale was sent away in front and led for the greater part of the mile. Joan had speed enough in reserve to come by when necessary and the two were not as closely lapped as in the second. It told on Joan and she wasn't able to brush it out successfully. Joan won \$4167 and Dudie Archdale \$3333.

Hailworthy's breaks in the first two heats of the Columbus stake, worth \$3000, ruined his chances of becoming a winning favorite. The race went to Startle, a Toledo horse, which Hailworthy beat in the final mile by steady trotting.

Independence Boy, winner of the 2:11 pace Monday, entered the 2:09 pace today as a strong favorite and the result was never in doubt, as he did 2:06½ three times with apparent ease.

Columbus Stake; 2:11 trot; three heats; \$3000:

Startle, hr. g. by William Wilkes (Gahagan).....	1	1	2
Hailworthy, b. g. by Axworthy (Nottingham).....	5	6	1
Justo, b. s. (McDonald).....	2	2	3
Alice Roosevelt, ch. m. (Murphy).....	4	3	4
Fair Margaret, b. m. (J. Benyon).....	3	5	6
Tearoline, ch. m. (Barnes).....	6	4	5

Time—2:07½, 2:07½, 2:08½.

Hoster Columbus Stake; 2:16 trot; three heats; \$10,000.

Dudie Archdale, blk. m., by Archdale (Geers).....	2	2	1
Joan, blk. f. by Directum Spier (McDevitt).....	1	1	2
Captain George, b. h. (Murphy).....	4	3	3
Watago, b. m. (Rathbun).....	3	4	4
Remorseful, blk. g. (Walker).....	ds		

Time—2:06½, 2:06½, 2:06½.

2:09 class pace; three in five; \$1200:

Independence Boy, ch. g. by Thistle (Valentine).....	1	1	1
Harry Mc., b. g. (Patterson).....	2	5	2
Princess Hal, b. m. (Hedrick).....	6	2	3
Dillon Queen, b. m. (Kelty).....	5	3	4
Ora Jackson, b. g. (Woods).....	4	4	5
Beauty Wilkes, b. m. (Gahagan).....	3	ds	
Hazel B., ch. (Benadum).....	ds		

Time—2:06½, 2:06½, 2:06½.

Sept. 21.—Racing off the trotting division of the Kentucky Stock Farm Futurity at this afternoon's Grand Circuit races brought forth a world's record

mile by Colorado E., owned by George H. Estabrook of Denver. This colt, holder of the world's record for three-year-old trotters, voluntarily reduced his mark from 2:06½ to 2:05½.

No declaration of Driver Gus Macey's intention was made public. The first heat of the race, on which there was no betting because of the added superiority of Colorado E., was easy for him in 2:03½. Finding conditions suitable the colt's driver treated an expectant crowd to a championship mile the second time out.

Like the first quarter of the initial mile, the quarter of the record heat was trotted in :30½. Four lengths ahead of Emily Ellen, Colorado E. made the half in 1:02½ and the three-quarters in 1:33½. That rate of speed made a new record probable. Macey didn't hurry his champion home from the last turn, but a last quarter in :32 completed the 2:05½ mile.

In the pacing division of the same Futurity backers of first choices were dismayed when Nell Gentry, owned and driven by Charles Cameron of La Cross, Ill., won in straight heats and ordinary time from Baroness Evelyn.

In the 2:17 trot Peter Dorsey was beaten by Major Wellington, the third choice. The favorite won the first heat. Summaries:

2:17 class; trotting; three in five; \$1200:

Major Wellington, b. g. by Nico II (McDonald).....	6	1	1	1
Peter Dorsey, b. g. by Moving Star (McDevitt).....	1	2	2	2
Lady Willow, br. m. (Geers).....	2	9	8	3
Art Lissa, h. m. (Hunnell).....	5	3	3	4
Border Guard, b. s. (Walker).....	3	6	4	ro
Graymore, h. h. (French).....	4	4	5	ro
Admiral Red, b. h. (Flick).....	8	5	6	ro
Silver Eagle, ch. g. (Chaydon).....	7	7	9	ro
Katherine R., b. m. (Davis).....	9	8	7	ro
Abbia, br. m. (Proctor).....	10	10	10	ro
Ed. L. Teed, br. s. (McLean).....	11	11	11	ro

Time—2:09½, 2:08½, 2:08½.

Stock Farm Futurity; three-year-old trotter; two in three; \$5000:

Colorado E., b. c. by The Bondsman (Macey).....	1	1	1
Emily Ellen, blk. f. (McDonald).....	2	2	2
Grace, ch. f. (McDevitt).....	3	3	3
Lady Green Goods, b. f. (Grady).....	4	4	4

Time—2:08½, 2:05½.

Stock Farm Futurity; three-year-old pacers; two in three; \$2500:

Nell Gentry, b. f. by John R. Gentry (Cameron).....	1	1	1
Baroness Evelyn, ro. f. (McDonald).....	2	2	2
Joe H., b. c. (McAllister).....	3	3	3

Time—2:10½, 2:09½.

Sept. 22.—To the track that for nine years held the stallion trotting championship because of the 2:02½ mile by Cresceus there came back the title today when The Harvester went a brilliant mile in 2:01 flat and thereby took a quarter of a second off the time he made last week at Syracuse.

Although weather conditions were suitable, Driver Geers, a moment after he had dismounted and acknowledged an ovation from the crowd, declared his intention to make an attack next Thursday upon the record if the track can be made solid close to the rail.

Because of the loose footing today The Harvester had to step a long mile. He was a trifle weary at the finish and did not flash through the last quarter as he has done at other points on the Grand Circuit.

Shortly before 5 o'clock the champion was sent away rushing and went the first quarter in :29½. Over on the back stretch the runner became a trainer. The second quarter was stepped in 0:30. In the third there was but a slight slackening, and the time for it was :30½. A final quarter in :31½ made the mile a winning one, as The Harvester had started to beat 2:01½.

Bervaldo, Major Brino and Manuella won the regular events of the card. Bervaldo was favorite over all the other 2:12 trotters, but dropped the first heat to George Todd.

May Day, the first choice in the 2:05 pace, was distanced by Major Brino in the second heat, when she made a standstill break going away.

Maconda was expected to win the special pace, but was second three times to Manuella. While scoring for the second heat of the 2:12 trot Prince G. reared and threw Driver "Pop" Geers from the sulky. A horse back of him cleared the veteran driven and he got up uninjured. Prince C. ran a few hundred feet and was caught by a groom.

Before the regular program at the Grand Circuit racing meet here today Bon Vivant, a three-year-old stallion, was driven in 2:10½ to beat his own record of 2:16½. Summaries:

2:12 class, trotting; three in five; \$1200:				
Bervaldo, h. g. by The Tramp (Murphy).....	2	1	1	1
George Todd, h. s. by Todd (Moody).....	1	6	6	4
Bronson, br. g. (Titer).....	5	2	3	2
Velozora, br. m. (Walker).....	6	3	2	3
Tearolaine, ch. m. (Barnes).....	3	4	5	ro
Prince C., br. s. (Geers).....	3	4	4	ro
Miss Baritone, br. m. (McDevitt).....	7	ds		

Time—2:10½, 2:09½, 2:08½, 2:12½.

2:05 class, pacing; three heats; \$1200:

Major Brino, blk. g. by Wildbrino (Hodson).....	2	2	2
May Day, b. m. (Geers).....	3	ds	

Time—2:05½, 2:06½, 2:07½.

Special class, pacing; three in five; \$600:

Manuella, b. m. by Austral (Squires).....	1	1	1
Maconda, b. m. (Alhni).....	2	2	2
J. W. E., b. h. (Corbin).....	4	3	3
Kid Logan, br. s. (Buble).....	3	4	4

Time—2:07½, 2:10½, 2:09½.

To heat 2:01½, his own and world's record, for trotting stallions:

The Harvester, br. h. by Walnut Hall (Geers). Won Time by quarters—:29½, :59½, 1:29½, 2:01.

To heat 2:16½ trotting:
Bon Vivant, b. c. (3) by Bon Voyage, dam Reina del Diahlo by Diablo 1
Time—2:10½.

Sept. 23.—Faster than any race in this week of Grand Circuit racing was today's 2:07 pace, which Independence Boy, winner Monday and again Tuesday, took in straight heats. He did 2:04½ the first time and repeated this time in the second heat, the third one being in 2:04½.

Ruth D. beat W. A., the original favorite, out of the place. Neither made Independence Boy, owned by Shepard & Hayes of Columbus, extended himself at any stage of the race.

Scienta, from Hartford, Conn., was favorite for the 2:15 trot, and did not have any particular opposition. Fred F., first choice over Dirl and the other 2:13 pacers, went in 2:06½ in the first heat to lead Miss Peeler home. He broke inside the distance post the second time out and Dirl was first.

Fred F. took the third heat in slow time and the race was forced to go over until Saturday afternoon. Summaries:

2:07 class pacing; three heats; \$1200:

Independence Boy, ch. g. by Thistle (Valentine).....	1	1	1
Ruth D., b. m. (Lane).....	2	2	2
W. A., br. g. (Floyd).....	3	3	3
Charles Simmons, ch. h. (Wray).....	5	4	4
Annabelle Lee, br. m. (McCoey).....	4	5	5
Ora Jackson, br. m. (McLean).....	6	ds	

Time—2:04½, 2:04½, 2:04½.

2:15 class trotting; three in five; \$1200:

Scienta, blk. s. by Admiral Dewey (Hyde).....	1	1	1
Nanco, gr. g. (Ernest).....	2	2	5
Fuzz Johnson, b. s. (Geers).....	3	3	2
Henry Johnson, b. s. (McDonald).....	5	4	3
Jack London, ch. g. (McLean).....	4	5	4
Victor Star, b. g. (Valentine).....	6	6	dr

Time—2:12½, 2:12½, 2:11½.

2:13 class pacing; three in five; \$1200 (unfinished):

Fred F., b. g. by Allen F. (Hoyt).....	1	3	1
Dirl, b. h. by Direct (Thomas).....	8	1	2
On Time, h. g. (Valentine).....	7	2	3
Miss Peeler, b. m. (Hummel).....	2	7	4
Gus B., b. g. (Engard).....	3	5	7
Lowanda, blk. s. (Jamison).....	4	4	8
Ameriko, b. g. (Cooper).....	5	6	5
Paymaster, b. g. (Whyrlie).....	6	8	6

Time—2:06½, 2:08½, 2:09½.

MINOR HEIR'S GREAT SHOWING.

Minor Heir showed what a remarkable horse he was during the Indiana State Fair, says Western Horseman, by establishing two world's records, one a race record of 1:59, and the other an exhibition mile in 1:58½, while on Wednesday, between these two championship performances, he paced a mile in 2:00½ in a race, the latter being a quarter of a second faster than the previous record for pacers, held so long by Star Pointer.

Minor Heir commenced his record-breaking career for the season on August 25, at the Galesburg, Ill., meeting, when in a race with Hedgewood Boy he stepped a mile in 2:00. From there he was shipped to Des Moines, where he took part in several exhibitions, was then shipped to Kalamazoo, where rain prevented his exhibition, and then he went to Bethlehem, Pa., where he went a great mile over the half-mile track, being defeated by Lady Maud C. After such a strenuous campaign his three performances at Indianapolis were marvelous.

The story of his record-breaking performance this season is as follows:

Galesburg, Ill., Aug. 25.....	:31	1:00½	1:29½	2:00
Indianapolis, Ind., Sept. 12.....	:29½	:59	1:29½	1:59
Indianapolis, Ind., Sept. 14.....	:30½	1:01	1:31½	2:00½
Indianapolis, Ind., Sept. 16.....	:29½	:59½	1:28½	1:58½

It will be a surprise to the general public to learn that John A. Shults, of New York, is going to retire as a breeder and will dispose of all his trotting stock with the exception of five or six youngsters at the coming Old Glory Sale, at New York City, November 21 to 26. Mr Shults has undoubtedly spent more money than any other man in the purchase of stallions and brood mares. Among the stallions he will sell are Toddington, by Moko, and out of Fanella 2:13, the great brood mare; Prince McKinney, son of McKinney and Extasy, and Morgan Axworthy, son of Axworthy and Kinglyne, sister of Bingen. Among the superb brood mares to be sold are Ecstatic 2:01½, Owaissa 2:06½, Zaza 2:07½, Deloree 2:09½, The Queen 2:10 and Nelda Worthy 2:12½. The colts to be sold are by such sires as Olcott Axworthy 2:14, Prince McKinney, Toddington, etc.

Mr. Joseph Guest of Chestertown, Md., owns a horse which is one of the oldest, if not the very oldest, creature of his species in America. The animal celebrated the 41st anniversary of his birth on May 6 by cavorting joyously around in a beautiful pasture and performing a few unstudied stunts in high kicking that a yearling colt might have envied. On the day that Samuel J. Tilden was nominated for President, in 1876, this horse, a big, sleek sorrel, then called Stonewall, was driven to a town 25 miles away, where his owner, a great admirer of the Democratic nominee, changed Stonewall's name to Samuel J. Tilden in honor of his party candidate, and under that name he is still living in ease and comfort.

NOTES AND NEWS

The Portland track is to be re-soiled before the next annual meeting.

The Spokane Inter-State Fair opens on Monday next. The horses will race over a half mile track.

The Harvester has trotted a mile in from 2:03 to 2:01 on five different tracks this year.

Sonoma Girl is as fast as ever. She was separately timed in 2:03 1/4 in a heat she was beaten at Syracuse.

The Fresno Fair opens next week. Many attractions have been secured and a big attendance is expected.

Ella Erickson by Diablo, now has a race record of 2:14 1/4. She is in Joe Maguire's string racing in the Northwest.

Demonio Wilkes is keeping up his record for getting distanced. At Detroit, September 20th, he got the flag in the first heat of the 2:08 pace.

A four-in-hand team owned by Paul A. Sorg and driven by William Grant trotted a mile in a race over the two-lap track at White Plains, N. Y., in 3:14 1/2.

Derby Lass, the young mare that won a race at Newman last week and took a record of 2:22 1/2 is by Arner 2:17 1/4, full brother to Diablo 2:09 1/4 and Demonio 2:11 1/4. Her dam is by Chas. Derby, the sire of Arner.

Baron Whips 2:05 1/4 is racing well again this year. His dam Metella A. was by the half thoroughbred horse Whips, and was out of Matron by Clay, next dam Mollie Cobb, the dam of Cobwebs 2:12. Baron Whips is by Baron Dillon.

The California State Agricultural Society has claimed September 2d to 9th as the dates for its next fair. The Portland Fair and Live Stock Exposition has claimed September 4th to 9th for its fair and race meeting. Another conflict in dates.

When a pacer steps the last quarter of a mile in a race in 28 1/4 seconds it is a question whether or not the harness horses are not destined to approach the speed limit of the runners by a much smaller margin than most people have imagined possible.

Princehs of Monao, the daughter of imported Meddler and Nancy Hanks has added another to her list of standard performers—Nancy Bingen 2:23 1/4. She now has two standard trotters to her credit but she can never be registered as her sire is a thoroughbred.

Pacific Breeders' Futurity No. 11, for foals of mares covered this year, will close for nomination of mares on Thursday, December 1st. Get ready to nominate your mares in this popular stake. It only costs \$2 for each nomination and may lead to the winning of \$2500 with one colt.

It was always said here in California that the McKinneys were not fast colt trotters, coming to their speed rather slowly, although Zombro took a record of 2:13 1/4 as a three-year-old. There is a yearling by McKinney over east, however, that has taken a trotting record of 2:27 1/4 this summer.

If Bon Guy 2:11 1/4 winters well and is in good shape after his stud season next spring Mr. Detels, his owner, may enter him in the \$10,000 stake for 2:12 trotters at Portland. So many good four-year-olds have shown up this year that the old prejudice against racing horses at that age is rapidly disappearing.

Mrs. L. Schreiber, of Tulare, has lost a fine mare by Secretary that disappeared from a pasture field there lately. The mare was at the Whalen Farm, Santa Rita, Alameda county, for some time and it is possible she has been trying to find her way back there. The mare is a bay with star in forehead and one white hind foot, and weighs about 1100 pounds. She is a fast trotter.

Bystander 2:07 1/4 by Zolock is being raced on the half-mile tracks this year. At Madison, Wisconsin, September 22d he was second to Knight of Strathmore, winner of the free-for-all pace. The fastest heat of the race in 2:08. Knight of Strathmore holds the world's record for a four-year-old pacer over a half-mile track.

The American horseman, Frank Caton, recently held the most successful auction of trotting-bred colts and fillies ever known in Russia. It consisted of 23 head of two-year-olds and five other horses, 28 in all, which fetched an average price of 1385 roubles (\$692.50) per head. Of the two-year-olds, 15 were half-bred (American-Orloff) and eight pure-bred Orloffs. The half-bred ones averaged 1827 roubles (\$913.50) per head, while the pure-bred Orloffs averaged only about half as much—951 roubles (\$475.50). The top price of the sale was 4250 roubles (\$2125) for one of the half-bred two-year-olds.

Senator Stanford did not like pacers and would have none at Palo Alto Farm. Every pacer that showed up was "suppressed" at the home of Electioneer, when the Senator was alive, yet The Abbe 2:04, a grandson of Electioneer, is the biggest money winning pacer of 1910.

Fred H. Chase & Co. announce a combination sale of trotting bred horses for October 31st. Some high class ones have already been consigned. This will offer a chance to sell a good horse at a fair figure.

At a matinee to be held at Stockton this afternoon, the pacer Guy Vernon, by Guy McKinney is to be driven an exhibition mile. He has a matinee record of 2:09 1/2 and it is thought that he can turn the track in less time if everything is favorable.

W. J. Kenney, at 531 Valencia street, has several second hand bike buggies for sale. They have all been put in first class order and some are as good as new. They will be priced low for a quick sale.

The publicity department of the Citizens' Committee that helped draw a big crowd to the State Fair this year spent over \$9000, and it was the work of this department that drew the big crowds to the fair.

The way the get of Bingen and his sons are dropping into the list all along the line makes it certain that the standard members of the tribe will be greatly increased by the end of the season. For a horse no older than the son of May King his family have become very widely dispersed. They are dropping into the list about everywhere there is racing.

Mr. W. E. D. Stokes, owner of Peter the Great 2:07 1/4 has offered a prize of \$200 to every driver that gives a trotter by Peter the Great a record of 2:10 or better at the Lexington meeting which begins next week. He also offers \$1000 to the driver who gives a record of 2:08 or better to any trotter not now in the 2:10 list that is by Peter the Great, provided five different trotters compete for the prize.

Secretary H. K. Devereaux of the American Association of Trotting Horse Breeders writes us as follows: "Owing to an unavoidable error the Championship Stallion Stake to be raced at Lexington in October has been advertised as a race of three heats. Of course, all who have entries understand that the conditions for the trotting and pacing divisions call for a race best two in three."

Margin 2:05 1/4, the largest money winning trotter of last year that was wintered at Los Angeles in charge of W. G. Durfee, has been sold to Signor Guiseppe Lamma, of Florence, Italy, and has been shipped to that destination. If she makes the trip safely she will probably be started at Florence October 14th. She is the fastest trotting mare ever exported and is seven years old.

The great California sire, Zombro, has the following new performers to his credit this year: The Angelus 2:10 1/4, Elloretta 2:11 1/2, Floradora 2:13, Geraldine 2:19 1/4, Pegasus (3) 2:19 1/4, Zomoak 2:22 1/4, Zomblack (2) 2:26 and Zoranken (2) 2:29 1/4. Previous performers which have reduced their record are Zombrewer 2:14 1/4, to 2:10 1/4, and Miss Jerusha 2:22 to 2:12 1/2. There will probably be other additions before the close of the season.

It is not often that a yearling and a two-year-old of the same mare are given a mark of less than "two thirty" in one afternoon but that is what Clem Beachey succeeded in doing with two from his stable last week. He drove the yearling filly Princess Todd by Kentucky Todd—Grace Bingen, a mile in 2:29 1/4 and the two-year-old filly Grace Todd by Todd—Grace Bingen, a mile in 2:26 1/4. Both are owned by Miss Katherine Wilks, of Galt, Ontario, for whom Mr. Beachey trains.

O. G. Will, city editor of the Willows Journal writes us as follows: "Stock is especially high in Glenn county at the present time, but mules are at the top of the market. W. G. Harris has made several remarkable sales in this vicinity, which seem to indicate that mules are gold. Last month he sold an eight-mule team for \$2850.00, and about a week later sold a team of mules for \$525.00. Last week he capped the climax by selling a two-year-old mule for \$237.50. These are bona fide sales, and all made at public auctions."

Secretary Wilson of the Kentucky Trotting Horse Breeders' Association, says: "Based upon observation of affairs at the different meetings I have attended this season and upon conversations with numerous owners and trainers, it is my conviction that we will have the best meeting in our history this fall. The restrictions and annoyances caused by hysterical and hypocritical reformers in connection with race meetings at various points will not be encountered here, and the great majority of horsemen who are in the sport for what it gives them in the way of enjoyment, and whose enthusiasm has not been affected by conditions elsewhere, will all be at 'the Hub of the Horse Universe' on the morning of October 4."

COMBINATION SALE AT CHASE'S.

Last Monday evening Fred H. Chase & Co. held their first fall combination sale of the year. Every horse that had any size and that was in good shape was promptly bid on, but there were a number of horses that were very poor or unsound that were passed after one or two bids and returned to the owner. There was a large crowd present, and the bidding showed that useful horses can be sold readily in this city at the present time at fair prices. The horses catalogued and sold were the following:

Hazel Mc., br. m. foaled 1907, by Milbrae, dam Derbacher by Geo. W. Archer; D. Phillips....	\$100
Tommy Mc., br. c. foaled 1908, by Milbrae, dam Derbacher; W. Watt.....	60
Derbacher, b. m. foaled 1902, by Geo. W. Archer, dam by Chas. Derby; F. Murphy	85
Billy Mc., b. g. foaled 1907, by Portola, dam by Geo. W. Archer; F. Murphy.....	75
Essie Mc., b. f. foaled 1909, by Milbrae, dam by Geo. W. Archer; J. P. Branick	80
Nakarch, b. m. foaled 1902, by Geo. W. Archer, dam by Chas. Derby; H. Olsen.....	115
Bay colt, foaled 1908, breeding unknown; W. Watt	125
Sorrel colt, foaled 1908, breeding unknown; W. Watt	115
Mary Ray, ch. m. foaled 1906, by Monterey, dam not given; E. L. Swan	105
Sister Fly, ch. f. foaled 1907, by Nearest, dam Miss Gordon by Blsmarck; Anderson & Taylor. 235	
Chestnut gelding by St. Carlo, dam by imp. Comrade; A. L. Kelly	90
Pair brown geldings, four and five years old, 15;3; J. Ayres	295
Stelletta, blk. m. by Toric, dam by San Diego; J. P. Cuneo	150
Black mare, foaled 1902, by Seymour Wilkes; A. J. Martin	90
Ben, blk. g. by Son of McKinney, dam by Hawthorne; L. Schafer	185
Black Bess, foaled 1901; J. Ayres.....	145
Black mare, foaled 1900; P. M. Atchison.....	107.50
Chestnut gelding, by Washington McKinney; J. Fagan	205
Chestnut gelding, foaled 1906, by Washington McKinney; J. Ayres	175
Bay gelding, foaled 1904, by Wayland W. dam by Dawn; J. Page	250
Directum II, blk. stallion by Directum, dam Little Witch 2:27, by Director; W. B. Reis.....	160

In addition to the above a dozen general purpose horses weighing from 1100 to 1300 pounds were sold at an average of \$150.

TROTTING HORSE SALE IN OCTOBER.

Fred H. Chase & Co. announce a combination sale of well bred trotting stock for Monday evening, October 31st, at 478 Valencia street, this city.

Among the owners that have already made consignments are H. Busing, C. L. Griffith, and Henry Helman, of Pleasanton; A. Ottinger and S. Christenson of San Francisco; H. Rhoner of Humboldt county, Mr. Ketch of Visalia and several others. All the horses so far consigned are well bred and there are some very choice animals and splendid prospects among them. Mr. Chase has arranged this sale so that nothing but good horses will be offered. He wants no consignments of worthless weedy animals, but those who have horses of good looks and breeding that can be used on the road or track, will find buyers at this sale who will pay the full value of the animals. There is a good demand for good horses.

Catalogues, are to be issued describing every horse and giving its extended pedigree, consequently entries for the sale will close October 17th, so that the catalogues may be printed and widely distributed in ample time. If you have anything to sell correspond with Chase immediately.

ANSWERS TO CORRESPONDENTS.

Frank Murphy, Woodland—Liska by Electioneer is registered in Volume 12 of the American Trotting Register. In Volume 16 her transfer from Palo Alto Farm to L. D. Fossett of Guthrie, Oklahoma, is recorded, and in Volume 17 another transfer to Thomas F. Adkin of Rochester, New York, is recorded. We do not find that her daughter Leta H. by Nutwood Wilkes, has been registered. In the catalogue of the Palo Alto sale held January 14th, 1904, a yearling filly by Nutwood Wilkes, dam Liska by Electioneer was sold to Walter Mastin, and a two-year-old full sister was sold to H. S. Hogoboom. The yearling was described as a bay with star, strip and snip, off hind foot white, inside of near heel and foot white. The two-year-old was described as a bay with blaze face and branded V. 114.

R. L. Snyder, Fresno—A horse was matineed here in San Francisco a time or two under the name of Doughnut that was identified as the horse Erosmont 2:22. Erosmont took his record at Sacramento August 30th, 1904. He is by Eros 5326, dam Francisca by Almont. He was foaled in 1893, and is therefore seventeen years old at the present time.

C. W. Blackburn, Fallbrook.—We can give you no advice on a case of this kind. Call in a first class veterinarian.

An item is going the rounds that a New England breeding farm is in the market for a high class stallion. What's the matter with Zombro 2:11? We understand he is for sale.

PROVING THEIR WORTH.

It was with a great deal of satisfaction that I read Mr. Halloway's letter in last week's Breeder and Sportsman that he had worked the yearling trotter Wilhur Lou, by Kinney Lou, a mile over the Hemet half-mile track in 2:27 $\frac{1}{2}$. This is probably the fastest mile ever trotted by a yearling on a half-mile track and indicates that this baby son of Kinney Lou's is a very precocious trotter. Mr. Halloway also states that he intends to take Wilhur Lou to Phoenix this fall and see how fast he can trot over a mile track. As the date of the Phoenix meeting is nearly two months later than the performance at Hemet it would look as if Mr. Halloway's colt will have a good chance to equal or surpass the world's yearling record for colts, held by Adhel 2:23 for the last sixteen years. If this son of Kinney Lou's should prove to be a record breaker or sensational colt, trotter no one will be more pleased than myself, as no one has ever had more faith that Kinney Lou will prove a sire of more than ordinary merit than I and although his get have not as yet established a reputation for him that I have hoped for and expected, I have never lost faith for I know the reasons why some of his sons and daughters have failed to make good that had every right by natural endowment of speed, gait and individuality to become high class performers. Many of his get are owned by parties who do not care to develop them or can not afford to do so, and a few of the best ones have fallen into hands where they have been worse than "hutchered." Sooner or later the clouds of ill luck and misfortune will clear away and the Kinney Lou's will come out into the sunshine of success and Mr. Dohle's horse will be acknowledged as one of the speed sires of his time by those who now condemn him.

And they do condemn him; but that's nothing. Nearly every great sire has at one time or another of his career been condemned. When the late Governor Stanford was spending thousands upon thousands of dollars in developing the get of the champion sire of world's champions, and Charley Marvin was knocking all the world's records to smithereens with the sons and daughters of the "Hero of Palo Alto," there were plenty who said that the Electioneer's were not race horses, only tin-cup performers. But for the last twenty years not a year has passed without producing one or more, usually more, sensational harness race horse or world's champion that descended from the loins of the great son of Green Mountain Maid, and this year we have the mighty Uhlan 1:58 $\frac{3}{4}$, the wonderful The Harvester 2:01, the great race horse trotters Boh Douglas 2:04 $\frac{1}{2}$ and General H. 2:05 $\frac{1}{2}$, direct descendants of Electioneer, besides many other sensational performers of the year that carry the blood of the great sire that made the name Palo Alto famous the world over, and I am positively sure that the day is not far distant when Kinney Lou will come into his own and be recognized as a sire of more than ordinary merit. His son Diamond Mc 2:18 is really a high class trotter, but an unfortunate one. Advices from De Ryder early in the summer were that Diamond Mc. could do 2:10 over any good mile track; he has since got off and I am sure that it is the effects of a railroad accident three years ago that again troubles him.

When Princess Lou 2:13 $\frac{1}{2}$ (matinee record) was 16 months old she was purchased by her present owner who is in the produce commission business and from the time of her purchase she has been on the roads in and about San Jose, raced with anything and everything, even automobiles, until she was a spoiled filly and did not look to be worth anything. Last spring she was given to Jack Villar to train and fit for a match race. The race never came off, but on July 4th Princess Lou won a matinee race, driven by her owner. She stepped down to the half in 1:03 $\frac{1}{2}$, to the three-quarters in 1:36 $\frac{1}{2}$, jogged the last hundred yards in 2:13 $\frac{1}{2}$. Since then she has gone back to the road and will probably never be heard of again.

There is a splendid son of Kinney Lou's that has been raced in the northwest this season by Joe McGuire. At Brandon, Manitoba, he started in a race with his temperature at 104; he did not recover from his sickness for four weeks and had been only two miles as good as 2:30 when he started at Everett, Wash., half-mile track, winning second money. Two days later he started again and won, the fastest heat 2:20 $\frac{1}{2}$ pulled up. He was shipped from there to Portland, taken off the cars at that place at four o'clock in the morning, started that afternoon and finished 2:7-2-2-2 in 2:16, 2:13, 2:13, 2:14. He trotted the last half of the third heat outside of three horses in 1:05 and my advice is that he could have won the fifth heat very handily if it had been advisable to do so. He won first prize for standard bred horses at Winnipeg, Canada, against eleven competitors, also the championship prize; won first prize at Regina, second prize at Prince Albert and first prize at Everett, Wash. His dam is Queen C. 2:28 $\frac{1}{2}$, by Nutwood Wilkes and he was bred by the late Martin Carter, and his name is Dan McKinney 2:19 $\frac{1}{2}$. He is a sure 2:10 trotter and a credit to his sire.

How great a trotter Kinney de Lopez really is or will be, not even his trainer and owner, Budd Doble, has an idea, but for purity of action and frictionless gait he has no superior and few equals and Sonoma Girl is the only trotter I ever saw that could step a two-minute clip in the same effortless way. That he will be a star performer some day

is my humble opinion. I think 2:21 is the fastest mile Mr. Doble has worked this four-year-old son of Kinney Lou's this year.

Last week at Columbus, Ohio, Bon Vivant, a three-year-old colt by Bon Voyage, trotted to a record of 2:10 $\frac{1}{2}$ and it is quite likely that he will before the season is over enter the 2:10 list. Jean Valjean (3) 2:10 pacing, is already a member of that select list, and no one doubts Bon Guy's ability to heat 2:10, since his winning race at Sacramento where he trotted in 2:12 $\frac{1}{2}$, 2:11 $\frac{1}{4}$, 2:12 $\frac{1}{2}$ over the poorest summer track in California. To get three three-year-olds capable of taking records of 2:10 or better out of his first crop of less than 20 foals, stamps Bon Voyage as a wonderful sire of early and extreme speed and if any other horse has made an equal showing I have never heard of it, and I do not know of a sire that has had two three-year-old stake winners out the same year that showed as much class in their races as did the two sons of Bon Voyage, Jean Valjean and Bon Guy, or of a sire that ever had two of his colts perform as creditable at one meeting, as did these two colts at Woodland where Jean Valjean won in 2:10, 2:10 $\frac{1}{2}$ and 2:11, and Bon Guy won in 2:13 $\frac{1}{2}$, 2:13 $\frac{1}{4}$ and 2:13 $\frac{1}{2}$. The following week the latter colt cinched his claim to speed and gameness by winning the Stanford stake in 2:12 $\frac{1}{2}$, 2:11 $\frac{1}{4}$ and 2:12 $\frac{1}{2}$, over the positively slow track at Sacramento where every heat was a grueling contest from wire to wire. The time of the second heat has been beaten but very few times by the best aged trotters that have raced over the same track. Had the last named race been trotted by the same colts over a track as lightning fast as the Cleveland, Columbus or Lexington tracks, the time would have compared very favorably with the best time ever made by the best Eastern three-year-olds with the exception of the record-breaking miles made by the phenomenal Colorado E. 2:05 $\frac{3}{4}$.

The unreasonable prejudice of some people is really amusing. Before Helen Stiles 2:09 $\frac{1}{4}$ started in her first race this year I heard it remarked by parties who did not want to think that a Sidney Dillon could be of any account as a race horse, "Just wait and see; you will find that they'll beat her good and plenty; you know she's a Sidney Dillon." Well, so far she has won every time she has started and she has made the trotters they were going to heat her with look cheap. These people got that funny idea in their head that she wouldn't race well despite the fact that she proved as a three-year-old in the only race she ever started in that she was both fast and game, and despite the fact that Sidney Dillon has sired other fast and game race horses. His daughter Dolly Dillon 2:06 $\frac{1}{2}$ the first of his get to start in a race, proved herself to be a dead game race mare, and his son, Stanley Dillon 2:07 $\frac{1}{4}$, raced well till he went wrong. Then later came Ruth Dillon that was an unbeaten three-year-old and obtained the world's half-mile track record for trotters of that age, and the following year the race record for four-year-old fillies of 2:06 $\frac{1}{2}$ and last year Sophia Dillon 2:11 $\frac{1}{4}$ proved conclusively that she was a game and reliable trotter and much faster than her record. The gamest trotter I ever saw step on a race track was the beautiful mare Rapidan Dillon 2:12 $\frac{1}{4}$, when she contested in the 2:12 class at the Breeders' meeting here in San Jose last month. Not only was she the gamest one but the lamest one, and had she not the courage of a lion the distance flag would have waved in her face the first heat. As it was she was inside the money, finishing well up in every heat. Had she been sound the result of that race would have been different as she was timed a mile last fall at Phoenix in a race where she finished second in 2:07 $\frac{1}{4}$, whereas the fastest heat of the San Jose race was 2:11 $\frac{1}{2}$.

Another unbeaten Sidney Dillon racing in the northwest this year is the three-year-old pacing filly Lizzie Dillon (3) 2:15 $\frac{1}{4}$. If I am not mistaken the filly's dam is Our Lady, by Nearest 2:22 $\frac{1}{2}$ and was bred by H. B. Gentry of Bloomington, Ind., the gentleman who came to California and paid C. A. Durfee \$25,000 for the great McKinney and two years later sold him for \$50,000. When Mr. Gentry came out here to purchase Mr. Durfee's horse he brought with him his friend the late Dr. O'Rear of Indianapolis, a popular veterinarian of that city. While here Mr. Gentry purchased the mare Our Lady by Nearest, dam by Anteeo 2:16 $\frac{1}{4}$ with a filly foal by her side by McKinney and again in foal to that horse for the sum of \$600, and presented the mare and foal to Dr. O'Rear, and she was shipped east in the car that carried the great McKinney from the land where he had acquired fame as a race horse and sire of race horses. A year later Dr. O'Rear died. His widow wishing to dispose of Our Lady and her two fillies offered them for sale. Some parties offered her \$1500 for them, but not thinking that was enough she wrote to Mr. Gentry and told him she had been offered \$1500 but thought they ought to be worth more than that and asked him if he could not get her more money for them. That gentleman at once sent her a check for \$2000 for the mare and her two fillies, and afterward sold one for \$1000 at private sale and a year later when he disposed of all his trotting stock, sold the other at auction in New York for \$900, retaining Our Lady and her third foal, a colt by McKinney. She raised another colt by McKinney, making four in all by that horse and was then bred to Sidney Dillon and foaled late in the summer of 1907 a filly by that horse which Mr. Gentry sold and last spring she was brought to the coast. Although the reports of the races do not give the name of the dam I believe Lizzie Dillon is the filly out of Our Lady.

Two years ago last spring F. E. Turner, proprietor of the Santa Rosa Stock Farm, was arranging to go East to bring to California a grandly bred three-year-old son of the great sire Bingen 2:06 $\frac{1}{4}$ (sire of Uhlan 1:58 $\frac{3}{4}$) dam Ivy Dee (4) 2:12 $\frac{1}{4}$, by the mighty Onward, he had purchased from L. E. Brown, proprietor of the Maple Lawn Stock Farm, Delevan, Ill., when he received a telegram from Mr. Brown that he wanted to keep the colt until he had bred a number of mares to him. As Mr. Turner was just as anxious to get the colt to California as soon as possible that he might breed his own mares to him the deal fell through and "The Exponent," one of the very best bred sons of the great sire, Bingen, did not come to the Golden State where his blood would have been a valuable acquisition to the trotting horse industry of the coast. On September 16, at Indianapolis, The Exponent started in his maiden race, the 2:24 class, against a field of seven and won in straight heats in 2:13 $\frac{1}{4}$, 2:11 $\frac{1}{4}$ and 2:13 $\frac{1}{4}$. In the second heat Maud H. carried him to the middle of the lower turn where she went to a break. The Exponent kept up the clip to the three-quarter in 1:37 $\frac{1}{2}$, just a 2:10 gait, and finished in 2:11 $\frac{1}{2}$ eased up. The horse is described as a fine sized, stoutly made, true gaited and bold going trotter, that is bound to trot to a low record. The price Mr. Turner was to pay for the horse was \$3500. Today his price would probably be three times that amount. C. C. C.

THE HARVESTER'S RECORD.

Trotting records have been lowered so fast during the past three or four seasons that a meeting on the grand circuit which cannot show two or more time-demolishing performances is one that creates talk because it is so different from the general run of meetings.

Among the great performances of the past season was the lowering of the world's stallion record by The Harvester 2:01 which had been held by Cresceus at 2:02 $\frac{1}{4}$ since 1901. Being so deeply impressed by this new record another important feature is the season's work of The Harvester has been overlooked by many turf fans.

Starting in at Detroit, The Harvester has trotted one or more heats in a race or against time each succeeding week during the season. That in itself is not out of the ordinary but in trotting these heats the phenomenal son of Walnut Hall and Notelet has established the time average of 2:04 $\frac{1}{4}$. During this time The Harvester has trotted fourteen heats. Three of them have been faster than those trotted by any stallion in a race, while upon two other occasions he has equaled the former stallion race record of 2:03 $\frac{1}{4}$ held by Cresceus.

The Harvester's record during the present campaign, which is fast waning, is one well worth pondering over. Here are the figures denoting what The Harvester has done so far this summer:

Detroit—2:04 $\frac{1}{4}$, 2:04 $\frac{1}{4}$.
North Randall—2:04 $\frac{1}{4}$, 2:03 $\frac{1}{4}$.
North Erie—2:07 $\frac{1}{2}$, 2:08, 2:02.
Empire City—2:08 $\frac{1}{2}$, 2:03.
Readville—2:03 $\frac{1}{4}$.
Hartford—2:06, 2:03.
Syracuse—2:01 $\frac{1}{4}$.
Columbus—(First week), 2:01.
Total—Fourteen heats; average 2:04 $\frac{1}{4}$.

From the above table it clearly shows how easily The Harvester's average for the season might have been lowered had Mr. Geers set out to try for such a record. Instead, the famous trainer was reluctant about stringing the great trotter. For instance, The Harvester could easily have trotted faster in both heats at North Randall than he did go, but Mr. Geers did not wish to chance injuring him the day he started at the Cleveland course because the track was hard.

At Buffalo the first two heats trotted by The Harvester materially raised his average. At New York, Mr. Geers let The Harvester loaf the first mile, while at Hartford the first heat was trotted in 2:06 only. But the fact that there was no apparent attempt for a fast average time made, makes the record all the greater. Perhaps, if The Harvester tries on Thursday at Columbus to further reduce his mark, he may be successful. At any rate a fast mile will be trotted, which will most likely pull the season's average down below the 2:04 mark.

STATE AID FOR DISTRICT FAIRS.

Secretary A. E. Miot of the Tulare County Board of Trade has sent out under direction of President Johnson of the board and relative to concerted action in the matter of securing State aid for county and agricultural district fairs a call for a convention to meet in the Board of Trade rooms at Visalia, Cal., at 10:30 a. m. on Tuesday, October 4th.

The object of this meeting is that those interested may form a proper organization to secure the desired results at the coming session of the State Legislature, and it is hoped that all interested will make a special effort to be at the convention, bringing a strong delegation, representative of those in the particular community desirous of concerted action.

The Abbe 2:04 now has ten straight races to his credit, and his winnings amount to \$16,560. His chances of going through the season with an unbroken series of victories to his credit look to be pretty rosy after his latest race. Three more weeks will tell the story. He is certain to close the season the largest money winning pacer of the year.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT.

DUCK SHOOTING IN THE CORN.

Let the duck hunters of today study the flight of the wildfowl, the contour of the country, the effect the weather has upon the game; learn to judge distances accurately and how to arrange and use blinds suitable to various shooting grounds. Let them learn all about decoys and the particular notes to call to lure the game within shot; learn to mark down accurately and pick up dead and crippled fowls with certainty and despatch, and they need have little cause to lament the scarcity of the game, due to drainage, and the pre-empting of all the best shooting grounds by the clubs.

In the Middle West there are very many duck hunters who are denied the use of a boat on river, slough or lake, and for the benefit of these is the lines on duck shooting in the corn. In some parts of Washington and Eastern Oregon almost these same conditions prevail and mallard shooting in the stubble fields is a means of sport on about the same lines as here given by a writer who evidently knows something about the game.

Dry conditions this year throughout California may offer the same comparative inducements for sportsmen who are distant from the duck sanctuaries where feed and water abound.

When November days have come hoar frost whitens the morning grass, cornfields are husked and standing stalks are broken and lying in every direction; ears of corn, dropped from the wagons, and loose grains are in plenty in every field the range of the corn belt lands over. The wood duck and the blue-wing teal have passed by, the warm weather fowl have departed, but spoonbills, pintails, green-wing teal and mallards are working down, driven by the Northern cold. Running streams and creeks are open whose high or timber-clad banks afford a protection from the keen, blustering wind; the cornfields provide abundance of food, and ducks are taking advantage of every secluded spot, loath to leave for a warmer clime. Now the country duck hunter is watching the feeding flocks and noting the water holes and creeks they nightly drop into. A heavy rain storm with a cold wind drives them to these places; a foggy morning scatters them over the feeding grounds, where low over the cornstalks they fly and circle in search of food, dropping into puddle holes and low places to drink.

One November evening, after an afternoon rain, we watched the feeding grounds about sundown, until darkness hid them from view. We saw several flocks of ducks rise from the cornstalks and silently drop into a creek whose banks we knew were high and gravelly, and where running water was in evidence. We knew that if undisturbed they would remain there for the night and give us some shooting on the morrow. The question was the wind, for that forms a very important factor. If it blew stiffly they would go out against it at an angle; if no wind blew they were liable to scatter in any direction, for the feeding grounds lay upon both sides the creek. The night was cloudy, but before we retired we scanned the heavens and concluded that, although overcast, the "Milky Way" was the widest and brightest in the southwest, so the wind would come from that quarter the following day.

We started at daybreak. The morning was foggy and as yet with no wind, nor would a wet finger record any. We crossed the creek some distance below the ducks, to prevent in any way disturbing them. We got upon the south side, where ample feeding grounds lay stretched before us, took up our stations about 200 yards apart and far enough from the creek that the report of our guns would not alarm the resting ducks. For blinds we pulled a few cornstalks together, sticking a few in the ground, making the "hide" large enough to turn around in; not large enough to be noticed, yet enough to shield our bodies when kneeling in position. The swish and whistle of wings overhead now and then disclosed the fact that ducks were moving, but the heavy fog prevented us from discerning them. The sun was about half an hour high before a flock from the creek suddenly loomed in sight close overhead. A double report rang out and two ducks fell, the last one some distance away. I marked and quickly followed it, not taking my eyes off the stalk it fell by, picked it up and returned to my blind, took bearings and soon found the first one.

If you are in error in finding a duck you have marked down, directly tie your handkerchief to the stalk you marked by and beat on a line with it; it may be farther over on a line. Should you fail, owing to the duck being only winged, beat and kick the stalks, for a wounded duck hides quickly and its color harmonizes with the weeds and grass. Don't hang up your cap; you may lose it, owing to its color harmonizing with the corn. I did so once and went home bare-headed. Avoid any motion in walking or running which might attract the notice of a distant flock, and when they come in shoot slowly, making every shot count. Above all, learn to lead your birds, so as to be able to make a successful crossing shot, and watch the effect of every shot at incomers—you will undershoot them till you catch the hang of it.

We could see father by this time, for the fog was slowly lifting. Little flocks would swing by and cir-

cle to the call; the fowls called frequently, circling round to my companion, offering him a good shot, while flocks wheeling to his call would often swing close in to me. We began to get them in pairs and singles. When the fog lifted the wind blew from the southwest and we discovered ducks circling over the adjacent fields, where their fortunate companions had already settled down. A flock circling and alighting in a field invariably attracts all others within view.

We remained a short time longer, then went over to the field they were dropping into, divided and went to "picking up," each for himself, yet giving a flight or circling flock to each other.

A favorite way of cornfield shooting is this picking up. The shooter wanders over the field, drops down behind a few stalks when a flock approaches, shoots if they come within range, picks up his kill and goes on. He will call flocks he sees circling or even passing over, moving on as he wishes, jumping a flock or a single occasionally. Often in this way one will jump a flock and drive them right over one's partner, so be watchful all the time. Ducks, when called and when alighting in the stalks, invariably circle around widely two or three times, narrowing each circle until they fly over the place. So by watching closely you can frequently push farther into the circle as they fly away from you without being seen, but you must drop as soon as they wheel, and give a running call. Your dress must harmonize with the surroundings. I like a cape of burlap, cut all around in strips a foot in length. These strips are frayed and blow in the wind like so many leaves of the corn. A band of like material should adorn the cap or hat, and both can be taken off and put in the pocket when you return home.

A blind should be a simple affair, not enough to attract attention, but thick enough to conceal the contour of your form, as any movement in your blind is instantly observed by the eyes of the watchful ducks. The lower they fly the less readily they see you if you have a background and are not looming up between them and the sky. Never twist around in your blind when ducks are approaching you; turn only your head. Make one motion, and that to shoot. A duck's range of vision, as a rule, travels over the country ahead of it at an angle of about 45 degrees, so that when ducks are almost over you, you may raise your gun to shoot, for the angle has passed by. Keep down even when they are out of shot. Call; they may swing round you upon the next circle if they have not seen you.

Be sure to mark down accurately your dead or crippled, noting a stalk, weed, tree or other stationary object; keep your eyes upon it and go at once, not taking the eyes off for an instant. Better shoot once and kill than shoot a double and lose one or sometimes both in the endeavor to get more ducks.

For position in your blind drop upon the right knee, your left forming the angle of a square, your right elbow and arm upon the ground, wrist and hand down, head almost touching the ground between your left leg and right knee, your left arm pointing downward and hand grasping your gun, which lies upon the ground; you can move your head to watch the birds. To shoot raise up by sitting back on the right heel, but keeping in the kneeling position. Should the game swing round behind you, reverse the position of the knees as you wheel to the right on the right toe, and shoot from the left knee. Never attempt to rise to the feet or get off both knees in a position to rise up. This wheeling can be done on land, in shallow water or in a boat. By a little practice it can be easily and quickly accomplished.

The morning I have written about we shot in several fields until 11 a. m., when the ducks went off to their playgrounds upon a river several miles away; but we felt prouder of our bag of 11 or 12 wild ducks apiece, killed without the aid of decoys or a boat, than we used to of 50 or 75 in years long past and gone.

Huntress Bags Big Buck—The hunting sensation of the Southern California season so far belongs to Miss Lucilla Pennywitt of Los Angeles. Last week she shot an eight-point buck, at the head of the San Gabriel canyon, scoring the kill with one shot. The feature of the specimen lay in the fact that the antlers are lined with white hair instead of being uniformly brown, as is the case with all the California deer. Some of the older sportsmen say that it must have been a white tail, but as these deer are not found in this part of the country, others think that it must be a freak black tail. Any way there is a point for a good argument.

Eureka sportsmen recently organized the Rain Fly Inn Gun Club, with the following membership: A. W. Way, O. C. Gregor, W. S. Clark, C. H. Connick, J. M. Freitas, P. W. Mathews, R. J. Kellen, Dr. Chas. Falk, Earl Clark and Squire Clark.

Drink Jackson's Napa Soda.

PLENTY BIG GAME IN SASKATCHEWAN.

Big game hunters are each year going farther and farther afield in search of sport and it will be a surprise to many to know that in western Canada there are still places where moose, deer and bears may be shot within an hour or two's journey of comfortable hotels, and hustling up-to-date cities. One of these districts is in the valley of that magnificent city of Prince Albert, and on the line of the Canadian Pacific and Northern railways.

Beyond the north branch of the river and east of Prince Albert the lumberman, the fisherman and the fur trader alone have invaded the haunt of the red man and his natural food supply and a couple of miles from the town one might easily fancy that the first of the "company of adventurers trading in the Hudson bay" had only recently arrived and that a herd of buffalo might be expected along at any minute. The buffalo has gone, but the moose, deer and black bears still abound and every winter where meat is a common article of diet in Prince Albert and in the homes of the farmers of the vicinity, while the Indians, who it is feared do not strictly observe the game laws, have a full larder all the year round.

The best hunting ground for moose is probably the country north of the river and lying between the city and the Forks, where the south branch enters the main stream. Birch and poplar, on which the animals browse, grow in abundance in the woods that stretch for many miles back from the river banks, and few hunters have ever returned from an expedition into this country without trophies of the chase. Across the river between the north and south branches, is another favorite haunt of both moose and red deer. A belt of pines stretching from river to river, between Steep creek and Cecil, provides shelter from the cold winds, while from the birch and poplar that chiefly compose the rest of the woods in the vicinity, the deer get an abundance of feed. Another place where the huntsman is not likely to be disappointed is in the Menichanas hills, a branch of the Birch hills, some distance south, but this country is being rapidly filled up by farmers and the game is confined every year to smaller areas.

Black and cinnamon bears are found all through the country north of the river, and in a range of hills about 70 miles due west of Prince Albert brown bears are only less numerous than in the Rockies. The commoner kinds of fur-bearing animals, lynx, foxes, wolverines, wolves, martens and so forth, are shot and trapped by Indians and half-breeds within a few miles of the city, but these animals are not so frequently met with in the immediate vicinity of civilization that far north.

The hunter who penetrates into the wilds a hundred miles north of the river can have great sport among the caribou, which migrate in winter from the barren lands to the shores of the big lakes. Caribou have been seen 20 miles from Prince Albert and at Candle lake they are numerous every winter. Farther north, however, they travel in great herds, and a few years ago the mounted police officers in northern Athabasca killed 60 caribou in one day.

For the man who wishes to get some sport with his rifle for a small expenditure of time and money, the best hunting is to be had in the chase of jumping deer. This species is very common all along the Saskatchewan, and "black tails," as they are called, have often been killed a mile or two from the city limits. Frequently they get among cattle, which in this district range out the year around, and when farmers round up their stock they often take out a rifle and get something for the pot. North of the river, near the mouth of the Shell, is a favorite haunt for the jumping deer and some of the city sportsmen have frequently gone out in the morning to this vicinity and returned in the evening with a cutter loaded with game in proof of their prowess with the rifle.

Game being so plentiful, there is at present no occasion for very stringent game laws, and residents of Saskatchewan may shoot in the province without permit or license, but strangers must pay \$25 for a general game license entitling them to shoot birds only. If a hunter is a guest of a resident, however, a permit may be procured for \$1. The killing of fawns and does is prohibited entirely, but except in that part of the province lying south of township 2 and east of range 23 west of the second meridian, three males of each species of deer may be killed in a season. In the area above defined two only of each species may be killed, and the open season is confined to 15 days commencing on November 15, but in the remainder of the province the whole of November and the first two weeks of December are at the disposal of the deer hunter. The antelope season throughout the province is the whole of October and the first fourteen days of November.

Large Swordfish Landed—The first swordfish of the season, weighing 177½ pounds, was landed two weeks ago at Catalina, by L. G. Murphy of Converse, Ind., who recently brought in the 175½-pound tuna, the largest landed at Catalina in eight years. Mr. Murphy brought his swordfish to gaff after a fight of twenty-five minutes, it being the second one hooked by him the same day. He lost the first strike, as his line was broken by the leaping of the huge fish. The largest fish of this kind ever landed off the island was that taken by ex-Congressman C. G. Conn of Elkhart, Ind., who, with rod and reel, last season caught one weighing 339 pounds.

The Moss Landing Duck Club has been organized by Salinas sportsmen.

MY FIRST EFFORT AMONG GERMAN TROUT.

[By Black Jack]

The necessity for April trout fishing was not immediately obvious to my friend the doctor in jurisprudence, who was good enough to superintend and direct my onslaughts on his native tongue. But, as he had hitherto found me somewhat slow to embark on what to an American intelligence was clearly a forlorn hope, he was gratified to find a subject on which I was willing to converse volubly, albeit without accuracy.

Trout? Yes, undoubtedly there were trout in his native valleys. He had himself partaken of them on expeditions of pleasure. They possessed a superlative flavor, and added infinite relish to the five-mile drive that preceded them. The doctor, in fact, took a purely gastronomic view of the subject, and was at first unable to comprehend that I wanted, not to eat trout, but to catch them. When, however, he had grasped the outlandish notion fully, he admitted that the idea was not wholly unheard of.

There were other eccentric Americans, he believed, at Weimar, not so very far away, who were reputed to go to immense trouble to catch a few fish that might be taken more easily with a net. The doctor did not profess to understand it, and, so far as he knew, none of his German friends understood it either. The conception of fishing as a sport had evidently not yet reached this little university town, though it has established itself firmly enough in other parts of Germany.

But on being pressed the doctor enumerated some of the places where he had eaten trout; it seemed probable that where they were eaten, there they might be caught with a fly. After long discussion, it appeared that he had the kindest memories of a certain midday repast at a small inn almost at the head of the Ilm, the river which runs through Weimar, and it seemed to him that I had better write to the burgomaster of the little town close by, asking him for information. Without more ado the letter was written—the doctor, in fact, wrote it himself.

Another letter was also written to a firm of tackle manufacturers in Berlin, asking for a catalogue of their wares. I had brought no tackle with me, having erroneously calculated on possessing sufficient strength of mind to resist the impulse of April, and it seemed the easier way to buy a rod and equipment than to try to borrow an outfit.

Eventually I procured a rather curious selection of things that included an old-fashioned 9-foot 6-inch American steel rod and a brass multiplier reel of antique pattern. This last was an accident, the language in which it was described in the catalogue having passed my powers of translation, and the article having been ordered by the light of hope. However, the outfit looked serviceable enough, and the flies were not bad.

The idea of writing to the burgomaster proved a good one, for he was the intimate friend of the brewer in whose establishment I had installed a new battery of hollers. His answer informed me that I could stay at the little inn where the doctor had eaten trout and fish a stretch of the river that belonged to it. Before many days, accordingly, I took a train to Ilmenau, and drove up the valley of the Ilm to have a first experience of German trout fishing. Though April was a week old, snow was lying about here and there, and the aspect of the country was wintry in the extreme; the chance of catching trout seemed but small. Even a small chance, however, is something, and the river, which ran parallel with the road, looked inviting enough. At Weimar the Ilm is of dark complexion and somewhat sluggish in its movements; but above Ilmenau it is a mountain stream pure and simple, and a small one, with a rocky bed, and great pine forests stretching up the hills on either side of the valley. It was obvious that the fish could not run to any great size here, but I had it on learned authority that they were sweet, and doubtless they would prove game.

The Gasthaus, when reached, proved to be primitive, but it was clean, and the Ilm ran within a few yards of the back door. After a delay long enough to partake of several different kinds of sausage and to unpack, I hurried down to the river to catch my first German trout. Then I discovered that steel rods are not as other rods are, and also that an antique multiplying reel has its disadvantages. At the first handling this steel rod appeared to vibrate in all directions at once, and for a time it seemed to me that I was the victim of a recondite practical joke. To one accustomed to the honest sweep and leisurely recovery of a Leonard, the steel rod behaved like a mad thing, and it was a full hour before I could persuade it to get out any line at all. At last, however, it dawned upon me that compulsion was useless, and I tried letting the lively implement do all the work itself.

After this we got on better; the rod saw that it had taught me my place, and then condescended to hook a fish with the March brown that acted as tail fly. It was a good fish, and very likely might have come to bank had it not been for the multiplier reel. This perverse thing was possessed of a knob which could be pushed backwards and forwards. Pushed forward it stopped the reel not only from multiplying but from revolving at all; pushed backward it seemed to have no effect, and what its practical utility was it would be hard to say.

The knob was so situated on the rim of the outside plate of the reel that it must inevitably come in contact with the angler's coat, and get pushed forward without his knowing it. This happened when the rod hooked my first German trout, which seemed to be about three-quarters of a pound, and evidently desired to run out the line, a proceeding that the

reel would not allow. After this I somewhat warmly tied the knob up with a string, put on a new fly, and allowed the rod to begin again.

But the upper Ilm fish did not seem enthusiastic, even though, as I believe, mine were the first artificial flies they had ever seen. The air was very cold, and the snow lying about may have been too much for them. Several hours' fishing only resulted in five fish, of a united weight of 1 pound 12 ounces, but by the end of this time I had begun to understand and rather like the rod's peculiar action. It was very quick on the strike, very delicate in its treatment of a fish, and would throw a long line if it were not hustled. Force made it decline to do anything.

With my five fish I returned to the inn not altogether satisfied. They would have made a decent show in Point Reyes on such a day, and I looked for approbation on the part of the landlady. But I looked in vain. She held up her hands indeed, but in horror, breaking into what sounded suspiciously like lamentation. At last it came out that I had killed the fish instead of bringing them home alive. This (as I did not know in those days) is the almost invariable rule in Germany. You may fish practically anywhere by permission, so long as you deliver up your catch alive, to be kept in a tank against the arrival of customers.

If you want to keep any yourself, you must buy them at the market price. In the fishing resorts that are at all frequented you can have a small water-hut on wheels drawn about after you by a man, but in out-of-the-way places you have to depend on a bucket, and only those who have tried to keep trout alive in a bucket can know how vexatious a thing it is. At first I tried to carry it myself, and I calculate that of seven hours spent by the stream on the following day five were occupied with the bucket, which had to be refilled about every three minutes, which upset itself once in five, and which was unreasonable in every possible way. Afterwards a boy was found to carry the bucket, which as the weather became a little warmer grew into two buckets, for the Ilm fish proved easy enough to catch, and though nothing exceeded one pound, I took plenty of them. But it is questionable whether a boy and a bucket are not more difficult to manage than a bucket alone; I have no clear memory of being saved much trouble by the new arrangement.

RANDOM NOTES.

[By Loch Laddie]

As the field trials in this country began to take such a hold on the patrons of out-of-door sports, the first thing noticeable to the handler of dogs has been the falling off in sizes of both the pointers and setters. When one looks upon the development of the game from its start until its present magnitude and follows all the turns that have led up to its development and what it requires as its standard of merit in dogs, it is not to be wondered that type, physical development in size, should have made a change. If we look far back to its start we only have old cuts, records and the never-failing memory of the pioneers of the game to tell of whether the characteristics of the ideal field dog of long ago have been sacrificed in the rage for class. There can be no question about it and the hench show dog of today is the only standard we can look to for type in the setter or pointer.

While many of the prominent winners of later year trials hold their own with the bench show dogs in all the characteristics that go to make up the show winner, they are the exceptions. For the field dog, in many cases, is bred irrespective of type, but to blood lines that have alone shown themselves as winners in trials. The desire to impregnate a strain with class to perpetuate the old saying "like produces life," have made the stud dog the trial champion, eagerly sought for, in hopes of bringing another winner in the kennels of the breeder. We have been asked so much of late as to which size of dog is the best adapted for actual shooting purposes that the above lines were the reason of my wandering from the subject. It is in itself a rather difficult subject to answer, and when a dog of a different size wins in a trial there is an immediate rush for pups that promise to be, when grown, about the size of the winner. In a certain part of this State there was a rage for large setters until the illustrious little Lady Peach Blossom showed that under certain conditions the miniature setter could discount her large brother, when there was at once a demand for the small "pocket pieces," as they were called, weighing, in good physical condition, about thirty-five pounds, and to this day to Count Danstone and Peach Blossom can be traced the great demand for these small dogs.

Everyone to his taste. So let the one who prefers large or small, stick to the object of his preference. Take, for instance, the large dog of the present day which will average in weight about 55 to 60 pounds and sometimes more. He can possess range and as much physical endurance as a dog any other size, though possibly he may have in some cases the disadvantages of heating up during the warmer months or fall than a smaller dog, but he possesses the great advantage of breaking through heavy ragweed, hedge and bottom corn lands that are too trying on the smaller dog to make the latter a dangerous competitor. He also has the advantage of being able to use his wind in weeds of ordinary height, that would be over head to the smaller dog, who would then only be able to resort to his trailing power, and pull-

ing through rank vegetation tires a small dog very quickly. But it is a poor rule where there are no exceptions, for some of these lightweights are built on the order of a battleship, and plow their way through the rankest cover without any apparent discomfort.

On the prairies and open countries free of cover the small dogs are the equal of the larger ones and it is a very pretty sight to see them reach out for hirdy-looking places. They do it so neatly and with so much vim the observer cannot help becoming attached to them. The writer can remember a certain small daughter of Prince Lyndon who possessed marvelous speed. Not only did she have great speed, but I cannot recall of a single dog who ever possessed such conceit in her running powers. It was a great joke for her in an open country to set the pace with another dog and when he was about to get near her to let out another link of speed and outdistance him until she had him off his legs. She was so accustomed to doing this that she firmly believed that no dog living could outrun her. But pride had its fall. She was taken one day hunting in company with two large pointers, both in elegant field condition. The territory to be hunted over was rank bottom corn, overgrown with pea vines, and swales grown up in plume and grasses. The little bitch as usual started the pace and soon tired. The large pointers broke through nonchalantly, taking every piece of cover with ease, and the small bitch for the first time in her life trailed behind. It destroyed her self-conceit; but broke her heart. From that day to this she was but an ordinary dog.

Some sportsmen on the opening of the upland shooting season find two annoying things confronting their dogs; lack of field condition, which can only be overcome by plenty of exercise, and the faulty habit of breaking shot. There are many dogs that are staunch to wing, but plunge in immediately the report of the gun is heard and by this act flushing the remainder of the covey hidden in weed or other cover. It is chiefly attributed to two reasons—over-anxiety to retrieve and inability of dog to control himself, on account of never having been taught to stand steady to shot. Many dogs that are perfectly broken staunch to shot, in careless hands soon acquire this habit, but it can often be traced to the shooter "breaking shot" as soon as he fires, so anxious is he to get his dead or crippled bird that he chases after it. The dog thus readily acquires the habit of watching the actions of his master and his natural ambition becomes keener with the greater number of opportunities afforded, until it becomes second nature with him.

Where the master breaks shot, it is impossible to ever steady the dog for him. But there it is due only from over-anxiety and the master actually wants a dog to be steady in every sense of the word, it can be easily corrected in the ordinary routine of shooting.

In the beginning, when your dog finds, forget your own anxiety for the bird, walk up even with the dog, place your foot on the dog's paw; do it gently at first. The moment he starts to break in when the bird flushes, fire; then press his foot harder. You will not accomplish a cure immediately, but before many points are made the dog will commence to anticipate this punishment and realize why this is done. As soon as you become aware of this be careful and refrain from permitting him to hunt his dead until you have given the word of command.

You will find this a much easier method than using a choke collar and lead, which is often a nuisance in brush and a difficult task while alone.

In these days there are so many books published on kennel management, ranging from scientific works down to handbooks, not to mention the numerous papers devoted to doggy topics, that every fancier who has studied a few of them is liable to feel that he understands all about matters canine. Now it is no uncommon thing to find in such works minute instructions as to how operations more or less simple may be performed by the amateur. I do not, of course, refer to serious cases, which are never likely to be undertaken by any save a duly qualified practitioner, but merely to those little matters which in particular appear to be within the reach of any one. A swelling requires opening with the knife, teeth need to be extracted, wounds sewn up, or broken limbs put in splints. Very little matters these to the man of any experience, yet I am always extremely chary in recommending any one to attempt them, and often wish that writers would not deal with them in the offhand way they do. For example, the removal of a tooth cannot be considered dangerous, but every one must know that no pain is more excruciating than that caused by the clumsy drawing of a tooth.

Unfortunately, in order to save trifling expense, amateurs will often attempt the work of a canine dentist. Without even purchasing proper pincers, they will drag at the offending tooth with a pair of wire tweezers, while I have known them to adopt the old method of trying to wrench out a molar by means of the door key. The pain so inflicted is terrible to think of, and the memory of it lingers in a dog's mind far longer than that of the severest thrashing he has ever suffered. Now probably for a quarter, a vet who knows his work, will whip out the offending tooth before the dog knows what has happened. A touch of cocaine to the gums in the immediate vicinity of the tooth, a good pair of extractors and a steady hand, and the work is accomplished in a few seconds.

When it comes to the matter of using a knife my objection to amateur work is even better founded. There is no comparison between the suffering inflicted by the amateur and by the professional in such a case, and I know of no circumstances under which I would recommend the novice to attempt an operation, save perhaps the docking of a puppy's tail, or the removal of dew claws, both of which may simply be snipped off with a pair of sharp scissors without the infliction of any real pain at all. Amateur doctors are generally dangerous; amateur surgeons are certainly not to be encouraged.

When it comes to the question of disease the position is different, because there often the amateur who loves his dog will take more trouble and nurse more tenderly than any one else. Again, it is useful to know how to put in a stitch when help is not to hand, or to render first aid in the case of a broken limb, but even having done so it is advisable to seek professional aid afterward, since few amateurs can expect to set a limb without clear knowledge not only of how it should be done, but also of anatomy.

Never even try to exercise a dog suffering from distemper. Keep him in a fairly warm, yet well ventilated room, and let him sleep on a good bed. Tempt his appetite as much as possible, and get your chemist to make you up some quinine and gentian pills. Nursing is what is wanted more than drugs.

It is often said that a dog should not be washed just before a show; this apparently is one of those little bits of advice which linger in the memory, and every novice is struck with the difficulty of showing his dog in a clean condition without washing him. Well, first of all, the smooth-coated one, the silky, the fluffy, in fact any which does not need to have a hard or wire coat, may be washed practically any time. Of course, it is never wise to wash even a smooth-coated dog immediately before taking him into the ring, since the soap and water will rob the coat of that beautiful gloss or bloom which is so much admired. Even the loss of this, however, will count very little against the dog, while if the tub has left the coat rather dry and staring the most punctilious can scarcely call it cheating to put three drops of olive oil in the palm of one's hand—only three drops mind—rub the palms together, and then go over the dog with one's hands again and again. This is not altering a dog's condition, because the veriest mongrel will have natural grease on his coat, so that by dressing in the way described one is only trying to put back what one has washed off. So, too, with a silky haired dog like a Yorkshire, it is better not to wash immediately before a show, but if the bath is necessary then oil must be used, not, mind, in order to add unfairly to the beauty of the dog, but rather, to bring it back into its natural state. To sum up, in the case of all save hard-coated dogs, the bath is not really a very serious matter, though one would prefer not to use it for a few days before taking the dog into the ring. In the case of a hard-coated dog, matters are somewhat different, for a bath does undoubtedly take the backbone out of the hair, while the quality of the coat in this division is of considerably more importance than in the other. What we mean is, that while in close competition an extra hard-coated dog may win the prize, we do not suppose that any judge ever made his award in favor of a smooth dog because its coat happened to be extra glossy. This being so, it is important that a hard-coated dog should not be washed too near the time of showing, and if he has plenty of clean straw to lie in, is well brushed and kept out of the dirt, there is seldom any reason why he should be tubbed within a week or two of showing. Of course, there is the plan of rubbing certain white powder into the dog's coat, and then brushing it out again, and certainly by this means a dog may be "dry cleaned." Unfortunately, this method has been so widely used for dishonest purposes that one hardly cares to recommend it. Properly used, there can be no objection to its adoption; as a means of adding artificial "wire" to a dog's coat it is a stupid way of faking, and one very easy of detection.

AT THE TRAPS.

At the Arizona Sportsmen's Association three-day blue rock tourney, C. Raithal of Deming shot high amateur average, 538 out of 563, W. B. Twitchell of Phoenix was second with the score of 524 out of 565, D. C. Williamson and J. Steigler, both of Tucson, tied for third place with 521 breaks each.

Mrs. Ad. Topperwein led the professionals for high average with 547 out of 565. Hugh E. Poston was second with 545, W. F. Cobb broke 533 for third position, Fred Willet broke 510.

Mrs. Topperwein made two runs of 138 and 147 straight. Cobb cracked out a neat run of 132.

D. C. Williamson broke 25 straight in the Selby match handicap and won the trophy. A. W. Galpin second 24 breaks, five other contestants each broke 23 rocks.

Deming shooters won the four-man team race, 50 targets per man. The scores were: Raithal 47, Stephens 45, Hughes 45 and Hubbard 45—182 out of 200.

Phoenix team—Twitchell 47, Tanner 43, Galpin 47 and Edwards 41—178 out of 200.

Tucson team—Steigler 41, Williamson 48, Julian 40 and Joston 37—166 out of 200.

Seventeen shooters took part in the West Seattle Gun Club's regular weekly practice shoot September 18. Forbes and Garrison were the professionals present. Forbes was high with 99 while Garrison accounted for 93 out of 100. Williams was high ama-

teur with 97; Canuck was second with 93 and Miller third with 92.

Canuck won the Selby watch event after shooting off a tie with Williams. Miller won the Ballistite cup event with a perfect score of 15 straight.

This was the last of the trophy shoot series. M. C. Smith becomes the owner of the handsome gold watch which was donated to the club by the Selby Smelting & Lead Co. of San Francisco having won it five times during the season. Randlett had him guessing all the time, though, finishing with four wins to his credit.

Ralph Miller's win of the Ballistite cup yesterday makes him the owner of it. This cup is a good sized silver affair and much better than the general run of trophies donated by powder companies. The scores were:

Targets	15 15 20 15 15 20 100
Forbes	14 15 20 15 15 20 99
Williams	15 14 20 13 15 20 97
Miller	13 15 18 12 15 19 92
Randlett	13 13 19 12 15 15 87
Dillon	14 12 14 13 14 9 76
Garrison	14 14 19 15 14 17 93
Smith	10 8 19 12 11 17 79
Canuck	14 12 20 13 14 20 93
Stadtfeld	11 11 18 10 12 14 76
Nelson	10 10 14 12 13 15 74
Robb	10 11 16 13 11 16 77
Donald	14 10 20 12 10 18 84
Peterson	12 8 20 12 11 20 83
Higgins	9 8 15 6 11 16 65
McKinnon	11 13 12 11 9 13 69
McLaughlin	15 13 28
E. Smith	10 11 21

Event 2, Selby trophy. Event 2, Ballistite cup.

A Tacoma correspondent sends the following account of the tournament at Kent, Wash, September 18:

"E. W. Cooper of the Tacoma Rod and Gun Club was high amateur in the White River Valley Sportsmen's Association shoot at the Kent traps yesterday. Cooper's score was 119 out of a possible 125. Jack Forbes, the Seattle professional, led the professionals with a score of 122. Many trap shooters from nearby cities participated in the shoot, including Cooper and Jensen of Tacoma. Seattle was represented by 14 men, Puyallup by Dr. Freeman, Elma by Sam Wray and Montesano by D. W. Fleet. Roast beef barbecued and other refreshments were served to the trap shooters by the Kent club. The scores follow:

Reed, 15, 11, 12, 13, 14, 12, 16; total shot at, 125; total score, 106.
Jensen, 11, 14, 12, 12, 13, 12, 17; total shot at, 125; total score, 102.
Fleet, 12, 13, 12, 11, 15; total shot at 75; total score, 63.
Wray, 14, 15, 13, 15, 13, 12, 12, 16; total shot at 125; total score, 110.
Cooper, 14, 15, 14, 13, 14, 15, 15, 19; total shot at, 125; total score, 119.
Forbes, 15, 15, 15, 14, 15, 15, 20; total shot at, 125; total score, 122.
Williams, 14, 14, 13, 12, 12, 14, 11, 18; total shot at, 125; total score, 109.
Miller, 15, 14, 15, 14, 15, 15, 9, 18; total shot at, 125; total score, 115.
Randlett, 14, 13, 12, 12, 8, 13, 14, 19; total shot at, 125; total score, 105.
Dillon, 13, 14, 12, 14, 10, 15, 14, 17; total shot at, 125; total score, 109.
D. Reed, 12, 14, 13, 11, 12, 13, 13, 19; total shot at, 125; total score, 107.
Babcock, 10, 9, 11, 12, 11, 12, 10, 17; total shot at, 125; total score, 92.
Garrison, 15, 14, 14, 12, 11, 13, 15, 20; total shot at, 125; total score, 114.
Stadtfeld, 14, 8, 10, 7, 11, 11, 9, 12; total shot at, 125; total score, 82.
McKinnon, 8, 12, 10, 11, 8, 7, 6, 11; total shot at, 125; total score, 93.
Nelson, 14, 14, 13, 13, 14, 12, 14, 19; total shot at, 125; total score, 114.
McLaughlin, 14, 13, 15, 15, 14, 14, 19; total shot at, 125; total score, 118.
Arnold, 9, 12, 9, 9, 14, 14, 13, 16; total shot at, 125; total score, 96.
Peterson, 9, 8, 10, 11, 9, 11, 14, 18; total shot at, 125; total score, 90.
Sorenson, 5, 6, 7; total shot at, 45; total score, 18.
J. Stewart, 14, 13, 12, 15, 13, 15, 14; total shot at, 125; total score, 96.
C. Stewart, 11, 13, 15, 10; total shot at, 60; total score, 49.
Freeman, 14, 13, 13, 13, 13, 14, 17; total shot at, 125; total score, 111.
Robinson, 12, 11, 11, 14, 14, 14, 12, 17; total shot at, 125; total score, 105.

The Nevada City and Grass Valley trap shooters came together at the traps two weeks ago.

The high scores for the Nevada City team were made by McKaig, who broke 24 out of 25; Evans 20, Tamblin 20, Smith 19 and Stone 16. For the Grass Valley team Walker shot 21, Williams 16, Handy 16, Blight 19, and Roe 3.

Handy is only about 16 years old and is an excellent shot for one so young.

Nevada City carried off the honors by a total score of 99 to 75 made by the Grass Valleyans.

Some of the contestants after the regular shoot tried to make better scores just to satisfy themselves that they were capable of doing so. Williams made a score of 22 and Blight broke 23 out of 25.

E. J. Chingren, Hugh McElroy, Morris Smith and John Malloy a quartette of well known Spokane blue rock pulverizers last week made centers on sprig and mallard for three days at a preserve near Creston.

Considering lack of practice during the summer the members of the Searchlight Gun Club, now contesting for the Dupont trophy, are making fairly good scores. With the tournament half over, T. A. Brown is well in the lead. The scores are as follows:

T. A. Brown 72, Clarence Curtis 61, J. W. Doran 56, W. E. Record 54, Guy Corson 54.

John Steigler, W. A. Julian, D. C. Williamson and Chas. Weber of the Blue Rock Gun Club represented Tucson at the recent Phoenix tournament.

Just to put in a bit of preliminary practice for the opening of the duck season Los Banos sportsmen and a number of visitors from Newman broke about 1500 blue rocks last Sunday. The attendance was good and excellent scores were shot. Every man jack of that bunch probably shot the limit of ducks this morning.

The Clay Bird Shooting Championship Meeting at Hendon this year seems to have met with more success and favor than its predecessors for some years past. The weather was favorable, the competitions were keen and interesting and the attendance was exceptionally good. Really, in reviewing the three days of the meeting, it looks as if there is yet hope in England for clay bird shooting, and this interesting sport might, with some alterations of its present conditions, drawn with the view of encouraging the novice, be developed into a really popular sport which might eventually supersede live pigeon shooting, now in its decline. We learn that some 10,000 targets were flown during the meeting and there were not far short of 1000 persons present on the final day. A number of veterans in the sport were in evidence, and prominent among these were those enthusiastic stalwarts, Mr. A. H. Gal and Mr. H. W. Newton, who, as usual, were the life and soul of the function, and who at its conclusion made some extremely complimentary and encouraging remarks to the prize-winners and their friends. The shooting was generally of a high order. The champion this year is Mr. Musgrave of the Middlesex Gun Club. There were 38 competitors, and the score of the winner was 29 out of 30, which shows the superior quality of the shooting.—Exchange.

TRADE NOTES.

The Topps Still At It.

Venetians were treated to some of the finest examples of marksmanship that have ever been seen here when a number of crack shots met at the Venice Gun Club September 15. Among those who took part in the events were Mr. and Mrs. Adolph Topperwein, who each demonstrated the value of a well-known arms manufacturing company's weapons; Will Wright, Bob Bungay of Ocean Park and Harry Hoyt of the Winchester Arms Company; E. L. Mitchell of the Tufts-Lyons Company, and others were present.

Mrs. Topperwein made high score in shooting clay pigeons, breaking 25 birds straight. All the shooters except Mr. Topperwein, took part in this event.

Then followed fancy shooting by Topperwein and his wife. A dozen marbles of ordinary size were thrown into the air by Topperwein and with a 22-calibre rifle Mrs. Topperwein hit every one of them. The last marble thrown was unusually small. The noted pair of crack shots demonstrated the expert use of shot guns and rifles manufactured by the Winchester Company. They made use of every type of rifle from the 22-caliber up to the largest rifle made by the company. This model is used for big game and is automatic. A shot was fired by this gun at a can of tomatoes tossed in the air. The soft-nosed bullet passed through one point in the can making a clean hole, the contents disappeared in a cloud of reddish colored spray, the deadly effect of the impact mushrooming force of the bullet was shown when what was formerly the can was picked up in the form of a flat piece of tin.

Topperwein held a playing card in his hand with the edge toward his wife, who cut it in two with a bullet from a pistol. Topperwein also held other small articles which were shot with a rifle from his hand by his wife at a distance of 50 or 60 feet.

Selby Loads Won Everything.

At the three-day tournament of the Arizona State Sportsmen's Association, September 22, 23 and 24, with the exception of two shooters every contestant used Selby factory loads.

This long tried and found reliable ammunition is just as good for duck and field shooting, as it is efficient at the traps.

Peters Points.

At Williamsport, Ind., September 15th, Mr. H. W. Cadwallader won high general average 188 out of 200, and at Tab, Ind., on September 14th, he was second professional, 143 out of 150, using Peters shells at both points.

At Red Hook, N. Y., September 14th and 15th, Mr. Neaf Apgar shooting Peters factory loaded shells won second general average, 282 out of 300.

Drink Jackson's Napa Soda.

AESTHETICAL ACCOMPANIMENTS OF RACES.

So far as the public is concerned attendance upon races is inspired chiefly out of the desire for rest, recreation and wholesome sport. This is eminently the case with light harness horse contests. Not one race-goer in a hundred who visits the trotting tracks has any purpose of making or turning a dollar, it is safe to say. This being the case those who would seek the patronage of this class of persons find a ready cue to be employed in bringing them out. Convenience and comfort, as insisted upon so commonly and largely, both in reaching the place where the entertainment is to be given and in the provisions made for the time to be entertained are evidently of primary and vital concern. But a matter almost equally important, though much less talked of or thought of pertains to what may properly be termed *aesthetical accompaniments and surroundings*. The love of the beautiful and artistic and harmonious found in modern cultivated people is to be most carefully considered and provided for in every manner possible. This is what is done at every seaside, mountain resort, Chatauqua, theater, secret society hall, club house, room or grounds, everywhere where general public patronage is solicited, and expected. Every device is employed to add to attractiveness and to produce artistic effect, and to pander to taste and fancy and even to the whims of the great general public.

But very remiss in this, in many regards, the majority of fair and racing societies have been. They have depended almost solely upon the interest to be created by the contests themselves to hold and please and continue to draw out paying patronage. And it is truly marvelous, all things considered, how large the success has been and continues to be all throughout the States where refinement and cultivation have reached their highest acme. But as long as more might have been, or might yet be attained than has been, easy contentment and placid satisfaction should not be allowed to settle managements down upon their "lees," and put them into a quiescent state in which progress becomes an indifferent matter, and the best possible not the aimed at things. As long as there is room for improvement the only right and safe thing is to pursue it to the uttermost. And an entire revolution should be the least stopped with in transforming the entire surroundings and effects of the harness race meet. First the grounds, buildings, track and the entire setting should be made over with the strictest regard to what is artistic and pleasing to the people knowing what art is in every feature belonging to it. The grounds and buildings and all appointments ought to be equal or superior to the finest park, electric or otherwise, that has been devised and created. Then the persons in charge should be distinguished in dress, manners and general appearance and bearing to an extent making observable at once that it is a place where prosperous, cultivated and highly refined people are expected, controlling and sought. Last and crowning all, the entertainers, including horses, drivers, caretakers, owners, and all paraphernalia should present the most attractive and beautiful appearance in the range of the possible. And right here in the last mentioned feature is the point where greatest fault has hitherto rested and where occasion for keenest criticism now rests. When the hell sounds the call for the performers to appear on the track, as is too well known, in place of a brilliant and imposing pageant coming out of finely harnessed and bedecked horses and carts, and drivers clothed uniformly in colors easily distinguishable, and grooms and caretakers and owners habilitated in garments bespeaking good pay and large property and high respect for the occasion, a very different sight is witnessed. One outfit after another straggles upon the track with nothing to show whether a work-out or a racing combination till time to line up for the word arrives. With very many harness, sulkies and blankets are evidently regarded as wholly indifferent concerns to anybody, and the more uncouth the outfit the better some owners seem to view it. As for drivers and their uniforms, the average race shows up a motley set of reinsmen dressed in clothing ranging from jockey suits to the garments worn by old-fashioned hay-seeds in the fields, or the seedy clothing worn by the cheapest work hand doing the hod-carriers stunt, or tramp that visits the back door. Hats there may be quite different in style, but ranging from a neat cap to the old slouch, cast-off looking head gear of the corn chopper, or the himless remnants of the chip. Coats, or no coats, as it happens, but having no more suggestion of a race company than of a barn raising; gloved or ungloved hands absolutely indifferent. As to caretakers it seems sometimes that the rougher and tougher, and the more hideous the gang following a horse can make themselves appear the better satisfied they are that they will be known as swipes and stable touts. Even owners will show up in working garb or thread-bare homespun as though the game was tough, the luck hard, and the end at the alms house not far off. Now this is not extravagant speech, but is descriptive of what is not infrequently actually seen. And people who live and dress well, and have liveried servants and grooms, and chauffeurs, out for pleasure and the gratification of their fancy for things artistic and beautiful and nice to look upon, are expected to pay for the privilege of gazing for three or four hours at a mob of this sort posing as performers in the entertainment advertised as high-class. It ought not so to be and must not continue thusly if step is kept with advancing civilization which becomes more aesthetic, whether more ethical or not, and will not support things cheap and shoddy and ill-kept and inartistic and unattractive in appearance. Insistence as far as drivers are con-

cerned should be made at once that never shall they be permitted to appear but in caps and suits, and gloves, with colors corresponding to what is printed on the program, so that they may enable onlookers to recognize them in the field and race throughout. If not supplying themselves, then should societies furnish them and exact their employment in every race. The effect alone would pay aside from any question of convenience to the spectators. But the whole occasion needs elevating and improving from this point of view and the sooner done the better. The American people are fast becoming one of good clothes as well as of good manners, and breeding and intelligence, and can not be pleased and edified with things grotesque and hideous and coarse and clumsy and unfitting. Pleasurable recreations and engagements of all sorts suggest and demand the aesthetic, and must have it, or the turn will be elsewhere to something else.

BILLY BURK AND THE FOUR-YEAR-OLD RECORD.

At Nashville, Tenn., on October 18, 1893, John Kelly drove the black stallion Directum to the world's record for a four-year-old trotter of 2:05½. The next day the papers of the country spread the news broadcast and stated that the great stallion had set the record so low that it would be many years before it would be equaled. Since then many records have been broken and rebroken, but the 2:05½ established by Directum has never been touched by a four-year-old trotter.

Since that memorable performance stallions that have appeared the most prominent as four-year-olds are The Harvester and Billy Burk. It was thought that without a doubt Ed Geers would drive a new spike in the record column and hang the name of The Harvester over that of Directum, but time slipped by and the great son of Walnut Hall and Notelet was a five-year-old before he trotted faster than the record set by Directum in a regular contest. During work-out miles Mr. Geers had driven The Harvester seconds faster than 2:05½ but for some reason or other the Uihlein colt did not succeed in the task he was capable of doing.

Again this year Mr. Geers seemed rather reluctant about letting The Harvester extend himself sufficiently to separate Creseus from the stallion crown which he wore for several years. It is true that The Harvester trotted fast miles at Detroit and North Randall; but had it been Mr. Geers' desire The Harvester could have lowered Creseus' record of 2:02½ at Cleveland with less exertion than was exercised at Fort Erie when he trotted in 2:02.

Of this year's crop of four-year-old stallions it looks as if Directum's record is to be beaten it will be Billy Burk that will do it. In the fourth heat of his race at Kalamazoo early in the season, Billy Burk trotted in 2:06½, equalling the world's record for a similar performance. That race coming early in the season took so much out of the colt that he has not been on edge until this week. In his race Wednesday at Syracuse, when he won the Empire State \$10,000 Stake from Hallworthy, Joan and others, Billy Burk showed his real form and he is expected to improve steadily until the season closes.

J. Howard Ford, owner of Billy Burk, and Ed Benyon, who trains him, would like to try for the four-year-old record if the right conditions for such a trial were to be had. They would both like to make the effort over the North Randall track, and have expressed themselves to that effect. Now that a field day is to be given at North Randall on October 1, it seems probable that Billy Burk will be shipped there from Columbus to try for this record.

UKIAH DRIVING CLUB.

A successful matinee was held by the Ukiah Driving Club at the half mile track near that city on Saturday afternoon, September 17th. Between three and four hundred people paid to see the sport and were greatly pleased with the manner in which it was conducted and the excellent contests.

The first race was between H. O. Bower's Prince B. and Fred Handy's Alex Direct Wilkes—trotting, half mile heats, best two in three. The race was won by Wilkes. Best time was 1:30.

In the second race—trotting, half-mile, three in five—Dr. Crittenden's Whisper took the first heat and Dr. Rea's Maxine the next three. The best time was 1:20.

The third event for pacers, was won by Rose Thorn against Dolly W. and Merry Mack. It was scheduled to be a mile event but was cut to a half mile—three heats. The best time was 1:09½.

Bingara, the handsome son of Bingen 2:06½, and Liger 2:27½, by Arion 2:07½, second dam Ollie K. 2:12½, by King Wilkes 2:22½, is now only 9 years old, and is the sire of 24 in the list. Amongst these trotters, Benear, a yearling with a record in August of 2:27½, is conspicuous, and besides Benear there are 13 two-year-olds and Binvol 3) 2:09½, Bisa 2:10½, and Belvasia 2:12½, one half-mile track. Belvasia, now 4 years old, has won on half mile tracks twelve consecutive races—a great record. Birri 2) 2:28½, now 6 years old, is Bingara's first producing daughter, being the dam of Kalavia 2) 2:31½. Binvol 3) 2:09½, is Bingara's oldest son and he is now the sire of Benzeni 1) (his only foal of that age), that has already in August trotted one-eighth in 19 seconds, which is at the rate of 2:32 to the mile.

Drink Jackson's Napa Soda.

AN OFTEN OVERLOOKED DETAIL.

One of the little things connected with the giving of a race meeting perfect in all its details is a score card which will be to the patron of the race track what the program is to the theater-goer. Few score cards do this, and too many of the men connected with the management of prominent racing associations have a due appreciation of the annoyance an imperfect card causes the patrons of the racetracks. The Spirit of The West calls attention to this subject when it says: "It would seem that the time would come when it would appear to be needless repetition to insist upon the publication of score cards by racing societies complete in all necessary details. But repeated failures to do so by managers evidently desiring to do any and everything furthering the interests of their racing occasions suggest that attention and insistence upon the matter are still much needed. A program recently issued that was very neat and clear in all features but one, suggests the detriment one item left out may be. This program gave the name of the horses, sex, the owner and his address, the driver and color worn, but omitted to name the sire of the performer, one of the highly important matters alike for awakening the interest of onlookers, educating them in a line to insure them as future patrons, as well as to render the program worth preserving for those who have no other record of the event. The other items are all important and helpful to the spectator to watch the race and keep track of the horses starting, and the matter of the sire producing them is the vital concern from the breeding standpoint, which is the one that first of all should be considered. It is the pedigree viewpoint which practical horsemen look to in every field of horses and racing contest, and that alone will ever develop an intelligent race-going public. Persons who attend races and see only a certain number of unknowns go around a track once or twice and come out in different positions never evolve any enthusiasm in their own make-up, or inspire it in others. But those who come to look upon a field of horses as representative of rival tribes aspiring to supremacy, and every animal as a combination of blood with a peculiar interest because of what enters into him, will see much more than a figure or machine at work and will eventually be seeking to know deeper and further on all matters having to do with the production of trotters. For this reason pedigree should be made more prominent rather than less so by previous write-ups and announcements advertising a set of races, and eminently on the occasion when brought off, in the program put in the spectator's hands. It is one means also of bringing out and interesting all owning and breeding animals of the same or near akin families. It makes a big difference when it comes in the direction of home with almost anyone engaged in the horse line, and if horses are programmed with breeding at all touching what is owned, there is a source of attraction else would not exist. So for varied and numerous reasons, breeding should be shown on programs as fully as space permits."—Horse World.

VACCINE FOR FISTULA AND POLL EVIL.

It was announced from the Colorado Agricultural College a few months ago that the preparation of a vaccine from the germs that cause the suppuration in fistula and poll evil had given great success in experimental trials. It is found that not only will this vaccine effect a cure in over 95 per cent of the cases of fistula and poll evil, when used by competent men, but it is useful in pus formations following nail pricks, wire cuts, or injuries of other kinds. Quittor also yield to its effects. The chemical substance contained within these germs stimulates the cells of the body (when introduced into it) to build up or form a substance that makes it impossible for the germ to live in its presence. The pus decreases and becomes thicker, the wound finally dries, and healing goes on uninterruptedly. A vaccine made from the germs that cause distemper in horses affects a cure in a very few days, and if given at the initial stage of the disease, without pus formation.—Breeder's Gazette.

The San Bernardino Index says: George H. Parker, the well known horse trainer of this city, has returned from Bishop, in Inyo county, where he has been for several months past working and driving race horses, bringing with him a string of classy horses which he will work either here or in Los Angeles. Aside from his own string, which included some exceptionally good steppers, he brought back with him Inyo Boy, a green trotting horse owned by J. B. Collette of Bishop, a horse that it is thought will make a name for himself in the trotting world. Another of the string is Ben Hall, a green pacing stallion, owned by George W. Garner, formerly well known here but for some time a resident of Round Valley, Inyo county. Ben Hall also gives promise that is very encouraging. Then there are two colts, one a yearling and the other a two-year-old, that are showing very good form and are owned by W. W. Yandell, county assessor of Inyo county. These, in addition to Mr. Parker's own horse, give him about all that he can handle. The trip here from Bishop was made overland across the desert, a distance of nearly 300 miles through one of the hottest portions of the state, yet notwithstanding the horses all arrived in good condition, and after a short rest will show no effect of the hard trip. It is probable that Mr. Parker will keep the string here for some time, then going on to Los Angeles, when the new track there is completed and ready for use.

THE FARM

CONCRETE NOTES.

Concrete beams, and any concrete with a span of over 4 feet, should be reinforced.

Build concrete fence posts in a warm shed or in the basement during the winter. They will be better for the weeks of seasoning.

Never apply cement or concrete to a dry or foul surface. Clean and dampen the surface, and if necessary, roughen it.

Use clean water and clean ingredients. Mix thoroughly and put into place once. Do not guess at measurements and proportions.

Concrete yet in the plastic state must be handled with care. It should be well aged before handling and well set before removing the forms.

For sidewalks and floors use a tamper with a base 10 or 12 inches square, and tamp gently till the water appears on the surface.

Concrete houses will be damp until the concrete has well seasoned. The hollow wall will make a dryer building, warmer in winter and cooler in summer.

Never use cement that has once set. Throw it away or crush it up to be used as aggregate. Never patch concrete if it can be avoided—patch work will sooner or later be seen or become defective.

Cement must be kept perfectly dry. When storing be sure that dampness from the ground or otherwise does not reach it. If exposed for a period in damp weather, cement will absorb moisture from the air and be injured.

When making blocks in the open air,

cover the finished blocks with some light cloth to protect them from the air currents and the sun. Never fail to keep the green block moist—let the spraying resemble a mist.

Foundations should become well seasoned and set before the weight of a wall or superstructure is placed upon them. The walls also should be well seasoned before the weight of roof or other parts of the superstructure is put on them.

If the joints between concrete blocks in a building are not pointed up, the rain falling on the outside may enter at the joints. Wash down the monolith walls with waterproofing. Place a waterproofing substance—tar felt or paper—on the foundation to prevent the moisture from penetrating upward into the walls from the ground or basement walls.

Concrete will not give satisfaction if poorly made. It is not "fool-proof," and while expertness is not altogether necessary in the ordinary farm uses, it still requires judgment and some knowledge of workmanship. Care and vigilance are necessary in order to obtain good results. Cheap labor may mean an expensive structure. Unless you know cement, get some one who does until you learn it.

Mixing platforms should be watertight. It is well to cover the working side with galvanized iron or sheet metal of some kind. Some prefer to have the ends of a platform sloping upwards and sideboards 6 inches or 1 foot high, with rounded corners, thus making a box of it somewhat after the shape of a flat-boat. Six feet wide and 8 feet long, or 8 feet square is a convenient size for small hatches for farm uses.

Fresh concrete should be protected from the weather—hot and dry or the cold. Weather cracks (fine hair cracks),

The Most Perfect Colt Bit Made

EVERY COLT

Should wear the **ELLIS IMPROVED HUTTON PATENT CHECKING DEVICE** from the very beginning of its training, as it is the easiest, most comfortable and most humane bit on the market. With its use the colt will not fret, worry, pull, toss its head and get into the bad habits so often caused by the use of other bits and checking devices that inflict punishment or keep it under too much restraint, and at the same time you will have absolute control over it at all times.

Patented Aug. 11, 1896. Patent No. 565,631

BEWARE of worthless imitations and Checking Devices claimed to be as good as the **ELLIS IMPROVED HUTTON PATENT CHECKING DEVICE**. Illustrations of some of these check bits and devices are made to look as near like the genuine as possible, but the article itself is very different, and will not give the same results.

ALL GENUINE are stamped **G. S. ELLIS & SON** on the supporting strap and back part of Check Rein. Any that are not so stamped are not genuine.

FREE—Our new Catalogue No. 45, with wholesale discount sheet, the largest, finest and most complete Horse Goods Catalogue ever published, is ready for distribution. It contains illustrations, descriptions, and guaranteed to be lowest prices on Harness, Horse Boots, Horse Clothing and Tack Goods of every description. Every horseman should have a copy. You can save many a dollar during the season by buying direct from us, as we are now selling direct to horsemen, allowing them from 30 to 50 per cent discount from retail prices. Write us today for a copy and we will take pleasure in sending it to you all charges paid.

Pacific Breeders Futurity Stakes No. 11

To be given by the

Pacific Coast Trotting Horse Breeders Association

For Foals of Mares Covered in 1910 to Trot and Pace at Two and Three Years Old.

Entries to close Thursday, Dec. 1, '10

\$4250 for Trotting Foals. \$1750 for Pacing Foals.

\$800 to Nominators of Dams of Winners, \$450 to Owners of Stallions.

MONEY DIVIDED AS FOLLOWS:

\$3000 for Three-Year-Old Trotters.

200 for Nominator on whose Entry is Named the Dam of Winner of Three-Year-Old Trot.

1250 for Two-Year-Old Trotters.

200 for Nominator on whose Entry is Named the Dam of Winner of Two-Year-Old Trot.

100 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot when Mare was bred.

\$1000 for Three-Year-Old Pacers.

200 for Nominator on whose Entry is Named the Dam of Winner of Three-Year-Old Pace.

750 for Two-Year-Old Pacers.

200 for Nominator on whose Entry is Named the Dam of Winner of Two-Year-Old Pace.

100 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when Mare was bred.

SIX SPECIAL CASH PRIZES FOR STALLION OWNERS.

Given to Owners of Stallions standing highest in number of Mares nominated in this Stake that were bred to their respective horses, divided as follows:

1st Prize, \$100.

2nd Prize, \$50.

3rd Prize, \$35.

4th Prize, \$25.

5th Prize, \$20.

6th Prize, \$20.

The Above Prizes will be Paid on December 24, 1910.

ENTRANCE AND PAYMENTS—\$2 to nominate mare on December 1, 1910, when name, color, description of mare and stallion bred to must be given; \$5 May 1, 1911; \$5 October 1, 1911; \$10 on Yearlings, May 1, 1912; \$10 on Two-Year-Olds, January 2, 1913; \$10 on Three-Year-Olds, January 2, 1914.

STARTING PAYMENTS—\$25 to start in the Two-Year-Old Pace; \$35 to start in the Two-Year-Old Trot; \$35 to start in the Three-Year-Old Pace; \$50 to start in the Three-Year-Old Trot. All Starting Payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Colts that start at two years old are not barred from starting again in the three-year-old divisions.

For entry blanks and further particulars, address the Secretary.

CONDITIONS:

The races for Two-Year-Olds will be mile heats, 2-in-3, and for Three-Year-olds, 3-in-5. Distance for Two-Year-Olds, 150 yards; for Three-Year-Olds, 100 yards. If a mare proves barren or slips or has a dead foal or twins, or if either the mare or foal dies before May 1, 1912, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries, the name, color and pedigree of mare must begin; also the name of the horse to which she was bred in 1910.

Entries must be accompanied by the entrance fee. Nominators liable only for amounts paid in. Failure to make any payment forfeits all previous payments. This Association is liable for \$7,250, the amount of the guarantee, only. Hopples will be barred in trotting and pacing divisions.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors. Money divided in each division of the Stake 50, 25, 15 and 10 per cent. There will be no more moneys in each division than there are starters. Entries open to the world. Membership not required to enter; but no horse, wherever owned, will be allowed to start until the owner has become a member.

E. HEALD,
President.

which often appear upon the surface of concrete, can frequently be prevented by keeping the concrete dampened and shaded from the sun for a week. A very rich mixture of mortar or concrete is more liable to these weather cracks than a lean mixture. If well made concrete blocks are kept moistened for a week after making and are then submerged in water for twenty days, crazing is not likely to appear.

Concrete is not everlasting. A good concrete may last for an age, or for ages, but many of the concrete structures now being built will crumble long before many of their most ardent admirers realize. Too much depends upon the quality of the "ingredients"—cement, sand and stone, and upon the method and manner of building, mixing and placing, as well as upon the climatic and other conditions, to say that, ordinarily, concrete has the longevity that some give it. Generally speaking, however, good concrete is as enduring as the most lasting of building materials.—Curtis Hill, State Highway Engineer of Missouri.

THE MEAT PROBLEM.

The American meat eaters who have made threats, idle threats, to eliminate meat from the hill of fare will find that they have considerable company while complaining of high prices. Many European countries, even some of them which eat horse meat more from necessity than choice are facing a meat famine. The London Meat Trades Journal in discussing the above situation, says:

In Austria the situation has become so alarmingly serious that the government has decided to admit imports of meats from Roumania and Serbia, and cattle and swine of unquestionable origin from Italy. Holland and France, but more than all that they have agreed to allow the importation of Argentine meat for test purposes. This would appear to be the only available source open to them for immediate relief, as neither Roumania or Serbia have any thing like their usual surplus stock to draw upon, while of the other countries named, France and Italy have for some time past been suffering from a serious shortage in cattle and sheep. In the latter country indeed arrange-

Every page is of practical utility and written by a noted authority, and the work, as a whole, is acknowledged by every owner to be the finest in illustration and printing and the most valuable and practical Dog Book ever published, either here or abroad.

THE NEW BOOK OF THE DOG

EDITED BY ROBERT LEIGHTON,

Assisted by forty eminent authorities on the various breeds in two superbly illustrated volumes. Some notable contributors: Walter S. Glynn, W. J. Stubbs, Robert Leighton, F. S. Hignett, George S. Low, Frederick Gresham, Colonel R. Claude Cane, Major S. P. Borman, W. Gordon Stables, E. W. H. Blagg, Desmond O'Connell, Lady Algeron Gordon-Lennox, Captain W. Wilmer and many others.

THE SECRETS OF SUCCESS IN DOG-KEEPING.

Quarto, with 25 full-page plates in color and over 600 magnificent illustrations of famous dogs, printed on heavy plate paper throughout and handsomely bound in red silk cloth and gold. Size of each volume, 9x11 1/4 inches. Every important breed is here fully illustrated and described in about 90 individual chapters, and the secrets of success in dog-keeping are here given in full. We want you to judge for yourself the practical money-making value of the great articles on Breeding, Selling, Feeding, Exercise, Kennels, Diet, Management, Whelping, Canine Medicine and Surgery, Rules for Prescribing, How to Recognize Symptoms, the Proper Time to Administer Medicine, Instructions for Simple Surgical Operations, etc., etc. These are but a few of the hundreds of important topics discussed. You will quickly agree the work is worth very many times the price.

SPECIAL OFFER TO READERS OF "THE BREEDER AND SPORTSMAN."

We want you to see and examine this great work for yourself. The price is \$11.00. Send us the Coupon, Inclosing \$1.00, and we will forward the books to you carriage prepaid. Keep them five days. If you do not want them notify us and hold them subject to our order. If you keep them, pay us the balance \$1.00 a month until settled in full.

Cassell & Company,

periods give a lower per cent of fat.

A large flow of milk is generally associated with a low per cent of fat, while a small flow gives a higher test.

In most cases heifers with their first calves did not show so high a test as they did at a more mature age.

The per cent of butter fat did not seem to be changed by the food ration given.

In order to show the value of a dairy herd and its members, it is necessary to keep a milk and butter fat record of each cow from year to year. Such a record will show great variation in the value of the animals and will serve as a guide in building up a herd.

The cows varied from year to year in their butter fat production. The good cows were inclined to give large yields year after year, while the poor ones were in nearly all cases low.

National Telegraph Inst., Cincinnati, Philadelphia, Memphis, Davenport, Ia., Columbia, S. C., Portland, Ore.

TO THOROUGHBRED HORSE-OWNERS. FOR SALE AT A SACRIFICE.

First six volumes of Bruce's American Stud Book, practically unused. Cost \$10 per volume. Hard to get.

Two volumes of American Horse Breeders' Guide and Hand Book, with 100 tabulated pedigrees of leading stallions (work now out of print).

The American Thoroughbred, by Capt. Thos. B. Merry.

Two volumes Goodwin's Turf Guide for 1907. Cost \$12.

About 50 thoroughbred catalogues, including Rancho del Paso, Palo Alto, Ranocas, McGrathiana, Nursery Stud, Marcus Daly and all the great stock-farms of the country. These are handier than a studbook, because they are tabulated.

Price, \$60 for all these works.

Address **F. W. KELLEY**, 360 Pacific Building, San Francisco, Cal.

KENDALL'S SPAVIN CURE

The world-wide remedy. Once used, always used. Cures Spavin, Splint, Ringbone, Curb, Swelling, Lameness.

\$1 a Bottle; 6 for \$5.

All Druggists. Get free book, "Treatise on the Horse."

DR. B. J. KENDALL, CO.
Enosburg Falls, Vermont

It was found that as a rule the variation in milk flow in individual cows from year to year was due to length of lactation and rest before freshening. A long lactation period favors a larger milk production, also a long period of rest before freshening brings the same result.

FUTURE FOR BREEDERS.

What's the matter with the livestock breeding business? Nothing, thank you. It is true that the market prices for cattle, sheep and hogs to be used for human food have reached a point that almost equals the prices at which fine breeding stock has sold. It is true that for this reason much really fine stock has been marketed for slaughter. But the present situation means this:

That the demand for thoroughbred stock for breeding purposes is going to be greater than ever. Why? Because the market demand for all meat products is going to be well sustained and at relatively high prices for many years to come. Therefore, it behooves breeders and experts to bend every effort to the increase of their flocks and herds and the further improvement of their animals. Still more essential is it that farmers and stockmen who heretofore have been content with scrub stock or ordinary animals shall now buy only the best animals with which to grade up their herds. If good stock had universally displaced poor animals years ago how vastly would farmers have increased their profits.

The so-called average farmer has become habituated to inferior livestock. The average cow of the average dairyman "eats her head off." We need to break up the habit of getting along with such poor stock.—New England Homestead.

Up in Canada, where they raise little corn, the farmers produce—by feeding peas, clover, and alfalfa—some of the finest pork that is seen on the English market.

Remove milk from the stable as soon as it is drawn from the cow, and strain and cool as soon as possible. A pail of milk standing in the stable for a few minutes will absorb odors for spoiling it.

LANCASTER KING

Winner of first prize at California State Fair 1910. Owned by J. H. Glide, Dixon, Cal.

BARB WIRE CUTS.

More good horses have been ruined or blemished from the introduction of barb wire than from any other cause. When a horse gets his foot over a wire, instead of trying to avoid injury to the leg, the animal will struggle violently.

The wounds made by barb wire are always infected, so that healing takes place by the formation of granulation tissue. This being the case the wound sometimes heals too fast and a large tumor forms. The skin can not grow over this tumor, and a raw, bleeding surface remains. The common locations of barb wire cuts are in front of the hockjoint, below the fetlock, along the canon bone across the breast. Wire cuts in front of the hockjoint are often very serious, the wound usually extending through the tendons and into the joint.

Careful Treatment.

In treating a wire cut, the wound should be kept absolutely clean and exposed to the air and sunshine. When the wound starts to heal, it should not be irritated by washing the raw surface or by removing scabs which have formed. Liquid disinfectants are best applied by allowing the fluid to be poured onto the raw surface, not by rubbing the wound with cotton saturated with the disinfectant.

Follow this disinfection by covering the wound with some good healing powder that is both astringent and disinfectant. Should the wound heal too fast, use some form of caustic to remove the excessive granulation tissue.

C. L. BARNES,

Colorado Agricultural College, Fort Collins.

ments are actually in progress for the admission of frozen meat on a large scale for the army. With regard to Holland, its comparatively moderate resources have already been liberally exported to Germany and England.

But it is not in Austria alone that the shortage of meat and consequent high price has produced a state of affairs than can only be described as alarming. We find in Germany conditions almost similar, indeed to such a pass have things come that we read in the Butchers Guide of Silesia has made a personal appeal to the emperor, praying him to use his influence to secure the importation of foreign meat. All these facts have an important bearing upon the question of our own future supplies, and it needs no great stretch of imagination to picture what would happen if a large share of the Argentine and Australian meat exports went to continental ports instead of London and Liverpool.

This condition of affairs should stimulate every farmer and stockman in the United States to an energetic effort to not only regain the loss of hogs, cattle, and sheep during the past few years, but to increase the number to at least double within the next five years. It looks now as though we had about concluded to cash in and quit just as a silver lining makes its appearance in the clouds of what we regard as uncertainty.

SOME FACTS ABOUT MILK FAT.

The Nebraska station has been rather extensively engaged in the study of dairy questions during the last decade and as a result of that study some interesting deductions have been made pertaining to the variation of per cent of fat in milk.

The station for example has found that short lactation periods result in a high per cent of fat, while long

ABOUT CHURNING.

Many people have a lot of unnecessary trouble about churning. I churned an hour, says one. I churned two hours yesterday, says another. Ask almost any dairy woman how long it takes her to churn and she will probably reply, Oh, about an hour, I reckon.

Now by way of experiment, I have myself churned several times recently and it rarely took me more than fifteen minutes. Some people tell us they can churn in ten minutes or even eight, and I believe it. Unless there is some bad management or unusual condition, the common time for churning ought not to exceed fifteen minutes.

The great point is to know your business and have the milk at proper temperature. About 60 degrees with other things equal ought to give you butter in ten minutes or at the outside in fifteen. If you can't get at the temperature otherwise, buy a dairy thermometer for 35 cents and it will tell you.

Of course if you mix all kinds of cream together, or have the churn too full, or the cream too sour or too sweet, or too hot or too cold, or if the cow is in an advanced stage of lactation, it may take you a longer time to churn, but all such conditions should be gotten over by better management.

No invention of recent years has proven more popular among farmers than the separator. Its use is not confined to those farms where large herds are kept, but we find them here and there and everywhere. The man who keeps but three or four cows is as likely as not operating one and thinks he could not get along without it. Occasionally a person thinks it a lot of money to pay to get his cream separated from milk, but on most farms they are looked upon as a good investment. Certainly they are doing away with a loss of no small proportions which invariably follows the use of most of the other systems of creaming. Yet we occasionally find milk set in open pans even now. If

those who follow this practice could actually see what they are losing in butter fat they might, and very probably would, be astonished. Yet because the loss is not visible it is allowed to go on. A test of the skim-milk should be made by means of a Babcock machine. This is a truth-revealer and usually an eye-opener to the loss going on.

AUSTRALIA LEADS IN SHEEP.

Australia leads the world in sheep farming, according to the following statement, prepared by Vice Consul Henry D. Barker of Sydney, showing the number of sheep in the countries leading in this industry: Australia, 87,043,266; Argentina, 77,581,100; Russia, 58,510,523; United States, 54,631,000; United Kingdom, 30,011,833; New Zealand, 22,449,053; India, 18,029,181; France, 17,461,379; Spain, 16,119,051; Cape of Good Hope, 14,848,795; Uruguay, 13,015,796; Italy, 10,877,000; Austria-Hungary, 10,743,707. The estimated capital value of the Australian flocks is \$220,352,400, and the annual gross output of the flocks is estimated at 75 per cent of the value.

China will no longer permit the exportation of live cattle and beef, as the authorities claim that the cattle are needed as working animals, and that the exportation of sheep will severely retard the development of the country. The maritime province of Siberia will be greatly inconvenienced by the embargo, as it does not raise enough beef now to supply the demands of the army. Australia will doubtless have an opportunity to resume her trade there, as that country supplied Siberia before the trade turned to China. Uncle Sam, however, will be glad to furnish such canned meats as that country may need, if it has the price.

Do not forget that fowls need a dust bath occasionally. If the ground is hard in the runs, dig up fresh earth and place coal ashes within their reach. The dust bath helps fowls get rid of lice.

THE KIND OF HOGS TO RAISE PROFITABLY.

You may be making money out of your hogs, but you might easily make more. The last season has been a profitable one to those of us who have raised hogs for the market, and that is the reason why you should at this time continue the raising of hogs. Hogs and feed have not been so desperately far apart that one was almost compelled to blindfold himself before feeding time, so as not to notice the pile of grain going down or how much the hogs were eating. Ordinarily one throws grain to hogs and from love of the business, stands by and watches the young fellows clean it up, but when grain is dear we are apt to throw sparingly and hustle away to more congenial occupations and we lose interest in the feeding of hogs. For this very reason the subject of this article is laid before you.

Now don't think I am going to suggest that you raise only Berkshire, or Poland Chinas, either of these are good, but don't try to raise both. I would not even suggest O. I. C. or Jersey Reds, either are good, but don't raise both. Get full blooded something; one of the breeds you are most liable to like, and get rid of everything else. If you are a lover of red, get red hogs of the best you can find, put up the red sign and stay with it; but for goodness sake and for the sake of your pocket book, don't imagine you can get better feeders by cross-breeding. Experience is the great teacher which says that the straight, full blood is far less expensive, are easier kept growing, fattened younger and the particular point is, you learn to like them and when this is done a great deal is already accomplished. The kind treatment they will receive goes a long way to the relief of the grain bin. The sow that expects a club instead of an ear of corn, if a strict account is kept, will prove unprofitable to any man and I don't blame her. Do you? I experimented with seven kinds of full bloods at one time and from these seven kinds I selected the one that suited me exactly and disposed of all others. Now, I know it would do you good to look on what I have. Not because of the particular kind that I chose, but because I like them and they like me, so we're good friends and that cuts more of a figure than many of us are wont to acknowledge. I have heard men say they "hate hogs" and yet are raising hogs, not full bloods, however, and mark you they are bound to lose money to such a man.

Get the kind you like, then like them. Always keep them full blooded, then they will be tame instead of running off two or three pounds of flesh getting out of your way every time they see you coming. Select only the best for breeding purposes, sell some of the good ones to your neighbors who are always willing to pay more than you get from the butcher, ship all culls and scrubs out of the country and don't use them for breeding purposes nor let any one else have them for this purpose because it's bad for you and bad for the one who gets them. Try it, there is where the profit is. —A. F. Roe.

Ducks and geese are very valuable fowls and are too seldom found in the barnlot. Where room is available these birds will add to the income of the farm. Give them room on your farm.

Fruit growers know the value of poultry in keeping down obnoxious insects which prey upon fruit trees. Sow a cover crop in your orchard and allow the fowls access to it. They will destroy thousands of insects for this courtesy.

Thousands of dollars are lost annually on scrub poultry. There are so many reasons why thoroughbred fowls should be kept and so few reasons for keeping scrubs that it is difficult to understand why farmers permit scrubs to stay on their farms. The farm must be profitable, indeed, to stand this loss.

Let the cream fully ripen before churning, and never add new cream to old. The right temperature for cream for churning in warm weather is about 56 degrees Fahrenheit, and a little above 60 degrees for cold weather.

Score of 100 Straight from 19 yards.

At Chicago, Ill., June 23, 1910.

Mr. Riley Thompson of Cainsville, Mo., made this record, which has never before been equaled in this classic event.

The PARKER GUN in the hands of Mr. Guy V. Deering, also won the Amateur Championship at Chicago, June 24, scoring 189 x 200, shooting at 160 singles and 20 doubles.

Quinn's Ointment

Will Make A Horse Over;

will put sound legs under him and will save him from the cheap hawk and trader. It is the standard cure for Spavins, Curbs, Splints, Windpuke and all the various lumps and bunches of like kind. Keep it always on hand and you will be prepared when trouble comes. Leading horsemen everywhere know it and use it.

Mr. H. H. Clark, Fredonia, N. Y., writes: "The bottle of Quinn's Ointment purchased from you about two years ago removed a curb and thoroughpin and did it for good. My horse's leg is as smooth as ever."

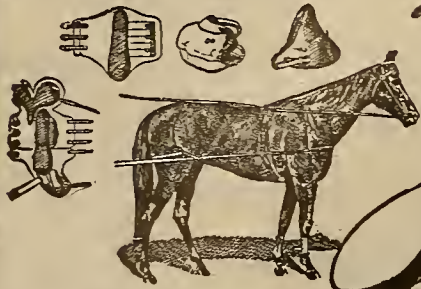

Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write for circulars, testimonials, etc.

Pacific Breeders Futurity Stakes No. 11

To be given by the

Pacific Coast Trotting Horse Breeders Association

For Foals of Mares Covered in 1910 to Trot and Pace at Two and Three Years Old.

Entries to close Thursday, Dec. 1, '10

\$4250 for Trotting Foals. \$1750 for Pacing Foals.

\$800 to Nominators of Dams of Winners, \$450 to Owners of Stallions.

MONEY DIVIDED AS FOLLOWS:

\$3000 for Three-Year-Old Trotters.

200 for Nominator on whose Entry is Named the Dam of Winner of Three-Year-Old Trot.

1250 for Two-Year-Old Trotters.

200 for Nominator on whose Entry is Named the Dam of Winner of Two-Year-Old Trot.

100 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot when Mare was bred.

\$1000 for Three-Year-Old Pacers.

200 for Nominator on whose Entry is Named the Dam of Winner of Three-Year-Old Pace.

750 for Two-Year-Old Pacers.

200 for Nominator on whose Entry is Named the Dam of Winner of Two-Year-Old Pace.

100 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when Mare was bred.

SIX SPECIAL CASH PRIZES FOR STALLION OWNERS.

Given to Owners of Stallions standing biggest in number of Mares nominated in this Stake that were bred to their respective horses, divided as follows:

1st Prize, \$100.

2nd Prize, \$50.

3rd Prize, \$35.

4th Prize, \$25.

5th Prize, \$20.

6th Prize, \$20.

The Above Prizes will be Paid on December 24, 1910.

ENTRANCE AND PAYMENTS—\$2 to nominate mare on December 1, 1910, when name, color, description of mare and stallion bred to must be given; \$5 May 1, 1911; \$5 October 1, 1911; \$10 on Yearlings, May 1, 1912; \$10 on Two-Year-Olds, January 2, 1913; \$10 on Three-Year-Olds, January 2, 1914.

STARTING PAYMENTS—\$25 to start in the Two-Year-Old Pace; \$35 to start in the Two-Year-Old Trot; \$35 to start in the Three-Year-Old Pace; \$50 to start in the Three-Year-Old Trot. All Starting Payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Colts that start at two years old are not barred from starting again in the three-year-old divisions.

For entry blanks and further particulars, address the Secretary.

CONDITIONS:

The races for Two-Year-Olds will be mile heats, 2-in-3, and for Three-Year-olds, 3-in-5. Distance for Two-Year-Olds, 150 yards; for Three-Year-Olds, 100 yards. If a mare proves barren or slips or has a dead foal or twins, or if either the mare or foal dies before May 1, 1912, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1910.

Entries must be accompanied by the entrance fee. Nominators liable only for amounts paid in. Failure to make any payment forfeits all previous payments. This Association is liable for \$7,250, the amount of the guarantee, only. Hoppes will be barred in trotting and pacing divisions.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors. Money divided in each division of the Stake 50, 25, 15 and 10 per cent. There will be no more moneys in each division than there are starters. Entries open to the world. Membership not required to enter; but no horse, wherever owned, will be allowed to start until the owner has become a member.

SPECIAL PREMIUM TO NOMINATORS.

In connection with the Pacific Breeders Futurity Stake No. 11—\$7,250 Guaranteed—the BREEDER AND SPORTSMAN will be sent for one year to every nominator who sends \$2 in addition to his entry fee. If you are getting the paper send the \$2, and the time of expiration of your subscription will be extended one year. This is your chance to SAVE A DOLLAR.

Every Horse Should Be Clipped in Season

It is the wise thing to do for the clipped horse not only is easier to clean and looks better, but clipping does much to make him immune from coughs, colds and the usual ills that come to a horse from standing in a coat of long, wet hair after any hard exertion. The perspiration evaporates quickly from the clipped animal and leaves him dry. On cold days a blanket when he stands keeps him comfortable.

The Best Clipping Machine the World has ever Seen is the Stewart Ball Bearing Enclosed Gear Machine

It is the easiest turning, fastest clipping and most enduring of all machines. The materials in it are all of better quality, the workmanship is superior. All file hard cut steel gears, protected from dust and dirt and running constantly in oil. It couldn't be better for twice the money.

COLORADO E., the greatest three-year-old trotter ever seen, failed to win the Kentucky Futurity last Tuesday at Lexington. Of course he was favorite, and while he won the first heat pulled up in 2:08½ he was not in condition and lost the race to the Peter the Great filly Grace after Emily Ellen had taken the second heat in 2:09¼. The race was a great disappointment as faster time was expected, many thinking Colorado E. would lower his own record of 2:05¾ and win easily. Grace's three heats were in 2:08, 2:10 and 2:09¼, the entire five heats of the race thus being trotted in 2:10 or better. There were three other starters, Lulu Arion, Sue D. and Native Belle, but we shall have to wait for the mails to get the full particulars of the race. The winner is by Peter the Great 2:07½, dam Orianna 2:19¼ by Onward, therefore a full sister to Czarevna 2:07¼ the great three-year-old of last year. One of the peculiar circumstances in connection with the loss of the race to Colorado E. is the fact that two weeks before at Columbus he started in the Kentucky Stock Farm Futurity, in which it is said the money was not on hand to pay the purse. In this race he set the world's three-year-old record at 2:05¾. A week or two before his owner Mr. Geo. H. Estabrook had waived distance in a rich stake and allowed the other colts to earn several thousand dollars, which he could have pocketed had he been less than a true sportsman. After a campaign clear through the circuit where Colorado E. was a great attraction and during which Mr. Estabrook permitted Macey to drive him faster miles than necessary, solely for the entertainment of the spectators, the colt starts in the richest stake of the year, first money in which he loses, probably because he had been kept on edge too long to show well in cheaper races. Mr. Estabrook doubtless does not care a snap of his finger for the difference in cash value between first and second money at Lexington, but he probably regrets that his colt could not have closed the campaign of 1910 with an unbeaten record to his credit and the added distinction of winning the greatest three-year-old trotting event of the world. And he has hosts of friends who will share these regrets with him.

THERE SEEMS TO BE a pretty general desire among horse owners all over the country that the fractional time in races be given in fifths instead of quarters. All the best watches in use at the present time split the seconds into fifths and it is utterly absurd for the timers to report the time in quarters and to have it so recorded. Because the records heretofore have all been made with the fractions quartered is no reason why, with watches dividing the seconds into fifths more accurate time should not be given. It might be well for the National and American Associations to request all members to see that the fractional time is recorded in fifths next season. It would be much more satisfactory all around if this suggestion were made, and we believe it would be followed by every association in membership.

ALL SIGNS POINT to a much heavier breeding season in California in 1911 for trotting bred stallions than prevailed during 1910 or 1909. The tremendous success of harness racing in the northwest and all over the country east of the Rockies, is good evidence that the trotting horse is in favor with the people; \$10,000 and over, (even sums up to \$75,000), have been refused for trotting stallions this year in more instances than during any previous year for many seasons. The great success of the county and State fairs at the majority of which harness races were the leading attraction, is another evidence that horses are popular and that speed at the trot or pace is greatly admired. There is an excellent prospect for the revival of county fairs in California in 1911, and if the bill goes through there will be an increased demand for good horses. The number of growing colts on this coast is much smaller than usual at present, but the outlook is for an increased amount of breeding being done next spring.

COUNTY FAIRS, properly managed, will do as much to bring about the development of the county where held as anything on which money can be spent. The county that holds a good fair each year is the one that attracts settlers of the most desirable sort.

WHEN as many records are smashed during one season as were broken this year, it is foolish to argue that the trotter has reached his limit.

CHASE'S SECOND FALL SALE.

A sale of good horses—those that fulfill every good thing said about them in the catalogue—is what Fred H. Chase & Co. are trying to arrange for Monday evening, October 31st. Consignments to this sale have already been made by Frank H. Burke, H. Busing, H. Rohner, S. Christenson, H. Scott, A. Ottinger, Henry Helman, and several others. These horses are not Grand Circuit prospects, but are the result of a quest made by Mr. Chase to gather together enough sound, well-broke, well-bred and good-looking trotters and pacers to supply a part of the demand that exists in this market at the present time for horses of that description that are suitable for road driving, matinee racing or high-class business purposes. There are many persons in San Francisco and the surrounding country who are in the market for a good horse suitable for their pleasure or business. They want them sound, well-broken, of fair size and fair looks, roadsters not afraid of cars and automobiles, or matinee trotters and pacers that can show a 2:30 gait without being kept in constant training. Pedigrees will not count as much in this sale as size, good looks and soundness, and while speed will bring bidders, it will not bring as many as perfect manners. Mr. Chase has endeavored to get horses for this sale that are worth the market price for good roadsters. Some of those already consigned are choice animals on which bidding should be lively. He wants a few more to make up about fifty head all told, that being the number he can conveniently handle during one evening. He wants no old poor mares or scrubby-looking youngsters, but finished horses. He wants every horse to come up fully to the description given it in the catalogue by its owner. There are several good buyers who say they will bid liberally on the right sort. He expects this to be the best sale of the year, as there are bound to be more buyers than horses. Entries to this sale will close Monday, October 17th, in order to have every animal correctly catalogued.

ANOTHER ASSOCIATION TO PROMOTE DISTRICT FAIRS.

A meeting of delegates from various promotion associations of California was held at Visalia last Tuesday for the purpose of effecting an organization to secure legislation favoring the establishment of District Fair Associations throughout California and to secure State aid for the same.

The convention favored the county fair idea, each county to hold its own fair, except in cases where the smaller counties might prefer to combine with their neighbors and hold a district fair. The following resolution which was adopted explains the purpose of the new organization:

Resolved, By this convention of delegates from the commercial organizations of California, assembled in the city of Visalia, October 4, 1910, to consider the subject herein outlined, that we co-operate to secure concerted action of the various committees in procuring the enactment of laws by the legislature of 1911 to promote development of California resources by appropriation of state funds to re-establish district and county fairs for the encouragement of agricultural and other productive industries.

It was decided that it would be best to have the president and secretary of the association residents of the same city, and on account of the central location of Stockton, J. M. Eddy was elected president and W. C. Wall secretary.

A meeting will be called soon by President Eddy, when an executive committee will be announced, and a systematic campaign started.

FRESNO FAIR AND RACES.

Fresno Fair Grounds, Oct. 4.—Before the largest Tuesday crowd in the history of a Fresno Fair, the week's card of trotting, pacing and running races opened this afternoon. Margaret Derby, a daughter of Charles Derby, captured the 2:30 pace in straight heats. M. Leggett drove the winner. Dolly Varden, by Milton Gear, won second money, and Dan C., by Athabla, was third. The purse was \$200.

Ed B. won the half mile running event, beating Little Jane by five lengths. Little Jane nosed out Nappa for the place. The purse was \$100. The matinee trot did not fill and the race was called off. Happy Jack and Company entertained the crowd between heats with broncho busting, fancy stunts on horses and with ropes. Mrs. Happy Jack assisted in the entertainment. In a mile wild horse race, Byram Arenobia won from a field of five, Happy Jack finishing second and L. Feliz third. The riders blindfolded their mustangs and then saddled them before running the mile. After the colts had bucked for a few minutes, the riders were off for the mile run amid a shower of blank cartridges from a half-dozen revolvers. The race was a typical Wild West event. Summaries:

First race, 2:30 pace; three in five; purse \$200:
Margaret Derby, b. m. Charles Derby (M. Leggett).....1 1 1
Dolly Varden, b. m., Welcome (Doc Bernard).....2 2 2
Dan C., b. s., Athabla (C. Clark).....4 3 3
Milmot, s. g., Milton Gear (J. Donahoo).....3 5 5
Sadie M., br. m., Athadon (A. Arnold).....5 4 4
Time—2:16½, 2:16½, 2:21.

The officials were: W. J. Kenney of San Francisco, starter and announcer; R. T. Owens, M. L. Woy and D. Cutten, judges; D. L. Bachant, R. J. Kirk, Frank Malcolm and Dr. Whittington, timers; L. Bray, marshal.

October 5.—Two harness races were on the program to-day, Donello, by Washington McKinney, winning the 2:18 trot, and Ateka by Athasham, the three-year-old trot.

Summaries:
2:18 trot, purse \$200.
Donella Washington, McKinney (J. W. Zibbell).....1 1 1

Time—2:29¼, 2:29¼, 2:26¼, 2:26¼.

A SPLENDID YEARLING.

The coal black yearling Allen Jay, pictured on the front page of this issue of the Breeder and Sportsman is one of the grandest youngsters for his age ever seen on this coast. He will not be two years old until next May, but he is as well developed as some three-year-olds. He is owned by Henry Helman of Pleasanton, and is just being broken and the way he trots gives great promise that he will be a very fast youngster. His breeding is especially good and choice enough for the premier of a high class stock farm. He is by Mr. Helman's royally bred young stallion Alconda Jay (son of Jay Bird and Alma Wilkes by Baron Wilkes). His dam is by McKinney 2:11¼ and showed Helman a mile in 2:21 on the trot before she met with an accident and was put to breeding. The second dam is by that great sire of speed and good looks, Altamont 2:26¾, sire of 7 and the dams of 4 in 2:10, the third dam is by Rockwood sire of six in the list and the dam of that game trotter Henry Gray, the Oregon favorite. Rockwood is by Fleetwood (son of Happy Medium) and his dam by Abdallah 15. The fourth dam of Helman's colt is by Oregon Pathfinder 10981, he by Morrill 850, a Morgan horse owned in Vermont about 1845, that was noted for perfect soundness of his feet and limbs all through life and who imparted this quality to his get in a remarkable degree.

Allen Jay is certainly a royally bred colt. As his picture, which does not flatter him in the least, shows, he is exceedingly well developed for a yearling. He is coal black with a coat like satin, has a splendid, sensible head and at the trot shows a gait that is free, open and fast. He is well staked and should give a good account of himself when he is old enough to race.

Trotting bred horses bring pretty fair prices in Australia. At a sale held in Sydney, August 8th, the Palo Alto bred stallion Dixie Alto, owned by W. B. Veirs, brought \$3700. Dixie Alto has a trotting record of 2:18 4-5 and has sired several Australian winners. He is by Mendocino, dam by Palo Alto, grandam Manette, dam of Arion 2:07¾, by Nutwood. Dixie Alto was the highest priced horse in the sale. The next highest price was \$1570, paid for McKinney Child, a five-year-old stallion by Young McKinney, dam by Rothschild. Young McKinney has no McKinney blood in his veins whatever, and is by Seymour Wilkes 2:08½. He was sent to Australia as a son of McKinney, but the horse's true breeding was discovered and he is known in the antipodes as a son of Seymour Wilkes, although still carrying a McKinney name.

Drink Jackson's Napa Soda.

HIDALGO THINKS JUDGES SHOULD BE PAID.

Portland, October 2.

Well, as you have probably seen by telegram to the daily papers, Helen Stiles annexed the \$1000 purse at the State of Washington Fair, held at North Yakima. Mr. Durfee certainly is one Los Angeles man that could "come back" even if his colossal neighbor, Mr. James Jeffries, failed to do so. He is a good driver, though I have always thought his son a better one, but as a trainer I have as much confidence in him as in any trainer I ever met, the very best trainers of gallopers, such as "Psalm" Hildreth and James Rowe, not excepted. He never takes it all out of his horses but always has something in reserve when he turns their heads to drive them back to the stable. As for a kindly disposition, with a pleasant word for everybody, he has gotten old "Sunny Jim" beaten by the proverbial town block.

You know I have always been a sturdy stickler for well dressed drivers in harness races. I could see no good reason why men driving trotters or pacers should not be attired in as good clothes as the small boys who ride the thoroughbreds. To the non-betting portion of the community a race is merely a spectacle for which reason it should be made as spectacular as possible and all the surroundings endowed with all sorts of brilliancy. And for this reason I felt particularly proud of my four old friends who drove in the great \$10,000 race at the Country Club's track—Charles Durfee, Fred Ward, Hiram S. Hogboom and George W. Ford—for the faultless neatness of their attire as they came upon the track and climbed into their respective sulkies. If for no other reason, it gives the public an impression that they are men who take a proper degree of pride in their business. One of the drivers in that race had on no coat but wore a dirty blue flannel shirt, all open at the neck. I expected to see the starting judge send him back to the stable to dress himself decently. And that starting judge was emphatically "the right man in the right place," as the old saw goes. Give me a field of six or seven horses to start in a race and I can handle them as well as he can. But when you come to put thirteen horses—seven in the front row and six more behind them, it costs me no pangs of crushed pride to take off my hat to Mr. J. L. McCarthy of San Francisco. As the Roman wrote twenty centuries ago "impar Congressus Achilli." It is not often that a harness race interests me as much as does a contest among the gallopers but that \$10,000 race certainly did. Another race that warmed up my old blood was the pacing event at the Los Angeles Fair of 1893, which Our Dick won in five heats, heating W. Wood, Silkwood and Tom Ryder. In the first four heats of that race every one was won by a neck or a nose, with less than one good length between the first horse and the fourth one. That's the kind of racing that pleases the public and it does my old heart good to witness it.

I did not go up to Salem to the State Fair, although I had been appointed one of the judges for the meeting. Knowing how unmerciful are the charges for rooms and board on such occasions, I wrote up to the secretary to inquire what was the compensation for the service and received a very polite reply to the effect that the appointment was purely complimentary and no salary attached to the position. But, he added, I have no doubt our directors would gladly allow any reasonable amount for expenses. I therefore wrote back that my expenses for myself and wife would be not less than \$8 per day and I would come for that. No reply came and I am sure I did not feel badly over it for I could not see my way clear to go up there for less money. In 1884 I was ticket clerk for William M. Ayers the pool seller. He paid us all \$10 a day out of which we were to pay for everything but room rent. He hired a house with eight rooms for \$10 per day and the fair lasted six days, for himself and four clerks, and said that he made money by doing it as he had us all together after our day's work was done. "Billy" Ayres was a gambler and when you said that, you said all that could be said against him, for there was never a man with a stronger sense of justice.

I am not a believer in services of the "purely complimentary" nature, alluded to in Secretary Meredith's letter. It is the kind of work in a judge's stand that has been a most prolific source of trouble for me, these many years. The "local banker" and the "prominent citizen" have kept the National Board of Appeals busy as long as I can remember. The correct way is for a presiding judge to be chosen from the professional ranks at a salary of \$15 to \$20 per day; each of his two assistants at from \$10 to \$12, one of them to act as clerk of the scales and the other to keep the score book, thus greatly relieving the secretary who is sure to be overworked on such occasions. Of course, on the midwinter running tracks, a presiding judge gets \$50 per day and the associate judge \$25, but they are put there to protect the book-makers rather than the race-going public. The Stanley Fay decision in February, 1909, in which a horse was allowed the race after three fouls, one right in the stretch, but the rider fined \$500, is proof enough of what I here assert. If a horse runs foul enough to draw a fine of \$500, he runs foul enough to be disqualified. It was enough to make the man in the moon hold his nose. For that decision, Santa Anita Park owed an apology to the entire American turf.

Leaving my own case above referred to, entirely out of consideration, I believe that associations for the promotion of harness races would find it cheaper in the long run to hire professional judges and pay them stated salaries, holding them to a strict accountability for all their official acts. There is an old saying that whatever is paid the least, is paid the

most; and you don't have to go outside of Oregon to find the strongest exemplification of that maxim. The State was admitted into the Union in 1858, with a constitution which fixed the compensation of State officers at \$1500 for Governor; \$800 for Secretary of State, and \$500 for State Treasurer. In 1870 Louis Fleichner was elected to be State Treasurer at the above salary; and when he went out of office in 1874 he took \$80,000 with him as the result of having loaned out the State's money and pocketed the interest himself. The new constitution pays liberal salaries and there can be no excuse for official peculation such as I have cited above.

No, I don't believe in "complimentary services" on a race track or elsewhere. If a man is worth employing at all he should be paid liberally for what he does. The figures paid at winter tracks do not apply to these cases because those \$50 judges are put there to protect the betting ring as in the Stanley Fay case, but for the trots at Agricultural Fairs and Trotting Breeders' meetings, \$15 per day for presiding judge and \$10 for each of his associates is a fair compensation; and men whose services are not worth those figures are not worth having at all. I do not care whether I am ever again employed as a judge of harness races or not, for I can get a living without it, and William B. Astor, the richest man in America, sixty years ago was authority for a statement that "this is a world in which we are working for our board and clothes."

The Oregon Derby, of one-and-one-quarter miles, at the State Fair, was declared off and the entrance money refunded to the nominators, very properly to my notion. The nominators to the race had gotten together and decided upon which horse should be the caucus nominee for first money. A derby is supposed to be a race for three-year-olds, but they had rung in one old chap that was foaled in 1905 while I was basking in the glorious sunshine that glistened down through the sighing pines of Lake Tahoe. Now, wouldn't you thing that, considering the black eye that galloping races have gotten in New York, California and the Sucker State, men would try to race squarely and properly but such is not the case. I don't know whether the State Fair directors will put on a valuable running race for next year or not, but if they do, they certainly will not accept nominations signed by any of the parties to the Derby frame-up of 1910. The job was ferreted out by the assistant secretary and he deserves the thanks of every breeder of thoroughbred horses for his valuable services in this direction. A sport that cannot be carried on honestly and squarely, is a very good thing to omit altogether, in the belief of

HIDALGO.

SEATTLE RESULTS.

Monday—2:12 trot; purse \$350:				
Gloria O'Neil, by Parole (Davis).....	1	1	1	
Doc McKinney (McGuire).....	2	2	2	
Ida Millerton (Madsen).....	3	3	ds	
Time—2:17½, 2:23½, 2:21½.				
Tuesday—2:20 pace; purse \$300:				
Esther B. by Alexis (McGuire).....	1	2	1	1
Latoska (Johnson).....	3	1	2	2
Amy S. (Johnson).....	2	ds		
Time—2:21½, 2:19½, 2:22, 2:27½.				
Wednesday—2:20 trot; purse \$300:				
Gloria O'Neil by Parole (Davis).....	1	1	1

Time—2:19, 2:25, 2:25½, 2:26½.				

HELENA, MONTANA, RESULTS—SEPT. 26-30.

Three-year-old Trot, \$400—Mountain Chieftain won, Lady Bozeman second, Helena Boy third. Time—2:34½.	
2:17 Trot, \$1000—Dr. Charles K. Cole won, Cherry Diamond second, The Jester third. Time—2:15½.	
Pace, \$400—Helena Girl won, Ed Kermack second, McFall third. Time—2:19½.	
2:11 Pace, \$1000—Primus won, Mona Bells second, Dollie Dimple third. Time—2:11½.	
2:25 Pace, \$1000—Star King won, Camille, second; Dr. Red, third. Time—2:11½.	
Free-for-all Trot, \$500—Dr. Charles K. Cole won, Cherry Diamond second, Minimum Bird third. Time—2:17.	
2:25 Trot, \$1000—Delia R. won, Irish Alice second, Geraldine third. Time—2:18½.	
Special Trot—Hazel Dot won, Alfonso second, Helena Boy third. Time—2:30½.	
Free-for-all—Primus won, Dollie Dimples, second, Tom Marshall third. Time—2:11.	

A good horse poorly cared for seldom brings what he is worth, but a poor horse well cared for will bring all he is worth and sometimes more.

PARK AMATEUR RACES LAST SATURDAY.

Small fields were the rule at the races held by the Park Amateur Driving Club at the Stadium last Saturday, there being not over three starters in any of the four events. No fast time was made, a mile in 2:17½ by the Kinney Lou three-year-old pacer Balboa, owned by Dan Hoffman, being the fastest mile of the afternoon. This race which was between Balboa and H. M. Ladd's Ringrose was won by the former in straight heats. In the class A trot Laddie G. owned by F. H. Burke, Sunset Belle owned by H. C. Ahlers, and Mike Kelley owned by A. Ottinger were the contestants. Sunset Belle won the first heat in 2:18½ and Laddie G. the second in 2:20½. In the third heat Sunset Belle again finished in front but she was set back to last position for crossing too close in front of Laddie G. and Mike Kelly. The heat was given to Laddie G. who finished second, giving him the race.

Captain Matson's roan trotter Birdeye trotted a good race in the Class B trot, winning the event in straight heats, Secretary Thompson's Lady Washington second and Consani's Dividend third. In the last race, which was for Class C trotters, Smedley's Red Velvet, Burke's Siesta and Matthes' Walter G. were the starters. Red Velvet won the first heat in 2:20 and Walter G. captured the next one in 2:22. In the third heat Siesta finished in front in 2:19½, with Red Velvet second and Walter G. third. When the fourth heat was called Mr. Smedley refused to start Red Velvet again, and Siesta and Walter G. started without her. Siesta won the heat and the race in 2:24. Results:

First race, Class A pacers; one mile:				
D. E. Hoffman's Balboa.....	1	1		
H. M. Ladd's Ringrose.....	2	2		
Time—2:20½, 2:17½.				
Second race, Class A trotters; one mile:				
F. H. Burke's Laddie G.....	3	1	1	
H. C. Ahler's Sunset Belle.....	1	3	3	
A. Ottinger's.....	2	2	2	
Time—2:18½, 2:20½, 2:18½.				
Third race, Class B trotters; one mile:				
Captain W. Matson's Bird Eye.....	1	1		
F. W. Thompson's Lady Washington.....	2	2		
R. Consani's Dividend.....	3	3		
Time—2:22, 2:20½.				
Fourth race, Class C trotters; one mile:				
F. H. Burke's Siesta.....	3	3	1	1
F. L. Mattie's Walter G.....	2	1	3	2
J. W. Smedley's Red Velvet.....	1	2	2	
Time—2:20, 2:22, 2:19½, 2:24.

There are twenty entries in the \$3000 stake for trotters, and thirty in the \$3000 stake for pacers at Phoenix.

THE PHOENIX ENTRIES.

Through the kindness of Kelly Briggs, formerly of Winters, Cal., but now of Phoenix, Arizona, we are enabled to present to our readers this week a complete list of the entries to the harness races to be held at the Territorial Fair to be held at Phoenix November 7th to 12th, 1910. Mr. Briggs mailed us a copy of the entry list as soon as it was ready for publication for which he has our sincere thanks. The list of entries, with the exception of those made in the races for Arizona colts, is as follows:

2:27 Trot—Purse \$1000.

Forest Glen Chas. W. Stevens, Phoenix, Ariz.
Col. Randolph A. D. Crabb, Phoenix, Ariz.
Nice Jimmy S. W. Higley, Phoenix, Ariz.
Prince Zombro Dr. J. G. Belt, Safford, Ariz.
McKinney Wilkes John J. Gaines, Los Angeles, Cal.
Creme de Menthe Frank Cavaliere, Phoenix, Ariz.
Coon George Dykes, Mesa, Ariz.
Bolock J. H. Kelly, San Bernardino, Cal.
Miss Mosier Rayburn Bros., Galesburg, Ill.
Wild Girl James C. Wallace, San Diego, Cal.
Prince Del Monte Henry Imhof, San Jose, Cal.
The Exponent Dick McMahon, Libertyville, Ill.
Little Branch W. G. Durfee, Los Angeles, Cal.
Tom Moko W. G. Durfee, Los Angeles, Cal.
Crescendo W. G. Durfee, Los Angeles, Cal.

2:23 Trot—Purse \$1000.

McKinney Wilkes John J. Gaines, Los Angeles, Cal.
Prince Zombro Dr. J. G. Belt, Safford, Ariz.
Miss Mosier Rayburn Bros., Galesburg, Ill.
Lillian Axworthy F. S. Byers, Denver, Col.
Lady Bonito Phil C. Ensign, Phoenix, Ariz.
Della Lou Henry Imhof, San Jose, Cal.
The Exponent Dick McMahon, Libertyville, Ill.
Dr. Wayo A. R. Porter, Portland, Ore.
Bolock J. H. Kelly, San Bernardino, Cal.
Little Branch W. G. Durfee, Los Angeles, Cal.
Tom Moko W. G. Durfee, Los Angeles, Cal.
Crescendo W. G. Durfee, Los Angeles, Cal.

2:19 Trot—Purse \$3000, Copper Stake.

Harmonica John Mendenhall, Springville, Utah
Colorado E Geo. H. Estabrook, Denver, Col.
Prince Lot Alex. Brown, Walnut Grove, Cal.
Alice L. Woodford John I. Lewis, Wayne, Ind.
Maud's Pilot George Castle, Chicago, Ill.
Wesos Alex. Brown, Walnut Grove, Cal.
Belle Tolus Thos. Branigan, Columbus, Neb.
Mary Louise E. A. Colburn, Denver, Col.
Lillian Axworthy F. S. Byers, Denver, Col.
Helen Stiles C. A. Durfee, San Jose, Cal.
Dr. Lecco C. A. Durfee, San Jose, Cal.
Bolock J. H. Kelly, San Bernardino, Cal.
Dr. Wayo A. R. Porter, Portland, Ore.
Remorseful Dick McMahon, Libertyville, Ill.
Fair Maiden Dick McMahon, Libertyville, Ill.
Capt. Hunt Dick McMahon, Libertyville, Ill.
The Exponent Dick McMahon, Libertyville, Ill.
Vestale Dick McMahon, Libertyville, Ill.
Princess Louise George Nugent, Phoenix, Ariz.
Morning Light J. B. Jones, Muskogee, Okla.

2:15 Trot—Purse \$1000.

Dr. Clark J. T. Clark, Phoenix, Ariz.
Maud's Pilot George Castle, Chicago, Ill.
Harmonica John Mendenhall, Springville, Utah
Alice L. Woodford John I. Lewis, Wayne, Neb.
Prince Lot Alex. Brown, Walnut Grove, Cal.
Wesos Alex. Brown, Walnut Grove, Cal.
Densmore D. A. Dinnie, Minot, N. D.
Dr. Lecco C. A. Durfee, San Jose, Cal.
Zommell A. B. Miller, Rialto, Cal.
Alfreda B E. A. Reichel, Great Falls, Mont.
Capt. Hunt Dick McMahon, Libertyville, Ill.
Colorado E Geo. H. Estabrook, Denver, Col.
Remorseful Dick McMahon, Libertyville, Ill.
Fair Maiden Dick McMahon, Libertyville, Ill.
Dr. Wayo A. R. Porter, Portland, Ore.
The Exponent Dick McMahon, Libertyville, Ill.
Vestale Dick McMahon, Libertyville, Ill.
Morning Light J. B. Jones, Muskogee, Okla.

2:12 Trot—Purse \$1500.

Prince Lot Alex. Brown, Walnut Grove, Cal.
Wesos Alex. Brown, Walnut Grove, Cal.
Dr. Clark D. A. Dinnie, Minot, N. D.
Densmore J. T. Clark, Phoenix, Ariz.
Mary Louise E. A. Colburn, Denver, Col.
Gov. Francis W. O. Foote, Bonham, Texas
John Kirby W. O. Foote, Bonham, Texas
Helen Stiles C. A. Durfee, San Jose, Cal.
Rapidan Dillon A. B. Miller, Rialto, Cal.
Zommell A. B. Miller, Rialto, Cal.
Alfreda B E. A. Reichel, Great Falls, Mont.
Buck E. A. Reichel, Great Falls, Mont.
Helen Dare Geo. T. Beckers, Columbus, Ohio
Kingbrook W. I. Higgins, Deer Lodge, Mont.
Zombro J. P. Porter, Portland, Ore.
Remorseful Dick McMahon, Libertyville, Ill.
Fair Maiden Dick McMahon, Libertyville, Ill.
Capt. Hunt Dick McMahon, Libertyville, Ill.
The Exponent Dick McMahon, Libertyville, Ill.
Vestale Dick McMahon, Libertyville, Ill.
Directum Penn W. G. Durfee, Los Angeles, Cal.
Carlokin W. G. Durfee, Los Angeles, Cal.
Princess Louise George Nugent, Phoenix, Ariz.

2:09 Trot—Purse \$1000.

Era Wm. Morgan, Pasadena, Cal.
Geo. Muscovite Chas. Bond, Galesburg, Ill.
Gov. Francis W. O. Foote, Bonham, Texas
John Kirby W. O. Foote, Bonham, Texas
Rapidan Dillon A. B. Miller, Rialto, Cal.
Zommell A. B. Miller, Rialto, Cal.
Alfreda B E. A. Reichel, Great Falls, Mont.
Kingbrook W. I. Higgins, Deer Lodge, Mont.
Zombro J. P. Porter, Portland, Ore.

Remorseful Dick McMahon, Libertyville, Ill.
Fair Maiden Dick McMahon, Libertyville, Ill.
Capt. Hunt Dick McMahon, Libertyville, Ill.
The Exponent Dick McMahon, Libertyville, Ill.
Vestale Dick McMahon, Libertyville, Ill.
Directum Penn W. G. Durfee, Los Angeles, Cal.
Free-for-all Trot—Purse \$1000.

Spanish Queen Geo. H. Estabrook, Denver, Col.
Country Jay Geo. H. Estabrook, Denver, Col.
Era Wm. Morgan, Pasadena, Cal.
Geo. Muscovite Chas. Bond, Galesburg, Ill.
Rapidan Dillon A. B. Miller, Rialto, Cal.
Kingbrook W. I. Higgins, Deer Lodge, Mont.
Zombro J. P. Porter, Portland, Ore.
Sonoma Girl Dick McMahon, Libertyville, Ill.
Carlokin W. G. Durfee, Los Angeles, Cal.

2:29 Trot—Purse \$1000, Arizona Horses.

Forest Glen Chas. W. Stevens, Phoenix
Col. Randolph A. D. Crabb, Phoenix
Coon George Dykes, Mesa, City
Creme de Menthe Frank Cavaliere, Phoenix
Nice Jimmy S. W. Higley, Phoenix
Electwood J Commercial Corral, Phoenix
Selma Wilkes Thos. Johnson, Phoenix
Frances B Chas. W. Lapman, Mesa City
Zona B A. W. Sydnor, Globe, A. T.
Burner C. B. Holloway, Phoenix
Lady Bonito Phil C. Ensign, Phoenix

2:18 Pace—Purse \$1000.

Athol R S. Wood, Pomona, Cal.
Betsy Hal B. A. Packard, Douglas, Ariz.
Duke Wm. Gammel, Phoenix, Ariz.
Gov. Brodie Wm. Lossing, Phoenix, Ariz.
Onward Prince G. E. Crosby, Phoenix, Ariz.

THE BEST RECORDS OF THE YEAR.

The best records for the year so far are as follows:
Trotters.

Yearling colt—Beneat, by Bingara, dam Garish 2:18½, by Highwood 2:21½; and McKinney Mac, by McKinney 2:11½, dam Miss Brussels 2:27¾
Yearling filly—Princess Todd, by Kentucky Todd 2:14¾, dam Grace Bingen, by Bingen 2:06¼ 2:29¼
Two-year-old colt—Silent Brigade, by Silent Brook 2:16¼, dam Carrietta 2:18 by Directman 2:11¼
Two-year-old filly—Miss Stokes by Peter the Great 2:07½, dam Tillie Thompson by Guy Wilkes 2:09¼
Three-year-old colt—Colorado E., by The Bondsman, dam Flossie McGregor by Jay McGregor 2:07¼ 2:05¾
Three-year-old filly—native Belle by Moko, dam Julia D. C., by Gen. Wellington 2:07¾
Four-year-old colt—Billy Burke, by Silent Brook 2:16¼, dam Crystal's Last 2:27¾, by Ondale 2:23 2:06¾
Four-year-old filly—Joan by Directum Spier 2:11¼, dam Sarah W. 2:18¼, by Hal Braden 2:07¼ 2:06¾
Stallion—The Harvester, by Walnut Hall 2:08¼, dam Notelet by Moko 2:01
Mare—Sonoma Girl, by Lynwood W. 2:20¼, dam Maud Fowler 2:21¾, by Anteeo 2:16¼ 2:04¼
Gelding—Uhlán, by Bingen 2:06¼, dam Blonde, by Sir Walter Jr. 2:18¼ 1:58¾
New performer—Dudie Archdale, by Archdale, dam Dudie Egmont 2:13¾, by Egmont Chief 2:24¼; and Joan, by Directum Spier 2:11¼, dam Sarah W. 2:18¼, by Hal Braden 2:07¼ 2:06¾
Pacers.
Two-year-old filly—Pointer Belle, by Star Pointer 1:59¼, dam Dictatus Belle 2:24¼, by Dictatus 2:17 2:13¾
Three-year-old colt—Directum Regent, by Directum Miller 2:05¼, dam Regent's Last, by Prince Regent 2:16¼ 2:09¼
Three-year-old filly—Nell Gentry, by John R. Gentry 2:00¾, dam Braden Girl, by Brown Hal 2:12¼ 2:09¼
Four-year-old colt—Knight of Strathmore, by Twelfth Knight, dam Eleanor B., 2:11 by Strathmore 2:05½
Stallion—Minor Heir, by Heir-at-Law 2:05¾, dam Kitty Clover, by Redwall 2:23½ 1:58½
Mare—Darkey Hal, by Star Hal (Canadian), dam Brownie, by Hamlet 2:04¼
Gelding—Giftline, by Online 2:04, dam Tolo, by Strathmore 2:02¾
New performer—The Abbe, by Chimes 2:30¾, dam Nettle King 2:20¼, by Mambrino King 2:04

USES ABSORBINE WITH BEST OF RESULTS.

When trainers use and recommend a certain preparation, you may feel assured that there is merit in it, for they have constant demand for a good liniment in keeping their horses sound and ready for the race. ABSORBINE is a general favorite among the trainers, and is used almost daily by them. H. D. Ernest of Rockport, Ohio, under date of June 17th, 1910, wrote: "I have used ABSORBINE with the best of results. I kept Daniel 2:08¼ racing with it. He had a bad leg and he has not started since I let him go. I am using it on a mare now with a bad leg and have no trouble keeping her sound." W. W. Jones of Murdock Sta., Ill., writes under date of May 24th, 1910: "I have used your ABSORBINE for five years and I can't see how you could make any change in it to make it any better." On sale at druggists, \$2.00 a bottle, or sent direct upon receipt of price. Write for descriptive pamphlet, sent free.
W. F. YOUNG, P. D. F., 54 Temple Street, Springfield, Mass.

NOTES AND NEWS

There are 38 new 2:10 trotters up to the 1st of October.

A dozen trotting stallions have entered the 2:10 list this year.

A daughter of Peter the Great won the Kentucky Futurity last Tuesday.

The Abbe 2:04 and Hal B. Jr. 2:10½ have each won ten races this year.

Seven four-year-olds have taken trotting records of 2:10 or better this year.

W. G. Durfee, Dick McMahan and Gus Macey will be at the Phoenix meeting.

Colorado E. was beaten, although he got second money. It was his first defeat this year.

Knight of Strathmore 2:06¼ over a half mile track, will be wintered at Phoenix, Arizona, by Arlie Frost.

Minor Heir paced a half mile in 1:01¼ at the Louisville, Kentucky, half-mile track September 24th.

Geo. Hammett will train Mr. O'Keefe's stallion Lecona at the Alameda track as soon as it is put in order.

Minor Heir, Lady Maud C., Hedgewood Boy and George Gano, will all be at the Phoenix fair next month.

Bingen 2:06¼ will be the leading sire of standard performers for 1910. Already twenty new ones have been added to his list.

Grace is the name of the Kentucky Futurity winner and she is a full sister to the great three-year-old of last year—Czarevna 2:07¼.

There will be a good representation from California at the Phoenix meeting, sixty nominations having been made from this State.

Directum 2:05¼ as a four-year-old, is the sire of Directum Spier 2:11¼ as a four-year-old, and he the sire of Joan 2:06¼ as a four-year-old.

Princess Nutwood 2:17¼ by Prince Nutwood, won a pacing race at Flint, Michigan, last week, three of the heats in the race being paced right at her record.

Besides being the world's fastest trotting gelding and the fastest trotter in the world without a wind shield, Uhlán 1:58¼ is one of the handsomest harness horses living.

The Pasadena Driving Club plans to re-soil its track this fall and make it one of the best in Southern California. Matinee races will be held by the club once a month.

A writer in the Cleveland Plaindealer says that Lou Milton, the dam of Lou Dillon 1:58½ was pacing bred. Will he please give the pacing ancestors in Lou Dillon's pedigree?

La Siesta Farm has consigned a number of horses to Chase's second fall sale. There are several well known trotters in this consignment, particulars about which will be given next week.

All the races for the Phoenix, Arizona, meeting have filled. There are 286 entries all told. It will be a great meeting, and with good weather a few world's records may be lowered.

Patsy Davey is working several of Mr. F. H. Burke's trotters on the stadium track in Golden Gate Park, and has been starting them in the matinee races where they have shown up well.

H. Scott of San Jose, has consigned two good horses by Kioney Lou, out of Primrose by Sidney, to Chase's second fall sale to be held Monday evening, October 31st. Both are fine prospects.

Grace Pointer 2:09¼ is the fastest three-year-old pacer of the year and Pointer Belle 2:13½ is the fastest two-year-old pacer of 1910. Both were bred in California and both are by Star Pointer 1:59¼.

During the three days' meet of the New Zealand Metropolitan Trotting Club, \$165,700 passed through the totalisator. At 5 per cent commission, the amount usually taken out at meetings in America, this would bring the association \$285.

Independence Boy 2:04¼, one of the good money winning pacers of the year is by Thistle 2:13¼ son of Sidney and out of a mare by a son of Alcyone, the sire of McKinney. Thistle's dam is Fernleaf, the dam of Gold Leaf (4) 2:11, by Flaxtail. Independence Boy won three races in one week and his nine winning heats averaged 2:06¼.

Henry Dunlap has sold out his garage business at Centerville and returned to Pleasanton to have a little fun during the winter with his horses.

Al McDonald has rented stalls at the Merrill track, near Gresham, Oregon, and will train a few horses there.

The Kentfield Driving Association is considering giving a candidates' matinee about the 20th instant, at the Kentfield half mile track in Marin county.

Judge Thomas H. Brents, of Walla Walla, is the owner of a two-year-old filly by Moko, dam Belladi 2:18 by Chehalis 2:04¼. She is well staked and will be raced next year.

Kingbrook 2:13, a good winner on the North Pacific circuit, is a four-year-old. He is by The King Red out of a mare by Alfonso, son of Baron Wilkes and Alma Mater.

W. T. McBride of Aberdeen, Washington, owns a colt by C. The Limit 2:06¼ out of La Moscovita, the dam of Bon Guy (3) 2:11¼, Yolanda 2:14¼, etc., by Guy Wilkes.

Bonnie Antrim paced the three fastest heats at the Centralia meeting when he won in 2:16, 2:17 and 2:15½. He is by Bonnie McK. and is four years old.

The Bondsman, sire of Colorado E. 2:05¼, the world's fastest three-year-old trotter, will be sent to the Old Glory sale in November. He is by Baron Wilkes out of the great mare Sorrento by Jayhawker.

Lou Billings, the handsome three-year-old daughter of John A. McKerron 2:04¼ and Lou Dilloo 1:58½, has reduced her record to 2:10¼.

There will be about 400 entries in the different classes at the Portland (Oregon) Hunt Club's horse show, which opens next Wednesday. This is double the number entered last year.

The stalls at Pleasanton present a very neat appearance in a brand new coat of whitewash that has been applied inside and outside during the past two weeks.

The Kings county fair opens next Monday at Hanford half mile track. A splendid display of live stock and other products of that section will be made and some good racing given.

The San Francisco Driving Club will give a program of six or seven races at the stadium track next Sunday. All the fastest horses in the club will start and close contests may be looked for.

Bad luck followed the favorites in the Kentucky Futurity trots this year. Colorado E. 2:05¼ was out of condition and was beaten, while Miss Stokes, favorite in the two-year-old event took sick and did not start in the race at all.

Hi Hogoboom drove Solano Boy in the \$5000 pace at Salem last month, reducing the horse's record to 2:07, winning two heats and getting second money. The race was won by the Eastern horse, Allerdaw.

Oakwood Derby, one of the best pacers ever seen in Humboldt county, has been consigned to the sale to be held at Chase's Monday evening, October 31st. This pacer was bred at Oakwood Park Stock Farm and is said to be a grand racing prospect.

Henry Helman is just biting a very handsome bay yearling, full brother to the \$4000 colt Bon McKinney, that W. A. Clark Jr. purchased the other day. This colt is a well built youngster with splendid feet and legs and a fine head. He looks like a great prospect.

Hugh Chalmers, the great automobile manufacturer, arises at six o'clock every morning and takes a horseback ride so as to keep in condition to carry on his immense business. "Back to the horse's back" is the order now being given to business men by the leading physicians of America.

They are still arguing up in Oregon over the third heat of the 2:12 trot at Portland. There are hundreds who claim that Prince Lot won the third heat and the race, but the judges said differently and their word goes. At any rate it was a great race and was the one big "thriller" of the North Pacific Circuit.

They have a fair "as is a fair" at Allentown, Pa., every year, even though they have nothing but a half-mile track to race over. On Thursday, the big day of the fair, there were over one hundred thousand paid admissions this year. Harness racing is the chief amusement provided for this immense crowd.

Guy De Cuba 2:25¼ gives another standard performer to the dead Guy Wilkes 2:15¼. Guy De Cuba was foaled in 1898 at the "Two Minute Stock Farm" and weighs close to thirteen hundred pounds in racing form. After a season of one hundred and thirty-five mares, he was trained a little and with one work-out the week previous from 2:45 to 2:34 won the 2:40 trot at Imperial, Ohio, last week, taking a record of 2:25¼.

S. Christenson of this city has sold to Senator Shippee two two-year-old fillies by Bon Voyage 2:12¼, the price for the two being \$1200. One is out of Simone by Simmons, the other out of Perza by Allie Wilkes. The fillies will be turned over to James Thompson at Sacramento to be trained for their engagements.

The pacing stallion Ananias 2:05, owned by C. F. Emery of Cleveland, O., died a few days ago. In addition to having been an extremely fast race horse he is the sire of two trotters and 12 pacers. He was sired by Patron 2:14¼, out of Annie W. 2:20, by Almont Jr. 2:29.

At Denver recently the trotting stallion, Harmonic, by Oratorio 2:13, in winning the 2:20 class, trotted the fastest three heats on record over the Overland Park track and reduced his record to 2:11¼. He is own brother of the pacer Waverly 2:04¼, whose record was also made this season, both being out of Pattie Sutton by Wilkes Boy 2:24¼.

C. A. Durfee had four horses in his string when he went to the San Jose track this summer. They were then the green trotters Helen Stiles and Dr. Lecco, the trotter Almaden (2) 2:22¼ and the pacer Happy Dentist 2:11¼. They are now known as Helen Stiles 2:09¼, Dr. Lecco 2:12½, Almaden 2:19¼ and Happy Dentist 2:08 and everyone is a race winner.

Col. J. C. Kilpatrick has purchased from Jas. Two-bigt colt by Charley D. 2:06¼, dam Melba, the dam of May T. 2:15. The colt is just weaned. The second dam is the dam of Georgia B. 2:12¼ and she produced Miss Georgia 2:08½ when bred to McKinney. There is a developed ancestry on both sides of this colt's pedigree.

The Horse Review of last week contained the following: "The 'Stock Farm' futurity at Columbus was contested for glory only. A representative of the paper came to Columbus and informed Secretary Sheppard that it had no funds with which to pay the purse, but that a deal was on by which the paper was to change hands, and in the event it went through, the new owners would pay the purse. With this understanding the horsemen decided to race and take their chances." This was the race won by Colorado E. in 2:05¼.

One of the handsomest weanlings we have seen lately is the little fellow shown on the front page this week. He is by Star Pointer 1:59¼ out of Sweet Hallie by American Hal and is owned by H. Busing of Pleasanton. The little fellow was taken away from his mother last week, and is as great a favorite on the Pleasanton track as his half brother by Bonnie Searchlight was last year when he could pace a 2:30 gait as a yearling. This youngster is by Star Pointer 1:59¼ and has the same gait as that famous stallion. His dam is Sweet Hallie by American Hal, second dam by Gen. Hardee. He is pacing bred on both sides and doesn't seem to know how to navigate any other way than laterally.

Those who raced over the California circuit in 1894-95-96 will remember Mr. W. P. McNair, who started the harness races with such complete success. Mr. McNair was a revelation to the California horsemen and for the first time on this coast they raced under a starter who knew how to handle a field of horses and get them away fairly and without delay. Mr. McNair has been a resident of Arizona for several years and is now chairman of the Arizona Railway Commission. Last fall he acted as presiding judge of the Phoenix meeting, and this year has been engaged as starter for the races to be held at the Territorial Fair. Mr. McNair is one of the most competent starters ever seen on this side the Mississippi river.

One of the best betting races of the year on the Grand Circuit was the 2:09 class trot for a purse of \$1200 at Columbus last week. The favorite was the Canadian stallion General H. by Combinder, who sold at \$100, the Austrian horse Willy, at \$35, Lady Stately and Demarest each \$25, Startle at \$10 and field, comprising Oro Bellini, Brace Girdle and Direct Tone at \$10, making \$180 in the pool. The race was a three heat event. Startle won the first heat and then sold for \$50 to \$30 for all the others in the field. After winning the second heat Startle had won the money for those who backed him for the race, but although favorite for the third and last heat he lost it to Brace Girdle. When the race was over Startle had first money, Brace Girdle second, Oro Bellini third and Willy fourth. The Canadians lost very heavily on the race as they took all the pools sold on General H. at \$100, and backed him in the field against Startle after the first heat on the general result.

On the dates of November 22d, 23d, 24th, 25th and 26th, the Chicago International Horse Show will be held, and everything points to an equine exhibition such as has not been equaled in this country, and from a horse spectacle never witnessed anywhere, in addition to the usual classification of the fashionable breeds, the finest specimens of the great draft horses will be on exhibition every night, including Shires, Clydesdales, Percherons and Belgians, and in such numbers as will eclipse anything of the kind hitherto brought together in any country.

Alcantara, whose get are now pretty well off the turf, came within an ace of getting another 2:10 performer when his daughter Allie K. took a record of 2:10½ in the second heat of her winning race at Milwaukee.

The bay pacing stallion Walter Dillon 2:12¼, that has raced successfully through the Kansas and Oklahoma Circuit this season, was bred at Santa Rosa Stock Farm, Santa Rosa, Cal., and purchased in his yearling form by Hon. Sterling R. Holt of Indianapolis, Ind., who later sold him to R. Wallior of Opelousa, La., his present owner. He is by Sidney Dillon, dam Guycara 2:19¾ by Guy Wilkes 2:15¼, second dam Biscari, by Director 2:17, famous as the dam of 10 in the list, and third dam Bicara, by Harold, dam of six with standard records.

Louis Joseph of French Camp, has a ten months' old brown filly by Alconda Jay out of a mare by Derhy Ash that he thinks is just about the most perfect young trotter of its age that can be found anywhere. The dam has heretofore produced pacers, having had several foals by other horses, but this filly is a square trotter and has never shown her owner any other gait but trot or walk. When the mother would run in pasture this filly always trotted and never left her feet. Louis calls her Miss Alconda, and as she is well entered in the futurities he values her very highly, and says it would take a lot of cash "boot" to induce him to trade for any other foal of 1910.

W. E. D. Stokes, of New York, proprietor of Patchen Wilkes Farm, Lexington, Ky., received a cablegram from Russia a few days ago since, stating that the four-year-old stallion Peter Guy, by Peter the Great 2:07¼, dam Madame Thompson (dam of Eva Tanguay (2) 2:16½, etc.), by Guy Wilkes 2:15¼, had received first prize in the stallion class at the St. Petersburg Horse Show. The presiding judge in passing upon the merits of Peter Guy, stated that he was the best horse he ever saw. The stallion, which was bred by Mr. Stokes, is a beautiful mahogany bay, standing 16¼ hands high and weighing 1200 pounds. He was sold by Mr. Stokes as a two-year-old.

The following from the Eastern Department of the Horse Review will be read with interest by the many friends and acquaintances of Dr. Stimpson in California: "Grand Circuit campaigners had better make a standing contract with Dr. G. W. Stimpson to go 'down the line' each year and look after the horses. At Hartford he fixed Gamar to start in the Charter Oak, after a three days' treatment for a complication of influenza and bronchitis. Gamar stayed out one of the hardest fought races of the year, second to General H. in 2:08 in the second heat and winner of \$1500, which is 'going some' for a horse sick as he was three days before the race. But the best stunt of the doctor's was with Colorado E. last fall at Lexington. After other 'vets' had tried their hand on the colt, Dr. Stimpson fired him, making a hundred punctures, and when the ailing leg was well, not only were there no scars from the doctor's process of firing, but the scars from other treatments were removed."

Arner 2:17¾ the twelve-year-old full brother to Diablo 2:09¼ and Demonio 2:11¼ is in grand shape in the string of his owner Barney Simpson at Pleasanton. Arner has made very fair seasons each year for the past few years at Chico, his get being very highly thought of as roadsters, but very few of them have been trained on the track. The fast mare Cella K. owned by a member of the San Francisco Driving Club, is a daughter of Arner, and the mare Derby Lass, that took a record of 2:22½ in a winning race at Newman two weeks ago, is also by him. Frank Overacker of Mission San Jose, is the owner of a fine big pacing mare by Arner that is said to be able to pace a quarter in 30 seconds. She has never been raced. There are many other sons and daughters of Arner that have racing speed but they are generally owned by persons who are not in the racing game. Being a son of Chas. Derby and the great brood mare Bertha, dam of five in 2:10, by Alcantara, Arner is one of the greatest bred stallions in the country and with fair opportunity he will make a great sire.

The Missouri trainer, William Rash, has protested the awarding of the purse in \$5000 2:16 trot at Hamline, Minn. Rash drove Dr. Treg in this event. Remorseful, in McMahan's stable, won the first two heats and was distanced in the third, behaving badly at the post and being sent away standing. Dr. Treg won the third heat and then Annetta R., driven by McCarthy, won the last two heats. In the fifth heat Dr. Treg finished about three lengths inside the flag and was reported in by the distance judge, and the announcement was made from the stand that Dr. Treg had won second money in the event. When Rash went to collect he was told that Dr. Treg had been distanced in the last heat and that second money had been awarded to Lewis Forest, in the Loomis stable. This was a complete surprise to Rash, as no announcement to that effect had been made from the stand, the original announcement that Dr. Treg had won second money being the only public statement made in connection with the event. When Rash spoke to one of the officials the latter said, "Why, they can't do it"; but Rash replied, "Well, they have done it," and he immediately made a protest and the case will be decided before the board of appeals of the American Trotting Association, in December.

A correspondent of the Horse World recently wrote: "I met Andy McDowell, a veteran reinsman of the old school, over in Allentown the other day. The silvery threads of three-score years are in evidence, but otherwise he is the same Andy that trained the Grand Circuit trotting stars for the late Luther H. Titus, a native of suburban Buffalo, but for many years a Californian, 30 years ago. Mr. McDowell is a Philadelphian at present and fortune is favoring the brave. Years ago he trained a stable over the old Buffalo track when William B. McDonald, Ed. Burton, John S. Stevenson and Wallie Harris were the local stars of the turf. His name is as familiar as a household word in the light harness racing world, and, in the language of Rip Van Winkle, may he live long and prosper."

Among the horses consigned to the October 31st sale to be held in this city by Fred H. Chase & Co. are two very high class roadsters now owned by Mr. H. Busing of Pleasanton. Both are geldings. One is a handsome big black fellow that he calls Madison McKinney, sired by Bonny McKinney and out of Amazonia by James Madison. He is perfectly broken, afraid of nothing and is a big fine gelding that can step fast enough to race at matinees. No better dispositioned horse was ever hitched up. The other horse Honey Boy, is a handsome chestnut, sired by Demonio 2:11¼ dam by Nutwood Wilkes. He, like Madison McKinney, is also a well broke roadster of good size and fine disposition. He was foaled in 1906, and Madison McKinney was foaled in 1907. Both horses are absolutely sound, and can be seen any time at Pleasanton up to a day or two before the sale. They will go to the sale because Mr. Busing is in the business of breeding and selling horses. They should attract lively bidding as two better all round roadsters were never consigned to a salesring.

GREEN PACER SHOWS MILE IN 2:06½.

At Stockton last Saturday, at the meeting of the San Joaquin Valley Driving Club, the green pacer Guy Vernon, was driven an exhibition mile by W. H. Parker and to the surprise of all present turned the mile track in 2:06½, the fastest mile that has been made by a harness horse on the coast this year. Guy Vernon, as our readers know, is owned by Dr. J. B. Thompson of Oakdale, California, and is by Guy McKinney, out of Maud Vernon by Mount Vernon. In this exhibition, Guy Vernon was given to a cart, and it cannot be said that the Stockton track is fast. He made the mile alone without a pace maker and was not touched with the whip. There was a strong wind blowing against him in the homestretch, but he finished well although the last quarter was slow. The time by quarters was :31, 1:01½, 1:33½, 2:06½.

There were five races on the card and some very good racing resulted. Results:

2:40 mixed:
Ben Walker, p. (D. Lieginger) 2 1 1
James McKinney, t. (J. Foley) 1 2 2
Laura D, t. (Carroll) 4 3 3
Black Beauty, p. (Friedberger) 3 4 4
Time—2:37½, 2:34, 2:37.

Free-for-all pace:
Alto Genoa, Jr. (Peirano) 1 1
T. D. W. (Kemp) 2 2
Blanch A. (J. Aker) 3 3
Time—2:18½, 2:15½.

2:30 class:
Linden Girl, t. (Nance) 1 1
Lady Lou, t. (D. Lieginger) 2 2
Delneph, p. (J. Foley) 4 3
Lloyd, p. (J. Aker) 4 3
Time—2:28¾, 2:26.

2:24 Class, trotting:
McDougall (Kemp) 1 1
Auger Baron (Chalmers) 2 2
Time—2:27, 2:24.

2:28 pace:
Newport (Morris) 1 2 1
Beauty Dick (Peirano) 2 1 2
Chappo (Donovan) 3 3 3
Time—2:19½, 2:25, 2:21¾.

The officials of the day were as follows: Judges, Frank Lieginger (starter), A. W. Cowell, Mr. Olsen of San Francisco. Timers, G. L. Baker, J. K. Myers and Dave Young.

NEW DRIVING CLUB.

The horsemen of Alameda county have organized a new driving club. About thirty of them met in the office of J. P. Patery on Eleventh street, Oakland, last Monday evening and effected a temporary organization. The club is having the old track at Alameda put in shape for driving on and those who have inspected the work already done say the track will be better and faster than ever. A few years ago, the Alameda track, which is a regulation mile, was considered one of the best and safest training tracks in the State. The land on which it is situated lies alongside the Alameda estuary and was made by pumping silt on the marsh when the estuary was dredged. During the past two years further dredging has been done and the old track was covered with the silt to a depth of two or three feet. This has all dried out, and when smoothed and graded the footing will be better than ever for horses. The new driving club proposes to fix the old track up in good shape and to keep it in order to train on at all seasons. A second meeting of the club will be held at Mr. Patery's office on Monday evening next.

SECOND WEEK AT COLUMBUS.

Columbus, Sept. 26.—Ross K., over a track softened by the rains of Saturday, gave the King stake of \$5000 for 2:05 pacers a new record this afternoon when he made the first heat in 2:03¾. He won without effort and the next two heats came easily.

By the conditions of the event six horses shared in the money division. Ross K. won \$2000 and Bland S., sixth, \$400. For the best places back of the winner there was a mad scramble, and especially in the third heat, when Branham Baughman finished second ahead of Merry Widow. Ross K. was favorite, with Ess H. Kay, distanced in the first heat, second choice.

T. W. Murphy, who drove in each of the fifteen heats on the program, rode six of them hack of Dirl and won two seconds. One heat was necessary to settle the 2:15 pace that came over from Friday and it gave Fred F. a decision over Dirl, who later was selected to win the 2:18 pace. Two heats of this race, were taken by the favorite. Then he tired and Bird Grattan got the race by winning the next three heats.

Bervaldo of the Murphy stable made it one-two-three in the 2:13 trot, being able to outrush Olive F. in the stretch. Major Wellington, the first choice, was third and once last because of a break.

In order to handle the 2:19 trotters it was necessary to cut the event into divisions. The first started with Creighton as the favorite. He won the first heat in slow time, but was second to Admiral Red in the next heat, when the time dropped to 2:09¼.

A third heat was won easily by Admiral Red and then the race was postponed until tomorrow, to be resumed just before the second division is taken up. Summaries:

2:13 class, pacing; purse \$1200; three in five; (three heats on Friday):

Fred F., b. g. by Allen S. (Hoyt) 1 3 1 1
Dirl, h. h. by Direct (Thomas Murphy) 8 1 2 2
On Time, h. g. (Valentine) 7 2 3 4
Miss Peeler, b. m. (Hummell) 2 7 4 3
Gus B., h. g. (Engard) 3 5 7 0
Ameriko, h. g. (Cooper) 5 6 5 0
Paymaster, h. g. (Whyrie) 6 8 6 0
Time—2:06¾, 2:08¾, 2:09¾, 2:08¾.

King stake; 2:05 pacers; purse, \$5000; three in five:

Ross K., b. h. by Constenaro (McMahan) 1 1 1
Major Mallow, h. g. (Mallow) 2 3 5
Ella Ambulator, b. m. (Murphy) 8 2 4
Branham Baughman, hr. h. (Cox) 4 4 2
Merry Widow, hr. m. (Rombough) 5 9 3
Bland S., h. h. (B. Barnes) 3 7 8
R. F. D., blk. g. (Robinson) 4 5 6
Jenny W., h. m. (Bowdoin) 7 6 7
Walter W., b. g. (Geers) 6 8 9
Ess H. Kay, blk. h. (White) ds
Rena Patch, b. m. (Hersey) ds
Time—2:03¾, 2:03¾, 2:04¾.

2:13 class, trotting; purse \$1200; three in five:

Bervaldo, h. g. by The Tramp (Murphy) 1 1 1
Olive F., du. m. (Gahagan) 2 2 7

Asa Danforth, b. h. (F. Avery) 7 ds
Thalia, h. m. (Keyes) 8 dr
Time—2:10, 2:08¾, 2:09¾, 2:12, 2:14¾.

Sept. 28.—After the rain of Tuesday preventing racing that day, Startle, a Michigan owned gelding that is raced by Joe Gahagan of Toledo, astonished two in three heats, made it three straight today by capturing the first two heats of the 2:09 trot from a high grade field in which General H. was thought to have the best chance. Startle's time in the first heat was 2:05¼.

Joan, winner over Dudie Archdale last week in two of three heats, made in three straight today when they met for the Buckeye stake of \$5000. The Archdale mare started as first choice, \$100 to \$80 over the field, in which there was nothing up to her standard except Joan.

In the first two heats Joan did the trailing and showed the best bursts of speed when the real racing started after the half was passed. The final half of the first mile was made in 1:01½. The last quarter, with the two mares all but lapped throughout, was made in 30 seconds. Joan won by a whip's length.

The next finish wasn't so close. In the third heat Dudie Archdale tried coming from behind, but was pocketed by Baron Penn and lost a good chance by having to pull out.

Startle's victory was the last one of the day. General H. was favorite at \$100 in a pool of \$185. Willy was second choice, with Startle, Demarest and Lady

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT.

SPREAD OF SHOT CHARGES.

The spread of shot is always a topic of argument, more or less, and also of much interest with shot-gun devotees. In this respect, in view of a recent discussion among several local sportsmen, we quote the following article:

An interesting review of experiments for examining the gradual spread of shot pellets as they pass along the range has been published in England, and a few remarks made thereon, may serve to throw light on a subject of some considerable practical importance in gun experiments.

Briefly stated, the idea consists in measuring at various distances the size of a circle which contains the same number of pellets as are contained in a 30-inch circle at 40 yards. The firing of a large number of shots under such conditions showed, for instance, that the pellets of a full choke pattern occupy the area inclosed by a circle of five inches diameter at 10 yards. A seven-inch circle on the other hand is required in the case of a cylinder gun to hold the pellets which are contained in the 30-inch circle at 40 yards. The whole series of value can be set out in table fashion as follows:

Yards	10	15	20	25	30	35	40
Cylinder gun	7.0	9.8	13.0	16.3	20.3	25.0	30
Half choke	6.0	8.8	12.0	15.5	19.6	24.5	30
Full choke	5.0	7.8	11.0	14.7	19.0	24.0	30

These figures at once make it clear that the pellets composing a charge of shot do not travel in anything approaching a straight line, but that the rate at which they move away from their common center is in greater ratio than is directly proportional to the forward movement. It does not follow that the individual pellets follow a curved path. It is possible, on the other hand, that they do. Slight surface irregularities and a slight spin would easily import a bias to the pellets, giving them a mode of travel which may be likened to the eccentric behavior one notices in the game of bowling. Another explanation of a dispersion of the pellets greater than would be represented by a straight line course is the possibility that the gas bias from the muzzle, and the possible interference of the wadding may give the various pellets constituting the charge a variety of different lines of flight, the angle of divergence of each pellet varying in accordance with the disturbing forces which have acted upon it.

Whatever may be the precise explanation the fact remains that the above measurements show that the central and the consistently flying cluster of pellets opens out or spreads trumpet fashion, so there is a greater relative spread at the longer distances than measurements at short ranges would suggest. However that may be the fact remains that the shotgun experimentalist is now possessed of a curve showing the average dispersion of each of the three main borings of a gun. The full choke, which is the closest shooting at the short distances, but in the degree of extra concentration of the pellets is far more pronounced than with cylinder guns.

So far as the experiments already conducted have been able to show a series of patterns measured say on the basis of an 11-inch circle at 20 yards for a full choke gun give within experimental limits the same average result as would be expected shooting the same gun under the normal 40 yards conditions. Moreover, the variations from round to round in the number of the pellets counted would not be markedly different from the variations experienced under the ordinary conditions of a pattern test. More than this, those who have enjoyed considerable experience in judging the behavior of guns, as displayed by the patterns produced at 40 yards, can find no difference in the general style and character of the arrangement of the pellets when comparing the perforations produced in a cardboard sheet shooting at short ranges with the visual effect produced by an actual pattern taken under ordinary conditions.

Cartridges and guns which give patchy distribution under the full distance test similarly misbehave themselves at the reduced ranges. Patterns themselves vary so much from day to day, from powder to powder and from shot to shot that no one would be justified in making capital out of minor divergencies between a short distance test and one conducted at longer ranges. The general tendency is well expressed in the table of values already given and gunmakers will certainly find the 20 yards test for choke guns and the 15 yards test for cylinders a valuable addition to their methods of test. The advantage of the short distance pattern is that it can be taken on cardboard sheets in a form which readily lends itself to permanent storage. To supplement the records supplied to a shooter concerning the 40 yards behavior of his gun on a whitewashed plate with a series of cards showing the absolute result obtained at the half-way distance, should certainly secure added appreciation. For a well made gun. As a means of illustrating in the show room the relative effect produced by variations of charge the two-foot square sheet has many striking merits. A rabbit cartridge, with its 172 pellets of No. 4 shot, would make a splendid showing against a larger charge of smaller shot; the one being obviously suited to the purpose in view, the other quite unsuitable.

The use of the cardboard sheet does not constitute a discovery, seldom as it is used. On the other hand the power to scribe a reduction of the 30-inch circle true for the lesser distance at which the shooting is done certainly represents a new idea. As already explained, the size of the circle varies with the boring of the gun used. To be able to say here is the actual 15 or 20 yards pattern: here is a circle which is proportionately with the rest of the pattern to 30 inches at 40 yards is to place the shooter in immediate possession of facts which cannot be conveyed by mere verbal description. Great as is the information which can be derived from the personal examination of gun patterns, taken not only at 40 yards but at other distances, the record unfortunately is of a kind which can never be adequately expressed on paper. Such impression as is conveyed to the mind by the examination of targets is either forgotten or remains stored up in the mind as a memory impression of a vague instinct. At shorter distances where the enlarged splashes on the whitewashed paper are so close together as to overlap and to form solid bunches the usual visual effect disappears. With cardboard, or better still, with cheap strawboard sheets faced with white paper, the shot pellets make clean perforations of their own size. Hence the card target of reasonable dimensions commences to be most useful when the whitewashed plate shows little more than an unmeaning jumble of marks. An incidental use of the dispersion table is that the values can be subdivided for every yard of range, so showing the serious influence which is produced when pattern tests are conducted at other distances than those laid down. For instance, 38 yards seems near enough 40 for practical use, but with a full choke gun the circle should have a diameter reduced to 27½ inches, and everyone knows that such a difference must exercise an important influence on the records obtained.

THE QUAIL HUNTER'S EQUIPMENT.

Quail hunting necessitates a great deal of walking under conditions that frequently are very unfavorable. The experienced hunter pays particular attention to his feet and the lightness of his apparel. Other considerations are of less importance.

The value of carefully selected, perfectly fitting foot-gear to the quail hunter cannot be overestimated. It may make or mar the entire trip. Sore feet are the most persistent displeasure imaginable.

Good hunting shoes of soft leather, hob nails liberally nailed on thick soles, are requisite. The nails are put on in a sort of wedge outline with the tip to the toe, and about four nails in the heel will suffice. Some like heels; others prefer the flat-footed sole. It has the advantage of protecting the ankle.

A light 12, 16 or 20 gauge gun is the weapon for quail shooting. It necessitates a good shot, but either arm is deadly when pointed by an expert. If the gun is of small gauge the shells are less bulky; great weight is saved. The importance of this detail is such that experienced men calculate carefully just how many shells they want to kill the limit, and carry no more. Few take over 50. When they do, the extra shells are cached somewhere in the line of march, left with the lunch to save lugging weight.

A thin skeleton coat, aptly described by a veteran sportsman as a "string of pockets," with just enough cloth between to hold them together, is a universal favorite for quail hunting. Corduroy is hot; most men prefer light khaki, which is as enduring in the brush.

The quail hunter may expect to perspire, and should dress with this idea in mind. It is well to take along a good warm coat to wear going and coming; it may be left with the rest of the cache, and often saves stiffness the next day, rheumatism, or worse. The body, hot, wet, tired, is particularly susceptible to severe colds, having lost some of its resisting power in the fatigue incidental to vigorous exercise in quail hunting.

A broad-brimmed felt hat to shade the eyes is excellent; a bandanna handkerchief protects the neck from sunburn and the chafing of the clothing, which is no inconsiderable element in a long, hard tramp.

By saving bulk and weight in every possible way the quail hunter will add materially to his comforts. If he uses a dog he should carry a good-sized canteen and water the dog every half hour or so, giving him a few laps from the crown of the hat if nothing better offers.

Whisky as a stimulant is not a good thing on a quail hunt; it stimulates the heart to an unnatural degree and enables a man to perform perhaps a little more for a time, but the reaction is infinitely worse, and in hill hunting, likely to result in lasting damage to the heart. Cold tea or coffee with milk and plenty of sugar added are infinitely preferable if a stimulant be needed at all. Sweet bar chocolate is a good thing to carry, and the all-round hunter has a few pieces of dried meat, beef or venison, in his pocket to gnaw on at times, often getting along without lunch by such measures. With most, lunch is a welcome rest, and a part of the day's fun, however. But lunch makes one awfully lazy.

SAN FRANCISCO FLY-CASTING CLUB.

With the re-entry scores made up a week ago the fly-casting contests of the club are over for the season of 1910.

The determination of the winners will be by casting off between the Saturday and Sunday men who are in first position in their respective classes for each day.

The club members will enjoy a banquet on the evening of the 10th inst. The past season at the lake has been one of almost phenomenal high averages in every event. In accuracy and delicacy the merit system in scoring was not lacking in severity by the judges. The experts in the lead were kept down to actual results as much as was possible by the judges.

On the other hand, the tail enders were dealt with leniently, not that scores were boosted, they were scored fairly.

With several members there has been a notable improvement in their work since the beginning of the season.

Saturday Class Re-Entry. Medal contest series, Stow Lake, October 1, 1910. Wind, southwest. Weather, fair.

Judges, George C. Edwards, James Watt, F. J. Cooper. E. O. Ritter, Clerk.

NOTE: Event 1—Distance casting, feet. Event 2—Accuracy casting, percentage. Event 3—Delicacy casting; a, accuracy percentage; b, delicacy percentage; c, net percentage. Event 4—Lure casting. Event 5—Long distance lure casting, average. Fractions in Event 2, fifteenths; in Event 3, sixtieths; in lure casting, tenths.

THE MUCH-ABUSED DOGFISH.

A document issued from the bureau of fisheries, entitled "Unutilized Fishes and Their Relation to the Fishing Industries," threw a new light on the subject, inasmuch as it has a good word to say for the dogfish, a much abused and defiled member of the finny family.

Of the many unutilized fish enumerated, we are told by the report, the dogfish, he of the smooth coat, is the most destructive enemy of shellfish. He consumes lobsters, clams, crabs, prawns, mussels and fishes with the appetite of a chorus lady. An estimate gave 100,000 dogfish in Buzzard's Bay alone, which consume in one year a minimum of 640,000 lobsters (think of that, Flossie, Floretta and Fanny of the foothills land) and nearly 4,500,000 crabs, clams and other shellfish.

However, we are told, the dogfish has its uses. It may be salted down for bait. Its skin is valuable for scraping and polishing, and for covering handles of swords and tennis racquets. Its liver supplies oil and its skeleton and fins glue. The industrial demand for it, however, made no appreciable diminution in its numbers. The bureau confidently asserted a new use for the dogfish, that of food. Members of the staff made tests of its food qualities and found it tender and well flavored, besides having the boneless advantage. Enterprising packers at Cape Breton are sending it out canned as "Japan halibut," and quite a business is growing up there, as fishermen are now capturing and curing the fish for the market. As long as the consumers think they are eating Japan or Cape Breton halibut they greatly enjoy it and praise its qualities.

Unquestionably if the dogfish had a more agreeable name and there was not such a deep-rooted prejudice against it because of its disagreeable appearance it would be a favorite in the market as a food fish. There is no good reason why it should not be. Its flesh is of delicate texture and it is tender and sweet. It is not a scavenger. It does not devour other fishes unless they happen to come in its way, nor will it touch refuse matter. It lives on the pick of the crustaceans. It is the cleanest of most of the finny tribes. The same is true of others of the unutilized fishes, such as the skate and sand shark, and even the ugly looking toadfish. If they can be by any kind of masquerading be introduced as a food staple it will tend largely to deplete their numbers and increase the lobsters and crabs correspondingly. Since the substitution of pollock for boneless cod the latter have begun to increase again, and people enjoy pollock as long as they don't know the difference. Let a market be made for fresh, salted, smoked and canned dogfish and there soon will be and end of this scourge of our Eastern coasts.

Did you ever eat a "chupino" made of young dogfish? If not, you have missed something.

Fight With a Shark.—Last week, off Avalon, H. St. Earlscliffe, of Santa Barbara, had an exciting fight with a huge bonita shark which attacked his boat while he was fishing for swordfish. The shark was finally killed and proved to be the largest of its kind ever seen in those waters. It had three rows of large, vicious looking teeth.

ECHOES FROM THE NORTHWEST.

[By August Wolf.]

H. D. MacMullen of Avery, Idaho, where he is a deputy sheriff, says that scores of bears were killed during the fires which swept northern Idaho recently burning over thousands of acres of timber lands. However, he adds, many escaped by taking refuge in holes and water courses. During his search through the fire zone for remains of settlers and forest rangers he found bears, terrified by the flames, climbing to the tree tops, where they burned and fell. Much other game also perished. The fires in the Avery district claimed the heaviest toll during the fires in western Montana, northern Idaho and eastern Washington. More than 100 lives were lost and about 1,000,000,000 feet of timber was destroyed and between 2,000,000,000 and 2,500,000,000 feet killed so that it will have to be logged within the next two years.

Frank Fromm, an officer of the Spokane Rifle and Revolver Club, and Mrs. Fromm, also an expert with pistol and rifle, have started on a trip of 600 miles on horseback; their destination being Mount Chapaka in Okanogan county, Wash., where they will pass six weeks hunting mountain goat and black-tail deer, which are reported to be plentiful this season. Mount Chapaka is in the heart of a wilderness near the international boundary and was the mecca of Hudson's Bay Company trappers more than 100 years ago. The Fromms have visited practically every big game district in the Spokane country during the last 10 years, making every trip on horseback and accompanied by a pack horse, camping wherever night overtakes them, and their home in a veritable museum of trophies of the chase.

Reports from Libby say that the deer season, which opened on October 1, promises to be the best for many years in western Montana. More than 1000 animals were killed in Lincoln county there last year, and it is probable that the number will be larger this season because of the forest fires, which drove the big game to smaller areas. Mountain sheep and goats are also said to be plentiful. Sportsmen returning to Spokane from duck shooting in Lincoln county report that thousands of trout were killed in streams and creeks in places where the recent forest fires have swept over the water courses.

SOUTHERN CALIFORNIA NOTES.

The opening of the season down south is given by a Los Angeles scribe as follows:

Get out the old family blunderbuss and try out the triggers, for today's the day. After months of inactivity, save for dove shooting, the scatter-gun fraternity of Southern California will again have a chance to indulge in their favorite sport, and with quail, ducks and other game birds as their quarry, the Nimrods should have a busy time of it.

The season will be ushered in this morning and will last until February 1. For over a week preparations have been going on, and the downtown sporting goods stores report a big business in shells and equipment. All the nearby gun clubs announce a full attendance for opening day, and in every accessible spot where quail are apt to be found there also will be a hunter—perhaps many.

According to the law, shooting is permissible from half an hour before sunrise to half an hour after Old Sol takes his departure. This means that at 5:18 this morning the bombardment will begin, and according to all indications shooting will be incessant until the legal time has passed. The day following, being Sunday, will probably see even a greater number afield, and if the dope is right all should enjoy good sport.

Close to home shooting for quail will be something of a task this season, for reports indicate that the birds are not as thick as in other years. The San Bernardino valley will still give up its quota, however, and will undoubtedly be the Mecca for those who have not sufficient pull to locate on posted places. The entire country up toward La Canada, Crescenta and most of the San Gabriel river sagebrush patches are plastered with signs which read, "No Shooting," so there will be little doing in that direction.

There are plenty of birds along between Oceanside and San Diego, and, in fact, all through San Diego county. Reports augur well for the Nimrods who visit Temescal, Corona and farther along in Riverside county. Chatsworth Park and the surrounding territory is also expected to provide plenty of sport, and Ventura and Santa Barbara counties will be the scene of some lively splattering.

From the duck clubs nothing but good news is heard. Many of the local ponds, into which water had not been run up to a few weeks ago, were rapidly occupied by the invaders from northern bird resorts, and those fortunate enough to hold membership in any one of the high class local organizations are sure to get their money's worth of scattergun work—in the early season, at least.

Game wardens will be out in force, and it behooves those who have not secured their State hunting licenses to stay at home until they do. An active campaign will be waged all season against those trying to evade the tax, and the eagle-eyed man hunters will be found in all directions. "Sooner" shooting has also been reported, and the wardens will make every effort to grah a few of this class of offenders and make it interesting for them.

RANDOM NOTES.

[By Loch Laddie]

So many good things have been written on the subject of the whip, its use and abuse, that this crusade against unwarranted punishment has had its good effect on the education of man's canine friends and companions. The whip in itself, if used properly, is of great assistance, but before the whip is suggested to anyone as a proper means of punishment, the intended user of the same should carefully ponder over the Greek injunction—"Man know thyself." For, with a perfect knowledge of one's self one may be able to judge whether one's temperament is fit to comprehend just when to apply the lash, or whether outbursts of unwarranted temper might not cause one to chastise the pupil when injury rather than good would result and the puppy's education thus be retarded rather than advanced.

A man who loves his dog naturally seeks to be as humane as is consistent with thorough training, though at times well meant plans for an education of and by kindness are often destroyed by sudden outbursts of temper. The whip properly applied at the right time is of great assistance but permit the psychological moment to pass and good effect is lost.

An animal punished too severely is apt to forget in his anxiety to escape the source of pain what the chastisement is all about; on the other hand, a good, sane tanning, during which the word of the disobeyed command is repeated at each stroke of the lash, is more likely to remain indelibly impressed in the mind of the culprit and create in him a wholesome fear and respect that makes for good for all time.

Let me say here that I am very much opposed to the use of plaited whips sold by the different supply dealers; they are in my judgment too heavy, brutal, clumsy, and often in the hands of an excitable person the butt may be used in place of the lash. Make your own whip. A thick leather strap, one inch in width and about the thickness of an ordinary driving rein will suffice nicely. Attach a snap at one end so it will fit snugly in the hunting coat buttonhole or to a small ring sewed on the coat. It should answer all purposes and more than the whip; is less cumbersome and may be used for a short lead when occasion warrants.

When you whip Ponto strike him across the forelegs with this lash. It will sting for some time afterward, but never causes a bruise. When the chastisement is at an end fix the strap to the animal's collar and lead him a short way, quietly talking to him until you see that the excitement which has caused the punishment has abated; then turn him loose with a kind word of caution and Ponto will thenceforth feel he has merited the correction and thereafter walk in the ways of the wise. Often no more severe reprimand than an earnest talking is necessary; in fact, the entire future of an animal of supersensitive temperament would be ruined by the whip applied without judgment or consideration. So it is always well to first ascertain by observation the temperament of your animal and act in accordance with this suggestion so far as the whip is concerned.

The force collar is often of great assistance and two-thirds of the trainers use them, though personally I have never been willing to admit that an ordinary lead on some dogs did not have just as much effect as the spike collar. By many the spike collar is looked upon as a relic of barbarism, but even this is more to be trusted in the hands of a novice than a heavy whip.

It is always well to remember, however, that better than all the many articles of punishment and correction is a perfect knowledge of your dog's disposition. Learn this and the battle is half over.

Many are interested in knowing at how great a distance should a dog back the other dog on point. Some wish it at sight and others almost up to the pointing dog. The latter seems the best method for the dog that backs at sight, no matter where he is, cultivates the habit of backing whenever the other dog stops, no matter for what reason, and soon permits the other dog to do all the work, reconciling his conscience by the fact that he gives his owner no cause for reprimand. But sometimes the far backing dog gets himself into trouble as the writer once witnessed.

One of the officials of the Santa Fe Road was shooting quail in the South and one of his pair of dogs backed at sight. No matter where he was he immediately respected the other dog's point. The field was cut in half by a drainage ditch heavily grown with ragweed and plume grass. The pointing dog found birds to the right of the ditch, when a left low-quartering bird headed for the ditch the owner shot at it, and he was surprised to hear a howl of pain from his backing dog who had made his respects to the other in the cover of the ditch. Being out of the owner's vision and in the zone of fire, he received the full charge in face. Fortunately the distance was too great to cause much damage, but it showed what might have happened had he been a trifle closer. So from reasons of safety it is always best to have your dog back the other close, even up to the point of scent.

There is a class who hunt a great deal for quail near thickets, and to them the typical single bird dog appeals to their notion as the most satisfactory, for their greatest amount of shooting is done among them, and each single is marked until killed or gets entirely out of the country. So naturally their dogs are worked close in and any attempt at range is crowded out of them, and with the exception of nose they are made more to display their working as a

machine than an attempt at bird sense. There are hundreds of sportsmen who possess dogs of great natural merit, both in nose and going, that are unable to use them, owing to their excessive timidity at the report of a gun; and the more they are led to approach within the sound of a gun the greater their apprehension.

There is another class that will get out and hunt fairly well, but the first time a gun is fired they return to heel and no amount of coaxing can persuade them to leave the heels of the master.

Again, there is the one that cannot be brought to follow any one bearing a gun, and also the one that bolts for home at fast as his legs will carry him upon bearing the first report.

Some of these dogs are naturally gun shy from an excessively nervous disposition, but the most frequent cases that are met with can always be traced to some one shooting too frequently around a young dog that has not as yet become thoroughly interested in birds. Sometimes this trouble may be traced to the fact that the dogs have received a load of shot in their hindquarters, generally considered by some as a cure for the rabbit habit. And in one instance the writer can recall the case of a setter bitch that had been heavily shot over for two seasons suddenly going gun shy without any apparent cause.

But whatever may have been the cause that has developed an antipathy toward a gun, with a great deal of patience the dog can be led to cure himself. Personally in the rearing of puppies the firing of shots at their meal time has not met with the results aimed at. This is to rear the puppy with the expectation of a meal every time the reports of firearms are heard. Some of the rankest gun shy dogs afield I ever saw were raised this way, and while they would stand for all kinds of shooting around them with a meal in sight, the first shot afield sent them bolting homeward.

Before attempting a cure for shyness it is absolutely necessary that the dog should possess all the qualifications to make good otherwise, for it would be useless to go to the trouble if a dog was lacking in other characteristics necessary to his working. Too often dogs are sent to trainers for the purpose of correcting this fault, while they never would even when cured pay the owner for his investment. The trainer did his part in effecting the cure but the dog lacked the other requirements, and of course we know who got the blame.

To commence with your dog take him often afield and encourage his ambition as much as possible. If he decides to point on quails get him to chase until he has almost a mania for same. If he finds brother cottontail hie him on after it—anything to get him excited on game. In a few weeks you will have him perfectly wild. Then take him afield with gun. If a bolter have him on a lead and give him no chance to run away. Get him to chase a few coveys; then shoot. If he shows signs of shrinking roll him around, pull his ears in a playful manner and tell him what a great dog he is. The idea of this is to prevent him from concentrating his mind on the gun. Let him get out and hunt again as soon as he is willing, but do not attempt to urge him on. His instinct will soon tell him to hunt. Let him chase a few more birds before attempting to fire again. Keep this up and you will be agreeably surprised to find how quickly cures have been made. One thing I would especially advise is to change your grounds as much as convenient; for I know of dogs that often associate the territory in their minds in anticipating the noises which have such influence on their nervous system. It might not be out of the way to advise the beginner to be extremely cautious about shooting around a young dog. So let him become well interested and refrain from a bombardment at singles. Of course, if he shows no fear keep it up as much as you wish, but two or three shooting over a youngster of a nervous temperament put him to the bad.

The majority of novices, when commencing dog keeping, look out for an animal of about eighteen months, "over distemper," as the advertisements say. Now if once people can be made to understand that distemper is by no means an inevitable evil, but that on the contrary many dogs never suffer from it at all, while others have the disease quite late in life, one reason for being afraid of having a dog under the age named is done away with. Of course, given a well-trained dog, eighteen months is a nice age, because by then he will have got over minor youthful troubles, should be well developed, full of life, and, indeed, in most ways at his very best. On the other hand, I question whether it is always wise to make such a strong point of having a fully matured dog to start with. One may take it as a fact that very few dogs which come into the market at eighteen months are at all well trained. This is not surprising when one comes to think of it, for those fanciers who have taken trouble with their youngsters' education are not likely to wish to sell them, the greater part of those offered for sale being kennel dogs which have been kept by their breeders in order to see how they would turn out. Such dogs may have had some little training, but it is not likely to have been much good, the average kennel youngsters being kept rather like so many wild beasts. Now an eighteen months old dog is somewhat of a handful for anyone, if not previously trained, and no wonder so many amateurs come to grief. It is all very well to do this and to do that, but as experience teaches one, dog training, if begun late, is a very difficult matter. Why I could give any number of examples of dogs which, having once acquired certain bad habits, have never been cured. It is doubtful

whether one dog in a hundred which has tasted blood has ever been broken off the habit of killing sheep, cats or poultry. Take a lighter case: How many dogs which run after horses and bark are ever cured? So with other habits in the house dog; one will never be really clean, another will steal if he gets a chance, while the third may have acquired the habit of tearing things with his teeth. Now, of course, we do not mean that all mature dogs have these habits, or that all are bad to train, for the very reverse is the case. Still, this matter is on that and worth attention, and those fanciers who prefer having a full grown dog to a puppy should be careful to find out how the animal has been kept, and whether he has acquired and bad tricks. There is a common idea abroad that puppies are difficult to train. Probably most depends upon the temper of the trainer, but in any case it is my opinion that the task of training a puppy is easier and more satisfactory than that of trying to educate a full-grown dog, which has been neglected or kept as a mere kennel dog.

GOSSIP FOR SPORTSMEN.

The opening of the fall shooting season in territory patronized by local sportsmen was generally pleasing as will be indicated by the following press notices:

Local sportsmen by hundreds returned on the late boats and trains Sunday evening, October 2, many laden with limit bunches of fat ducks, others again with empty game bags, tired but happy all of them. Everybody was in a jovial mood and all ready to go out again a week hence.

The Suisun Gun Club members were, to a man, in the duck blinds early Saturday morning. With but few exceptions the breech-loaders were kept exceedingly busy and the webfeet received a hot reception. The opening day shoot was as good as anticipated. Indications for a repeat for Sunday were of so unpromising a nature that many hunters returned to the city on the Sunday morning train, satisfied with the previous day's sport.

On the Allegre mounds, where Governor Gillett and Colonel Dinkelspiel were posted, the birds were present in clouds.

At Green Lodge W. W. Richards and Dr. W. Fuller Sharp connected with limits of sprig, mallard and teal for both days.

At the Marsh Club, Herbert Rose, W. L. Gerstle, George Story and other club members are still on the roll of shooters who can get limits.

The Family Club members, including James Miller, a guest, were satisfied with the duck visitation that dallied at the club ponds.

Frank Maskey, Doc Ayres, J. W. Bourdette and Captain A. W. Du Bray did justice to the sprig and mallard that flew into the Sunrise ponds.

On the Cordelia, Ihis, Teal, Seymour and other inside preserves, while the sport was fair, results were not up to the averages of the resorts east of the railroad track.

On Joyce island the game of feather gathering was played to a standstill for forty-eight hours. A dozen members of the Volante Gun Club all shot limits. Those present were: James Maynard, Pete Howard, Nat Boas, Walter Kaufman, Dr. Leonard, Harry Blatchley, Cal. Brounger, J. D. McKee, John Mahoney and others. Sunday was hot and mosquito limits were also the rule.

On the adjoining Calhoun preserve a jolly party of over a score enjoyed the opening days of the season. Jack Barr shot the first limit, all sprigs and fat ones. The Misses Calhoun were in blinds and accounted for their share of ducks. Thornwall Mulally, Tom Driscoll, William M. Abbott and A. A. Moore Jr., served chilled lead injunctions on many sprig and mallard against further trespassing on the club's preserve.

Joyce Island Gun Club members, Messrs. Folger, Harrison, Smith, Von der Rupp, Goodall, Randall and others found opportunity to keep their guns in commission for both days. They were in a location well patronized by ducks.

W. C. Murdock and James Prior shot limits on the Jacksnipe preserve on Saturday.

English snipe were in evidence in pleasing numbers on some of the Suisun preserves. Quite a few flocks of gray geese have already made their appearance.

Near Collinsville the Blackjack Club opened the season. On the preserve the water is now low, but the birds are not yet overly plentiful. A fair combined bag of mallard, widgeon and teal was shot by Blackjack Lemmer, Dave Harefield, Frank, Kierce, George Sweeney, Baron Hoxie, John Ferguson and Michel Geary.

George W. Ellery, J. Hervey Jones, William Blackwell and Billy Chute shot teal limits above Rio Vista. The big ducks have left that section temporarily.

The Chippis Island Gun Club members opened the season most auspiciously with a big mallard shoot. F. Throckmorton, Joe Ryberg, Sam Stevenson, Ernest Lighter, Walter Traver, B. Boardman, Sergeant White, J. L. Nicholls and Z. Zimms were the club members that caused trouble for many quackers.

The majority of the sportsmen who shot on the Alameda marsh resorts, and they were legion, paid their respects to the ducks on Sunday. The lucky gunners who took advantage of Saturday had the best sport. At almost every duck ground birds were plentiful and limits were numerous.

At Mount Eden the Sunday contingent, with but few exceptions, enjoyed excellent shooting. Sprig and mallard limits were plentiful. Among the shooters in this section who secured good bags were:

Jim McDonald, Bill Keney, Joe Maloff and Joe Pisani. Alvarado gunners also fared well. Among the limit men were: Jack Noonan, F. and J. Dwyer, who dedicated their new pond with a hunch of fat mallards. E. Dreysilius worked the sloughs in that vicinity for a limit bag, mostly teal. John Boyd, shooting on the bay shore, secured a limit early in the morning.

Contrary to general expectation results at "the bridges," a famous duck hunting ground in past days, and at Alviso were meager on Sunday. The Saturday bombardment sent the ducks pell-mell to the open bay waters for safety. Al Morgan shot a combined sprig and mallard limit at "the bridges" on Saturday morning. Oscar Flincke and Jack Snyder also made a limit tally in the same district.

Alameda marsh duck hunters, many of them, added rail and various shore birds to their strings.

Petaluma and Sonoma marsh hunters had decidedly off days. On the Petaluma marsh Sunday a heavy wind spoiled the fun.

Quail hunters, here and there, limit bags were shot, but under the handicap of a hot day and dry ground, conditions that are hard on man and dog. Lee Clark and Frank Herbert shot limits back of the Berkeley hills. Major Jones haggled his initial limit near Walnut Creek. In the vicinity of Martinez and Antioch, many hunters were out in the Contra Costa hills, birds were plentiful, but hard to get at.

The most successful season's opening in the history of the Gustine Club was that today. Ducks were plentiful and everyone is happy. Of seventy-five guns on the grounds on the 1st, more than forty got limit bags, and most of the remainder got bags of fifteen and twenty.

Of the San Francisco members, Messrs. Gower, Stephens, Grim, Weinand, Rink, Iverson and Ashcroft got the limit, also Merrill, Wetherbee, Cotton brothers, Ross, Demont, Harris, Sylvester, Key, Ehrenpfort, Grigsby, Parish, Wooley, Schreierger, Gross, Hatch, Carter of Oakland and Cohn and Irvine of Stockton. About twenty local members also got the limit. One party of seventeen all got the limit.

Greatly to the surprise of nearly all the members, opening day of the Newman Gun Club was very successful, the ducks being more plentiful than for several years past. Limit bags were the rule rather than the exception. Nearly twenty got the limit, and nearly all others came near it. C. N. Jones of San Francisco and Messrs. Warren, Woolner and Hobson of Oakland got limit bags. Water being scarce, little was expected, but the result surprised all. Otto Feudner shot limits Saturday and Sunday on ground nearby.

Good duck shooting was experienced throughout the Sacramento valley October 1, wherever there was water. Limit bags were numerous among duck hunters coming home from the opening day's shoot. Many hunting grounds, particularly in the tule districts, did not have a sight of a duck on account of the absence of water because the Sacramento river has been exceedingly low this year. Lakes and ponds along the river both above and below Sacramento had good shooting. Some hunters returned Saturday, but most of them remained out for Sunday's shooting. The day was most too warm for enjoyable sport. Reports from the quail districts say these birds were plentiful.

The opening of the duck season in the Flour City district brought out more hunters from Stockton than ever seen on the marshes. The various gun clubs were well represented, as most of the members took a two days' shoot and returned to business by Monday. Late Friday afternoon the sportsmen commenced leaving Stockton for their preserves or vantage points, and all of them were ready for the first call Saturday morning.

DOINGS IN DOGDOM.

Mr. John F. Collins, a Brooklyn fancier who was the utility judge for several breeds at the recent San Mateo show is ripe and sodden with misinformation concerning Coast dogdom.

In a report of the show he voids a few paragraphs of either deliberate misstatement or lamentable ignorance founded on biased dictation, as follows:

"That the dog fanciers of the Pacific Coast are going to secede from the American Kennel Club and affiliate with the substitute (the National Dog Breeders' Association) was not to the slightest degree indicated by the entry and attendance at the San Mateo show held September 10. On the contrary it looked as if the work done by this new organization was of a boomerang character and had awakened to renewed efforts the real fanciers who own dogs for the love of the sport and want the game conducted honestly.

"The entry this year at San Mateo, I learned, was decidedly larger than it was last year, many of the exhibitors being ones who had shown only seldom during the last few years, but who came out to show their satisfaction with affairs as they have been conducted by the Pacific Advisory Board during the past."

The writer goes on further to compliment the bench show committee, mentioning each name, inferring that such member was present and taking active part in the show and making capital particularly of the name of one member who was not present at all and of which fact the writer was well aware.

As a matter of fact there were benched but 287 dogs at San Mateo, the count was made by reputable fanciers, last year San Mateo had 315 dogs present, 28 absent.

About thirty per cent of the entries at the show

show last month were put in by members of the Pacific Advisory Committee and the show officials themselves—about a half dozen fanciers all told. Taken, all together, sixty per cent of the dogs were entered by less than a score of exhibitors.

We fail to perceive, on going over the list of exhibitors, that there are "many who have shown only seldom during the last few years"—not a corporal's guard.

On the contrary we find the names of many people who never did show a dog before and some of them did not own the dogs shown more than 30 days before the show. We will here give the club officers and the P. A. C. credit for clutching at a straw degree of energy in digging up dogs and entries that only resulted in the end, of giving sober minded and reflecting fanciers another opportunity to realize what the present conditions are and to what strenuous resources kennel politicians are put to to "handle the opposition in a manner that no insurance company would take a risk on it."

How many breeders, outside of the committee members and club officials exhibit at San Jose?

San Jose closed last week with a total of 204 dogs entered, over sixty per cent entered from San Francisco and Oakland.

Last year the club had 154 dogs benched and 17 absent.

On this comparative showing we fail to observe anything of a boomerang tendency.

A boomerang is a crooked stick. Did we misunderstand Mr. Collins' simile? Did he refer to serpentine cordwood that he had located?

Referring again to digging up entries. We will refer to a case in point.

A certain gentleman in this city owns a collie dog, one of Ellery's breeding and now of course under the ban of disqualification.

The owner recently received a communication, which he states was from a member of the P. A. C., requesting him, in the event of his desiring to exhibit at the ladies' show in this city this month, to make a statement of his case and request the committee to remove the exhibition obstruction and that probably remedial action would be taken. Whew!

Another much touted bit of misinformation was the large and fashionable gathering at San Mateo and the publishing of selected names of prominent society people to give weight to the one day show. The general attendance was the slimmest we ever saw at a San Mateo or any other dog show.

The incalculable value of the Pacific Advisory Committee of the A. K. C. is very pertinently illustrated in the fact that accounts of the proceedings at meetings of the "fifth wheel club" from May to September are bunched and first saw the light of day in the A. K. C. Gazette for October 1st.

We suggest that the first initial letter of the committee be changed. Inferentially, J. A. C. would be more to the purpose. P. A. C. is a misnomer.

H. H. Hunnewell states "That personally I am a little bit sick of being called a member of a gang and all that sort of thing. I think it is up to the directors to put Mr. Vredenhurg and myself right before the public."

That's very easy. Tender two resignations and the directors can publish their acceptance.

The Ladies' Kennel Association of Southern California will hold their initial show in Los Angeles, October 13 to 15. Dr. Henry Jarrett of Philadelphia, will judge all breeds.

Dr. Jarrett was formerly prominent in collie circles back East, he judged in San Francisco if we are not mistaken in 1902. He should draw a large entry at Los Angeles. The show is under A. K. C. rules.

A ladies' kennel association show is announced for San Francisco at Dreamland Rink, October 27. James Watson, heralded in the local press as "one of the leading judges in the country" will pass on all breeds. A. K. C. rules will govern.

The Montana show took place at Helena, beginning September 26. George S. Thomas judged all classes.

Spokane entries closed with a total of 130 dogs to be shown.

The annual field trials of the Pacific Northwest Field Trials Club will be held this year at Harrisburg, Ore., October 3, 4 and 5, and immediately following the trials of the Oregon club will be held at the same place October 6, 7 and 8.

Dr. Henry S. Brown, secretary of the club reports that the entry list is far larger than usual, more than forty dogs have been entered for the all-age and derby stakes.

Birds are plentiful around Harrisburg this year, according to all reports, the dogs entered in the two big stakes will have plenty of Chinese pheasants and bob whites to work on.

J. A. Bolmer of Cle-Ellum, Wash., will judge the Northwestern Club trials. He officiated last year and gave the best of satisfaction. Tudor J. A. Tiedeman of San Francisco has been selected to judge the dogs in the trials of the Oregon club.

Drink Jackson's Napa Soda.

[Continued from page 7.]

Stately having a slight following. General H. made his best showing in the third heat, being third to Brace Girdle, that outrushed Oro Bellini near the finish. In the second heat the favorite made a break half way down the stretch and trotting close to Startle.

Willy made the pace of the first heat furious, going the first quarter in :30½ and reaching the half in 1:01½. The others were strung out, with Startle as their leader. In the stretch Willy tired. Startle came to the front without particular effort and won the race in the next heat by standing off Oro Bellini's attempt.

Grace G. was the choice and a handy winner in the 2:13 pace.

Border Guard was singled out to win the second division of the 2:19 trot, but the award went to Betsy G. in straight heats and slow time. Creighton, starting with one heat in three from Monday, took the next two and the winner's end of the first division of the same trot.

Tomorrow The Harvester will start in an attempt to lower the world's stallion trotting record of 2:01, held by himself. Summaries:

Creighton, h. g. by The Bondsman (Lassell)	1	2	8	1	1

Time—2:05¼, 2:08¼, 2:07.
Sept. 29—Native Belle and Miss Stokes, champion trotters of last year at 2 and 1 years, today won the three-year-old and two-year-old divisions of the Horse Review Futurity in races that were made uncertain by the unsteadiness of each.

Native Belle, who twice won heats in 2:07¼, or at the record she made last October at Lexington, lost two to Emily Ellen by making breaks when out in front. She was favorite, but her manners threw the wagering public into a panic that did not subside until she trotted all the way in the fifth heat and won it in 2:09¼. She did the first quarter of the first heat in :29¼.

Miss Stokes, the first choice in the junior division, broke going away in the first heat, which went to Justice Brooke in slow time. The middle heat was a see-saw between the two most all the way, which Miss Stokes won, and took a record of 2:09¼.

Miss Stokes won the third heat in slower time, though it was as stubbornly contested as the second one. Leftwich won the pacing division as she pleased.

In an attempt to beat his world's record of 2:01 made here a week ago today, The Harvester failed. He stepped the first quarter in less than half a minute, but took :31¼ for the second quarter. The third one was trotted in :30 flat and the last in :30½, making the mile in 2:01¼.

Independence Boy, winner of three races last week, was favorite at \$50 to \$17 over the field of 2:09 pacers. He won in straight heats, Dickie C. forcing him to make the last one in 2:04¼. Summaries:

2:09 class, pacing; three heats; \$1200: Independence Boy, ch. g. by Thistle (Valentine)	1	1	1		
Lady Isle, h. m. (Cox)	2	2	5		
Dickie C., ch. g. (Crocker)	5	3	2		
Beauty Wilkes, h. m. (Gahagan)	3	4	7		
The Philistine, h. s. (McHenry)	6	9	3

Time—2:13¼, 2:16¼, 2:14.
To beat world's record (2:01 for trotting stallions: The Harvester, hr. h. by Walnut Hall (Geers)).. Lost

Time by quarters—:29¼, 1:01¼, 1:31¼, 2:01¼.

Sept. 30.—What followers of the Grand Circuit pronounced the most remarkable heat and finish seen at any point this year occurred in the middle mile of today's 2:05 pace, a race that went to Evelyn W. that was second to Earl Jr. in the pooling.

The Cleveland mare won on the outside in 2:02¾, with the next four lined up across the track and so close together that Evelyn W.'s victory was doubtful.

At the start of the second heat Major Brino picked up Earl Jr. and carried him the first quarter in 30 seconds and to the half in 1:00½. On the far turn Star Patchen made a break and dropped back. All the others kept within range of the leaders, and the rush at the finish was terrific.

Earl Jr. took the first heat in 2:03¼.

After the second heat had been taken away from him, Earl Jr. remained in favor and stood a show to win in slower time until the last eighth, when Evelyn W. rushed along the rail and won by a length from Major Brino, with Earl Jr. third.

Scandal appeared during the final heat of the 2:07 trot, it being disposed of officially by fining Driver Nottingham \$250 for the offense of not trying to win with Hallworthy that had beaten Brace Girdle by inches the second mile in 2:05¼, or time equalling that which Brace Girdle made when she won the opening heat from Nancy Royce with room to spare.

Brace Girdle was the winner of the race, as she stood best in the summary after Spanish Queen, maker of breaks in the first two miles, had taken the final heat in slow time. Hallworthy was last.

After announcing the fine, bets on the heat were declared off, but the auction pools were allowed to stand. In the selling Hallworthy was in highest favor. Brace Girdle was fifth choice.

Sara Ann Patch's victory in the first race, the 2:15 pace, was one that did not bring forth a hard struggle. She was favorite and took all the heats, the best thing in each being the clash for the place between On Time, Altha Boy and The Liar. Summaries:

2:15 class, pacing; three heats; \$1200: Sara Ann Patch, blk. m. by Joe Patchen (Cox)	1	1	1		
On Time, h. g. (Valentine)	2	2	2		
The Liar, h. s. (Snow)	2	4	4		
Altha Boy, h. g. (Hunnell)	3	3	3		
Lowanda, blk. s. (Jamison)	4	5	6		
Cinnamon, ch. h. (Freeman)	5	6	6		
Fred Patchen, h. g. (Jolly)	8	7	7		
Paymaster, b. g. (Whirle)	9	ds			
Marie Doro, b. m. (Hayes)	6	ds			

Time—2:06¼, 2:07¼, 2:07¼.

2:07 class, trotting; three heats; \$1200:
Brace Girdle, h. m. by Tregantle (McMahan) 1 | 2 | 2 | | || Hallworthy, h. g. by Axworthy (Nottingham) | 3 | 1 | 6 | | |
Spanish Queen, h. m. by Onward Silver (R. Macey)	6	3	1

Wilkes Heart, b. g. (Snow)	5	3	3		
Baron May, hr. s. (Sayles)	4	4	5		

Time—2:05¼, 2:05¼, 2:09.

2:05 class, pacing; three heats; \$1200:
Evelyn W., b. m. by The Spy (Shank) 6 | 1 | 1 | | || Earl Jr., g. g. by The Earl (Cox) | 1 | 3 | 3 | | |
Major Brino, blk. g. (Hodson)	2	6	2		
Jennie W., h. m. (Bowdoin)	3	5	5		
Ella Ambulator, h. m. (Murphy)	4	4	4		

Time—2:03¼, 2:02¼, 2:06¼.

October 1.—Three winners at this afternoon's Columbus races, the last of the Grand Circuit, were favorites, and the two pacers landed in straight heats. W. A. did the first mile of the 2:07 class in 2:04¼, and Grace G. the second of the 2:11 event in 2:05¼. Sbaughran and Lucius Todd were the contenders.

Peter Dorsey, on a break when the first heat of the 2:16 trot started, recovered well and finished third to Orlean. In the next heat Orlean stepped in 2:09¼, but was barely able to heat out Peter Dorsey that won the race by getting the next three heats. In all of them Orlean was a consistent trailer. Summaries:

2:07 class, pacing, three heats; \$1200: W. A., hr. g. by Blanalco (Hodson)	1	1	1		
Lady Isle, h. m. (Cox)	3	2	2

Time—2:07¼, 2:05¼, 2:08.

TROTTERS AS THEY ARE AND WERE.

When harness racing was in its infancy trotters were literally "made" by taking a likely horse and drilling him year after year until he had been taught to go fast at what was in great measure an artificial gait, says an exchange. Most of the fast ones were without any trotting inheritance worth talking about, and many of them were twelve or fifteen years old before they had reached the limit of their speed by slow stages of improvement. Dutchman, one of the earliest fast trotters, and the first one to beat 2:35 in harness, was foaled in 1828, trotted his first race in 1838, and was still the best trotter in sight in 1843. Lady Suffolk, the first trotter to heat 2:30, was foaled in 1838, and was twelve years old when she set the harness record at 2:29¼. Flora Temple, the first trotter to beat 2:20, was seven years old before she started in public, and was fourteen when she trotted in 2:19¼.

The typical trotter of today is to the manner born. His ancestors for four or five generations were trotters before him, and he exemplified the force of the laws of heredity by developing extreme speed at the trot about as early and as readily as the thoroughbred runner.

All horsemen who follow the performances of the trotters are familiar with the history of The Harvester 2:01, now the champion of the free-for-all class. Foaled in 1905 he was practically unbroken and wholly untrained when he went into the hands of Ed Geers in the spring of 1908. In September of that year he started in his first race, trotted in 2:10¼, and within a month won four races without losing a heat, winding up the campaign with a record of 2:08¾.

The sensational two-year-old Native Belle is another notable example of the trotter that goes fast by right of inheritance. She went into the stable of Thomas W. Murphy untrained and almost unbroken in January of last year, and in October she set the world's record for trotters of her age at 2:07¼ in a winning race at Lexington. Scores of other instances might be cited in evidence of the fact that very many well-bred colts and fillies of the present day come to their speed without any of the old-time drilling which characterized all training operations in Hiram Woodruff's day.

Some of the twentieth century trotters can go about as fast in their three-year-old form as ever they can and are about as well matured as thoroughbred runners of that age. While the practice of training and racing them as two-year-olds and three-year-olds is bound to have the same effect in many cases that it has had in cutting short the careers of the most promising runners, it still has many advantages from the viewpoint of the breeder, owner and trainer, and all signs point to a vast increase in the percentage of colts races in the next few years.

The cutting down of the best time on record for three-year-olds fairly reflects the progress in early maturity and inherited natural speed which has marked the evolution of the twentieth century trotting horse and which forms an interesting chapter in the history of the breed.—Rural World.

SODA FOR CUTS AND WOUNDS.

In the treatment of cuts on animals a writer in "Rural World" recommends ordinary baking soda. He says:

Ordinary baking soda I have found beats anything that I ever saw used on cuts, even the severest kind, for rapid healing.

One great advantage is that it can be had in almost every household, and is most easily applied. Simply put it on as convenience permits. If rubbed off, dust it on again. I used a table pepper box to apply it.

A young mare I owned had her scalp, including foretop, torn loose in a city stable, likely ran against some low beam, as there was dust and hayseed around the edges. Being sent for I washed it out well with carbolio acid solution, then raised the scalp piece as large as my hand and spread the carbonate of soda evenly over the surface, then patted the scalp as evenly as I could over it and only once after did I have to dust a little soda on the edges, and it healed rapidly leaving scarcely a sign of the ragged cut.

THE FARM

DRAFT HORSES.

In the September live stock market reports of Chicago and East St. Louis heavy draft horses are quoted at from \$220 to \$385, while farm work horses, in the same report, are quoted at from \$110 to \$165. It can plainly be seen by this that a good draft horse will sell for more than twice as much as a common farm work horse. Chunks, which are horses raised from common farm mares bred to draft stallions, are quoted in the same report at from \$160 to \$220.

There is a growing demand in this country for heavier horses for farm work, and a correspondingly great demand for heavy horses for all kinds of heavy expressing and freight handling in towns and cities. All manufacturing concerns, large stores, commission houses, express companies and other concerns having heavy hauling to do, use nothing but very heavy horses. The country in general is developing rapidly and products to be hauled in towns and cities by horses increase materially every year. These conditions call for more heavy horses all the time, making a keen market for the buyer and seller of the desirable kind.

It now rests mainly upon the farmers of this country to grow and supply heavy horses for the markets. The time for cheap range horses of the West has passed forever, and the future horses must be grown on feeds produced on the farm. Prices will continue to be good, because there will be light competition and heavy demand. The average farmer who keeps two teams of horses should at least keep one team of good, large mares and breed these mares every year to a pure-bred stallion of the draft type. In this way the foals from the common mares will be grade drafters, and many of the best of them will sell for nearly as much as pure-bred draft animals for work purposes. By keeping and breeding the grade draft mares to pure-bred draft stallions, foals of larger size and better draft shape will be secured. And if this breeding is continued without crossing, in time the foals will be so nearly pure-bred that only expert horsemen could tell the difference. Such grade horses of good breeding make the best of work horses, and they will sell for very large sums, either to private parties or on the open wholesale horse market. There will never be an over-supply of this desirable kind that will

weigh from 1500 to 2000 pounds. Good matched teams of this class will easily bring from \$500 to \$800.

There is money at present in growing hogs or cattle for the market, and feed put into them represents good gain. But the average farmer can raise from two to three or more good draft horses every year without seriously interfering with the raising of other kinds of live stock, and the returns from them will be largely all profit, since the mares producing the foals more than pay their way in farm work.

The qualifications of a good draft horse are not only that he shall be large but that he shall be powerful in his general makeup. One point of importance in the draft horse is that the hack be short, broad and well muscled. The strong drafter always has a short hack, a long back always indicates weakness in that part. The hind feet of a horse in drawing a heavy load develop a large share of the power, and this power from the hind feet is transmitted through the hack of the animal to the collar, hence the necessity of shortness and breadth of the parts between the shoulders and hips.

The draft horse should have well muscled shoulders and thighs, as these muscles furnish power for the legs. The neck should be short and thick, and the bones of the legs large but smooth. The feet should be broad and heavy, with the hoof material of good quality. The hocks of the strong draft horse must be

The Most Perfect Colt Bit Made

EVERY COLT

Should wear the **ELLIS IMPROVED HUTTON PATENT CHECKING DEVICE** from the very beginning of its training, as it is the easiest, most comfortable and most humane bit on the market. With its use the colt will not fret, worry, pull, toss its head and get into the bad habits so often caused by the use of other bits and checking devices that inflict punishment or keep it under too much restraint, and at the same time you will have absolute control over it at all times.

Patented Aug. 11, 1896. Patent No. 565,681

BEWARE of worthless infringements and Checking Devices claimed to be as good as the **ELLIS IMPROVED HUTTON PATENT CHECKING DEVICE**. Illustrations of some of these check bits and devices are made to look as near like the genuine as possible, but the article itself is very different, and will not give the same results.

ALL GENUINE are stamped **G. S. ELLIS & SON** on the supporting strap and back part of Check Rein. Any that are not so stamped are not genuine.

FREE—Our new Catalogue No. 45, with wholesale discount sheet, the largest, finest and most complete Horse Goods Catalogue ever published, is ready for distribution. It contains illustrations, descriptions, and guaranteed to be lowest prices on Harness, Horse Boots, Horse Clothing and Tack Goods of every description. Every horseman should have a copy. You can save many a dollar during the season by buying direct from us, as we are now selling direct to horsemen, allowing them from 30 to 50 per cent discount from retail prices. Write us today for a copy and we will take pleasure in sending it to you all charges paid.

THE BEST LINIMENT

OR PAIN KILLER FOR THE HUMAN BODY

Gombault's Caustic Balsam

IT HAS NO EQUAL

For the Human Body—It is penetrating, soothing and healing, and for all Old Sores, Bruises, Wounds, Felons, Exterior Cancers, Boils, Corns and Bunions. **CAUSTIC BALSAM** has no equal as a Liniment.

We would say to all who buy it that it does not contain a particle of poisonous substance and therefore no harm can result from its external use. Persistent, thorough use will cure many old or chronic ailments and it can be used on any case that requires an outward application with perfect safety.

REMOVES THE SORENESS—STRENGTHENS MUSCLES
Cornhill, Tex.—"One bottle **Caustic Balsam** did my rheumatism more good than \$120.00 paid in doctor's bills."
Price \$1.00 per bottle. Sold by druggists, or sent by express prepaid. Write for Booklet R.

large and perfect, since they are, perhaps, the most important part of the legs in doing heavy work.

Although the draft horse is used for drawing heavy loads and of necessity must go slow, yet a desirable animal is reasonably active and handles himself well in all places in harness.

OVERRUN IN BUTTER.

One pound of pure hutter fat will make all the way from one and one-fifth to one and one-fourth pounds of finished hutter. This extra weight of the finished hutter over the butter fat, which is called the overrun, is due to water, salt and caesin incorporated with the hutter in the making. Water constitutes from 12 to 16 per cent of the overrun; salt, from 1 to 3 per cent, and caesin about 1 per cent. Sixteen per cent of water in hutter is all that is allowed by law, and the hutter maker who works more than this percentage into his hutter is not only violating the law, but is turning out a product that has poor flavor and keeping qualities. The amount of caesin also affects the keeping qualities, but the salt, of course, aids in the preservation of the product, as well as giving it a flavor.

Many creameries depend almost entirely upon the overrun to pay dividends and running expenses. They will pay about as much per pound for butter fat as they receive per pound for finished hutter. For every dollar paid out for hutter fat they receive about \$1.25 for the hutter made from it, the one-fourth gain being represented in water, salt and caesin in the finished hutter, which costs the creamery man scarcely nothing. The salt is the only item of cost, but even this is almost too small to be of any consideration.

Before the pure food laws came into effect, and before weighing and testing became common in dairies and creameries, the overrun in hutter received small consideration. But now with the law to satisfy and keen competition on all sides in the making and selling of good hutter, the hutter makers are careful to count the overrun in every churning, and especially in making up the monthly balance and statements to customers furnishing cream. The dairymen who sell cream to the creameries receive no advantage of the overrun, but the creamery does.

The butter maker can largely control the amount of water in the hutter which he makes. Soft hutter will hold more water than hard hutter. If he wishes his hutter to hold more water he works it in a warm condition; if he wishes it to contain a smaller amount of water he works it in a colder condition. The softness and hardness of hutter may depend on several different causes; namely: kinds of feeds given the cows, liberality of feeding, period of lactation and the temperature at which the hutter is churned

and washed. The creamery, of course, can take advantage of only these last conditions—the temperature of churning and washing. When a large percentage of water is to be incorporated in the hutter it is churned into large lumps in a wash water at a higher temperature than used in churning. The object is to soften the hutter so that it will hold and retain more moisture than it would at a lower temperature.

Although the government allows 16 per cent of moisture in hutter, and creamerymen may churn and work it at any temperature they wish, yet either the creamerymen or private individual who wishes to produce the highest grade product will not churn and work his hutter at too high a temperature in a soft condition, as both a high moisture content and the working in a soft condition impair the flavor and general good qualities of hutter. Butter now is in such strong demand everywhere at high prices that little difference is made between the price of butter containing much moisture and that which contains little. Yet there is some difference, and those who wish to establish a reputation for the best product will be careful to work no more than 12 to 14 per cent of moisture in their butter.

Salt improves both the flavor and keeping qualities of hutter, as well as increasing its weight at a small proportionate cost. Butter containing a small proportion of salt poorly dissolved will taste saltier than with a larger proportion well dissolved. Hence dissolve salt well and work it in well, at the same time working out the mottles.

SPINELESS CACTUS

DISTRIBUTION.

The United States Department of Agriculture will distribute in the spring of 1911 about 10 tons of spineless prickly pear cuttings. The stock is grown mainly at Chico, California, and at Brownsville, Texas. Out of 30 varieties which the Department has grown in the past, eight or ten are now being propagated for distribution to those who may wish to test them as an economic crop. These plants will not succeed outside of California, the coastal region of Florida, Texas south of the Texas-Mexican railway, and southern Arizona. These will not succeed where the temperatures remain below 20 degrees F. for any length of time.

All applications should be made to the Office of Farm Management, U. S. Department of Agriculture, Washington, D. C., before the first of January, 1911.

The farmer who can grow the feeds on his own farm required by his poultry flock is in position to make the most money in the poultry business. The main thing for the laying hens is variety.

SPECIAL ADVERTISING.

Wanted, For Sale, and Miscellaneous advertising under this head will be set in nonpareil type (same type below) and will be published at the rate of 2 cents per word each insertion, or 6 cents per word by the month. Count each abbreviation and initial as a word.

National Telegraph Inst., Cincinnati, Philadelphia, Memphis, Davenport, Ia., Columbia, S. C., Portland, Ore.

FOR SALE—Hiawatha, dark bay mare, 6 years old, 15½ bands high; will weigh about 1140 lbs. Sired by Baron Bretto 39103, a son of Silver Bow; dam Silver Bells by Silver King 3622; second dam Only Hope by Hark, son of Brigadier. This mare is in foal by a son of Clarence Wilkes. Hiawatha is sound in every way, perfectly gentle to drive and handle and is a good roadster. She has had no work since a 2-year-old but at that time could step a mile in 2:58. Price \$225.

Anona L., a full sister to Hiawatha, 5 years old, weight 1100 lbs., is a light bay mare very stylish and handsome. Is city broke and very gentle to drive, afraid of nothing. She has had a limited amount of work but has shown a mile in 2:20½, a half in 1:08½ and quarters in 33 seconds. Price \$500.

Red Devil, bay stallion, 5 years old, 15½ bands high, kind and gentle, suitable for anyone to drive, fears nothing. Sired by Baron Bretto 39103; dam Jeanette by Ottawa; 2nd dam by Snuff Box. A 2-year-old filly sired by this horse won the colt race at Marysville, July 4th. Price \$300. For further particulars address F. W. Kelley, Breeder and Sportsman, San Francisco.

TO THOROUGHbred HORSE-OWNERS. FOR SALE AT A SACRIFICE.

First six volumes of Bruce's American Stud Book, practically unused. Cost \$10 per volume. Hard to get.

Two volumes of American Horse Breeders' Guide and Hand Book, with 100 tabulated pedigrees of leading stallions (work now out of print).

The American Thoroughbred, by Capt. Thos. B. Merry.

Two volumes Goodwin's Turf Guide for 1907. Cost \$12.

About 50 thoroughbred catalogues, including Rancho del Paso, Palo Alto, Rancocas, McGrathiana, Nursery Stud, Marcus Daly and all the great stock-farms of the country. These are handier than a studbook, because they are tabulated.

Price, \$50 for all these works.

LIVE STOCK NOTES.

Time is well spent working with the colt, and the man who never takes time to pet and train his colts never has well broken horses when they grow up.

All through its growing period, halter the colt frequently and allow it to stand at short intervals tied where it can be watched. A good time to do this is when feeding is being done at morning and evening.

The well broken horse is one which is not restless when being tied or while being harnessed or hitched to the plow or wagon. The good horse stops at the command, and never starts till it is told to do so. Intelligent training will bring perfect habits.

Colts and young horses should have bone and muscle-producing feeds in their rations, such as clover or alfalfa hay, bran and oats. Mature work horses, having the bones already developed, and doing hard work, can economically consume more corn, timothy hay, and like carbonaceous feeds for producing energy. Oats and bran, however, are a good mixture with the feed for work animals.

It seems that the predicted low prices for hogs is not going to materialize this fall. Just now the prediction is that they will again go to 11 or 12 cents this winter. At least, the prospects for the farmer having hogs to sell this fall and winter look good.

Cowpeas, wheat bran, and shorts are good rations in the brood sow's feed, as all of them contain protein for developing flesh and stimulating milk flow. Just before and for a few weeks after a litter of pigs is born, bran in the sow's slop will aid in stimulating milk flow and also in regulating the bowels, having a cooling and cleansing effect on the system.

Farmers in general cross hogs more than other animals, but this is bad practice. Crosses with hogs will soon result in scrubs, which will make poor gainers on feed furnished. Stick to one breed.

Milk quietly, quickly, cleanly and thoroughly. Cows do not like unnecessary noise or delay. Commence milking at exactly the same hour in the morning and evening and milk the cows in the same order.—B. F. Forbes.

Never breed a nervous, high-strung sow that is always ready to jump and run at the drop of the hat.

Isn't He Worth Saving?

Why trade off or sell at a heggarly price a good horse just because he "goes lame," "throws a curb" or develops some other blemish? There is nothing in the way of Spavins, Curbs, Splints, Windpuffs or Bunches which will not yield readily and permanently to treatment with

QUINN'S OINTMENT.

Dr. E. H. Davenport, a prominent physician of Sheridan, Ind., writes: "I have used a number of remedies for the removal of curbs, splints, thickened tendons and tissues generally, but for the last two years I have not been without Quinn's Ointment. I have tested it thoroughly at different times, and say without hesitancy that it is the only reliable remedy of the kind I have ever tried." Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write us for circulars, testimonials etc.

SMITH GUNS
HUNTER ONE-TRIGGER

WEATHER conditions aren't always at their best in the "blind" or in the skiff. That's when you don't want your gun to balk or double.

YOU CAN easily wear gloves if you shoot with a Hunter One-Trigger. And without "fiddling." It won't balk—because there is no friction to make it balk. And it won't double—because there is no second trigger to get tangled up in your glove.

The very newest Hammerless Smith Gun is the 20-Gauge Hunter One-Trigger. Weighs only 5 1/2 to 7 lbs. Just the finest gun that can be made at the low price.

SPORTSMEN!

Write to-day for the 1910 Game Laws.

A booklet of invaluable information to every sportsman. Complete Game Laws revised July 1, 1910, of every State in the Union and Canada. Also list of guides who know every haunt of birds, game and fish in New York and Maine hunting regions.

WINCHESTER

Repeating Shotguns and Shotgun Shells.

For successful hunting, a reliable gun and sure shooting and strong shooting shells are required. Winchester guns and shells are just this kind. The Winchester Repeating Shotgun is the only one endorsed by the U. S. Ordnance Board and used by as many as 450,000 sportsmen. As for Winchester shells — "Leader" and "Repeater" — they have won high national average nine different times and are as popular among sportsmen as Winchester guns. On your next trip, shoot Winchester guns and shells,

The Combination That Makes Successful Hunters.

No matter how plentiful the game is, the hunter must have the **RIGHT** Ammunition, for on it the success of the day frequently depends.

Remember

REDUCINE

THE HARVESTER, 2:01

(Subject to change without notice.)

Driven by E. F. GEERS.

The world's champion trotting stallion. The most valuable stallion in the world today of any age or breed. The best managed horse on earth. From the day he was foaled to this date not one mistake has been made with him.

MR. HARRY BURGOYNE

The Manager of the Great Walnut Hall Farm, the man who bred The Harvester, Native Belle and many other Futurity Winners.

WALNUT HALL FARM,

Lexington, Ky., November 8, 1909.

The Reducine Co., 90 West Broadway, New York City:

Gentlemen—We have used several cans of Reducine on enlargements of different kinds with the most satisfactory results.

HARRY BURGOYNE,
Manager Walnut Hall Farm.

CHIEF JUDGE ADVOCATE, GEN. JOHN SPLÁN

The man who advertised THE HARVESTER and induced Mr. Uihlein to buy him.

VICTORIA HOTEL, NEW YORK, Oct. 24, 1909.

The Reducine Co., 90 West Broadway, New York City:

Gentlemen—In these strenuous times everybody in business is looking for expert testimony and also expert service. That is the sort of material that all successful ventures try to attach to themselves, and I am more than pleased to give it as my legal opinion that your remedy called "Reducine," is one of the products of the earth that are almost as necessary for the comfort and success of the horse as hay and oats.

I have recommended it to many of my friends, and I have used it myself personally on several different cases that have been produced by veterinarians and people supposed to be learned on the subject, as utterly incurable.

I am making these broad statements not for any personal feeling that I have for you, but for the good of the cause and the comfort that it may bring to some suffering horse. Horses have made me all the cash dividends that I have ever had, and brought me many pleasures in other ways, and it is always a great pleasure to say or do anything that might add in the least to their comfort.

Yours very truly,

JOHN SPLÁN.

EMPIRE CITY TRACK.

New York City, N. Y., August 25, 1910.

The Reducine Co., 90 West Broadway, New York.
Gentlemen: I have used Reducine on several different horses during the past two or three years. The results have been very satisfactory. I wish to recommend it.

Very truly yours,

A. McDONALD.

THIS IS WHAT ..REDUCINE will do..

REDUCINE cures by absorption.

REDUCINE is as easily applied as paint.

REDUCINE leaves no scar, blemish or discolored hair.

REDUCINE causes no pain, but will relieve it instantly.

REDUCINE will remove a wart from a horse, dog or cow.

REDUCINE removes the enlargement and you can work the horse all the time.

REDUCINE will relieve deep-seated lameness in shoulder, hip, back or stifle.

REDUCINE will grow a new hoof quicker than any other preparation in use.

REDUCINE will cure any case of thrush in one week and will remove the soreness from a corn.

REDUCINE will cure any case of Cracked Heels, Scratches, Malenders or Sallenders with one application.

REDUCINE will cure the most obstinate case of Collar Gall, Sore Neck, or any other indolent sore; will remove Proud Flesh, and it is the best possible dressing for a recent wound.

REDUCINE requires no bandages, no preliminary treatment, no after treatment—simply paint one coat over another once a day for ten days—nothing more.

REDUCINE will cure the worst case of Sprung Tendon, Bog Spavin, Curb, Splint, Big Knee, Sprung Hock, Capped Hock, Capped Elbow, Shoe Boil, Wind Puffs, or any other similar joint or bursal enlargement.

REDUCINE, if applied at once, will destroy Tetanus germs, thus preventing Lock-jaw from nail, calk or other wound, and will cure Mange or common Eczema on horse or dog with one application.

REDUCINE is the best possible application for Swelled Glands, etc., and will remove any enlargement from any animal, whether on its legs, throat or body, and will leave no trace of the swelling ever having existed.

NOTICE.

REMEMBER, REDUCINE is not a WASH or a LINIMENT.

N. B.

REDUCINE will take all the soreness, stiffness, bunches and thickness from old second-hand, worn legs and make them look, feel and work almost like new.

P. S.

If your horse's throat is sore, is swollen from distemper, cold or old age, apply REDUCINE at once. It will relieve the soreness and reduce the swelling—leaving the neck and throat as fine and clean as it ever was. If the horse's wind is thick on account of this sort of swelling, REDUCINE will make him sound again in the wind.

P. P. S.

In case of recent injury, no matter how caused, apply REDUCINE as soon as possible. No other treatment will relieve the soreness and remove the inflammation so quickly and certainly.

The following firms in the territory in which this paper has a large circulation are large buyers of

REDUCINE

and always have it in stock. These firms buy direct of us in most cases, but as the majority of retail dealers are supplied by their jobbers, this list is necessarily incomplete. Please preserve this list for future reference.

THE SUCCESS of the Fresno Fair last week shows what can be done with a county fair when the right men are in control and all working for the same end. It was the best fair ever held in the San Joaquin Valley and so well was it appreciated that about forty thousand people went to see it. Read what the Fresno Republican, one of the leading dailies of that section, has to say of it:

The Fresno Fair of 1910 is now a thing of the past. At 10 o'clock last night the big gates closed, denoting the end of the most successful show of its kind in the history of the San Joaquin valley.

That it was a phenomenal success from every viewpoint is admitted on every hand. It could have been greater and could have been better, but it was so far superior in every detail to all previous county fairs in this part of the State that there is little room for comparison. The great and unprecedented success of this year's fair can be attributed to two causes. In the first place, it was given the unanimous and undivided support of the press of the San Joaquin valley. In the second place, it was accorded the moral and financial support of each member of the board of directors. Much credit is due President George L. Warlow, Vice-President E. Dickinson and Secretary Powell, who labored faithfully and diligently to make the annual fair a success. In this connection, the unusually effective publicity work of B. F. Fly should be mentioned.

Combined with this united effort there was the undeniable advantage gained by securing the moral and financial assistance of the business men and farmers of the entire valley. The management of the fair advertised to the people that there would be something doing every minute. That these men kept their word cannot be doubted and every person who saw the fair will concur in this statement. Never before in the history of California fairs was there a daily program that could compare with the one just concluded.

There is no reason why the successful fair of this year cannot be repeated next October. The work of accumulating exhibits for next year will begin at once and by the time 1911 rolls around Fresno will boast of a fair that will surpass the 1910 "show" in every respect. In the near future a canvass of the rural districts will be made with the idea in view of securing the hearty co-operation of every farmer. In order to make the 1911 fair a bigger success it is proposed to place stock on the market in order to raise money to erect additional buildings at the Fair Grounds. New stock sheds and a machinery hall are needed and if the moral and financial support of the farmers can be secured there is no reason why the fifth annual fair cannot be made superior to all previous shows. The cordial and valuable aid given the 1910 fair by the people of the San Joaquin valley is appreciated to the fullest extent by the management.

The Republican prints a long list of figures showing the gate receipts for each day. The largest sum taking it at the gate during one day was on Wednesday, when the receipts were \$4726, and the gate receipts for the week totaled \$17,726. The street railroad company whose lines lead to the fair grounds rung up 98,000 fares during the week which is evidence that the estimate of forty thousand visitors is not far wrong. The reason of the great success of the Fresno fair is pretty well stated by the above extract from the Fresno Daily Republican. The directors of the organization were alive and energetic. They interested the local press and the people and got them all to work in harmony and on a clearly defined plan. They advertised fine exhibits and plenty of amusement for the people. They kept things moving. There was "something doing every minute" just as they had promised. There were not many harness horses and fewer runners at the fair and the majority of these were of ordinary calibre, but they were classified so as to make contests and they raced well and fast for the \$200 purses. Between heats there was always something to keep the crowd interested, and people forgot the hard seats and the hot weather while looking at the different performances. Thousands viewed the stock exhibit and those made in the pavilion. They found many things to instruct as well as amuse them and they not only went one day, but came back the next. The excursions run at reduced rates from towns within a radius of one hundred miles were a great feature and helped to swell the crowds. In short the Fresno Fair of 1910 is an object lesson

to boards of directors in other localities that have allowed their fairs to go by default since the State ceased aiding them with an appropriation. We think it would be an excellent thing for the Fresno Fair Association to publish a complete report of its 1910 fair in pamphlet form and distribute it throughout the State. It would do a vast amount of good in many ways.

STATE AND COUNTY FAIRS should offer larger prizes in the breeders' classes. It has been suggested, and we think the idea should be given consideration by the State Board of Agriculture, that a first prize of \$200, second prize of \$100, and third prize of \$50 be offered for the best pair of California bred three-year-old draft geldings or mares of any breed, to be shown in harness, and prizes of the same value for the best pair of California bred three-year-old carriage horses of any breed shown to an appropriate vehicle. In awarding these prizes conformation, style and manners should be considered and the adaptability of the pair to the work for which it was bred and mated. The breeding of the sire and dam of each animal so far as known should be required at the time of making entry. California is a great horse breeding State, but there is much haphazard breeding done here. It is all very well to offer prizes for the best stallions and mares of the different breeds, but there should be a well defined effort made to encourage breeders to produce a high class finished product. Induce the heavy horse breeder to bring to the fair a pair of drafters that are well broken at three years, have size and style, are well mated, and when hitched to a heavy wagon know how to handle it. An entry of a half dozen or more pairs in a class of this kind would be an object lesson worth while, and when the prizes are awarded the judges should have the data from which to tell the spectators as to how the prize winners were bred and how cared for while growing. Let the same thing be done with the carriage pairs. Prizes of the magnitude suggested should attract many entries and lead to the production of more good looking, sound, well mannered, finished horses. With a show ring in front of the grand stand these contests would arouse nearly as much interest as the races.

THIRD PAYMENTS have been made on 161 colts and fillies entered in Pacific Breeders' Futurity No. 10, for foals of 1910. In spite of the falling off in breeding during 1909, the number of third payments in stake No. 10, is only seventeen less than the number of third payments made in stake No. 9, which shows the great popularity of these stakes with the breeders of this coast. Nothing has encouraged the breeding of high class trotters and pacers on the Pacific Slope any more than the giving of the Pacific Breeders' Futurity and it must be a pleasure to the directors of the Pacific Coast Trotting Horse Breeders' Association to know that their efforts to provide such a stake are appreciated. Stake No. 11, which is for foals of mares bred this year will close for the nomination of mares on December 1st. Every mare that has been mated with a good trotting or pacing stallion on this coast during this year should be named in this stake. It has the usual guaranteed value of \$7250.

NEW CHAMPIONS are appearing frequently this year. The Harvester set a new record for trotting stallions at 2:01, Uhlman a new record for trotting geldings at 1:58¾, Colorado E. placed the record for three-year-old colts at 2:05¾, and now Joan, a four-year-old mare, has won the Transylvania, in the first heat of which she took a record of 2:05¾, a reduction of the record held for many years by Fantasy 2:06. The other two heats were in 2:07½ and 2:06¾. Joan is a daughter of Directum Spier, a stallion bred by Mr. D. J. Campau, proprietor of the Chicago Horseman. Directum Spier is by Directum, whose four-year-old record of 2:05¾ is still unbeaten. The dam of Joan is Sarah W. 2:18¾ pacing, by Hal Braden 2:07¾. Joan won the \$10,000 trot at Columbus, and her winning of the Transylvania last Monday from a field of eight high class horses stamps her as one of the greatest trotters that has yet appeared. Joan was driven by trainer McDevitt, who drove Grace in the Kentucky Futurity the first day of the meeting, thus setting a new record for a driver, he being the only driver to win a Kentucky Futurity and a Transylvania the same year. McDevitt also drove the winner of the Champion Stallion Stake with Grace, the Kentucky Futurity winner.

MORE GOOD HORSES FOR CHASE'S SALE.

It looks as if Chase's Second Annual Fall Sale would have the best lot of trotting bred horses seen in the salesring at 478 Valencia street for some time. The consignment from La Siesta Farm are all excellent animals. Mr. Burke's health compels him to leave the farm for a while and he therefore concluded to sell everything but the old broodmares and their produce that are not yet grown. He will send to the sale seven trotting bred horses, a pair of work horses and a saddle horse. Among the trotting bred horses are Laddie G. by Zombro, Siesta 2:22¾ by Iran Alto, Mogolore 2:21¾ by Iran Alto and several others, and Mrs. Burke has consigned her favorite road mare Sis Hopkins by Willeroo, son of McKinney. The list is as follows:

Siesta, 2:21¾, h. g. by Iran Alto, dam Wanda 2:14¾ by Eros. Siesta has a matinee record of 2:19¾ and a trial of 2:14¾. He will make some one a good matinee horse or a fine road animal.

Laddie G., black gelding by Zombro, dam by Whips. This horse has a matinee record of 2:16¾ and has trialed in 2:14¾. He is a fine large gelding and a fine roadster. He is a trotter.

Mogolore 2:21¾, is a trotter with a trial of 2:15. He is by Iran Alto 2:12¾, dam Lady Belle Isle. Mogolore took his record in a winning race at the California State Fair this year.

Lord Isle is a three-year-old pacer by Zolock out of Lady Belle Isle. He is a registered stallion, well broke and can be driven by a woman. He has paced a trial in 2:16.

Sis Hopkins is Mrs. Burke's buggy mare, and is a perfectly gentle, well mannered trotter. She is by Willeroo, son of McKinney. She has trialed in 2:25, and being a seal brown in color, and of excellent conformation should make some one a fine roadster. She is six years old.

Alta Belle is a dark chestnut, five-year-old mare by Alta Vela 2:11¾, dam Ida Belle, full sister to the great brood mare Annabelle by Dawn 2:18¾. She is 16.2 and is broke single and double.

A brown gelding, no breeding given, is broke to harness and to saddle and is a good gentle horse.

A pair of work horses, nine years old, weighing 2800. These horses are good anywhere, being gentle and reliable at all work.

Henry Helman consigns two extra good horses to the sale. Senator H. is a pacing gelding, 16.1, foaled 1905, by Diablo 2:09¾, dam by Montana Wilkes. He is a sound and all right and is now being driven by a lady on the streets of San Jose. He will make a good road horse or a high class business horse. Another that Helman will send to the sale is Lou W., more than a half sister to Lady Mowry 2:09¾ and a full sister to Four Stockings the fast colt that Mr. F. J. Kilpatrick owns. Lou W. is a handsome bay, sired by Kinney Lou 2:07¾, dam Electress Wilkes 2:28¾ by Nutwood Wilkes. She is a three-year-old and one of the best bred young mares in the country.

Thos. Ronan, formerly owner of the Pleasanton track, consigns his road mare Dolly Ronan to the sale. She is by Arronax, dam Dolly Withers by Aberdeen, second dam by Geo. Wilkes. Dolly Ronan is a four-year-old, a hay, and is a fine road animal. She is stunted to Birdman.

A. Ottinger, who has been collecting quite a lot of horses lately, consigns three to the sale—Lilly Dillon, a registered mare by Sidney Dillon that is a fast trotter, Lady Irene another fast trotter by Athadean, and Merrylin, a fast trotting mare by Merry Mac 2:19¾, son of McKinney. These three mares are all in fine shape, good matinee material and all well bred. Don't let any well bred Sidney Dillon mares get away from you at anything like a fair price these days.

J. M. Roberts of Santa Rosa, sends a fine roadster, 15.3, by Washington McKinney.

Hans Frellson has consigned his good matinee horse Monk 2:19¾. This horse is in good shape and can equal his mark almost any day. Hans also sends the filly Hazel Mac by Milbrae to the sale.

Judge E. A. Bridgeford of San Francisco consigns a fine gaited saddle horse to the sale. This horse is well bred, stylish, has five gaits and is a nice size, weighing 1125 pounds.

John Grimes of Petaluma has sent seven trotting bred mares and geldings to the sale. Five are by the well-bred son of McKinney known as McMyrtle, whose dam is by Iran Alto 2:12¾, and second dam Nettie Nutwood by Nutwood. Nettie Nutwood is the grandam of Sterling McKinney 2:06¾, so McMyrtle is a remarkably well-bred horse. The other two horses are by Clay S. 2d and Gossiper. These horses are all trotters, well broken and out of mares by Gossiper, Sldmoor and Eclectic. Mr. Grimes also sends three high-class combination saddle horses.

Henry Rohmer of Eureka sends the black gelding Oakwood Derby 2:23¾ pacing. This is a six-year-old, sired by Chas. Derby, dam Algerdette, the dam of Christohel 2:11¾. Thornway 2:12¾, Allandora 2:18¾, Sable Steinway 2:23¾, etc., by Allandorf. Oakwood Derby is a good game horse and has shown miles in 2:13, halves in 1:04 and quarters in 31¾ seconds. Wears no hobbles and very few boots.

John Wathen, Healdsburg, has consigned the German coach stallion Molock 6923. This horse is a dark brown, weighs 1550, and stands 16 hands. He has fine action and is guaranteed a sure foal getter.

There will be several others to announce next week.

Drink Jackson's Napa Soda.

NOTES AND NEWS

Alameda county has a new driving club.

The old mile track on the Alameda marsh is being put in fine order.

Helen Stiles won handily at North Yakima in 2:12 $\frac{1}{4}$, 2:13, 2:11 $\frac{1}{4}$.

There is a big demand for well mannered saddle horses of the walk, trot, canter kind.

The Abbe 2:04 has a clean record this year—eleven starts and eleven first moneys to his credit.

Lohengrin by Charleston, formerly owned in Los Angeles, won a five-heat race on one of the Ohio half-mile tracks last month.

See the advertisement in this issue of the sale of horses and farming implements at the famous Oakwood Park Stock Farm next Saturday.

The rain of this week has done very little damage and a vast amount of good. It was heavy enough to start the feed in some sections.

Uhlan 1:58 $\frac{3}{4}$ trotted a half mile in 57 $\frac{1}{2}$ seconds at the North Randall track one morning recently. He was hitched to a cart and was driven by Doc Tanner.

Birdie, a six-year-old mare by Alto Vela 2:11 $\frac{1}{4}$, dam Zorilla, dam of Prince McKinney 2:29 $\frac{1}{4}$, by Dexter Prince, is now owned by Mr. G. Anderson of Ephraim, Utah.

The Plunger, a hay horse by The Bondsman, won the 2:13 trot at Lexington last Tuesday, the best time 2:08 $\frac{1}{4}$, and was sold directly after the race to Isadore Schlessinger of Vienna, for \$6000.

Vera Hal, the handsome little daughter of Expressive Mac, paced a heat below 2:10 for the second time this year, when she won the second heat of the 2:10 pace at Fresno last week in 2:09 $\frac{1}{4}$. She also won the race.

Star Pointer made a heavy season at his new home in Tennessee this year. He was exhibited on the half-mile track at Columbia during the fair there and was received with great enthusiasm by the citizens of the pacing State.

The Denver horse Daybreak by Tenrose, reduced his record to 2:08 at North Yakima week before last when he beat Zombronut by Zombro a neck in the second heat of the 2:10 trot. This is the fastest mile ever made by a trotter in the northwest.

Some well bred three-year-olds, two-year-olds and yearlings by Chas. Derby, Stillwell (full brother to Diablo and Demonio) will be sold at auction at Oakwood Park Stock Farm next Saturday. This is the final closing out of all the horses on the farm.

Beatrice McKinney, bay mare by Wallace McKinney, won two heats and second money in a six-heat race at Troy, Ohio, September 23d. She was either first or second in every heat, all of which were trotted between 2:19 $\frac{1}{4}$ and 2:21. Her two heats were 2:19 $\frac{1}{4}$ and 2:20.

Chas. De Ryder reached Pleasanton last Saturday with his horses, all landing in fairly good shape. Mr. De Ryder had some good and considerable bad luck while on his eastern trip, but has begun getting things in shape to train another good string of horses for the races of 1911.

Havis James, who trains for Mr. R. J. McKenzie, will soon arrive at Pleasanton with Mr. McKenzie's horses and will train them there this winter. Among the horses is Joe Patchen Jr., one of the greatest pacing prospects in the country, for which Mr. McKenzie gave \$8000 recently.

Dutch and Wanderer, the two sons of Athby that were caught on a ringing tour last year, both started at the half-mile track at Murphysboro, Illinois, September 8th. Dutch won the 2:14 trot, the fastest heat of which was in 2:17 $\frac{1}{2}$, and Wanderer got fourth money in the 2:12 pace.

Jack Groom has moved his horses back to Alameda. He is superintending the rehabilitation of the Alameda mile track, which is said by many horsemen to be the best training track on the Pacific Coast, especially in summer. The track will be ready for working on in a few days.

There is always a story that goes with a fast horse. Joan, the four-year-old mare that took a record of 2:05 $\frac{1}{4}$ in winning the Transylvania this year, is out of Sarah W. 2:18 $\frac{1}{4}$ pacing by Hal Braden. The story is that Sarah W.'s owner never thought very much of her abilities as a race horse and when she was injured so that she could not be trained any more, he did not care to breed her until he was offered a free service to Directum Spier. Joan was the result of this mating.

Miss Jerusha 2:08 $\frac{3}{4}$ is a new 2:10 performer for Zombro. The record was made in a winning race at North Yakima.

This is probably the last season that Sonoma Girl will be seen on the turf, as next spring she will be bred to The Harvester.

W. J. Kenny, who started the horses so successfully at Fresno last week is giving them the word at Hanford half mile track this week.

The Australian government has decided to establish farms for horse-breeding in several centers of Queensland. A shortage of horses suitable for military service is said to be the cause of the departure.

G. W. Bonnell, of Redlands is working a few colts and fillies by Zolock, Direct Heir and R. Ambush that he intends taking across the mountains to race next year.

There will be matinee racing at the San Jose Driving Park tomorrow, and a day of purse racing will be given on Saturday, October 2d, the program for which will be announced soon.

Mr. H. Imhof's mare Della Lou by Kinney Lou 2:07 $\frac{3}{4}$ won the 2:20 trot over the half mile track at Hanford last Tuesday in straight heats, the time being 2:27 $\frac{1}{2}$, 2:26 and 2:26. The track was slow from rain the previous night.

The Kentucky Trotting Horse Breeders usually get fine weather for their October meeting, but rain spoiled the races several days this year, necessitating several postponements last week.

San Jose is to announce a four days' fair and race meeting by January 1st. This shows enterprise and with proper management it will be a big success. August, 1911, is the month during which it is to be held.

If you want a good, sound, serviceable roadster take a look at the two young horses H. Busing has consigned to Chase's sale to take place Monday evening, October 31st. They are well broke and handsome in appearance, besides being well bred.

Reports from all sections of the country are to the effect that the demand for finished horses is growing stronger every day. Saddle horses are especially in demand, and trotters and pacers with speed are eagerly snapped up at fair prices.

The good pacing stallion Ray o' Light (3) 2:08 $\frac{1}{4}$ winner of two futurities, is offered for sale by his owner, E. S. Train of Santa Cruz. Mr. Train is going out of the horse business and offers this young horse at a sacrifice. See his advertisement.

The three-year-old daughter of Lou Dillon 1:58 $\frac{1}{2}$ now has a record of 2:08 $\frac{3}{4}$ trotting. She is the champion mare's first foal and is by John A. McKerron 2:04 $\frac{1}{2}$. Her parents and grandparents were all born in California. She will not be raced again until 1912, when she will be five years old.

H. G. Smith of Pleasanton, who took Baron Bowles east and entered him in pacing races, sold him to Owens & Son of Kansas, who continued racing him on the half-mile tracks. As Baron Bowles shows better at the trot than the pace, the new owners will put him back at the diagonal gait next year. He has a record of 2:25 trotting.

Early Alice 2:06 $\frac{1}{4}$ has been sold to Europeans. She was bred to Zombro this year and is thought to be safely in foal. Zombro served an even hundred mares this year, of which twenty-nine had records. Last year he also served 100 mares and 85 of them had foals. Geo. Beckers will try to sell Zombro before returning to Los Angeles next month.

The great Allentown, Pennsylvania, fair is held on grounds provided with a half-mile track. It is in the heart of the "Pennsylvania Dutch" country and the people are great beer drinkers. It is said the receipts at the beer bar were \$15,000 this year, and not an intoxicated person was seen on the grounds.

There will be lots doing at Oakwood Park Stock Farm one week from today. Several races will be held on the farm track between local horses and an auction sale of all the trotting and draft bred horses remaining on the farm will be held. Preparations are being made for a large attendance. Buy your tickets to Danville.

Driver McDevitt who drove Grace in the Kentucky Futurity has received the prize of \$200 offered by Mr. W. E. D. Stokes to every driver who marks a Peter the Great foal in 2:10 this year. Grace is the third of the get of Peter the Great to get into the 2:10 list this season, the others being Miss Stokes (3) 2:09 $\frac{1}{4}$ and Peter Donna 2:08.

C. A. Harrison's mare Niquee by Joe Patchen, is showing some of the speed her genial owner has always claimed for her. She was a good second to Haltamont in 2:10 $\frac{1}{2}$ at North Yakima, and two days later won a \$500 purse in straight heats in 2:18 and 2:13 $\frac{1}{4}$. She is being trained this year by Dick Wilson. She will get into the 2:10 list one of these days.

Andrew Robertson, of the Allendale Stock Farm, Melbourn, Australia, who came to San Francisco last July and remained here several weeks, going to see the races on the Grand Circuit afterwards, purchased about 25 thoroughbreds and fifteen trotting bred horses in Kentucky last month and will ship them to Australia from New York, via the Cape of Good Hope.

The race between Zombronut and Daybreak in the 2:10 trot at North Yakima, was a hot one. Zombronut took the first heat in 2:10 $\frac{3}{4}$ and was then beaten a neck the second heat in 2:08, the fastest heat of the year on the Coast, and Daybreak got the next two heats in 2:10 and 2:13 $\frac{1}{4}$. Goldennut and Lee Crawford, the only other starters, were distanced in the second heat.

The 2:18 pace at North Yakima was one of the hardest fought races of the year. The Colusa horse Geo. Woodard by Senator B. and the Oregon mare Miss Jerusha by Zombro were the heat winners. Miss Jerusha won the first heat in 2:08 $\frac{3}{4}$, then Geo. Woodard took the next two in 2:11 $\frac{1}{2}$ and 2:11 $\frac{1}{4}$, but was beaten the next two by Miss Jerusha in slower time.

It looks as though Fred H. Chase & Co. would have the best lot of horses to sell at 478 Valencia street on the evening of October 31st, that have been seen in a salesring in this city for some time. Anyone wanting a good roadster, business or saddle horse should be able to get just what suits him, and there will be several good matinee prospects among them.

Another great four-year-old that raced well as a three-year-old is Soprano by Bellini. She took a record of 2:08 $\frac{3}{4}$ as a three-year-old and won some good races. Last Monday at Lexington she won the 2:09 trot in five heats, defeating Brace Girdle who won the first two heats, Startle and four others. The dispatches only give the best time of the race as 2:06 $\frac{1}{4}$ but do not say what heat it was made in.

Another world's record for The Harvester 2:01. At Lexington Thursday of this week he lowered the two-mile trotting record to 4:15 $\frac{1}{4}$. The former record was 4:17, held by Cresceus. The Harvester trotted the quarters of this record-breaking performance as follows: :33 $\frac{1}{4}$, 1:04, 1:36, 2:08 $\frac{1}{4}$, 2:41, 3:12 $\frac{1}{4}$, 3:44, 4:15 $\frac{1}{4}$. It will be noticed that the last quarter was in 34 $\frac{1}{4}$ seconds.

W. P. Murray, a prominent amateur driver of Cleveland, O., has had the misfortune to lose his great road mare, Bifty Duck, four-year-old record 2:25 by Bezant 2:21 $\frac{1}{2}$, dam Bay Duck, by Guide, son of Swigert, who was struck by lightning while grazing in a field at Donerail, Ky., one day last week. Bifty Duck was foaled in 1889, and is the dam of Reuben S. 2:10 $\frac{1}{4}$, Murray McKerron 2:23 $\frac{1}{4}$, and Marion D. 2:26.

Next Monday is the day set for closing entries to Chase's Second Fall Sale. This is to be a sale of good horses, and the consignments already made have attracted more attention from buyers than those sent to any sale for a long time. As it will be a sale to attract good buyers, it is the place to sell a good horse. See Chase immediately as Monday is the last day that pedigrees can be received for the catalogue.

In the second heat of the Kentucky Futurity for two-year-old trotters, Justice Brooke, the winner, trotted the first half in 1:03 $\frac{3}{4}$, when he had all the others beaten, and finished the mile easily in 2:09 $\frac{1}{2}$. The two heats of this race in 2:11 $\frac{1}{2}$ and 2:09 $\frac{1}{2}$ averaged a quarter of a second better than the two heats of Native Belle last year when she won in 2:13 $\frac{1}{4}$ and 2:07 $\frac{1}{4}$.

Mr. Frank J. Kilpatrick, recently took up his trotter Wilmar and drove him on the New York speedway. Although Wilmar was soft and unseasoned, Mr. Kilpatrick defeated Nathan Straus's speedway champion Denver 2:11 $\frac{1}{4}$ one heat, the first time out, but owing to the big gelding's lack of condition was beaten in the other two heats. A few days after Wilmar won at the speedway matinee in straight heats, defeating Weiland's Innerguard in 1:07 $\frac{1}{2}$ and 1:08 $\frac{1}{2}$.

The Los Angeles Driving Club has chosen the following officers for the ensuing year: L. J. Christopher, president; Dr. William Dodge, vice-president; Albert Deffenbach, treasurer; E. J. Delorey, secretary; William Garland, C. C. Colyear, Henry Messmore, J. W. Snowden, J. W. Nickerson, R. B. Moreland and C. A. Canfield, directors. It is thought that the new track at Agricultural Park will be ready for working horses on by the first of January and perhaps far enough advanced so that races may be held on Christmas Day.

Of the forty-two new 2:10 trotters, thirteen are four-year-olds or younger, as follows: Miss Stokes 2:09 $\frac{1}{4}$, two years old; Colorado E. 2:05 $\frac{1}{4}$, Lou Bilings 2:08 $\frac{3}{4}$, J. Malcolm Forbes 2:09 $\frac{1}{2}$, George Todd 2:09 $\frac{1}{4}$, Emily Ellen 2:09 $\frac{1}{4}$, three-year-olds; Joan 2:05 $\frac{1}{4}$, Billy Burk 2:06 $\frac{3}{4}$, Dr. Treg 2:08 $\frac{1}{4}$, Vito 2:09 $\frac{1}{4}$, Captain George 2:09 $\frac{1}{4}$, Gold Dollar 2:09 $\frac{1}{2}$ and Martha Tipton 2:09 $\frac{1}{4}$, four-year-olds. In addition, Native Belle, a three-year-old, has equalled her two-year-old record of 2:07 $\frac{1}{4}$, while Soprano, a four-year-old, has lowered her three-year-old record of 2:08 $\frac{3}{4}$ to 2:07 $\frac{1}{4}$ —making in all fifteen 2:10 colt trotters.—Horse Review.

Lilly Dillon, the handsome bay mare sent to Chase's sale for October 31st is both standard and registered. She is by the great Sidney Dillon, sire of the champion trotter Lou Dillon 1:58½, of the big money winner of this year, Helen Stiles 2:09¼ and a half dozen more in the 2:10 list. Lilly Dillon's dam is Lilly Stanley 2:17¾ a great race mare by Whippleton. Lilly Stanley is one of the great brood mares of California. Lilly Dillon is a fast matinee performer and should be worth a large sum as a brood mare, as she comes from great producing parents. Whippleton, sire of Lilly Stanley is sire of the grandam of Athasham 2:09¼, Nogi 2:10½, Donasham (3) 2:13¾, Matawan (2) 2:19½, etc. Don't overlook Lilly Dillon at the sale.

Good Irish hunters are always held at high prices. England, and in fact every other hunting country in the world, now looks to Ireland for its best hunters and pays handsomely for them. The less valuable ones are in great demand for military purposes, and buyers for the armies of Germany, France and Austria are reported to have been busy in Ireland all through the summer, paying as high as \$1000 each for officers' mounts. As showing the prices current for high class hunters Alfred B. MacLay and James J. Fox, who attended the recent Dublin Horse Show, tell of an experience in trying to buy a good green one. Mr. MacLay's first offer of \$1500 was met with "The shadow of him on the wall is worth more money," and a final bid of \$6000 failed to tempt the tenant farmer who had bred and schooled the horse. —N. Y. Herald.

Justice Brooke 2:09¼, winner of the Kentucky Futurity for two-year-old trotters at Lexington last week, is bred well enough to suit the most fastidious stickler for developed ancestry and trotting pedigrees. His sire, Barongale 2:11¼ is by Baronmore 2:14¼ (son of Baron Wilkes 2:18 and May Wagner by Strathmore, second dam Mary S. 2:28 by Alcantara 2:23). Barongale's dam is Nightingale 2:10½ by Patchen 17023, and his second dam is Mabel, the dam of Cresceus 2:02¼, by Mambrino Howard. The dam of Justice Brooke is Expectation, dam of Major Delmar 1:59¾, Fruition 2:15¼ and Fruity Worthy 2:25¼, by Autograph 6146, a son of Alcantara 2:23 and Flaxy by Kentucky Clay 194. The second dam of Justice Brooke is Miss Copeland 2:25½ dam of Black Dart 2:09¼, Copeland 2:09¼, etc., by Almont Star 1929. The pedigree of Justice Brooke is all producers and performers.

Mr. H. E. Armstrong, owner of Pleasanton Training Park, returned home from his eastern trip on Thursday of last week. He stated to a Times reporter: "Yes, I have returned and am glad to get back home. I had plenty of amusement while away and although my horses did not do as well as I could have wished, those things must be taken as they happen. I traded Demonio Wilkes for a bay mare by Strathline by Strathmore and think I have brought home a good horse. A common trouble over east this year was the pink eye, many strings affected with the malady. In regard to the park and present plans for the winter season you may say I shall personally superintend things there this year. We shall do considerable work around the stables and track within the next few weeks and get everything in ship shape for the horses when they begin to arrive. I look for a big year and have had promises of many new strings. Just how many of them will come of course I cannot say but in any event there will be many more than last year."

There was good racing at the Stadium last Sunday, the San Francisco Driving Club putting on a program of six races. Fast time was made in several of the events and some of the finishes were so close that the judges had to be careful in placing the horses at the finish. The winners and the best time made by them were: Dr. Hammond, trotter, 2:18; King V., pacer, 2:15; Dalta A., pacer, 2:25; Alfreda D., pacer, 2:12½; Little Dick, pacer, 2:12½; Dickens B., pacer, 2:20. Little Dick's mile in 2:12½ is the track record for a pacer without hoppers. President Kenney's W. J. K. was a good second in the second heat of the 2:15 class, which was won by Walter Wilkes in 2:13¼. About 5000 persons were out to see the sport during the afternoon and the close contests were greatly enjoyed. A heavy fog rolled in late in the afternoon and obscured the horses on the hack stretch during the last race.

The many friends of John Mackey, for many years associated with the Rancho del Paso and prominent throughout the country as a breeder and trainer of fine horses, will be pleased to learn that Mackey will return to Sacramento about the first of next year, after having made a trip to South America and a number of European points. Mackey, according to a communication received by a Sacramento friend, left New York June 30th for Buenos Ayres with 146 head of thoroughbred horses, 17 of which were from his Woodland ranch. Of this lot 96 were disposed of in the South American metropolis, averaging \$580 each. Leaving South America, Mackey left for London and Berlin, where he anticipates the sale of 50 horses before returning to his native heath. According to the letter received here Mackey believes Argentina to be one of the finest countries in the world and believes that, were he still a young man, he would locate there and take up some of the government land. Friends of Mackey will be surprised on his return to find him wearing a full growth of beard, for the first time in forty years.

A remarkably fine photograph of a race finish is one on the front page of the Breeder and Sportsman this week. It was taken by the well known photographer L. Richardson of this city, during the Woodland race meeting in August last. Wild Bell, driven by John Quinn, Katalina driven by L. B. Daniels and the pacer Joe Brown driven by his owner Mr. A. B. Rodman, are making a neck and neck finish in 2:11¼ in the second heat of the Driving Club race, won by Wild Bell. The photograph was taken in 1-600 of a second, yet the detail is clear in every particular and the photograph a sharp, snappy one showing that the plate was properly exposed, while motion is completely stopped.

If there was ever a "happy nick" it has been the mating of Peter the Great 2:07¼ and Orianna 2:19½ by Onward. This mating first produced Czarevna 2:07¼, the phenomenal three-year-old of 1909, next Grace 2:08, winner of this year's Kentucky Futurity last week, and also of the Champion Stallion Stake at Lexington this week, and the third production of the pair is the colt Kilpatrick that has already taken a two-year-old record of 2:19¾. Here are three full brothers and sisters that it would be hard to match anywhere. The two-year-old colt was named in honor of Mr. Frank J. Kilpatrick of New York and San Francisco, and if nothing happens him he will also march into the 2:10 list as a three-year-old next season.

Ed. R. Smith, the well known horse auctioneer of Los Angeles, was in San Francisco for a few days this week. He has sold many California thoroughbreds and trotting bred horses in Utah this summer. He took over car loads from the late E. J. Baldwin's Santa Anita Farm, also from Chas. Boots' farm at Milpitas, besides many trotting bred animals picked up here and there from owners and breeders. The pacing mare Eagletta 2:11½ was in one consignment and was purchased by Mortison Brothers of Mayfield, Utah. Mart Mortison, one of the firm, purchased the mare Lady Orange Blossom by Petigru 2:10½ out of a mare by Alto Rex, second dam Last Chance by Mambrino Patchen. Tuttle Bros. of Manti, Utah, bought a handsome five-year-old by Rey Direct 2:10, dam Eagletta 2:11½. J. Sawyer of Salt Lake was the buyer of a fine filly by Zomhro 2:11, dam Last Chance by Mambrino Patchen. Botton de Oro 2:11¼ went to Shippen Bros. Almon Robinson of Fillmore, Utah, was the buyer of five two-year-old thoroughbred fillies from the Baldwin ranch that were fine individuals and well bred. The horse market is good through Utah and the farmers are keen buyers, being quite willing to pay for pedigree, but demanding that a good horse go with it.

AVERAGE GRAND CIRCUIT SPEED.

To win often on the Grand Circuit a horse must have speed a little better than the average time made in the races. If you contemplate crossing the mountains next year with your horse or horses bear this in mind and consult the following table of the average time made at the different Grand Circuit meetings of 1910:

	Trotters.	Pacers.
Kalamazoo	2:09:20	2:07:46
Detroit	2:10:50	2:07:42
Cleveland	2:10:50	2:05:91
Buffalo	2:09:66	2:07:88
New York	2:09:66	2:08:32
Readville	2:08:09	2:08:78
Hartford	2:08:93	2:09:09
Syracuse	2:09:18	2:09:11
Columbus (first week)	2:09:64	2:06:28
Columbus (second week)	2:10:16	2:07:45

COMPLETE CLOSING-OUT SALE.

At Oakwood Park Stock Farm, Danville, Contra Costa County, an auction sale will be held next Saturday, October 22d, which will close out all the horses remaining on the farm. There are some well-bred three-year-olds, two-year-olds and yearlings by Chas. Derby, Stillwell and other sires, besides draft horses, general purpose horses, farming implements, wagons, harness, etc. This sale is final and absolute of all the horses and implements on the farm. Busses will meet the trains at Danville to convey people to the farm. The boat leaving the ferry building, San Francisco, at 7:30 a. m. will connect at the Oakland mole with the train for Danville, and those attending the sale can return the same evening.

ANSWERS TO CORRESPONDENTS.

Dr. David Herspring, Woodland.—Mambrino Wilkes 6083 was foaled in 1874. He was bred by B. J. Treacey, Lexington, Kentucky, and passed through several hands to Irvin Ayers, San Francisco. He was sired by Geo. Wilkes, dam Lady Chrisman by Todhunter's Mambrino (son of Mambrino Chief 11 and a mare by Hunt's Commodore), second dam by Pilot Jr. 12.

Gold Rose 12596 was foaled in 1886. He was by Sterling 6223, dam Madam Baldwin, dam of Bay Rose 2:20½ by The Moor 870, grandam Daisy King by Ben Lippincott, son of Williamson's Belmont. Daisy King never produced a standard performer so far as any of the records show. Madam Baldwin has two producing sons—Bay Rose and Pasha. Bay Rose sired the dam of Ruth Dillon 2:06¼ and Pasha sired the dam of Toggles 2:08¾.

RACES AT SAN JOSE.

Tomorrow, Sunday, October 16th, a program of three good matinee races, under the auspices of the San Jose Driving Club, will be held over the San Jose track, and really good hard racing is expected.

There will also be a regular race meeting given on Saturday, October 22 at which time three or four regular races will be given, and a number of other horses will be started and given time records, as the following stables have one or more that they are anxious to mark: Budd Doble, J. S. Phippen, Ted Hayes, T. W. Barstow, Jack Villa, C. C. Crippen, H. Scott, three head from Ray Mead's stable, and Mr. F. S. Turner will send one or two down from Santa Rosa to put in the list.

I will say further that the Chamber of Commerce and the Merchants' Association of San Jose, have joined forces with the San Jose Driving Club, and are going to promote a four days' race meeting and stock show to be held next August; the program of the stakes and purses will be announced on January 1, 1911, at which time dates will be claimed, etc.

It has already been agreed upon to offer all stakes and purses open for entries on January 1, 1911, and for those entered before February 1st one per cent to enter; for all entered before March 1st, 2 per cent to enter; entered before April 1st, 3 per cent; entered before May 1st, 4 per cent, and before June 1st, the closing time, 5 per cent; and 5 per cent deducted from the money winners.

We have studied this plan over very carefully and think it at least worthy of a fair trial, which we will endeavor to give it. There will also be cash prizes for the stock exhibits, the merchants have agreed to close the stores one day during the meeting. It looks as though a good meeting is assured, and one that can pay its way, with a \$2000 subscription from the town.

A number of stables will return here from the races this month which will enliven the place, as it has been very quiet for the past month, only about 60 horses being quartered here at present. The track is kept in perfect condition, and is in fine shape to train or race over.

Following are the entries for the matinee races to be held at San Jose track tomorrow, Sunday, October 16th.

First race, 2:20 trot and pace—Lovelock, Mike, John Christenson, Ishmael.

Second race, 2:25 trot—Kiss-Kee-Dee, Sidmont, Dr. B., Stambolita, Jim.

Third race, :40 trot—Native Bell, Lady Patrone, Valdo, Rex, Billy L.

Yours very truly,

RAY MEAD.

A CONSISTENT NON-WINNER.

The racing career of the brown pacing stallion Branham Braughman 2:24¼, during the present season offers a strange and significant commentary upon the vigilance and scrutiny with which the sport of harness racing is conducted in this country. This horse has participated in ten races this year, up to the close of last week, representing thirty-one heats, of which he won not one, while he has never been behind fourth money, and is still eligible to the class in which he first started in July. At Grand Rapids he was twice second in 2:06¼ and 2:07½, winning second money. At Kalamazoo he was twice second in 2:04¼, and again won second. At Detroit he was twice second in 2:04¼ and 2:05¼, winning third. At Cleveland he was third in 2:04 and second in 2:08, and again got third. At Buffalo he was third in 2:07 and second in 2:05½, taking second money. At the Empire track The Abbe was not better than two heats in 2:12 and 2:07, but Branham Braughman was second both times. At Readville he was third in 2:05¼ and 2:06¾. At Indianapolis he was second in 2:07¼ and fourth in 2:12½. At Columbus he was third in 2:04¼ and 2:08¼, the first week, and fourth in 2:03¼ and second in 2:04¼, the second week. He has won second money four times, third money four times and fourth money twice, but he has never won a race, obviously because to do so would give him a record which would militate against his interests in the green classes for next season.

There is nothing particularly commendable in this sort of manipulation, but the authors of it are not half as reprehensible for doing it as are the racing officials for permitting it, and the incompetence or worse of these officials is aggravated by the fact that it is not the first time that these tactics have been employed by the same party. It is easy to see the little game that is being played when attention is called to it, but so many things have escaped the attention of the present presiding judge on the Grand Circuit that it is not strange that he has failed to see anything even so plain as this.—Trotter and Pacer.

John H. Shults, whose retirement from the horse breeding business is announced, has been prominent as a breeder since 1886, when he paid \$28,000 for Pancoast 2:21¼, and established Parkville Farm, now in the city of Brooklyn. For almost a quarter of a century he has been the most liberal buyer of trotting-bred horses in the country, collecting and dispersing half a dozen large studs. It is estimated that he has paid \$1,000,000, or more for horses.

The Bingen family is making a great showing this year, and it looks as if the old horse himself would lead the list of sires of new performers for 1910

PACIFIC BREEDERS' FUTURITY NO. 10.

Third Payments of \$10 Each Made on the Following
161 Colts and Fillies in This State.

A. Allen's foal by Tom Smith, dam Wahtoke by Athene.

J. W. Zibbell's foal by Tom Smith, dam Kate Lumry by Shadeland Onward; foal by Tom Smith, dam Evangie by Shadeland Onward.

BON GUY AND SUNOL.

California papers have proclaimed Bon Guy 2:11½, by Bon Voyage (3) 2:12½, the fastest three-year-old ever seen in that State. Seems to us we remember a California-bred filly called Sunol who, when three years old, lowered the world's record for her age to 2:10½ over a California track, and to high wheels, Shadeland Electioneer, Leland Stanford, Charles Marvin and Palo Alto Farm!—"Are ye then so soon forgotten?"—Horse Review.

No California papers that we have seen have proclaimed Bon Guy the fastest three-year-old ever seen in the State, but they have given him credit of holding the fastest race record of any three-year-old trotter raced here. Who is it 2:12 held the California three-year-old trotting race record until Bon Guy reduced it this year. Sunol's record was made to high wheels, but the race was a walk over, and she was accompanied by a runner. She scored down twice before Marvin was ready, went away on the third attempt and was rated carefully to heat her record. It was a great performance, and while Electioneer, Leland Stanford, Charles Marvin and Palo Alto Farm are not forgotten, the three-year-old colt Bon Guy who made his mark of 2:11½ in the second heat of a hard fought race against five other high class three-year-olds, holds the California record for a three-year-old trotter in an actual race.

ALAMEDA COUNTY DRIVING ASSOCIATION.

A more energetic or enthusiastic organization of horsemen than the one with the above name is not known on this coast. This association has only been organized three weeks but in that time it has accomplished a great deal. The meeting to organize the horsemen of Alameda county was called on Monday evening, October 3d, and the thirty horsemen present went to work in earnest. The old Oakland Driving Club, which had been doing little lately, turned over its hooks to the new association, which immediately got to work and effected an organization. The officers elected were the following:

President, J. O'Keefe of Oakland.
Vice-President, G. Schreiber of Berkeley.
Secretary, G. A. Nissen of Alameda.
Treasurer, P. J. Howard of Alameda.
Track Superintendent, J. Groom of Alameda.

An initiation fee of \$10 with monthly dues of \$1 were agreed upon.

Permission having been secured, the land on which the old mile track at Alameda is situated was secured and the club decided to re-grade it and put it in shape for training horses over.

Track Superintendent Groom was instructed to go to work on the track at once and it is now nearly completed and this week horses were being jogged on over half of it. By the 23d instant the track will doubtless be in condition to race on, and the club at its meeting next Monday evening will arrange a program of matinee racing for Sunday, the 23d instant, to which the public is cordially invited.

At a meeting held last Monday evening at the office of J. D. Patery, Eleventh street, Oakland, several new members were received. Secretary Nissen's reports of previous business, which was complete in every particular and favorably commented on by all present, showed that Treasurer Howard had received enough to pay all bills to date and had cash on hand to the amount of nearly \$100. Every bill for track work and other expenses had been settled, and the club is in a flourishing condition financially and otherwise.

It is the purpose of the association to give frequent matinees during next spring and summer and to put the track in such shape as to attract professional trainers to it. The association certainly has started out on the right track and the officers and members are all live energetic gentlemen who have the best interests of the light harness horse at heart and who purpose making the Alameda County Driving Association one of the leading organizations in California. The next meeting will be held Monday evening next, October 17th at the office of J. P. Patery, on Eleventh street, between Franklin and Webster streets, Oakland. An invitation is extended to all horsemen to be present.

THE GEO. L. WARLOW SALE.

At Fresno last week during the fair, Mr. Geo. L. Warlow held a sale of trotting bred stock from his breeding farm. Ed. R. Smith of Los Angeles acted as auctioneer and a very successful sale was held. Thirteen head were disposed of for a total of \$2317, an average of close to \$180 per head. The highest priced animal of the sale was the bay mare Sextette, eight years old, sired by Athahlo, dam Donnostrine 2:26, full sister to Listerine 2:13½, by Athadon, second dam Lustrine by Onward. Sextette is a fast natural trotter and could take a fast record if trained. She went for the sum of \$405, the bid of Mr. M. L. Woy. Sextette is safely in foal to Black Hall 48645, hy Ozono, son of Moko, and out of Maggie Yeazer, dam of Walnut Hall 2:08½, sire of The Harvester 2:01. The record of the horses sold follows:

Dameo, b. g., 1908, hy Stanford McKinney, 45173, dam Lustrine hy Onward; S. Tiele, Oleander. \$145
Santanette, blk. m. 1902, hy Nearnut 2:12½, dam Santa hy Ellerie Wilkes, with filly foal at foot hy Athahlo; F. B. Stockdale\$130
Mahel W., h. m., 1904, hy Athadon, dam Minnie Wilkes by Red Wilkes; E. C. Snell, Dinuha. \$150
Donatrine, 2:26, b. m., 1893, hy Athadon, dam Lustrine hy Onward; C. D. James.\$150
Sextette, h. m., 1902, hy Athahlo, dam Donnostrine 2:26 hy Athadon; M. L. Woy.\$405
Teresa, hr. f., 1909, hy Stanford McKinney, dam Sextette hy Athahlo; T. Caesar\$117.50
Miss Finnicky, h. m. 1904, hy Athahlo, dam Bessie by Botsford; T. Caesar\$230
Sadie Lou, h. f., 1909, hy Athasham 2:09½, dam Miss Finnicky hy Athahlo; D. Bachant.\$175
Bessalie, h. f., 1908, hy Athadon, dam Bessie hy Botsford; S. E. Wilkinson; Riverside.\$150
Nearlast, b. c., 1909, hy Athadon, dam Lustrine hy Onward; E. T. York, Sanger.\$105
Norlie, h. f., 1909, hy Stanford McKinney, dam Narcola hy Athadon; E. C. Snell, Dinuha.\$120
Miss Macklie, h. f., 1909, hy Stanford McKinney, dam Strathalie hy Strathway; M. L. Woy.\$225
Sanatine, hy Stanford McKinney, dam Sextette hy Athahlo; R. G. Johnson\$155

Some good racing was held at the Roseburg, Oregon, fair. The track is a half mile one, and rather slow. In the 2:20 trot, Hiram Hogboom started Queen Alto by Iran Alto and won in straight heats, the last heat in 2:18½, very good time on that track. In a special trot the mare Dolly McKinney by Washington McKinney won, but the fastest heat of the race, the third, went to Mr. F. E. Alley's filly Phyllis Winn by Bon Voyage out of Mahel Winn by Zomhro. This heat was trotted in 2:24½. Two days later Phyllis Winn won a special trot in straight heats, the fastest in 2:26½.

**SAN FRANCISCO DRIVING CLUB—
OCT. 9 STADIUM TRACK.**

First race, 2:20 trot, for Julius Kahn Cup.
V. Verilhad's Dr. Hammond.....2 1 1
E. Deomonchini's Reno D.....1 2 3
J. V. Galindo's Harold K.....5 4 2

Time—2:08½, 2:08½, 2:09½, 2:09½.

Oct. 6.—Heavy rains prevented any racing at the Kentucky Trotting Horse Breeders' Meeting today, and the program was postponed until tomorrow. An announcement was made that the meeting would be extended one day if the races could not be finished within the time originally set for it to end.

Oct. 7.—The harness races here were postponed again today on account of the condition of the track. The Transylvania stake and the rest of the Thursday-Friday card will be raced Saturday.

Oct. 8.—A heavy track delayed the start of the harness program today until after 3 o'clock and of the scheduled events only two were attempted, the pacing division of the Kentucky Futurity worth \$2000 and the 2:19 trot for \$1000. Neither was finished. After Leftwich won the first heat of the pacing futurity and Twinkling Dan the next two, this race and the 2:19 trot in which Betsy G. won two heats, went over until Monday.

Oct. 9.—The Kentucky Futurity, pacing division, value \$2000 (unfinished from Saturday):
Twinkling Dan, b. c. by Dan Patch Twinkle (Murphy).....5 1 1 1
Leftwich, b. f. (J. Healy).....1 4 3 3
Baroness Evelyn, ro. f. (McDonald).....2 2 2 2
Mary Chironette and Joe H. also started. Best time, 2:10½.

2:19 trot, purse \$1000 (unfinished from Saturday):
Betsy G., br. m. by Wiggins (Cox).....2 1 1 1
Morning Light, br. g. (Jones).....1 2 2 7
Carnation, hr. g. (Nuckols).....3 3 4
Border Guard, Henry Winter, Katherine R., Dolly S., Captain Hunt, Elizabeth Ray, May Grave, Victor Allerton, Watago, Orlena and Marie T. also started. Best time, 2:14½.

The Johnson Stake, purse \$2025, 2:24 trot.
Baron Penn, br. h. by William Penn-King (McHenry).....6 1 1 1
Crestion, b. g. (Lassell).....1 2 2 4
Decoracion ch. g. (Keating).....5 4 3 2
Captain George, Nelly Tragante and Silver Girl also started. Best time, 2:09½.

The Wilson Stake, purse \$2205.
The Abbe, blk. h. by Chimes-Nettle King (Geers).....1 1 1
Bena Patch, b. m. (McMahon).....2 2 2
Nellie Temple, b. m. (Proctor).....4 5 3
The Philistine and Fred Patchen also started. Best time, 2:09½.

2:09 trot, purse \$1000.
Soprano, ch. m. by Bellini-Operette (Andrews).....4 2 1 1 1
Brace Girdle, b. m. (McMahon).....1 1 5 5 5
Stallie, b. g. (Gahagan).....3 3 2 2 2
Lady Stately, Alice Roosevelt, Fair Maraget and Melva J. also started. Best time, 2:06½.

The Transylvania Stake, value \$5052.
Joan, br. m. by Directum Spier-Sarah W. (McDevitt).....1 1 1
Dudie Archdale, blk. m. (Geers).....2 2 2
Emily Ellen, blk. f. (McDonald).....3 3 7
Hailworthy, Brody Burke, Stroder, Bervaldo and Major Strong also started. Best time, 2:05½.

The Champion Stallion Stake, for 3-year-old trotters, value \$8804.
Grace, ch. f. by Peter the Great-Orriana (McDevitt).....1 1
Native Belle, b. f. (Murphy).....2 2
Emily Ellen, blk. f. (McDonald).....3 4
Lulu Arion also started. Best time, 2:08½.

Oct. 11.—2:18 class pace, 3 in 5, purse \$1000.
Howley, b. g. by Lord Harold (Darnby).....3 1 1 1
Athal, R. g. h. (Hoffman).....1 2 2 5
Dickinson, b. g. (Dillehy).....2 3 6 6
Willy Penny, Abbe G. and Aza Dan-forth also started. Best time, 2:10½.

2:13 trot, 3 in 5, purse \$1000.
The Plunger, b. h. by The Bondsman.....5 1 1 1
Major Wellington, br. h. by Nico II (A. McDonald).....1 2 2 2
Senator Hale, b. h. (Kelly).....3 7 6 5
Olive F., Vestale, Chrysalis, Lion, Fritz Emmet, Golden Dollar and Don Muscovite also started. Best time, 2:08½.

2:08 class pace, 3 in 5, purse \$1000.
Earl Jr., b. g. by The Earl (Cox).....1 1 1
W. A., br. g. (Hobson).....4 2 2
King Cole, b. h. (Dodge).....2 3 4
Col. Forest and Queen Pomona also started. Best time, 2:03½.

2:20 trot, 3 in 5, purse \$1000, unfished.
Betsy G., b. m. by Wiggins (Cox).....1 1
Henry Winter, b. h. (A. McDon-ald).....3 2 1
Border Guard, b. h. (Walker).....2 7 5
Carnation, May Grace, Bessie Prodi-gal, Marie T., Victor Allerton and Katherine R. also started. Best time, 2:10½.

Oct. 12.—2:30 trot, 3 in 5, purse \$1000.
Carnation, b. g. by Wilkes View (Nuck-ols).....5 3 3 1 1 1
Betsy G., b. m. (Cox).....1 1 2 4 6 3
Henry Winter, b. h. (McDonald).....3 3 1 3 3 3
Border Guard, Bessie Prodigal, May Grave and Actor Allerton also started. Best time, 2:10½.

Champion stake, pacing. Value \$2851.
Nell Gentry, b. f., by John R. Gentry (Cameron).....1 2 1
Leftwich, b. f. (Healy).....2 1 2
Time—2:17½, 2:14½, 2:05½.

The McDowell, 2:08 class trotting, 3 in 5, value \$3025.
General H., b. h. by Combineer (Page).....1 1 1
Brace Girdle, b. m. (Mahon).....3 2 2
Nancy Royce, blk. m. (McCar-thy).....2 4 5
Lady Stately, May Earl and Alice Roosevelt also started.

Time—2:07½, 2:06½, 2:06.
2:12 pace, 3 in 5, purse \$1000.
Princess Hal, b. m. by Star Hal (Hedrick).....4 1 1 1
The Orator, b. h. (Horne).....3 2 8 6
The Liar, b. h. (Snow).....6 5 4 2
Alta Coast, Bird Grattan, Roy Wilkes, Little Dick, Sally Stiles and Atha Boy also started. Best time, 2:06½.

2:11 class trot, 3 in 5, purse \$1000, unfished.
Fair Margaret, b. m. by Reut Elec-tion (Benyon).....1 1
Stallie, b. g. (Gahagan).....2 5
Bell Bird, blk. m. (Estes).....6 2
Gusto, Stroller, Melva J., Fuzz John-son, The Angelus, Admiral Red and Jennie Constantine also started. Best time, 2:07½.

M. D. Shutt of Rock Rapids, Ia., who last season campaigned Penisa Maid 2:04½ through the Grand Circuit, was seriously injured recently by being kicked by Hazel Beeth 2:30½.

A. B. Cox of Paoli, Pa., who owns one of the finest collections of fast-record and producing brood mares in America, has purchased from Dr. L. N. Boston of Philadelphia the noted matron Maggie Sultan 2:30, by Sultan 2:24, the dam of Nico, 4:20½, and three others in 2:30 or better. She is now in foal to General Watts, 3, 2:06½, by whom she has already produced a filly that sold for \$1000 as a weanling, at auc-tion.

Evelyn W. 2:02½ is now the fastest pacing mare of the year.

Star Patchen 2:04½ and Sarah Ann Patch 2:06½ are full brother and sister, both being by Joa Patchen 2:01½ and out of Sarah Ann by Thistle 2:13½. Even their present low records are not the limit of their full speed capacity, as the first named was a mile in 2:03½ Friday, and the mare can 2:05.

Orlean 2:09½, a new trotter, is out of Helena 2:11½ (dam of 4) one of the fastest daughters of Electioneer.

Daughters of Moko won both the "Horse Review" three-year-old trotting and three-year-old pacing futurities.

SECOND WEEK AT LEXINGTON.

Oct. 10.—Kentucky Futurity, pacing division, value \$2000 (unfinished from Saturday):
Twinkling Dan, b. c. by Dan Patch Twinkle (Murphy).....5 1 1 1
Leftwich, b. f. (J. Healy).....1 4 3 3
Baroness Evelyn, ro. f. (McDonald).....2 2 2 2
Mary Chironette and Joe H. also started. Best time, 2:10½.

2:19 trot, purse \$1000 (unfinished from Saturday):
Betsy G., br. m. by Wiggins (Cox).....2 1 1 1
Morning Light, br. g. (Jones).....1 2 2 7
Carnation, hr. g. (Nuckols).....3 3 4
Border Guard, Henry Winter, Katherine R., Dolly S., Captain Hunt, Elizabeth Ray, May Grave, Victor Allerton, Watago, Orlena and Marie T. also started. Best time, 2:14½.

The Johnson Stake, purse \$2025, 2:24 trot.
Baron Penn, br. h. by William Penn-King (McHenry).....6 1 1 1
Crestion, b. g. (Lassell).....1 2 2 4
Decoracion ch. g. (Keating).....5 4 3 2
Captain George, Nelly Tragante and Silver Girl also started. Best time, 2:09½.

The Wilson Stake, purse \$2205.
The Abbe, blk. h. by Chimes-Nettle King (Geers).....1 1 1
Bena Patch, b. m. (McMahon).....2 2 2
Nellie Temple, b. m. (Proctor).....4 5 3
The Philistine and Fred Patchen also started. Best time, 2:09½.

2:09 trot, purse \$1000.
Soprano, ch. m. by Bellini-Operette (Andrews).....4 2 1 1 1
Brace Girdle, b. m. (McMahon).....1 1 5 5 5
Stallie, b. g. (Gahagan).....3 3 2 2 2
Lady Stately, Alice Roosevelt, Fair Maraget and Melva J. also started. Best time, 2:06½.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT.

SAN JOSE SHOW.

The San Jose show, held in conjunction with the poultry exhibit as has been the annual custom for years past, was, so far as the bench show part of the exhibition is concerned one of the best shows ever held in San Jose. Last year 154 dogs were entered, this month 204 dogs, an increase of 25 per cent, were benched. The attendance and gate was far ahead of any previous show. The list of exhibition tolls up 130 with a total of 350 entries.

We quote the San Jose Mercury which published the following interview, brought about by "kennel politics" that were used to obstruct and impede the progress of the show:

"J. Leo Park, secretary of the National Dog Breeders' Association, attended the dog show in San Jose in his official capacity, and was pleased with the splendid exhibition, which, he declared, was certainly the best that San Jose has ever had.

"It is extremely delightful to see the interest displayed in the Dog Show held in your city under the auspices of the National Dog Breeders' Association," said Mr. Park, in an interview, "especially in view of the attendance, and of the number of high class dogs shown. This is the first show held under the auspices of the National Dog Breeders' Association in San Jose," he went on. "The Association was organized and incorporated under the laws of the State of California during the last few months. There are two dog organizations in the United States at the present time—one the American Kennel Club and the other the National Dog Breeders' Association. Some time ago a request was made by the fancy of the West to the American Kennel Club that the Pacific Advisory Board, representing the American Kennel Club, be chosen by the vote of the clubs of the West and not by a select few. The fancy also requested that the moneys which were collected in the West should be used in part in providing prizes and promoting the best interests of dogs in this section. The American Kennel Club refused this, therefore a big majority of the dog fanciers resolved to form the National Dog Breeders' Association, under the auspices of which the present dog show is acting.

"I understand," Mr. Park continued, "that there has been considerable opposition among people who are affiliated with the Pacific Advisory Board of the American Kennel Club, against this San Jose show, and I am very pleased to see that their efforts have been unavailing. The character of the dogs shown, the number of exhibitors, and the fairness of the judging is commended by both spectators and exhibitors.

"The officers of the National Dog Breeders' Association and the judges of any of the shows held under their auspices have been disqualified by the officers of the American Kennel Club for their temerity in asserting the privilege of showing without their sanction. This is un-American and should not be tolerated.

"This unlawful and unsportsmanlike threat has been held over the heads of the dog fanciers for a long time, but the American Kennel Club overstepped itself when it undertook to use the United States to further its unlawful designs. The bluff has been called by a suit in the United States Circuit Court, brought by Mr. Cbute, for damages against the American Kennel Club and the members of the Pacific Advisory Board, under the Sherman Anti-Trust Act, it being claimed that to declare a dog unfair for the purpose of fattening the purse of the American Kennel Club is certainly as much a breach of the Sherman Anti-Trust Act as it was for the American Federation of Labor to be declared an unlawful trust. The members of the Pacific Advisory Board have appeared in answer to this complaint, but the American Kennel Club has relied on a question of jurisdiction to evade appearing and answering the complaint in this action, preferring to leave the individual members of its Advisory Board to hear the brunt of the action.

"The National Dog Breeders' Association feels assured that at the next holding of the San Jose dog show, on account of the courteous treatment and fair dealing accorded everyone at this show, there will be at least double the number of dogs exhibited and San Jose will be able to boast of a five-point show, the largest ever held in the State."

LADIES KENNEL CLUB SHOW.

Announcement is made that the bench show of the Ladies' Kennel Association of California (?) will positively take place at Dreamland Rink, October 27th and 28th.

Entries will close October 17th. The club office is located at 1260 Market street, where entry blanks, premium lists and further information may be obtained. The classification of breeds is very complete, enabling an exhibitor to enter a dog in one or more classes.

The show will be held under American Kennel Club rules. Besides the regular class ribbon prizes the premium list publishes the donation of over 100 special prizes, cups and trophies.

The officers of the club are: Mrs. Joseph J. Matheson, president; Mrs. George A. Nieborger, first vice-president; Mrs. W. H. Dennis, second vice-president; Mrs. W. H. Dennis, second vice-president; Mrs. C. J. Lindgren, secretary-treasurer; executive board—Mrs. C. G. Saxe, Mrs. Fred Adams, Mrs. Gus Jacobs, Miss Gertrude Blaine; bench show committee—Mrs. J. J. Matheson, Mrs. C. J. Lindgren, Mrs. G. A. Nieborger, Mrs. C. G. Saxe, Mrs. Fred Adams, Mrs. Gus Jacobs, Miss Irene Sabin, Miss Alice Wilkins; superintendent—Joseph J. Matheson; ring steward—George A. Nieborger.

James Watson of Hackensack, N. J., the well-known veteran, will judge all breeds.

BOSTONS AT NEW YORK.

The largest number of Boston terriers ever assembled in one exhibition in the city, states the New York Times, were seen at the two days' specialty show of the Boston Terrier Club of New York, which opened in the Madison Square Garden Concert Hall Friday, October 7. In the entry list of 325 terriers there were 218 actual competitors on the benches. Dog fanciers said that it was the finest collection of Boston terriers ever seen at a bench show here. Marked improvement has been shown in the breeding of terriers in recent years, and by careful and intelligent interbreeding the Boston terrier of today is far different from the terrier of a few years ago.

The patronesses and patrons of the show are Mrs. Herbert Harriman, Miss Anna Sands, Bertram Sears, Mrs. C. Davies Tainter, Mrs. Charles S. Bates, Mrs. Brady Harris, Mr. Harry Harnickel, Mrs. Robert E. Livingston, Mrs. Thomas L. Hamilton, Mrs. Benjamin Weaver, Hamilton Pell, Mrs. G. Foster Rawlins, Mrs. L. L. White, John G. Bates, Mrs. Frank K. Sturgis, Mrs. Lloyd Aspinwall, Mrs. Alfred Conkling, Harry Peters, Mrs. Bertram Sears, Mrs. E. W. Roy, Mrs. J. Carpenter and C. Davies Tainter.

There were so many entries that the judging took a long time, Frank J. Heilbron's The Demon was declared to be the best dog of the show. The Demon is a winner of many ribbons, and his victory yesterday was well deserved. He is by Chauncey Boy, Jr.-Parker's Lady Alice, and is from Mr. Heilbron's kennels at Plainville, Mass. The reserve dog was Newport Boy, owned by Mrs. George H. Pell of Bronxville, N. Y. The Demon took two ribbons in the judging, and a three times ribbon winner was Acme Frisk, owned by B. J. Torkomian of Waterbury, Conn.

This year's show will probably result in more sales than the shows of previous years, and several were recorded yesterday. Mrs. George H. Pell bought T. E. Rafferty's Little Mose, a novice toy dog for \$325. Sanford R. Foster, President of the Philadelphia Boston Terrier Club, purchased Mrs. K. Faulkner's Faulkner's Little Blossom, for \$300, and W. C. Bechtold of Philadelphia paid \$300 for Louis Rudginsky's Young Hooker.

RANDOM NOTES.

[By Loch Laddie.]

When purchasing a new dog as a tryout proposition I think it a grave mistake to put him down with a good local dog in a country where the latter has been continually hunted, as, even if he is a dog of very modest pretensions to blood lines, his recollection of the location of different covies is so greatly a matter in his favor that he is more than likely to show up the new dog in the matter of finding birds.

On account of this mistake many a good dog is turned down after a short tryout with some local dog which has every covey in his brain that is located within a radius of ten miles.

We must bear in mind that when a new dog arrives all his environments are new; the lay of the land and character of the fields are so changed that what may appear to him as a birdy looking place in one country may not be the ideal feeding ground in another. He may be accustomed to work on prairie and then become daunted at how to hunt birds in the woods or brushy cover. Generally he will try to crowd them too closely to a flush.

Again some dogs, especially from the north, could not at first do justice to themselves, for instance, where I was located in Missouri, in sedge grass, and more so in swamp flume and Johnson grass. The first time the green dog strikes it he begins to sneeze and never lets up until he is taken out of it. Then the local dog that is accustomed to it goes to work, finds the birds as he should and receives all the praise. But if the high-class dog, after becoming accustomed to his surroundings, does not equal or rather discount the scrub of the neighborhood, then is the time to do away with him. Breed as carefully as we may, disappointments in the get are frequent, and when we do find the one of high caliber to perform field work, we are more than remunerated by the pleasure we derive from his performance.

I believe that a dog should be originally broken for one kind of game and no other, for the dog that has range and snap to make a high-class quail or chicken dog can have all the vim taken out of him by holding him up on snipe. In fall, when snipe frequent corn or pasture land, the risk is not so bad,

hut in spring, when fields are bare and snipe have no grounds capable of feeding in, to crowd a dog down to point every one, either by scent or as they frequently do, by sight, is doing an injustice to the ranging powers of the dog and if he is readily susceptible to command we predict that, if worked constantly in this manner, in the near future his qualities as a quail dog will be sacrificed by the close ranging that has been forced on him.

Often we find men who should know better by their own experience with dogs, to write their handlers to give them all the work possible on snipe; then be disappointed if their dogs lack range.

The habits of quail and chicken are similar to some extent, though they vary with different locations. But in one thing the "Bob White" makes himself so well beloved by sportsmen. It is because at almost all times of the year they will lay to a dog, while chicken or quail, after a few weeks' shooting, are very wild.

Lack of field condition may be the cause of a badly spent outing, for without your dog in a quail country the whole pleasure of the sport is nullified. No matter how good a shooting dog your companion may have, the pleasure you derive from shooting over him can never equal that which you would have over your own dog.

Few city dogs go into the field in good working condition, and many an otherwise high-class dog is made to look very ordinary by some country scrub, more for this reason than anything else. It is a source of great mortification to see your crack dog look ordinary next to an inferior dog, and lack of field conditioning can bring this about very quickly.

Conditioning a dog for field work is not merely taking off superfluous flesh and hardening what remains into robust, muscular tissue, but rather in giving the animal exercise under those conditions which he would be obliged to meet in the field. Take, for instance, yourself. You may keep hard every day by long walks, and the rest of your body a mass of tough muscles from frequent use of dumb bells, or pulling weight or by the use of other mechanical accessories to muscular development. In that condition you feel fit to go against any sort of rough game, but after you have climbed over the tenth rail fence and carried a 7¼-pound gun through fields of tarweed, wild blackberry vines and sedge grass or other cover you are more than prone to feel very tired.

Why so, when you are in such perfect physical form? Because you are not trained to meet these out-of-door conditions, the short step through briars or the mattress of weeds confronting you at every pace, over obstacles that wear a little more on the muscles than ordinary exercise.

The same conditions apply to your canine companion, long walks in the cities are great helps to harden him, together with foods sufficiently strong in protein to act as muscle builders. He must confront the same conditions as you, hut to a far greater extent.

Why not then prepare him for the same? Give him the exercise of jumping fences. This he must learn in many parts of this state now. Take him to the outskirts of the city wherever you find vacant stretches of land grown up in weeds and make him race through them; get the suburban farmer's permission to let the dog work through the fields. Now the animal is in too advanced a stage of ripening to injure him to any extent. Corn and wheat fields are very birdy places in a quail country and you and your dog will be the gainer in field condition by your romps through them.

Do not pay any too great attention to diet; give him all he wants to eat, except feeds of corn meal; it is too heating now. But later on, as the cold weather arrives, some occasionally will not hurt. Dog biscuits form a nice food if not used as the staple diet. Well boiled rice with beef scraps is a conditioner not to be despised. If a raw egg or two is occasionally added it will be a great help, as well as a relish.

Don't wash your dog often; use the brush oftener; then massage and wrestle with him frequently as you would with an athlete.

Not only will your dog show the good care you gave him in the field but you also will be the gainer in outdoor condition.

Even in the best bird countries weather conditions at times curtail a dog's experience on game. Warm, dry spells in fall are a condition the trainer of shooting dogs dreads. Every owner is looking forward to the opening of the season with great expectations for his dog, but weather conditions are keeping the handlers guessing whether nature will send a shower along or a cold spell to ameliorate affairs. Without birds he is unable to do much. During very warm spells covies are unsettled in their habits and some weeks it so happens that where you have actually seen 25 or 30 covies the week before, the most arduous search fails to reveal signs of birds. You see their noon dusting places and figure they have gone to water. The most careful scrutiny along the water courses, however, proves unavailing; timber and brush are searched but no birds. The dog you have in your string is lacking in power to solve the problem.

Of course one explanation can be offered and that is that scenting conditions are so poor that the dog cannot locate. Admitting this is a partial explanation you revert to the previous season that was still warmer and remember that in an hour's time the dogs were able to find from six to eight covies. I rather believe one explanation that can be offered

is, that there are not sufficient weed seeds fallen in the fields to tempt the birds into staying long; or the reverse may be said, that there is such a quantity that the quail soon become surfeited with weed seeds and grain, go early to the brush or cover and hide until nature demands their craws be replenished.

The peculiarity of this seems that birds at this period, when droughty conditions prevail, are very unsteady to the dog and often many covies are found that unless flushed several times make no pretense whatever of laying to the dog.

I have often tried to discover a reason for these peculiar conditions that occur at times, but I confess that in spite of numerous explanations offered—all apparently good—on careful consideration some flaw appears. Is it possible that when such conditions occur the bird throws no scent and may likely be in their usual haunts and cannot be noticed by a dog?

Recently, while on a trip to my old training grounds, I visited a field containing 220 acres of open territory, chiefly in millet, some corn, oat stubble and cane, all ideal feeding places for quail. A broad creek divides the land. Carefully hunting with the dogs failed to snap a single bird to point. The water course was then beat out, but not a bird. The adjacent woods were given a thorough search, but not a feather was found.

To return home the same fields were in the path. Between the hours of 4 p. m. and 5:30 two slow dogs picked up 12 covies. Now can any one say where they were hiding?

Let one cold day arrive, even without a frost to accentuate it, and the birds will be regular in their habits as usual.

SPORTSMEN'S CONVENTION.

The California State Game and Fish Protective Association and delegates from the numerous affiliated county associations met in the fourteenth annual convention on Friday, October 14th, in the concert hall of the Palace Hotel at 10 a. m. The meeting was open to all sportsmen interested in the protection and propagation of fish and game.

Among desired changes in the present laws, it is claimed, will be an effort made to stop the sale of wild ducks either altogether or for a part of the shooting season. This proposed legislation is intended to put the market hunter out of business and stop the clandestine handling of game.

The further claim is made that to save the valley quail from extermination the open season should be shortened. If the trapping and potting of quail for the market were stopped there would hardly be any necessity for shortening the season.

Another statement by sportsmen interested is that our native quail could be taken from territory where they were plentiful and turned loose in districts where they were scarce and where new blood was needed.

In this respect more practical good, it is stated, can be accomplished in fostering and protecting a native game bird than by the expenditure of large sums of money, contributed by sportsmen in license fees, in the experimental introduction of foreign birds into sections where the birds cannot protect themselves from ground vermin.

Sportsmen from all parts of the State were in attendance and some interesting developments were expected. Invitations to be present were sent to Governor James N. Gillett, the members of the State Fish and Game Commission, members of the Legislature and others.

FLY-CASTING CLUB FINALS.

San Francisco Fly-Casting Club members who were the winners in the Saturday and Sunday class fly-casting contests, respectively, met at Stow lake Sunday and cast off the finals. The results were:

Long distance casting—Champion class, won by J. B. Kenniff, 119 4-10 feet; first class, won by Tom C. Kierulff, 102 4-10 feet.

Accuracy fly-casting—Champion class, won by T. C. Kierulff, 98 145-150 per cent; first class, won by J. B. Kenniff, 99 per cent; second class, won by E. A. Mocker, 97 131-150 per cent; novice class, won by Austin Sperry, 96 129-150 per cent.

Delicacy fly-casting—Champion class, won by T. C. Kierulff, 99 14-600 per cent; first class, won by F. H. Reed, 99 160-600 per cent.

Lure or bait casting—First class, won by J. B. Kenniff, 98 8-10 per cent; second class, won by C. G. Young, 97 7-10 per cent. Novice class, won by Charles H. Kewell, 95 7-10 per cent.

Governor James N. Gillett watched the final cast-off contests. He was interested to the extent of announcing his intention of taking an active part in the contests next season.

H. B. Sperry, E. A. Mocker and C. G. Young were the judges. J. B. Kenniff officiated as referee and E. O. Ritter acted as clerk.

A gun club has been organized at Fullerton, Orange county. A preserve will be purchased or leased, wells sunk and duck ponds made.

The Santa Maria Rod and Gun Club has been incorporated; capital stock, \$10,000.

The Los Angeles show opened on the 17th with an entry of "over 100 dogs" so it is reported.

The first hench show of the Albuquerque Kennel Club opened October 5 with 160 dogs henching.

Drink Jackson's Napa Soda.

MALLARD SHOOTING IN THE TIMBER.

The mallard is a shoal-water duck, and, barring the wood-duck, no fowl of this kind loves the timber better. Even in the spring, when the pintail, red-head and other ducks are flying over submerged prairies, and alighting in vast flocks in the open, the mallards hug the woods. They are, like all ducks, great gormandizers, and will do more damage to a corn field than a wilderness of pigs; but after they have fed, and rise to seek the marshes, you will see them string for the timber, and the pond-holes in among the willows and the taller trees. Where the oak timber has been submerged, and the acorns lie thick in shallow water, the mallards will come in with such pertinacity that they can scarcely be driven away, and fortunate is the hunter who runs into this combination.

To get a good bag of these fowl requires very moderate ability as a shot, but the wisest kind of hunting. The mallard is not a bird which is hard to kill, once he is brought into range, but he is a wary and suspicious bird, unless the preparations made to entice him are scientifically and alluringly complete. He will come into wooden decoys, and particularly if the hunter is an adept at "calling" with (or without) a duck "call." Good shooting is had in this way, and this is the manner in which the bulk of mallard shooting is done. In the Middle West particularly, but here and there on the Coast, especially in Washington and Oregon, this article fits the situation pretty closely.

It requires skill to set the decoys out properly, so that the flying mallards will be deceived by the naturalness of the appearance of the wooden counterfeits; for no ordinary tossing out of decoys will make a flock look like the real thing. A few birds set out right will beat a big flock disposed of clumsily. A couple of decoys, even when out of fair gunshot of the "blind," will aid in drawing the birds in until they catch sight of the main body of decoys. An artistic irregularity, a cluster which only an experienced duck shooter is able to impart, with "leaders," strung out ahead of the main bunch of the decoys, is of the utmost possible importance in luring the mallards in.

Of course, there are days in the timber when a man runs into a spot where the ducks have been feeding on acorns, and drives them out and sets up his decoys, when the dispossessed mallard will come back and drop in pairs, little and big bunches, and you can't drive them out with artillery. And there are other days when a hunter will chop a hole in some ice-covered pond late in the fall, put in a pair of live decoys, and shoot so fast that his gun barrels will get too hot to hold. But these are exceptional days, and as a rule the man who makes a good bag of mallards in country which is pretty well hunted earns his birds.

The mallard, often so shy and retiring a wildfowl, is of the most sociable and even foolish companionability when once his confidence has been gained. When he does make up his mind that the "signs are right" he will set his wings and come in to almost on top of the blind. Once he is fairly within range he is a good-sized mark, and not anything like so tenacious of life as the bluebill, redhead, goldeneye, canvasback, etc., the deep-water ducks, which can carry off almost as much shot as a small boy at times. But a crippled mallard is one of the shyest birds in existence. How he can hide! He will disappear as he strikes the shallow water, and if there is any cover at all, nothing but a first-class retriever has any business looking for him.

It will pay better to wait for another shot rather than to flounder round a marsh looking for a winged mallard drake. He is more cunning than the ruffed grouse, as wily as a fox, and the way he can creep away from where he fell, and conceal himself beyond all hope of detection, has been the disgust of many a duck shooter.

I have seen them hit the water in an almost open space and not come to the surface at all; at least, not in the open water. It might be 30 to 50 yards to cover, and whether they swam under water to the wild rice and rushes, or dove to the bottom and clung to the weeds and grass underneath was a puzzle. One rule is always safe to follow—give a crippled mallard another barrel just as quickly as you can. Don't wait a second, if you can help it.

In this country, along the Illinois river, more mallards are probably shot than anywhere else in the United States. The flight varies, some years more, others less, but always there is shooting here if anywhere, and as the corn fields and the "mast" always afford plenty of feed, the mallards follow this waterway to the South in the fall, and thousands of them fall to the hunters in the timber, in the pond-holes in the timber and in submerged corn fields.

A corn-fed mallard is a very fine table fowl, but lacks the juice of a blue-wing teal. When he once gets the taste of acorns in his crop, or corn, he will travel many miles to get at either food. In the Illinois river country the overflow often takes in pecan timber, and where it does the mallards are usually certain to find it out and swing in to feed on these delicious nuts.

When "duck calls" are used over wooden decoys it requires expert use to make them answer this purpose. A soft, mellow note is preferable, and there are a number of calls which have their different uses, such as the louder, hailing call, and the lower, chuckling, feeding note, which is more effective as the birds draw nearer. When wooden decoys are used, great success can be had by skilfully setting up dead birds, with a twig supporting their heads, and making decoys of them. Awkward placing of these dead

birds will do more harm than good, but where they are set up properly, they add very much to the alluring look of the wooden decoys. Dead ducks should never be left floating. And wooden decoys which have been overturned should be set right side up at once.

These little details are of the utmost importance in mallard shooting, especially where the birds have been shot at more or less. Strict attention to such details will often bring fowl in which have swung wide of blinds where the occupants have been careless of such minutiae. Sink your discharged shells; their bright colors may be seen by the ducks' sharp eyes. Keep absolutely motionless in the blind, even if you were thoughtlessly exposing yourself when the game came in sight. Ducking down out of sight is more than likely to attract their attention. And if you are properly clothed in yellowish-brown hunting "togs," with your cap or hat of the same hue, they are not apt to see you, even if you are in sight, as they are if you attempt to "juke" down out of the way when you see them.

Never hunt ducks with a "tenderfoot." Life is too short. He will drive you wild with his talk, his restlessness, his jumping up to shoot before the ducks are in range, his peeping over the blind when the fowl have swung to come back, his funny stories, his getting hungry, his wanting a drink, his getting cold or tired, his shooting at your ducks instead of his ducks when a flock comes in, and other little peculiarities he has.

When two men are in a blind together—and that is the ideal number—the man who is first to the flock as it comes in will take the rear ducks and let the second man shoot the leaders. If a pair come in the second man take the leaders. If a pair come in he will take the hind bird and let the second man take the front bird. If the ducks swing in from the front each man will pick the birds to his side. All this, if the men are hunters. But your tenderfoot blazes at the flock, often deafening you by turning loose within a foot of your head, and sometimes he varies the monotony by shooting a hole in the boat.

The recipe for a blind varies with the locality. But it is safe to say this: Make your blind as inconspicuous as possible, building it, of course, to blend with the surroundings. If in the willows, make it of willows. Don't make it too high nor too heavy. Depend somewhat on the color of your clothing to blend with the surroundings, and somewhat on being quiet. If you build it around a boat, make it so you can slip the boat out for the purpose of gathering the birds if the water is too deep for waders. Build a good blind, and don't try to do it in a few seconds, so that you can get to shooting right away. Make the sitting as comfortable as possible, for duck shooting requires plenty of patience, and to wait four or five hours without a shot is comparatively every duck shooter's experience some time during every season.

Chilled "sixes" and any good powder (Du Pont smokeless) is good enough ammunition for mallard shooting. Gun gauges are changing with times. There was a day when a 12-gauge was a rarity, all the old shooters using 10-gauges. Now the 10-gauge is the curiosity. Is the time coming when the 16-gauge will supersede the 12-gauge? Time alone will solve this problem, but one thing is certain, and that is, the 16-gauge is here to stay as a gun for duck shooters. From actual experience I know it will kill as far and as clean as either the 10-gauge or the 12-gauge. The killing circle is not as big, but in penetration it takes its hat off to no gun.

Of course, the rarest of all timber shooting is that which is had with live decoys. Here is where the wild mallard's social instincts really shine. What could you expect? He sees five or six bona fide wild fowl of his species playing, paddling, quacking in a pond-hole in the timber, and one of them even raises its head and salutes him as he swings over the space. He drops his wings and hurries in to greet his comrades. A spurt of fire leaps out and meets him in mid-air. He collapses stone dead, and a figure in rubber waders come out and picks him up. The figure disappears in the edge of the pond-hole, and other suspicious mallards, swing, drop in, are fired at, and leave their toll on the water.

One pair even of live decoys will toll in the game, and sometimes, when the visitors are close up to their alluring and faithless brethren, the hunters will stand up in the blind and "shoo" them up, to be shot at on the wing. Sometimes they will hesitate, even then, looking at their tame betrayers as much as to say, "Well, what do you think about this?" before rising on dripping wings to seek safety. With live decoys the mallards have no hesitancy, but will plump down within 10 feet of the hunters when the blind is in deep timber.

Sometimes on old "wild" female decoy will be stalked out and the rest of the tame mallards will swim around near her, and when she is taken up at night the rest of the flock of live decoys will come and allow themselves to be taken into the boat. They seem to enjoy the hunting, and will call down the flocks all day for the hunters.

Mallard shooting in the timber is royal sport. Only canvasback shooting from a shore blind beats it. A man must go warmly clad, be able to stand hardship, and be a hunter to get results. To be a good shot is one requisite, but the main thing is to know the birds, whether the redleg mallards, the first flight birds, or the ice mallards as they are called, the ones with the yellow legs, that come in almost till Christmas. To know their habits, to watch where they are feeding, to get in where they feed and play, even at the expense of herculean effort—that is what counts in mallard shooting.

THE POSSIBLE RANGE OF SHOTGUNS.

There are limits to the possible range of a shotgun which are not as a rule as well understood as they should be. Arguments are constantly used urging an improvement in one direction or another, the arguer as a rule assuming that if his dreams could be realized the efficiency of the shotgun would thereby be increased. So far from his assumptions being true, the compensating disadvantages as a rule overwhelm the theoretical gain. Some people, for instance, believe that an increase of velocity would produce a proportionate increase of efficiency, whereas the net result, after taking due account of all related circumstances, would be unfavorable. The human mind instinctively yearns for progress, and the cold-blooded doubter who argues that progress is impossible takes the unpopular line and certainly opens himself to the retort that some of the best inventions in history received like treatment. So far from these reflections on his enthusiasm being justified, the expert is, as a rule, in the forefront of progress, at all times endeavoring to elucidate and define future developments, either for his personal gain or to maintain his reputation as a successful prophet. He differs from the amateur and from the uninstructed public in possessing a great experience of past failures and successes; further, his knowledge of theory enables him to conduct complex mental investigations where the ordinary mind would prefer what it pleases to style practical experiments. Theory and practice are, of course, best worked in double harness, since sound theory forms the best basis of practical experiments.

From the point of view, therefore, of acquaintance with theoretical and practical gunnery it will be interesting to review some of the possible improvements in the shotgun having for object either increase of range or greater certainty of action within the present limits of range. Taking first of all the question of increasing velocity with a view to extending range, it must be remembered that analogies derived from military arms are inappropriate for shotguns, because an increase of rifle velocity is coincident with a decrease of weight of the projectile, whereas with shotguns the charge of shot must be maintained as a substantially unalterable quantity.

The single missile, whether it be a military or sporting bullet, either bits or misses, and the power required is contained within the single projectile. In a charge of shot the conditions are quite different. About one per cent of the total charge will produce the desired result, but a given space must be so covered with pellets that, whatever position the bird may occupy within that space, the necessary three or five pellets, whatever the number may be, must be there to do their work. Increase of velocity cannot, therefore, be accompanied by such a reduction of the charge as will keep the recoil within limits governed by the weight of the gun and the physical robustness of the shooter. The weight of the gun is roughly fixed by the standard size of the human race, and recoil being in the nature of a necessary evil, every means of decreasing the same is eagerly adopted. Velocity increases would therefore be resented so long as they involved noticeably greater recoil. If powder-makers so improved their products that recoil was diminished to an extent enabling velocity to be increased, it is possible and even probable that the sportsman would elect to take the benefit in the form of greater ease and comfort rather than adopt the alternative of a more powerful cartridge.

The great vogue, for instance, of 33-grain powders, as compared with the earlier 42-grain type, is apparently due more to their low recoil properties than to the possibilities they represent of giving a higher velocity, while maintaining a given standard of recoil. Such velocity improvement as can be obtained without increasing recoil must accordingly be restricted to diminishing the effects of air resistance encountered by the shot during flight. Various proposals have from time to time been made for diminishing the skin resistance set up by irregularities on the surface of the shot. The so-called chilled shot is supposed to suffer less deformation during the process of expulsion from the gun, but though this kind of shot has been extensively tested and used on a practical scale, no particular benefit has been definitely proved. The possibility of making progress in this direction can be investigated by means of Bashforth's tables dealing with the flight of projectiles, but familiarity therewith shows that the possible margin for improvement is extremely small.

Another aspect of the mathematical treatment of the question is afforded by calculations of the increased ranging power which extra muzzle velocity produces. Roughly speaking, a 200 ft. per second rise of velocity, which is enormous from the recoil point of view, adds but 10 yds. to the ranging power of the pellets comprising the charge. The net increase is, however, very much less, because birds are hit with fewer and fewer pellets as the range increases, and the balance must be restored by using a heavier charge. If this objection was met by using a heavily choked gun the conditions would then be analogous to lengthening the distance of rifle shooting practice without proportionately enlarging the hull. At Bisley this apparently anomalous process does take place for reasons of convenience, but as the shooter is sure of hitting the target, the worst trouble that ensues is a general lowering of scores; but when the target happens, as in game shooting, to be a moving object, which consists of nothing but bull, with no white to indicate the position of the misses, the conditions are much more difficult for the shooter.

At the present time a range of 25 or 30 yds. is nicely within the shooter's power of doing clean work with a gun, giving, roughly speaking, a 3-ft. spread of shot. He knows by instinct the amount of forward allowance for each kind of shot, and his errors of estimation and manipulation are covered by the spread of the charge. Taking the forward allowance as varying from nothing to 5 ft., according to the conditions of the shots presented, it will be seen that a fairly simple relation exists between a 3-ft. spread and a maximum forward allowance of 6 ft. A full-choke gun gives practically this amount of spread at 40 yds., and the pellets still have sufficient power to stop anything that is fairly struck. Yet full-choke guns are not successful even where high birds are frequently encountered, and their failure may be explained by the relation which exists between a 3-ft. spread and a forward allowance increased some 50 per cent above the 6-ft. limit assumed for 30 yds. shooting.

The argument might be further developed by assuming that long shots are generally taken at high birds, and as high birds are generally fast flyers, 9 ft. is probably an insufficient maximum allowance for shots taken at 40 yds. range. Whatever may be the precise figure, the fact remains that shooters show a sad falling off from their usual form when asked to take really long shots, while keepers and other on-lookers are aware that in such circumstances the proportion of wounded birds is unduly great. From a marksmanship point of view, it seems reasonable to assume that if a 3-ft. spread of pattern at 30 yds. typifies the conditions of high efficiency for ordinary game shooting conditions, at least the same angular space should be filled with pellets at the further ranges. This would mean that 3 ft. at 30 yds. becomes 6 ft. at 60 yds., and as area advances as the square of diameter, the amount of shot necessary to fill a 6-ft. circle would be four times that required for a circle of half the diameter; therefore, what one ounce will perform at 30 yds., four ounces, and no less, will do at 60. But even so, another most important correction requires to be introduced. The size of pellet which is effective at 30 yds. would be useless at 60; in fact, the weight per pellet would need to be at least double (as a matter of fact, this would hardly be enough) to assure anything like an equal hitting power. This would mean that if No. 6 shot sufficed for 30 yds. shooting, No. 3 would be necessary at 60 yds. The same comparison holds good as between sizes 7 and 4 respectively. An equal density of equally effective pellets covering a 6-ft. diameter of circle may be adopted as representing the minimum requirements of the shooter for accomplishing at 60 yds. the results he has regularly achieved at 30 yds. It thus becomes necessary to adopt an eight-ounce shot charge to fulfill the stated requirements. An 8-bore gun takes two ounces of shot, and a 4-bore gun takes just over three ounces, so that a shooter would need a swivel gun of about 1½ in. bore to give the same shooting efficiency at 60 yds. that a shoulder gun gives at half the distance. The apparently enormous multiplication is due to the necessity to increase the charge by a higher power than even the square of the range. If muzzle velocity could be increased, a sufficient amount to neutralize the added distance, the shot charge would only need to be increased at the square of the distance.

The illumination from a lamp diminishes as the square of the distance, but light rays travel infinite distances with unabated velocity. They also move in straight lines. A charge of shot possesses the same disadvantages as a lamp from the point of view of capacity to operate at long distances, but it has its own added defects of a diminishing velocity and a generally erratic behavior as regards the flight of its component pellets. According to these arguments, even a 4-bore represents but a small relative increase of ranging power compared with the high price that must be paid by way of extra weight to carry and manipulate, and the extra cost and cumbersomeness of the ammunition.

The most logical attitude is to admit the limitations that exist, and by abstaining from taking long shots safeguard the conditions of sport for another day. Considering that an ounce of shot will perform such a large range of services, and that two ounces show so little improvement on one ounce, it seems reasonable to assume that some kind of unseen limit exists for restricting the range of the shotgun. Rifles are apparently not subject to the same rule, but, even so, the increased range at which shots are taken in deer stalking is not everywhere regarded as an unmixed benefit. With the shotgun the improvements of a hundred years have apparently not added a single yard to the range at which game may be shot. Possibly this is a benefit of which the full value is not immediately apparent, but so far as a review of the practical conditions can show, each year will bring some improvement of detail enhancing the comfort and enjoyment of the shooter, but wild birds will remain out of range as heretofore.—The Field (London).

ECHOES FROM THE NORTHWEST.

[By August Wolf.]

Minnie Snapp, chief telephone operator in a hotel in Spokane, Wash., chased a cub bear, weighing 80 pounds, through a mile of dense forest while on the way by stage from her father's ranch on the Coeur d'Alene Indian reservation in northern Idaho, to Tekoa, Wash., a few days ago, and captured the animal with a lasso made from a rope. The stage driver assisted in tying the bear, which was sent to Spokane for exhibition purposes.

Miss Snapp, the only passenger in the coach, saw

the cub while passing through a strip of wood land, where the horses became frightened and attempted to bolt. The driver had the four-horse team well in hand and brought the animals to a stop. Meanwhile Miss Snapp secured a rope, such as used by packers, and followed the cub, finally finding it perched on the limb of a tree.

Making a lasso the young woman tried a dozen throws, but the bear shook the noose as fast as it was made, but finally one landed squarely over the shoulders and a quick pull made the cub a prisoner. Miss Snapp brought the cub in triumph to the stage, when the driver helped her to tie it.

Arriving at Tekoa Miss Snapp had a box built for her prize, which was afterward sent to Spokane.

"The cub was taken by surprise," said Miss Snapp, "else he might have fought. Of course, it was a risky thing to go after the cub without a gun or a weapon of some sort, but the element of danger never occurred to me until after I had the animal on the ground and tied. What if the cub's parents had attacked me! Why, I never thought of that. All I had in mind was to get that bear."

Albert Hinton, a rancher near Kettle Falls, who came to the Spokane country from the east last spring, killed his first bear on the Ferry country side of the Columbia river in northwestern Washington, a few evenings ago. He used duck shot in a fowling piece. The first shot, fired at a distance of 60 feet, angered the cub and the animal started for the hunter. When within 20 feet Hinton gave it two shots in rapid succession, but five more shots were required to put the bear out.

TRADE NOTES.

U. M. C.—Remington Notes.

At the Arizona annual territorial shoot held at Phoenix September 22-24, shooters using the U. M. C.-Remington combination captured nearly every amateur event. C. Raithal of Deming, New Mexico, won high amateur average breaking 538 out of 565 targets. J. Steigler and D. C. Williamson tied for third amateur average with a score of 521 out of 565, all using U. M. C. steel lined shells.

In the special individual championship event C. Raithal won with a score of 48 out of 50, also winning the merchandise event with a score of 25 straight. The four man team shoot, team from Deming, New Mexico, won with 182 out of 200 targets, all using U. M. C. steel lined shells.

In the Selby Handicap, D. C. Williamson made the good score of 25 straight. In the special 50 bird race, C. Raithal was high with 49 out of 50.

The winning trap shooters in every part of the country who pin their faith to U. M. C. steel lined shells to bring them laurels are generally amply rewarded. The steel lining as used in the U. M. C. Arrow and Nitro Club shells is an improvement which has been adopted by the leading shell manufacturers of Europe, proving conclusively that the steel lining has great merit. The steel lining protects the powder from moisture, thereby insuring uniform loads under the most severe weather conditions, which makes them specially adapted to duck and field shooting.

The only place where shotguns and shells can be brought into active competition is at the traps and the U. M. C.-Remington combination has proven best in these competitions.

You cannot do better than be guided by the judgment of expert shooters in the selection of your guns and ammunition.

In ordering your duck or field loads from your dealer specify U. M. C. steel lined shells.

Peters Points.

Hugh E. Poston shot high average on all targets, 664 out of 690, at the Arizona Sportsmen's Association tournament, Phoenix, Ariz., September 22, 23 and 24.

At Omaha, Neb. September 13th and 14th, Mr. R. A. Austin of Creston, Neb., won high amateur average with the fine score of 376 out of 400. Mr. Geo. L. Carter was high professional, 378 out of 400. Both Messrs. Austin and Carter shot Peters factory loads.

At Delta, Colo., September 13th and 14th, Mr. O. E. Searles shooting Peters shells was second professional, 298 out of 320.

High general average at the Tri-state Tournament held on the grounds of the Hyde Park Gun Club, Cincinnati, Ohio, September 5th and 6th, was won by Mr. C. A. Young, who scored 383 out of 400. Mr. Fred LeNoir was second with 370, both shooting Peters factory loads. Mr. E. J. Sampson was second amateur 363 with Peters shells.

At Sunbury, Pa., September 1st and 2d, Mr. Neaf Apar won third general average, 361 out of 375.

The tournament at Phillipshurg, N. J., September 5th witnessed a remarkable demonstration of the shooting qualities of Peters shells. Mr. J. L. Engert of Catasaqua, Pa., was high amateur, 190 out of 200. Mr. E. L. Wilson, second, 181 and Mr. Albert Heil, third, 179. Mr. Sim Glover was high professional, 191; Mr. Lester German tied for second professional, 186 and Mr. Woolfolk Henderson was third with 184. All of these gentlemen shot Peters factory loads.

Mr. H. W. Cadwallader was third professional at East St. Louis, Ill., September 5th, 183 out of 200, also at Hoopeston, Ill., September 7th, he was second professional, 186, and Mr. A. R. Smith was third amateur, 183; both using Peters shells.

Drink Jackson's Napa Soda.

THE FARM

THE JERSEY COW.

The Jersey cow makes an ideal family cow where cream and butter as well as milk is needed for domestic use, because her milk is unusually high in percentage of butterfat. The whole milk of the Jersey cow has high nutritive value, because of its large percentage of milk solids, both fat and casein, and the digestibility is good. Butter made from the cream is of the best quality, color and flavor.

The breed of Jersey cows has been developed for many generations on the Island of Jersey by small farmers who have handled the animals almost as members of their families, housing them warmly, feeding them liberally, and treating them with the utmost kindness. For these reasons almost all of the members of the breed are very gentle and easily handles. Besides this quality of extreme gentleness and docility both in form and color of all dairy breeds. The Jersey is noted for her beauty, especially the young animals, hence a Jersey cow for the small farm or suburban place is really an ornament in the animal line. If a good young specimen is secured and handled properly she will soon become a pet of the family, and admired and loved by all.

It is claimed by breeders of Jerseys that the cows are the most economical of all the breeds, the food given them being turned largely into milk rather

than in forming fat or flesh. The Jersey is a small cow, requiring a relatively small amount of feed for bodily maintenance, and therefore it is reasonable to assume that she will produce more on the same amount of feed. Another good quality of the breed is that they are persistent milkers, holding up well in milk flow for long periods.

Warranted to give satisfaction.

GOMBAULT'S CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

The Most Perfect Colt Bit Made

EVERY COLT

Should wear the ELLIS IMPROVED HUTTON PATENT CHECKING DEVICE from the very beginning of its training, as it is the easiest, most comfortable, and most humane bit on the market. With its use the colt will not fret, worry, pull, toss its head and get into the bad habits so often caused by the use of other bits and checking devices that inflict punishment or keep it under too much restraint, and at the same time you will have absolute control over it at all times.

The ELLIS IMPROVED HUTTON PATENT CHECKING DEVICE is in a class by itself. It is the only Checking Device or Bit sold on a positive Guarantee TO REFUND YOUR MONEY IN CASE IT FAILS TO DO ALL THAT WE CLAIM FOR IT. If the Ellis Improved Hutton Patent Checking Device is used on a colt from the very beginning of its training, we guarantee it will never get any of the following bad habits.

If, however, your colt or aged horse has acquired the following bad habits, the Ellis Improved Hutton Patent Checking Device will correct them, and if it fails we will refund your money. GUARANTEEING that your horse from Pulling, Tossing the Head, Tongue Lolling, Side Pulling, Bit Fighting, or any other bad habits caused by the use of other Bits or Checking Devices that inflict punishment, or keep a horse under too much restraint.

Patented Aug. 11, 1896. Patent No. 565,681

BEWARE of worthless infringements and Checking Devices claimed to be as good as the ELLIS IMPROVED HUTTON PATENT CHECKING DEVICE. Illustrations of some of these check bits and devices are made to look as near like the genuine as possible, but the article itself is very different, and will not give the same results.

ALL GENUINE are stamped G. S. ELLIS & SON on the supporting strap and back part of Check Rein. Any that are not so stamped are not genuine.

FREE—Our new Catalogue No. 45, with wholesale discount sheet, the largest, finest and most complete Horse Goods Catalogue ever published, is ready for distribution. It contains illustrations, descriptions, and guaranteed to be lowest prices on Harness, Horse Boots, Horse Clothing and Tack Goods of every description. Every horseman should have a copy. You can save many a dollar during the season by buying direct from us, as we are now selling direct to horsemen, allowing them from 30 to 50 per cent discount from retail prices. Write us today for a copy and we will take pleasure in sending it to you all charges paid.

Every Horse Should Be Clipped in Season

It is the wise thing to do for the clipped horse not only is easier to clean and looks better, but clipping does much to make him immune from coughs, colds and the usual ills that come to a horse from standing in a coat of long, wet hair after any hard exertion. The perspiration evaporates quickly from the clipped animal and leaves him dry. On cold days a blanket when he stands keeps him comfortable.

The Best Clipping Machine the World has ever Seen is the Stewart Ball Bearing Enclosed Gear Machine

It is the easiest turning, fastest clipping and most enduring of all machines. The materials in it are all of better quality, the workmanship is superior. All file hard cut steel gears, protected from dust and dirt and running constantly in oil. It couldn't be better for twice the money.

The price at your dealers is only

\$8.50

If your hogs are lighter in the bone than their sires and dams, then you may know beyond any doubt or peradventure that there is something wrong with your feeding. The pig gets its bone material only from what goes into the mouth, and this is mainly what goes in in the shape of feed. The rest of it is bone material which it may acquire by rooting on the clay bank where it finds something that hits the right spot. Now, it is much better for you to furnish this bone material in the trough, yard or pasture.

Cream is ripened by the working of bacteria. Stirring the cream frequently while ripening will mix the bacteria through the mass and cause more even ripening.

More and more every year people are inquiring for good dairy heifers. Keep all the heifers from the best cows, and breed in line to the best dairy bull possible. Never cross breed. Those who are looking for good dairy animals want good grade animals or pure-breeds.

Do not move cows faster than a comfortable walk while on the way to the place of milking or feeding.

FOR SALE—Hiawatha, dark bay mare, 6 years old, 15 $\frac{1}{2}$ hands high; will weigh about 1140 lbs. Sired by Baron Bretto 39103, a son of Silver Bow; dam Silver Bells by Silver King 3622; second dam Only Hope by Hark, son of Brigadier. This mare is in foal by a son of Clarence Wilkes. Hiawatha is sound in every way, perfectly gentle to drive and handle and is a good roadster. She has had no work since a 2-year-old but at that time could step a mile in 2:58. Price \$225.

Anona L., a full sister to Hiawatha, 5 years old, weight 1100 lbs., is a light bay mare very stylish and handsome. Is city broke and very gentle to drive, afraid of nothing. She has had a limited amount of work but has shown a mile in 2:20 $\frac{1}{4}$, a half in 1:08 $\frac{1}{4}$ and quarters in 33 seconds. Price \$500.

Red Devil, bay stallion, 5 years old, 15 $\frac{1}{2}$ hands high, kind and gentle, suitable for anyone to drive, fears nothing. Sired by Baron Bretto 39103; dam Jeanette by Ottawa; 2nd dam by Snuff Box. A 2-year-old filly sired by this horse won the colt race at Marysville, July 4th. Price \$300. For further particulars address F. W. Kelley, Breeder and Sportsman, San Francisco.

Three-Legged Horses

are not curiosities by any means. The country is full of them. The fourth leg is there all right but it is not worth anything because of a curb, splint, spavin or other like bunch. You can cure the horse of any of these ailments and put another sound leg under him by the use of

Quinn's Ointment.

It is time tried and reliable. When a horse is cured with Quinn's Ointment he stays cured. Mr. E. F. Burke of Springfield, Mo., writes as follows: "I have been using Quinn's Ointment for several years and have effected many marvelous cures; it will go deeper and cause less pain than any blister I ever used. Thought it my duty for the benefit of horses to recommend your Ointment. I am never without it." This is the general verdict by all who give Quinn's Ointment a trial. For curbs, splints, spavins, windpuffs, and all bunches it is unequalled. Price \$1 per bottle at all druggists or sent by mail. Send for circulars, testimonials, &c.

INCHESTER

Repeating Shotguns and Shotgun Shells.

For successful hunting, a reliable gun and sure shooting and strong shooting shells are required. Winchester guns and shells are just this kind. The Winchester Repeating Shotgun is the only one endorsed by the U. S. Ordnance Board and used by as many as 450,000 sportsmen. As for Winchester shells — "Leader" and "Repeater" — they have won high national average nine different times and are as popular among sportsmen as Winchester guns. On your next trip, shoot Winchester guns and shells,

The Combination That Makes Successful Hunters.

No matter how plentiful the game is, the hunter must have the **RIGHT** Ammunition, for on it the success of the day frequently depends.

Remember

Selby Loads are **RIGHT**

Highly Bred Trotting Stock

BRED AT THE FAMOUS

SANTA ROSA STOCK FARM

Birth place of LOU DILLON 1:58½

the world's fastest trotter, and many other champions and sensational harness race horses

FOR SALE

Having given up a part of the land I had leased, and being over stocked, I have decided to advertise for sale all the stallions, colts and fillies I have, retaining only Guy Dillon (3) 2:23½ and a few very choice brood mares. Not all the stock I have for sale will be found in this list, but everything on the place, with the above exception, is for sale. Nearly every animal carries the blood of Sidney Dillon, the world's greatest sire of extreme speed, and also the blood of famous brood mares.

NO. 1—CALIFORNIA DILLON (3) 2:18¾, chestnut stallion, 5 years old, by Sidney Dillon; dam Caritone, by Antone 30842 (son of Dexter Prince, sire of 4 in 2:10, and Grace B., by Stamboul 2:07½); 2nd dam, the famous brood mare Biscara, dam of 9 in 2:30, by Director 2:17, sire of 6 in 2:30; 3rd dam Biscara, dam of 6, and grandam of 16 in 2:30, by Harold 4:13, a 2:10 sire; 4th dam Belle, a great brood mare by Mambrino Chief 11; 5th dam Belle Lupe, by Brown's Bellfounder. California Dillon is one of the best bred sons of his great sire, and is a very fast pacer that wears nothing but the harness and never makes a break. He has been a mile this year with little work over my track, when it was slow for want of care, in 2:12¾, and quarters in 30 seconds for him is simply play. He can beat 2:10 any time when in condition, and if given an opportunity will make a fast and useful race horse and a valuable sire. His dam Caritone is one of the choice brood mares I own that is not for sale. Her only other foal that has had any training is the chestnut gelding Dr. Wm. S. Jennings, one of the fastest pacers ever bred in California, and I believe the making of a sensational race horse. He has been a mile in 2:11, which he did without an effort and I have repeatedly let him breeze an eighth at the end of a slow mile in :14. With California Dillon's great speed, and speed inheritance on both sides, together with his perfect conformation, disposition and individuality he can not fail to make good in the stud. The largest and best looking yearlings I have are by him.

NO. 2—MAJOR DILLON 3558S, p., is a 7-year-old chestnut horse of good size and conformation sired by Sidney Dillon out of the great brood mare Maud Fowler 2:21¾, dam of the phenomenally fast trotter Sonoma Girl 2:04¾, and 3 others in the list; 2nd dam Evelyn, the great daughter of Nutwood, that has produced Ole 2:10¾ and 7 others with fast records and trials, and 2 daughters that have produced 2:10 speed. Major Dillon has never been regularly trained, but worked a mile recently in 2:19, half in 1:06 and quarters in :32 and has paced an eighth in 15 seconds. While he is a pacer, he is the only one in his dam's family and none of his get take to the lateral gait but are all square trotters, and judging by the few that he has, although none have as yet been trained, he is sure to make a sire of more than ordinary merit. If you want a highly bred trotting sire that can earn himself out in one season, or that is fit to head a stock farm and is a sure foal getter, come and look at this horse and his get.

NO. 3—F. S. WHITNEY is a nice sized 4-year-old dark bay colt with plenty of bone and substance, a sure trotter, and one of the very best bred young stallions in California. His sire, F. S. Turner 2:24, is a horse that never had a chance either on the track or in the stud, was castrated after siring half a dozen foals and but two of them were ever worked for speed. Dr. Wm. S. Jennings by him has been a mile in 2:11 and I regard him as one of the greatest pacing prospects I ever saw. The other, F. S. Whitney, was worked two months all told as a 2-year-old and trotted a quarter in 37 seconds. That was two years ago and since then he has had no work of any kind as I have been too busy to train him. The sire of F. S. Turner was Vallota 30840 by George Norval, son of Norval 2:14¾, by Electioneer. Vallota's dam was the great brood mare Carlotta Wilkes, dam of 7 in 2:30 and 3 in 2:10. F. S. Turner's dam was by Phallas 2:13¾, ex-champion trotting stallion, and 2nd dam a producing daughter of the high class Onward 2:25¾. F. S. Whitney's dam is the great brood mare By Guy (dam of Martha Dillon 2:10¾, trial 2:07, Sochia Dillon 2:11¾, timed in a race in 2:07½), by Guy Wilkes 2:15¾, sire of 4 in 2:10; 2nd dam the famous \$10,000 brood mare By By, the only mare in the world that is full sister to a 2:08 trotter, has produced a 2:08 trotter herself, has a son to sire 2:08, and a daughter to produce a 2:08 trotter. She is the dam of Rapidan Dillon 2:12¼, timed in a race in 2:07¾, Emma Dillon 2:16¾, Marengo King 2:29¾, trial 2:12 (sire of Marie N. 2:08¾), Andrews, tr., 2:20¼; Adioo, tr., 2:24; By Guy, tr., 2:28 (dam of 2 to publicly trot better than 2:08); Rosario, tr., 2:25, and L. W. Russell, a sire. By By's sire is Nutwood, greatest of all brood mare sires. F. S. Whitney's 3rd dam is the \$8500 Rapidan, dam of Lockheart 2:08¾ and 3 others in the list by Dictator 113, a 2:10 sire; 4th dam Madame Headley, dam of Expert Prince 2:13¾, by Edwin Forrest 551; 5th dam by Mambrino Chief 11; 6th dam by Hunt's Commodore; 7th dam by Finwick's Copperbottom; 8th dam by Imp. Royalist; 9th dam by Celer.

As will be seen this is a royally bred young stallion, he is a trotter himself and will sire trotters. In the two months that he was trained as a 2-year-old he never made a break.

NO. 4—F. S. McKINNEY is a medium sized bay 4-year-old colt, that is bred just the same as No. 3 except that his first dam is Centerguy by the great

McKinney and his second dam is By Guy, the first dam of F. S. Whitney, making him with the additional McKinney cross even better bred than F. S. Whitney. This young horse has never had a day's training, he is sound and well formed and there is no reason why he would not develop speed if given a chance.

NO. 5—CARLOTTA'S GUY is a 2-year-old black colt by Guy Dillon (3) 2:23½ (son of Sidney Dillon and the great brood mare By Guy), dam the famous brood mare Carlotta Wilkes, dam of Inferlotta 2:04¾, Mary Dillon 2:06¼, timed in a race in 2:03¾; Carlokin 2:08¾, public trial 2:05¾; Volita 2:15¾, second in a race in 2:08¾; Ida Dillon (2) 2:27¾, 4-year-old trial 2:11, and Lottie Dillon (3) 2:26¾, by Charley Wilkes 2:21¾, a 2:10 sire, son of the great Red Wilkes, a 2:10 sire; 2nd dam Aspasia, dam of 5 in 2:30, by Alcantara 2:23, a 2:10 sire; 3rd dam, a producing daughter of Clark Chief 89. This is one of the best bred colts in the world. His sire, Guy Dillon, is the best bred son of Sidney Dillon, the greatest sire of extreme speed in the world. His dam is one of the greatest of brood mares, and sold at public auction for \$7500; his sire's second dam, By By, sold for \$10,000 at auction and his third dam, Rapidan, sold for \$8500. He traces 4 times to the great Geo. Wilkes through 4 of his greatest sons and carries the blood of 7 2:10 sires and his pedigree is rich in the blood of famous brood mares. He is a colt of speedy conformation, is double gaited and will probably pace, is only broken to harness and has never been shod. This colt is liable to make a whirlwind performer.

NO. 6—BLACK COLT, 1-year-old, full brother to Carlotta's Guy. Just broken to harness, is a square trotter, and a perfect colt in every respect. The last foal of the great Carlotta Wilkes.

NO. 7—BAY COLT, 1 year, by California Dillon 2:18¾, dam Ellen by L. W. Russell (son of Stamboul 2:07½ and By By); 2nd dam Flora Allen, dam of 4 in 3:30, by Mambrino Wilkes, sire of Balkan 2:15, etc.

NO. 8—BROWN COLT, 1 year, by Guy Dillon (3) 2:23½, dam Russie Russell, dam of Ruth Dillon, that was an unbeaten 3-year-old in 1907 and obtained the world's half-mile track record for 3-year-olds, of 2:15¾, and as a 4-year-old was the champion 4-year-old trotting filly, 2:06¾, by Bay Rose 2:20¾; 2nd dam Oakley Russell, dam of Bert Arondale 2:19, by Happy Russell 2:21½, sire of Minnie Russell 2:13½, etc.

NO. 9—BAY COLT, 1 year, by Major Dillon, tr., 2:19, dam the great By Guy, by Guy Wilkes 2:15¾; 2nd dam By By, etc. This is a splendid colt and a sure trotter.

NO. 10—BROWN COLT, weanling, by Alconda Jay (son of the great Jay Bird and Almeta, by Baron Wilkes), dam Centerguy by McKinney 2:11¾; 2nd dam By Guy, etc. For extended pedigree see No. 3. This is a fine colt and the best bred one ever sired by Henry Helman's great bred Wilkes stallion Alconda Jay. His tabulated pedigree fairly sparkles with the names of great sires and great dams.

NO. 11—BAY GELDING, pacer, 3 years, by Sky Pointer Jr. (son of Sky Pointer, brother to Star Pointer 1:59¼, and Juliet 2:13¾, dam of Irish 2:08¾, by McKinney 2:11¾), dam Ellen, by L. W. Russell; 2nd dam Flora Allen, dam of 4 by Mambrino Wilkes. This colt is bound to make a fast pacer, just broken to harness, needs neither boots nor hoppers and can pace a 2:30 gait.

NO. 12—BAY GELDING, pacer, 3 years, by F. S. Turner, dam Caritone, dam of California Dillon 2:18¾. See pedigree of No. 1. This colt is full brother to Dr. Wm. S. Jennings, trial 2:11 and will make a fast pacer.

NO. 13—BAY GELDING, 4 years, by Guy Dillon (3) 2:23½, dam Stamboulita 2:27 by Stamboul 2:07½, 2nd dam Biscara, dam of 9 by Director 2:17, etc. This colt was worked two months as a 2-year-old and trotted a mile in 2:42, quarter in :38, is a good gaited and good headed fellow that will make a fast trotter if trained. Has not had a harness on in two years, is sound and all right.

NO. 14—CHESTNUT GELDING, 3 years, by Major Dillon, tr., 2:19, dam the great By By. Never trained.

NO. 15—BAY GELDING, 3 years, by Guy Dillon, dam Juanita Skinner, dam of Charley Belden 2:08¾ by Silas Skinner 2:17. Never trained.

NO. 16—VIOLET ALLEN, br. mare, 10 years old, by Vallota 30840 (son of George Norval and the great brood mare Carlotta Wilkes, dam of 3 in 2:10), dam Molly Allen 2:20¾, by Mambrino Wilkes, sire of Balkan 2:15, etc. This mare is a nice driver, double or single and a good saddle mare. Is now being driven on the road by Mayor Gray of Santa Rosa.

NO. 17—MARTINA DILLON, ch. mare, 6 years, by Sidney Dillon, dam by Mortimer 2:27, son of Electioneer 125; 2nd dam by Alexander, son of George M. Patchen Jr. 2:27; 3rd dam by Gen. McClellan. I did not breed this mare, but purchased her because I considered her a great prospect when a 3-year-old. She is a splendid gaited trotter and showed a lot of speed in her 3-year-old form, but ran a nail in her foot and had to be thrown out of training for that year. I then bred her to F. S. McKinney and she has a nice yearling filly by that young horse. She is a large, handsome and showy mare with a silver mane and tail. Will make a fast trotter and a valuable brood mare.

NO. 18—BAY FILLY, 4 years, by Guy Dillon (3) 2:23½, dam the great By By by Nutwood. This is a handsome filly and one of the best bred ones in California, only recently broken to harness, never trained. She is almost a counterpart of her famous dam. Any one at all posted in blood lines can not fail to appreciate the breeding of this rare filly. All of By By's daughters that have been bred have proven great brood mares, and this is her best bred daughter.

NO. 19—BAY FILLY, 3 years, by Major Dillon, tr., 2:19, dam Guycara 2:18¾, dam of Walter Dillon 2:12½, half-mile track record, a consistent winner on the Oklahoma and Kansas half-mile tracks this season. Has never been worse than second and won six straight races before he met defeat, by Guy Wilkes 2:15¾; 2nd dam Biscara, dam of 9 by Director 2:17; 3rd dam Biscara, dam of 6 by Harold, sire of Maud S. 2:08¾, etc. This filly has a great brood mare inheritance and should make a great producer herself.

NO. 20—BAY FILLY, 3 years, by Major Dillon, tr., 2:19, dam Russie Russell, dam of Ruth Dillon, champion 3-year-old half-mile track record in 1907 of 2:15¾ and champion 4-year-old record for trotting fillies in 1908 of 2:06¾, by Bay Rose 2:20¾; 2nd dam Oakley Russell, dam of Bert Arondale 2:19 by Happy Russell 2:21½, etc.

NO. 21—BLACK FILLY, 3 years, by Guy Dillon, dam Cartina, by McKinney 2:11¾; 2nd dam the great By By. Space will not permit enthusing on the choice blood lines of this filly. Study it out for yourself. She is as good as her breeding.

NO. 22—CH. FILLY, 3 years, by Major Dillon, dam Mildred Russell, by L. W. Russell (son of Stamboul 2:07½ and By By, by Nutwood); 2nd dam Lou Milton, dam of the world's fastest trotter, Lou Dillon 1:58½, and 4 others in the list, by Milton Medium 2:24. This is another first choice that carries the blood of world's champions.

NO. 23—BAY FILLY, 3 years, by F. S. Turner 32877, dam Stamboulita 2:27, by Stamboul 2:07½; 2nd dam Biscara, dam of 9 in 2:30 by Director 2:17, etc.

NO. 24—CH. FILLY, 2 years, by Guy Dillon, dam Guycara 2:18¾, dam of Walter Dillon 2:12 and Harold Dillon, a successful sire in New Zealand; 2nd dam the great Biscara, dam of 9 in 2:30 by Director 2:17, etc.

NO. 25—BLACK FILLY, 2 years, by California Dillon 2:18¾, trial 2:12¾, dam Ellen by L. W. Russell; 2nd dam Flora Allen, dam of 4 by Mambrino Wilkes.

NO. 26—BAY FILLY, 2 years, by Guy Dillon, dam Adioo, dam of Harry Dillon (2) 2:27, 4-year-old trial 2:12, Humboldt Dillon 2:18 and Adioo Dillon (2) 2:24, by Guy Wilkes 2:15¾; 2nd dam the great By By that is also the second dam of her sire. Here is a filly that traces twice to the great \$10,000 daughter of Nutwood, the greatest of all brood mare sires.

NO. 27—BAY FILLY, 2 years, by Guy Dillon, dam Russie Russell, dam of Ruth Dillon (4) 2:06¾, by Bay Rose 2:20¾; 2nd dam Oakley Russell, dam of Bert Arondale 2:19, by Happy Russell 2:21½. This is a better made filly than her famous half-sister, and I believe if given a chance will make as great a trotter. Whoever buys her will surely get a prize.

NO. 28—CH. FILLY, 1 year, by F. S. McKinney (see No. 4), dam Martina Dillon, by Sidney Dillon; 2nd dam by Mortimer 2:27, by Electioneer 125.

NO. 29—CH. FILLY, 1 year, by Major Dillon, dam by Almonition 2:24; 2nd dam by Director 2:17; 3rd dam Kitty Tricks, dam of Conde 2:19 and Empress 2:22.

NO. 30—BLACK FILLY, weanling, by Guy Dillon, dam Caritone, dam of California Dillon 2:18¾, trial 2:12¾, and Dr. Wm. S. Jennings, trial 2:11, only foals ever trained, by Antone 30842 (son of Dexter Prince, sire of 4 in 2:10 and Grace B. by Stamboul 2:07¾); 2nd dam Biscara, dam of 9 in 2:30 by Director 2:17; 3rd dam Biscara, dam of 6 by Harold 113, sire of Maud S. 2:08¾.

I HAVE THREE SONS OF SIDNEY DILLON, two more than I can use to advantage. I am, therefore, offering Major Dillon and California Dillon for sale and will retain Guy Dillon and a few choice mares of other than Sidney Dillon blood to breed to him and confine my efforts to the development of the get of one sire, which is about all one man can do justice by. Most of the fillies I am offering for sale are as royally bred as any to be found on any stock farm in any country, and were they not related to Guy Dillon money could not buy some of them. I would like to buy some equally as well bred of another strain of blood for the same price that I will sell them for. The following is a list of those I have sold within the last five years that have developed into fast performers: Ruth Dillon (4) 2:06¾; Mary Dillon, p., 2:06¾; Kate Dillon, p., 2:10; Martha Dillon 2:10¾ (trial 2:07); Sophia Dillon 2:11¾, timed in a race in 2:07½; Rapidan Dillon 2:12¼, timed in a race in 2:07¾; Walter Dillon 2:12½ (half-mile track record); Emma Dillon 2:16¾; Ida Dillon (2) 2:27 (4-year-old trial 2:11); Harry Dillon (2) (4-year-old trial 2:12¾; Carrie Dillon (2) 2:24 (4-year-old trial 2:13), and \$10,000 refused for her; Lottie Dillon (3) 2:26 (trial 2:16); Gertrude Dillon, 4-year-old trial 2:15; Judge Dillon 2:18 (trial 2:12¾); Cornelia B. 2:19. Of the above 15 head only three have not shown 2:15 or better and all have beaten 2:20. Among those I am offering for sale are just as good ones as any I have sold in the past. Write for prices. They will suit you. I will sell for one-third cash and one and two years for the balance on approved note with 7 per cent interest. Address

F. S. TURNER, Santa Rosa, Cal.

HARNESS RACING DATES.

El Paso Nov. 1-5
Phoenix Nov. 5-12

THE JUDGES STAND is a favorite subject for discussion by the papers devoted to harness horses, and if all that has been written in regard to it were collected it would make a very large book. But probably no discussion ever held has had so little effect in working reform as this one. Things happen every year in the judges stand that are suppressed by the turf journals simply because they are ashamed to lay the truth before their readers, and nine times out of ten these disgraceful matters are not the result of dishonesty but simply of ignorance or diffidence. Any wide awake man who has ever acted as clerk in the judges stand at more than one meeting knows that many times the judges do not know how the horses have finished and have to ask others to tell them before they can give their verdict. In a field of eight or ten horses where two or three of them are in the lead and make a close finish, all the others are often overlooked entirely. Sometimes the judges do not know what horse is first, and when there is a close fight for second or third money it often occurs that none of the judges has placed any but the first two horses and ask the clerk for the positions of the others. The man who judges the finish of a race should have nothing else to distract his attention, and if he devotes his best efforts to finding which horse reaches the wire first in a close heat he will be doing all that can be expected of one man. Where the horses are strung out at the end of a race anybody can call the order that has eyesight good enough to read the numbers on the drivers' arms, but where several horses come to the wire head and head, or even two make a nose and nose finish, the judge must watch the wire very closely to be able to tell which horse pokes his nose past it first, and if the other judges are both trying to do the same thing they cannot tell the relative positions of the other horses. The work of the judges in races is not clearly enough defined in the rules, and there are but few judges put in the stand who come up to the requirements laid down by the rule which says "the member shall choose or authorize the selection of three competent judges for the day or race, who shall understand the rules of this association and shall rigidly enforce the same." There is no doubt but judges are sometimes placed in the stand who are not competent, while at other times men act as judges who could not understand the rules if they were read to them, and everyone knows that enforcing the rules of the association rigidly is "more honored in the breach than the observance." The new rule requiring a starter to be licensed has worked considerable improvement in the starting of horses, and it might not be a bad idea to have another rule adopted that will require the presiding judge to be licensed and to know his business before a license is issued him.

THE LEXINGTON SALE, held during the meeting of the Breeders' Association, was very successful. While but few high prices were obtained the horses all brought out bids and were disposed of at fair figures. On the first day 77 head sold for \$14,410, an average of \$187. The highest priced horse this day was the four-year-old Africander by Moko, dam by Simmons; he brought \$800. On the second day 42 horses sold for \$8415, an average of a little over \$200. On the third day eleven head of weanlings by Jay McGregor and The Bondsman brought an average of \$313 per head, a weanling filly by Tregantle

out of the dam of Colorado E. fetching \$575. Forty head of mature horses averaged \$260. The fourth day 86 head were sold for which \$27,995 was obtained, an average of \$325. The leading price was \$950 paid for Orlett by Ormonde 37616; a yearling by Vice Commodore out of Fanella brought \$900, and a four-year-old mare by McKinney brought \$800. Sixty-nine horses brought \$18,730 an average of \$272, on the fifth day of the sale, a two-year-old filly by Peter the Great bringing the highest price, \$725. On the sixth and last day 42 head averaged \$288. During the entire week 356 head were sold for a total of \$92,055, an average of \$259 head. Forty head of ponies were sold for a total of \$5195, an average of nearly \$130 per head. Can anyone say that the horse market is poor with the above figures to judge by?

THE MOST NOTICEABLE LESSON of the racing season now drawing to a close, says the Horse World, is that the more crosses of tested, trotting blood the breeder can combine in the pedigrees of his foals, the greater are the chances he will have of furnishing to the turf something of the calibre necessary to make a successful campaign. Short-bred ones, now, as in the past, sometimes develop speed enough to make them of value as race horses, but the man who would attempt to raise futurity winners by the use of stallions and mares having only one or two trotting crosses would be regarded as lacking in common sense, these days. The sensational performers this year, The Harvester, Colorado E., Native Belle, etc., have a long line of trotting-bred ancestors from which they have inherited their wonderful speed proclivities.

THE HARNESS RACING SEASON of 1910 seems to have been a very successful one in every State that pretends to give racing of this kind except California. The meetings given here were well attended and generally profitable, but there were very few of them and no regularly organized circuit. Some high-class racing was done at the Breeders' meeting at San Jose, and at the State Fair meeting, while Woodland, Fresno and Hanford had excellent racing, but were not visited by the leading strings which went north after the San Jose meeting. It is to be hoped that the different associations giving harness racing in California will get together this winter and arrange for a circuit for 1911. If not, harness racing in California will not be worth training horses for.

Colman's Rural World says: "No one but one who has tried to get a trotting bred horse registered after the lapse of a few years dating from its foaling, realizes the difficulty which is oftentimes experienced in getting the stallion owner's certificate of service. Sometimes the owner of the stallion has died and sometimes he will be found to have left the country, in either case the stud books of the horse being often almost impossible of location. W. H. Knight, secretary of the American Trotting Association, in a conversation with the writer not long ago, stated that he is going to try and get the legislature of Illinois to pass a law requiring the owner of a stallion kept for public service in that state to file with the county clerk of the county in which he is located, a copy of the stallion's stud book so that in case it is desired to register any of his get it will be possible to get ample proof of the paternity, date of foaling, etc., by simply going to the office of the county clerk and examining the book filed there. Mr. Knight's plan is so sensible and will so greatly lessen the labor of getting horses registered which were not registered at an early age, that the breeders of every State should make an attempt to get a law passed embodying it in its provisions. Such a law would not only assist greatly in the work of registration, but it would also be a bar to fraud and would, too, prevent stallion owners from withholding information regarding their stallion's services, which is not a rare occurrence, as anyone knows who has had much experience in preparing papers.

According to the Advertiser of Warwick, Orange county, N. Y., the Hon. Henry Seacond, a veteran horseshoer of that classical trotting region, has a set of shoes that he forged many years ago for the old queen, Goldsmith Maid. To keep them from rusting they were nickel-plated. Their weight is given as 14 ounces in front and 8 ounces behind. Mr. Seacond has the unique distinction of having been elected to the State Legislature after he was over eighty years old.

SAN JOSE DRIVING PARK MATINEE.

Quite a large crowd turned out last Sunday afternoon to the matinee races at the San Jose Driving Park. The day was fine, the track good, and the finishes close and exciting. Ray Mead won the 2:20 class trot and pace with his good three-year-old filly Lovelock by Zolock. This was the first time this filly has appeared in public, and while she had lots of speed to spare, Mr. Mead drew the finish of both heats very fine and John C. by Kinney Lou was at her saddle when she passed under the wire with Mike a close third each heat.

Ted Hayes did the starting and announcing very efficiently, Jas. A. Kidward, T. A. Carroll and G. W. McCracken acted as judges, and the timers were Geo. Reed and Jas. Howard. Summaries:

2:20 class trot and pace:
Lovelock (3), p., by Zolock-Carrie B. (Mead).....1 1
John C. by Kinney Lou (Therekauf).....2 2
Mike, p., by Scott McKinney (Hubbard).....3 3
Ishmael, p. (Montgomery).....4 4
Time—2:19½, 2:21½.

2:35 trot and pace:
Stamboulita by Stam B. (Montgomery).....3 1 1
Dr. B., p. (3), by Nearest McKinney (Renig-
ger).....1 3 2
Kiss Kee Dee by Scott McKinney (Ferri)....3 3 3
Sidmont by Alamont (McKeirnan).....4 4 4
Jib by Robert Basler (Iverson).....5 5 5
Time—2:30½, 2:27½, 2:28.

2:40 class trot and pace:
Valda by Signal Wilkes (Riley).....3 1 2 1
Rex by Alex Malone (Sheriffs).....4 2 1 2
Native Belle (Hanks).....1 3 4 4
Lady Patrone by Geridon (Patrone).....2 4 3 3
Billy L. by Argent (Landers).....5 5 5 5
Time—2:41, 2:38½, 2:36, 2:36½.

A CLEAR VIEW OF THE BREEDING QUESTION.

That excellent agricultural paper, the National Stockman and Farmer, presented a portrait of The Harvester on its title page last week, and in referring to it editorially made the following trite remarks on the breeding question: "On our cover page this week is a portrait of The Harvester, the new champion trotting stallion. This horse is a first-class representative of the ideals of those who believe in breeding animals for a specific purpose. He is a trotter that was bred to trot. All lines of his pedigree for five generations show that this was the dominant purpose of those who made the matings which culminated in a champion. To get trotters, they used the blood which had produced them. They didn't mix in a little Percheron blood to increase the size, a little Arabian blood for refinement, or a little hackney blood for the sake of high action. The lesson is perfectly clear, and all producers of livestock should keep it in mind when they are tempted to mix purposes in their aim to secure a greater variety of useful characteristics in one animal. The Harvester, it is true, is more than a mere racehorse. He has size and power enough and the right disposition to make him useful in any capacity in which a horse of his build can serve. But all these things were secured within the blood-lines that made him a great trotter, and not by going beyond them. Here is another lesson. The main purpose can be accomplished only by straight breeding; but the other valuable qualities such as beauty and power are not incompatible with that purpose. The logic may be and should be applied to the breeding of all animals. First and foremost, the specific purpose and then all the incidental values that can be had. When all livestock producers of America learn the lesson taught by the speed producers, they will be vastly richer and our markets will be burdened with fewer misfits, mongrels or nondescripts." This is a clearer view of the value of sticking close to the tried strains of trotting blood, with no stepping backward with "new infusions," than is held by some of the writers who would be expected to read the signs of the times in this respect as quickly and as clearly as a journal devoted more expressly to other livestock interests.—Horse World.

A story of an unusual incident that well illustrates the remarkable "horse sense" or instinct, which ever it may be termed, that oftentimes guides man's best friend when in danger, comes from Hillshoro, Ohio. It seems there are steep and dangerous bluffs there, high above what is known as Paint Creek. In some way a valuable mare wandered off the edge of the bluff and in her mad tumble had caught upon a narrow ledge. To move from her temporary stand meant sure death in the gorge below, but for hours the poor creature stood stock still until her predicament was discovered. The assistance of Dr. Howard a well known veterinary of Hillshoro, was sought, and he, with a party and rescuing appliances went to the scene. The mare seemed to fully understand the preparation for her and allowed the slings to be adjusted without any objection. Then she was safely lowered to the creek bed below.

Baron Penn 2:09½, the forty-sixth new 2:10 trotter for 1910, goes back into the old-time trotting lines more quickly than most of the new additions to the select list, his second dam being Black Woful, a daughter of Hamlin Patchen, one of the earliest of the stallions that appear in the pedigrees of horses that go back into Village Farm lines.

Hon. John S. Bransford, mayor of Salt Lake City, and well known to California horsemen, was presiding judge at the Boise races.

THE SPOKANE RACES—OCT. 3-8.

Wind, rain and deep mud spoiled the racing at the great Spokane Inter-State Fair this year, and while large crowds attended throughout the week, the weather doubtless kept many away and lessened the gate receipts greatly. The management of the fair was most excellent, however, and it was a big success. Owing to the fact that the track was deep in mud the time made was very slow. Many of the best horses were scratched as their owners did not want to brave the danger of injuring them. The results of the harness races held during the week were as follows:

2:25 pace, purse \$2000:
George Woodward, by Senator B. (Duncan).....1 1 1
Don Densmore (Russell).....2 2 4
William T. (Payne).....4 4 2
Ella Erickson (McGuire).....3 3 3
Haltamont (Lindsey).....ds
Buck (Jeffries).....ds
Edgarelio (Ince).....ds

Time—2:45, 2:59½, 2:45½.
2:24 trot, purse \$1000:
Dan McKinney, by Kinney Lou (McGuire)3 1 1
Jack Munroe (Cullen).....1 3 4
Geraldine (Patch).....2 2 4
Weosas (Spencer).....4 4 2
Time—2:56¼, 2:51¼, 2:55½, 3:00.

2:14 trot, purse \$1500:
Prof. Heald, by Nutwood Wilkes (Cuicello).....1 1 1
Lady Malcolm (Kirkland).....2 2 2
Lady W. (Hogoboom).....3 3 3
May (Childs).....4 4 4
Time—2:35, 2:35½, 2:37.

2:14 pace, purse \$500:
Francona, by Greystone (Russell).....1 1 1
Bonnie Antrim (Sawyer).....2 2 3
Jr. Dan Patch (Starr).....3 3 2
Lady Smith (Payne).....4 ds
Acrobat (Cullen).....ds
Time—2:32¼, 2:28½, 2:20.

2:18 pace, purse \$500:
Miss Jerusha by Zombro (Childs).....6 6 1 1 1
William T. Payne.....2 1 2 4 4
George Woodward (Duncan).....1 3 5 2 3
Haltamont (Lindsey).....3 2 3 3 2
Ella Erickson (McGuire).....5 4 4 ro
Dell McKinnon (Freece).....4 5 5 ro
Acrobat (Needham).....ds
Time—2:26½, 2:24, 2:24, 2:25, 2:27.

Stake, 3-year-old trot, purse \$500:
Mamie Alwin by Lord Alwin.....1 1
Pegasus (Ward).....2 2
Time—2:36½, 2:30½.

Gentlemen's driving race, ½-mile heats:
Freddie (Irvin).....1 1
Doc (Nason).....2 2
King Clark (Clark).....3 5
Tom (Newman).....5 3
Fritb Reuben (Johnson).....4 4
Time—1:29, 1:24.

2:18 pace, purse \$500:
Allerdaw, by Allertonian (Russell).....1 1 1
Star King (Pratt).....2 3 2
Lou Miller (Hogoboom).....3 2 3
Conqueror (Ward).....4 4 4
Time—2:20¼, 2:20¼, 2:20¼.

2:10 pace, purse \$1500:
Densmore by Vyzant (Russell).....1 1 1
Dr. Wayo (Ward).....3 2 2
Dan McKinney (McGuire).....2 4 6
Blacksmith (Cox).....5 3 3
Geraldine (Patch).....4 5 5
Almaden (Parker).....6 6 4
Time—2:29¼, 2:28½, 2:27½.

2:10 trot, purse \$500:
Zombron by Zombro (Ward).....1 1 1
Lee Crawford (McGuire).....3 2 2
Lady Inez (Cuicello).....2 4 4
Goldennut (Rutherford).....4 3 3
Time—2:17¼, 2:18¼, 2:20.

BOISE, IDAHO, RACES.

The fair at Boise, Idaho, held during the week of Oct. 10th to 15th, was a big success in spite of the fact that rain fell during the week and made the half mile track very heavy and the racing was therefore slow.

The \$2500 purse for 2:12 class trotters was won by Star King a son of Metallas, with Miss Jerusha by Zombro, second, and Conqueror by Direct Heir third. Happy Dentist was fifth in the summary, and won the consolation purse two days later.

In the 2:20 trot Kingbrook was the winner. Dr. Lecco second, Dan McKinney third and Prof. Heald fourth.

There was a very muddy track on Thursday, the date of the 2:10 trot for which there was a purse of \$2500. Helen Stiles was a starter and after being distanced in the first heat Durfee refused to start her in the second heat as he said the track was dangerous and she was too valuable a mare to take any risks with. He was fined \$100 for the refusal. Daybreak won the race, the fastest heat in 2:27, Lee Crawford was second, Goldennut third and Prof. Heald fourth. The money was tied up on a protest that Daybreak and Lee Crawford were in the same stable. Owing to this protest distance was waived by the judges. Summaries:

Oct. 10—2:25 pace, purse \$1000:
Don Densmore.....1 1 1
Geo. Woodward.....2 2 2
The Magnet.....3 3 3
Job Lots.....4 4 ds
El Reno.....ds
Time—2:12¼, 2:13½, 2:17¼.

2:30 trot, purse \$1000:
Kingbrook by The King Red.....2 1 1
Nellie Chimes.....4 3 3
Zomack.....4 3 3
John P.....3 4 4 ds
Time—2:21, 2:12¾, 2:19, 2:18½.

Oct. 11—2:15 trot, \$1000.
Densmore by Vyzant.....2 3 1
Lida Carter by Stam B.....1 2 2
Alfreda B.....3 2 3
Time—2:14¼, 2:19, 2:16¼, 2:20¼, 2:20¼.

2:15 pace, purse \$2500:
Star King by Metallas.....1 1
Miss Jerusha by Zombro.....5 2 3
Conqueror by Direct Heir.....4 6 2
Lou Miller.....2 3 4

Leu Miller.....4 5
General Heurtus.....5 6
Time—2:12¾, 2:21½, 2:16¾, 2:12.

DAVENPORT, OREGON, RACES—SEPT. 21-24.

3:00 trot or pace, three in five:
Redmont P., b. h. by King Altamont (White).....1 1
Freddie K., blk. g. by McKinney (McIntosh).....3 2
Elthalinda, blk. g. by Zombro (Payne).....4 3
Sunrise Maid, blk. m. by Sunrise (Stokey).....6 4
Lola, b. m. (Johnson).....5 6
Kraka, b. m. by Judge (Martin).....2 5 dr
Time—2:43, 2:35 2-5, 2:40.

2:20 pace or trot, three in five:
Wm. T., b. h. by Sunrise.....1 1
Hot Cake, ch. m. by King Altamont.....2 3
Redmont, b. h. by King Altamont.....3 3
Time—2:19¼, 2:20¼, 2:21.

2:30 trot or pace, three in five:
Raffes, b. g. by Zolock (White).....1 1
Freddie K., blk. g. by McKinney (McIntosh).....2 2
Elthalinda, blk. m. by Zombro (Payne).....3 3
Time—2:29¼, 2:33, 2:29¼.

Free-for-all pace, three in five:
Wm. T., b. h. by Sunrise.....1 1
Hot Cake, ch. m. by King Altamont.....2 3
Lady Smith, b. m. by Delnorte.....3 3
Time—2:23¼, 2:23¼, 2:23¼.

S. Christenson of this city has registered his three-year-old colt by Star Pointer 1:59¼ dam Perza by Allie Wilkes, as June Pointer 53426. This colt is one of the rugged sort that don't shrink after hard work. He paced a mile in his work last spring in 2:16½ and should make quite a race horse as he don't know what it is to be tired.

STOCKTON MATINEE RACES.

[By George H. Tinkham.]

A small, but select crowd were in attendance at the race track last Sunday, the races being given under the direction of several members of the San Joaquin Driving Club. There were several well contested heats, but the time was very slow.

An interesting dash because of its novelty was the two-year-old trot between three green colts, two of them—Florana and Monochrome Jr., never having been in a race. It was easily won by P. J. Chalmers' Grace Chalmers, she having been worked all summer.

Chalmers also drove for the first time his new colt, One Better, lately purchased by him at San Jose. He paid \$500 for "the purple bred." He was started in the 2:30 class against the aged horses Ben Walker and Linden Girl, and easily outfitted them to the half mile. There he seemed to tire and break on the turn.

Guy Vernon, although short of work, his trainer, Parker, having been unwell, was driven another exhibition mile, equalling his former record of 2:06 2-5. He was rated, however, entirely different from his first made record, October 1st, because of the heavy wind down the back stretch. Parker then drove the first half very fast, 1:01 2-5, and Guy, breasting the strong breeze, made the last half in 1:05. Yesterday Vernon was driven to the half in 1:02 3-5, and came home in 1:03 3-5, thus pacing the last half in 1 2-5 seconds faster than his first trial.

The following is the summary:

2:40 class, mixed:
James McKinney, t. (Foley).....1 1
Night Owl, p. (McCormick).....2 2
Lloyd A., p. (Aked).....4 3
Laura D., t. (Carroll).....3 4
Time—2:43, 2:42.

2:20 class, trot:
Augst Baron (Chalmers).....1 1
McDougald (Kemp).....2 2
Time—2:21, 2:25.

Free-for-all pace:
T. D. W., (Kemp).....1 1
Blanche A. (Acker).....2 2
Time—2:24, 2:19.

2:30 class, mixed:
Linden Girl (Nance).....1 1
One Better, p. (Chalmers).....2 3
Ben Walker, p. (Leiginger).....3 2
Time—2:27 2-5, 2:26.

Two-year-old Trot:
Grace Chalmers (Chalmers).....1
Monochrome Jr. (Nance).....2
Florana, (Meyers).....3
Time—2:49.

Judges—J. N. Jones (starter), Thomas Rea, Fred H. Johnson, J. W. Miller.

PARK AMATEUR RACES.

A short program of two races with but three starters in each, and both races won in straight heats was the offering of the Park Amateur Driving Club at the stadium track last Saturday and there were not over a hundred spectators present, but the sport was good nevertheless.

The day was cloudy and cool but the track was in superb condition and some of the heats furnished very close contests. In the Class A trot, Mr. H. C. Ahler's Sunset Belle proved the winner over Capt. W. Matson's Bird Eye and A. Ottinger's Mike Kelly. The second heat of this race was a close contest from wire to wire, the heat not being decided until the finish was reached and then by a neck. Sunset Belle was good and trotted without a mistake the whole distance, while Bird Eye made a break on the far turn, but was quickly brought to his gait by Capt. Matson who is getting to be one of the best reinsmen in the club.

Red Velvet won the class B trot rather handily in straight order. In the first heat of this race Lady Washington, who was driven by Dan Hoffman got up to the girth of Red Velvet in the stretch but could not be made to get any farther, until some one who knew the mare's characteristics called to Hoffman, "Yell at her, Dan," and when he followed the advice and let out a stentorian "Hi, there!" just before reaching the wire, the Lady let out another link and came within a nose of catching Red Velvet, who was splendidly driven by her owner, J. W. Smedley. The finish of this heat furnished a lot of fun for the bystanders. The next heat was won more easily by Red Velvet. Mr. Consani's Dividend was a starter in this race but was not up to his usual form.

Mr. H. Boyle acted as starter during the afternoon and got the horses away in good order. Results:

Class A trot:
H. C. Ahler's Sunset Belle (Ahlers).....1 1
Capt. Matson's Bird Eye (Matson).....2 2
A. Ottinger's Mike Kelly (Ottinger).....3 3
Time—2:23, 2:21.

Class B trot:
J. W. Smedley's Red Velvet (Smedley).....1 1
F. W. Thompson's Lady Washington (Hoffman).....2 2
R. Consani's Dividend (Consani).....3 3
Time—2:21, 2:23½.

Harry D. Train, of Kansas City, Missouri, one of the leading amateur drivers of America, recently made a round trip in an automobile from his home to California and return, running his machine 14,000 miles at a cost of 28 cents per mile, or nearly four thousand dollars.

Drink Jackson's Napa Soda.

LAST THREE DAYS AT LEXINGTON.

Lexington, Ky., Oct. 13.—Joan, the Directum Spier mare, owned by David Shaw of Cleveland, today won the Walnut Hall Farm cup, the feature of the Kentucky Trotting Horse Breeders' Association meeting, in straight heats. She established a new world's record for four-year-old trotters, going the third heat in 2:04½, a half second better than the record of her grand sire, Directum, which made the mile in 1893 in 2:05¼.

Joan was second in all three heats to the head of the stretch, but came strong each time near the finish, and won easily, though pushed for a record in the final round. Gen. C. C. Watts, for the association, presented the cup to Capt. Shaw. The owner, Driver McDevitt, and Joan were cheered by the large crowd. Peter Dorsey, also owned by Capt. Shaw, won the 2:17 trot, after losing the first heats to Major Wellington.

The Harvester broke the world's record for two miles, trotting the distance in 4:15¼. 1¼ seconds under the mark set by Cresceus in 1902. Under a good drive by Geers, he went the first mile in 2:08½. The last quarter of the second mile was negotiated in 31¼.

Allen Wilson, owned by John W. Coakley of Boston, paced a mile to a wagon in 2:04½, and beat the world's record made by Edith W. in 1902, by a second. She was driven by Cox.

The West stake, valued at \$2025, was taken in straight heats by Dudie Archdale from Dr. Treg, Capt. George and Decoration. Albia was distanced in the first heat. Independence Boy, strong favorite in the betting, took the first two heats of the 2:09 pace, which will be finished tomorrow.

The 2:11 trot, carried over from yesterday resulted in a straight-heat victory for Fair Margaret, which, under a good drive by J. Benyon, won, as easy winner. The summaries:

2:11 class, trotting; (two heats Wednesday); three in five; purse \$1000:

Fair Margaret, b. m. by Re-election (Benyon)	1	1	1
Justo, b. h. (McDonald)	3	3	2
Stroller, ch. h. (Keating)	4	4	3
Bell Bird, blk. m. (Estes)	6	2	6
Admiral Red, b. h. (Flick)	8	8	4
The Angelus, br. h. (Colby)	7	9	5
Startle, b. g. (Gahagan)	2	5	dr
Melva J., b. m. (Cox)	5	7	dr
Fuzz Johnson, b. h. (Geers)	10	6	dr
Jenny Constantine, b. m. (Oodge)	9	10	ds

Time—2:07¼, 2:10¼, 2:07¼.

2:17 class, trotting; three in five; purse \$1000:

Peter Dorsey, blk. g., by Moving Star (McDevitt)	2	2	1	1	1
Major Wellington, br. g. by Nico II (McDonald)	1	2	4	2	
Oxford Boy, Jr., b. h. (Cox)	3	7	2	3	
Edwin G., br. h. (Patterson)	8	6	4	3	
Morning Light, br. g. (Jones)	4	5	5	5	
David Fuller, ch. h. (Hammond)	7	8	6	6	
Orlean, b. h. (Benyon)	5	4	3	ds	
Laura Davenport, b. m. (Jolly)	6	7	ds		

Time—2:11, 2:09½, 2:07¼, 2:12½, 2:11¼.

The West Stake for 2:29 trotters; three in five; value \$2025:

Dudie Archdale, blk. m. by Archdale (Geers)	1	1	1
Dr. Treg, br. g. (Rash)	2	2	2
Capt. George, b. h. (Murphy)	3	3	3
Decoration, ch. g. (Keating)	4	4	4
Albia, b. m. (Proctor)	ds		

Time—2:09, 2:12, 2:12.

Walnut Farm Cup for 2:15 trotters; three in five; value \$3025:

Joan, b. m. by Directum Spier (McDevitt)	1	1	1
Billy Burke, b. h. (Geers)	2	2	2
Willy, h. h. (Pennick)	3	3	3
Hailworthy, b. g. (Cox)	4	ds	

Time—2:05½, 2:05¼, 2:04¼.

October 14.—Two world's records were beaten and two others equaled at the meeting of the Kentucky Trotting Horse Breeders' Association here today. Native Belle set a new world's record for three-year-old trotting fillies by going a mile in 2:06½. The new mark was made in a trial against the record of 2:07 made here in 1908 by Leading Lady.

Earl, Jr., furnished the other sensation when he smashed the world's record for the three fastest last quarters ever paced in a race. This happened in the 2:05 pace, when the gray son of The Earl paced the last quarter of the first heat in :28¾, the last quarter of the third heat in :29 and the last quarter of the final heat in :29¼.

General H. equaled the record for the fastest third heat trotted in a race when he negotiated the mile in 2:04¼ in the 2:07 trot. Spanish Queen equaled the world's record for the fastest fifth heat trotted in a race when she negotiated the mile in 2:07¼.

Silent Brigade won the Lexington stake for two-year-old trotters in straight heats and established a new record for the event when he went the mile in 2:10¾. This was two and one-half seconds faster than the record for the race made by Helen Hale in 1907.

It took six heats to decide the 2:07 trot. Spanish Queen proved best by taking the last three heats after Major Strong had annexed the first heat and General H. the next two.

Independence Boy took the third heat of the 2:09 pace carried over from yesterday, making it a straight heat victory for the son of Thistle.

2:09 pace; three in five; purse \$1000 (two heats Thursday):

Independence Boy, ch. g. by Thistle (Valentine)	1	1	1
Lady Isle, h. m. (Cox)	2	2	3
Grace G., b. m. (Gray)	3	3	2

Beauty Wilkes, b. m. (Gahagan)	4	5	5
Harry Mc., b. g. (Patterson)	5	4	6
Dark Night, blk. h. (Hall)	7	6	4
The Philistine, b. h. (Jones)	6	7	ds

Time—2:04¼, 2:05¼, 2:03½.

2:07 trot; three in five; purse \$1000:

Spanish Queen, b. m. by Onward Silver (R. Macey)	4	3	2	1	1	1
General H., b. h. by Combineer (Haag)	3	1	1	2	2	2
Major Strong, b. g. by Strong Boy (H. Snyder)	1	4	4	4	4	3
Wilkes Heart, b. g. (Snow)	2	2	3	3	3	ro

Time—2:07¼, 2:07¼, 2:04¾, 2:07¼, 2:07¼, 2:12¼.

The Lexington stake, for two-year-old trotters; two in three, value \$2000:

Silent Brigade, blk. c. by Silent Brook (H. Williams)	1	1
Mainleaf, blk. c. (Van Evers)	2	2
Dromore, b. c. (R. Miller)	3	3
Peter Boy, br. c. (E. Willis)	4	4

Time—2:10¼, 2:10¼.

2:05 pace; three in five; purse \$1000:

Earl, Jr., gr. h. by The Earl (Cox)	1	2	1	1
Evelyn W., b. m. by The Spy (Shanks)	2	1	4	1
Major Brino, blk. g. (Hodson)	5	5	2	2
Baron Whips, ch. g. (Murphy)	3	3	3	3
Queen Pomona, b. m. (Wall)	6	6	5	5
Star Patchen, blk. h. (Snow)	4	4	6	dr

Time—2:04¼, 2:03¾, 2:03¾, 2:04¼.

October 15.—Colorado E., under a good drive by Gus Macey, broke the world's record for three-year-old trotters on the closing day of the Kentucky Trotting Horse Breeders' Association, fall meeting, when he won the Kentucky stake in straight heats today. The first heat was trotted in 2:11¼, but in the second heat Colorado E. lowered his own record of 2:05¾, made at Columbus, a full second and also beat the world's three-year-old pacing record by three-fourths of a second. This was the third time this year the great Colorado colt had lowered a world's record.

The Stoll stake for 2:19 class trotters, was a hard fought race and it took five heats to decide the winner. The first two heats were won by Baron Penn. The Plunger finishing sixth and second, but in the third heat, The Plunger began to wake up and after a hard drive captured the next three heats and the race.

The race for 2:15 class pacers was won by Cinnamon, which, after losing the first and second heats to Athol R., won the third, fourth and fifth heats, distancing Athol R. in the fourth heat. Complete summaries of Saturday's races are not yet at hand. Results:

The Stoll stake for 2:19 trotters, three in five, value \$2025—The Plunger won, Baron Penn second, Creighton third. Best time, 2:07¼.

The Kentucky stake for three-year-old trotters, two in three, value \$2000—Colorado E. won, George Todd second, Sue D. third. Best time, 2:04¼.

2:05 pace, three in five, purse \$1000—Cinnamon won, The Liar second, Mabel J. third. Best time, 2:07¼.

TWO STORIES FROM LEXINGTON.

George H. Estabrook of Denver, who owns Colorado E. and spends a fortune every year at the harness racing sport, is a Christian Scientist. After seeing his colt heaten in the race of all the year he most desired to win, Mr. Estabrook listened to the condolences of friends, the carpings of the losers and a few other things until he was soul weary to a finish. So he decided to go to church. After the services he was presented to an Englishman, rather prominent in his own country, who is a leader in the Christian Science cult.

"Ah," exclaimed the Englishman when he heard the Denverite's name. "Estabrook; ah, yes, Estabrook. And might you be the gentleman who owns that grand colt, Colorado E., I saw today?"

Mr. Estabrook said he was the man.

"Well," remarked the Englishman in his most impressive manner, "you got a bad drive."

In one of the purse races at Lexington "Lon" McDonald drove the favorite, Major Wellington, which was backed to a fare-you-well by friends of the driver. The Major won two heats handsly enough and was about twenty feet from the wire at the end of the third mile, winning easier than ever, when "Lon," in the language of the quarter-stretch went to sleep.

While he was dreaming Mike McDevitt brought up Peter Dorsey with a rush, and before McDonald could get Major Wellington into his stride again Peter had won the heat by a nose. Then he went on and won the next two, completing one of the most unexpected and distasteful upsets ever seen on a race track.

As the crowd was leaving the track the talk was of nothing but McDonald's drive. One dejected individual put it thus: "Lon is a good fellow all right, an' he can drive, an' he don't cheat—but the next time he gets up for my money I'm going to ask him to leave a call."—Chicago Tribune.

Mike Bowerman, the Lexington trainer, who drove Gen. Watts to his three-year-old record of 2:06¾ and is one of the most famous of the Kentucky horsemen, was stricken with paralysis while working a horse at the Lexington track one day last week and has since been in a precarious condition.

Is it dangerous to in-breed to George Wilkes? Judging from the way the inbred Wilkes are breaking records and winning stakes it is very dangerous to the other fellow.

MORE HORSES FOR NEW ZEALAND.

Last week Mr. John Porter, of Tokarohi, Oamaru, New Zealand, purchased from S. Christenson, of San Francisco the following trotting bred horses:

Gardenia, foaled 1905, bay mare by Stam B. 2:11¼, dam Perza by Allie Wilkes, for \$600.

Floradon, bay mare, foaled 1901, by Athadon (1) 2:27, dam Flora S. 2:17¼ by Dexter Prince, for \$350.

Lady Estelle, bay mare, foaled 1898, by Athadon, dam Early Bird, dam of Seymour Wilkes 2:08½, by Playmail, for \$350.

Weanling filly by Kinney Lou 2:07¼, dam Lady Estelle as above, \$250.

Gardenia is now being bred to Bon Guy 2:11¼, winner of this year's California Breeders' and Stanford stakes. Floradon was bred to Bon Voyage this spring, and Lady Estelle was bred to June Pointer, Mr. Christenson's three-year-old by Star Pointer.

Mr. Porter also purchased from Ted Hayes for \$1000 the two-year-old colt Bon Homme by Bon Voyage, dam Floradon by Athadon.

The above sales were all effected by John (Red) Green, and they are all just the sort of horses that will be popular in New Zealand, having size, good bone and plenty of substance. They will be shipped from this port on the 16th of November.

FURTHER CONSIGNMENTS FOR CHASE'S SALE.

All the entries for Fred H. Chase's Second Fall Sale are now in, and there will be fifty head to sell on the evening of October 31st. Among the last consignments are the following:

Dr. O'Brien, matinee record 2:14½, a very handsome gray gelding by Gossiper, has been consigned by D. E. Hoffman of this city, who is getting a little overstocked on matinee horses. Dr. O'Brien is a well known speedway horse, works well at the pole and is a very attractive horse in harness.

M. Henry of French Camp has sent down two good geldings, one by Gossiper, the other by Educator. The Gossiper gelding is the property of the Colburn estate. These horses are in fine shape and both fast.

D. Sullivan of Sunol sends the broodmare Carmel by Prince Airlie, a royally bred son of Guy Wilkes.

R. Ringrose sends a black gelding combination horse, good in harness or under saddle.

A three-year-old bay stallion by Iran Alto out of a Diablo mare has been consigned by A. Donner. This is a good looker and well bred.

Silver Prince is the name of a stallion by Prince Almont dam by Silver Bow, that W. Bourne sends to the sale. All the horses will be described in the catalogue which is now ready.

THE NATIONAL TROTTING ASSOCIATION.

A regular meeting of the Board of Review will be held at the Murray Hill Hotel, New York, N. Y., at 10 o'clock a. m., on Tuesday, December 6, 1910, in accordance with the by-laws.

W. H. Gocher, Secretary.

N. B.—The President authorizes the announcement according to precedent, that a special meeting of the Board will be held in the early Spring of 1911, to accommodate those whose convenience or necessities will be served thereby.

All communications intended for the consideration of the Board at the December meeting must be forwarded to the Secretary not later than November 22, and all parties who desire that their cases should be acted on at the spring meeting should immediately notify the secretary to that effect.

The Board of Review is empowered to act in place of the full Board with the same authority and jurisdiction, and at the above meeting will consider business arising in each and all of the districts.

DRIVING CLUB AT NEWMAN.

A correspondent writes: "As Newman does not want to be out in the cold in regard to driving clubs, we organized one here last Friday evening with a membership of 45 for a starter, and I guess we will have 75 before Thanksgiving, and will hold an opening matinee on that day. We intend trying out a few of our horses here next Sunday. F. M. Hammett, of Concord, has charge of the track and at present has eight horses working, some of which can step.

The officers of the newly organized West Side Driving Club are: L. Dobzensky, President; F. Kohrs, Vice-President; W. H. Tinnin, Treasurer; T. E. Walden, Secretary; Bart Essen, Sergeant at Arms.

The Harvester, champion trotting stallion, with a mark of 2:01, made a brilliant closing of his campaign by trotting at Lexington on Thursday against the two mile record of 4:17, which Cresceus placed to his credit at Memphis in the fall of 1902. He did the distance in 4:15¼, which probably was not as fast by a couple of seconds as he could have gone had he ever been tried at the distance. Should The Harvester never make another start, which is possible, as he clearly outclasses all the horses on the professional turf and has not much to gain by endeavoring to lower his mile record of 2:01, he will stand out as the one great stallion of his day.

Palmer Clark, of Chicago, says that Grace, winner of this year's Kentucky Futurity, is a beautiful filly with beautiful manners and appears to have as much courage and determination as any trotter he has ever seen. Nor does he recall ever having seen a trotter of any age that liked better the task of standing a drive from the head of the stretch to the wire.

NOTES AND NEWS

Colorado E. (3) 2:04¾.

He is the greatest colt trotter ever seen.

His record is faster than was ever before shown by any four-year-old trotter.

And faster than any three-year-old pacer has ever shown in a race or exhibition.

There were 126,000 paid admissions at the Utah State Fair held in Salt Lake this year, and the fair was the most successful one ever held in that State.

On Thursday, October 6th, 1910, the turnstiles at the Brockton, Mass., fair (half mile track) showed that a little over \$5,000 persons had attended the fair that day.

Margaret Derby, the six-year-old daughter of Cbarles Derby, has started in four races this summer and won them all. She is owned by Judge Claffin of Bakersfield.

The Pasadena Driving Association is arranging to have the track at Tournament Park re-soiled and will give several matinee meetings this winter. J. H. Gaut is president of the association.

Viaticum by Bon Voyage, won a race for his owner Mr. W. H. McDoel at a matinee of the Chicago Driving Club week before last. His fastest mile was trotted in 2:21¾. Viaticum is a three-year-old.

Two weeks from Monday next the Arizona Territorial Fair will open at Phoenix and one of the best racing programs ever given west of the Mississippi river will be given.

Go to the Alameda track on Sunday morning and see what improvements have been made there by the new Alameda County Driving Association. Several races will be held. The fun begins at 10 o'clock.

J. L. Wilkinson, of Vancouver, B. C., who attended the Grand Circuit meeting at Columbus last month, was in San Francisco last week for a few days on his way home. Mr. Wilkinson is the owner of Texas Rooker 2:05¾ that raced up north this year.

This has not been a McKinney year, but when the returns are all in it will be found that the son of Aleyone is well represented by his produce in the list of new standard performers, and that his sons and daughters are also producing many fast ones.

Old Red Wilkes has a representative racing in the fast classes on the half mile and "big ring" tracks this season, in Admiral Red 2:09¾, the eleven-year-old stallion being raced by R. M. Flick, of Kittinging, Pa. Admiral Red made his present record at the Columbus, Ohio, Grand Circuit meeting.

Joe Cuicello's string was fairly good in the mud up north. He won two firsts and a third at the Spokane half mile track in the mud, and at Boise, Idaho, where the track was like a country road in the winter time, he got second money once and fourth money twice.

The green pacer Guy Vernon, that has paced a mile below 2:07 in public on two different occasions on the Stockton track this summer, must be a high class horse, or he could not show such speed. It is to be hoped he will be raced next year.

The Board of Review of the National Trotting Association will meet in New York, December 6th, and all matters for the board's consideration should be in the hands of Secretary Gocher not later than November 22d.

Mr. J. D. Springer, who owned and raced Sonoma Girl and sold her for \$26,000, has the handsome Zombro three-year-old filly Lady Garland at Boise, Idaho, and will train her there next summer, but does not expect to race her until she is five years old.

H. S. Hogoboom has returned from his northern trip. He won three races out of three starts with Queen Alto and purchased the mare Lady Sunrise and won two races with her out of two starts. He also won second money in the Oregon Futurity with Aplaya and then sold the colt for a good price.

Dick Wilson is expected to arrive at Pleasanton about the 1st of November with twenty head of trotters and pacers to train during the winter. The great two-year-old filly Rubylight 2:19¾ by Aerolite 2:11¾, dam Bertha by Alcantara, will be among them.

Mr. A. W. Longley, of Chicago, who purchased Lady Directly, a mare by Bonnie Direct out of Mabel, the dam of Directly at Pleasanton last winter, has won seven or eight races with her in the matinees held at the tracks near Chicago this summer. We believe she was only beaten once and in that race she won't beat.

When you attend Chase's sale on the evening of the 31st, don't fail to look over the two geldings consigned by H. Busing. His black horse Madison McKinney, is one of the best looking horses that has been sent to a race for some time. He is perfectly sound and kind and gentle. He will make a fine roadster.

C. A. Durfee came in from Boise, Idaho, the first of the week and left Thursday for Phoenix, Arizona, where his horses are entered in the meeting which opens November 7th. He reports them all in fair shape and if they like the climate of Arizona he expects to get a portion of the money that has been hung up in such generous bunches by the Phoenix people.

E. W. Allen, who managed the successful pure food show held in San Jose recently, has made a proposition to the Chamber of Commerce of that city asking its endorsement of his plan to hold a big county fair at the San Jose Driving Park next year. The Chamber of Commerce took the matter under advisement and will doubtless act favorably on the matter.

The San Joaquin Valley Driving Club will hold no more matinees until next season. The Stockton track is under lease to a party who raises a crop of hay on the ground every year, including that part on which the mile track is located. After his hay crop is cut in the spring the track is cultivated and harrowed into shape, and from the speed shown by the horses it is very evident that the hay crop improves rather than injures the footing.

The death is announced of Mr. M. J. Keeler, of Chicago, Illinois, a gentleman long and favorably known in connection with the firm of James B. Campbell & Co. of that city, proprietors of Campbell's Horse Foot Remedy. Mr. Keeler traveled very extensively in the interests of this firm, visiting California every year. Two years ago he made a tour of Australia and New Zealand and his acquaintance with horsemen was world wide. His death will be greatly regretted wherever he was known.

Varcoe, a very handsome chestnut stallion, bred by Frank Taylor, of San Jose and owned for some time by Dr. A. F. Dafoe of that city, recently changed hands in Idaho for \$1000. Varcoe some two years ago passed into the hands of Rev. H. C. Stover, of Council, Idaho, and he sold him last week for the price stated to J. F. Elwell of Colville, Washington. Varcoe is standard and registered. He was foaled in 1904 and is by Nutwood Wilkes out of Carrie Malone, grandam of Ray o' Light and full sister to Chas. Derby.

Dan Hoffman, proprietor of the Columbus Stables, San Francisco, and owner of several good trotters and pacers that he delights to drive in matinee races, will take a week's vacation from business and visit the big fair and race meeting to be held next month at Phoenix, Arizona. Mr. Hoffman owns the gray trotter Dr. O'Brien, and the pacers Dictatum and Balboa, that have been frequent winners of club races at the stadium track. Balboa is a three-year-old by Kinney Lou 2:07¾ and is considered a great prospect. He is a stout made, strong colt and has a wonderful burst of speed. He can beat 2:15 now and will pace below 2:10 next season.

The newly organized Alameda County Driving Association will give its "opening day" tomorrow, Sunday, at 10 o'clock a. m. The track is rapidly being put in shape and as much of it as is ready will be used. There will be several brushes between horses owned in the club and the public generally is invited to participate in the sport. The track can be reached by either the narrow or broad gauge boats from San Francisco to Alameda, and by the car lines from Oakland. Every person who has a horse he would like to drive over the new track is invited to be present at the opening and a general invitation is extended to the public to be present.

Reduceine is the most widely advertised remedy for horse ailments on the market. The company which makes and sells it are very liberal with the space in the journals devoted to horse breeding and they get results. Reduceine must do just what is claimed for it, as it is purchased by horsemen from one end of the country to the other and they all say it does the work. In last week's issue of this journal three whole pages were used by the Reduceine company, and it set forth graphically some very strong testimonials from the leading trainers and horsemen of America. W. E. Detels, the Pleasanton harness-maker, tells us that he ordered 100 cans of Reduceine on September 1st and his stock of it is nearly exhausted and he has ordered a fresh supply. It is not the trainers of race horses alone that use Reduceine, but owners of all kinds of horses. They all say it is "great stuff."

Many years ago a gentleman came to San Francisco from New York bringing a very fine pair of fast trotting road mares that were afterwards sold at auction without pedigree. One of these mares was called Dolly McMann and was purchased by Coombs Bros. of Napa. They bred her to Stamboul 2:07½ and got a colt that was called The Dane. This colt was sold to the late E. H. Harriman and won many prizes in the National Horse Show at New York. They also bred Dolly McMann to Whippleton and got the mare Lilly Stauley 2:17½ that was one

of the best race trotters ever campaigned in this State. Lilly Stanley was put to breeding after a car accident had made her retirement necessary and produced Rokeby 2:13¾, Rect 2:16½ and On Stanley 2:71½. Rokeby has sired Kendig 2:12, J. C. 2:26, Direct J. 2:24¾ and others; Rect is the sire of Rector 2:10½ and others. On Stanley is the sire of that good three-year-old Don Reginaldo 2:15¾ and several others. Lilly Stanley was bred to Sidney Dillon and produced Lilly Dillon, a standard and registered mare that has trotted trials better than 2:14 and if properly handled should trot in 2:10. Lilly Dillon is to be sold at Chase's sale Monday evening, October 31st. She was sired by one of the greatest 2:10 sires living and is out of a great broodmare that was also a splendid race mare. She should be worth bidding on.

Commenting on the recent win of Medium Direct at Melbourne the Victorian Trotting Record says: "The feature of the afternoon was the exhibition of perfectly gaited trotting given by the imported stallion Medium Direct. With perhaps the exception of Clarke McKinney, Medium Direct has no rival as a 'picture' trotter. Mr. Simpson's horse had the field well in hand, and it was only a matter of how far Lou Robertson wished to win by, as rounding into the back the American-bred horse went to the front, and won in a leisurely way from Emulate. To win, Mr. Simpson's horse was not called upon to show anything like his speed, and it was evident to on-lookers, from the easy and graceful manner in which the mile was covered in 2:43½, that the winner could have considerably altered those figures." Medium Direct is by Rey Direct 2:10, dam Missie Medium by Rampart, second dam the dam of Stam B. by Happy Medium.

On another page of this issue will be found Santa Rosa Stock Farm's full page advertisement of trotting stock for sale. Nearly everything offered carries the blood of Sidney Dillon, the greatest sire of extreme trotting speed as well as a sire of game and consistent race horses. In Helen Stiles 2:09¾ and Lizzie Dillon (3) 2:15¾ he has two great racing daughters. His son Walter Dillon 2:12½ half mile track record, has been a most consistent performer on the half mile tracks of Kansas and Oklahoma, winning six straight races before he met defeat and has never been worse than second. There is no stock farm in the world that has produced as many 2:10 performers for the number bred as the Santa Rosa Farm. The late Henry Pierce decided that to insure success it was necessary to have the best of broodmares and among the high priced ones he bought were Carlotta Wilkes and By By that cost him \$7500 and \$10,000 respectively, the latter price being the highest that was ever paid for a broodmare. Carlotta Wilkes has now three in 2:10 and more to follow, and By By is founding a family that will add to her fame as a great mother of trotters each year as long as trotters are bred and raised. When Guy Wilkes was the highest priced trotting stallion that ever stood for public service on the Pacific Coast, his fee being \$1000, Mr. Pierce bred By By to him and she produced two daughters, By Guy and Adioo, both now great broodmares, producers of a high rate of speed. When McKinney had established a reputation as a great sire of harness race horses Mr. Pierce bred both By By and her two daughters By Guy and Adioo to him and each of the three mares produced a daughter to the cover of the greatest sire of 2:10 trotters in the world. The above little sketch of By By's history shows Mr. Pierce's progressiveness and determination to produce the best. The majority of the animals offered for sale by Mr. Turner carry the blood of the great By By and some of them trace twice to the sister to Lockheat 2:08½. Her daughters and grand daughters are all represented in the list of those advertised for sale. Mr. Turner is overstocked and must sell. He is offering some of the best bred trotting stock ever offered for sale in California. His prices will be right and the terms are liberal.

RECORDS AND BARS.

A query has been received by this journal asking if in races held by an association where the horses will race for the gate receipts, records or bars will be made. For about the twentieth time in the last few years we will quote the rule which provides for racing at which records nor bars cannot be made. It is as follows:

Rule 41, Section 2—Records cannot be made or bars incurred in contests on grounds of members for premiums other than money, when no entrance fee is collected from entered or competing horses, even if admission is charged at the gate or grand stand and privileges sold; but all other rules governing public races shall be enforced, and members, as well as competitors, shall be amenable for violation of same. This rule shall apply only to meetings given by members of The National Trotting Association.

The above rule is from the books of the National Trotting Association and the rule of the American Trotting Association is similar. To make the matter clear to all we call attention to the following provisions of the rule.

The races must be on the grounds of members of the parent association.

There must be no entrance fee collected from horses entered or competing.

All other rules of the parent associations must be strictly enforced.

The rule applies solely to meetings given by members of the National or American Trotting Associations.

We do not see how any clearer exposition of this rule can be made.

THE NEW 2:10 LIST FOR 1910.

Trotters.

sie McGregor, by Jay McGregor 2:07½	2:04¾
Joan (4), by Directum Spier 2:11½, dam Sarah W., 2:18¾, by Hal Braden 2:07½	2:04¾

GUS MACEY TELLS WHY.

Lexington, Ky., October 6.—Today Gus Macey, driver of the champion three-year-old Colorado E., whose defeat in the Futurity was such a shock to the experts as well as to the public, broke the silence he has maintained in the face of some pretty harsh criticism on his training methods and the way he drove the colt in Tuesday's race.

In justice to himself and the colt as well, Mr. Macey considered it his duty to give out a statement and today remarked as follows: "There has been a lot of talk to the effect that I did not give my colt sufficient work after he reached here to key him up for a contest such as the Futurity was certain to be. Now, as to that charge, I will say that during the entire campaign in which Colorado E. has been beating the world's record for his age I have not been in the habit of giving him fast miles between races. I worked him here last Thursday a couple of warming-up miles, and then stepped him one in 2:15 and another in 2:13¾. I had intended to go no better than 2:15 in the last mile, but my horse was so full of trot and got away from me. However, I think the work was all right and am willing to let it go as a sample of my training.

"I will tell you what was the matter with Colorado E. in the Futurity," said Macey, "and what made him go into a pace in the second heat and had him in such a state that at no time was he up to his best form, although at that he trotted as good a race as anything of his age ever went, being first or second in each of the five heats raced and the slowest of them was 2:10.

"While I was working Colorado E. last week on Thursday his heels split open, and although we worked with them unceasingly they were bad on the day of the race, so bad that when I began warming him up he wanted to pace. I told Mr. Estabrook about the trouble and he said to go straight to the judges. That was the right thing to have done, but I was anxious to win as a man could be, and the first money was \$10,000. There was a lot of honor attached to winning the race and finally took it on myself to go ahead and not draw the horse.

"People talk about the first heat, which Colorado E. won in 2:08¾, being easy for him because he was going slow at the finish. The truth is he was in to the last ounce, and any horse that could have trotted a quarter in a second better than he went would have beaten him."

FACTS AS TO GAIN MADE BY PERCHERON SOCIETY OF AMERICA.

Gentlemen: The healthy condition of the trade in Percheron horses, and the general recognition of the sound policies adopted by the Percheron Society of America, is shown in the following interesting figures.

The business done by the Percheron Society of America was 31 per cent greater in August, 1910, than in August, 1909. The gain for September was even greater, the business being 60 per cent greater than that done in September, 1909.

The gain in membership since July 14th has amounted to no less than 317 new members. Steps are being taken to increase the capital stock of the society, so as to take care of the many new breeders who are just beginning to breed pure bred Percherons, and who wish to obtain the assistance of this great breed organization.

The inspection at the port of entry is giving excellent satisfaction, and gives accurate information regarding horses imported. Many serious discrepancies have already been detected and correction required before recording the horses in this country.

The number of horses imported to date is not quite as great as in 1909, but already nears the 1000 mark. Exactly 971 Percheron horses have been imported by members of the Percheron Society of America, since July 11th. There were 344 in July, 421 in August, and 206 in September. The largest importation made by any one man was 155 head. There are many new importers, who are also breeders. These men have been bringing from 2 to 20 head, and in many cases intend to keep the mares for their own breeding operations. More mares have been imported than ever before.

So many requests have been made for an opportunity to re-record Percheron mares that have been previously recorded in one of the other recognized books, that the Board of Directors decided to permit members of the Society to record such animals at \$2 per head for American bred and \$5 per head for imported mares. This will permit Percheron breeders to get their stock straightened out and all recorded in the Percheron Stud Book of America. This offer will stand open only till January 1, 1911, and all who have animals to re-record, should take advantage of this very liberal offer. A number of breeders, including men from both East and West, have already availed themselves of this opportunity, and much stock has been re-recorded. As colts cannot be recorded in the Percheron Stud Book of America unless both sire and dam are so recorded, it is manifestly wise to get in before the rates on such animals are advanced, as they will be on January 1, 1910.

The secretary of the Percheron Society is prepared to furnish any information regarding Percheron horses, and is glad to answer any inquiries that may be of interest to farmers and breeders. Address

THE PERCHERON SOCIETY OF AMERICA,

Wayne Dinsmore, Secretary.
Chicago, October 5, 1910.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT.

YOUTHFUL NIMROD'S FIRST BEAR.

[By J. B. Johnson.]

Away back in the '60's my father was quite a noted bear hunter in Oregon. Sitting 'round the fire of long winter evenings, I had listened with great interest to my father's stories of encounters with the great grizzly bears and Indians, both of which were plentiful in those days and destructive to stock and human lives.

I longed to be a man so I might kill big bears and unload the Indian from his pony with my imagined rifle, but to this day, I have never been able to unload the pony of its rider, although I think I have had my share of bear killing. Although only 27 grizzlies tally on my string, I have killed many more black, brown and cinnamons.

My first experience with bears was with a black. It was in the winter, when I was between 12 and 13 years of age. This bear I took or sent home without gun or weapon of any kind. It was not a very large bear, but he answered the purpose very well.

On the day previous I had gone to the woods to stop some holes in a division fence between my father's pasture and that of Thomas Polk, our nearest neighbor. I was returning home in the evening through the woods along an old abandoned road, when I caught sight of a bunch of seven wild pigs. The wind was cold and they were evidently going to their bedding place, which was so near that I watched them go into a large hollow log that had broken off about 10 feet from the ground. The hollow was about 20 feet long in the log and was sufficiently large for the pigs to go in one at a time, but how they could turn around in the log was a puzzle to me. Maybe they backed out; however, that was their business.

When the last pig was out of sight in the log I ran up and stuffed my coat and hat in the hole; then I cut some limbs and bushes, and, withdrawing my clothing, crammed the hole full of brush. Then I felt quite happy and said to myself: "Well, a bear got your mother and I have got you!"

For some time there had been a bear prowling about that vicinity, now and then eating a sheep, hog or young calf. He would go away somewhere else for a while, then unexpectedly return. Many times my father and others had followed him, but owing to having no good dogs, the bear always gave them the slip.

I had at this time a young dog I called "Keno." I was sure he would make a bear dog, for he was bound and terrier mixed and plucky enough to fight a cat or coon and he would clutch wounded deer or hay a wild hog. When I returned home that evening I told my mother of my luck with the pigs and how I intended getting them home. I was going to take the wagon up with me in the morning and chip into the log till I got past the last pig, then cut the log in two. With a couple of skids placed one end on the ground, the other against the wagon, I proposed to tie each end of a long rope to a corner of the wagon bed, and passing the center of the rope under the log and back over the wagon, hitch the team to the center of the loop and draw the log on the wagon, thus killing two birds with one stone and bringing home a load of wood with pigs in it.

Mother laughed and said: "Do you think the old pen will hold your hogs?"

Then she advised me to take the old mares, they being the gentlest horses we had, but I didn't like to drive them. Old "Suze" was very free on the bit, and a splendid mare of good breeding, with some good running qualities, while old "Mary" was a slow-poky sort of animal, and one in driving them together was kept busy whipping Mary and holding Suze back. It was tough for the driver, but to satisfy mother I did as she wished, and was soon very happy that I did, though I carry the scars about my left knee to this day. But many men have carried worse scars for not doing as their mother bade them.

When I drove away next morning mother said: "Now, Johnnie, be careful!" But mother knew she had little to fear for I had helped my father load large timbers and knew the trick; and father had often said I was worth two men in timber; but poor mother little thought of what a sight was soon to come home on the end of the long rope which I had taken with me.

As I drew near the log Keno put up his nose and also the hair along his back. Then he dashed toward the log and began nipping at some black object that protruded from the log where I had stuffed in the brush. Most of the brush was pulled out and crowded to the sides of the log.

"Keep them in there, Keno!" I said, as I stopped the horses and ran toward the log, pulling off my coat as I ran. Just as I got there Keno let go his hold to spit out a mouthful of black fur and the bear lost no time in hacking out. As he came in full view I threw my coat at him and ran for the wagon, yelling at the top of my voice: "Hold him, Keno! I knew you would be a good bear dog!"

And so little Keno proved. The bear would try to slap him, then start to run, but Keno would "ham" him and the bear would turn and cuff. All the time I was tying the team, which had started to run, and

only for their straddling a sapling would have got away, for they had both smelled bear before in Oregon.

By the time I had the team tied Keno had made it so uncomfortable for Mr. Bear that he was glad to go up the stump from which the hollow log had fallen. "Now," I thought, "if I only had a gun." But I knew my father had taken the old muzzle loader to town with him to get a new tube put in it. "That's the way with those old kind of guns," I thought; "always a tube blown out or a bullet down with no powder behind it. When I get my gun it will be a cartridge gun." We only had one gun at that time; in those days there were few guns and lots of game; now there's lots of guns and little game.

I at once thought of a way of killing the bear. Necessity is always the mother of invention. I took the axe and cut a pole, then lashed the axe to it with some small bailing rope which was on the wagon for the purpose of tying the pigs if any should get out of the log while loading it; but this long-handled affair made a clumsy weapon, and though I raised it high and aimed to cut bruin's head clear off, I missed the whole bear and broke the axe handle against the side of the stump.

A happy thought again occurred: "I will lassoo him and give him such a dragging as he never had before. I can rope him as good as any vaquero and old Suze can drag him so fast he won't know himself when I get home with him—and won't mother be proud of me? She will give me a whole pumpkin pie, and when father gets home tonight he will have his old dish of bear meat for supper, and will say: 'John, you are a chip of the old block!'"

By this time I had old Suze's singletree undone from the doubletree, and leaving her tugs fast to it I dropped the neckyoke and unsnapped the lines. Then I took the long half-inch rope and tied one end on to the singletree ring, made a noose in the other end and did up my rope, leaped on old Suze and started for the stump.

Old Mary nickered after us as she stood tied to the sapling, and seemed to say, "Good-bye, Suze!" Keno was standing at the foot of the stump, barking viciously and seeming to say: "Come down if you dare! I can eat two such big coons as you." The bear seemed to grin at me as I approached him, swinging long and steady swings. As the noose fell over his head he seemed to try to guard it off with one foot, which passed through the loop. In an instant I ran my catch and tightened on the slack, and put both heels in Suze's flank. A lean of the body and she was gone like a shot. Old Suze was under good headway when she was at the rope's end, and the way that bear came off that stump was not slow. Grabbing off my hat, I used it for a whip and kicked so hard with my heels that the old mare got right down to a good running.

When we were under good headway I looked back to see that black heap come bouncing. He would take a turn at coming endways and sometimes struck against bushes or rocks by the side of the old dim road, and would be jerked 10 or 15 feet high, then come rolling and bouncing along. Keno was trying hard to get hold of him, but the bear was like the flea—just as he had him he didn't have him.

By this time we were out of the woods and had an open run for home. I intended to stop, of course, at the double gate in front of the house, for I felt sure there wouldn't be a breath left in that tumbling beast. Besides he had been jerked against enough trees and rocks and bumped hard enough to kill any common thing.

As we neared the gate I tugged at the short reins of the blind bridle, but the old mare had the smooth bit in her teeth and the scent of that drag in her nostrils. Mother was in the front yard at her chrysanthemums, which were just commencing to bloom. I shouted: "Here we come!" The old mare hit that plank gate and went through it, but left me hanging in it. I was there only for an instant. The rope came through with a sizz and the bear came against me with such force that it knocked me plenty loose.

I got up and limped on to the barn with a wound in my left knee from the broken nails in the gate—or maybe the bear bit me as we went through, I don't know which, for he was yet alive. When I got to the old mare, who was standing at the barn door panting and trembling all over, the bear was breathing hard, too, and soon tried to get up; so I took the mare and dragged him to a tree, where I could get the rope over a low limb; then I turned the mare back far enough to get slack rope and threw it over the limb. Then I hoisted him up and rode round and round the tree till the rope was wound to the singletree, made it fast and let him hang there till he was ready to skin. Then I went back again for old Mary.

Next day father went with me to get the pigs. The bear had pulled out my plugging, and, crawling in, had eaten both hams of the first pig. The others then crouched in so tight that two of them were smothered.

A big run of salt-water fish has been on at Redondo Beach lately. Many anglers have pulled in yellowtail until their arms were tired.

SPORTSMEN'S CONVENTION.

The California Fish and Game Protective Association's fourteenth annual convention was held at the Palace Hotel Friday, October 14th. Besides a large number of local and visiting sportsmen and members of the association, the following delegates were present:

Max Lowenthal, Los Angeles, representing the Tuna Club of Catalina, Henry W. Keller of Los Angeles, for the Playa Del Rey and Recreation Gun Clubs; Harry A. Greene, I. W. Fleming, Al Schoffle, Martin Birks and A. C. Meyer, Monterey Bay Fish and Game Protective Association; Game Warden I. L. Koppel, Santa Clara County Fish and Game Protective Association; E. B. Tufts, W. L. Valentine, John A. Shumacher, Louis Herzog and F. A. Barnes, Los Angeles Fish and Game Protective Association; Game Warden Walter Welch, Santa Cruz Fish and Game Protective Association; Dr. I. W. Hayes and G. W. Root, Grass Valley Fish and Game Protective Association; Dr. W. S. George, George Ackerman, Joe Ross, Joseph Schwandel and Charles Loganfry, Contra Costa Fish and Game Protective Association; Game Warden George Neale, Sacramento Fish and Game Protective Association; W. G. Stearns, Southern California Rod and Reel Club; A. R. Coffin, W. A. Corel, Carl Carlton, C. A. Post and D. C. Milan, Riverside Fish and Game Protective Association, San Benito Fish and Game Protective Association; W. W. Richards, James Watt, T. C. Kierulff, Charles H. Kewell and J. F. Cooper, San Francisco Fly-Casting Club; James Maynard and George Uhl, Volante Gun Club.

President H. W. Keller appointed the following committees: Legislative, Harry Greene, I. L. Koppel, G. H. T. Jackson, Fred P. Butler and G. W. Root. Resolutions, Thomas C. Kierulff, T. V. Bell and W. W. Richards. Credentials, W. W. Richards, Dr. I. W. Hays and E. A. Mocker.

The following named sportsmen were elected members: James Watt, S. Christenson, E. R. Zion, Charles W. Corel of Riverside, Henry Lowenthal of Los Angeles, Judge S. P. Hall, Dr. Julian Waller, Dr. T. P. Bodkin, Amby Buckley, H. G. Larsh and Fred P. Butler.

Contrary to general opinion, the association is not the representative of wealthy sportsmen for the purpose of securing favorable class legislation in the interest of fish and game preserve clubs. The practical and rational protection of fish and game and its conservation as the property of the people of the State, the enactment of proper legislation, the specific and general observance of these laws in both the spirit and letter, the general education of the public at large as to the value of fish and game protection, and the adoption of needed changes in the present laws are, among other things, the purpose of the association.

Secretary E. A. Mocker read numerous communications from various clubs and individuals, which were referred to the legislative committee.

The initial resolution adopted was the indorsement of the International Exposition at San Francisco in 1915.

Among the proposed changes in the present laws that will be advocated by the association is the shortening of the open deer season a month and a half, from August 1st to October 1st, and taking off the restriction on the general use of dogs in deer hunting. The present law, save in the sheep raising sections and some of the northern counties, is regarded by the majority as farcical. With the aid of dogs less deer are killed and most of the wounded bucks are recovered. The still hunter, who knows his country, can, by lying in wait, get his buck any time. Dogs make the deer wary and fleet. Dogs properly trained are readily called off when a doe or fawn is jumped. In many sections of the State, deer hunting is almost impossible without the help of hounds.

A menace to the quail supply throughout the State is the automobile shooting party. With the machine, hunters can get into every section of the hunting country rapidly and comfortably. The saving in time as compared with other means of transportation enables many more quail limits to be shot.

Shore birds are migratory birds and are more in evidence during the closed season than when it is now permitted to shoot them, and an extension of the open season here is advocated by many but did not receive the endorsement of the meeting.

The season on English snipe should be shortened at least two months—a period now in which these birds are shot while they are mating and nesting.

The sale of ducks is prohibited in Oregon and Washington and other States. The rapacity of the market hunter in this State could be curbed if a non-sale clause were inserted in the statute. Mountain quail will be benefited, it is urged, if a further close season of two years were to be enacted.

The present license law is in need of repairs, particularly in regard to the deer limit. There is no method at present of keeping tab on how many bucks a hunter kills. Tags issued with the license and attached to each buck brought in will be a safeguard it is claimed. When the hunter uses both his tags any further shipment of venison would be subject to seizure.

The rearing of game and fish in captivity by private individuals or firms and the subsequent sale of game birds or trout, under certain regulations, is regarded as not only feasible, but will do much to put the market hunter and market fishermen out of business. This custom prevails in several other States and works satisfactorily.

The gray and pine squirrels and the cunning little chipmunk were denounced in a lengthy communi-

cation from Associate Forester C. A. Boyce for the enormous damage they do in destroying seeds of sugar pine and other forest trees. Numerous instances from forest rangers in every section of this State gave strong testimony corroborating the charges made against the climbing rodents.

Chief Deputy John P. Babcock, in a short address, defined the policy of the State Fish and Game Commission, giving several illustrations as to beneficial work in contemplation, in the shape of a campaign of fish and game education throughout the State. A canvass by several deputies for this purpose was suggested.

The following officers were elected for the ensuing year: Henry W. Keller of Los Angeles, president; Harry A. Greene of Monterey, first vice-president; W. W. Richards of Oakland, second vice-president; Walter Welch of Capitola, third vice-president; G. W. Root of Grass Valley, fourth vice-president; Carl S. Carlton of Riverside, fifth vice-president; E. A. Mocker of Capitola, secretary-treasurer. Chief Deputy Fish Commissioner, John P. Babcock was elected an honorary member of the association.

The next annual convention of the association will be held at Capitola, September 15th and 16th, 1911.

THE NEGLECTED MUSSEL.

Mr. Irving A. Field of the United States Fisheries Laboratory, has written a highly interesting and instructive paper on the common sea mussel (*Mytilus edulis*), one of our commonest shellfish, which grows to about 4 inches long by 1½ inches in diameter. The shell is thin, of a violet color, and covered with an epidermis of shining blue black. Mussels grow in great beds along our coasts. In Europe the mussel entirely replaces as food the common clam, which, though abundant, is not there utilized. Careful investigation and numerous tests with mussels prepared in various ways, showed that in flavor they are quite equal to the oyster, and take high rank from the standpoint of digestibility, being more easily digested than either the oyster or the clam. By cooking, the mussel is made tender, whereas it renders the clam and the oyster tough, hence less easily digestible. The nutritive value from a chemical standpoint is much higher than that of the oyster, and about the same as the clam. In ratio of edible portion to refuse, the mussel compares just as favorably with oyster and clam. From equal quantities of mussels and oysters by weight, the mussels will yield two or three times as much meat. Mussels breed at a prolific rate, the method of reproduction being similar to that of the oyster, so that it is an easy matter to cultivate them by artificial means. In Europe the demand for mussels is so great that their culture is practiced on a large scale. The French method of mussel culture dates back to the year 1035. It was invented by an Irishman named Walton, who was the sole survivor from a shipwreck in the Bay of Aiguillon. He was kindly received by the French fishermen who, up to that time, had been able to make but a scanty living from the sea. In a short time he was able by his ingenuity to give them a lasting reward by establishing mussel culture which has continued to the present day, and now supports several thousand persons in that district. In 1905, from an adjacent village, 215,253 bushels of mussel, valued at 112,433 dollars, were marketed. The total number of mussels cultivated on the French coast during that year was estimated at 425,492 bushels, valued at 222,439 dollars. In the huchot system (French method), a row of stakes 2 feet apart, forms a kind of fence, up to 250 yards long, running at right angles to the shore. When about five months old the mussels are scraped off the piles, etc., and transferred to the bucho, where they are fenced in by means of old netting, and by the time the netting has rotted away the mussels are firmly attached to the timbers, stakes, etc., by their byssal threads. They are, if necessary, thinned out by removing the larger ones to another bucho, each of which is made in several sections. The work of transferring the mussels goes on day and night, whenever the low tide permits. At about 12 months the mussel attains a marketable size. To summarize the qualities of the mussel, we have a shellfish as palatable as the oyster, much more nutritious and more digestible. It contains only half as much waste as the oyster, is more abundant, and more easily cultivated. It is in season for the table when the oyster is out of season. In older countries, where the resources of the soil are taxed to the utmost, it has been found advantageous to cultivate this valuable shellfish.

1909, from an adjacent village, 215,253 bushels of uable shellfish. So much thought of is the mussel supply of the Santa Cruz county beaches that the supervisors have passed an ordinance prohibiting the wasteful gathering of the shellfish.

The San Mateo ocean shores are well stocked with myriads of mussels. Every week outing parties return with many bushels of the luscious bivalves. At this time of the year mussels are fat and in prime condition.

The Pacific coast, north of Point Conception to the Arctic regions is noted for large mussels of splendid flavor.

The local markets of this city are supplied with a smaller variety, gathered from the wharf piling here and there about the bay. These small sized mussels are noted for their delicious flavor. A favorite way of treating them is to steam them and serve "à la Bordelaise."

REMARKS ON GROUSE DRIVING.

There are so few Americans who are familiar with "game driving," as practiced in England and Scotland, that the following by an English sporting writer will be of interest:

"There are many moors on which grouse driving, if carried on at all, is managed in so antiquated a fashion that it often proves a failure, for the reason that the keepers who are responsible for the management cannot or will not, study the matter from a practical point of view. There are certain points which should be carefully attended to, for on them depends the entire success of the coming drives. The most important of these is the position of the butts, which should be erected, or according to the circumstances, dug out, some time before the season opens, so that the birds may become accustomed to them. It is, however, impossible to lay down any general rules on this subject, as so much depends upon the lie of the ground and the local habits of the birds. But in general the line of butts should be placed behind a ridge, though not too near it, so that the guns may have time to see the birds before they come within shot. Wherever it is possible sunk butts should be used; but frequently the ground is too wet to admit of their being properly drained, and in these cases the old kind must be built. Many changes may have to be made, and the butts may have to be altered time after time before the most advantageous positions are discovered, for experiment alone will decide their ultimate success.

Let it be assumed, however, that the position of the butts has been finally settled, and we come to what is at the root of all successful grouse driving, namely, the arrangement of the heaters and flankers. In some parts the importance of flanking is very imperfectly understood, but it stands to reason that birds will naturally fly with the wind sooner than turn against it, and if the wind should be blowing, however lightly, across the butt, flankers must be placed accordingly. There are certain points on every moor at which birds always attempt to break away, and these should be carefully guarded with flankers, whose business is not to stand with raised flags in full view of the grouse, but to lie low until they see a favorable opportunity of using their flags to advantage. The flanker should spring up at the right moment and wave his flag, when his sudden appearance will have far more effect than if the advancing birds had seen him the whole time. The beaters should form a line at the end of the beat which is to be driven and advance with extended wings in absolute silence. The noise which so frequently accompanies a grouse drive is quite unnecessary, for if birds have once made up their minds to break back, they cannot be turned toward the butts again. When the line reaches any of the flankers the latter should fall in with the heaters, and the whole should form a semicircle so as to completely hem in any birds which may be lying near the butts. Shooting tenants, by the way, often find considerable difficulty in obtaining a sufficient number of heaters, and in consequence there is a great demand for their services. This has led to an increase of wages, which, in the case of gillies, has assumed undue proportions. Few rich shooting tenants realize the harm which they are thus doing. To them money is no object, but to others it may be; hence there is much discontent among the gillies employed by resident proprietors, who know the proper scale of wages, and generally refuse to pay the extortionate amount now so frequently demanded. It is seldom that shooting tenants remain for more than a few years in one place, and when they pay wages on such a high scale the gillies frequently find that the incoming tenant is unwilling to continue paying such a price for their services. Hence arises discontent and trouble, which might easily be avoided if tenants would ascertain the regular wages paid in a district where they have rented a shooting.

Care should always be taken that the guns avoid showing themselves unnecessarily on the way to the butts, especially when the ground is of a flat nature. There are generally water courses or some such hollows through which they may reach their places unobserved, and when the butts are close at hand absolute silence should be enjoined. In some places guns move up two butts each drive, and in many others only one. Probably by moving up two at a time more variety is obtained, and there is more chance of each gun having his fair share of the shooting. But this depends to a great extent on the number of drives, and will be decided by the host and his keeper. It is advisable that the party should draw for places at the commencement, and this is the practice usually adopted. A horn should be sounded to warn the guns of the approach of the heaters, especially when the butts lie behind a ridge, and after this all birds should be taken behind.

The hill grazing being generally in the hands of tenant farmers, friction often arises between the keepers and the shepherds, and I have known a drive completely spoilt owing to a gathering taking place on the day fixed for a grouse drive. This, of course, should never occur, for if the shooting tenant is on a friendly footing with the farmers, an arrangement should be made by which notice of the day fixed for a grouse drive or gathering may be mutually given some time in advance. By this means all chance of disappointment is obviated, for the sportsman will avoid choosing a gathering day for his drive, and the farmer will direct his shepherd to avoid all disturbance on the day of the grouse drive.

There is one other disturbing factor which has not yet been mentioned, namely, the eagle, which still survives in the wilder parts of the Highlands. This

grand bird is now preserved in some districts for sentimental reasons, in spite of the fact that he may be seen driving the birds before him on the morning of a shoot. But all honor to those sportsmen who spare him, for he is a relic of the past age and our sole connection with the days which are now gone. And the risk is small, for it is seldom that his descent on a moor coincides with a grouse drive.

As to the pick-up after every drive, there are a few points worth mentioning. For this purpose good retrievers are absolutely necessary, for the time which is thus saved is often of great value. Spaniels are sometimes used, but, although they are very useful, they can not gather birds with the speed of a good retriever. To facilitate the pick-up strips of heather should be burnt behind and in front of the butts, by which precaution much time is saved, as the birds are then gathered more quickly, a point of great importance on a short autumn day. It is a good plan also to send a man on the following day with pointers and setters to look for keeps a note of what he has killed and what has been picked up, this part of the work becomes much easier. It is not every day, however, that will point cold game, and this should always be borne in mind.

STATEMENT OF THE A. K. C.

The statement which appears beyow was mailed to us by Secretary A. P. Vredenburg with a request that it be published by this journal:

"During the past few months letters and editorials have appeared in the kennel press showing that the relation of the American Kennel Club to certain complaints and discussions on the Pacific Coast is misunderstood. It has, therefore, seemed wise for the Board of Directors to issue a simple statement of the facts in the case.

From the 12th to the 15th of May, 1909, the San Francisco Kennel Club held a show in San Francisco. Among the exhibitors was William Ellery. On September 18, 1909, George A. Cranfield brought formal charges against Mr. Ellery, claiming that certain entries made by him were false, in that the pedigrees given were not the actual pedigrees of the dogs exhibited. The charges of Mr. Cranfield were made in due form, and accompanied by a proper deposit, in accordance with the rules of the American Kennel Club.

The Pacific Advisory Committee, acting as a trial board, in accordance with precedent and established rule, sent to the plaintiff and to the defendant notices of a hearing at which both sides would be given an opportunity to be heard. Unfortunately, and presumably as the result of a clerical error, the time and place at which such hearing would be held was not included in the notices.

Thereupon, Mr. Ellery, without taking any steps by way of appeal to the higher authorities of the American Kennel Club, began legal proceedings before the Superior Court of California, and obtained a temporary injunction against any further communication with him from the Advisory Board.

These facts were brought to the attention of the president of the American Kennel Club, and he, taking the position that Mr. Ellery in thus appealing to the civil courts before exhausting the remedies given him by the rules of the Club, had virtually denied the Club's authority, took the only action which appeared reasonable or possible, and suspended Mr. Ellery, his kennels, and his dogs. The action of the president was based upon the fact that Mr. Ellery, an exhibitor in a show given under the Club, appeared to have refused to recognize its authority. The action of the president was duly sanctioned by the Board of Directors at its next meeting.

All of those who have had experience in the management of dog shows or in exhibiting are familiar with the fact that the decisions of the Bench Show Committees, Trial Boards, and Advisory Boards are subject to appeal to the Executive Committee of the American Kennel Club.

All clubs giving shows under the auspices of the American Kennel Club agree to be guided by, and subject to, its rules. All exhibitors, in entering dogs, make the same agreement, and are given every opportunity to make themselves familiar with those rules.

If Mr. Ellery had any doubts as to the fairness of a decision which might be given in a case against him, it seems perfectly clear that his duty was to have taken that decision and then appealed from it to the higher authorities. If an adverse decision had been rendered in his absence, he not having received proper notice of the meeting, it would clearly have given him the right of appeal, provided he had taken such appeal within the required time, after receiving actual knowledge of such decision.

The case of the San Francisco Kennel Club has many similar points. In connection with the investigation of the case of Cranfield vs. Ellery it appeared that certain changes had been made in the certified catalogues which were sent by that club to the American Kennel Club for its approval. The secretary of the American Kennel Club brought charges against the San Francisco Club, based upon these apparent changes, which was his duty. The Pacific Advisory Committee, acting as a trial board, notified the San Francisco Club that a hearing would be held, when an opportunity would be given to both parties in the complaint to appear. In this case, as in that of Ellery, no time or place was specified and as in the case of Ellery, a temporary injunction was obtained against further communication from the Pacific Advisory Board. In this case, as in that of Ellery, the San Francisco Club was suspended, not because it had been proven guilty, but for the reason

that it ignored the authority of the American Kennel Club under whose auspices it had given the show.

In these two cases it should be appreciated that the action of the American Kennel Club was not in any sense a judgment on the actual facts concerned. The suspension of Mr. Ellery and that of the San Francisco Kennel Club was based purely upon their refusal to recognize the authority of the American Kennel Club in the management of dog shows given under its auspices and on their refusal to obey rules with which it is fair to assume they were familiar.

Under its constitution and by-laws, it is impossible for the American Kennel Club to consider the points at issue until they are presented on appeal from the decision of its trial board.

At a meeting of the Board of Directors, held February 15, 1910, the matter was considered, and it seemed at that time that nothing further could be done until the matter had come before the Club in proper form. It was evident, however, that a good deal of unfriendly feeling had developed in connection with these cases, and the Board of Directors decided to take advantage of an opportunity which was given to send a communication to the Coast to look over the situation and report to the Board of Directors as to the actual conditions underlying the feeling of unrest. This action of the American Kennel Club in sending this committee to the Coast was based purely upon its desire to obtain an accurate knowledge as to the conditions which existed. This committee was composed of the two highest officials available, the vice-president and the secretary.

It is unfortunate that the representatives of the Club were not received in the same sportsmanlike spirit of goodfellowship that was responsible for their visit.

It is particularly unfortunate that the facts in the case have been obscured by vituperation and unjust statements in connection with gentlemen who have for many years given their best services to the dog fancy without expectation of reward aside from the personal satisfaction of having done a good work well.

Samuel R. Cutler, Edward Brooks, Edwin W. Dwight, Special Committee."

OREGON'S BIG GAME REGION.

Of all the game lands in the far West no section has been so little tried by sportsman as the Upper Klamath Lake region, in Southern Oregon. Big game shooting is yearly becoming rarer in California, but that segment of the Pacific coast mountain spine between Mount Shasta in Northern California and Mount Hood in Southern Oregon, a wilderness practically untouched because of its incorporation in the government forest reserve, seems to have been overlooked by forest lovers.

One reason for its wildness is that it is off the beaten track of railway thoroughfares. Here on the mountains girding the head of the lake great "burns" or brush patches, miles in extent, which hide the scars of ancient forest fires, give cover for the deer. Berry patches invite the black and cinnamon bear. Up to the north, where the mountains give way for a space to lower hills and open valleys, there are elk. Back at the base of bald Pitt mountain, where the wilderness is supreme, the "painters" or California lions scream at night.

Here answers to the fly (the Dolly Varden and the cutthroat) the speckled trout, a peculiarly gamy fish, which seems to make its habitat in no other place than the tributaries of Klamath.

The deer are stalked only. If a city hunter should venture into this country with hounds he would find his dogs mysteriously poisoned before he left the lodge at Pelican. It is against the ethics of the mountain men of Klamath to sit on a trail and slaughter a buck in flight from dogs.

There are two kinds of deer that "use," as the mountaineers say, along the Cascade slopes in Southern Oregon—the little California variety, incredibly swift, and the mule-tailed deer, larger by many pounds and even more wary than his smaller brother. The mule-tail is rarer than the California deer. He is found higher up on the slopes of the mountains, almost at the point where the timber gives way to bald granite.

The bears are plentiful and it is customary to hunt them with dogs. The bear dog of the Oregon mountain men is of a strange and various breed. He may be a mongrel of no pride of ancestry or a collie of a shadowy pedigree; usually he is just a plain ornery yaller dog which has the wisdom to run in and snap without being caught, and whose voice is the basso register.

There are no grizzly bears in the Cascades. They are found in the Siskiyou range on the border of California and in the coast mountains of Southern Oregon. The black bear that inhabits the Klamath region grows to remarkable size, far larger than the black bear of the Eastern and Middle Western states. The state of Oregon pays a bounty on his scalp because of his depredations on the sheep and cattle.

The California lions are numerous enough to induce nervousness at night and make it comfortable to be in camp at sundown, but one may hunt for days and never get a tawny flash of one sneaking through the brush.

For the fisherman the opportunities are of never-ending fascination. The lake and stream are both at hand.

Fred Butler shot over fine quail ground in Sonoma county last Sunday and secured a limit bag in the morning shoot.

GOSSIP FOR SPORTSMEN.

The moderate rainfall last week seemed to have been of great benefits to local sportsmen. For the marsh duck hunters, particularly on the Suisun, conditions were wonderfully improved. Sunday two weeks ago was excessively hot and the inside grounds were given an aggravating overlook. The few birds that were in evidence flew not only wisely but exceedingly high, many game bags were stuffed with gum boots and things instead of ducks.

For the upland sportsmen the moisture very much improved ground conditions, but hardly enough for best results.

Canvasbacks and bluebills are coming down from the North in big bunches. These fine ducks have been on the east side waters of San Pablo bay now for over a week and have been hunted by east side sportsmen with great success. Near San Pablo a number of limits have been shot by gunners in the numerous blinds there.

A fortnight ago, notwithstanding the hot weather and mosquito competition, twelve members of the Volante Gun Club scored a total bag of 200 ducks. James Maynard, Walter Kaufman, Harry Blatchley, Nat Boas, Pete Howard, Cal Brougher, J. D. McKee and Joe Campbell were in the blinds. On Wednesday twelve members present each shot limit strings. Last Sunday and Wednesday excellent shooting was the rule at this resort.

On the Calhoun preserve half a dozen guns were out, but the birds were few and flew high. Jack Barr scored the largest bag.

The rainfall came at an opportune time to allow the mid-week delegation of gunners to shoot limits galore; hardly a sportsman who was out failed to secure a satisfactory morning shoot. W. W. Richards and guests at Green Lodge shot sprig limits; big fat northern birds.

Mallards seem to be plentiful in the vicinity of Antioch. Dr. M. E. Simon and Dr. Henry La Caste each were on the large end of the limit of these birds last Sunday.

The west bay shores from San Rafael up to Petaluma creek have afforded rather good shooting since the season opened. Many sprig and teal have been shot. A few bluebills were shot near Reclamation, above Black Point, last Sunday.

Round about Alvarado matters were of a more pleasing degree. Members of the Continental Gun Club managed to bag a generous bunch of sprig and mallard. The Mud Ranch ponds are not in shooting commission this year, consequently the ducks find a safe haven of refuge. Borax Smith and his friends shoot now at a new preserve near the beet sugar refinery and have had plenty of good shooting since the game opened.

At Mount Eden E. C. Hammond and other mid-week shooters found enough sprig and an odd canvasback or two to keep their guns busy.

At Curlew Lodge, near Mowry's, Phil B. Bekeart and several guests have had the good fortune to connect with limit bags of ducks on four different shooting days.

Lee Larzale, Dr. E. N. Short, P. Fuller and Clarence Ward had a fair look-in on the game two weeks ago at the Albrae Gun Club preserve. Wednesday's shooting, however, made up for any prior short measure in ducks. General results since that time have been rather meagre.

Alviso and "the bridges" have proved almost blank since the opening days. Few birds were in that neighborhood and they kept well up in the air when they were moving. The same conditions, it is reported, ensued all week.

Dos Palos is on the duck map. Dr. Patterson of Oakland gathered in a sprig limit in that district last Sunday.

Two weeks ago from Newman down to Los Banos the air was full of duck, 158 limits of 25 ducks each were shot by gunners at the Gustine, West Side, Los Banos, Field and Tule and Ingomar preserves. John B. Coleman, Joe Harlan and George Uhl shot at the Field and Tule Club ponds.

The midweek shooters were handicapped for the reason that there were not enough gunners out to keep the birds moving. William Garrish was placed in a favorable blind at Los Banos for a limit bag. Last Sunday over 50 limits were shot at the West Side preserve. The Sprig and Teal and Santa Rita clubs also had a big shoot.

Lee Harpham and J. B. Lemmer had a moderate amount of luck with ducks in the lagoon at the Salmon Creek Gun Club near Bodega a week ago. The duck shooting in that section and the near-by Tomales bay resorts will hardly be exciting until the 1st of November, when the northern birds usually appear.

Mr. and Mrs. George Newman each shot limits of quail on the opening day in Marin county a week ago in the coverts of the Point Reyes Sportsmen's Club. The quail shooting this season in that district will prove very attractive, as birds are unusually plentiful.

A trip for quail to Jersey farm in San Mateo county by W. J. Street, Leo Weinand, William Smith and Fred Schmidt proved almost barren of results. Although there were plenty of birds in that section, they kept out of harm's way in a heavily thicketed rough country that is very hard to hunt over.

Further south near Pescadero Fred Sarcander and Baron von Breidenstein each scored limits in a very pleasing district to shoot over.

Indications for excellent fall striped bass angling are getting better now every week. And, what is more, new fishing grounds are being reported from time to time. Two Point Richmond anglers trolled

in the vicinity of The Brothers every day for a week and caught in that time 128 bass. The largest scaled seventeen pounds. The best day's fishing was on Tuesday, when it rained. These game fish are fairly plentiful in the sloughs of the Belmont and Redwood City marshes. In the oyster bed parts of the south bay, it is reported, it is no trick to get recognition from the fish.

For the past two weeks numbers of striped bass have been caught at Black point, or Grand View, in Marin county, as the station is now named. Both rod and line and hand-line fishermen have had great sport. One Sunday over 100 fish were caught, principally with clam baits. The bass taken run from three to seven pounds in weight, with now and then a heavier fish. A party of San Rafael anglers—Roy Prescott, Robert Inman and F. Foggiani—one day recently caught nearly 100 bass in one of the sloughs near Black point. The fish have been feeding on shrimps and small fry.

At Rodeo recently there was a large gathering of clam casters intent on decreasing the supply of striped bass. General results were rather slim. Tide and weather conditions were not favorable. Louis Daverkosen, Charles Cate, Jack Thompson and Frank Hittell, one day recently, caught thirty bass going in weight from three to seven pounds.

One most undesirable catch that is now absolutely certain at Rodeo is the oil and muddy oil slime that befools the anglers' lines and tackle. This unfortunate condition may result in the abandonment of that fishing ground by the anglers. Striped bass, caught in those waters, have tasted so strongly of oil as to be unpalatable.

The San Antonio slough bass tamers are biding their time—they expect a run of big fish in late October and through November. Last Sunday the returns were not very heavy. Charles Bond managed to connect with a careless sixteen-pounder, however, the evening before.

Wingo is beginning to wake up. The slough chipped in with five bass last Sunday on call of Charles Urfer and J. Ayres. Joe Harvey, Nextmayor Tim Lynch and others could not fill when they drew to double clam baits.

Tiburon lagoon has gone along in regular fashion, not many bass, nor any particularly large ones, but just enough fish to keep a number of rodsters and handliners pegging away.

Truckee river conditions are said to be almost ideal for late fly fishing. James Watt, last week, spent a day at the fly-casting club cottage. He brought back, among other smaller trout, six speckled beauties, running from one to one and a half pounds in weight. One lure he used was a new spinning spoon, which is his own design.

A delegation of the California Anglers' Association have placed 40,000 steelhead fry in Paper Mill creek and 50,000 rainbow fry in Olema creek, Marin county. The annual stocking of these two streams has borne abundant results for several years past and the present liberation of young trout will no doubt be equally efficacious.

Klamath river angling at the Hot Springs is excellent. The fish run from 1 to 3 pounds. W. F. Hillegass has been at that resort for two weeks past.

Reports from Eel river state that the angling was still good enough to make worth the while a trip. Mrs. George Vance, Mrs. J. M. Vance, Miss Etta Vance, E. T. Chute and others were getting nice fishing last week. As soon as the rains start in the sport will be over, however.

The Garcia river at this time of the year is always ready for the angler. The trout are of nice size and rise to the fly readily. Carlos G. Young left last week for Point Arena, this being his eighteenth angling pilgrimage to that pleasing trout water.

The Pescadero lagoon was, up to a week ago, still in producing condition for the steelhead angler. What the rain last week may have brought about in changing the conditions is not yet known. Mr. Uri had a cut-in on the sport while it was on tap and took a week at it.

A run of steelhead made appearance in Russian river last week. The fish ranged in weight from one to four pounds. The recent rain should have induced a big run of fish into the river. At this time of the year, if the bar is open, the fish never fail to show up. At last reports the bar was closed.

The Arroyo Seco, in Monterey county, and reached via Soledad, a tributary of the Salinas river, bears a good reputation for late trout fishing. Early in the season the stream and pools near its mouth run very dry. At this time the fish go up stream and lay by in the deep holes. There is a trail running along the creek, some thirty miles long and in good walking condition. The proper trip for this region is to camp out and stay a week or ten days. Ed Allen, Charles Daiss, Dick Jewell and G. F. Doris recently fished a portion of the lower stream with moderate success.

That Eastern brook trout will get along in salt water is proven by two instances at least, in spite of a general contrary belief that this variety of trout always stays up stream in fresh water. Tom Irving, last Sunday, caught a one-pound Eastern brook trout near the "big fill" above Point Reyes, in Tomales bay where the water is "salt as salt can be." Eastern brook trout fry have been liberated in Olema creek frequently and no doubt this fish came down many miles through the creek and into the bay waters.

At the California Trout Farm, near Inverness, 25 six-inch Eastern brook trout, as an experiment, have been kept in salt water for several weeks. The fish seem to get along just as well as they do in fresh water.

Every Horse Should Be Clipped in Season

It is the wise thing to do for the clipped horse not only is easier to clean and looks better, but clipping does much to make him immune from coughs, colds and the usual ills that come to a horse from standing in a coat of long, wet hair after any hard exertion. The perspiration evaporates quickly from the clipped animal and leaves him dry. On cold days a blanket when he stands keeps him comfortable.

The Best Clipping Machine the World has ever Seen is the Stewart Ball Bearing Enclosed Gear Machine

It is the easiest turning, fastest clipping and most enduring of all machines. The materials in it are all of better quality, the workmanship is superior. All file hard cut steel gears, protected from dust and dirt and running constantly in oil. It couldn't be better for twice the money.

Pacific Breeders Futurity Stakes No. 11

To be given by the

Pacific Coast Trotting Horse Breeders Association

For Foals of Mares Covered in 1910 to Trot and Pace at Two and Three Years Old.

Entries to close Thursday, Dec. 1, '10

\$4250 for Trotting Foals. \$1750 for Pacing Foals.

\$800 to Nominators of Dams of Winners, \$450 to Owners of Stallions.

MONEY DIVIDED AS FOLLOWS:

\$3000 for Three-Year-Old Trotters.

200 for Nominator on whose Entry is Named the Dam of Winner of Three-Year-Old Trot.

1250 for Two-Year-Old Trotters.

200 for Nominator on whose Entry is Named the Dam of Winner of Two-Year-Old Trot.

100 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot when Mare was bred.

\$1000 for Three-Year-Old Pacers.

200 for Nominator on whose Entry is Named the Dam of Winner of Three-Year-Old Pace.

750 for Two-Year-Old Pacers.

200 for Nominator on whose Entry is Named the Dam of Winner of Two-Year-Old Pace.

100 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when Mare was bred.

SIX SPECIAL CASH PRIZES FOR STALLION OWNERS.

Given to Owners of Stallions standing highest in number of Mares nominated in this Stake that were bred to their respective horses, divided as follows:

1st Prize, \$100.

2nd Prize, \$50.

3rd Prize, \$35.

4th Prize, \$25.

5th Prize, \$20.

6th Prize, \$20.

The Above Prizes will be Paid on December 24, 1910.

ENTRANCE AND PAYMENTS—\$2 to nominate mare on December 1, 1910, when name, color, description of mare and stallion bred to must be given; \$5 May 1, 1911; \$5 October 1, 1911; \$10 on Yearlings, May 1, 1912; \$10 on Two-Year-Olds, January 2, 1913; \$10 on Three-Year-Olds, January 2, 1914.

STARTING PAYMENTS—\$25 to start in the Two-Year-Old Pace; \$35 to start in the Two-Year-Old Trot; \$35 to start in the Three-Year-Old Pace; \$50 to start in the Three-Year-Old Trot. All Starting Payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Colts that start at two years old are not barred from starting again in the three-year-old divisions.

For entry blanks and further particulars, address the Secretary.

CONDITIONS:

The races for Two-Year-Olds will be mile heats, 2-in-3, and for Three-Year-olds, 3-in-5. Distance for Two-Year-Olds, 150 yards; for Three-Year-Olds, 100 yards. If a mare proves barren or slips or has a dead foal or twins, or if either the mare or foal dies before May 1, 1912, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1910.

Entries must be accompanied by the entrance fee.

Nominators liable only for amounts paid in. Failure to make any payment forfeits all previous payments. This Association is liable for \$7,250, the amount of the guarantee, only. Hopples will be barred in trotting and pacing divisions.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

Money divided in each division of the Stake 50, 25, 15 and 10 per cent. There will be no more moneys in each division than there are starters.

Entries open to the world. Membership not required to enter; but no horse, wherever owned, will be allowed to start until the owner has become a member.

MANURE LOSSES.

The Pennsylvania Experiment Station some years ago conducted an experiment to determine the comparative value of manure from animals kept in a stall and thoroughly bedded, the manure being allowed to remain until spring, and animals kept in a stall, but tied and turned out to water, the manure being removed and kept under cover. The station draws the following conclusions:

"1. The tramped manure suffered little loss of fertilizing constituents, though less than two-fifths of the dry matter of food and litter was recovered in the manure.

"2. The covered shed manure lost one-third of its nitrogen, one-fifth of its potash, and one-seventh of its phosphoric acid. Only one-third of the dry matter of food and litter was recovered in the manure. The potash and phosphoric acid losses must be explained by seepage of liquid manure into the clay floor. The loss of nitrogen is, however, chiefly due to volatilization of carbonate of ammonia.

"3. The money value of the fertilizer constituents lost by the second as compared with the first method is equivalent to \$2.50 for each steer for six months.

"4. Therefore, manure, if prepared upon a tight floor and with such proportion of litter that it can be trampled into a compact mass, loses very little, if any, of its fertilizer constituents so long as the animals remain upon it. This method of preserving steer manure is therefore distinctly superior to that of the covered shed, though the latter method may not always exhibit as great loss as that observed in this experiment."

It is interesting to note that a money value of \$2.50 per steer is lost by allowing the manure to lie for six months in the open yard even when covered. It is interesting to note further, that when cattle are thoroughly bedded and the manure trampled into a compact mass in stalls with a cement floor, where the cattle are not tied, there is very little loss.

All that is necessary to get all the value secured under these Pennsylvania conditions is for the farmer to arrange to feed his cattle in wide and high sheds surrounding the hay barn, and keep them well enough bedded so that the liquid will be absorbed and the mass trampled down so tight as to exclude the air.

It can easily be done where a man is

feeding stock cattle or feeding steers even in an extensive way. It is particularly valuable, however, where a man is feeding stock cattle in an extensive way. If he feeds out of a cattle shed such as we speak of, he can feed 100 head as a before-breakfast job.

If he will see that his cattle are bedded, provided there is not enough waste in the hay to furnish bedding, and the sheds are high enough so as to provide for a foot or two of manure, provided he will put a cement floor in these sheds, he will save quite as much as can be saved by the Pennsylvania Experiment Station, or \$2.50 per head during the winter season. The important and essential point is to have your cattle so thoroughly bedded that the bedding will absorb the liquid. Even without a cement floor, under this method there would be comparatively little loss.—Henry Wallace.

MUTTON AND WOOL.

When you are picking out a ram to buy, part the wool and examine the skin on various parts of the body. If it is a cherry or pinkish color, he is in good condition, but if it is blue or muddy in appearance, do not buy him.

Every sheep in the flock ought to pass under the eye of the owner at least once a day, in order that he may discover his very first signs of disease. That is the time to separate the ailing one, and take

Warranted to give satisfaction.

GOMBAULT'S CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

The Most Perfect Colt Bit Made

EVERY COLT

Should wear the **ELLIS IMPROVED HUTTON PATENT CHECKING DEVICE** from the very beginning of its training, as it is the easiest, most comfortable and most humane bit on the market. With its use the colt will not fret, worry, pull, toss its head and get into the bad habits so often caused by the use of other bits and checking devices that inflict punishment or keep it under too much restraint, and at the same time you will have absolute control over it at all times.

The **ELLIS IMPROVED HUTTON PATENT CHECKING DEVICE** is in a class by itself. It is the only Checking Device or Bit sold on a positive Guarantee TO REFUND YOUR MONEY IN CASE IT FAILS TO DO ALL THAT WE CLAIM FOR IT. If the Ellis Improved Hutton Patent Checking Device is used on a colt from the very beginning of its training, we guarantee it will never get any of the following bad habits.

If, however, your colt or aged horse has acquired the following bad habits, the Ellis Improved Hutton Patent Checking Device will correct them, and if it fails we will refund your money.

GUARANTEED to stop your horse from Pulling, Tossing the Head, Tongue Lolling, Side Pulling, Bit Fighting, or any other bad habits caused by the use of other Bits or Checking Devices that inflict punishment, or keep a horse under too much restraint.

PRICE \$5 for complete Device, **United free to any part of the world when cash accompanies order.**

Patented Aug. 11, 1896. Patent No. 565,681

BEWARE of worthless infringements and Checking Devices claimed to be as good as the **ELLIS IMPROVED HUTTON PATENT CHECKING DEVICE**. Illustrations of some of these check bits and devices are made to look as near like the genuine as possible, but the article itself is very different, and will not give the same results.

ALL GENUINE are stamped **G. S. ELLIS & SON** on the supporting strap and back part of Check Rein. Any that are not so stamped are not genuine.

FREE—Our new Catalogue No. 45, with wholesale discount sheet, the largest, finest and most complete Horse Goods Catalogue ever published, is ready for distribution. It contains illustrations, descriptions, and guaranteed to be lowest prices on Harness, Horse Boots, Horse Clothing and Turf Goods of every description. Every horseman should have a copy. You can save many a dollar during the season by buying direct from us, as we are now selling direct to horsemen, allowing them from 30 to 50 per cent discount from retail prices. Write us today for a copy and we will take pleasure in sending it to you all charges paid.

measures to check the spread of the trouble.

In buying a ram for mutton lambs, his size alone is not the only thing to be considered. He must have all the other good qualities, and even if he is a little under size, it will do no harm.

Always keep the very best ewes in the flock for breeding. If you persist in selling the best, you will soon sell the flock right out from under you.

Some farmers seem to imagine that just because a sheep has a fleece to protect it, that shelter from colds and storms is not necessary, but they should know that sheep are more susceptible to cold and dampness than any other animal on the farm. A sheep that is damp to the skin is never a well sheep.

Keep a sharp lookout for foot-rot and at the very first signs of lameness, cut out all the effected parts of the hoof and force the entire flock to walk through a shallow trough containing disinfectant.

If you intend to raise sheep for wool, buy rams and ewes that are bred for wool, and do not make the mistake of mixing mutton types with wool types.

English farmers do not hesitate to pay as high as \$100 for a pure-bred sire ram.

Do you imagine they would do this if they could get just as good results from a scrub at one-tenth the price.

Professor Eckels of the dairy department of the Missouri station, gives this rule of feeding dairy cows: Feed one pound a day for each pound of butter fat produced per week, or one pound of grain per day for each three pounds of milk. Better get a pair of scales for the dairy.

The natural feed for hogs is not liquids but solids, therefore we cannot understand how some men believe they can fatten hogs on slops alone. Many of them keep on trying year after year, but never succeed.

Molasses in one form or another is greatly relished by cows, and horses as well, but it is unpleasant thing to feed and draws flies by the millions.

It saves a lot of work to dump the corn for cattle on the ground and let them dig it out of the dirt for their convenience, but it is a mighty expensive form of laziness.

An open shed with a well drained dirt floor provided with troughs should always be a part of every stock-feeders' equipment.

SPECIAL ADVERTISING.

Wanted, For Sale, and Miscellaneous advertising under this head will be set in nonpareil type (same type below) and will be published at the rate of 2 cents per word each insertion, or 6 cents per word by the month. Count each abbreviation and initial as a word.

WANTED—A good looking, sound, well-broken, saddle horse that single foots. Address full description and lowest cash price to "M," care of Breeder and Sportsman.

FOR SALE—Beautiful bay mare, foaled 1902, stands 16.1 hands, weight 1200 lbs. Sired by Geo. W. Archer 2:49.2, son of Allerton 2:09.4. Eligible to registration. Never was trained but can trot a 2:40 gait on the road. Afraid of nothing, kind and gentle, but full of life and style; exceptionally fine legs and feet, high headed, great knee and hock action. Would make an ideal family surrey animal, or if trained, would make a fast trotter; clear gaited, wears no boots of any kind; absolutely sound, not a puff on her. Will be sold very reasonable. Send for pedigree, etc. H. Hansen, 1420-16th Ave., Oakland, Cal.

FOR SALE AT A SACRIFICE

The Double Futurity Winner

RAY O' LIGHT, 3, 2:08 1/4

REG. NO. 46270

Sired by the King of Race Horses, "Searchlight" 2:03.4. First three dams great brood mares and 2:10 producers.
Ray o' Light (2) 2:13 1/2, champion 2-year-old 1907, winner 2-year-old Pacing Breeders Futurity.
2:08 1/4, champion 3-year-old 1908, winner 3-year-old Pacing Breeders Futurity.
Ray o' Light (4), public trial 2:06.

Brown stallion 5 years old, sound, stands 15.2 1/2 hands and weighs 1100 lbs.; sure foal getter, and I believe he will pace in 2:04 next year. I am compelled to dispose of all my horses owing to other business interests, so I have marked this great young horse down cheap.
For price, extended pedigree, etc., address
E. S. TRAIN, Santa Cruz, Cal.

H. L. MURPHY, Perkins, Sacramento Co., Cal. Berkshire swine and Shorthorn cattle.

H. B. WINTRINGHAM, Middletown, Lake Co., Cal. Breeder of Tamworth swine.

LEARN WIRELESS & R. R. TELEGRAPHY—Shortage of fully 10,000 operators on account of 8-hour law and extensive "wireless" developments. We operate under direct supervision of Telegraph Officials and positively place all students, when qualified. Write for catalog. National Telegraph Inst., Cincinnati, Philadelphia, Memphis, Davenport, Ia., Columbia, S. C., Portland, Ore.

FOR SALE—Hiawatha, dark bay mare, 6 years old, 15 1/2 hands high; will weigh about 1140 lbs. Sired by Baron Bretto 3:01.3, a son of Silver Bow; dam Silver Bells by Silver King 3:02.2; second dam Only Hope by Hark, son of Brigadier. This mare is in foal by a son of Clarence Wilkes. Hiawatha is sound in every way, perfectly gentle to drive and handle and is a good roadster. She has had no work since a 2-year-old but at that time could step a mile in 2:58. Price \$25.

Anona L., a full sister to Hiawatha, 5 years old, weight 1100 lbs., is a light bay mare very stylish and handsome. Is city broke and very gentle to drive, afraid of nothing. She has had a limited amount of work but has shown a mile in 2:20 1/4, a half in 1:08 1/2 and quarters in 33 seconds. Price \$500.

Red Devil, bay stallion, 5 years old, 15 1/2 hands high, kind and gentle, suitable for anyone to drive, fears nothing. Sired by Baron Bretto 3:01.3; dam Jeanette by Ottawa; 2nd dam by Snuff Box. A 2-year-old filly sired by this horse won the colt race at Marysville, July 4th. Price \$300. For further particulars address F. W. Kelley, Breeder and Sportsman, San Francisco.

9-10 s OF ALL IGNITION

TROUBLES ARE CAUSED BY

wrong magneto lubrication. Highest priced cylinder oils are not good enough for even the cheapest magneto. All cylinder oils are mineral oils. They gum, clog delicate action points—bearings. Clogged bearings start 9-10 of all ignition troubles. Ask any magneto or commutator.

USE 3 IN ONE
a clear oil compound of highest known quality. Best lubricant for delicate mechanisms, speedometers, commutators, magnetos. Won't heat up even at 5000 revolutions per minute! 8 oz. bottle, 50c. 3 oz., 25c. Trial size, 10c. Send for free sample to-day.

"SAVE-THE-HORSE"

Registered Trade Mark

SPAVIN CURE

Every letter we publish goes as far and means as much as the contract, for they tell of results that are true. They are not from friendly trainers and agents, but from actual users, and are honest in every word they say.

Marshalltown, Iowa, August 10, 1910.
Troy Chemical Co., Binghamton, N. Y.
Gentlemen—The number of my contract for "Save-the-Horse" is 63736. I used it on a mule. He got kicked on the hock, which caused the whole joint to enlarge. It was the size of a child's head. He would not put his foot on the ground. His hip was shrunken to skin and bone. One of the State veterinarians and another one of our townsmen said he would not be worth a sou. I gave a pig and 50 cents for him and used the bottle of "Save-the-Horse" as directed, and now he is sound. It is wonderful stuff.
W. S. HAYES.
R. F. D. No. 2.

Andover, Ohio, August 19, 1910.
Troy Chemical Co., Binghamton, N. Y.
Gentlemen—I am glad to write you that I have cured my horse of bone spavin, using about one-third of a bottle of "Save-the-Horse" spavin cure.
Yours,
CLINTON D. HATTON.

Lochiel, Ind., August 9, 1910.
Troy Chemical Co., Binghamton, N. Y.
Gentlemen—Enclosed please find

money order for \$5, for which please send by U. S. Express Co. one bottle of "Save-the-Horse" Spavin Cure. If you will refer to your books, I purchased a bottle of this medicine in February, 1910, and found it satisfactory in curing my horse of a bog spavin. On the strength of this a friend asked me to order him a bottle.
Yours truly,
G. S. POSEY.

Buda, Ill., August 8, 1910.
Troy Chemical Co., Binghamton, N. Y.
Gentlemen—A year ago this summer I purchased one bottle of "Save-the-Horse" Spavin Cure of Messrs. J. F. Boal & Son. I applied as directed on a bone spavin. As a result his leg is as well and sound as the other one. I remain yours respectfully,
J. H. EIGSTL.

Adrian, N. D., August 11, 1910.
Troy Chemical Co., Binghamton, N. Y.
Sir—My brother, R. E. Moore, has a young horse he has been using your treatment on and it has cured the spavin.
Yours sincerely,
M. L. MOORE.

MAKES A TENDON LIKE A ROD OF STEEL.

"Save-the-Horse" permanently cures, without scar, blemish or loss of hair, bone and bog spavin, ringbone (except low ringbone), thoroughpin, curb, splint, capped hock, windpuff, broken down, bowed or strained tendon, or any case of lameness.

\$5.00 per bottle, with a written guarantee as binding to protect you as the best legal talent could make it. Write for copy, booklet and fac-simile letters from bankers, business men, prominent breeders and trainers the world over on every kind of lameness.

ADVERTISE IN THE

Breeder and Sportsman

POULTRY NOTES.

Taking everything into consideration, the broiler business is very profitable for the farmer in winter. Of course he must have some sort of convenient buildings and intelligence enough to run an incubator.

The pullets will begin laying as soon as they are old enough, which is just as the natural breeding-season arrives in spring. They are not mature enough to make good breeding-stock, but will lay well all summer and fall when other fowls have largely stopped. It is impossible to fatten chickens when they are running about, as they develop size rather than weight.

The best fattening food is good ground oats, sometimes barley meal is added; they should be fed on this twice a day. After a few days a little rough fat should be added, say ¼ ounce for each bird; this amount can be gradually increased up to ½ ounce.

When chickens go off their feed, they should be fasted twenty-four hours, and in hot weather, thirty. This is necessary because the crop needs to be emptied of all foods before the bird is killed, otherwise the carcass will not keep.

Have you ever figured it out that it costs no more to produce 100 pounds of poultry than it does 100 pounds of beef, and that if the beef brings six cents on the hoof, chickens will bring 12 cents per pound alive.

Neither mites nor lice can live in oil of any kind. We have known chicken houses to be entirely rid of these pests by a coat of linseed-oil mixed with turpentine or some other quite drying substance.

There is one thing which vermin cannot stand, and that is fire. The nest-boxes and roosts held over a big blaze for a moment or two will be entirely rid of the pest.

When spraying the chicken house no use to make a seven-eighths job of it, because the vermin left in the last one-eighth will quickly multiply and spread all over the other seven.

It is believed that the "black-head" disease which has practically killed all the turkeys in New England, has spread to quail and other game-birds and the English sparrow is full of the germs and widely disseminates the disease.

When the nests are put in order for the winter, sprinkle ashes into the material and put a couple of moth-balls in as well. These tend to discourage mites and lice.

Alfalfa hay, if cut in the bloom, is fine for chickens to pick over during the winter months. They will get more at less cost from ground alfalfa.

If your chicken house faces north, board up the openings and transfer them to the south side and make them big enough to allow the sunshine to flood the floor.

The first egg laid by a pullet is the smallest and the size increase gradually until about a dozen have been laid, when they begin to decrease.

SMITH GUNS

HUNTER ONE-TRIGGER

WEATHER conditions aren't always at their best in the "blind" or in the skiff. That's when you don't want your gun to balk or double.

YOU CAN easily wear gloves if you shoot with a Hunter One-Trigger. And without "fiddling." It won't balk—because there is no friction to make it balk. And it won't double—because there is no second trigger to get tangled up in your glove.

The very newest Hammerless Smith Gun is the 20-Gauge Hunter One-Trigger. Weighs only 3 3/4 to 7 lbs. Just the finest gun that can be made at the low price.

Every Horse Should Be Clipped in Season

It is the wise thing to do for the clipped horse not only is easier to clean and looks better, but clipping does much to make him immune from coughs, colds and the usual ills that come to a horse from standing in a coat of long, wet hair after any hard exertion. The perspiration evaporates quickly from the clipped animal and leaves him dry. On cold days a blanket when he stands keeps him comfortable.

The Best Clipping Machine the World has ever Seen is the Stewart Ball Bearing Enclosed Gear Machine

It is the easiest turning, fastest clipping and most enduring of all machines. The materials in it are all of better quality, the workmanship is superior. All file hard cut steel gears, protected from dust and dirt and running constantly in oil. It couldn't be better for twice the money.

HARNESS RACING DATES.

El Paso	Nov. 1-5
Phoenix	Nov. 5-12

NEXT MONDAY EVENING Fred H. Chase & Co. will hold their second fall sale of 1910, with about fifty horses to sell. There are more good, mature trotting bred horses in this sale than in any fifty head that has been consigned to an auction in San Francisco for some time. Mr. Chase made an effort to get horses such as there is an actual demand for, and he has succeeded. When he induced Frank H. Burke, Henry Busing, A. Ottinger, Henry Scott, Henry Struve, H. Rohner, M. Henry, Judge Bridgeford and other well known breeders and owners to send horses to the sale, he knew he could tell the buyers the animals would be just as represented in the owners' statements and he knew the buyers would come to the sale. We expect to see a large crowd at 478 Valencia street next Monday evening and bidding prompt and lively. We do not expect to see phenomenal prices paid for anything, but the horses should bring what they are really worth and if so buyers and sellers will both be satisfied. The horses are all of good size, in good condition and many of them have a high rate of speed. There are some extra fine roadsters among them and a few choice saddle animals. The horse market is on the rise and several bargains will doubtless be picked up by keen buyers who know where to re-sell at an advance. The sale will begin promptly at 7:45 p. m.

A SALE of trotting stock was held at Readwick, Sydney, Australia, on Monday, August 8th, this year. The top of the sale was the Palo Alto bred stallion Dixie Alto, ten years old, sired by Mendocino, dam Marionette by Palo Alto, second dam the dam of Arion 2:07½. This horse was consigned by Mr. W. B. Veirs, of Melbourne, who purchased him at the Palo Alto Farm when he was a yearling. He brought 700 guineas at the August sale, something over \$3500. Dixie Alto has a trotting record of 2:13 4-5, made in Australia. A bay colt, three years old, by Dixie Alto brought \$500 at the same sale, and the California bred six-year-old mare Martha Arner, by Arner 2:17½, dam Martha Frasier, sold for \$750. In the entire sale 47 head were sold at an average of \$290 per head.

FROM ALL POINTS east and west come reports of renewed activity in the carriage horse market. An exchange published in Missouri says: "Dealers in horses of high enough class for park use and street driving in the large cities are anticipating the best fall trade they have experienced in several years. Such horses as the market demands are exceedingly scarce and are higher than was ever known before. The breeding districts have been thoroughly searched during the summer, and, while the supply secured is more limited than usual, some of the animals now in the market are of excellent class and prospective purchasers are eagerly looking them over and making their selections."

THE KENTUCKY STOCK FARM, the Lexington journal devoted to the light harness horse, has changed hands and will be under the editorial management of Andrew G. Leonard, whose writings over the nom de plume of "Hawley" are so popular with the readers of the journal. The new management has paid the futurity stakes, payment of which was withheld until the change was brought about, and the paper is now on a sound footing.

THE ARIZONA TERRITORIAL FAIR will open on Monday, November 7th, at Phoenix. It promises to have the greatest race meeting ever held in the territory and many records are expected to be lowered. California will be well represented, among the horses entered being Copa de Oro 2:01¼, Carlokin 2:08¼, Helen Stiles 2:09¼, Sir John S. 2:04½ and many others. The great two minute quartette—Minor Heir, Lady Maud C., Hedgewood Boy and Geo. Gano, will give several exhibitions and an attempt will be made to lower Minor Heir's record. Several California lovers of harness racing will go down to attend the fair and see the sport.

A MOST INTERESTING LETTER, describing his visit to Lexington during the meeting there this month, was received by the Breeder and Sportsman from Mr. F. J. Kilpatrick this week. Mr. Kilpatrick mailed us some beautiful photos of scenes at Patchen Wilkes Farm, the home of Peter the Great 2:07¼, but they failed to reach us in time to have the half tone cuts made, so we concluded to lay the whole article over until next week. We know Mr. Kilpatrick's numerous friends and admirers on this coast will enjoy every line of the letter and will anxiously await its publication.

SPANISH QUEEN 2:07, the mare by Onward Silver owned by Mr. Geo. A. Estahrook of Denver, won the fastest six heat race ever trotted, at Lexington during the last week of the meeting. The heats were in 2:07¼, 2:07¼, 2:07¼, 2:07¼ and 2:12½. The first heat was won by Major Strong, the second and third by General H. and Spanish Queen took the next three. In the third and fastest heat Spanish Queen was only beaten a neck. She was given a fine drive by Ramey Macey, the 19-year-old son of Gus Macey.

OAKWOOD PARK FARM SALE.

Last Saturday there was a dispersal sale of all the horses left on the once famous Oakwood Park Stock Farm, and several hundred people from the country side gathered to see them go under the hammer. There were only about thirty head all told, the greater portion being young colts and fillies, with a few old mares and some grade draft stock. No catalogues were issued but the pedigree of each animal as led out was given by Fred Booth, so long the efficient superintendent of this great breeding farm in its palmy days. There were few trotting horsemen present, but the bidding did not lag on any colt or filly of fair breeding and it generally went to the bid of some young man who resided in the vicinity and knew that good blood is always worth something. The highest price paid for any of the horses offered was \$200, which was the high bid on a toppy bay two-year-old stallion by Chas. Derby, dam by McKinney, second dam the dam of W. Wood 2:07 by Anteo. This colt was led behind a saddle horse and showed a fine gait and had a lot of style. He was of fair size and will grow into a handsome horse. He was purchased by Mr. McCormick of Rio Vista, one of the firm of McCormick Bros., farmers and breeders of draft horses and other pure bred livestock. These gentlemen are as good judges of a horse as can be found in California and when they saw this colt, looked him over, and found that he was eligible to registration, they were prompt bidders and would have gone higher if necessary.

The 12-year-old mare Kittle Steinway, a full sister to Klatawah 2:05½ and Chas. Derby 2:20, with a foal at foot by Stillwell and in foal to Jim Logan 2:05½ went for \$175. Bystanders wondered at the breeding theories held by the person that would breed this mare to two different sons of her full brother, but the colts resulting from this strange line of inbreeding may be crackerjacks.

The yearling colts and fillies, of which there were several were promptly bid on when offered and they brought from \$45 to \$125. Mr. Booth has promised to send us a full report of the prices obtained for the trotting bred horses and the names of the buyers, and we hope to receive it in time to publish next week.

After the sale was over the crowd repaired to the beautifully situated mile track on the farm and enjoyed several harness races that were contested by those from San Francisco and way stations did not begin until the last train to the city was due to leave, those from San Francisco and way stations, did not see this sport, which was highly interesting and brought out some very fair trotters and pacers. The races were under the management of Will Meese, who acted as starter and got the horse away well, but we are sorry to state that the report of the races which he sent the Breeder and Sportsman failed to reach this office in time for this week issue.

Don't overlook the four-year-old chestnut gelding Honey Boy by Demonio, dam by Nutwood Wilkes, that H. Busing has consigned to the Chase sale to be held next Monday evening. Honey Boy has a two-year-old trial of 2:25. He is a grand trotter, is not afraid of cars or automobiles, and is kind and gentle. He can show better than a 2:30 gait without training. He will make a splendid road horse.

THE ALAMEDA TRACK.

The newly organized Alameda County Driving Association held an opening day last Sunday at the newly graded old mile track on the marsh at the foot of Grand street, Alameda. About three-quarters of a mile was fit to drive over, the second turn being yet too wet and mirey to trust a horse on, consequently had not been smoothed or harrowed. There was enough of the new track in shape however to show that it will eventually be one of the fastest and safest mile tracks in the country. It must be remembered that the U. S. Government dredgers, which were at work last spring and summer deepening the channel of the estuary which lies alongside the land on which this track is located, covered the track about two feet deep with the silt from the bottom of the channel. This has now dried out so that it can be worked except on the second turn, and by this writing the teams have probably been harrowing and rolling that portion into condition. All horsemen who ever drove over the old track which was of the same dredgings, but probably not over a foot or two deep on top of the old marsh, found it ideal for working horses over. It gave a good firm footing that was always moist an inch below the surface and horses were not made muscle sore on it, as there was a spring and a "give" to the track. The increased depth of the dredgings have made the footing better than ever, and it can be made a track to break world's records on.

The Alameda Driving Club is working at it in a business like manner and expects to have it in first class shape by March or April of next year.

Just to bring out the lovers of good horses the club arranged for an opening matinee last Sunday, which was entirely informal, no regular program having been prepared, but the horses present were sent half mile heats and about three hundred gentlemen and ladies were present to see the sport.

Messrs. J. P. Patery, A. Schwartz and E. O. Chase acted as judges and Jack Groom gave the horses the word.

The first event was won by R. Asher's Clipper Jr. in straight heats. T. D. Sexton's Alfred E. won the second race, G. A. Nissen's Duke of Monterey won the third event and J. O'Keefe's Leona took the fourth. Two-thirds of the half mile was very heavy and the pacers found it rather hard going, but the heats were won in from 1:20 to 1:30 and some of the finishes were quite exciting, as the footing was so good the last sixteenth that they could be driven at speed.

It is the intention of the club to erect seats for the accommodation of spectators and while not much will be accomplished during the winter months outside of working the track into shape, by the opening of spring there will be many improvements made and the Alameda County Driving Club will have a place where frequent matinee racing will be held and the horse loving public will delight to go.

FAST MILES BY MINOR HEIR.

Fast time is one of the most essential elements of a trotting meeting, as it is a guarantee of excellence that the most disinterested spectator appreciates and jots down in his memory as a pleasant reminiscence.

The races may be closely contested and split up in the most bewildering fashion, still they fail to arouse the electrical bursts of applause that follows an unprecedented or even a sensational performance.

One of the star performers of the harness horse turf in the last three racing seasons, and also in the limelight to a considerable extent this season, is the little one-eyed pacing stallion, Minor Heir 1:58½, by Heir-at-Law 2:05¼.

Minor Heir showed what a remarkable horse he was during the Indiana State Fair by establishing two world's records, one a race record of 1:59 and the other an exhibition mile in 1:58½, while on Wednesday, between these two champion performances, he paced a mile in 2:00¼ in a race, the latter quarter being a quarter of a second faster than the previous record for pacers, held so long by Star Pointer.

Minor Heir's Miles in 2:05 or Better, Racing Season of 1908.

Terre Haute, Ind., July 17 (first and second heats)	2:01½, 2:01
Detroit, Mich., July 28 (second, third and fourth heats)	2:04¼, 2:05, 2:04½
Kalamazoo, Mich., August 3 (first and third heats)	2:03, 2:02¾
Dubuque, Iowa, August 26 (against time)	2:02½
Galesburg, Ill., August 14 (against time)	2:00¼
Hamlin, Minn., August 31 (against time)	2:01½
Hamlin, Minn., September 4 (against time)	2:00¼
Milwaukee, Wis., September 10 (against time)	1:59½
Peoria, Ill., September 17 (against time)	2:00½
Syracuse, N. Y., September 14 (against time)	2:01½
Lexington, Ky., October 6 (first and second heats)	2:00½, 2:02

Racing Season of 1909.

Milwaukee, Wis., September 16 (against time)	2:01¼
Shreveport, La., November 2 (against time)	2:02¼
Phoenix, Ariz., November 9 (against time)	2:01¼
Phoenix, Ariz., November 13 (against time)	1:59¼

Racing Season of 1910.

Galesburg, Ill., August 25 (first heat)	2:00
Indianapolis, Ind., September 12 (first heat)	1:59
Indianapolis, Ind., September 14 (first heat)	2:00¼
Indianapolis, Ind., September 16 (against time)	1:58½
Nashville, Tenn., September 21 (first heat)	2:01¾
Nashville, Tenn., September 23 (first heat)	2:02
Louisville, Ky., September 17 (exhibition half mile)	1:01¾

RECORDS MADE AT SAN JOSE.

Last Saturday, until noon, San Jose and vicinity was enveloped in a cold dreary fog, but before the races were called the welcome sunshine had dispelled the gloom and the afternoon was warm and pleasant and the track like a billiard table. Only a small attendance was on hand to witness the races and record making, but all present enjoyed the sport, for while it was to all intents and purposes a record meeting every heat of the purse races was a horse race and the fellows who wanted a record, and all did, had to drive for it. Kiss Kee Dee and Menlo Kinney that were both entered in the purse events, were also on the program to start against time. The latter horse succeeded in winning a heat and did not start against time, but Kiss Kee Dee, who could not get a record in the race, started against the watch and just did win with nothing to spare. He was timed the first heat of the race, won by Bon Volante, the two-year-old son of Bon Voyage, however, in 2:27. This gelding is a four-year-old son of Scott McKinney, and had only been ten days off the road. To come out and trot the fourth heat in 2:30 after trotting three others right around that mark, shows him to be a good game colt for a green untrained one.

Bon Volante, the winner of this race, surprised us all a little by stepping a mile in 2:25½ in the first heat and then winning the race by taking the third heat in 2:30, as he had had only three workouts since last spring and has been running in the paddock nearly all summer. Early last spring he showed well and was capable of a mile in 2:30 in March but had the misfortune to get cast in his stall and receive an injury that made it necessary to let up on his training. He is all right now and it looks as if it would not take him long to trot in 2:20. His full brother, Le Voyage (3) 2:25¼, owned by Mr. A. L. Scott, took his record last St. Patrick's day over this track. The dam of these colts is Missie Medium, by Rampart, out of Belle Medium 2:20, dam of Stam B. 2:11¼, etc., by Happy Medium, and their performances make her a great brood mare.

The blood of Belle Medium was prominent in this race as the mare that won the second heat in 2:30, Bonita B., is by Stam B. 2:11¼, son of Belle Medium, the granddam of Bon Volante. After the finish of the race Bonita B. started to beat her record of 2:30 made in the race and trotted in 2:25½, so a grand son and grand daughter of Belle Medium, each took a record of 2:25½.

The blood of great brood mares never loses its potency, but flows on from generation to generation, through sons and daughters, grandsons and granddaughters, on and on in every direction reproducing the qualities first transmitted by the original great mother.

Ishmael, the winner of the 2:25 pace is a horse with a history and an unusual pedigree, but he carries the blood of great dams or he would not have paced a mile in 2:21. His dam Carrie B. 2:18, by Alexander Button, is the dam of Ray o' Light (3) 2:08¼, a great racing three-year-old, and Lovelock (3) 2:19¼, a filly that has two-minute speed and capable of a mile many seconds faster than her record; second dam Carrie Malone, a great broodmare by Steinway, and full sister to Chas. Derby 2:20 (sire of the champion Jim Logan (3) 2:05½) and Klatawah (3) 2:05½, who was the first three-year-old to pace that fast; third dam Katy G., Electioneer's greatest producing daughter, dam of Klatawah 2:05½ and seven with standard records, fourth dam by Niagara, son of Mambrino Chief II, fifth to eighteenth dams thoroughbred; but his sire was a high grade Clydesdale colt, son of the full-blooded Clydesdale stallion Buffalo Bill.

In 1904 Ray Mead came to Pleasanton to select a sire to breed his mare Carrie B. to. After looking over all the horses there he decided to breed her to the great Searchlight 2:03¼. He told me that he would send his mare over in a few days from San Francisco where he was then living, to be bred and leave her with us till she was safely in foal, but that she was due to foal in two or three weeks and when she did he wanted me to chloroform the foal as he did not want to raise it. I asked him why he did not want to raise it and he said the mare was in foal to a cold blooded draft colt and he did not want to raise the thing to disgrace Carrie B. I said that I would advise him to let the foal live as the mare would be more liable to get in foal again and that even if the youngster was by a draft horse it might be well worth raising and that he need not let it become known that Carrie B. had such an offspring. He finally consented to spare its life and when Ishmael 2:21 was three months old, I weaned him, broke him to halter, put him in a crate and shipped him to Hollister, where he lived in obscurity on L. M. Ladd's ranch until last spring, when I persuaded Mr. Mead to have him shipped up here and trained with the view of giving him a record. I told him that it would be more to Carrie B.'s credit to produce a standard performer by a Clydesdale sire than to produce a 2:10 performer by any other horse she had ever been bred to; and this "catch colt" draft horse son of hers has now a record of 2:21, and has worked a mile better than 2:20. To me Mr. Ishmael owes his life, also the social standing he has attained by becoming a race horse, instead of a plow horse. Carrie B. is sure to become one of the very great brood mares in time and justify her broodmare inheritance. She is now the dam of Ray o' Light (3) 2:08¼, Lovelock (3) 2:19¼ and Ishmael 2:21, all her produce yet trained. She has a fine yearling filly by Bon Voyage that is sure to trot fast and a weanling filly by Kinney Lou, that also trots, and is again in foal to Mr. Doble's horse.

Since Mr. Mead decided to give the filly Lovelock a record he has talked with me a number of times about how fast a record it was advisable to give her. I advised him to give her as fast a mark as possible and leave her eligible to the 2:20 class. Of course that would be 2:19¼. When he drove on the track I asked him how fast he was going to mark her and he replied: Nineteen and a quarter, and hy every watch in the stand the mile was exactly 2:19¼. Pretty fair rating for an amateur. Lots of professionals could not have done as well by a second or two, and more than likely Ray Mead could not do it again.

Below are the summaries of last Saturday's races: 2:30 trot; purse \$50:

Bon Volante (2) blk. c., Bon Voyage-Missie Medium (Hayes)	1	3	1
Bonita B., b. m., Stam B.-Salinas Maid (Montgomery)	2	1	2
Kiss Kee Dee, b. g., Scott McKinney by Antinous (Scott)	3	2	3

Time—2:25½, 2:30, 2:30.

2:20 pace; purse \$50:

Ishmael, b. g., Son of Buffalo Bill-Carrie B. 2:18 (Montgomery)	2	1	1
Belle Seymour, blk. m., Seymour Wilkes-by Almont Patchen (Villar)	3	1	2
Menlo Kinney, b. h., Kinney Lou (Our Belle (Hayes)	1	3	2

Time—2:24, 2:25, 2:21, 2:24½.

To beat 2:25¼, pacing:

Lovelock (3) br. f. Zolock-Carrie B. 2:18 (Mead) . Won	Time—2:19¼.
--	-------------

To heat 2:30¼:

John Christiansen, r. g., Kinney Lou-Pearl Dictaus (Theuerkauf)	Won
Time—2:23¼.	
Kiss Kee Dee, b. g., Scott McKinney by Antinous (Scott)	Won
Time—2:30.	

To beat 2:30:

Bonita B., b. m., Stam B.-Salinis Maid (Montgomery)	Won
Time—2:25½.	

Henry Helman has moved back to San Jose, his home for the last twenty years, and has his horses quartered at the track. Since the closing of the old Agricultural Park no one has been more anxious that another track be built at San Jose than Mr. Helman, as his home is here, it is here he and his family desire to live. The "Senator" has expressed himself very favorably about the track and says that if it is as good a winter track as we all tell him it is, that it must be all right. I suppose Alconda Jay will make the season of 1911 here. Judging by the looks of the youngsters by Mr. Helman's young sire, the son of the great Jay Bird will prove a success in the stud.

A few weeks ago there appeared the statement in this paper that Prince Ansel and Palo King were the only California sires that had put two two-year-olds in the list this year. This is a mistake. One Better (2) 2:24¼ pacing, and The Demon (2) 2:29¼ trotting, both took their records over this track, the former on the fourth of last July and the latter during the Breeders' meeting here last August. These colts are by Mr. Barstow's good young sire Nearest McKinney 2:14½ who also made his record at the Breeders' meeting and has since trialed a mile in 2:11. Mr. Barstow is now driving some yearlings by this son of McKinney on the road that can run away on a trot. Every youngster by Nearest McKinney that has been handled at all shows speed. Jack Villar has a two-year-old colt by Nearest McKinney, dam Maud Sears 2:23, that with less than a month's work paced a quarter in 36 seconds.

Joe Culcetto's horses returned today from their campaign up north, where they raced successfully in the mud and on all kinds of tracks.

I see Ray o' Light (3) 2:08¼ is advertised for sale. This young horse was a great racing colt as a two and three-year-old, being undefeated in those years by colts of his age and when as a three-year-old he met aged and seasoned campaigners was never worse than second. One day he made Josephine go three times around in 2:07½ and 2:08 to beat him and the next day he won a race for colts of his age in three straight heats, all better than 2:10 and in one he took his record of 2:08¼. No other three-year-old ever accomplished such a feat. Ray o' Light was asked for too much as a three-year-old and should not have gone to the races as a four-year-old. As is usually the case with colts that race as three-year-olds Ray o' Light did not regain the racing form as a four-year-old that he had displayed the previous year and consequently his reputation suffered. But the fact remains, although it may be forgotten by some Ray o' Light was a great racing three-year-old and if he falls into the right hands in another year or two he will "come back" and win some more races and get a new record. And he should with his great speed inheritance become a great sire of speed. I shall always take an interest in this son of the great Searchlight 2:03¼ for more reasons than one; but one of them is that I gave him his name and I hope to see Ray o' Light bring it again into the limelight.

There is an effort being made by the Chamber of Commerce of San Jose to bring the Savage combination of the world's fastest harness horses to San Jose after the Phoenix meeting, to give exhibitions of speed at the San Jose Driving Park. Exhibitions by these famous 2:00 pacing horses ought to create some enthusiasm among people that have apparently lost interest in harness horse racing. Here's hoping we see Minor Heir 1:58½ and the others.

C. C. C.

GUY VERNON BEATS 2:06.

The stallion Guy Vernon, owned by Dr. I. B. Thompson, of Oakdale, California, and trained and driven by W. H. Parker of Stockton, paced another remarkable mile over the Stockton track last Sunday. As in his former trials he was driven to a cart, but was not accompanied by a pace maker, and the track was dry and cuppy in places. In spite of these handicaps he covered the mile in 2:05½ with the quarters as follows: 31½, 31 32, 31. He finished with apparent ease and with little urging. His trainer, Mr. Parker, thinks there is no doubt but Guy Vernon will be able to pace a mile in two minutes next year if he meets with no accident. Dr. Thompson has found on applying for the registration of this horse that the name Guy Vernon has already been claimed and that he will have to select another. He is eligible to registration under rule 1, as his sire and dam are both registered. In addition to this performance of Guy Vernon's last Sunday, five races were held and a large crowd was present to see the sport. Results:

2:40 class, mixed:

James McKinney, trotter (J. Foley)	2	3	1	1
Laura D, trotter (James Carroll)	2	4	4	ds
Black Beauty, pacer (Friedberger)	4	1	2	2
Loyd A, pacer (Jerry Acker)	4	2	3	3

Time—2:37¼, 2:38 2-5, 2:40, 2:42.

2:20 class, mixed:

Linden Girl, trotter (C. F. Nance)	2	1	1
Ben Walker, pacer (Dan Lienginger)	1	2	2

Time—2:23 3-5, 2:24 2-5, 2:23.

2:20 trot:

McDougald (E. Kemp)	1	1
Auget Baron (P. J. Chalmers)	2	2

Time—2:28, 2:31 2-5.

Free for all pace:

T D W (E. Kemp)	1	1
Blanche A (C. F. Bunch)	2	2

Time—2:23, 2:15.

2-year-old pace:

Monochrome Jr (C. F. Nance)	1
Florana (H. K. Meyers)	2
Grace Chalmers	3

Judges—J. N. Jones (starter), T. H. Rae, W. J. Miller, M. C. Madden.

ANNUAL MEETING OF THE A. A. T. H. B.

Lexington, Ky., Oct. 16, 1910.

The annual meeting of the American Association of Trotting Horse Breeders was held in this city today, and was largely attended by officers, directors and stockholders, who have been attending the meeting of the Kentucky Breeders' Association.

After electing officers for the ensuing year Secretary H. K. Devereaux of Cleveland read his annual report which showed that the affairs of the organization, whose whole purpose is the improvement of breeding and advancement of racing sport, are in splendid shape.

A damper was thrown on the meeting when Mr. Devereaux in a long speech argued why he should give up the secretaryship, an office which he has filled so successfully for four years, and to whose efforts are mainly due what success the organization has had so far.

In spite of all arguments from members present Mr. Devereaux's resignation was accepted, but with the understanding that the secretary's office will still remain where it is, at Cleveland, but the work will be done by a paid secretary under the personal charge of the former secretary.

No selection was made for an active secretary, but it is believed that the hard work of managing the affairs of the association will eventually be turned over to George J. Deitrich, who for the past four years has been Mr. Devereaux's right hand man and is fully posted upon the general conduct of the association's work.

Officials and directors were fully pleased with the success of the futurities, the initial events of which were raced at Empire City track and here, the total value of both being in the neighborhood of \$20,000 to winners of both divisions, the Matron and the Championship Stallion Stakes.

What the total value of the Matron Stake was has not been announced officially, so far as is known, but the total cash value of the Stallion Stake for both trotting and pacing division was \$12,155, of which \$8804 was for trotters, \$2851 for pacers and \$500 for the two trophies donated to the nominators of the sires of winners in each division.

The work of giving futurities on the same plan as in the past will be continued as long as the organization is in existence, while other matters having vital importance in the purposes of the association will be taken in turn for the benefit of trotting horse breeders of the country.

The transportation committee reported that steps have already been taken looking toward reasonable rates from all leading railroads of the country for the transportation of horses at all times, but particularly during the racing season.

Through the efforts of this committee many concessions have already been gained from a number of leading transportation lines and there is every reason to believe that eventually the rates now in existence will be considered, much to the benefit of horse owners and racing stakes.

The association has fully indorsed and recommended the acceptance of foreign trotting records made on Continental tracks by American-bred trotters or their direct progeny, same as in this country, and the American Trotting Register Association, which has full charge of this matter, has been requested to consider the question, and comply with the request if no plausible objections now exist.

EASTERN HORSES AND HORSEMEN.

Three two-year-olds by McKinney 2:11½ took standard trotting records at Lexington.

Gus Macey will keep the George H. Estabrook horses at Lexington until about December 1, when he will ship them to Denver, Colo., for the winter.

The fastest new standard performers of the year are Colorado E. and Joan, one a three, the other a four-year-old, and both with records of 2:04¾.

Independence Boy 2:03½ was educated on a half mile track and won all six of his starts this year on mile tracks.

Kentucky Todd (3) 2:08¾ has made a wonderful showing as a sire. The oldest of his get are yearlings, yet three of them took standard records this year.

San Francisco 2:07¾ is said to be one of the hand-somest stallions standing in Kentucky. Over 80 mares were bred to him this year.

Mila Dillon, a two-year-old daughter of Sidney Dillon, trotted a mile in 2:15¾ over the Lexington track two weeks ago. This filly is considered a great prospect for next year.

Geers thinks The Harvester will trot in two minutes next year and that he will also reduce the three mile record of 6:55½ now held by Nightingale, daughter of Mambrino King. Nightingale's record was made in 1893.

Paronella, by Parkville, son of Electioneer, is the first mare to produce three 2:10 trotters. Parkville's dam was Aurora by John Nelson.

The championship yearling trotter is Miss Stokes 2:19¾, the champion two-year-old Native Belle 2:07¾, the champion three-year-old Colorado E. 2:04¾ and the champion four-year-old Joan 2:04¾.

Michael McDewitt picked out Grace and Joan for his employer, Mr. Shaw, paying \$1000 for the former and \$1200 for the latter. He won the Kentucky Futurity with Grace, giving her a mark of 2:08 and the Transylvania with Joan, making her the four-year-old champion with a record of 2:04¾.

Colorado E. 2:04¾ as a three-year-old, was developed early. He trotted quarters in 32½ seconds as a yearling and as a two-year-old he was raced and worked miles better than 2:12. He was third in a field of six in the heat wherein Native Belle took her two-year-old record of 2:07¾. No three-year-old ever trotted as many miles under 2:10 as he.

Happily it has turned out that the sudden illness of Mike Bowerman, the Lexington trainer, was not due to paralysis but to an attack of vertigo. He is up and about again and attending to business as usual.

Senator Bailey while in Lexington, attending "the trots," purchased the broodmare Lady Brussels by Wilton, paying in the neighborhood of \$2000 for her. She is the dam of four in the list including the yearling McKinney Mac 2:27¾. All except this colt took their records as two-year-olds.

Many high class horses are being consigned to the Old Glory Sale for November and the Fasig-Tipton Company predict the sale will be a great success.

Charles Dean, the Palatine, Illinois, trainer, purchased for a client while in Lexington two weeks ago, the mare Ruby Lucy for \$4000. Ruby Lucy has a pacing record of 2:07½ but has been converted to the trot and recently stepped a mile at that gait in 2:08. She is by Gambrel, a son of Gambetta Wilkes, and is out of a mare by Blue Vein a son of Blue Bull. She will be staked through the Grand Circuit next year, in the M. & M. and other big stakes.

Ed Custer, three-year-old record 2:12¼, is now seven years old and is the sire of three two-year-olds with standard records, all made this season. Ed Custer is a chestnut horse by Baronmore, dam Marble 2:14 by King Clay, grandam Medio by Copper Medium.

The four-year-old gelding Gold Dollar 2:09½, by Pulsus 2:09½, winner of so many races on the Tennessee Circuit this season, started at Lexington in the 2:13 trot on Tuesday of last week and was distanced in the first heat, won by Major Wellington in 2:08¾. His trainer, Ben Whitehead, then brought him out and drove him a mile in 2:06, a second and a quarter faster than the record for trotting geldings of the age, 2:07¾, held by Uhlán; on the strength of which performance he was purchased by George H. Estabrook, of Denver.

All horsemen who were at Lexington say that the speed shown by Joan in the stretch during the finish of the first heat was the most wonderful ever seen on a trotting track. The mare trotted the heat in 2:05¾ but her flight from the seven-eighths pole (where she was third), to the wire was at a rate of speed much faster than two minutes. Ed Geers who was driving Dudie Archdale said he believed Joan was trotting a 1:50 gait when she passed him. This is probably a little overdrawn but the speed shown made every horseman marvel.

Capt. David A. Shaw's racing string has cleaned up the snug sum of \$36,597.87 this season, and three horses did the business. Joan 2:04¾, won \$2512.50 in the Transylvania; \$1512.50 in the Walnut Hall and \$12,216 on the Grand Circuit. Grace 2:08, won \$10,000 in the Kentucky Futurity, \$4401.87 in the Stallion Stake, and \$2125 on the Grand Circuit. Peter Dorsey won \$1000 at Lexington, and \$2930 on the Grand Circuit.

A remarkably close finish of a very fast heat was seen at Columbus, September 30, in the second mile of the 2:05 pace. The bay Cleveland mare Evelyn W. finished on the outside of the track and won by a nose from the other four pacers which were lined up closely toward the pole. The time of this heat was 2:02¾. The same mare took the last beat in 2:06¼ and thereby won the race, although the first mile was taken by Earl Jr. in 2:03¼.

Empire City Farm made several sales to enthusiastic Buffalo horsemen last week. Geo. E. Lattimer bought the two-year-old filly Rosebud McKinney, by McKinney 2:11¼, dam Rose Direct 2:29¼, by Direct 2:05½ second dam Rosebud, by Gen. Washington, third dam the famous Goldsmith Maid 2:14, a most promising filly and in all the big futurities. Mr. Cabana bought the two-year-old chestnut colt Winsome Worthy, by Axworthy 2:15½, dam Coaxer, by Hummer, second dam Corona by Electrician 2:24½, third dam Cora Belmont 2:24½, by Belmont, and fourth dam the famous Miss Russell that produced Maud S. 2:08¾. Mr. Cabana also bought the yearling colt Trusty McKinney, by McKinney 2:11¼, dam Keeper, by Keeps (son of Prince of India 2:13¼), second dam Nominette by Nominee 2:17¼, fourth dam Net Medium, a great producing daughter of Happy Medium. Mr. Cabana's two purchases are also in all the big futurities, and show remarkable promise. These purchases make four of the Empire City Farm youngsters lately bought by Mr. Lattimer and five by Mr. Cabana, and indicate the rising tide of the interest which is being taken in trotters on the part of gentlemen sportsmen.

PROGRESS IN HORSE BREEDING.

No great progress can be made in breeding animals of any species so long as the breeding stock consists of unsound individuals or is of unknown breeding. The country is overrun with grade and scrub stock of all kinds, and in the breeding of horses there has been much fraud concerning age, quality, and breeding of sires allowed to stand for public service. A definite plan for breeding operations has been lacking. Some farmers have attempted to improve their stock by grading up with pure-bred sires, but oftentimes unsuitable types have been used and all sorts of crosses have been made. The result has been unsatisfactory.

The advantages of pure-bred stock from a business point of view are discussed by Dr. A. S. Alexander of the Wisconsin Station, as follows:

As a business proposition, it pays best to breed mares to pure-bred stallions, although the service fees of such horses are higher than those of the grade or mongrel and scrub. The fees of the latter are \$5 to \$10 less at the time of service, but when the colt reaches market age the saving is lost. There is at that time a difference of at least \$100 in value of the colt from the pure-bred sire, so that the higher service fee has proved a profitable investment. Then, too, there is a ready, appreciative outside market for the good grade colt, while the scrub goes to the local buyer at low figures and there is little, if any, demand for such horses. * * *

While some farmers are beginning to appreciate the importance of using sound, pure-bred stallions, the equal importance of using sound mares is not yet generally understood. When a mare by reason of unsoundness no longer is fit for anything else she often is set aside for breeding purposes, and so long as this absurd and ruinous policy persists the penalty will be paid in the prevalence of unsound horses on our farms. For corroboration of what has been asserted here, one has only to examine the brood mares on a number of farms in different districts of the State. The unsound mares will be found numerous and many of their adult offspring are similarly affected. * * *

The success achieved in the breeding of Clydesdale horses in Canada serves as a good example of what can be accomplished by persistency and expert selection. The Scottish element of the Dominion's population has been partial to the Clydesdale breed and conversant with its good qualities and utility, hence imported Clydesdale stallions of the best character have been largely employed in the breeding operations of that country since the year 1842. Practically speaking, no alien crosses have been made, and the average farmer has been capable of selecting suitable mares and of adequately developing their progeny. The result is that Canada has but one type of draft horses, and it is a good one, showing, to a high degree of excellence, all of the breed characteristics of the pure bred Clydesdale. * * * The same thing is true, to an even greater degree, in Scotland, where the Clydesdale breed predominates and has been developed to a high state of purity, breed, character and utility. On the contrary, if we examine the average team horses at Milwaukee or Chicago, we shall see every possible type and character represented and plain evidences of mixed breeding, careless selection, and incomplete nutrition.

By gradual processes the farming communities of

European countries have replaced their scrub stallions with pure-bred sires. They have learned by experience that the greatest profits are to be gained by the production of pure-bred and high-grade stock, and in many breeding centers they will not keep or patronize a nonregistered sire. The various governments and national and local breeding associations have aided greatly in the work of eliminating unsound, unsuitable breeding stock. In breeding centers registered mares are to be found at work in the fields that are mated with inspected, pure-bred stallions. In Great Britain practically all farmers recognize the importance of using pure-bred sires, and only such are used in various districts whence come the many well known British breeds of horses. In Scotland only one non-registered stallion has been reported as being used for public service in that country since 1900.

The French government for over 100 years has maintained stables of carefully selected, sound, pure-bred stallions for breeding purposes.

The best stallions in France are annually chosen for use in the studs, and since 1885, when a government decree to that effect was promulgated, all stallions not coming within special classes have been excluded from public service. The classes referred to are selected by government veterinarians who inspect all horses and grade them as follows: "Subsidized" class, comprising stallions of a certain standard and for each of which a cash bonus of from \$60 to \$100 per year is paid to the owner to keep the animal in the country for use by owners of mares; "authorized" class, comprising horses of slightly lower quality that are authorized, after passing inspection, by a card certifying them as recommended by the government for use as sires; "approved" class, comprising a few horses permitted to stand for service, but not granted a bonus or recommendation card.

In Belgium the government has, since 1850, maintained a great horse-breeding establishment and promotes the breeding of pure-bred Belgian draft horses (Le Cheval de trait Belge) by an annual appropriation of \$70,000 to encourage the horse breeding of the country. Liberal prizes are awarded to mares and foals at shows throughout the country; stallions are officially examined by government experts; and both approved stallions and mares are granted "maintenance" bounties to retail them in Belgium. Under such auspices horse breeding is making wonderful progress and only pure-bred stallions are in use for service.

In Germany government supervision of horse breeding has obtained for centuries and today is similar to that in vogue in Belgium, it having been required by law "that no permits should be issued authorizing the use of stallions, unless they passed a satisfactory government inspection." At the present time both the government and agricultural societies promote intelligent horse breeding. Prizes are awarded for animals of special merit, and such animals must remain in the country for a specified term. First prizes are awarded only to mature horses and mares that have shown merit as breeders. Stallion shows have long been held at Aurich in East Friesland, where the horses are brought annually for inspection and approval. Prizes for brood mares are also awarded by the government. Somewhat similar supervision of horsebreeding matters is undertaken by the government of Austria and large sums of money are annually devoted to the encouragement of the breeding industry.

In Austria there are two state studs and several stallion depots maintained by the government, and about \$1,000,000 is annually expended by the government in the encouragement of the horse-breeding industry.

The points required by the standard breeding associations oftentimes have nothing to do with the utility of the animal. In order to break away from some of these artificial requirements and in order to preserve and further improve some of the better native types of horses, the Department of Agriculture has undertaken co-operative experiments with some of the state stations, which promise to be of value to the American stockman. For several years experiments have been under way at the Colorado Station in breeding American carriage horses. At the Iowa Station an experiment is in progress to develop an American type of draft horse. In Vermont a farm of 400 acres is devoted exclusively to co-operative work in breeding horses with Morgan blood, preserving the type and increasing the size. In this co-operative work of the Department the individuality of the horse is the point given greatest weight in his selection, and strict selection to type is the policy in view. Wherever possible inheritance of type has been combined with the selection of type in the individual.

That there is a growing demand for American bred horses is shown by the constantly growing demand, notwithstanding the continual rise in price. To meet this demand Doctor Alexander advocates a campaign for better breeding which involves the following:

Grading up with sound muscular sires; continuous use of pure-bred stallions of a chosen breed; use of sound stallions and mares only; proper feeding and care of the mare and foal; working of stallions regularly; home production of pure-bred stallions to replace grades, mongrels, and scrubs used at present; use of grade horses to replace scrub horses in farm teams; organization of community associations for promoting horse breeding; and the encouragement of the industry by prizes at county fairs for pure-bred stallions and mares and the progeny of these animals.—Wisconsin State Ag. Col. Bulletin.

NOTES AND NEWS

Chase's second fall sale next Monday night.

Many excellent road and matinee horses will be offered.

A few good saddle horses will go under the hammer at this sale.

Chas. James, of the McKinney Stables, will have a string of trotters and pacers at the Pleasanton track this winter.

We regret to learn that Mr. Frank H. Burke is again seriously ill and that he has suffered a stroke that has left his left side partially paralyzed.

There is a rumor that California will be represented at the Old Glory sale among the bidders on The Bondsman, sire of Colorado E. (3) 2:04½.

P. J. Williams, the veteran trainer and former owner of Monterey 2:09¼, Silver Bow 2:16 and other noted trotters, is now located at the half mile track near San Lorenzo, where he is training a few horses.

Amateurs and their horses that have not taken part in professional races will make up a program of harness racing at Escondido on Thanksgiving Day. Amateur racing has experienced a big revival all over the country during the past two years.

William Leach, the Marysville horseman, inventor of the Leach Stallion shield, will be in San Francisco a greater part of the coming winter on business and contemplates bringing his horses here or to Alameda during that time.

Reina Directum, Mr. S. Christenson's beautiful mare by Rey Direct 2:10 out of the dam of Directum 2:05¼, is running in the alfalfa pasture at the Santa Rita Stock Farm, and will probably be kept there during the winter.

Last week Jos. Twohig, who is located at the Pleasanton track, received a yearling by Alconda Jay, owned by Mr. Barber, of Milpitas, that is hardly broken but can show a three-minute gait already.

If anyone wants a fine buggy mare he should attend the Chase sale next Monday evening and bid on Sis Hopkins, No. 6 in the catalogue. This fine mare has been Mrs. Frank Burke's favorite buggy mare recently and is a beautiful seal brown trotter, perfectly gentle.

Owing to illness Mr. Frank H. Burke has consigned nine of his horses to the Chase sale next Monday evening. These horses are all just as represented in the catalogue. If you want something good in the way of a roadster or matinee horse, look this consignment over. They are all to be sold.

Mogolore 2:21¼, winner of the 2:15 trot at Sacramento during the fair in September last will be offered at the Chase sale next Monday evening. This is a fine big gelding, a perfect road horse and a grand one to matinee. He is by Iran Alto 2:12½ out of Lady Belle Isle by Eros.

Tim Sexton, the popular contracting plasterer, of Oakland is getting his small barn overcrowded with horses, so has consigned Alfred E. trial 2:12½ to the Chase sale. This gelding is a fast pacer by Altamont out of Ethel C. 2:20 by Sidney. A woman can drive him. Look him up in the catalogue.

Laddie G. 2:16¼, matinee record, is a 16 hand gelding by Zombro out of a mare by Whips. He is gentle, broke single and double, can be driven by a lady, and is a perfect road horse. Mr. Frank H. Burke has consigned him to Chase's second fall sale to be held next Monday evening, October 31st.

Mr. A. L. Hinds, of Oakland, one of "the old guard" of California horsemen, still takes a great interest in the sport and is often seen driving on the roads and seldom misses any of the amateur races that are held on that side of the bay. He is now driving a good looking sorrel colt by Kinney Lou 2:07¼ out of Floradora 2:18½ by Sahle Steinway that can show a pretty fair gait at the trot.

F. W. Perkins last week sold to Dr. David Hersprung of Woodland the well bred and handsome trotting stallion Athamax 2:22½, and the horse will make the season of 1911 in Yolo County. Athamax is standard and registered and was sired by Athadon that held the yearling championship record of 2:27 in 1892, and his dam is Lustrine, dam of Listerine 2:13½, Donnathine 2:26½ and Athamax 2:22½, by the great Onward, sire of the dams of Czareveua (3) 2:07¼, this year's Kentucky futurity winner Grace 2:08, and many others in the 2:10 list; second dam Minnie Wren by Challenger 1064, third dam Valencia by Cassius M. Clay Jr. 22, fourth dam by Abdallah 15, etc. Athamax is a horse of great substance and stamina, gets colts of excellent conformation and a high rate of speed. Dr. Hersprung should find a large patronage for Athamax in Yolo county.

The match race between Luke Marisch's Little Dick and Phil Kohn's Alfred D. took place at the stadium track last Sunday. It was an easy race for Little Dick and in the first and second heats his drivers allowed Alfred D. to set the pace and then beat him in the stretch. In the last heat Alfred D. broke soon after the start, and Little Dick won it very easily. Both horses paced without hoppers. The time was 2:14¾, 2:15¼ and 2:14.

The San Francisco Driving Club has arranged a big picnic and matinee to be held at Tanforan track tomorrow, Sunday. There will be five races on the card and a game of baseball. Admission will be charged and the proceeds will be devoted to the purchase of blue ribbons and trophies to be awarded the winners in the races held by this club during next season at the stadium track in Golden Gate Park.

Mr. P. W. Bellingall's four-year-old mare by Del Coronado 2:09½, dam by Secretary, that he drives on the road, is inclined to pace and shows a world of speed at that gait. She is a large mare, weighing very close to 1200 pounds, and has a perfect disposition. Mr. Bellingall is not partial to pacers for his own driving and may send this mare to a trainer to have her speed developed with a view of selling her.

Henry Helman is now located at San Jose with his string of horses, including his grandly bred stallion Alconda Jay, whose colts, the oldest of which are now two years old, will certainly make a showing next season. Helman has taken stalls at the new San Jose Driving Park and will open a public training stable. He is one of the best speed makers on this coast and has the distinction of having put three trotters by McKinney in the 2:10 list—Berta Mac 2:08, Mack Mack 2:08 and Lady Mowry 2:09¼.

Mr. Eugene Cerciat, of San Francisco is in Pleasanton last Wednesday and saw Henry Dunlap step his mare California Belle two heats in 2:21 and 2:18 with the last half of the last heat in 1:07½ over a heavy track and to a cart. Dunlap says she can step a mile in 2:15 to a sulky right now. He worked Borena D., his Bonnie Direct trotter, in 2:16 last May, so he expects to have two good 2:12 trotters to race next summer in California if there is any racing.

Mr. E. A. Howard, the well known dealer in hard-woods of this city, has a pretty mountain ranch in Contra Costa county on the northeast slope of Mount Diablo, and has in recent years been raising a few horses there. He has at the present time several well bred horses for sale that are thoroughly broke to saddle and have been used as saddle horses. He will soon send them to Oakland where they may be seen, and will be sold to be just as represented or no sale.

A. Ottinger of this city has consigned three fine mares to the Chase sale which takes place next Monday evening. Lily Dillon (trial 2:13½) is standard and registered by Sidney Dillon out of the great brood mare Lily Stanley 2:17½ by Whippleton. Lady Irene (trial 2:13) is also a fine trotter by Athadean, dam by Milton R.; Merrylin is another fast trotter by Merry Mac, a son of McKinney and she is out of the fast mare Tubelina by Tuberosa. These are three handsome bay mares, very fast and will make good matinee material, good roadsters, or can be used as broodmares, as all are highly bred.

Several car loads of horses that have been racing up north are now at Association Park, San Bernardino, where they will rest up for a few days before being shipped to Phoenix, Arizona, for the races there week after next. The horses are in the training stables of Chas. Durfee of Oakland, Al Russell, of Minot, Nebraska, and Fred Ward of Los Angeles. Durfee has Helen Stailes 2:09¼, Dr. Lecco 2:12½ and Happy Dentist 2:08; Ward's string comprises Dr. Wayo, The Conqueror, Lady Malcolm, and Zombro, and Russell's horses are Francona, Densmore, Don Densmore, Alfred B. and Buck by McKinney. Will Durfee will ship to Phoenix at the same time these horses are sent, and will take Copa de Oro 2:01¼ and Carloklin 2:08¼ with him. The Phoenix races will begin on the 7th of November.

In a letter to the Breeder and Sportsman, the veteran turfman Geo. H. Tinkham, of Stockton, says that the mile track there on which Dr. Thompson's pacer Guy Vernon paced a mile in 2:05 2-5 last Sunday, was "in poor condition at the time, having been watered but twice during the week. The track," writes Mr. Tinkham, "including 120 acres of land, is under litigation and no man can tell who will own it two years hence, therefore the members of the driving club, who are not millionaires, are not disposed to spend a thousand or two in installing a water plant. They are taxed monthly for track rent by a contractor who leases the ground for pasture and raises a fine hay crop. He sub-leases it for the summer to the club, agreeing to work the track. The old pumping plant having gone to rack, the track gets very little water. However the soil being adobe mixed with hard pan and sand, is easily put in condition after the hay is cut by being well worked and watered. Regarding Guy Vernon, Mr. Tinkham says that he paced his mile in 2:05 2-5 to cart, without any boots but quarter boots, and no other appliances save the harness alone, and had speed to spare as he has bottom as well as speed, and won't die after pacing two heats. There is a cause and it's his breed-

ing. The grandsire McKinney 2:11¼ made his record in the second heat of an eight heat race which he won, and trotted the last three heats in 2:16½, 2:16¼ and 2:22. Guy Vernon's dam is by Mount Vernon 2:18 (he by Nutwood out of Daisy by Chieftain). Daisy was not a very fast mare, but she had bottom and 32 years ago, in a hotly contested district race, trotted the second, fifth and sixth miles in 2:33, 2:42 and 2:43."

The elegant residence built by the late Martin Carter on the Nutwood Stock Farm, near Irvington, Alameda county, several years ago was burned to the ground on the night of October 14th. Mr. T. N. Carter writes us that nearly all the records in regard to horses that were gathered by his father in his life time were destroyed, but they still have a few left and will be willing to furnish such data as they have to all parties owning any of the Nutwood Farm stock that desire to register the same. The old Carter home was one of the best built mansions in Alameda county. It was finished throughout in beautifully grained oak and built by day's labor under the immediate supervision of its late owner who was a practical mechanic.

McCormick Bros. of Rio Vista, California, recently purchased from importer Wheatley, of Napa, the three-year-old Shire stallion Severn Pilot, that is beyond question one of the finest specimens of this breed ever brought to the United States. Severn Pilot took the first premium for three-year-old Shire stallions at the recent California State Fair and was then entered in the sweepstakes for Shire stallions and won the first premium over all other stallions of that breed of any age. Severn Pilot is a handsome bay, with splendid action and perfect conformation and weighs close to a ton at the present time and will probably weigh 2200 when fully grown. The horse breeders of the lower Sacramento and San Joaquin river districts are greatly pleased to have a stallion of the class of this horse located where they can send their mares to him and his book will be full before the season has well opened as he will be limited to 55 mares next spring. Severn Pilot will be mated with several registered Shire mares owned by McCormick Bros. next spring.

The Breeder and Sportsman had a pleasant call last Wednesday from Mr. A. R. Shreve of Cathlamet, Washington, and the well known trainer Dick Wilson of Portland. Mr. Wilson came down to spend the winter at the famous Pleasanton track and Mr. Shreve came along to see his great two-year-old filly Ruby Light safely landed at Pleasanton where Mr. Wilson will train her and a half dozen others during the winter and spring months. Ruby Light, as our readers know, is by the great three-year-old Aerolite (3) 2:11¼, public trial 2:05½ and is out of that greatest of all broodmares Bertha, dam of six in 2:10 by Alcantara. She started in two futurities up north this summer and won both of them, taking a record of 2:19¼ and pacing a half in that heat in 1:06. She is sure to get into the 2:10 list as a three-year-old if no accident befalls her. Dick Wilson is one of the best known trainers in America and has driven many horses on the Grand Circuit. He came to Portland last year with his family having decided to locate in Oregon, but concluded to bring his string to Pleasanton for this winter. He will remain at "the horse centre" until about June 1st, when he expects to ship back to Portland, unless there are some good meetings held in California prior to the opening of the North Pacific circuits. In addition to Ruby Light, Mr. Wilson brought down the good pacer Lord Lovelace 2:07¼, a couple of sisters by The Patchen Boy 2:10¼, one a four-year-old trotter and the other a three-year-old pacer. These are two very promising fillies. A green trotter owned by the estate of Samuel Elmore of Astoria, a colt by Star Pointer and the four-year-old Arclight by Searchlight comprise all the horses Mr. Wilson brought down with him. Among the horses that Dick Wilson has put in the 2:10 list are Aileen Wilson 2:02¼, Bumps 2:04¼, Casonda 2:05¼, Courier Journal 2:06, The Bishop 2:06, Silver Chimes 2:07¼, Dick Wilson 2:08, Byron Kay 2:08¼, Bad News 2:08¼, Johnny Taylor 2:08¼, Split Silk 2:08¼, Alice Brooks 2:09¼, Mosul 2:09¼, Henry E. 2:09¼, etc. He also drove that great champion pacing pair, Lady Maud C. and Hedgewood Boy to their team record of 2:02¼ at Grand Rapids, Michigan, August 13, 1909. Mr. Wilson will be a welcome addition to the Society of Speed Makers at Pleasanton.

FINAL MATINEE OF THE SEASON.

This afternoon at the stadium track in Golden Gate Park, the Park Amateur Driving Club will hold its final meeting of the season of 1910.

At this meeting the final disposition of several beautiful cups will be decided. These cups were presented by Messrs. I. L. Borden, F. J. Kilpatrick, F. L. Matthes, D. E. Hoffman and Joseph & Molera. The cup presented by C. W. Clark has already been won by Mr. A. Ottinger with Charley T.

The program of races is as follows:

First race, class C trotters—R. Consani's Dividend, R. Nolan's Billie Burke, A. P. Clayburg's Charles 2d.

Second race, class A pacers—D. E. Hoffman's Balboa and Dictatum.

Third race, class B trotters—F. L. Matthes' Walter G., Capt. W. Matson's Bird Eye, J. W. Smedley's Red Velvet, F. W. Thompson's Lady Washington.

Fourth race, class A trotters—F. L. Matthes' Raymond M., A. Ottinger's Mike Kelly, H. C. Ahler's Sunset Belle.

THE FOUR-YEAR-OLD TROTTERS.

It has been the prevailing custom for years among the most prominent trainers and breeders of the light harness horse, says American Sportsman, to lay over all good prospects during their four-year-old form, and various reasons have been assigned that had a tendency to make it appear the proper policy to carry out. However, if we are to base our judgment on the events of the season which is now practically at an end, it would seem that many prominent campaigners have about reached the conclusion that the most advisable period in a trotter's career, to make use of his qualities, is that particular time when he gives promise of showing speed considerably above the ordinary, whether he be a two, three or four-year-old or one of a more advanced age. And in view of recent events, this appears the most sensible way of looking at the matter.

The racing game has reached such a strenuous stage and the earning capacity of a high class juvenile so remunerative that the prospective futurity foals are given the very best of attention from the earliest moment.

As a result, they become a heavy expense from the very start and the owners in order to alleviate this in a way, as well as to see if their breeding ventures will withstand the "acid test" are putting them out early these days.

The season of 1910 has been remarkable, not only for the high degree of speed shown by the younger generation, but also for the large number of them especially four-year-olds which have contested and with marked success in the richest classics.

In the list of ten four-year-olds herewith shown, it will be readily recalled that eight of them have raced from the very opening of the season in a very creditable manner and at all times against fields of more aged performers.

Joan, br. f. by Directum Spier (4) 2:11¼...2:04¼
 Billy Burke, b. c. by Silent Brook 2:16½...2:06¼
 Soprano, ch. f. by Bellini 2:13¼...2:07¼
 The Plunger, b. c. by The Bondsman...2:07½
 Silver Silk, b. m. by Moko...2:08¼
 Dr. Treg, b. g. by Tregantle 2:09¼...2:08¾
 Capt. George by Admiral Dewey 2:04¾...2:09¼
 Martha Tipton, br. f. by Admiral Dewey 2:04¾...2:09¼
 Vito, b. c. by Prodigal 2:16...2:09½
 Gold Dollar, ch. g. by Pulsus 2:09½...2:09½

BLOOD WILL GENERALLY TELL.

No little comment has resulted from the placing of the records for four-year-old and three-year-old trotters in the same notch—2:04¼, and there seems to have been some surprise at it, writes H. J. Kline in the Stock Farm. But I doubt if there is reason for thinking that it is at all remarkable. It is, after all, a matter of pure speed and it was long ago predicted that there would be produced a great many colts that, at three, would trot as fast as aged horses. While it is true that no youngster has yet shown the capacity to trot a mile in two minutes, the fact that within three years the record for three-year-olds has been lowered from the 2:08¼ of Fantasy to the 2:06¼ of General Watts and then to the 2:04¼ of Colorado E. is ample proof that the youngsters are rapidly being brought by the breeder and the trainer to a speed point near the two-minute mark. In her races at the Lexington meeting the four-year-old filly Joan showed flights of speed which were little short of marvelous and convinced a great many people that properly paced in a special trial against time she might have, this year, done a mile around 2:03. As for Colorado E. his middle half of a second heat in 1:00½ and his first three-quarters in 1:32½ indicate that he too might have been capable of a faster mile under special conditions. Whether it is possible to breed colts with a greater speed-carrying capacity than is possessed by these two great trotters remains to be seen. If that can be done two-minute trotters at the age of three years may yet be seen, though I have an idea they will by no means become very common. As a matter of mere opinion I am inclined to say that the breeders who are ordinarily successful, during the next twenty years, in producing colts that can race in 2:07 at three must admit that they have escaped failure by a fairly wide margin. As to the breeding of the two new champions one can only say that the three-year-old is about as well bred as any fast trotter yet seen. Aside from her paternal line I am not greatly impressed with the blood of Joan, though we must admit that if we can produce, uniformly, such great trotters as the Transylvania winner, by mating a hobbled pacing mare with a well-bred and very fast colt trotter, such as Directum Spier, then that is the best way to breed. Vance Nuckols holds to this opinion on that subject: "You might breed that way for a century and not get another Joan. The percentage will always be against you." There are few who will not agree with Vance. In the long run blood will tell and in the long run the Joans will not be bred as she is bred. And the marvelous thing about the wonderful speed of the colt trotters is that it has come away ahead of any approach to scientific breeding, or whatever should be the proper term for that sort of breeding, which, in a big majority of matings, achieves the desired results. Perhaps the doings of Colorado E., Joan, Grace, Justice Brooke, Native Belle, Silent Brigade, Miss Stokes and other exceptional colts of the racing season of 1910 point the way of the breeder to still greater achievements. But they can only come through a careful study of courses, followed by entirely discarding all things that smack of haphazard, trust-to-luck matings.

DALLES, OREGON, OCT. 5-8.

2:30 trot; purse \$150:
 Zo Zo (Young)1 4 1
 Oakland mare (Coffield)4 1 2
 Dietrich (Stoppelfield)2 2 3
 Padisba (Lindsey)3 3 4

 Dan B. by Buttonwood (Jacobson)4 4 4
 Time—2:21¼, 2:26¼, 2:24¼.

Special, trot or pace; purse \$200:
 The Magnet by Allerton (Williamson).....1 1
 Major Lee by Major Bob (Johnson).....2 2
 Clay Reed by Cyrus (Erwin)3 3
 A. W. by Prince Altamont (Green)4 4
 Time—2:29, 2:30.

Named race, purse \$150:
 Arango by Mac B. (Wilbourn)1 1
 Nellie Chimes by Christmas Chimes (Williamson).....2 3
 Princess G. by Dexter Prince (Johnson)3 2
 Dan B. by Buttonwood (Jacobson)4 4
 Time—2:31, 2:31.

SADDLE HORSE NEEDS.

[By Herbert J. Krum]

Saddle horse interests in the United States require but one thing to add thousands of dollars in value to the future of this breed and that one thing is publicity. There are thousand of people in every part of the country that would be delighted to spend their money for saddle horses if they only knew more about them, what they could do with them and where they could get them. Compared with the trotting horse people, owners and breeders of saddle horses are, as a rule, mighty poor business men and are perfectly content to drift along in the same old-fashioned ways that have become obsolete and entirely out of date. If they only realized how much value they could add to their horses by the mere simple process of letting them have the benefit of a little publicity, they would awaken from their dreams and do a little advertising.

Saddle horses are a profitable commodity. No one ever heard of anyone "going broke" on saddle horses. Of course, they have never brought the sky-scraping figures that some of the trotters have, but they are always safe and sure sources of revenue. There is a reason for it too. Saddle horses conform to type. They breed true. A breeder is reasonably sure of what the result will be when he mates a certain mare with a certain stallion of this breed. There never has been a time when a good looking, fine, saddle horse would not sell well anywhere on earth and there never will be. Moreover they are naturally the most beautiful thing there is in the animal kingdom and one of the nicest things about the saddle horse is that they sell themselves. Besides this they are far and away the most versatile horses in the world. They can do more different kinds of things than any other horse. One of the fallacies in the minds of the public is that a saddle horse is good for riding only and many persons think that it is actually detrimental to a saddle horse to use it in harness. There could not be a greater mistake. But it is a natural one and comes of the fact spoken of above that there is so little that is known about the breed and the real facts

concerning it. This is due to the conditions referred to; saddle horse men do not take the trouble to have the world, at large, know about their goods, and it is no wonder that there are so few horses compared to what there would be if people generally only knew the uses and purposes for which the saddle horse is especially available.

Several things contribute to the fact that it is profitable to raise saddle horses. One of the most important is the fact that the service fees of the very best saddle stallions are low compared with those of other breeds. The highest fee obtained by any stallions of the saddle breed is \$75, and only a few horses get that. They are Rex McDonald, Montgomery Chief, Bourbon King and Rex Peavine. There are quite a good number that get \$50, but the average will not be above \$25, and this reduces the first cost of getting a colt down to a very nominal basis. On the other hand, it gives the stallion a splendid return on his investment. Naturally I expect to see service fees higher in the future. I think Rex McDonald will command \$100 for the season of 1911 and do all the business he can attend to. But I know of a three-year-old stud by him for which \$3500 was refused.

Another thing is that there is a constantly increasing earning capacity for saddle horses in the show ring. The prizes at the fairs are being increased in value every year and stakes of \$500 and even \$1000 for saddle horses are becoming quite common in all parts of the country. It costs but a trifle to make a saddle horse and to fit it for even the most pretentious affairs, but there will never be anything like the development of this industry that is possible for it to reach until the saddle horse breeders themselves take some steps to let the public know what fun, pleasure and profit can be derived from the use and ownership of the best sort of saddle horses. Saddle horses should be advertised, talked about, shown and exhibited everywhere. Good saddle stock will thrive and be profitable in Iowa and Kansas, as well as in Missouri and Kentucky. How many saddle stallions made a season in Illinois this year? In Indiana? Very few indeed. Yet Texas and Oklahoma ought to have thousands of dollars worth of saddle stock. Those places are not too far from market. The market for a saddle horse is always right at hand. Any large city is a sure and natural market for a fine horse. Always will be. Whenever there is wealth and culture, there is a market for a saddle horse, though large cities do not constitute the only place for a profitable market. In one county in Kentucky I counted up thirty-three saddle stallions that made a public season this year and everyone of them did a nice business. Is it not certain that in that county three and four years from now there will be a world of money attributable to the fact that those horses made these seasons?—Spirit of the West.

THE BEST RECORDS OF THE YEAR.

Trotters.

Yearling colt—Beneat, by Bingara, dam Garnish 2:18½, by Highwood 2:21¼; and McKinney Mac, by McKinney 2:11¼, dam Miss Brussels2:27¼
 Yearling filly—Princess Todd, by Kentucky Todd 2:14¼, dam Grace Bingen, by Bingen 2:06¼2:29¼
 Two-year-old colt—Justice Brooke, by Barongale 2:11¼, dam Expectation by Autograph.....2:09½
 man2:11¼
 Two-year-old filly—Miss Stokes by Peter the Great 2:07¼, dam Tillie Thompson by Guy Wilkes2:09¼
 Three-year-old colt—Colorado E., by The Bondsman, dam Flossie McGregor by Jay McGregor 2:07¼2:04¼

 New performer—The Abbe, by Chimes 2:30¾, dam Nettie King 2:20¼, by Mambrino King.....2:04

The Riverside Driving Club is planning a big meeting for Thanksgiving Day with horses from the Hemet and San Bernardino clubs to participate in the races. If the weather is propitious a very large attendance is certain.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT.

RANDOM NOTES.

[By Loch Laddie]

There are many disappointments in the purchasing of bird dogs that leave many an open controversy between the buyer and seller, and the cause of this is often apparent when both sides of the question are argued. Of course one reason of complaint can be traced to dishonest dealers, and we are sorry to say that there are several preying on the public whose only stock in trade consists in a high-sounding kennel name and a stock of well kept dogs devoid of any particular field merit. Through the medium of the advertising columns of the papers that cater to the wants of the average sportsman a card is inserted giving descriptions of the dogs advertised, as, "gentlemen, he is positively the staunchest and best bird finder in the country today; \$100, on approval." The ready victim writes and receives an answer elaborately describing the field qualities of the dog, and winds up with the prospective buyer consenting to pay the express on the dog both ways in case of refusal.

The dog is sent, and as usual the prospective buyer hasn't time to try the dog out, so pays the price and keeps the dog, depending entirely on the word of the sender, only to find out that the dog is a rank dub—these are the kind generally sent out by what are known as dog speculators who carry large ads, though we are pleased to say that among this class of field dog tradesmen there are many honest ones, so that it makes it all the more difficult to make a selection.

The surest course for a buyer who has not an opportunity to try out a dog is to have it sent to some trainer on approval for a trifle more expense. He will either get a first-class dog or save himself from being gulled by the dog sharks.

Another reason for complaint is traced to the inability of the average sportsman to handle a dog afield. Granting that the dog is well trained, he will only remain so as long as his handler exacts obedience from him. While he may be perfectly staunch to wing and retrieve well, an owner who himself breaks shot, cannot expect a dog to remain long steady to his gun, if in his anxiety to get game he oversteps the rules which he requires his dog to obey. So often are dogs sent to trainers to correct this one fault that I was amused at the frankness of a dog owner. When interrogated on the point of whether his dog broke shot he replied: "I do not know." The rest can be judged. It is advisable that every dog owner should become acquainted with some few rudiments in the art of handling to successfully secure the best results from his field companion, and also to know what kind of going a dog should have to suit the country in which the dog is to be hunted, then he should not be so hard to please by buying from some reliable kennel. Often a dog with a surplus of ambition is sent to a green hand and readily turned down on account of being under no control. Take, for instance, a pair of dogs of high merit that border on the highest type of the field dog. They are in a trainer's hands and accustomed to daily field work, and generally, when they miss it, go self hunting. A party happens to see these dogs at work and fancies them sufficiently to pay a good price for them. They are brought home to the city and kept in a back yard for six months with no chance to exercise except possibly a stroll through the streets, and then kept in check for fear of injury from some passing vehicle. All the time these dumb brutes have been craving the fields and a chance to search the stubbles for birds—the confinement has so long chafed at their nerves that they are ready at the first chance to throw off all the bonds of control to hunt, and hunt until they are ready to drop with exhaustion. When the open season comes again they are taken by their new owner to the quail country and turned loose to search for birds. Like a drunkard withheld from his customary drink and then offered it ad libitum, the first whiff of the bracing air intoxicates them and they throw off all care to become surfeited with the desire to hunt. The unintelligible commands of the new owner are ignored, the first covey is chased with a keen relish and even the cottontail is made to race at a rapid gait to safety and until the dogs have run off their wire edge, their subservency to a master is at an end. If the hunter had the knowledge to correct them at the right time no further trouble will occur. But useless commands and the whip used at the wrong moment will only teach them the weak points of their new owner and they will take advantage of it when the opportunities present themselves.

A few years ago a prominent St. Louis sportsman and friend of the writer bought a pair of dogs from a trainer whose reputation for square dealing has never been questioned. The dogs were hoarded at the home of a family in St. Louis county and readily acquired the habit of self hunting where and when they pleased.

Later on the owner tried them and felt keenly disappointed in the dogs, stating in a letter to the writer that he had been gullied. Knowing the trainer to be a man of splendid character, I volunteered to take the dogs for a few weeks to see what was wrong. After a day's work I returned them to him,

jestingly telling him he was wrong, not the dogs. After seeing his faux pas he followed with a letter of apology to their trainer.

Where one has not experience in purchasing broken dogs, nor the ability to handle a dog of that kind, it would be wise for him to have some competent trusted friend do it for him. A dog of this kind is a very difficult matter for an ordinary man to size up; it is hard for him to tell whether it will please him in the short time usually allotted for trial or not. Condition, ability to stand work, and soundness from any physical ailments are things that cannot be told at a glance.

There are many unscrupulous dealers who are laying out baits for the uninitiated in the shape of large advertisements carried in the leading kennel journals. Many of these dogs these dealers have never seen work in the field. The dogs are often bought up at random at a small figure and held in condition until the proper time comes to drop them on some customer uneducated in dog lore. A cheap dog is rarely sent on approval by these dealers and their high priced dogs are often scarcely worth half the figure demanded for them. The unsuspecting victim not having judgment enough to estimate the real value pays without murmur the price demanded.

From some of the victims who are readers of The Breeder and Sportsman, I am informed that where they have already paid out money in advance and dog proves unsatisfactory, the seller will in no instance make an attempt at adjustment. His reply will be short—to try the dog again on something equally unsatisfactory. After this the buyer can never get another word of correspondence from the shipper, and letter after letter is ignored. In one instance where the victim had pluck enough to retaliate in form of a suit, he found that the seller had foreseen these little litigations ahead and to weather the storm successfully had placed all his property in his wife's name. But this was one of the many instances that occur in this line.

There are many honest dealers though who will not hesitate to make adjustment immediately in every way suitable to the purchaser. Many honest dealers are at all times condemned because the dog did not come up exactly to anticipations and the dogs are returned to him. We have always favored having the prospective buyer going to the seller's place and see the dog at work. If one don't suit him he can readily pick out another that does, and avoid a long distance warfare that seldom results in any material worth to the buyer. I believe where such arrangements cannot be made that dogs should be shipped on at least ten days' approval; this will give the prospective buyer plenty of opportunities to discover the good and bad qualities of the dog shipped—for many dogs must become well accustomed to new surroundings before they can give you a true line on their abilities.

Some dogs of considerable experience and field merit are inclined to suffer from homesickness or else are not quick to become accustomed to their new environments, so it is hardly necessary to state that they won't do much until things begin to suit them.

Don't wait until the shooting season opens and then ask a man to send you a dog on approval. This has been overdone. Select him long before that time and if you do, insist that your agreement reads that you have sufficient time to give him a good tryout. Don't buy a cheap dog; most of them are dear at any price. It costs time and money to develop a good dog.

We often read of some queer freak about animals who in some unexpected moment change their usual habits and like in man the unlooked for often happens. Here a bitch with a litter of six puppies has the run of the yard with some chickens. A short time ago a mother hen prepared a nest in some weeds in an obscure corner of the yard, laid some eggs and began careful preparations to bring a new family into the world, but her plans were doomed to disappointment for something got the eggs, but the old "biddy" was content to keep her steady vigil just the same on the old nest. One morning, at five, I heard the old lady clucking and fussing as an old mamma hen is wont to do with young, with wings spread apart trying to screen her young from any invasion of enemies. I could scarcely account for the old damsel's behavior and the idea that she had accomplished the impossible by producing something out of nothing had begun to enter my mind. On making closer observation I found that during the cold hours of night three of the young puppies wandering in search of their too-often suckled mother, came in contact with the warm body of the hen and upon her failure to molest them remained there, contented, as the sun began to warm the mother earth. It was amusing to see this faithful Plymouth Rock try to scratch for them. The old biddy seemed fond of her new tribe, but a bit puzzled at their failure to eat. She would take great offense at my approach. I was obliged to break up the happy family for the too frequent caresses on the part of the newly acquired tribe was ridding mamma of her former bounteous supply of tail feathers.

In this case the habits of the mother hen were largely changed because of existing conditions.

GOSSIP FOR SPORTSMEN.

The appointment by Governor James N. Gillett of Lendal M. Gray, of this city, manager of the Kosmos Steamship Line, as a member of the Board of State Fish and Game Commissioners, vice F. W. Van Sicklen resigned, is a popular one with sportsmen. Mr. Gray is an ardent devotee of gun and rod and is in rapport with the situation pertaining to fish and game in this State. Mr. Gray is a member of the gun club which has leased the famous Stewart ponds, eight miles from Suisun, and with Guy T. Wayman, Dr. Clyde Payne, William Kent of Kentwood, Attorney Denman and L. Lawson, has shot limits of sprig and other big ducks since the season opened.

What is the matter with the ducks? is a question that has been puzzling not only sportsmen but gentlemen of natural history proclivities recently. In the vicinity of Stockton the wild fowl were afflicted with some ailment which killed hundreds of them. Other sections have also fallen into line here and there. Whether these conditions will become epidemic or not is now the problem.

Last season ducks died by the thousands in the Tulare lake region. It is claimed that ranchers put out poisoned wheat, and that that was the cause of the killing off of the birds. While this may have been the case to a limited extent locally, the "duck sickness" was too widespread and the dead birds too numerous to be affected by poison in such a wholesale manner.

In Utah, Colorado, Idaho and some parts of Nevada this extraordinary epidemic among wild fowl prevailed recently to an extreme degree, affecting wild ducks, geese, snipe, herons and shore birds. In Utah the opening days of the hunting season this year were entirely spoiled. In one area of several square miles, near the mouth of the Jordan river, it was recently estimated there were 150,000 dead ducks and other water fowl.

Investigation of the cause of the "duck sickness" leads to the theory that local unsanitary conditions in overcrowding breeding places bring about what is believed to be a "duck cholera." Study of the disease in its progress and examination of dead birds tend to the latter diagnosis. Whether the epidemic will spread in this State as it has in the States mentioned is questionable. Most sportsmen who are at all conversant with the subject rather believe that the epidemic will not have much sway here.

The arrest and subsequent conviction, last week, in San Mateo county of a magistrate for a gross violation of the game law is one that has met the approval of the sportsmen of this State and has resulted in an enthusiastic endorsement of the policy and work of the State Fish and Game Commission. This case was an aggravated one, for the convicted county official had been particularly zealous in the prosecution of game law violators that had previously come before his court for trial.

Justice of the Peace A. O. McCormick of Pescadero, San Mateo county, was convicted on Thursday, last week, by a jury in Judge John Pitcher's court at Halfmoon Bay of having killed a doe and removed the evidence of sex in an effort to destroy incriminating evidence—all this in violation of the statute. The court imposed a fine of \$150 and thirty days' imprisonment in jail, with the alternative of paying the fine at the rate of \$1 a day for each additional day in jail.

Alec Moore, a farmer, tried at the same time for complicity in the same offense, pleaded guilty when the Pescadero magistrate was convicted, was fined \$75 and given fifteen days in jail, with the same alternative of serving out the fine at the rate of \$1 a day.

This fine and imprisonment combined is probably the heaviest imposed in this State up to date for killing a doe. The illegal act was committed September 12th. Four men were in the hunting party. Mr. McCormick and Moore became separated from their companions. Several rifle shots were heard and within a few minutes near-by witnesses saw McCormick dressing a deer, after the head had been cut off and thrown away. The two men were immediately accused of shooting a doe.

The hunters claimed that it was an unintentional act. Deliberation was proved by showing that three bullets had pierced the doe's body, evidently aimed by a good shot. McCormick has the reputation of being an expert shot and skilled hunter.

Deputies Joseph Hunter and Frank H. Smith, subsequently arrested the pair. McCormick demanded a trial by jury with twelve men in the box. Earl Pier was the special prosecutor for the State Fish and Game Commission. McCormick stated he would appeal the case.

John A. Haugh was arrested two weeks ago for hunting with a horse, stalking wild fowl behind his equine hind. He was tried before Judge Moore at Colusa and convicted.

Fish Trap lake, one of the best duck and goose grounds in the Spokane country, is to be converted into a private reserve in 1911. Owners of land around the lake have completed plans to make it a breeding place for game birds. M. Williams and Samuel Lunceford of Spokane, have the matter in hand. This is the first time that anything of the kind has been attempted in the Northwest and sportsmen in Spokane and throughout the district are keenly interested in the success of the venture. They believe that the protecting of the birds during the breeding season will help the hunting in the future.

WILDFOWLING EXPERIENCES ABROAD.

[By the Duke of Wallaby.]

With the coming of winter most of our enthusiastic fowlingers begin to speculate on the chances of sport for the following two or three months. The gunning punt is overhauled, the punt gun polished up and oiled, oars reathered, and the gear put in order. All this is done in anticipation of the big flights of geese, widgeon, ducks and teal, and a vast host of lesser wildfowl, which are the concomitants in the great autumnal migration from their breeding haunts in the Arctic regions. The influences of the northern frost and ice have compelled them to quit their summer homes and migrate to distant countries in search of food and shelter.

From the early days of September this army of wildfowls is on the move, passing down the Scandinavian coast, and distributing their forces over the various bays and estuaries on the coasts of Schleswig-Holstein, the Baltic, Germany and East and South Holland. "Trip" after "trip" of widgeon and "gaggle" after "gaggle" of geese have been passing overhead bound for the south. To the home-staying British gunner these sights are unknown, but there are a number of most experienced punt hunters who leave Albion's shores every autumn to intercept the advancing fowl in the main migration tracks. These enthusiasts have for years past learned all the wrinkles by which they may outwit the wily and vigilant birds when they put in for a few days to recuperate their energies prior to the continuation of their flight south and west.

Between the islands of the coast above mentioned and the main shores there are vast mudflats and sandbanks, the green weed being all fresh and luxuriant since the summer growth. Attracted by these delightful and palatable surroundings, the fowl remain for a few days, and afford the prowling gunner afloat in his trim little double punt the most excellent sport. What a spectacle it is! All around, wherever one may look, there are birds—some, perhaps, flying about in small clouds, whilst others are in big masses feeding unsuspectingly in the shallows which are just about to be exposed by the receding tide. The weird music of their cries is borne down to the fowler's ears, and his energies are all alive as he contemplates the prospect of making a closer acquaintance with them. How well do I remember that day in December, not many seasons ago, when at my quarters in a great gulf on the coast of Lower Brittany, the flats for miles around in my view were simply swarming with brandt geese and widgeon. In my dilemma I was at a loss to know where I was to direct my attack first. It was the same sort of thing, however, as happens on the German and Dutch coasts earlier in the season. Wildfowling whose experiences are limited to the British coasts have no conception what these enormous gatherings of aquatic fowls are like on the Continent. It is absolutely amazing to witness these sights in severe winters when the regular stock of homebred fowl is suddenly augmented by the clouds of migrating voyagers, which come in from sea with a succession of easterly gales and rough weather. Birds of all species arrive on the scene. Localities in which big ducks or teal are at times, perhaps, deficient in numbers, are then invaded by these welcome intruders, and all add to the charming variety of the fowler's sport. The difficulty of the English coasts is to get a variety of fowl to shoot at. In certain bays and estuaries, more especially in the eastern coast of England, the west coasts of Ireland, and in some of the firths of Scotland, there are doubtless, during severe winters, large numbers of brant and even grey geese, beside widgeon and other fowl, but the gunner does not see such hosts of these birds as are observed on neighboring Continental shores.

From the above remarks it will be at once clear that the opportunities for making heavy bags of wildfowl are far greater on the main migration routes. The biggest shot I ever heard of was made on a neighboring shore about the end of September by one of the best English wildfowlingers. This particular gunner had often told me of his desire to kill a hundred widgeon at a shot. I knew that this was a very difficult matter, as it is rarely that, even with the large screw breech 2-inch punt guns, the fowler can approach the fowl near enough to kill such a number. However, when I was away at my own fowling quarters abroad a few years ago, the news arrived that he had bagged 149 widgeon at one shot, 105 widgeon and 17 teal at another, and a third shot of 132 teal in another locality on the east coast of Holland. Thus were my questionably worthy friend's ambitions duly gratified, after 20 years' experience on these coasts.

The fascinations of fowling with punt or stanchion gun in places where birds are always abundant are beyond belief. During the past 15 years I have experienced some of the pleasures of wildfowling afloat, similar to those which had befallen my friends abroad. After passing the winter of 1887 on the north-east coast of Scotland in pursuit of the grey geese, ducks, widgeon, teal and pochar, which frequented one of the most beautifully situated lochs close to the sea in Aberdeenshire, I came home resolving to make plans for an expedition during the following winter. During the summer months I made the acquaintance of a veteran army officer in the course of my wanderings who had been a great wildfowler in his time and had explored most of the best places for snipe and ducks. Questioning him as to the probabilities of finding any place suitable for punting in France, a country which I had long desired to explore myself, he told me of the sport he had obtained with

the shoulder gun on the marshes of the Loire Inferieure, near St. Nazaire. Not being a punting man himself, he could not say what my chances would be with a punt gun, but he told me that wildfowl abounded in Lower Brittany near the sea coast. This information induced me to look up the map, and by the shape of the coast line I convinced myself that there must be wildfowl on the coasts of Lower Brittany, and arrangements were at once made to take a punt and stanchion gun into these regions. About the middle of November all was prepared for the voyage, and after crossing the Channel from Southampton to St. Malo with my friend, a keen punter, who had promised to accompany me, and share my sport with me, we launched our punt in French waters, having obtained all the necessary permits for our passage through all the locks on the canals running to Rennes and Redon.

To cut a long story short, we plodded along, sometimes rowing, and sometimes sailing, eventually reaching Redon in about 20 days from the date we embarked to row up the Rance at St. Malo. The country through which we had passed was some of the most picturesque I have ever seen. Sometimes we would pass between rocky heights which shut in the view for bours together, and at other times we were surrounded by green meadows, which stretched for miles along the banks of the canal. The number of locks we met with was remarkable—something like 60, I believe, was the actual total. On the way to our destination we roused the curiosity of the natives, but wherever we put up for the night, which was generally in some small auberge near the canal, we were always received with great civility by our hosts. There were occasions, however, when we had to "rough it" and once we were nearly swamped through a sudden squall in the bay of St. Suiaac, on the river Rance, soon after starting.

At Rennes and Redon, the two big towns en route, we recuperated our energies and lived somewhat luxuriously. The canal trials and troubles were ended at Redon, and my friend decided to row the punt down the river Vilaine himself, whilst I went on by train to La Roche Bernard with the baggage. I was much horrified, I remember, when I arrived at the inn at this village, for when the guests at the dinner table that night heard my friend had been rowing a small punt alone down this treacherous big river that day they at once began to sympathize with me, as, of course, he did not know the river, which was in places somewhat dangerous. It made me very anxious about him, and I went out several times after dinner to the quay of jetty to listen for him. Up to 10 o'clock at night he had not arrived. Not long after, however, I heard his cheery voice downstairs, and I hastened to meet him and congratulate him on his safe arrival. He gave a most interesting account of his adventures since I had left him. After ministering to the inner man we retired for the night.

On the morrow we rose early and sought for a Breton pony and cart which could convey our punt, swivel gun and baggage overland to our destination on the Grande Bryere. Luckily we had no difficulty in finding the necessary commodity, and having bargained with a Breton pheasant, who was the owner of them, we were soon tramping over the country, up hill and down dale, to the haven where we would be. We covered something like 50 kilometers this day, and towards dusk arrived at the auberge on the marsh where we were to put up for the night. The view around us next morning when we peeped out through the diminutive windows of our abode was of the gloomiest description—nothing but marshes for miles and miles around us. We could just see the smoking chimneys of St. Vazaire, but where was the water for punting in, and where were the fowl? We interviewed one or two pheasants whom we met, and they gave us gloomy information that the waters had not that year risen over the marshes, and there would be no fowl there until they were covered with it.

After our toils and travels, this was indeed bad news, and we were rather disheartened. Hopeless of getting any sport, we explored the whole country around, even along the coast line to Le Croisie. Out in the bay of Le Croisie we saw a good company of widgeon through our telescope, but this was practically the open sea, and they were inaccessible. We saw nothing but peat stacks all over the marshes and here and there sheets of open water, up which the peasants pushed their punts laden with peat. A curious turn in the tide of our luck came three days after our arrival. Before we were awake in the morning, two gendarmes arrived at the auberge to ascertain whether we had registered our names and addresses in our host's book of visitors. We were called and soon came down stairs to interview the gendarmes, who partook of a bottle of sour "vin du pays," at our expense. In the course of conversation we discovered that the gendarmes hailed from the Morbihan country, and when they had seen our installation in the shape of gunning punt and big swivel gun, they became very inquisitive. One of them at length ventured the opinion that to shoot gibiers d'eau (wildfowl) with out equipment we should go to the Gulf of Morbihan, as it was swarming with wildfowl of all kinds. Les oies noirs, penrus, canards, sarcelles, et tout d'especes des gibiers," he said.

We naturally gladly accepted the suggestion, and the next day found us tramping along once again to find a village called St. Columier on the shores of the Gulf of Morbihan. Our late host drove the punt, gun and baggage, whilst we walked by his side. He was our guide for the rest of the time. The roads about this part of Brittany are very well cared for, and by the time we had finished our scanty meal,

called lunch, we had broken the back of our journey which was 25 kilometres. In the light of day we solemnly trudged into the village of St. Columier, which was at one end of the sea of Morbihan; but there was no accommodation to be obtained in this place, the cottages all being in a ruinous condition. However, we were not to be denied, so we walked along the road, and when we got to the top of the first high hill we at once came in view of the sea of Morbihan. I saw a smile come over my friend's face, and we mutually agreed that we had found the punter's paradise. As we gazed over this great gulf we could see its enormous extent, and there seemed scores of islands dotted about over the sea in all directions. A cloud of birds suddenly flew up from the mud flats, which we recognized as being widgeon by their brown wings and silver bodies flashing in the sun. Another great flock of birds two miles off shore, which through the glasses we made out to be brant geese. I really think that at this moment there were no two happier men in the world than we were. We began to talk about sending carts down to the shore every evening to have the bag carried home, so abundant seemed the fowl in this fine gulf! Night at length set in, but by that time we had found, fortunately, excellent quarters in the pretty little village of Sarzeau, which stood far up on the high ground overlooking the gulf.

The following day we were naturally up early inspecting the surroundings, and launching our punt by the special permission of the Viscomte de Francheville in the bay which ran out from his garden wall. We had a little secret to maintain, as we had English punt gunpowder of the coarse grain order, as English powder was absolutely prohibited in France. Breaching our swivel gun on to the foredeck did not take long, and we were soon ready to go afloat. The privacy of our launch enabled us to evade the curiosity of the monde, who were much interested in our arrival. The remarks passed by the gamins who saw the gun carried down the village were very funny.

The tide was now ebbing, so I begged my friend to go out and try sundry lots of widgeon and brant geese which were in evidence from the shore, collecting to feed on the higher patches of mud flats, where they knew they would get the first mouthful of food. The punt was rather too small to hold two, but we did later on squeeze in together, and got some shooting. Being both pretty good hands at "sculling" and "setting" with the set pole, it did not matter much who lay to the gun, or who took the shot. Our battery was a gun firing one pound of shot, but not nearly large enough for a locality where fowl were so numerous. However, we had to do the best we could under the circumstances. The first part of the day I watched my friend at work through my glasses, and I saw him take one or two very nice shots at widgeon, and he was most contented, when he came ashore with 30 birds—25 widgeon and five brant geese. Later on in the evening, after dinner under the stars, I went out for a turn in the punt, and succeeded in getting a fair shot at widgeon almost under the shore, where I could stalk them with the shade of the shore behind me. I picked up several cripples, which were hiding concealed behind stones, rocks and seaweed on the promontory where I had fired the shot. So we went on from day to day, turn by turn afloat, and our records kept mounting up. Unfortunately this season we did not keep a very accurate note of what we killed, a fact I have always regretted; but when we left these interesting quarters early in February we had certainly bagged from 400 to 500 geese, widgeon, mallard and various.

In later years I spent every winter in this gulf, until I had amassed the grand total of 8358 fowl for eight winters' sport. In 1902-3 I commenced to use a double-handed punt, as I had taught my Breton punter to manage the punt almost as well as I could handle her myself. I mounted on her foredeck a steel breech-loading gun by Holland and Holland, a 1 7/8 inch bore, of the very best build, firing six ounces of powder and two pounds of shot and weighing 175 pounds. Naturally we made far heavier shots from year to year than we had previously with the one-pound gun. The total bag in the year, 1902-3, was 2060 fowl in 85 shots, with 10 shots each over 50 widgeon per shot, and one of 89 widgeon. Birds were always in the gulf in thousands every season and it was only a question of weather as to how many one would bag. With the first spell of easterly winds at the end of November or the first week in December, brant geese and widgeon arrived in thousands, and I expect, though I have had no news from my French comrades, that there are just as many wildfowl as ever there again this winter. The coots, however, have vastly increased in numbers since I went there first, and that does not augur well for the future, as they devour all the weed on the flats near the shores.

After the first year in Brittany I kept a daily record of every detail of each day's punting, which was practically every day, as the area of my shooting was so extensive, and though, alas, I have not been to my old quarters for several seasons, I have plenty of food for reflection.

Easy Deer Hunting.—Sylvester Thorne, a Prescott, Ariz., sportsman, started away on a deer hunt for the Walnut Grove section, a long distance from town.

After being out but a short time on his trip he killed a buck less than four miles from the city limits. Getting his deer sooner than he anticipated, he cut out the longer trip.

THE UPLAND PLOVER.

Sportsmen of this State generally are in favor of a change in the season on shore birds. These birds are migrants and do not breed here. They are present, however, two and three months before the open season on feathered game commences.

The argument has been advanced against an earlier season on shore birds, that in the months of July, August and September, shore bird gunners might be tempted to kill wild ducks, particularly the young "flappers." This hardly applies seriously for the reason that the shore birds habitat is not to a serious degree that of the breeding wild ducks and young waterfowl.

However this all may be, the experiment is well worth the trial. The open season on the longlegged and longbilled varieties is countenanced in other states and works satisfactorily, if the following article by Sandy Griswold, a well known writer on topics of interest to sportsmen, in the Omaha World is any criterion to go by:

Virtually the upland plover is our one summer game bird, although the open season is contemporaneous with that on turtle doves, that is, when we have any open season at all, which has been denied us this year. However, the dove season continues until late in the autumn, while that on upland plover only lasts from about July 15 to August 30, and that is why I call him an exclusive summer game bird.

I will say that when he comes here in the early spring, for he does come for a few days' stay in the latter part of March, it is most commonly seen isolated or in pairs, but never in considerable flocks, as is the case with the golden plover, or used to be when this bird came here in great numbers every fall and spring. In the spring the sportsman who has no scruples about shooting all the jacksnipes and yellowlegs he can, seldom molests the upland, in fact his opportunities to do so are meager indeed. But it is not wholly from lack of chance that influences the hunter to restrain his desire to shoot when he does encounter an upland. Many a time have I been afield after snipe in the spring with a companion and not infrequently have flushed one or more upland plover. But when we heard that liquid, tinkling "tur-wheet-wheetle" and recognized the bird, neither had cause to urge the other to let him go.

"It's an upland," was the general observation, "we'll let him go until July."

It may be that perhaps the sportsman conceives a sort of sacred regard for this sweet-noted visitor of our springing meadows and passes him by, though he offers every temptation for a shot.

Even if one cared to bag the upland plover at this time there would be no chance of making anything like a creditable bag of them, and it is not often that even a single bird can be brought to grass.

At the first report of the gun this gentle wayfarer develops a wariness which taxes the hunter's ingenuity to the limit to get within range of him, even where the standing stalks of last year's mullin and ragdeew afford the best of cover. And on the open plowed fields where he does all his feeding during this brief vernal visit it is impossible to approach him anywhere within even long gun range. Of course there are no grasshoppers in the spring and the birds resort to the newly broken fields, where they can pick up worms, the various kinds of hibernating insects, bits of seeds and other particles of food which satisfy their appetites but do not put much fat on their graceful bones.

It is much different in the summer when the cut hay fields, the reaped wheat, rye and oats, the fallow stretches of variety, offer a resistless attraction in the way of grasshoppers and coleopterous winged things of a hundred varieties, in addition to the kernels of wheat and other small farinaceous grain and the vermicular tidbits of the broken sod. The male birds come down first in mid-July but they are shortly joined by the year's brood, and then the mother birds, and then altogether they scatter over our fields and gorge themselves with the goodies that lay everywhere spread out before them. By the first week in July the upland plover, which confines itself more particularly to grasshoppers, becomes so fat that in many instances they are really unfit for the table. They take on rolls and rolls of it in a way beyond parallel, frequently becoming so heavy that it is difficult for them to take wing, and they will fall all over themselves, like a chubby infant just learning to walk in running away from you to avoid being forced to take wing. The fact is, that the Nebraska upland plover, after a three weeks' feed on our hay fields and pastures, becomes the fattest bird that flies.

No other bird compares with it in this respect. Sometimes, quite frequently at that, a plover shot in the air will burst open at the craw when it hits the earth.

The skin of the bird is extremely delicate and the really immense rolls of fat it takes on distends and stretches it to such an extent that it breaks open at divers places, even from a fall of 20 feet or less. The upland plover has an inordinate appetite and all through these long summer days does little else than stuff his hide from early morning until late in the gloaming.

On really hot days they resort to the thin shade of the goldenrod or ragweed, along about 1 o'clock, and indulge in a siesta for an hour or two, when they once more rise on their long slate-colored shanks, stretch their pointed wings and with a tur-wheet or two once more resume their quest for the festive and juicy grasshopper.

The upland plover, which is a sandpiper and not a plover at all, as I should have remarked at the outset, while a migratory bird is not nearly so much so as either the golden or ring-necked plover,

the latter of which is known here strictly as the killdeer. It nests very extensively in the Dakotas and often as far south as the first northern tier of counties in Nebraska, but rarely below this line. Its principal breeding grounds, notwithstanding, lie within the boundaries of the far north, the real cradle of all bird life.

With the burning days of July the old cocks begin to work gulfwads, leaving the cooling north at a time when the young birds first show strength of pinion, sufficient to carry them upon their long journey. In the old days, in this State, when there was no law upon the killing of prairie chicken, the upland plover was almost wholly unnoticed, and the gunners of a quarter of a century ago knew little about the bird compared with the knowledge that is possessed by the modern invader of our summer fields. Yet, in the old days, I have many a time known the chicken shooter, while crossing one of our broad pasture fields after an arduous hour or two after the grouse, who would halt to take a shot at one of the wisps of gray as it winnowed against the August sky above him, but as a general thing they permitted the little aerial prima donna to wing on its joyous way unmolested.

The most successful way of hunting this handsome sandpiper is from a light spring wagon. The pursuit of the fitting, elusive, and wary little beauty afoot is apt to become too laborious for ordinary endurance, as they are apt to lead you for miles and miles across country, just managing to flush and keep out of range of your heaviest loaded shells.

It is different in a wagon. You go out with one or two congenial fellows, with a driver who knows the country, and do your shooting from your seat, or when close enough you can jump out and secure the satisfaction of a better shot from your feet. About now these birds are to be found in large numbers on our open flat pastures and hay fields, as well as from those newly broken. I have seen these birds many a time out in Fillmore and Merrick counties, mingling with the black birds and grackles, following along behind the husbandman and garnering luscious banquets in the rich furrows left by the plow share. Still they greatly prefer the pasture lands, infested with grasshoppers, and where the scattered clumps of ragweed, mullin and goldenrod offer at least scant shade in the middle of the day, and where at night they squat at rest sheltered from the dew.

If your driver is up to snuff, when you discern the feeding birds on pasture lands or meadow, he will drive you toward them cat-a-cornered as if they had not been noticed, and intended to pass them by, but at the same time getting in as close as possible to the unsuspecting birds, and then if he has a good safe gun-proof team, you can, when you get within satisfactory range, take turns about shooting from your seats in the wagon, or if there are several birds feeding near each other, all jump to the ground and take a crack at the flushing birds together.

When the plover are plentiful the first fusillade of this kind often flushes every bird on the field, although many of them may be hundreds of yards apart and on such occasions, as each bird rises separately and takes his own individual course, the air is soon filled with aimlessly flying, plaintively tinkling pipers, and you get fine cross shooting by remaining stationary where you are. While the bird is wary and deliberate, he evinces little more sense or caution when roused from his feed with numbers of his companions than a young blue-wing teal, which is about as dumb and as big a dunce as any bird that flies. They will fly back and forth over the field from which you have jumped them before making up their minds to come down again or make off for other fields, until you often collect a fair bag without walking a dozen paces.

AT THE TRAPS.

The initial Post Series tournament of the Interstate Association started at Indianapolis, on the grounds of the Indianapolis Gun Club on Monday, October 11. There were 38 guns on the firing line. Weather conditions were almost ideal. While there were no remarkably big scores made the shooting under the conditions was excellent. The contestants started at No. 1 and No. 2 traps, 16 yards rise at 50 yard thrown targets, on the 18 yard mark at No. 3 trap and targets thrown 60 yards, at No. 4 trap the quota of blue rocks was 25 doubles.

Chauncey M. Powers of Decatur, Ill., was high gun for the day, 119 out of 125. Fred Gilbert broke 116 and W. Wetleaf connected with 115. The preliminary practice shoot started at 11 a. m. and was finished in an hour.

Secretary-manager Elmer E. Shaner, at 1 o'clock p. m. called up the eligible professionals and the big match was started. This race was open to the ten high professionals rated by the averages under the Interstate computation. Mrs. Ad Topperwein was the only one absent. A long trip over the Coast and through the northwest interfered with her taking part. Walter Huff, being next up took the vacant place.

Billy Heer opened the shoot. The men shot at 250 targets in ten sections of 25 each. Straights were not numerous. Rollo Heikes and C. G. Spencer each cracked out two, Fred Bills, Lester German, C. A. Young and Billy Crosby each scored one straight.

When the first 125 targets were shot off, the score stood, German 119, Heikes 116, Crosby 114. In the last 50 birds the leading quartette was: German, Crosby, Heer and Spencer. The final 25 targets found German and Spencer in the lead, the former

shooter came out three targets ahead and won the match.

The scores were as follows: Practice events No. 3 at 18 yards, 4, 25 doubles—

Dick Reed, looking none the worse for a long spell of illness, made his appearance on Sportsmen's Row last week and was heartily received by all the boys. Everybody was glad to see Dick out again and congratulated him on his recovery.

Clarence C. Nauman is at present, we are sorry to note, at Belmont and in the care of his physicians. Long hours and too close application to business brought about a breakdown that may necessitate a vacation trip of some duration to bring him back into condition again.

LADIES' KENNEL CLUB SHOW.

The two-day show of the Ladies' Kennel Club started at Dreamland Rink on Thursday. James Watson of Hackensack, N. J., judged all breeds. The show is under A. K. C. rules.

The full list of entries by breeds as published is the following:

Bloodhounds 5, St. Bernards 12, Great Danes 12, Russian Wolfhounds 5, Greyhounds 10, Foxhounds 5, English Setters 20, Irish Setters 8, Irish Water Spaniels 2, Cocker Spaniels 46, Dachshundes 10, Collies 79, German Sheep dogs 2, Poodles 2, Chow Chows 3, Dalmatians 2, Bulldogs 44, Airedales 24, Terriers 37, French Bulldogs 8, Boston Terriers 54, Fox Terriers 48, Irish Terriers 28, Scottish Terriers 5, Pomeranians 8, English Toy Spaniels 1, Japanese Spaniels 6, Pekinese Spaniels 6, Pugs 1, Toy Poodles 19, Yorkshire Terriers 4, Maltese Terriers 9, Toy Terriers 6, Chihuahuas 12, Miscellaneous 3, Champion Variety Class 4, Ladies' Variety Class 12, and Gentlemen's Variety Class 2.

TRADE NOTES.

Peters Points.

The trapshooting season on the Pacific Coast for 1910 just closed has been a remarkable demonstration of the uniform loading and reliability of Peters factory loaded shells as evidenced by the scores of Mr. H. E. Poston. In shooting at 16 yard targets at registered tournaments he broke 3849 out of 4040, or 95.27%; at 16 yard targets at all tournaments, 4488 out of 4720, or 95.09%, and at all 16 yard targets shot at during the season 9232 out of 9795, or 94.25%. It must be remembered that Mr. Poston does not use a special load, but his shooting is done with the regular machine loaded product such as may be secured from any dealer handling the Peters brand. Peters loads have won more high general averages on the Pacific Coast during 1910 than have all other makes combined. This fact speaks for itself, and the shooter's attention is called to the fact that the field loads bearing the Peters brand are of the same high quality.

DRAFT HORSES IN NEW YORK.

[Manhattan in Breeders Gazette]

Some seven or eight years ago a distinguished representative of the British government visited this country on a tour of investigation and observation. This being his first visit to America he saw many things to commend as well as to criticize. One of the first sights he witnessed which impressed him seriously, and which called forth his astonishment, was the comparatively small horses used for heavy trucking on the streets of New York City. Up to that period many of the horses used by those engaged in moving heavy load were from the American-bred trotting families, whose average weight was not far from 1200 pounds. The English investigator soon observed that such horses on the streets were slipping and sprawling in attempting to haul their heavy loads and often fell to the street. He expressed the belief that the main reason why they were not able to do their work satisfactorily was because they were altogether too light, and that if such horses were used as are used on the Liverpool docks, and whose average weight is nearly or quite 2000 pounds, much of the slipping, sprawling and falling would be obviated.

It is a coincidence worthy of note that soon after this official had indulged in this criticism a radical change was inaugurated in the character of horses engaged in moving heavy loads in this city. Whether this change was due to the advice he gave or whether it resulted as a natural sequence from the increased production of draft horses in the western States, or was partly due to both, is a problem I shall not undertake to solve. At all events, those familiar with New York street traffic observed that about that time the use of heavy horses began gradually to increase, and as time went on the

A year or more ago James Butler, who uses a large number of heavy trucks in operating his wholesale and retail grocery business, purchased in Ireland and imported some 50 or more mules for use in his business, and so far as known they have given entire satisfaction. These mules are full 16 hands and weigh 1200 pounds or more. Such mules as these are plentiful enough in this country, and can doubtless be purchased here at a much less cost than to import them, and the wonder is that more are not used in the heavy traffic of this city.

The Work Horse Parade and horse shows that had a most stimulating effect on the use of heavy horses on the streets of this city, and so far as now appears there is no reason to expect that their popularity will ever wane or the time ever come when they will not be the most eagerly sought of all the different types of horses that come to this market.

So great has been the demand and so poor the supply of the high-class heavy drafters that purchasers have not stopped to inquire anything about their breeding, and as a rule they do not seem to care to what family they belong, so long as they have the desired conformation, height, weight and muscular development to perform their required duties. As a matter of fact, the great majority of those seen upon the streets are one-half or three-quarters-bred Percherons. This probably results not so much from the fact that the other breeds would not be so popular as it does that Percherons were the first to be introduced into this market, and were so highly prized by those who used them that dealers as well as users of this class of horses seemed to have concluded that it would be an unwise policy to introduce some other breed. There have been scarcely any Shires or Belgians in this market, and comparatively few Clydesdales or mixed types

old trotters was 2:18, and stood to the credit of Sahle Wilkes, while Maud S. 2:08¾ still held the champion trotting record.

In 1888 Sunol lowered the three-year-old trotting record to 2:10½, and in 1889 Arion, then three years old, trotted to a record of 2:10½, hence at the close of 1889 the champion record for three-year-old trotters was held jointly by Sunol and Arion, but the world's champion trotting record was still 2:08¾, which was only one and three-fourths seconds faster than the champion record for three-year-old trotters. The champion record for four-year-old trotters at that time was only 2:16, and was held by Edgemark. The two-year-old champion record for trotters was then 2:10½ and credited to Arion. The world's champion trotting record at that time was only two seconds faster than the two-year-old trotting record.

The three-year-old records of Sunol 2:10½ and Arion 2:10½ were not lowered by a three-year-old trotter until 1893, when Fantasy, then three years old, trotted to a record of 2:08¾. The world's champion trotting record at the close of that season was 2:04, and was held by Nancy Hanks. This was four and three-fourths seconds faster than the three-year-old record of Fantasy.

At the close of 1907, the three-year-old trotting record had been lowered to 2:06¾. The world's champion trotting record was then the 1:58½ of Lou Dillon, but as she followed a runner pulling a cart, with a dirt shield attachment, her record cannot be placed on an equality with one made under the conditions of the 2:06¾ of General Watts. It would seem but fair under the circumstances to make an allowance in favor of General Watts, of two to three seconds. Placing it at the lesser figure, the actual difference between the records of Lou Dillon 1:58½ and General Watts 2:06¾ would be six and one-fourth seconds.

The world's champion record without a runner pulling a cart with a dirt shield attachment in front was lowered the past season by Uhlman to 1:58¾, but his name cannot appear in the table of champions, because he did not beat the 1:58½ of Lou Dillon, made under the condition already named. Comparing the champion three-year-old trotting record 2:04¾ of Colorado E. with the 1:58¾ of Uhlman, it will be seen that the latter is just six seconds faster than the present three-year-old trotting record. The difference now between the world's champion record for three-year-old trotters is four and three-fourths seconds greater than it was twenty-one years ago. Judging by this it is liable to be some time before the world's champion trotting record will be held by a three-year-old colt or filly.—American Horse Breeder.

THE PLUNGER 2:08½.

The 2:13 trot at Lexington, on the 11th inst., required four heats to decide the winner. The first heat was won by Major Wellington in 2:08¾, but first money went to The Plunger, that took the next three heats in 2:08½, 2:10, 2:09¾. The Plunger is a bay colt, bred by J. L. Brown, Winchester, Ky., foaled in 1906, and got by The Bondsman 37641, sire of Colorado E. 3:20½ and Creighton 2:09¾, both of which are new additions to the 2:10 trotting list this season. The Bondsman 37641 was by Baron Wilkes 2:18 and his dam was the great brood mare, Sorrento (dam of Jay Hawker 2:14¾, etc.).

The dam of The Plunger 2:08½ was Mary C., by Wilton 2:19¾. The latter was by George Wilkes 2:22, and his dam was the great brood mare, Alley (dam of Albert France 2:20¾, etc.), by Hambletonian 10; second dam, Lady Griswold, by Adams' Flying Morgan, a son of the Hackett horse, by Gifford Morgan, and he by Woodbury Morgan, a son of the original Justin Morgan. The Plunger's second dam was Mary Brown, by Egbert 1:36. The latter was by Hambletonian 10; dam, Camptown, by Messenger Duroc 106, a son of Hambletonian 10; second dam, Miss McCloud, by Holbert Colt, a son of Hambletonian 10; third dam, by Utter Horse, a son of Hoyt's Comet, whose sire was Bishop's Hambletonian and whose dam was by a son of Sir Duroc, he by Duroc, a thoroughbred son of imported Diomed.

The fourth dam of Egbert was Virgo, by Roe's Abdallah Chief, whose sire was Abdallah 1, and whose dam was by a son of the thoroughbred Duroc.

The third dam of The Plunger was Annie Brown, by Ashland Chief 751. The latter was by Mambrino Chief 11, and his dam was a thoroughbred daughter of imported Yorkshire. The fourth dam of The Plunger was Mrs. Cluke (dam of Black Cloud 2:17¾, by Pilot Walker, whose sire was Captain Walker and whose dam was the noted pacer, Canadian Pilot, sire of Pilot Jr. 12. Captain Walker was by a Canadian pacer of unknown breeding, but his dam was by the thoroughbred, Blackburn's Whip, and his second dam by Sumpter, a thoroughbred son of Sir Archy.

—American Horse Breeder.

Of Value to Horsemen.—Do you turn your horses out for the winter? If so, we want to call your attention to a very important matter. Horses which have been used steadily at work, either on the farm or road, have quite likely had some strains whereby lameness or enlargements have been caused. Or perhaps new life is needed to be infused into their legs. Gambault's Caustic Balsam applied as per directions, just as you are turning the horse out, will be of great benefit; and this is the time when it can be used very successfully. One great advantage in using this remedy is that after it is applied it needs no care or attention, but does its work well and at a time when the horse is having a rest. Of course it can be used with equal benefit on horses and in the stable, but many people in turning their horses out would use Caustic Balsam if they were reminded of it, and this article is given as a reminder.

GUY VERNON

The green pacer by Guy McKinney that has paced three miles below 2:07 in public this year.

comparatively small sized teams gradually disappeared, until finally they became so scarce as to be a rarity. Among the first to realize the importance of drafters for use in their delivery traffic were the great brewery concerns, which employ several thousand horses in hauling their products. These concerns have always used the heaviest horses to be had in the market, and of late years their teams have been made up of horses weighing nearly 2000 pounds each. Among the other concerns employing the heaviest horses obtainable are the coal companies and building and construction contractors. Some of these still use horses entirely too light to haul the loads placed behind them, which often results in such apparent cruelties as to cause kind-hearted and sympathetic citizens to appeal to the Society for the Prevention of Cruelty to Animals to protect the over-loaded horses.

The large drafters used on the New York streets, however, do not constitute the only means employed in heavy trucking. When the automobile loomed into prominence a few years ago a number of the brewing companies as well as some of the largest coal companies, conceived the notion that motor-power vehicles would be more satisfactory for their use than horsepower, and they retired a large percentage of their horses and substituted motor trucks. But it did not take long for them to discover that the cost of maintaining their newfangled method of locomotion was greater than with horses, and the uncertainty as to whether the motor-propelled vehicles would reach their destination without mishaps was too great to warrant the experiment, and most of those who had made the change returned to the use of horses. Still there are quite a number of heavy trucks equipped with motor-power, and now used by certain of the brewers as well as some of the coal companies and others engaged in heavy trucking.

of these draft breeds, but there is no apparent reason why they should not be just as serviceable and just as popular as their better known rivals.

THE CHAMPION TROTTING RECORD.

The wonderful performance of Colorado E in lowering the world's champion record for three-year-old trotters to 2:04¾ has led some thoughtful horsemen to believe that at some time in the future when the limit of trotting speed may have been reached the trotter that accomplishes the feat will be a three-year-old. Many believe that it is impossible for a trotter at that age to attain his or her full measure of speed capacity. Some of them base their judgment upon the speed shown by thoroughbred three-year-old racers as compared with the speed of aged thoroughbred race horses.

Wonderful as was the performance of Colorado E. in lowering the champion record for trotters from 2:06¾ to 2:04¾, the past season, there has been at least one champion three-year-old trotter in the past whose record, when made, more nearly approached the world's trotting record at that date, than does that of Colorado E. 2:04¾, the record of Uhlman 1:58¾. A comparison of the world's champion records for three-year-old trotters with the close of each season for the past twenty-five years may be interesting to students of the trotting breeding problem.

At the close of the season of 1885 the champion record for three-year-old trotters was 2:19½, and was held jointly by Hinda Rose, and Patron. The world's champion trotting record then was 2:08¾, held by Maud S. The world's champion trotting record at that time was 10¾ seconds faster than the world's champion record for three-year-old trotters. At the close of 1887, the record for three-year-

THE FARM

HOG CHOLERA AND SERUM TREATMENT

In order to learn something regarding the serum treatment in the prevention of hog cholera the United States Department of Animal Industry, in co-operation with the Union Stock Yards of South Omaha, conducted a very extensive experiment. This experiment was performed in order to learn the value of the serum treatment in preventing hog cholera.

It was desired to hold the experiment at a place which would give the swine breeders and farmers the best opportunity to observe its progress. By reason of being a large market point, frequented by farmers and feeders from all parts of the State, the stock yards at South Omaha offered the most practical location for the test. When the proposition was submitted to the management of the Union Stock Yards Company they readily assented, saying that whatever operated to advance the interests of the Nebraska stock growers the Stock Yards Company felt it should support. They not only offered to provide the necessary facilities to make the experiment, but agreed to furnish the animals, under direction of representatives of the federal government, and the feed and labor required until the test would be concluded. Arrangements were accordingly perfected for the test to begin in July, 1910, under the direct supervision of Dr. W. D. Niles, who is in

charge of the Government Experiment station at Ames, Iowa.

Thirty Chester White shoats, weighing forty to fifty pounds, were purchased by the Stock Yards Company from Mr. Jacob Armbrust at his farm west of Omaha, after having been selected by government representatives with especial care to see that there had been no recent cases of cholera in the herd. Mr. Armbrust stated there had been no cholera among his hogs during the past three years.

July 23d four of these shoats were brought to the stock yards, where they were placed in an isolated pen and inoculated with blood drawn from a hog which was known to be sick from cholera. Post mortem examination revealed lesions of the disease in the animal. The four shoats after inoculation were marked by placing a ring through the left ear of each and then placed in a pen together.

On July 28th, when two of the four inoculated animals showed, by rising temperature and other unmistakable symptoms, that they were clearly stricken with cholera, the remaining twenty-six pigs were brought in from Mr. Armbrust's farm. Eight of these were tagged by rings in their right ears and without treatment or inoculation of any kind were released in the enclosure with the original four infected ones. The balance of the animals, eighteen in number, were treated with the protective serum and immediately turned into the pen with the four infected shoats and the eight which were unprotected to await the development of the disease.

The serum was administered to the eighteen shoats by Dr. Niles, assisted by Dr. H. J. Shore of the Bureau of Animal Industry at Washington, and the operation was witnessed by the

following: Mr. G. W. Hervey, editor Twentieth Century Farmer, Omaha; Mr. A. C. Davenport, general manager Journal-Stockman, South Omaha; Mr. F. C. Crocker, president of the Nebraska Swine Breeders' Association, Filley, Neb.; Dr. J. H. Gain of the Experiment Station at Lincoln, Neb.; Drs. W. N. Neal and A. W. Miller of the Bureau of Animal Industry, stationed at South Omaha.

It might be interesting right here to explain the methods pursued by Dr. Niles in administering the serum to these eighteen animals. The animals were caught by assistants, great care being taken not to injure them in any way. Being light in weight the animal was held by grasping it by the hind legs, allowing the head to swing downward, with belly outward. The temperature of the animal was taken as proof that at the beginning of the test it was in normal health, after which an antiseptic wash was quickly applied to the inner sides of the thighs to minimize possibility of blood poisoning from the use of the hypodermic needle. Dr. Niles then hypodermically injected into the inner sides of the thighs twenty cubic centimeters of the immunizing serum. Each of the eighteen shoats was treated in this manner and the entire operation was quickly and easily done.

In the course of a few days all of the four shoats inoculated with the disease producing blood were displaying more or less clearly symptoms of the disease.

During the night of August 7th two of these original four infected pigs died. An autopsy disclosed very prominently the usual lesions of subacute hog cholera, to wit: marked reddening of the skin over the ears, abdomen and thighs; pneumatic areas

in lungs; enlarged and dark spleen; hemorrhagic kidneys and ulcers in large intestine.

On the morning of August 15th another of the inoculated pigs was found dead and post mortem examination in this instance revealed typical lesions of cholera.

August 16th the fourth and last of the originally infected animals ex-

Warranted
to give satisfaction.

GOMBULT'S CAUSTIC BALSAM

A safe, speedy and
positive cure for

Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is Warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

Pacific Breeders Futurity Stakes No. 11

To be given by the

Pacific Coast Trotting Horse Breeders Association

For Foals of Mares Covered in 1910 to Trot and Pace at Two and Three Years Old.

Entries to close Thursday, Dec. 1, '10

\$4250 for Trotting Foals. \$1750 for Pacing Foals.

\$800 to Nominators of Dams of Winners, \$450 to Owners of Stallions.

MONEY DIVIDED AS FOLLOWS:

\$3000 for Three-Year-Old Trotters.

200 for Nominator on whose Entry is Named the Dam of Winner of Three-Year-Old Trot.

1250 for Two-Year-Old Trotters.

200 for Nominator on whose Entry is Named the Dam of Winner of Two-Year-Old Trot.

100 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot when Mare was bred.

\$1000 for Three-Year-Old Pacers.

200 for Nominator on whose Entry is Named the Dam of Winner of Three-Year-Old Pace.

750 for Two-Year-Old Pacers.

200 for Nominator on whose Entry is Named the Dam of Winner of Two-Year-Old Pace.

100 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when Mare was bred.

SIX SPECIAL CASH PRIZES FOR STALLION OWNERS.

Given to Owners of Stallions standing highest in number of Mares nominated in this Stake that were bred to their respective horses, divided as follows:

1st Prize, \$100.

2nd Prize, \$50.

3rd Prize, \$35.

4th Prize, \$25.

5th Prize, \$20.

6th Prize, \$20.

The Above Prizes will be Paid on December 24, 1910.

ENTRANCE AND PAYMENTS—\$2 to nominate mare on December 1, 1910, when name, color, description of mare and stallion bred to must be given; \$5 May 1, 1911; \$5 October 1, 1911; \$10 on Yearlings, May 1, 1912; \$10 on Two-Year-Olds, January 2, 1913; \$10 on Three-Year-Olds, January 2, 1914.

STARTING PAYMENTS—\$25 to start in the Two-Year-Old Pace; \$35 to start in the Two-Year-Old Trot; \$35 to start in the Three-Year-Old Pace; \$50 to start in the Three-Year-Old Trot. All Starting Payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer. Colts that start at two years old are not barred from starting again in the three-year-old divisions.

For entry blanks and further particulars, address the Secretary.

CONDITIONS:

The races for Two-Year-Olds will be mile heats, 2-in-3, and for Three-Year-Olds, 3-in-5. Distance for Two-Year-Olds, 150 yards; for Three-Year-Olds, 100 yards. If a mare proves barren or slips or has a dead foal or twins, or if either the mare or foal dies before May 1, 1912, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1910.

Entries must be accompanied by the entrance fee. Nominators liable only for amounts paid in. Failure to make any payment forfeits all previous payments. This Association is liable for \$7,250, the amount of the guarantee, only. Hoppies will be barred in trotting and pacing divisions.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

Money divided in each division of the Stake 50, 25, 15 and 10 per cent. There will be no more moneys in each division than there are starters.

Entries open to the world. Membership not required to enter; but no horse, wherever owned, will be allowed to start until the owner has become a member.

WRITE FOR ENTRY BLANKS TO

366 PACIFIC BUILDING, SAN FRANCISCO, CAL.

SPECIAL PREMIUM TO NOMINATORS.

In connection with the Pacific Breeders Futurity Stake No. 11—\$7,250 Guaranteed—the BREEDER AND SPORTSMAN will be sent for one year to every nominator who sends \$2 in addition to his entry fee. If you are getting the paper send the \$2, and the time of expiration of your subscription will be extended one year. This is your chance to SAVE A DOLLAR.

DURING THE SEASON OF 1910 THE SUPERIORITY OF

Peters Factory Loaded Shells

Was Demonstrated by the Scores of MR. H. E. POSTON as Follows:

9232 x 9795,	ALL 16 YARD TARGETS	94.25	per cent
4488 x 4720,	ALL 16 YARD TOURNAMENT TARGETS	95.09	per cent
3849 x 4040,	ALL 16 YARD REGISTERED TOURNAMENT TARGETS	95.27	per cent

PETERS FACTORY LOADS won more HIGH GENERAL AVERAGES on the Pacific Coast during 1910 than have all other makes combined. PETERS Field Loads are of the same High Quality.

THE PETERS CARTRIDGE COMPANY, CINCINNATI, O.

New York: 98 Chambers St., T. H. Keller, Mgr.
San Francisco: 608-612 Howard St., J. S. French, Mgr.
New Orleans: 321 Magazine St., P. R. Litzke, Mgr.

pired, showing convincing proof of the disease.

Before the last of the four inoculated shoats succumbed the entire eight unprotected animals were sickening and showing positive signs of the development of the infection from the four which were inoculated with the cholera producing blood. This served to demonstrate the thoroughness of the exposure to the disease which the eighteen treated pigs were receiving through mingling constantly with their sick companions. However, the treated eighteen continued to thrive without any apparent interruption to their natural development and ate normally.

August 17th two of the unprotected eight were dead. Autopsy simply confirmed conclusions in the former cases, organs showing similar traces of cholera in both animals.

August 18th one of the remaining six unprotected pigs which was desperately sick was stolen during the night.

In the morning of August 19th another was missing. Both of these animals were helplessly afflicted on the days they disappeared and manifested in the most positive form the usual symptoms of big cholera. A night watchman was stationed at the pen from this time on to prevent further interference with the experiment.

August 22d another of the sick pigs died. In this animal the lesions were most marked, the heart, lungs and kidneys being thickly sprinkled with minute hemorrhages, while the large intestine contained typical, hut-ton-like ulcers. On this day photographs were made of the three remaining unprotected pigs and of the eighteen which were immunized.

August 25th the sixth of the unprotected animals gave up the test. A post mortem examination showed unmistakable cholera lesions.

The seventh one of the unprotected pigs died during the night of August 28th and the post mortem showed the usual cholera lesions. The hutton ulcers on the inner lining of the large intestine were especially well developed in this specimen being the largest and most completely formed of any found so far.

The eighth of the unprotected pigs, though having shown cholera symptoms for about two weeks, seems somewhat improved at this time and it is likely will entirely recover.

Summarizing the test the results were as follows:

The four animals inoculated with the disease producing blood died and post mortem examinations showed satisfactory evidence of cholera in each instance.

The eight animals which were neither inoculated with the cholera blood nor treated with the immunizing serum, but simply exposed to the infection by being allowed to mingle with the four which were given cholera, all died in the proper course of time, excepting three, two of which were stolen and which is still sick and may recover. Autopsies in these cases revealed clearly the traces of hog cholera.

The eighteen animals to which the immunizing serum was administered on July 28th are, at this writing, in an apparently healthy and normal condition, having made satisfactory growth during the progress of the experiment.

The object of the demonstration was to illustrate beyond question the efficacy of the serum treatment of hog cholera and it has been most successfully achieved. It simply shows that the serum treatment properly administered will make it possible for the farmer to protect his swine herd against cholera outbreaks in his neighborhood or even on his own place.

Once established as successful the serum treatment should be made available to the farmers and breeders in the State. Some means would need to be devised for the manufacture of serum in sufficient quantities to make ample distribution of it possible at a low cost. Those connected with the State Experiment Station at Lincoln and leading swine breeders in the State are now working with this end in view. Iowa and Missouri and some of the other States have made provision along this line in the interest of swine raisers.

SHEEP NOTES.

It is all right to feed roughage to sheep on the ground, but as a rack can be so easily and cheaply constructed, it is much better to feed from them.

Many farmers say they do not raise sheep because they are more subject to disease than other animals. Not so. More sheep die from damp, filthy quarters, exposure to rain and snow, and from being kept on low lands, than from disease.

Every sheep owner who discovers a stray dog on his place, should not hesitate to fill him full of buckshot. He is a trespasser and the law will not touch a man who kills him.

During the past two or three years Japan has sent some of its expert stock-growers to America, to learn how to raise sheep and it is understood that sheep-raising will be extensively engaged in over there.

No use to try to raise sheep on wet or boggy land. High rolling ground, that is not valuable for agriculture, can be made to pay handsomely by putting sheep on it.

It is a common rule to start lambs on one-fourth of a pound of grain each daily increasing the amount one-fourth of a pound each succeeding week. At this rate they will be consuming one pound each during the fourth week. This is taking it for granted that it is desired to get such lambs ready for market as soon as possible. After one pound daily has been reached further increase should be more gradual. A feed of one and one-half pounds of grain daily at the end of seven weeks would be sufficient to insure large gains and a comparatively short feeding period. If alfalfa, hay or other roughness is comparatively cheap and it seems expedient to make more mutton from such feed and less from grain, the fattening may go on more slowly, postponing the time of market-

Enosburg Falls, Vt.

ing accordingly. The grain ration could then start with one-eighth of a pound daily, instead of one-fourth, until at the end of seven weeks each lamb is receiving one pound a day. The grain ration could be limited to this amount, which would insure a larger consumption of roughness and correspondingly less grain. With such a system the lambs would be marketable some time during the months of March or April, when prices are usually good.

Down in Texas there was imported about 60 head of sacred cattle from India. This was in 1906 and the beef breed progeny of these cattle are now said to number about 2,500 head and to be very popular. They are immune from Texas fever and the bump is bred off and these facts, together with their rustling ability, have given them a permanent place in southern Texas.

H. L. MURPHY, Perkins, Sacramento Co., Cal. Berkshire swine and Shorthorn cattle.

H. B. WINTRICHAM, Middletown, Lake Co., Cal. Breeder of Tamworth swine.

WANTED—A good looking, sound, well-broken, saddle horse that single foots. Address full description and lowest cash price to "M," care of Breeder and Sportsman.

LEARN WIRELESS & R. R. TELEGRAPHY—Shortage of fully 10,000 operators on account of 8-hour law and extensive "wireless" developments. We operate under direct supervision of Telegraph Officials and positively place all students, when qualified. Write for catalog. National Telegraph Inst., Cincinnati, Philadelphia, Memphis, Davenport, La., Columbia, S. C., Portland, Ore.

FOR SALE—Hiawatha, dark bay mare, 6 years old, 15 1/2 hands high; will weigh about 140 lbs. Sired by Baron Bretto 39103, a son of Silver Bow; dam Silver Bells by Silver King 3622; second dam Only Hope by Hark, son of Brigadier. This mare is in foal by a son of Clarence Wilkes. Hiawatha is sound in every way, perfectly gentle to drive and handle and is a good roadster. She has had no work since a 2-year-old but at that time could step a mile in 2:58. Price \$225.

Anona L., a full sister to Hiawatha, 5 years old, weight 1100 lbs., is a light bay mare very stylish and handsome. Is city broke and very gentle to drive, afraid of nothing. She has had a limited amount of work but has shown a mile in 2:20 1/2, a half in 1:08 1/2 and quarters in 33 seconds. Price \$500.

Red Devil, bay stallion, 5 years old, 15 1/2 hands high, kind and gentle, suitable for anyone to drive, fears nothing. Sired by Baron Bretto 39103; dam Jeanette by Ottawa; 2nd dam by Snuff Box. A 2-year-old filly sired by this horse won the colt race at Marysville, July 14th. Price \$300. For further particulars address F. W. Kelley, Breeder and Sportsman, San Francisco.

LAND 30 CENTS AN ACRE.

Robert B. Buchanan, an Englishman, and fiscal agent for a Franco-German syndicate of capitalists, centered in Berlin and Paris, is now in Mexico City for the purpose of consummating the largest land transaction ever recorded. He is buying grazing and timber land in the Mexican republic to the value of \$200,000,000 gold, and will buy more later on. Mr. Buchanan is buying everything that comes to his notice, large or small, and in some instances at fancy prices in order to insure contiguity.

Outside of land acquired by conquest, cession or international agreement, there is no other instance in which so large a tract has ever changed ownership. Some of the land bought sold at as little as 30 cents per acre.

Mr. Buchanan, in a newspaper advertisement, is authority for the statement that he wishes to acquire the land for the purpose of controlling the export cattle trade of Mexico, Central America and Brazil. Whether he intends to buy land to the same extent in the other countries mentioned is not known.

The soil is the most important source of wealth to both the State and the nation. Upon its continued productiveness will depend, in a very large measure, the future welfare of the people. If fertility is maintained the future generations will prosper. If it is not maintained disaster results. Present methods are far from perfect and only serve to deplete the soil in too many instances. As an extreme illustration it is stated that the farmers in the great wheat region of Canada only expect to secure from 12 to 15 crops from their land and then abandon it. A Kansas man who spent some time in that region during the last growing season stated that very many of the fields he visited contained more weeds than wheat.

DAIRY NOTES.

The milker should wear a clean outer garment, used only when milking, and kept in a clean place at other times.

Know the qualities of your cows by their general makeup, and then test and weigh her milk. Do not keep a cow that is not paying her way.

Never allow the cows to be excited by hard driving, abuse, loud talking or unnecessary disturbance; do not expose them to cold or storms.

Do not change the feed suddenly. Feed liberally and use only fresh, palatable feedstuffs; in no case should

decomposed or mouldy material be used.

Salt should always be accessible.

Provide water in abundance, easy of access and always pure, fresh, but not too cold.

Clean the entire body of the cow daily. If hair in the region of the udder is not easily kept clean it should be clipped.

Excessive feeding of beet tops to dairy cows certainly has an effect on the body of butter. The texture is short and brittle and the butter becomes harder than normal. The effect is somewhat like that of continually feeding cottonseed meal to dairy cows. The season for feeding beet tops is short however and as a rule the effect is not sufficient to cause much trouble. The defect can be overcome by adding a small quantity of oil meal or larger amounts of corn meal to the ration. This will have a tendency to change the composition of the butterfat so that it will be more like normal than when beet tops are fed exclusively. In addition to this change in the feed, the butter-maker can overcome some of the objectionable texture by washing the butter in a rather warm water and working it at least twenty-five per cent more than is customary when the fat is in its normal condition. The surest and most satisfactory way of overcoming the trouble, is to reduce the amount of beet tops fed to the cows and add some corn meal to the ration.

THE RAISING OF FOOD

STOCK PROFITABLE.

For the man that owns his own ranch there seems to be at the present time no more profitable paying part of the ranch income than the raising of cattle and hogs for the market. Prices are good, and in fact, never known to be better; the ready demand far exceeds the supply and offers nothing but favorable conditions and big and sure returns to the raiser. Hogs properly fed and cared for are within a few months from the time of birth ready for market and calves from one to three years old are in condition. Of course, as a rule, calves kept until they are three years old and fat bring the owner a larger profit than if marketed before maturity or when two years old. Beef at the present time is retailing at from 12 to 25 cents per pound and the best Eastern bacon at 30 and 35 cents per pound; fresh pork at from 15 to 25 cents per pound; mutton is also retailing at a good price—12½ to 25 cents per pound. This is proof in figures and plainly show that there is a profitable income in the raising of sheep to the farmer that is in a position to range them as well as cattle and hogs; but not all farmers being fixed for the raising of sheep, we appeal more strongly to the raising of beef cattle and hogs for profit to the farmer, one and all, as a farm without a small bunch of cattle and a few growing shouldlets at least to dot the field and give life to the barn yard, could hardly be classed a farm complete.

Now, with beef and pork wholesaling at from 8 to 12 cents per pound, it seems that there should be no scarcity whatever of material for there is surely money in it for the raiser of food stock. We advise more thrifty growth in the enlarging of herds and more extensive breeding of swine, both for the good of the raiser and consumer as well.

In a recent suit by the government against a railroad for cutting timber on government land the jury awarded damages both for the timber that had been cut and used and for the destruction of young timber growth. This is the first time in any legal action brought by the government that a jury has recognized the "expectation value" of young timber growth.

Not only for your own satisfaction but for your profit as well

you should have tabulated pedigrees of your horses. If you want to sell them the pedigrees will help you to make the sale and get you a better price.

We will trace the breeding and send you a tabulated type written pedigree showing the records of the produce of the sires and dams represented and make it up to date, handsomely executed in two colors suitable for framing, for \$3. It is more than worth the money.

Every Horse Should Be Clipped in Season

It is the wise thing to do for the clipped horse not only is easier to clean and looks better, but clipping does much to make him immune from coughs, colds and the usual ills that come to a horse from standing in a coat of long, wet hair after any hard exertion. The perspiration evaporates quickly from the clipped animal and leaves him dry. On cold days a blanket when he stands keeps him comfortable.

The Best Clipping Machine the World has ever Seen is the Stewart Ball Bearing Enclosed Gear Machine

It is the easiest turning, fastest clipping and most enduring of all machines. The materials in it are all of better quality, the workmanship is superior. All file hard cut steel gears, protected from dust and dirt and running constantly in oil. It couldn't be better for twice the money.

THE COLT STAKES have kept the interest in breeding alive and done more to improve the breed of trotting and pacing horses than anything else. If it were not for the futurities and other stakes for colts few horses would be trained at all until they were matured, and the majority of them would be used as roadsters or pulling delivery wagons instead of learning to step at racing speed. It therefore behooves every person owning a stallion or mares of the trotting breed that are kept for breeding purposes, to not only patronize the stakes themselves but to do a little missionary work and induce their friends and patrons to patronize them. On the 1st day of next month nominations for the tenth renewal of the Pacific Breeders' Futurity will close. This stake was inaugurated in 1900 and has been the principal feature of every season's harness racing in California ever since. Stakes Nos. 1, 2, 3, and 4 were for \$6000 each, stakes Nos. 4, 5, 6 and 7 had a value of \$7000 each, and stake No. 8 was raised to \$7250, which amount has since been the value of the stake every year. Stake No. 11 retains the value of \$7250 which its three immediate predecessors had. There has already been distributed among the breeders of the Pacific Coast by means of these stakes more than \$60,000 in cash, and the list of nominations each year shows that the stake continues to hold the popularity with which it was received from the first. Every owner of a trotting or pacing stallion and every owner of a mare that was mated with one of them should be a booster for Stake No. 11 which will close December 1st. There is every probability that the State of California will again bestow aid to the agricultural societies and that many county fairs will be given next year. A revival of these fairs will mean an increased interest in the breeding of fine horses and those who raise colts that have the speed to win stakes will find it easy to sell them at large prices if the colts are well engaged.

THE PROMOTERS of continuous racing are beginning to realize that they have overdone the thing. In a recent interview held by the representative of a Baltimore paper with Geo. Rose, one of the heaviest bookmaking operators on California tracks, and a large owner of stock in the Arcadia track at Los Angeles, Mr. Rose is reported to have said:

"You may get away with a 100 day meeting at Norfolk and make a whole lot of money. But, ultimately, the very people who want to see you succeed would turn against you, and before you realized what was what Virginia would shut down on the thoroughbred. "I know whereof I speak. We overdid racing in California. If we had been content to have two meetings at Los Angeles, one in December and one in March, the slates would be up in California today. Our 100 and 120 days of racing was our undoing. We were making money so swiftly and so easily we lost our heads and failed to see that we were offending people who had been with us first, and who had striven hard to boost our game along."

"I do not think there is any room for doubt that we will ultimately get racing back at Los Angeles. And when we do we will have short meetings. If we decide that it will be better to have one moderately long meeting rather than two short ones, our long session will not extend beyond thirty days."

There is no doubt but Mr. Rose is correct in his statement that long meetings have been the undoing of racing in California. Had Mr. Rose's plan of two short meetings, or one of not over 30 days, prevailed here, the people of the State would not have demanded a law prohibiting betting on races. It is true that a means of evading the law has been found by the Emeryville association, that seems to be backed by a decision of the Supreme Court, but there are few lawyers who believe that the system of betting which now prevails is not a clear vio-

lation of the law, and will be so declared whenever those carrying it on are fairly tried on a properly drawn complaint. It is said that the reason racing will not be held at Arcadia this winter is because the district attorney of Los Angeles county has threatened every bookmaker who does business there with arrest, even though the Emeryville plan is strictly followed, and realizing that convictions will follow their arrest, the bookmakers do not want to take a chance in Los Angeles.

MANY were the expressions of sorrow and sympathy heard at the Chase sale last Monday evening, where more than a thousand horsemen from all sections of the State were gathered, when they learned that it was the severe illness of Mr. Frank Burke that has caused so many of that gentleman's horses to be sold at auction and that he will retire from racing. For more than twenty years the horses of La Siesta Farm have been raced on California tracks and Mr. Burke has sent many good runners as well as trotters and pacers to the races. La Siesta horses were always out to win and Mr. Burke has expended many dollars in the purchase of horses and breeding and training. His retirement from the turf is sincerely regretted by every one and is a great loss to the sport on this coast. As the head of the firm of Madison & Burke in this city, Mr. Burke has many large financial interests, but his beautiful La Siesta Farm near San Jose has always been his greatest pride and he and his devoted wife have taken much pleasure in watching the development there of fine bred stock of all kinds. It is sincerely hoped that Mr. Burke's health will improve steadily and that his days may be much longer at beautiful La Siesta.

MR. E. D. DUDLEY, the Dixon farmer and stock breeder, is the first person to make a nomination in Pacific Breeders' Futurity No. 11 which closes for nominations of mares on the first day of December. Mr. Dudley has named five mares two of which were bred this year to his pacing stake winner McFadyen 2:11½ by Diablo, and three to Palite, sire of Pal (2) 2:17½, winner of two races as a two-year-old, of third money in the Breeders' Futurity, third money in the California Breeders' stake, and third money in the Stanford stake as a three-year-old this year. Pal is a high class colt, but had the misfortune to meet the coast champion three-year-olds Bon Guy 2:11½, Donasham 2:13¼ and Strathboule 2:13½ in his races this season. Mr. Dudley has bred some of the handsomest colts ever sent to the races, and his stake winner of 1904, Friskarina 2:13¼ is now used by Mrs. Dudley for her own driving and is one of the most beautiful animals in northern Solano.

The horses bought by Andrew Robertson, of Alendale Farm, Melbourne, Australia, while in Kentucky this summer, will be shipped from Montreal to Australia, via Cape Town. There are twenty head of trotters in Mr. Robertson's consignment, their breeding being as follows:

Lilly Herr, b. m., (7) by Charley Herr 2:07, dam Mary Cahill, by Dark Night.

Jennie Bird, b. m. (8) by Jay Bird, dam Jennie Hulse 2:27½ (dam of Gail Hamilton 2:06¾) by Baron Wilkes 2:18.

Demoko, b. c. (1) by Moko, dam Demaras, by Bourbon Wilkes.

Marion 2:16¼, b. m. (8) by Charleston 2:12¼, dam by Yataghan.

Jay Breaker, br. c. (4) by Jay Bird, dam Blanche Lupkin, by Nutbreaker 2:24½.

Orbelet (half brother to Centrifig, p. 2:09), bl. c. (2) by Ormonde 2:08¾, dam Belles Lettres, by Bell Boy 2:19¼.

CHASE'S SECOND FALL SALE.

A crowd that filled the big pavilion of Fred H. Chase & Co. at 478 Valencia street was in attendance at this firm's second fall combination sale last Monday evening. Something over forty head of driving, matinee, business and saddle horses were catalogued and with one or two exceptions all were sold. None of the horses sold were claimed to be racing prospects but several of them will probably be driven in matinee races by their new owners. After the catalogued horses were sold a number of heavy draft horses were offered and brought fair prices. The horses catalogued and sold were the following:

Consignment of F. H. Burke.

Mogolore 2:21¼, b. g. 1904 by Iran Alto, dam Lady Belle Isle by Eros; C. W. Paine.....\$300
Siesta 2:22¼, b. g. 1905, by Iran Alto, dam Wanda 2:14¼ by Eros; W. Higginbottom.....\$210
Laddie G., (mat.) 2:16¼, 1903, blk. g. by Zombro, dam by Whips; Dexter Prince Stables.....\$230
Lord Isle, br. s. 1907, by Zolock, dam Lady Belle Isle, by Eros; S. H. Cowell.....\$185
Sis Hopkins, br. m. 1904, by Willeroo, dam by Eros; R. A. Callaban.....\$265
Pair gray draft mares, 2800 pounds; Bogard Draying Company.....\$396
Saddle horse, brown gelding.....\$120

Consignment of H. Busing.

Madison McKinney, blk. g. 1907, by Bonny McKinney, dam Amazonian by Jas. Madison; J. M. Kline.....\$290
Honey Boy, ch. g. 1906, by Demonio, dam Sister by Nutwood Wilkes; B. O. Lewis.....\$200

Consignment of H. Struve.

Senator H., b. g. 1905, by Diablo, dam by Montana Wilkes; W. Malone.....\$180
Lou W., b. f. 1907, by Kinney Lou, dam Electress Wilkes by Nutwood Wilkes; Sam Norris.....\$175

Miscellaneous Consignments.

Lady Irene, b. m. 1902, by Athadean, dam by Milton R.; E. C. Snell.....\$175
Hazel Mac, br. m. 1907, by Milbrae, dam by Geo. W. Archer; E. C. Snell.....\$125

Carmel, b. m. 1897, by Prince Airlie, dam by Del Sur; H. Olsen.....\$105
Bay gelding, 1902, saddle pony; H. Boyle.....\$65

Wilson Harrison, the 17-year-old son of the popular hotel man, C. A. Harrison, of Seattle, spent a few hours in San Francisco Monday. He was making a steamer trip from Seattle to San Diego and took time while the steamer was discharging and loading freight here to run up to the B. and S. office and look over all the late horse papers. Wilson has just recovered from typhoid fever which confined him to his bed for eight weeks, but is on the road to robust health again. Like his sire he is greatly interested in light harness horses. He tells use that his father's mare Nique by Joe Patchen, after getting a record of 2:13¼ in a race this year, stepped a mile in 2:10¼ in a heat she failed to win. She is now at the Woodland Stock Farm and will be bred to Prince Ansel in the spring. North Star Pointer, which horse Wilson claims as his own, has been gelded and is a much improved horse. Wilson will spend a few weeks at Mr. Geo. W. Ford's farm at Santa Ana, and will winter in Los Angeles.

Drink Jackson's Napa Soda.

IN THE BLUE GRASS.

Mr. Frank J. Kilpatrick Writes of a Visit to the Famous Patchen Wilkes Farm and the Lexington "Trots."

My Dear Breeder and Sportsman:—On Oct. 1st we were "off to Lexington" via the 4:55 express on the C. & O. The train might properly have been called the "Lexington special," for 80 per cent of those aboard were booked for "the trots." Among those aboard were Messrs. David Bonner, Hamilton Busbey, Albert Hall (jocularly called the Hambletonian 10 Triumvirate), Wm. Russell Allen, W. E. Stokes with his most precocious 14-year-old son "Weddie" (This little chap appeared some time ago before the United States Senate committee and made a strong plea that God's pure air should not be confiscated by the wireless telegraphy companies), Senator Carl S. Burr, Jr., J. Howard Ford, Wm. Simpson and his pretty nieces, Miss Allan and Miss Minna, Eddie Madden, son of John Madden and head of "the Madden boys' firm. This splendid lad was soon to meet with a most distressing accident of which, "more anon," Mr. Cunningham, one of the old Fleetwood Park contingent, Mr. McClenahan, breeder of Wiltun,

Guest House. The old Colonial House, a picture of which I send with this letter and which was the home of Gov. Warfield 100 years ago, is one of the best types of that period and from that old fashioned architecture has been evolved the latter day "California Bungalow," a low, rambling building with large rooms and high ceilings, and "all on one floor." Its walls as well as those of the beautiful, modern Guest House are almost covered with paintings, engravings and prints of old time and modern trotters. Mr. Stokes owns one of the most complete collections of trotting horse pictures in America, gathered together at great expense and by indefatigable effort; and his guests enjoyed looking them over and many a story of an old time race was suggested by these pictures and told by members of the company who were either spectators of or participants in them.

During the two weeks, hundreds of horsemen and their friends, both ladies and gentlemen, visited the farm; some mornings the road from the entrance gate

little Emily Ellen; Ernest White and Mr. Averill of Syracuse; Mr. Andrew Smith, owner of Young Miss, the dam of Bingen and three or four more of "the greatest brood mares in the world." After Grace had won the Futurity, Mr. Smith declared his intention to breed Young Miss to her full brother Willis, now a yearling. Think of what this means, and how firmly in the mind of this enthusiastic breeder must be fixed the theory, that by breeding the best producers to the best bred colts must come the greatest trotter. Andrew Smith is one of the most interesting men to listen to when talking of breeding the trotter I have ever met, and I wish there were many like him.

It was my good fortune to have for my room-mate Sen. Carl S. Burr Jr., son of Carl S. Burr of Comac, L. I., the dean of Futurity drivers. During our two weeks' sojourn at Patchen Wilkes Farm we spent much of our time together and no incidents of my visit there will be remembered with as much pleasure as our talks across the room after we had retired, about horses, men and affairs of forty years ago, when he and I were lads and the name of his father was the synonym of honesty, ability and good horsemanship. Sen. Burr has since then occupied "the seats of the mighty," having served both in the Assembly and Senate of the great Empire State, but has lost none of the quiet modesty, amiability and ingenuousness of his youth, and I believe he treasures more than all the political honors that have

A ROYAL ASSEMBLAGE—From left to right: Mr. W. E. D. Stokes; Tillie Thompson and foal brother to Miss Stokes (1) 2:19 $\frac{1}{4}$, (2) 2:09 $\frac{1}{4}$; Peter the Great 2:07 $\frac{1}{4}$, held by Ed Willis; Mand Fowler 2:21 $\frac{1}{4}$ and foal sister to Sonoma Girl 2:04 $\frac{1}{4}$; Orianna 2:19 $\frac{1}{4}$, dam of Czarevna 2:07 $\frac{1}{4}$, Grace 2:08, Kilpatrick (2) 2:21 $\frac{1}{4}$, etc.

and his friend Mr. Johnson, Ed Tipton, whose fund of information on the trotting horse of America seems inexhaustible, and whose negro dialect stories were inimitable; Jim Tranter, who is "business" most of the time, but who forgot it entirely when looking into a pair of merry brown eyes, belonging to one of the party; General Bathgate of The Swift Co. of Newark, accompanied by Mr. Swift, head of that concern, and many others whom I have neither time nor space to speak of. At Wilmington, Delaware, Mr. Winchester (breeder of Capt. George, the fast erratic, handsome son of Admiral Dewey) and his charming daughter, Miss Ann, joined the party and helped make the long journey to Kentucky seem short. It was a most congenial party as all were worshippers at the shrine of the patron goddess of the Trotter (whoever she may have been in mythological days) and discussed everything from Lady Suffolk down to Uhlán, and if ever the trotter received an unqualified endorsement it was by the interest shown in it by this body of intellectual gentle folk, prominent in social, financial, professional and business life. There was much shifting of seats so as to hear the different views of the many experts who discussed the trotting horse breeding problem with more intelligence, enthusiasm and interest than most churchmen could their bible, and many an enthusiast on the Mambrino Chief foundation, bumped into the Hambletonian Star cross, making the sparks fly and the supercilious way in which the apostles of George Wilkes looked upon the supporters of Electioneer, would have been distressing had it not been for the bland air of superiority with which the supporters of the great son of Green Mountain Maid considered them. But these comparisons of the "old timers" were made entirely on sentimental grounds, and it was only when the discussion of the "latter day saints," McKinney, Bingen, Prodigal, Axworthy, Bellini, Peter the Great and Todd, began that the "fur began to fly." There is a lady whose good favor I would rather retain than that of any other living person and whose rich sense of humor has relieved many a tense situation during argument, and who has had the privilege of having been thrown in contact with many of our best known trotting horse owners both on the Atlantic and Pacific coasts, who has said: "The one thing about the gentlemen owning trotters, whom I have met, that I admire most, is the beautiful patience they exhibit while listening to other horsemen talking about their horses and their performances, while they are waiting for an opportunity to talk about their own." The truth of which was certainly sustained on our trip to Kentucky, October 1st and 2d. We reached Lexington Sunday evening and found the Patchen Wilkes Farm automobile waiting at the depot and we were hurried out to the farm, and were soon established in the beautiful rooms of the new

to the barns, seemed a procession of automobiles. Young "Weddie" found a beautiful little car waiting for him at the farm, a present from his indulgent father, and the delighted lad flashed hither and thither in it, making the "hair raise" on some of the older heads, but seemingly having the car under absolute control. Among the visitors were "Red" Gerrety so well and favorably known to Californians, and who is now manager and trainer for Mr. Schlessinger of Milwaukee, who is getting together a great band of brood mares as the foundation for his new Wisconsin farm; John Splan, "The Evergreen," as some one remarked, to which a wag in the party responded: "No, Nevergreen"; Peter Johnston of Johnston 2:06 $\frac{1}{4}$ fame, and who believes no greater trotter ever lived than Peter the Great, and no brood mare ever lived

been heaped upon him, the oft expressed opinion of those whose opinions must be considered, that "Charlie Burr is as good a driver and horseman as his father." They are both credits to the game and we rejoice that so many of the traditions of the trotting horse turf are based on the careers of such men. It is a great temptation to me, to write of the good men I met in Kentucky, but I realize that we meet great men everywhere, but nowhere in the rest of the world do we find such an aggregation of great trotting horses and their breeders, as during the "trots" at Lexington, Ky., and we must write of them. Every turnpike radiating from the beautiful little city is lined on both sides by breeding farms where are raised thoroughbred cattle, hogs, horses, chickens, sheep, and indeed high-bred everything, and the rolling land knee-deep in bluegrass and clover, dotted here and there with great black walnut and hickory trees, and over which roam bands of Holsteins and Shorthorns, trotters, thoroughbreds and Shetland ponies. All fenced with board fences kept in perfect order and fitted with automatic or mechanically arranged gates which can be opened without "getting down" from horse or vehicle, with fine macadamized roads, everywhere, the houses mostly of ambitious architecture and all peopled by men and women whose hospitality has become proverbial, all go to make this country about as nearly ideal as one can imagine. We spent our mornings on the farm or visiting our neighbors and our afternoons at the races. There was a constant stream of visitors to the farm, for everyone wished to see Peter the Great. Was ever a horse so well named? His achievements as a performer and as a sire are unparalleled in American history, and today he must surely be given the palm, as the premier sire of early speed. I send you his picture taken a few days ago. He is today as high a type of the trotting horse as ever lived. A pen description cannot do him justice, his picture does not do him justice. He must be seen to know him. Four of his get have this year entered the 2:10 list, and 20 more could have entered the list had their owners so elected. A two-year-old, a three-year-old and two five-year-olds have taken records this season of 2:09 $\frac{1}{4}$, 2:08, 2:08 and 2:08 $\frac{1}{4}$, respectively, and the five-year-old Peter Red trotted a public exhibition of 2:08 $\frac{1}{4}$ during the Lexington meeting and is the sire of a two-year-old with a record of 2:26 $\frac{1}{2}$. I have seen during this season over 100 of the get of Peter the Great and I have not seen a single "cull." Each one is high class, and each one a trotter. He has sired very few pacers, and his 2:30 list contains scarcely any "sidewheelers" and his 2:10 list none. His sows have been little used in the stud until the past three years, but the reports from all over the land betoken that 1911 will show a flood of grandsons and daughters of this great sire

MARGARET O. 2:05 $\frac{1}{4}$ by Onward and her 7 days old filly by Peter the Great.

or ever will live the equal of Santos; Lon McDonald, the peer of any driver and trainer who ever lived; Walter Cox, the calculating man from New Hampshire who has made a fortune with the trotters, but who would surely have been a millionaire in any other line of business; Mike McDevitt, the sturdy, handsome son of "The Emerald Isle," who won six sensational races, including four of "The Classics" at this meeting, and who drives an auto as well as he does a trotter; David Shaw, owner of the remarkable stable which McDevitt trains—Joan 2:04 $\frac{1}{4}$, Peter Dorsey 2:07 $\frac{1}{4}$, Grace (3 yr.) 2:08; Dick McMahon, the "Berry Wall" of the trotting track; Harry Devereaux, probably the best known and most popular horseman in America; David Bonner, for whom more horsemen entertain a respectful affection than any other man I know; David Look, owner of the sweet

trotting to fast records. The Patchen Wilkes Farm catalogue for 1910 and 1911 is just out, and anyone looking over its pages and studying or understanding the lines of breeding of the mares contained therein, cannot but believe in the future success of their progeny. I send you a few photos taken there. One which I particularly like is of a band of about 30 mares and their foals of this year, hurrying across one of the fields. Another is a picture of horses who have made or will make history. It contains Tillie Thompson with her foal of 1910, full brother to Miss Stokes (and for which Mr. Uhlein, owner of The Harvester, offered \$10,000); Maud Fowler and her filly of 1910, full sister to Sonoma Girl, (which sold for \$26,000); Orianna, dam of Czarevna 2:07½ and Grace 2:08, the only mare which has produced two three-year-olds to beat 2:10, and her two three-year-old daughters have records of 2:08 and 2:07½. She is also the dam of Kilpatrick, 2-year-old, 2:21½, and of three others; Peter the Great, held by Ed Willis, manager of the farm; Kilpatrick, two-year-old, 2:21½, and Willis, one-year-old (just sold for \$6000 through Scott McCoy to J. W. Davis, owner of Moquette). I do not think any other "snap shot" takes in as much trotting horse value as this, and I am glad to be able to send the Breeder and Sportsman this picture. I also send you a picture of grand old Hulda 2:08½, hobnobbing with Prima Donna 2:09¼ (dam of Peter Donna 2:08). Mr. Spreckels will be glad to know the grand old mare's "lines have fallen in pleasant places." She and Prima Donna have a large paddock to themselves, knee-deep in bluegrass, and they are fed on all the dainties any horse epicure could demand. We think Hulda is surely in foal to Peter the Great. Another picture is of Margaret O. 2:05¼ and her six-day-old filly by Peter the Great. Mr. Stokes refused \$1750 for this highly bred miss, and says that is the kind he wishes to keep for a brood mare. Maud Fowler, Guycara, Adioo and Della Derby are thought to be surely in foal to Peter the Great. Old Charles Derby is being coddled along in a way which must surprise him, after the strenuous "wrestle" he had for food during the last three or four years. He was bred to a good many high-class mares last season and seemed as vigorous as a four-year-old. He is regarded highly by Mr. Stokes. The foals by Crystallion 2:08¾ (son of Arion and Crystalline by Onward) and by Peter Donna 2:08 (son of Peter the Great and Prima Donna 2:09¼) look promising, indeed everything on the farm shows "class." There has not been much training on the farm since the racing began in June, as Willis has had to be away, but the few two-year-olds at the farm can take (and probably will) standard records, and the yearlings are all sure trotters—not a pacer in the lot. Miss Stokes, two-year-old, 2:09¼, was taken sick just before the two-year-old futurity, after Willis had weighed in and was "in his colors" and was withdrawn. This was most unfortunate and detracted much from the interest in the race, as those who had seen the race at Columbus for the Horse Review stake, between her and Justice Brooke (2:09½) were anxiously awaiting the renewal of hostilities between this great pair of two-year-olds. Her trouble seemed to be only temporary, but Dr. Hagyard advised

would be hard to describe in detail that "luncheon," but the dark old mahogany table with its contrasting white semi-napery, silver and china, and the fried chickens, beaten biscuits, salads, preserves, custards, wines, tea and coffee and the wondrous ham all served by the most dignified and immaculate maid you ever saw, we will carry in our memory through all time. And the gentle courtesy of our slender, sweet-faced, dark-eyed, fair-haired hostess, and her stalwart, handsome husband was such as is rarely met with in this world of business intent and social hurry. It was hard to drag Stokes away from an etching (made in 1776 by some noted artist whose name I have forgotten) of George and Martha Washington, and which he declared was "rare as honesty" and worth thousands and thousands. When we had good-bye to this beautiful home and were urged to "be sure and come again," we recorded a secret vow that we would.

But what of the races? Until now we have hardly thought of them, but we suppose they should be paramount. The first day, October 4th, was Futurity

PRIMA DONNA, dam of Peter Donna 2:08, at left, held by Prof. McLennon, and HULDA 2:08½, held by Mr. Stokes.

day and a very large crowd assembled, the grand stands were full to overflowing and held an audience that must have filled the hearts of the directors and members of the association with joy. From every State of the Union came representatives of the highest circles of finance, profession, business and fashion. Beautiful girls and women, splendidly gowned and showing vivid interest in every department of the racing, mingled with well groomed and interested men. There were doctors, lawyers, ministers, senators, judges and millionaires in every line of business. Senator Bailey sat in Major Dangerfield's box, which during the two weeks was occupied by the Major, his two beautiful daughters and a galaxy of the youth and beauty of the country. Mr. Harkness and a party of friends each day watched the great performances of the sons and daughters of the Walnut Hall sires and when The Harvester later in the week beat the world's record of Cresceus, and Native Belle beat the three-year-old record for fillies, trotting a beautiful mile in 2:06¼, he fairly beamed. Robert Estill and his family, the Clays, Sidney, Harry Hume, three Kentucky giants who look as though they would make center and both guards of an all-

quite a large delegation from Cleveland. Mr. Averell and Ernest White (brother of the Governor of New York and as good as any amateur driver) from Syracuse; Frank Jones, fresh from championship driving honors, and wishing for more worlds to conquer; the Uhlein Brothers from Milwaukee, one the owner of The Harvester, the greatest trotting stallion ever born; Mr. Phillis of the DuPont Powder Company, proud in the ownership of a beautiful roan daughter of Peter the Great; Mr. Davis, owner of Moquette, and who has just purchased from the Patchen Wilkes Farm a full brother to Grace and Czarevna at a figure running well up in the thousands; Mr. and Mrs. A. B. Cox of Paoli, owner of Del Coronado, Czarevna and as choice a hand of brood mares as anyone owns; J. Howard Ford, owner of Stony Ford and the two great horses Billy Burk and Justo; Mr. J. J. Mooney of Toledo and his handsome wife, who was gowned for the "horse show" each day, and watched their good horse Electric Todd race; Miss Wilks of Galt, Ont., owner of the magnificent young sire Kentucky Todd, with whom she established a world's record, by putting three yearlings by him in the 2:30 list during the meeting, and Clem Beachy, through whose masterly training and driving this was accomplished; he was certainly a pleased and happy man; Mr. and Mrs. Matthews of St. Louis, whose beautiful little two-year-old colt Peter Boy put up a fine race in the two-year-old futurity and was timed in the race in 2:12½; Fred Dietz and Daniel O'Dell of New York, who intended to go home Saturday, but were persuaded to remain over until Monday to see the Transylvania. The Breckenridges, the Warfields, the Bacons, in fact all the social horse world were there and came day after day. The band entertained the audience between heats and a young fellow with a splendid baritone sung good songs and an amazing mezzo-soprano sang beautifully and when encored rendered the popular songs of the day imitatively, and the demand for "Has Anyone Here Seen Kelly?" was given and met with vociferous response from the audience. It was a great meeting and I am glad I was privileged to attend. There was betting, lots of betting, but nothing attended it that the greatest stickler for propriety could object to, although it is grievous to have to say that some of the races seemed to reflect the betting ring. The races were called promptly, there was little delay in scoring and the racing was promptly stopped at sundown, which was a few minutes after 5 o'clock.

Excitement was at a high pitch when the three-year-olds began to warm up for the Kentucky Futurity. Colorado E., the rangy big son of The Bondsman, was first to show, and he certainly did step fast. Emily Ellen, Mr. Look's sweet little daughter of Todd, looked out of place in the race, until they began to race and then she was a veritable trotting giantess. Not over 14.3 nor weighing over 750 pounds, this beautiful little mare was the contender all of the first heat, the winner of the second and the contender most of the way in the third and fourth. Another beautiful little daughter of Todd, Patchen Wilkes Farm's Sue D., had as much speed as any horse in the race, but lacked the stamina of the others. Native Belle was clearly off and notwith-

THE RESIDENCE, PATCHEN WILKES FARM. (Guest house at left.)

against starting her again this season, much to the disappointment of Mr. Stokes, who had thought she might go out of the year wearing the two-year-old crown.

A delightful incident of our trip was a visit to the farm of Mr. Sidney Clay, of Paris, Ky., where we were entertained at luncheon by Mr. and Mrs. Clay. Our party consisted of Sen. Burr, the Hon. Jno. McLennon, Mr. W. E. D. Stokes, "Weddie" Stokes and myself. Mr. Arnold (vice-president of the L. & N.), Mr. Geo. Alexander and Mr. Harry Clay completed the table. I shall always, when thinking of Kentucky, remember the rare charm of this entertainment. The house (over 100 years old) is one of the rare old type of colonial homes. Situate far back from the pike among grand old poplar, walnut and hickory trees, it is spread out over a prodigious amount of land and its parlors, libraries, dining room, porches, bedroom suites, all filled with rare old furniture and works of art, appealed strongly to our sense of the beautiful and homelike. Our luncheon was perfect. The piece de resistance, a sugar-cured home-raised ham, two years old, and cooked and served in a way which was a revelation to us "Northerners." It

American football team; William Spier, owner of Jay McGregor; Dr. Hagyard, the great veterinary surgeon, and his family; Mr. and Mrs. Shockency, from Claiborne Farm, whose guest, Miss Ann Winchester, seemed to have all the Lexington gallants about her box, and well she claimed their attention, for she is not only handsome, athletic and up-to-date on all American sports, but sparkling, witty and gracious. In Harry Burgoyne's box and with his family was Mrs. Thomas Murphy, whose beauty caused much pleasing comment and who appears herself to be perfectly oblivious to it. The Wickcliffs, Prestons; Col. Veech and his son Bethel from Louisville; Albert Hall; David Look, owner of "sweet little Emily Ellen," whose pretty name caused many to wonder whose namesake she was; Mr. McGowan, owner of the fast two-year-old Mainleaf and the three-year-old son of Bingen and Santos, J. Malcolm Forbes; Mr. Moore, owner of Dromore Farm, which sent Justice Brooke to battle for and won the two-year-old colt championship; Mr. Estabrook of Denver, about the most popular man who ever started a trotter and the owner of the champion three-year-old Colorado E.; Harry Devereaux, Frank Hanna and

standing she had the advantage of having behind her one of the greatest drivers living, finished 6-3-5 and was then drawn. The other two starters, Grace and Lulu Arion, completed as classy a field as ever started in a three-year-old race. The story of the race has been told by much better pens than mine and I will not go into detail. Colorado E. was just enough off to lose it. He put up a magnificent battle and Gus Macey gave him a masterly drive and fought out each heat to the finish and less than ¼ of a second would have won for him the second and third heats, but on that day he did not "have it." Grace, the winner, is a marvel and McDewitt, her driver, gave her a grand drive. Her third heat in 2:08 seemed to have her strung out, but she came back in 2:10 and 2:09¼, winning well in hand. Many unreasonable stories have gone around since this race regarding the wonderful ability of this mare, but it does not seem reasonable to me that she could have won her earlier races. Yet McDewitt told me that he really had no "line" on her, nor on Joan, as he had never asked either to go as fast as she could, and

[Continued on page 11]

NOTES AND NEWS

The Phoenix meeting opens next Monday.

Pleasanton has offered \$2000 for the Breeders' meeting of 1911.

Minor Her paced his exhibition mile in 1:59½ at Dallas, Texas.

Prince Ausel (2) 2:20½ is the sire of three new standard two-year-old performers for 1910.

Mr. Gilbert A. Smith of this city has purchased the trotter Patrose 2:12½ to use as a road horse. The sale was made by Chas. DeRyder.

Havis James telegraphed that he would leave Winnipeg this week with Mr. R. J. McKenzie's string of horses that he will train this winter at the Pleasanton track.

Fred Ward will train this winter a coming two-year-old by a son of Parole, dam by Kinney Mac, a son of McKinney. The colt is owned by L. L. Ormsby, of Boise, Idaho.

Mr. James B. Campbell, of Chicago, head of the firm that makes the well-known Campbell's Horse Foot Remedy, is visiting California in the interest of this very successful preparation.

Niquee 2:13¼. Mr. C. A. Harrison's handsome mare by Joe Patchen 2:01¼, won three blue ribbons and a championship in the classes in which she was exhibited up north this year. She is to be bred to Prince Ansel (2) 2:20 in the spring.

Mandolin 2:10 by Alcone, the pacer that the veteran I. C. Mosher campaigned in California in 1907, and gave his record at Woodland, is now owned in Salt Lake and at the recent fair held there paced an exhibition mile over the half mile track in 2:11 flat.

Robt. J. Wilson of Springfield, Ohio, owner of the great California sire Nutwood Wilkes 2:16½, writes us that the old stallion is in fine shape. He has made two full seasons since owned in the Buckeye State and has been bred to many choice record and producing mares from all sections of the East and Middle West.

Dick Wilson's horses reached Pleasanton last Saturday in good order. Mr. Wilson thinks the Pleasanton track about the finest training ground he ever saw. The track is in very fine shape and the stalls and buildings very neat in a new coat of whitewash inside and outside. Mr. Wilson will make a flying trip East and expects to return within ten days.

There seems to be the same desire among owners to train their horses over good winter tracks that has prevailed in recent years and many of the leading eastern trainers are going south to winter. If the Los Angeles track is put in readiness by January 1st, all the stalls will be filled, and there will probably be no empty stalls at either Pleasanton or San Jose.

Mr. F. W. Perkins, now of Willows, Glenn county, has recently sold a colt by Athamax 36927, record 2:22¼ trotting, dam by Altamont 3600, second dam by Signator, third dam by Sterling and fourth by Blue Bull, to go to Michigan. The colt is 19 months old and stepped a half mile in 1:27. Mr. Perkins says he would like to buy a yearling by Athamax out of a mare by Diablo 2:09¼.

At York, Pa., October 6th, the trotting mare Zoe Patchen by Zombro out of Last Chance by Mambrino Patchen, bred by S. W. Lockett, of Corona, California, won a seven-heat race, her three winning heats being in 2:19¼, 2:19½, 2:19¼. The slowest heat in this race, which was over a half mile track, was 2:22¼. Zoe Patchen has trotted very close to 2:10 in races this year.

A well bred bay gelding, sound, gentle and broke to ride is advertised for sale in this issue of the Breeder and Sportsman. Horseback riding is becoming more popular every day, probably because the doctors are advising so many of their patients to take this method of improving their health. The gelding advertised is offered at a low figure, but will be guaranteed to be just as represented.

Mr. W. S. Harkey, of Gridley, Cal., owner of the yearling filly Aeroletta, was in town this week and while here met Dick Wilson who has recently located at Pleasanton and is looking for one or two good colt stake prospects. Wilson made Mr. Harkey a very tempting offer for Aeroletta, but the latter refused to be tempted. The filly is a very handsome and speedy miss and is eligible to several rich stakes for two-year-olds in 1911. She is richly bred in speed lines being by Aerolite (3) 2:11¼, dam Deviletta 2:10½ by Diablo 2:09¼. At the age of 15 months this year, Aeroletta paced a quarter in 33½ seconds, a fast clip for a yearling. She will be trained on the Marysville track next spring if she is not sold in the meantime.

Beautiful Bells has another grandson that is a sensational producer. Echo Bell 2:21¼ the nine-year-old son of Allerton 2:09¼ and Palo Alto Belle 2:22½, is the sire of seven new performers for 1910, all being two, three and four-year olds.

Wilbur Lou, the yearling by Kinney Lou 2:07¼, dam Louise Carter 2:24½ by Chestnut Tom 2:15, that Mr. Frank H. Holloway took to Phoenix to give a record next week, trotted a mile in 2:26 in his work last week.

H. S. Hogoboom, who made a very successful trip up north this year and won several races with his horses, will train quite a string at the Woodland track this winter, mostly youngsters by Iran Alto 2:12¼, Palo King 2:28½ and the McKinney stallion Unimak.

When Native Belle trotted to a record of 2:07¼ as a two-year-old it was predicted by some that she would never beat that mark. She now holds the world's record for three-year-old fillies and the only three-year-old trotter that has beaten or equaled that time is Colorado E. (3) 2:04¼ by The Bondsman.

Belle Bird (3) 2:11¼ the fastest three-year-old filly of a few seasons ago, was given a time record of 2:09¼ at Lexington, which performance puts her dam, Nancy Medium, by Bayonne Prince 2:21¼ in the list of double 2:10 producers, as she is also the dam of Belle Kuser 2:08.

Ed Custer, the son of Baronmore that made a good campaign as a three-year-old in 1906, getting a trotting record of 2:12¼, after four years in the stud was trained a little this summer and in a heat against time reduced his record to 2:10. He is now only seven years old, but ten of his two-year-olds took standard records this season.

Nominations of mares bred this year in Pacific Breeders' Futurity No. 11, will close Thursday, December 1st. If you expect to raise a good colt see that it has stake engagements. \$3000 was offered this year for a three-year-old entered in the Breeders' Futurity, the offer being made before the colt started. \$1000 was offered and refused for a promising yearling filly this week that is entered in this stake.

The Charles Derby colt that was purchased at the Oakwood Park sale two weeks ago by McCormick Bros. of Rio Vista, is out of the standard and registered mare Nazoma by McKinney, second dam Amazon, dam of Directzone 2:19¼ by Chas. Derby, third dam Ramona, dam of W. Wood 2:07, by Anteeo 2:16½, fourth dam, the dam of Crescent 2:23¼, by Capt. Webster 10,173, fifth dam by Mambrino Ratler.

Dr. C. H. Ransome, of Mill City, Oregon, has purchased from C. A. Durfee the black stallion Almaden 2:19¼ by Direct 2:05½, dam Rose McKinney 2:29 by McKinney. Almaden won the two-year old division of the Pacific Breeders' Futurity Stake in 1903, the first Pacific Breeders' Futurity trotted, and he won the Occident stake in 1904. Almaden will be used in the stud and should sire early and extreme speed.

It is rumored that the great three-year-old of 1907, Aerolite 2:11¼, public trial 2:05½, will soon be sent to Pleasanton and again become a member of the Sutherland & Chadbourne string. Aerolite's owner, Mr. C. L. Gifford, of Boise, Idaho, wants the horse to have a faster record than the one he now has and will have him trained with that purpose in view. Aerolite served very nearly fifty mares last spring and summer and some extra good mares were among them.

Bingen 2:06¼, although but 17 years old, is the grandsire of nine trotters in the 2:10 list. His son Todd 2:14¼, is the sire of Bob Douglas 2:04½, Todd Mac. 2:07¼, Kentucky Todd 2:08¼, Emily Ellen 2:09¼, and George Todd 2:09½. Admiral Dewey 2:04¼ is credited with Captain George 2:09¼, Aquilin 2:19, with Aquin 2:08½, Bingara with Binvolto 2:09¼ and Nico II 2:21, with Major Wellington 2:08¼.

It has long been claimed that longevity is an inherited quality both in the human and equine families. The latest evidence in support of that claim so far as the equine family is concerned is the death of the stallion Shawmut at 33 years of age. His sire, Sayre's Harry Clay lived to be 34 years old. Heroine, the dam of Shawmut, was a full sister of Volunteer 55 and the latter was also 34 years old when he died.

Fred Brooker, the Portland dealer, driver and trainer, recently purchased from W. T. McBride a colt by C. The Limit 2:06¼, dam LaMoscovita, the dam of Bon Guy 2:11¼, etc., and writes us that he has him nicely broken and that he is the nicest gaited one he has seen in some time, and that he acts like "a sure trotter." Mr. Brooker's colt Bonnie Antrim, which he also purchased from Mr. McBride, raced very consistently for a four-year-old and though he had but very little work prior to the racing season, started six times, was four times first, once second and once outside the money when he started in twelfth position and was 5-4-6 in the summary.

Henry Helman has refused two offers for his broodmare Lady Mowry 2:09¼ recently. This mare should be a great producer and her breeding is very hard to beat as she is by McKinney 2:11¼, dam a producing mare with a record by Nutwood Wilkes, second dam a producing mare with a record by Richards Elector, son of Electioneer, third dam the thoroughbred mare Sugar Plum by Lodi, that produced a three-year-old with a trotting record of 2:27¼.

The Russian Imperial Stud at Moscow has recently purchased from William Simpson, proprietor of Empire City Farm, the home of McKinney 2:11¼, a couple of California bred trotters that will be used for breeding purposes. They are the stallion Eli McKinney 2:18, bred by Alfred Solano, of Los Angeles, and the mare Derby Princess 2:08½, bred at Oakwood Park Stock Farm. Five Orloff mares that were sent over last winter to be bred to Axworthy 2:15¼, Peter the Great 2:07¼ and Gen. Watts 2:06¼ were sent home on the same steamer that carried the two above mentioned.

About the best prospect for the slow class in 1911 among the trotters that will be in training in California is Kinney de Lopez, the chestnut son of Kinney Lou 2:07¼. This young stallion will then be five years old and should be a great race horse. He is sound as a new coin, good headed and very speedy. He has a record of 2:23 but Mr. Doble did not intend to make him that fast, as the mile was driven simply to give him a standard record in case anything happened him, but the colt was going so easily that he fooled the veteran a little at the finish. Kinney de Lopez is out of a mare by Direct 2:05½, and as the next dam is by Naubuc, the colt's dam is bred like Directly 2:03¼. Mr. Doble is only giving him exercise now, but with the opening of the new year will begin preparing him to meet all the best trotters of his class during the season of 1911.

If Sutherland & Chadbourne train the stallion Aerolite (3) 2:11¼ next season, which is now considered certain, they will have the three fastest pacers out of one dam, ever seen in one stable. The other two will be Moortrix 2:07¼ and Sirius Pointer (2) 2:18 who will then be a four-year-old. Aerolite paced a public trial of 2:05½ as a three-year-old, while Sirius Pointer was a very close second to Jean Val Jean when that three-year-old paced three heats in 2:10, 2:10½ and 2:11 in the California Breeders' stake at Woodland last August. Chadbourne, who drove Sirius Pointer in this race, thinks him as high class a colt as Trix ever produced and as he has trained and marked them all, including Mona Wilkes 2:03¼, Moortrix 2:07¼ and Aerolite 2:11¼, he is competent to express an opinion in the matter. There are many who believe Trix will be the first mare to equal the record of Bertha who has five 2:10 performers and another one (Rubylight) in sight.

Among the new comers to Pleasanton this fall is Dan Starr, of Boise, Idaho, who has brought down four horses to work during the winter. The head of the string is Junior Dan Patch, the first of the get of the champion Dan Patch 1:55¼ ever seen at Pleasanton. Junior Dan is not very large but he is all horse and weighs 1060 pounds and is some pacer. He took his record of 2:10 this year and is expected to pace in 2:05 before the end of 1911. He is as black and glossy as a choice piece of anthracite, with a star and white hind ankles. He has finish and substance with a fine disposition that makes him a favorite with trainer and caretakers. He is out of Zell a daughter of the registered stallion Golden Wing 2:24¼, and his grandam is by John Sherman 8285, a son of Wapsie 688. He will not be used in the stud but will be trained by Mr. Starr for the races of 1911. Starr also has Varcoe a chestnut son of Nutwood Wilkes and Carrie Malone, full sister to Chas Derby 2:20 and Klatawah 2:05½. Varcoe was bred by Frank Taylor of San Jose and is now owned by J. F. Elwell, of Colville, Washington. Maud A., a very promising mare by Lockhair a son of Lockheart 2:08¼, and the chestnut gelding Yosemite by Monterey 2:09¼ are also in Mr. Starr's string. All these horses will be prepared to race next year.

John McCoy, one of the Breeder and Sportsman's subscribers and friends in Utah, writes us under date of October 29th as follows: "Just a few lines from the Mormon State to say that we just had the greatest fair ever held here at Salt Lake. The harness races were the best, and some good time was made. Entries were numerous, and the horsemen were all treated fine which made them happy and they all say they are coming back next year. Kind words and praise were heard on all sides for our good natured Secretary, H. S. Ensign for the kind treatment he bestowed on all during the meeting. A word for the good California bred horse. Robert I., owned here: His record is 2:08¼ and he is by Hambletonian Wilkes, dam Anna Belle (3) 2:27½ by Dawn 2:18¼, son of Nutwood. Robert I. is now 13 years old but looks and acts like a five-year-old, is as handsome as ever, and with his great style and action made a fine showing in the standard bred class, winning two blue ribbons, and the sweepstakes for best stallion in his class, being awarded a silver cup. You will remember that W. G. Durfee marked Robert I. in 2:10 in California and that he afterwards took his record of 2:08¼ in a race at Decatur, Illinois. He now holds the race record over the State Fair Grounds' half-mile track in Utah of 2:14¼, 2:15 and 2:15¼."

Jos. Twohig, who made such a successful campaign with Bon Guy 2:11½, double stake winner and the fastest Pacific Coast three-year-old race trotter, has opened a public training stable at Pleasanton and has quite a school of youngsters to educate. He has five yearlings (they will be two-year-olds in January) and they are all engaged in the two-year-old stakes for 1911. Three of them, a colt by Alconda Jay out of a mare by McKinney, a colt by Nutwood Wilkes out of School Bell 2:16½ by Prodigal, and a filly by Alconda Jay out of a mare by Monterey 2:09¼, are trotters, while a filly by Lord Alwin out of Melba, dam of May T. 2:15 and a colt by T. D. W. 2:11¼ out of Jetta Richmond, the dam of Diahrito 2:08¼ by Soudan, are both pacers. These yearlings are all good prospects and Mr. Twohig will surely be able to get some of the stake money of 1911-12 with them. He is also educating a three-year-old filly out of Jetta Richmond. She is by a son of Nutwood Wilkes whose dam was a Silver Bow mare. The filly is a trotter and has already shown a quarter in 37½ seconds. Twohig is one of the coming trainers and drivers of California. He is careful and painstaking and has the knack of getting colts to going square and good gaited.

Charles DeRyder has his big barn nearly filled with horses, but is ready to accept a few good racing prospects as he wants to try the Pacific Coast circuit in 1911, and he says he has a hunch that this circuit will have a big revival next season. He has quite a school of youngsters that are just learning. S. Christenson has sent him three youngsters by Strathway, one by Zolock, one by Bon Voyage, and the fine colt June Pointer by Star Pointer out of Perza. Victor Vehilnac has turned over his money winner Victor Pointer to DeRyder, and the well known Oakland attorney, Mr. Asa Mendenhall, has sent him a colt by Star Pointer out of a mare by Washington McKinney. DeRyder is just breaking a colt by Charley D. 2:06¼ out of Melba, the dam of May T. 2:15. This colt is owned by Co. J. C. Kirkpatrick who also owns a pacing colt by Kinney Lou that DeRyder drove a half in 1:08 last Saturday. Mr. P. W. Bellingall has three four-year-olds in DeRyder's stable; all are out of mares by Secretary, and two are by Kinney Lou and one by Del Coronado. They are all great big fine four-year-olds and all have speed. The Coronado and one of the Kinney Lou's are pacers. All are mares. Grace Pointer 2:09¼ is looking well after her esatern campaign and is expected to be a free-for-all candidate in another year. One of the favorite in the DeRyder stable is Star Tilden the Star Pointer-Jessie Tiden, a two-year-old owned by Geo. W. Putnam of Salt Lake City. Star Tilden paced a mile in 2:25 last spring and will be ready to step fast next year as a three-year-old. He is a grand looking colt. DeRyder recently traded for the McKinney stallion Count Hannibal. This is a fine big black fellow that has been buried up in Napa county since he was foaled. He is out of a mare by Secretary, second dam by Alcona 730, third dam Fontana, the dam of Silas Skinner 2:17, etc. This horse is eligible to registration and would make a fine stock horse. He is 9 years old, but has not had any training, but DeRyder drove him a quarter in 35 seconds last Saturday.

There was never a string of better looking, slick, fat horses, than those owned by Mr. H. E. Armstrong, proprietor of the Pleasanton track. During Mr. Armstrong's absence in the East this summer these horses were all in charge of Roy Putnam, and all the recommendation he needs as a caretaker is a look at these horses. Kid Wilkes 2:09½ trotting, and Cora (4) 2:08½ pacing, look like a pair of prize Berkshires. They ran out all summer and took on flesh amazingly and are ready to begin work on. Both should reduce their records next season. A four-year-old gelding and a three-year-old filly by the great race horse Hal B. 2:04¼ out of a mare by Del Norte 2:08, second dam by Rockwood, are grand looking youngsters. Hal B. is one of the great young sires and these two will certainly add to his fame if no bad luck intervenes. Two handsomer horses would be hard to find. A colt by Star Pointer 1:59¼ out of Myrtha Whips 2:09 is a grand looker, has speed and will be heard from in the stakes wherein it is engaged. Mr. Armstrong's horses are now being given their preliminary work by H. G. Smith, the owner of that good pacer Denervo 2:06¼ by Demonio. In the heat where Denervo got his record this year he finished 25 or 30 feet in front of the next horse and had been driven out that day would have paced a mile better than 2:05. He is in great shape after his hard campaign, has a lot of flesh on him and looks able to start on another racing tour right now. Mr. Smith is handling a couple of babies that he thinks are "the goods." One is a filly by Birdman, owned by Secretary Cox of the Pleasanton Training Park, the other a colt by Nutwood Wilkes, owned by James Smith of Oakland. Both are trotters and very promising ones at that. Mr. Smith has the seven-year-old stallion Lee Dillon by Sidney Dillon, dam Lena Holly by Mountain Boy that is a big fine hay, a natural pacer and fast, while a couple of two-year-olds by him are square, natural, good gaited trotters. These two-year-olds are a fine advertisement for Lee Dillon as a sire as both are large, rangy, upheaded youngsters of much promise. One is a colt and is out of the dam of Joe Gans 2:19¼. He is owned by Henry Albee of Napa. The other is out of a mare by Prince Almont and is owned by Dr. John Nightingale. Mannie Reams, the well known Solano county horseman, broke this youngster and says he is the only real trotter he has handled since he owned Mamie R. 2:15¼.

FROM SAN JOSE.

Report has reached here that Kinney Lou's fast yearling son Wilbur Lou worked an easy mile at Phoenix last week in 2:24½. It now looks as if Mr. Holloway's colt had first mortgage on the yearling record for trotting colts of 2:23, held by Abdell for the last 16 years, if nothing happens him before next week, which will be the week of the Territorial Fair held at Arizona's capital. Personally knowing Mr. Holloway, I do not take him to be a man that would string his colt for the distance of a mile in his work. I therefore, confidently look for the son of Kinney Lou to obtain the world's record for yearling trotting colts next week and sincerely hope he will be able to beat the 2:19¼ of Miss Stokes, thereby bringing the world's yearling record back to California where it has been held with the exception of short intervals for the last 25 years.

The late Martin Carter was a strong believer in Kinney Lou and in 1908 bred two daughters of the great brood mare Ingar (dam of John A. McKerron 2:04½ and 5 others) to Mr. Doble's horse and the last time I saw Mr. Carter was in the latter part of August of that year when he came to Santa Clara to take those two mares home. A few short weeks later, without warning he went on the "long journey" to the land where they do not raise trotters or race horses as far as we have ever been able to learn. The mares he took away that day were Mamie Redmon 2:19¼, full sister to John A. McKerron 2:04¼ and Louise Carter 2:24½ by Chestnut Tom 2:15, a half sister, or really a three-quarter sister to McKerron, as her sire was a son of Nutwood Wilkes, sire of John A. McKerron. Another Nutwood Wilkes mare that Mr. Carter had previously bred to Kinney Lou was Queen C. 2:28½, and she produced Dan McKinney 2:19¼, that was raced through the Northwest this year by Joe McGuire, and the boys that saw him race tell me that he is really a high class trotter, and that Mr. McGuire says he is the making of as great or greater trotter than Daybreak 2:08, a member of Mr. McGuire's stable for the last two or three years. The mare Louise Carter 2:24½ is the dam of Wilbur Lou, and she is also the dam of the fast and reliable three-year-old filly Mamie Alwin 2:20½ owned by Mr. A. L. Scott and raced in the Northwest this year by Joe Cuicello. This honest little trotting filly is many seconds faster than her record, having been second to the good aged trotter Kingbrook at North Yakima in 2:13¼, winning second money in the race and worked a mile the same week over the same track in 2:10 which is a faster mile than any other three-year-old California trotter has shown this year.

Speaking of Mamie Alwin reminds me that her driver had a very successful campaign this year with the three trotters that he raced, Mamie Alwin 2:20½, Lady Inez 2:12½ and Prof. Heald 2:24½, having started 23 times and was only once second in the majority of the races he did not win. Had Prince Lot got the decision in that close third heat of the Portland \$10,000 race which was finally won by Helen Stiles 2:09¼, Lady Inez would have annexed second money. Prof. Heald proved himself to be a good consistent race horse and an especially good mud horse, and was fortunately returned a good winner without reducing his record of 2:24½, leaving him still eligible to the slow classes next year.

I have before me a letter just received from Charley Spencer, driver of the good trotter Prince Lot 2:10¼ in which he reminds me of the fact that Prince Ansel (2) 2:20½, sire of Prince Lot, put three two-year-olds in the list this year instead of two. They are Dorothy Ansel 2:20, Laura Rodgers, p. 2:18½ and Adansel 2:29½, to cart the third time he was ever asked to heat 2:40, and the last quarter was in 35 seconds. Besides the three that obtained records Joseph D. paced a mile during the Woodland meeting in 2:18½ and Odd Mark worked the Chico track in 2:23, last half in 1:07, last quarter in :32. Mr. Spencer writes that Det Bigelow has an eight-months-old brother to Dorothy Ansel that has trotted a quarter in 49 seconds. No one is better pleased than myself that Prince Ansel is making a showing as a sire of speed. Prince Ansel was a wonderfully precocious two-year-old himself and came from three minutes June 1st to winning race record of 2:20½ the latter part of August, and had he not met with a mishap in his next start would have had the fastest record ever made by a two-year-old trotter in this State in a race. He is now 15 years old and his stud career has practically just begun. All the early part of his life he played second fiddle to a horse not to be compared with himself in speed, breeding or individuality, but now the bars are down and the son of Dexter Prince and Woodflower will receive the opportunities and patronage he is proving himself well worthy of.

Wilbur Lou is not the only California representative that will start at Phoenix next week that we will watch anxiously for a report of their performances. Helen Stiles 2:09¼ is there, and how friend Durfee is going to win with her and keep her in the 2:10 class is a puzzle to me, and it does not seem to me that it would be a good business proposition to get her out of the 2:10 class at the last meeting of the year as she looks like a high class prospect to race over on the other side of the Rockies next year in the 2:10 class. I am not alone in my opinion that if she remains sound she will be a 2:05 racer on the eastern tracks next year and she has demonstrated her gameness and racehorse qualities beyond a shadow of a doubt.

Will Durfee is in Phoenix with his two great race horses Copa de Oro 2:01½ and Carlok in 2:08¼. Last report from these two good ones before they were

shipped to Arizona was that both were faster than ever. Of course a fast record is desired for both of these horses and it will not surprise us if the son of Nutwood Wilkes returns a member of the 2:00 brigade and that Carlok gives his great dam Carlotta Wilkes her second 2:05 performer. I do not know why it is that none of the great San Francisco dailies have ever reported the Phoenix races in the past. I hope such will not be the case this year. The Territory of Arizona gives the last important race meeting of the year in connection with their fair. The purses are large, none being for less than \$1000; the best horses in the land meet there at a time when they are keyed up for extremely fast miles and the track is one of the fastest in the United States, broken records are looked for and many people in California await anxiously for a report.

I am sorry to state that the Savage combination of two-minute pacers will not be seen in California this fall as was hoped. A reply was received from Mr. Savage by the Chamber of Commerce of San Jose to the effect that as they had other engagements in California and had to be in New Orleans on November 26 that he would only consider sending his champion pacers to San Jose after the Phoenix meeting upon a guarantee of a specified amount for two days' exhibition, although he admitted that the offer from San Jose to give him the entire gate receipts was very liberal, still he wanted to be guaranteed. Why not get the Durpees, father and son, to bring Copa de Oro, Carlok in, Happy Dentist and Helen Stiles here for an exhibition of fast miles. They can show us faster miles at the trot and pace than have ever been seen in California.

C. C. C.

SAN FRANCISCO DRIVING CLUB.

The annual picnic of the San Francisco Driving Club was held at Tanforan last Sunday. Baseball, dancing and other amusements were provided for the entertainment of the large crowd, but the harness races in the afternoon were the principal feature of the day's sport. Five races were on the program and were all finished but one, the 2:18 trot, in which three heats were trotted with a different winner each time. Darkness compelled the postponement of the finish of this race until next Sunday and it will be decided at the Stadium in Golden Gate Park. Results:

First race, 2:18, one mile:
Shorty Roberts' Charley J. 1
T. H. Corcoran's Caliente Girl. 2
S. Burns' Dickens B. 3

Time—2:22, 2:22½.

Second race, 2:22 trot:
H. Hagensen's Search Me. 3 1 3 1
J. M. McTigue's Darby Mc. 1 6 5 3
R. J. Rybicki's Babe Benton 4 4 1 5
G. Tasse's Steve D. 6 3 2 3
Hammer's Clara W. 5 7 6 6
M. M. Bates' Lassie M. 7 5 7 7

Time—2:26, 2:23, 2:25, 2:26.

Third race, 2:25 pace, one mile:
J. Kramer's Cloudlight 2 1 1
F. Lauterwasser's Prince Almo. 1 2 3
H. Schathler's Lulu S. 5 5 2
H. Cohen's Eden Vale 3 4 4
H. Campodonic's Baldy Mitchell 4 3 5

Time—2:21, 2:25, 2:24.

Fourth race, 2:18 trot, one mile:
J. V. Galindo's Harold K. 2 2 1
V. Verilhac's Dr. Hammond 1 3 2
E. Domenchim's Reno D. 3 1 3

Time—2:34, 2:28, 2:24.

Fifth race, 2:15 mixed, one mile:
S. H. Cowell's Kermit 1 1
F. Burton's Walter Wilkes 2 2
J. O'Kane's King V. 3 3
W. J. Kenney's W. J. K. 4 4

Time—2:19½, 2:21½.

PARK AMATEUR CLUB CLOSES SEASON.

The last of this season's races were given by the Park Amateur Driving Club at the stadium track last Saturday. All the races were won in straight heats and the order of the horses was the same in every heat. This closes the cup racing season and the cups will soon be distributed. Secretary Thompson has not yet given out the list of cup winners but will do so in the near future. The results of last Saturday's races were as follows:

First race, class C trot; one mile:
R. Consani's Dividend 1 1
R. Nolan's Billy Burke 2 2
E. P. Clayburg's Charles II 3 3

Time—2:32½, 2:31.

Second race, class A trot; one mile:
D. E. Hoffman's Dictatum 1 1
D. E. Hoffman's Balboa 2 2

Time—2:21, 2:24.

F. W. Thompson's Lady Washington 1 1
F. L. Matthes' Walter G. 2 2
Captain W. Matson's Bird Eye 3 3

Time—2:25½, 2:21½.

F. I. Matthes' Raymond M. 1 1
H. L. Ahler's Sunset Belle 2 2
A. Ottinger's Mike Kelly 3 3

During the afternoon Mr. A. Ottinger drove his hack trotter Charley T., winner of the Clark cup, around the track in 2:13½.

At the recent Lexington meeting there was a total of \$74,855 distributed, of which \$56,954 went to trotters and \$17,901 to pacers.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT.

POST SERIES TOURNAMENT.

The Post Series Tournament which took place at Indianapolis was under the auspices of the Interstate Association and was open to amateurs who had, up to October 1, shot at 1200 or more single targets in 1910 registered tournaments. Professionals who shot in two or more Interstate Association Handicap tournaments during 1910 and who averaged 90 per cent or better were also eligible.

The program each day called for 200 singles and 25 double rises. Entrance \$23 each day. For the first and third days the Rose system—4, 3, 2 and 1 was the money division in four moneys, for the second and fourth days, the percentage system, four moneys, 40, 30, 20 and 10 was followed. The daily average money amounted to \$100—30, 20, 15, 13, 12 and 10—\$400 for four days, singles only counting. The Association also divided \$300 among the ten high amateur guns, on the total of 800 singles—70, 60, 50, 40, 30, 20, 10, 8, 7 and 5. On doubles, 200, the Association divided \$100 among the ten high amateur guns—30, 20, 15, 13, 12 and 10. The high average gun for amateurs and professionals each received a diamond watch fob trophy from the Association on the grand total of 1000 targets, singles and doubles.

The first day's shooting was conducted under almost perfect weather conditions. W. H. Heer was high gun on singles with 200 straight. G. W. Maxwell 198, Lester German and Fred Bills 197 each. The amateur high guns were: F. M. Edwards and J. R. Graham 194 each. F. G. Fuller 193. In doubles, Bills, German and Fred Gilbert broke 47 each. Graham broke 44, Chan Powers and J. C. Young 43 each. On all targets high amateurs were: J. R. Graham 238 out of 250. F. G. Fuller 235, Powers and Young 232 each.

Jim Skelly started off finely in the morning with 75 straight, losing his first bird in the fourth event. The long runs were, Heer 200, J. R. Taylor 152, Gilbert 178 singles, 17 doubles—125; Geo. Lyon 119, Bills 122, Geo. Maxwell 106, Lester German 110.

Good weather ensued during the second day's shooting. Bills was high gun 243 out of 250. Heer 242, J. Taylor, Gilbert and Dick Clancy 238 each. The amateur high rating was: A. P. Smith 238, J. R. Taylor 236, Mink 235. Heer made a run of 88 which added to the previous day's 200 gave him 288 straight, the high run for the tournament.

Chilly, cloudy weather with a bit of wind made a change in scores for the third day. The high guns for the day were: Bills 243 out of 250, G. L. Lyon 242, German 241. Among the amateurs J. R. Graham broke 243, J. B. Barto and Powers 242 each.

Bad weather prevailed during the fourth day's shooting. Rain and wind, however, did not deter the shooters from going through the program without a stop.

High professional averages were: German 240 out of 250, Lyon 238, Bills and Walter Huff 236 each. The leading amateur guns were J. R. Graham 238, C. L. Nickles 234, F. C. Koch and C. Mink 232 each.

After the shoot was over Mr. J. T. Skelly, with whom originated the idea of the post series tourney, presented J. R. Graham with the Association trophy for the high amateur average—950 out of 1000. Fred Bills received the high professional average trophy, 966 out of 1000. The scores follow:

Tuesday, October 18, 1910.

A DAY IN THE WEST OF IRELAND.

[By Black Jack.]

The sun was shining brightly and beginning to melt the frost of the previous night when I reached the keeper's house and found the owner waiting for me. "We'll try the rushy fields up to the hill," he said, "and there's a few cock in the covert above my father's house." So the gun being put together, and Shot the pointer extricated from the well of the car, we made a start. The first field is drawn blank, but Shot makes a point in the second and a snipe gets up rather wild. I miss clean with my first barrel, but "give him a grain" with the other and he drops into the next ditch, rises again as we come up and is duly bagged. The next field holds a couple, but they rise as we get over the ditch, and a short walk brings us to "the father's house," where Shot is tied up in the cow shed, for he is young and impetuous, and gets utterly demoralized by rabbits, which are swarming in the cock covert on the hill. The said hill is a steep, rocky bluff, overhanging the mouth of the Shannon, and covered with high, rough gorse and withered bracken. After a week's hard frost it is often full of woodcock, 20 or 30 brace having frequently been shot there in a day; but last night's frost is the first we have had for weeks, and we cannot expect much today. However, we enlist the services of the keeper's younger brother Jack and a "tarrier" answering to the name of Hero, and a true old red Irish setter, one of the best and most intelligent dogs in existence.

The gorse is high and prickly, and beating with one gun and two men is not easy, but at last the cries of "Hi-cock-cock" are interrupted by the welcome swish of wings, and a fine woodcock swings up the hill, giving me an easy shot, and falls dead in an open patch. A long beat back produces nothing but a couple of rabbits, but at last, while scrambling over a bank, another cock rises and dives over the brow of the hill. I fire a hurried snapshot, and fear I have missed him, but a shout of "Good shot, yer honor," from Jack reassures me, and plunging into the thicket of the gorse as if there were no such things as thorns, he soon retrieves the bird. Then we work hard for an hour without result, but near the end of the last beat a third cock gets up, a long shot, and, to my delight, falls to the first barrel, a single grain having hit him "in the back of the poll," as Jack says. A brace and a half of cock without a miss is not bad work, and now we halt at a little stone-walled well of clear cold water for our lunch. The sun is blazing and we are all hot and thirsty, so a good drink and then a wash in the well are very welcome. From where we sit the view is lovely. The hill falls steeply away to the river, some three miles wide at this point. On the left is the light house of Killeadane, and beyond, rising grim and gray from the woods surrounding it, the Anglo-Norman castle of Carrigaholt, a stern relic of the days when the king's writ ran no further than a bow-shot from the castle walls and English rule had to be enforced with cold steel.

Beyond this again stands the tall round tower of Scattery, its seven churches, now in ruins, nestling at its base, almost covering the little island, which in old times was famous far and wide for the learning and piety of its monks and bishops, while across the river rise the blue outlines of the Kerry hills. A beautiful country, and well worthy of the love which its people have for it. We are much amused at the maneuvers of a small coasting steamer which, in trying to clear the mouth of the river, runs aground on the only sand bank in the vicinity, to the great delight of my companions, whose sarcastic comments on her captain's navigation would drive that worthy frantic if he were within earshot. Luckily the tide is rising, and in a few minutes she is able to get off.

During lunch hour the men question me eagerly about the Boer war, in which, like all their class, they took a keen interest. "Ah, but it was a grand fight they made." They tell me of Maj. O'Hara of the militia, who went out saying that "they were only going to fight a few farmers, and would be back in six weeks," but who was away two years; of Terry O'Brien, who "got the bullet" and returned to his village with two medals and a limp; of poor John Marinan, who never returned at all, and other unknown heroes of the war.

However, time is flying and we must be up and doing. We return to the farm, release Shot, leave Jack and Hero to go back to their work of herding cattle, and start again after the snipe. We traverse a long stretch of beautiful snipe ground without seeing a bird, and then come to a small boggy stream on the hillside which holds five jacksnipe. Some I hit, some I miss, but the latter do not fly far, and in half an hour we have bagged all five. The keeper declares that all the full snipe must have gone "down the strame," so we turn inland, where a fair-sized stream runs through a wide, flat valley, the fields on both sides being rough and rushy. Here we find a fair number of birds, but they are very wild, and only an occasional one lies close enough to give a shot.

The work is hard, too, as the fields are small, and a West Clare "ditch" is a formidable earthwork, 5 or 6 feet high, topped usually with a tangled hedge of quickset and brambles, with a wide "grip" on each side, so that crossing a couple of miles of country means a considerable amount of climbing, and jumping. At last an old farmer informs us that "there

be a share of noose (Irish for snipe) in the strame beyant the big ditch." So thither we go under his guidance, keeping Spot to heel, and find a thin, boggy stream flowing in a grass field, fringed with rough grass and dwarf willows some two feet high. I walk up to it alone, and put up eight snipe, three of which I account for. Two are picked up at once, but where is the third? We all three saw it fall into some dwarf willows; it certainly did not get up again, but neither we nor the dog can find it. After 10 minutes' hunting the old man says, very seriously, "I'm thinkin' 'twill be as well if ye didn't find that bird." "Why?" I ask; "do you think he is the devil?" The old man looks grave. "He's not right, anyhow, sir. Sure didn't we all see him drop into them bushes, and now he's gone from us." The superstition does not impress me, but we are wasting valuable time, so after a final search we unwillingly give it up and go on.

The edge of a small "flash" or pool of water yields two more snipe, which go off in different directions, and I get them both with a satisfactory right and left, which restores my good humor. Toward evening the birds lie better, but as they fly very low on rising it becomes increasingly difficult to distinguish them against the brown rushy fields, and at last, after missing four birds out of five, I unwillingly come to the conclusion that it is too dark to shoot, and that my sport is over, not alone for the day, but for the season, as, unfortunately, my leave is at an end, and two days more will see me on my way. However, seven couple of snipe and a brace and a half of cock is not bad considering how wild the birds were.

RANDOM NOTES.

[By Loch Laddie.]

One of the most difficult tasks that confront a handler of bird dogs is to get certain young puppies to hunt well for their dead birds. Some dogs take to this naturally and consider it chiefly the greatest pleasure of their existence, but in high-class youngsters the reverse is often the case—their blood lines are crying out to them all of the time to get out and search for more coverts, and seem firmly convinced with the idea that when the bird is dead the owner of him should take care of that line, as he is too busy to pay any attention to the dead while living things are to be found. In many youngsters this trait seems so firmly implanted in them that to insist on good conduct in this line is often certain to take away some of his natural abilities if persisted in too much during their first season. The dweller of the city, as a rule, depends too much on a puppy's first year's performance, and often a trainer is obliged to hulk his dog into a close ranger to secure in him a good dead bird finder. A good dead bird finder is not a fad of the shooting dog man, but to the owner of one dog a necessity, for the true sportsman would rather any day make a clean miss than permit a cripple to get away or leave a dead bird lying lost in some weed patch, of no value to man, but left to some preying varmint, mink or possum, or the scavengers of the fields, the farmer's hogs.

When conditions are right it is not such a difficult matter to get the puppy's instinct in working order for this purpose; but when it is warm and he becomes tired, possibly neck deep in plume, sedge, creep grass or the couch grass of the bottoms, then a once labor of love becomes a distasteful job—scent is poor and every time the dog puts his nose to the dry grass to make an effort to search the dry fuzz gets him to coughing. So it is not often a wonder that the otherwise patient scout balks at his duty, and in the end refuses to search further. To give any advice to the beginner how to handle a dog under these conditions could be embodied more in the word patience than anything else. Dragging dead birds through the grass and encouraging by the sight and scent of the birds proves often an efficient method to induce the dog to search harder. Man is often the means of a dog failing to find a bird. The master persistently believes that he has marked the dead bird right, and no matter how often a dog has proven his master's lack of infallibility on this point, it is natural still to hulk the dog into going over the same ground time and again in search of a dead bird, where if you had permitted him the liberty of 15 yards' further range he might have picked the bird up without any greater amount of time wasted.

The greatest mixup between dog and master more than often occurs when right and left barrels score a kill; the right brings feathers, you turn rapidly in another direction and score with the left. As usual, the dog is sent to retrieve the nearest dead, but by the time you have turned to the first bird aimed at your idea of correct marking has slipped a cog, especially if in high ragweed or other similar cover. Here the poor dog is often justly criticized if he fails to find dead, though he has persistently searched where you wish him, and if his search does not result in finding the bird then Ponto hears words regarding his ancestry that are not often heard in the drawing room at home. Whenever a case of this kind turns up, it is best when you find that your accuracy at marking is subject to doubt, give the dog his head and let him hunt out a while, then come in; he may find the wind differently and catch the delightful scent in an instant where he has fainted before to notice it, and ten to one it will be many feet away from where you were certain it should be.

Many men possess a marvelous faculty for accurately marking birds, and I have seen them to defy the accomplishment of a trained dog, but ten to one it's always been when the other fellow is doing the shooting—for marking perfectly and good shooting are not accomplishments that usually go hand in

hand. A stone-dead bird is often the most tantalizing to find, for it throws little scent. An injured, crippled bird, in full possession of its faculties, generally is a difficult bird to find, for he seems to have the power of withholding his scent for short spells, and his ability to run is admitted by every gunner. A little advice may aid here: A bird will invariably turn from the approach of a dog and usually keeps running back and forth to the cover he first dropped in. If the handler keeps away from the dog he will find the dog will catch the bird quicker than if puzzled with useless advice.

Most writers on dog diseases seem to overlook the dreadful malady to which the canine family is heir—anaemia. The possibility of this malady being confused with distemper is certainly great; fully two-thirds of the inquiries relative supposed distemper we feel confident refer to cases of anaemia. Of all the diseases to which the dog family is subject, none can excite more sympathy in an owner's heart than this malady. Though my experience has been limited to a few cases I shall try to give a diagnosis of it for the benefit of those whose knowledge is even less extensive.

At no period have I ever seen a young dog saved after an attack of it. It is generally a long, lingering disease; the patient has spells of loss of appetite and starves amid plenty. The symptoms appear as in distemper (when no discharge is apparent), the animal becomes gradually emaciated, refusing food at times, at others eating heartily, but in each dog the loss of flesh becomes more apparent. Occasionally, and I might say in two-thirds of the cases, blotches will appear, often commencing on the belly in spots of the size of a pea, until they cover the whole body. In some cases this symptom is not apparent. Often the flesh is raw around the rump, but tapeworm may cause this, for a dog in attempting to ease an itching may create a sore that seldom heals until the cause is removed.

It is not long before the animal becomes a walking skeleton and none of the usual appetizers have any apparent effect. The gums are pale and partly cold, but seldom is fever present, or if so it is of short duration only. The animal lives, a mere shadow of a dog, an object of pity—which man's skill can render but little assistance. Some morning the poor thing is found dead, just a hide covering the bony frame of a dog.

Medical skill seems to have left this awful malady unnoticed and only of late have two canine specialists spent much time investigating its cause. But they seem to appear unanimous on one point and that is the malady is caused by the presence of numbers of minute worms in the lung. That it is a disease of the lungs is evident by its outward symptoms to the white plague which attacks man.

I have no personal reason to say that tapeworm will directly cause it, but rather that it puts an animal in a condition where a disease of this kind is more than likely to take hold. Having saved a few old dogs from it I will give the simple recipe so that it may be of help to others, but as the treatment is not considered infallible, I will say I have never saved any but old dogs with it. The patient was confined in the yard, in the open air, with only enough shelter to keep off the rain. No water was allowed. In place of water, buttermilk was kept for drinking purposes. The dog had to drink it if he wished to quench his thirst. When signs of appetite appeared he was given anything he would eat; a tonic of syrup of hypophosphites was given, and in three weeks' time the dog began to put on some flesh. It took almost three months to bring about a cure, but I am pleased to say the cure was permanent.

In one case the dog had been shipped from northern Minnesota and his condition was noticed before taking him out of the crate, but he was the easiest cured.

This disease seems to be more prevalent in swamp countries, or it may be that the swamps lower the vitality of a dog to such an extent that he is more susceptible to the disease and hence the number of cases appear more frequently in the lowlands.

Tapeworms cause attacks similar to the above described symptoms and people should usually warn their dogs before sending them to a trainer for with him they are expected to work and maladies of these kinds show themselves quickly when the dog is put to the arduous task of field work, and if the dog becomes thin the trainer is blamed for starving the animal while they have food in plenty. In rangy built dogs by lack of flesh one suspects tapeworm before he sees the animal voiding sections. But in short, cobby built dogs, the appearance is often very deceptive; the animal will appear very fleshy, and before two weeks of work has been its lot will be very thin. Watching the stools you will notice the little flat sections expelled, but as this is not noticed at first one may suspect tapeworm when he sees the animal drawing himself by the forelegs over the ground when in sitting posture. In time the evil effects become evident and it often takes several treatments before the worm is entirely passed.

Quail Hunting.—Local quail hunters are awaiting a rain or two for the betterment of present dry conditions of the ground and beating down of the heavy brush and thick weedy cover. Hunters who have recently visited the Marin county hills have returned with fair strings of quail, as have the sportsmen who hunted near Purissima and Pescadero in San Mateo county.

GOSSIP FOR SPORTSMEN.

The pleasing report is current that Professor David Starr Jordan of Stanford University will accept the appointment of State Fish and Game Commissioner tendered him by Governor James N. Gillett. One reason for going on the Commission is for the purpose of supporting Chief Deputy J. P. Babcock in his work. The intimation is almost made that the transactions of the Commission must be entirely without political influence.

The handwriting on the wall indicates that efforts will be made at the coming session of the Legislature to prohibit the sale of wild ducks in this State. This movement has a strong support in the ranks of the sportsmen throughout the State and will no doubt have an equally strong negative support. The principal reason for the introduction of the proposed change in the law is to cut out the game exterminating rapacity of the market hunter, who is regarded as a destroyer and a non-producer. Numerous other States have added the non-sale clause to their game statutes with, it is claimed, much benefit.

Whether the measure is necessary or not will be gone over. What is intended to lead up to here is the selling of wild fowl raised by private individuals or game farms. In many Eastern States this industry is a profitable and growing one. Both upland game birds and waterfowl are raised and sold. The business is carried on in certain regular lines directed by State laws which provide against the substitution of wild birds and, under penalties, exact an observance of the laws as prescribed. This industry is a well received substitute for the non-sale of game birds.

To start a wild fowl farm the first essential is to get your wild ducks for breeding purposes. This is done in the Middle West by gathering up crippled birds. In this State live mallards are used as decoys by many gun clubs, and live geese also by goose hunters. Most of these birds were wounded and disabled, picked up and taken care of until they became well again. The project so far as this move is concerned, is not a difficult one.

Numerous birds are crippled by hunters in the wing only every season. In many instances they are captured, the mutilated portion of the wing amputated, the birds soon recover and are given their liberty, being turned loose with a flock of dark plumaged tame ducks.

They sometimes wander away, but usually take kindly to their new comrades and adapt themselves to the ways of domestic ducks. When the laying season is on, the tame drakes are removed from the flock. The forthcoming broods are one-half wild blood. The year following the wild drakes are mated with the half-wild ducks, the progeny resulting being three-fourths wild duck. By following this system up to the fifth season there is but a slight trace of the tame blood left. The wild nature and habits are now distinctly apparent in these birds.

They will feed in the early twilight of morning and evening, spending the day in swimming, diving and puddling in the water along the pond shores, and taking shelter during the heated portion of the day in the brambles and bushes.

On one poultry ranch near Marine, Ill., these domesticated wild ducks are raised in great numbers. They are hatched in immense incubators and kept warm during the early spring months in hot-water brooder-houses. Later on they are placed in runs supplied with growing lettuce, grass and rape, of which they are fond. Large concrete swimming pools in the runs are cleansed and refilled daily. These birds are much more vigorous and healthy than tame ducks. They are also more prolific. Fifty ducks mated with ten drakes will, during the laying season, produce from 6000 to 7000 eggs, with an exceedingly high percentage of fertility. The egg shells being thin as wafers, the ducklings, about the twenty-seventh day, burst out of the shells as easily as moon flowers open up.

The wild ducks, which have for ages past been battling with the elements and fighting for a living, thrive under these conditions. These domesticated wild ducks are marketed at the age of from six to eight weeks, when they weigh from two to three pounds. When killed they are neither bled, picked nor drawn. They are held in cold storage at a temperature of 30 degrees for twelve hours, then packed in ice and shipped in barrels to hotels, restaurants and clubs in the cities.

This rather new industry gives the man who does not shoot a chance to enjoy a dinner on what used to be "wild duck" without fear of prosecution for an infraction of the law. With the markets thus supplied with "domesticated" wild ducks, pigeon squab "quails" and guinea-hen "grouse" and "pheasants," the man who cannot hunt wild fowl but likes to have the game laws lax "so that he can get some birds to eat," will have little room to score the customary kick, as he cannot tell the real from the imitation—unless, perhaps, the pure-food law may require the hotel or restaurant men to correctly label the "wild game" on the bill of fare.

The sport of duck hunting on the marshes within easy access of San Francisco continues excellent, particularly in the Suisun district. Northern birds have been arriving in clouds. Big flocks of canvasbacks and bluebills were observed during last week taking things easy out on the ocean waters near the Farallones. In San Pablo bay, both west and east side waters, these deep water ducks have been seen in thousands. For the first time this season "cans"

and "blueys" have been plentiful up Petaluma creek way and near Black Point.

The preserve owners on the different marshes have expended thousands and thousands of dollars on their ponds. It is estimated that on the Suisun marsh alone over 100 tons of good wheat and barley are fed to the ducks every season. The birds fly from thirty to forty miles to where this bait is, and feed during the night and go back in the morning to their loafing grounds, where they remain all day long; but some, of course, abide on the marsh, which makes the shooting good there. The benefit from this expenditure of money by the preserve owners is felt and enjoyed by all the country thereabouts, and if the baiting were stopped the birds would become more scarce in proportion, everywhere in that territory and near by.

A matter that is of engrossing interest to analysis in this State is the proposed constitutional amendment that will be submitted to the people of this State at the election next Tuesday.

The aim of this amendment is to conserve fishing rights in public waters, particularly those stocked by the State, and keep the same in perpetuity for the people at large. There is at present, it is reported, about 30,000,000 acres of land owned by the State. Title passed to private owners will not alienate the fishing rights of the people if the proposed new section to the constitution of the State is adopted. This section is as follows:

Section 25. [The people shall have the right to fish upon and from the public lands of the State and in the waters thereof, excepting upon lands set aside for fish hatcheries, and no land owned by the State shall ever be sold or transferred without reserving in the people the absolute right to fish thereupon; and no law shall ever be passed making it a crime for the people to enter upon the public lands within this State for the purpose of fishing in any water containing fish that have been planted therein by the State; provided, that the legislature may by statute, provide for the season when and the conditions under which the different species of fish may be taken.]

The deputies of the State Fish and Game Commission have had rather an active week. Among other things, the crop of game-law violators gathered in were the following:

"John Doe" was arrested near Newman for shooting at night and hunting without a license. He was fined \$50 last week by a Newman Justice of the Peace.

John A. Haugh, who used a horse to stalk geese, was fined \$50 by Judge Moore of Colusa this week.

The Molini Poultry Company of this city was investigated on Friday morning at 4:30 o'clock. Arrests followed for having in possession more than the legal limit of ducks.

F. W. Larkin of Oakland was arrested this week by Deputy Prosser for having more ducks in his possession than the law allows. The bail, \$25, was declared forfeited by Judge Smith, as the defendant failed to appear when the case was called.

Sam Grandi was fined \$25 by a Redding Justice for hunting without a license.

Two Colusa market hunters, McKenna and Coppock, after conviction, paid fines of \$50 each for going over the legal limit. They were caught with seventy-nine ducks in their possession, the result of two shots with a large-bore, duck-slaughtering gun.

Striped bass angling, while not of an overly excitable nature, is rather promising. At the various resorts results have been fairly good recently. At San Antonio slough, for instance, a week ago, a youth caught three fine fish scaling 32, 27 and 10 pounds respectively. On the following day, about 15 veterans of the clam-tossing cult could not connect with a fish.

At Wingo slough last Sunday about 20 fish were taken, light averages in weight ruled. The next day several sanguine rosters fished in nearby water, Napa No. 2, and caught several goodly sized fish.

At Rodeo, early this week good fishing was the rule. Further up the road, from Selby's clear to Port Costa, the sport has been excellent for several weeks. Large fish have been frequently caught.

Open Factory In Canada.

Three in One oil is now made in Canada as well as the United States. The Three in One people recently made factory arrangements across the border and beginning August 1st all Canadian orders will be shipped direct from their Canadian stock.

This move will be greatly appreciated by all Canadian jobbers as it immediately eliminates all annoyances and delays caused by the Custom House. The Canadian system of duties in connection with prepaid freight shipments make a very complicated matter and undoubtedly hampers the sale of United States made articles in a fine territory that is big, rich and eager to have the best of everything.

Then by manufacturing in Canada the Three in One Oil Company will save thousands of dollars in customs duties for Canadian dealers, putting the oil in their hands at a lower net price and on exactly the same basis as in all parts of the United States. This is a wise business move and the Three in One Oil Company, the Canadian jobbers and dealers, and even the much abused, long suffering consumer will all profit by this new factory arrangement.

[Continued from page 5]

that he believed Grace was as fast as Joan. Be that as it may, we will never know. The other Peter the Great starting in this race, Lulu Arion, as the race progressed began to loom up as a contender and if the race had continued would surely have been heard from. She trotted the five heats in 2:11½, 2:10½, 2:09½, 2:10½ and 2:10. In the last three heats she came from behind in the stretch and would surely have caught the leaders in another 50 yards. Sue D. went out in the lead in the second and third heats, carrying Emily Ellen in the second and Colorado E. in the third very fast to the ¾, but then she died away. It seems pretty hard that a three-year-old filly which can surely beat 2:10—two heats and maybe three—should not be in the money in a three-year-old race. I do not consider that the track was fast. Certainly it was not so good as it was the second week, hence Grace's victory is entitled to all the credit that even the most enthusiastic can give it.

The pacing race for The Tennessee was only interesting to me because Evelyn W., an unhopped pacer, won it. To use an old fashioned expression, "I would not get out of a fire" to see hopped pacers race. The 2:08 pace was started on this day and most everyone was curious to see Independence Boy, which had won four fast races within ten days at Columbus. He is a grand looker but wears the hoppers—Q. E. D.

The second day drew out the same big crowd. The two-year-old futurity which promised to be a great race between Mainleaf, Miss Stokes, Silent Brigade and Justice Brooke, lost much of its interest when Miss Stokes was drawn. She was a big favorite but Dr. Hagyard declared it would endanger the mare's life to race her, hence she was withdrawn. With her out it was simply a "march" for Justice Brooke, who beat the two-year-old colt record of 2:10½ made by Arion in 1891, by trotting the second heat in 2:09½. He is a grand colt and has the very best of manners. He should make a great three-year-old. Mainleaf and Silent Brigade each went a good race but were outclassed.

Of the other two races of the day the 2:15 trot was a hard race in which Peter Dorsey, a skiving gaited big trotter finally beat Major Wellington, one of the nicest gaited, best behaved horses seen at the meeting, and Vestale, which had won the first heat, was distanced in the sixth heat, thereby sending third money to Oxford Boy and fourth money to Harmonica, both of which had been ruled out for not winning a heat in five, thus again showing the inconsistency of some "of the rules."

The 2:11 pace was a cheap affair which looked as though a good-looking free-legged horse named Mark Night could have won if given his head. Wednesday night it rained and the track was a sea of mud Thursday and Friday. Many of the crowd who had come to see the Transylvania returned home but a fair sized crowd came on Saturday in the hope of seeing some racing. They worked the track with harrows, drags and automobiles, and called the Kentucky Futurity for three-year-old pacers. Leftwich, a daughter of Moko, won the first heat in 2:14½ (a very good performance over the heavy track), then Twinkling Dan, Gen. Watt's son of Dan Patch, won the next two in 1:16½ and 1:15½ and the race was postponed until Monday, when Twinkling Dan won easily in 2:10½. It was a popular victory, for Gen'l Watts is very much liked. The 2:19 trot was uninteresting. Morning Light, a good looking brown gelding, winning the first heat in 1:5½ and Cox's Betsy G. the next two in 1:5½ and 1:16, when it was postponed. The Transylvania, Johnston and 2:09 trot went over to Monday, when Betsy G. won the final heat in the 2:19 trot.

On Monday, after finishing up the unfinished trot, the Johnston for 2:24 trotters was called and McHenry won a good race with the brown stallion Baron Penn in 2:09½, 2:09½ and 2:10, after Creighton had won the first heat in 2:11½.

The Wilson for 2:20 pacers was merely a jog for The Abbe, who won in 2:10, 2:09½ and 2:10½. The 2:09 trot developed into a grand race and was won by Soprano in 2:08½, 2:09½, 2:10½, after Bracegirdle had won the first two heats in 2:07½ and 2:06½ with Soprano at her throat in the second heat. Andrews is a great driver and Soprano a great mare.

Then came the Transylvania and, most remarkably to me, Hallworthy was made a big favorite. Nothing he has shown in public or private warranted it and the result proved its fallacy. Joan clearly outclassed the field, but Dudie Archdale and Willy gave her a great race. The first heat, Hallworthy broke just after the word and was last horse around the turn. He could not have won it if he had wings, as Willy, Joan and Dudie were away out in front and it looked as though all the rest would be distanced. Joan won, Dudie second and Willy a bang-up third. The second heat was about the same, and the third the same until Willy broke and fell back. After the race the judges announced that the driver of Hallworthy was fined \$250 for not "trying to win the first heat." Every other of the five horses finishing behind the three leaders, just saved their distance, as it would have been suicidal to try to win after passing the ¼ pole. However, none was punished but the Axworthy horse.

Then came the championship stallion race of the American Association of Trotting Horse Breeders. Native Belle was on her good behavior and trotted a creditable race but never could bring Grace to a drive. Emily Ellen and Lulu Arion both showed the result of their long campaign and divided third and fourth money. The time was creditable—2:08½ and

2:09½. This ended a great day's racing and the crowd left surfeited.

The fifth day's racing began with the cheapest kind of a pacing race. Its only interest to me was in the presence of a beautiful gray horse from California named Athol R., a son of Athahlo. He won the first heat in 2:14½ and could have easily won the next three in which he finished 2, 2 and 5, in 2:10½, 2:11½, 2:13. There were six in the race and I would not have given him for the other five.

The next race exploded a prophecy and showed how had a gold dollar is, sometimes. A son of Pulsus (whoever he may be) named Gold Dollar came from the southern tracks to hattle with "the elect" and brought with him all sorts of stories of unlimited speed, etc., but the "Dis" in the summary in the first heat shows he went the way of many another wonder. That very good horse in Lon McDonald's stable, Major Wellington, won the first heat in 2:08½ and was a hot contender in the next three, which were won by The Plunger, a splendid son of The Bondsman out of a mare by Wilton, which won in 2:08½, 2:10 and 2:09½, and was immediately after the race sold to Mr. Schlessinger for export. Crystallion, the Patchen Wilkes entry in this race, had more speed than any horse in it, but was very unruly. He trotted the middle ½ of the second heat in 1:02, but was distanced in the next. He has been a mile for Willis in 2:07.

The third race was the 2:08 pace and was won by the hopper, Earl Jr. Queen Pomona, which I saw race in California, looked as finely as ever and paced a nice race but was outside of the money.

The fourth race was the 2:20 class trot and brought a field of nine rather fair trotters. Betsy G., Cox's mare, which had won in about the same class a week before, won the first two heats in 2:10½ and 2:11½, then Lon McDonald stepped Hy Winter in 2:12½ and the race was postponed.

Sixth day—Carnation, which had finished 5-3-3 to Betsy G. and Hy Winter the day before, stepped out and won the final three heats in a jog, much to the joy of the "little enders." Then the regular program began with the Championship Stallion Stake for three-year-old pacers. Nell Gentry won the first and third heats and Leftwich, the only other starter, the second. I had no interest in the race and did not look at it.

The race for the McDowell stake had six starters, including that very fast but erratic mare, May Earl, and the great Canadian General H., who proved to have the class of the field, winning in straight heats in 2:07½, 2:05½ and 2:06. Nancy Royce, Knapsack McCarthy's good mare, was the contender in the first heat and Brace Girdle in the other two. May Earl looked like a winner in the third heat as she got away in the lead and led to the ¾ pole by several lengths, but she faded away in the stretch and another "wonder" exploded. The 2:12 pacing race was another hodge-podge of hobbles and free legs and of little interest to me, although they did wiggle along in 2:06½, 2:07½, 2:08½. Princess Hal winning.

The 2:11 class brought out a good field and Fair Margaret, a nicely named and behaving mare by Re-Election, the Alabama horse, made it three straight, two today and one tomorrow. Startle (a very fast horse) was the contender in the first heat, and Bell Bird, a beautifully gaited, fast but erratic mare, in the second, and that grand son of Jay Bird, Justo, in the third, time 2:07½, 2:10 and 2:07½.

The 2:17 trot brought out about the same field as the 2:15 class a week before and again Major Wellington won the first two heats, only to be beaten the next three by the bounding Peter Dorsey, best time by Peter Dorsey 2:07½, quite a reduction in his record. The West Stake for the 2:29 class was simply a jog for Dudie Archdale, best time 2:09.

The Walnut Hall Cup race had four starters but three of them were crackerjacks—Joan, Billy Burke and Willy. Hallworthy with Walter Cox up cut no figure in the first heat and was distanced in the second. Willy led in each heat up to the ¾, when Billy Burke and Joan made their drive and both wore down the beautiful English stallion, who with his gentlemanly driver Pennock carried the sympathy of 90 per cent of the crowd. The time tells the tale—2:05½, 2:05½, 2:04½, Joan in the third heat beating the long standing four-year-old record of 2:05½ made by her grandfather Directum many years ago. Billy Burke, who was second, must have equaled or beaten the old record in this heat.

Then came the Grand Special—The Harvester to heat the two-mile record of 4:17 made by Cresceus. Geers appeared with the beautiful big stallion and after scoring once nodded for the word. The timers announced the ¼ as 33¼; the ½, 1:04; the mile, 2:08, and the two miles 4:15¼. I made the two miles 4:14¼. No one in the grand stand made it slower than 2:15 flat. Mr. Geers after getting down showed his watch and it stood at 4:14¼. The mighty stallion trotted the last ¼ in 31¼ seconds and showed no distress after the effort. He is a champion of the champions.

The eighth day of racing produced the greatest race of the meeting and if Ramey Macy had never driven but this one race he would go down in trotting horse history as a great driver.

The 2:07 class had but four starters—Wilkes Heart, Spanish Queen, Major Strong and General H. Major Strong got away well and won the first heat after a mighty struggle with Wilkes Heart in 2:07½, General H. won the second heat, good little Wilkes Heart again being the contender in 2:07½. The third heat Ramey Macy, the 19-year-old son of Gus Macy, got off in front with Spanish Queen, and in as desperate a finish as ever was seen lost the heat by inches to General H. in 2:04½. The fourth heat Spanish

Queen led all the way and at the distance flag had the General beaten, time 2:07½. The fifth heat was the most desperately contested heat I ever saw. Spanish Queen had the pole and made the Canadian stallion go a long mile, but he was at her throat the entire mile, each driver using all he knew to take or keep the lead. Turning into the stretch, the General outtrotted the game mare just enough to hold his position and down the stretch they thundered, the white face of the beautiful mare just showing in front. Forty feet before the finish the stallion gave it up and went to a tired break and the mare won in 2:07½, the world's record for a fifth heat. The sixth heat was easy for the mare, she leading to the ½ in the slow time of 1:08. Then the stallion moved up and chased the mare the last ½ in 1:04½, making the mile 2:12½. It was the most desperate race I ever saw and Spanish Queen is entitled to her name.

The Lexington Stake for two-year-olds was won by the beautiful son of Silent Brook, Silent Brigade, in 2:10½ and 2:10½, just equaling Arion's time, which was only beaten this year. But the race and the time scarcely brought forth a comment, so accustomed had we become to great things.

Earl Jr. was chased along in his straps to victory in the 2:05 pace, winning the first, third and fourth heats in 2:04½, 2:03½ and 2:04½, Evelyn W. winning the second heat in 2:03½. She is a beautiful creature, fast and "game as a pebble," and best of all goes without straps.

The last day was marked by another world's record being sent aglimmering. In the Kentucky Stakes, Colorado E. won in 2:11½ and 2:04½, Geo. Todd being second in the first heat and Sue D. (another Todd) in the second. The official time of the second horse in the second heat was said to be 2:06½, and as Sue D. only beat Anvil a head, both she and the Geers horse went a pretty good mile. We thought General Watts' 2:06½ a pretty small mark to shoot through the palm of the hoy's left hand. A messenger, but the 2:04½ of Colorado E. should stand for some time, but "Quien Sahe?"

Saturday night we took the 8:40 train for New York and we had spent a most delightful fortnight marred by only one distressing incident. On Monday, the day after our arrival, Ed Madden, a handsome, athletic and wonderfully developed lad of 15, son of Jno. E. Madden, the famous and world-renowned horseman, started over the fields of Hamburg place with a friend to shoot rail birds and larks. Coming home he was carelessly using his shotgun as a cane, with his left hand over the muzzle, when one barrel was discharged, the entire charge going ger came shrieking over to the Patchen Wilkes Farm, which lies just across the Winchester Pike from Hamburg Place. He met Weddie Stokes first, and the little chap with rare foresight and judgment ran to the garage, got out his little automobile and flew down to the barns where his father and I were seated. His shrill young voice startled us with, "Oh, Papa, Ed Madden has shot his hand off. Quick, get in and take him to the hospital." Quicker than I can write it Mr. Stokes was off and the lad put on full speed. They found Ed weak from the loss of blood and pain and ran the machine the 3½ miles to town in record time. It was midnight when they returned with the news that the doctors feared the hand must be amputated, but the greatest surgeons of Kentucky and Cincinnati were soon in attendance and later reports day by day were more encouraging and it is hoped now that the hoy may retain much of the use of the hand. Brave little Weddie and his tender-hearted father loomed up in our eyes as gentle heroes, and it must have meant much to the injured hoy to have, in the absence of his father, the ministrations of such kind and devoted friends. Mr. Stokes is a strenuous man, quick to think and quick to act, rigid and exacting in his business affairs, indifferent to other opinions if he thinks his right, but as a host he is indefatigable in his care of and attention to his guests, and he is devoted to his friends. I shall never forget his care of and devotion to this wounded hoy, the son of his neighbor and good friend.

Among Mr. Stokes's guests during the fortnight was the Hon. Jno. McClenon, head of the New York State Agricultural School at Alfred, near Syracuse, N. Y. It was a delight to be in the society of this gentleman. His knowledge of everything connected with the farm was amazing and his altruistic ideals of how to accomplish the most good for the agriculturist, are such as must result in the accomplishment of very great good by the institution of which he is head. Socially he was the life of the household. His fund of stories unlimited, and as a raconteur he is unequalled. I hope my good-bye to this gifted and gentle man was merely an Au Revoir. Yours,

F. J. K.

Sweet Marie 2:02 is to be bred back to Bingen 2:06½ in the spring, she having lost her foal by that stallion last spring.

CURED STIFF ANKLE OF LONG STANDING.

Is there among your stock a horse with any kind of a blemish which detracts from his usefulness or good appearance? If so, send at once for a bottle of ABSORBINE and get him sound. Harry Howell, Grand Island, Nebr., on May 5th, 1910, stated his experience as follows: "Have derived wonderful results from the use of ABSORBINE on a swollen stiff ankle of years standing. I have used only two bottles and shall never again be without it."

ABSORBINE is on sale at druggists for \$2.00 a bottle, or sent direct upon receipt of price. Write for the free booklet giving detailed instructions how to treat Bog Spavin, Thoroughpin, Wind Puffs, Capped Hock, Rheumatism, Big Knee, etc.

W. F. YOUNG, P. D. F., 54 Temple Street, Springfield, Mass.

Drink Jackson's Napa Soda.

THE FARM

DEVELOPING MILKING

SHORTHORNS.

Much has been written and said about the present day Shorthorns having to some extent lost their good milking qualities, and much has been said about rehabilitating milking strains of this breed, but comparatively little careful work has been done that could be expected to bring about much improvement, says the Farmers' Tribune. The Minnesota Shorthorn breeders have been doing some work in that State during the past few years toward developing milk strains that promises to be of some value. At the recent annual meeting of the American Breeders' Association, held in Omaha during the week of the National Corn Show, Professor Boss of the Minnesota Agricultural College spoke of the work that is being done and stated that among the more important objects sought are the following: "First, to bring about better methods of herd management, including the manner of getting cows to freshen at the right time and to observe such other conditions as would tend to improve the conditions for securing a large milk production; second, to induce co-operators to provide succulent nourishing foods that would also tend to increase the milk flow; and

third, to cultivate the habit among herd managers of milking regularly and giving more nearly dairymen's care to the herds."

Several Shorthorn breeders are co-operating with the Minnesota Experiment Station in this work. The herds of the co-operators are being visited by a circuit superintendent who spends two days at the farm of each co-operator every month in the year. During his visit the circuit superintendent weighs and tests the milk of each cow for butter fat for four consecutive milkings and each co-operator is supplied with spring balances and milk record blanks to encourage him to secure daily records of milk production. It is hoped that by using the cows showing the highest records for foundation stock and breeding them to bulls coming from high producing dams that milking strain of Shorthorns will in the course of time be developed.

This is unquestionably the proper way to go about the work of establishing a strain of good milking Shorthorns, but there is no doubt that as the milking qualities are developed beef qualities will be sacrificed to some extent, specially if extreme milk yields are sought. Farmers' Tribune does not believe that Shorthorn breeders should endeavor to produce cattle to compete with the special-purpose dairy breeds in the production of milk and butter fat. In doing this they would be obliged to sacrifice too many of the good qualities of their cattle that mean economical production of beef, but they can increase the milk produc-

ing qualities so that the cows will be able to produce bigger and better calves by reason of this higher milk flow, and thus produce better and earlier maturing beef cattle.

The Minnesota Experiment Station now owns two Shorthorn sires that are proving to be of considerable value in this work of improvement. One of these, Chief of Glenside, is out of Rose of Glenside, a cow that during eight months and 20 days producing 14,082 pounds of milk, containing 483.6 pounds of butter fat, the latter being equivalent to 567.12 pounds of butter. During the latter part of November she was still producing 45 pounds of milk per day; if her milk flow continues this cow promises to break all records for milk production in the Shorthorn breed. The other sire owned by the station is out of the dam of Rose of Glenside and his pedigree shows that he has several high milk producing ancestors.

While it is unquestionably the right thing to use such high producing individuals for foundation stock, we doubt the advisability of endeavoring to build up herds that will approach such yields. There is no getting away from the fact that beef production and milk production are physiological functions that are opposed to each other. The Shorthorn breeders should aim for a medium ground, as in that way it is believed that they will attain the greatest and most useful improvement of the breed.

As the hard work eases up on the

horses, cut down their feed accordingly.

Milk is most conveniently pasteurized in a small way in the bottles in which it is delivered. To do this use a small pail with a perforated false bottom. An inverted pie tin with a few holes punched in it will answer this purpose. This will raise the bottle from the bottom of the bucket, thus allowing free circulation of water and preventing humping of the bottles. Punch a hole through the cap of one of the bottles and insert a thermometer. The ordinary floating type of thermometer is likely to be inaccurate, and if possible a good thermometer with the scale etched on the glass should be used. Set the bottles of milk in the bucket and fill with water nearly to the level of the milk. Put the pail on the stove or over a gas flame and heat until the thermometer in the milk shows not less than 150 degrees nor more than 155 degrees Fahrenheit. The milk bottles should then be removed from the water and allowed to stand from twenty to thirty minutes. The temperature will fall slowly, but may be held more uniformly by covering the bottles with a towel. The punctured cap should be replaced with a new one, or the bottle should be covered with an inverted cup. After the milk has been held as directed it should be cooled quickly and as much as possible. To avoid danger of breaking the bottle by too sudden change of temperature, this water should be warm at first, replacing slowly with cold water.

\$7,250

GUARANTEED

Pacific Breeders Futurity Stakes No. 11

To be given by the

Pacific Coast Trotting Horse Breeders Association

For Foals of Mares Covered in 1910 to Trot and Pace at Two and Three Years Old.

Entries to close Thursday, Dec. 1, '10

\$4250 for Trotting Foals. \$1750 for Pacing Foals.

\$800 to Nominators of Dams of Winners, \$450 to Owners of Stallions.

MONEY DIVIDED AS FOLLOWS:

\$3000 for Three-Year-Old Trotters.

200 for Nominator on whose Entry is Named the Dam of Winner of Three-Year-Old Trot.

1250 for Two-Year-Old Trotters.

200 for Nominator on whose Entry is Named the Dam of Winner of Two-Year-Old Trot.

100 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot when Mare was bred.

\$1000 for Three-Year-Old Pacers.

200 for Nominator on whose Entry is Named the Dam of Winner of Three-Year-Old Pace.

750 for Two-Year-Old Pacers.

200 for Nominator on whose Entry is Named the Dam of Winner of Two-Year-Old Pace.

100 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when Mare was bred.

SIX SPECIAL CASH PRIZES FOR STALLION OWNERS.

Given to Owners of Stallions standing highest in number of Mares nominated in this Stake that were bred to their respective horses, divided as follows:

1st Prize, \$100.

2nd Prize, \$50.

3rd Prize, \$35.

4th Prize, \$25.

5th Prize, \$20.

6th Prize, \$20.

The Above Prizes will be Paid on December 24, 1910.

ENTRANCE AND PAYMENTS—\$2 to nominate mare on December 1, 1910, when name, color, description of mare and stallion bred to must be given; \$5 May 1, 1911; \$5 October 1, 1911; \$10 on Yearlings, May 1, 1912; \$10 on Two-Year-Olds, January 2, 1913; \$10 on Three-Year-Olds, January 2, 1914.

STARTING PAYMENTS—\$25 to start in the Two-Year-Old Pace; \$35 to start in the Two-Year-Old Trot; \$35 to start in the Three-Year-Old Pace; \$50 to start in the Three-Year-Old Trot. All Starting Payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Colts that start at two years old are not barred from starting again in the three-year-old divisions.

For entry blanks and further particulars, address the Secretary.

CONDITIONS:

The races for Two-Year-Olds will be mile heats, 2-in-3, and for Three-Year-olds, 3-in-5. Distance for Two-Year-Olds, 150 yards; for Three-Year-Olds, 100 yards. If a mare proves barren or slips or has a dead foal or twins, or if either the mare or foal dies before May 1, 1912, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1910.

Entries must be accompanied by the entrance fee. Nominators liable only for amounts paid in. Failure to make any payment forfeits all previous payments. This Association is liable for \$7,250, the amount of the guarantee, only. Hopples will be barred in trotting and pacing divisions.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

Money divided in each division of the Stake 50, 25, 15 and 10 per cent. There will be no more moneys in each division than there are starters.

Entries open to the world. Membership not required to enter; but no horse, wherever owned, will be allowed to start until the owner has become a member.

E. P. HEALD,
President.

F. W. KELLEY, Secretary.
366 PACIFIC BUILDING, SAN FRANCISCO, CAL.

SPECIAL PREMIUM TO NOMINATORS.

In connection with the Pacific Breeders Futurity Stake No. 11—\$7,250 Guaranteed—the BREEDER AND SPORTSMAN will be sent for one year to every nominator who sends \$2 in addition to his entry fee. If you are getting the paper send the \$2, and the time of expiration of your subscription will be extended one year. This is your chance to SAVE A DOLLAR.

GOOD SIRE IMPORTANT.

No dairyman who keeps more than a half dozen cows and expects to increase his herd can afford to be without a good dairy sire. Any person starting into the dairy business should either own a dairy bull of some pure breeding or be in a position to secure the services of one at any time.

The only way to secure and maintain a good producing herd is to breed the cows to a hull whose ancestors had good milk records, and continue to breed in the same line without crossing, saving and breeding the heifers. The dairy hull must not only be pure bred and registered or eligible to register, but his dam and granddam must show high milk yields. The heifers from such a hull will almost invariably be good producers, but of course a few may fall below a high standard.

Many dairymen who started in the business a few years ago with common cows and a pure bred hull of some good dairy strain now have cows of very high milking qualities. One man who has been breeding in this way, and carefully selecting heifers, has brought his entire herd of producing cows up to about an average of 10,000 pounds of milk a year. Such cows pay a good profit, but such cows cannot be secured unless they have been bred without change for several generations, although none of them are absolutely pure bred animals.

When you start in with a good hull of some of the standard dairy types, keep the heifers till their second calf, at which time you can tell whether they will pay to keep. If at that time they show signs of heavy production you may be sure that they are valuable, both for milk and for raising more heifers. Breed them only to a hull which you know to be of a high producing family.

The prevention of tuberculosis in cattle consists simply in keeping tuberculous cattle or other animals away from the sound ones; in keeping tuberculous animals out of the pastures, sheds or stables where sound ones are kept, including exhibitions at fairs and cattle shows; in not feeding to calves or piglets horses kept on the place the milk or milk byproducts from tuberculous cows and in not shipping sound cattle in cars that have not been previously thoroughly disinfected. All cattle that are purchased to go into sound herds should be bought from healthy or sound herds only.

GOOD ROADS AT LOW COST.

In an endeavor to stimulate interest in the "Good Roads" movement in the States through which it operates, the Pennsylvania railroad has issued a pamphlet entitled "Good Roads at Low Cost." This booklet is being given a wide distribution in the country districts throughout Pennsylvania Railroad Territory.

"Good Roads at Low Cost" was written for the Pennsylvania Railroad by D. Ward King, of Missouri, who is an acknowledged expert on road making. He is the author of a pamphlet distributed by the Department of Agriculture some time ago.

While the management of the Pennsylvania Railroad has for some time been keenly interested in the subject of good roads, in the past year it has redoubled its efforts in this direction. Meetings of agents have been held at different points, while the General Manager's staff has also taken up the subject of improving the roads radiating from the company's stations.

The railroad company has had D. Ward King, the inventor of the split log drag, which the farmers make themselves, deliver lectures at various stations in the State of Pennsylvania. The split log drag, which can be made by any one following the directions given in the pamphlet just

SAVE-THE-HORSE

SPAVIN CURE

Every letter we publish goes as far and means as much as the contract, for they tell of results that are true. They are not from friendly trainers and agents, but from actual users, and are honest in every word they say.

JOHN C. HEADDEN
ATTORNEY AND COUNSELLOR AT LAW
205 BROADWAY NEW YORK

Spring Valley, N. Y., Sept. 26, 1910.
Troy Chemical Co., Binghamton, N. Y.:
Gentlemen: Enclosed find check for \$5 for which please send me another bottle of "Save-the-Horse" to my farm at Spring Valley, New York.
The bottle of "Save-the-Horse" I bought from you last March I used on my driving horse for a splint and his leg is now perfectly clean. Yours truly,
JOHN C. HEADDEN.

Tamagua, Pa., R. F. D. No. 1.
Sept. 20, 1910.
Troy Chemical Co., Binghamton, N. Y.:
Dear Sirs: That "Save-the-Horse" I got from you for blood spavin worked fine. Enclosed five dollars for another bottle. Your remedy will do just what you claim for it on splints and blood spavins anyway. It is the best remedy ever. I am sure I could sell lots of it, because it is no fake; it is all right.
WILLIAM E. STEIN.

"Save-the-Horse" permanently cures bone and hog spavin, ringbone (except low ringbone), curb, thoroughpin, splint, shoe boil, windpuff, injured tendons, and all lameness, without scar or loss of hair. Horse may work as usual. \$5.00 per bottle, with a written guarantee as binding to protect you as the best legal talent could make it. Send for copy and booklet.
At all druggists and dealers, or express paid.

TROY CHEMICAL COMPANY,
Binghamton, N. Y.

FOR SALE AT A SACRIFICE

The Double Futurity Winner

RAY O' LIGHT, 3, 2:08 1/4

REG. NO. 46270

Sired by the King of Race Horses, "Searchlight," 2:03 3/4. First three dams great brood mares and 2:40 producers.

Ray o' Light (2) 2:13 3/4, champion 2-year-old 1907, winner 2-year-old Pacing Breeders Futurity.

2:08 1/4, champion 3-year-old 1908, winner 3-year-old Pacing Breeders Futurity.

Ray o' Light (4), public trial 2:06.

Brown stallion, 5 years old, sound, stands 15 1/2 hands and weighs 1100 lbs.; sure foal getter, and I believe he will pace in 2:04 next year. I am compelled to dispose of all my horses owing to other business interests, so I have marked this great young horse down cheap.

For price, extended pedigree, etc., address
E. S. TRAIN, Santa Cruz, Cal.

SAVINGS INVESTED IN REALTY.

Put your money in residential building lots. Be sure they are in improved sections. Buy close to a big city. Purchase early; don't let others make profits out of you. The greatest fortunes were made by realty investments. We will offer 1000 choice building lots on December 1st, at prices that will pay very handsome profits. Terms of purchase, \$25.00 cash per lot, balance in thirty-six equal payments. No interest or taxes during this period. If you die before completing your payments, a deed is given your heirs, without further cost. Size of lots, 25 feet by 120 feet and upward. Price of lots, \$75.00 and upward, according to location. By investing in land you own something for your money. Investments in stocks or savings accounts are under the control of others. We guarantee you a profit of at least 25% for the first year. Subscription lists are now open. By remitting us \$10.00 per lot, subscribers get first selections. The first 500 subscribers will also receive a credit of 10% on their purchase. Act now. Let us make money for you and protect your savings.

We want agents in your locality. Write us the names and addresses of some of your neighbors. Do it now.

NOTHING BUT GOOD RESULTS

Have used GOMBALTS CAUSTIC BALSAM for more than 20 years. It is the best blister I have ever tried. I have used it in hundreds of cases with best results. It is perfectly safe for the most inexperienced person to use. This is the largest breeding establishment of trotting horses in the world, and we have your blister often.—W. H. BAYBOND, Prop., Belmont Park Stock Farm, Belmont Park, Mont.

USED 10 YEARS SUCCESSFULLY.

I have used GOMBALTS CAUSTIC BALSAM for ten years; have been very successful in curing curb, ringbone, capped hock and knee, bad ankles, rheumatism, and almost every cause of lameness in horses. Have a stable of forty head, mostly track and speedway horses, and certainly can recommend it.—C. C. CRAMER, Training Stables, 390 Jennings Street, New York City.

Sole Agents for the United States and Canada.
The Lawrence-Williams Co.
TORONTO, ONT. CLEVELAND, OHIO.

Roads" movement is actuated by the desire to have the highways leading from the stations in passable condition during all seasons of the year. In the winter months thousands of miles of dirt roads are almost impassable, and farmers are unable to get to and from railroad stations, thereby causing a congestion of traffic when roads are opened.

The railroad company has, therefore, interested itself in good roads with the view that they will open up the rural districts and hasten their development, which will be a forerunner of increased railroad traffic.

PORK CONSUMPTION STEADILY GROWING.

The day of the hog's triumph is at hand and the world with few exceptions is singing psalms of praise to him. Popular as the hog is today, he has not reached the heights in popular favor that he will reach, and the day is not far distant when Texas, the natural home of the hog in the United States, will be the largest producing State in the Union.

For thousands of years the hog has been the most slandered of all domestic animals. He has been boycotted and pronounced as unclean by many religions, the devotees of which have conducted a crusade intended to put him out of business as a producer of human food, but he is still with us and on the up grade. While the opposition to the hog is strong in some nations, he is still triumphant, for today the consumption of pork is strictly growing larger. One reason for this is that hog products can be kept for a long time and still be articles of food.

Bacon stands at about the head of our meat products. Today in the markets of Chicago bacon is retailing at 27 cents per pound, even the bacon of our own hogs, which are not supposed to be very valuable for the production of bacon. Irish bacon is now being sold in Chicago at 40 cents per pound, but it is found only on the tables of the rich. It shows how high bacon stands as a food product when the Irish can send it to the greatest American hog market in the world and sell

it at an advance over our own bacon. But bacon can be carried to any part of the world and still be regarded as a delicacy. Probably there is no meat at this time so widely appreciated as bacon. Even the physicians are ordering it for weak stomachs.

Next to bacon stands ham, and with

Monadnock Building, San Francisco.

many people it stands at the head of the list. It has been celebrated in song, and long years ago the writer heard gangs of negroes as they returned from the field at the end of a day's work, sing:

"If yer wants to git good lihhen,
Go down in de kitchen wid de han's;
Dar yet gits de best ov hacon
Dat good old juicy ham.

Oh, ham, ham for dis nigger,
Cause it is the best ov meat;
Yer can hake it, yer can hite it,
Yer can fry it, yer can stew it;
Oh, gh me de good ole ham."

The ham is used as a trade mark on hillboards nowadays; it has grown steadily in popularity with the people of the world, and it is still growing. It does not have to be packed in barrels and pickled to keep it from spoiling, but once cured a ham can be dropped in a sack, a grip or a trunk and carried into the heart of Africa, where the explorer can have his ham and eggs.

Barrels of pork and tins of lard are purchased for the natives of the nations of the world and enter into the supplies of the ships that sail to the remotest seas. This is not true to the same extent of beef or mutton or poultry. None of these can be so perfectly kept, and this keeping quality is what has made the products of the hog the most desirable.

The lesson to be learned is that the demand for hog products is on such a firm basis that hog raising is one of the branches of agriculture that can be engaged in with the certainty of a good market for all future time.—Citizen-Star.

DENATURED ALCOHOL IN SOLID

FORM. Cleveland Special Dispatch.

A well-known Wheeling, W. Va., chemist has succeeded in producing chunks of denatured alcohol in crystal form by means of a small infusion of certain acids whereby crystals of an alkaloidal nature very closely resembling physiologically the effects of ethyl alcohol distilled from sawdust. The method employed and the results obtained are somewhat similar to the crystallizing of rock candy or that of Saccharine containing as it does 350 times the sweetening strength over that of cane sugar, so this alkaloidal crystallized alcohol contains many times the strength over the ordinary denatured fluid alcohol; they will yield 194 proof denatured alcohol with a greater heating and cooking power for stoves than gasoline, and it is absolutely non-explosive.

A sample can containing 50 solid cubes, 1 stove and the secret formula how simple it can be made at home, will be mailed to you, postpaid, on receipt of \$5.00. Address

Isn't He Worth Saving?

ABSOLUTELY CURES SPLINTS, SPRAINS, WIND PUFFS, REMOVES BUNCHES.

Why trade off or sell at a beggarly price a good horse just because he "goes lame," "throws a curb" or develops some other blemish? There is nothing in the way of Splints, Curbs, Splints, Windpuffs or Bunches which will not yield readily and permanently to treatment with

QUINN'S OINTMENT.

Dr. E. H. Davenport, a prominent physician of Sheridan Ind., writes: "I have used a number of remedies for the removal of curbs, splints, thickened tendons and tissues generally, but for the last two years I have not been without Quinn's Ointment. I have tested it thoroughly at different times, and say without hesitancy that it is the only reliable remedy of the kind I have ever tried." Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write us for particulars, testimonials, etc.

World's champion three-year-old trotter.

Every Horse Should Be Clipped in Season

It is the wise thing to do for the clipped horse not only is easier to clean and looks better, but clipping does much to make him immune from coughs, colds and the usual ills that come to a horse from standing in a coat of long, wet hair after any hard exertion. The perspiration evaporates quickly from the clipped animal and leaves him dry. On cold days a blanket when he stands keeps him comfortable.

The Best Clipping Machine the World has ever Seen is the Stewart Ball Bearing Enclosed Gear Machine

It is the easiest turning, fastest clipping and most enduring of all machines. The materials in it are all of better quality, the workmanship is superior. All file hard cut steel gears, protected from dust and dirt and running constantly in oil. It couldn't be better for twice the money.

SPORTSMAN and TELEPHONE

EVERY TIME a man wants to get away from all connection with the busy world, the telephone is an important helper.

The Local Service is useful in arranging his affairs at home, and the Long Distance Service of the Bell System helps him to decide where to go and what to take.

By means of his Bell Telephone he can find out whether the fish are biting or the birds are flying, and whether guides or horses can be secured.

After he has been out awhile, if he wants to get word from the city, the nearest Bell Telephone is a friend in need.

The Pacific Telephone & Telegraph Company.

Every Bell Telephone is the Center of the System.

Notice to Horsemen: German Distemper Remedy is conceded to be the best remedy on the market for the treatment and prevention of Distemper, Hooves, Pink-Eye, Catarrhal Fever, Kidney Trouble and Indigestion. It is used by all the best horsemen who are acquainted with it and its merits. Price 50c per bottle. For sale by all druggists or sent prepaid. Free beautiful display horse picture on request.

AT THE PHOENIX FAIR.

Our reports from the Territorial Fair at Phoenix are very meagre, the election news preventing good reports being sent out by the Associated Press.

Fair Maiden, by Prince of India, won the 2:15 trot, purse \$1000, in straight heats, time 2:14½, 2:09¾ and 2:10½. Dr. Lecco won third money in this race.

Wilbur Lou, yearling colt by Kinney Lou 2:07¾, dam Louise Carter 2:24 by Chestnut Tom 2:15, trotted a mile against time in 2:23 equalling the champion colt record held by Adbell since 1894.

Copa de Oro, br. stallion by Nutwood Wilkes 2:16½ dam Atherine 2:16 by Patron, paced a mile against time in 1:59.

Helen Stiles 2:09¼, bay mare by Sidney Dillon, dam Silver Haw by Silver Bow 2:16½ won the Copper stake for 2:19 trotters, purse \$3000. Time of three heats, 2:11¼, 2:10¼, 2:09¼.

Carlokin, bay stallion by McKinney, dam Carlotta Wilkes by Charley Wilkes won the 2:09 trot, purse \$1000. Zombronut by Zombro won the third heat. Time 2:10¼, 2:08½, 2:08¾, 2:09.

Happy Dentist, chestnut gelding by Nutwood Wilkes, dam Azrose by Azmoor, won the \$3000 Copper stake in 2:06¼, 2:09¾ and 2:07½, and two days later he won the 2:08 pace \$1000, in 2:07¼, 2:07 and 2:07¼.

ARNER'S DAUGHTER PACES MILE IN 2:10½.

The last meeting of the season of 1910 was held by the San Francisco Driving Club at the stadium in Golden Gate Park last Sunday with a large crowd in attendance. Six races were on the card and as but two were decided in straight heats there was lots of argument over the relative speed and staying qualities of the different horses among their friends and admirers. The first race was a free-for-all pace and there were eight starters. J. Kramer's little mare Celia K. by Arner 2:17¾ (full brother to Diablo) was driven from wire to wire in the first beat of the race and won it in 2:10½ a very fast mile considering the day and track. Walter Wilkes, her main competitor in the event was allowed to finish last in this heat, and beat her the next two in slower time. Celia K. was a good third in the last heat. Celia K's mile in 2:10½ is the fastest that has been seen on the stadium track for some time. All the races were interesting and the time was creditable in every event.

First race, free-for-all pace, one mile:
F. Burton's Walter Wilkes 8 1 1
J. Kramer's Celia K. 1 8 3
D. Campbell's Ginger 4 5 2
M. M. Donnelly's Mollie Button 5 6 4
H. Frellson's Jack 6 4 6
P. Kohn's Alfred D. 7 7 7
Time—2:10½, 2:14½, 2:14½.

B. J. Rybiki's Babe Benton 3 1 1
F. L. Matthes' Walter G. 1 4 4
J. McTigue's Darby Mc. 8 2 2
G. Tassi's Steve D. 2 5 3
W. Higgenbottom's Siesta 5 3 5
W. P. Hummer's Clara G. 4 6 6
M. M. Bates' Lassie M. 7 7 7
Time—2:25, 2:23, 2:24.

Third race, 2:24 pace, one mile:
S. Burns' Dickens B. 1 1 1
H. Cohn's Eden Vale 2 2 3
H. M. Ladd's Ring Rose. 4 3 3
H. Campedonico's Baldy Mitchell. 3 5 5
H. Schottler's Lulu S. 5 4 4
Time—2:22½, 2:17.

Fourth race, 2:19 trot, one mile:
E. Domenichini's Reno D. 1 2 1
F. L. Matthes' Raymond M. 2 1 2
V. Verilhac's Dr. Hammond. 4 3 3
H. C. Ahler's Sunset Bell. 3 4 4
Time—2:19½, 2:17½, 2:19.
F. Pereira's Little Medium 2 1 1
Geo. Giannini's George Gin 1 4 2
F. L. Matthes' Opitsah 3 2 3
W. J. Kenney's W. J. K. 4 3 4
Time—2:18½, 2:23, 2:23.

T. H. Corcoran's Callicuti Girl 1 1 1
H. Hagensen's Search Me 2 3 3
F. P. Lanterwasser's Prince Almo 4 2 2
J. Kramer's Cloudlight 3 4 4
Time—2:24, 2:23½.

Mr. A. W. Cowell of Stockton has had the misfortune to lose his yearling by Star Pointer 1:59¾, dam Bonnie W.

COPA DE ORO 1:59.

The first California bred pacer to get into the two-minute list is Copa de Oro, the beautiful bay stallion owned by Mrs. L. G. Bonfílio of Los Angeles, and trained and raced by W. G. Durfee. Copa de Oro paced a mile at Phoenix last Monday in 1:59 and is now the fastest pacer ever bred on the Pacific Coast. Mr. Durfee expressed the opinion several months ago that this stallion was capable of a mile better than two minutes and he has demonstrated it for a fact at the first trial since making the prediction.

Copa de Oro is by Nutwood Wilkes 2:16½, dam Atherine 2:16½ by Patron, second dam Athene by Harold, third dam Minerva by Pilot Jr., fourth dam Bacchante Mambrino by Mambrino Chief, fifth dam Grey Bacchante by Downing's Bay Messenger, sixth dam by Whip Comet, seventh dam said to be by Messenger.

Copa de Oro is one of the handsomest stallions living, paces without the hobbles and in many hard fought races has time and again demonstrated his gameness. In 1908 he raced on the Grand Circuit, winning six hard battles and over \$9000 in purses, coming home with a record of 2:03¾. He was sick during that winter and in the spring of 1909, but started late in the season short of work, and in his third start lowered his record to 2:01¼. This year as W. G. Durfee did not go east and there were no classes for Copa de Oro on this coast he was kept at Los Angeles and given training this summer with the idea of sending him against his record at Phoenix. It was thought certain that he could pace in two minutes under favorable conditions, and his stepping a mile in 1:59 the first time out shows that he has not been overrated. The Breeder and Sportsman extends its heartiest congratulations to the horse, his owner and his trainer.

W. P. McNair is starting the horses at Phoenix.

COPA DE ORO 1:59

A CHAMPION COLT TROTTER.

Down at the Phoenix track last Monday, the opening day of the Territorial Fair and race meeting, Wilbur Lou, a yearling colt by Kinney Lou 2:07¾ owned by the Hemet Stock Farm, trotted to a record of 2:23, equalling the record made by Adbell, son of Advertiser and Beautiful Bells, sixteen years ago at San Jose, and which has since stood as the world's record for a trotting yearling colt.

Wilbur Lou was bred by the late Martin Carter, proprietor of Nutwood Stock Farm, Irvington, Cal. After that gentleman's death the horses of that once famous farm were sold and Mr. F. H. Holloway, superintendent of Hemet Farm, purchased among others the mare Louise Carter 2:24, in foal to Kinney Lou, and she soon afterwards dropped the colt that has now by his performance at Phoenix, added additional honors to the splendid record made by the late Martin Carter as a successful breeder of record breaking trotters. Wilbur Lou has had but limited training, but showed that he was a good gaited trotter from the first and his Phoenix performance has attracted the attention of the trotting world. The following tabulation will give an idea of the blood lines of this great colt:

Wilbur Lou (1) 2:23

Kinney Lou 2:07¾	{	McKinney 2:11¾	{	Alcyone 2:27
			{	Rosa Sprague
		Mary Lou 2:17	{	Tom Benton 2:32¼
			{	Brown Jenny
Chestnut Tom 2:15	{	Nutwood Wilkes 2:16½		
		Zeta Carter		
		Director 2:17		
		Ingar		Anna Titus

who saw the mile paced believed Vernon McKinney could have paced it in 2:04 or better.

The half mile pole was reached in 1:02, the third quarter was paced in 32 seconds and the last quarter in 31 seconds.

Besides the sensational mile by Vernon McKinney, an exhibition mile was paced by the two-year-old One Better by Nearest McKinney 2:14½, the colt being driven by "Farmer" Bunch and the mile was in 2:20 2-5. One Better is out of the mare Much Better 2:07¼.

There were four races held during the afternoon, the results being as follows:

Free-for-all pace:
Grace Chalmers (p), (Chalmers) 1 1
James McKinney (t) (Foley) 2 3
Black Beauty (p) (Friedberger) 3 2
Laura D. (t) (Carroll) 4 4
Time—2:38 2-5, 2:36.

2:20 class, trot:
McDougald (Kemp) 3 1 1
Linden Girl (Nance) 1 2 3
Harold K. (Galindo) 2 3 2
Time—2:24 1-5, 2:36, 2:18 2-5.

Free-for-all pace:
T. D. W. (Kemp) 1 1
Blance A. (Bunch) 2 2
Time—2:17, 2:26 2-5.

Two-year-old trot:
Florana (Myers) 1
Monochrome Jr. (Nance) 2
Time—2:56.

Exhibition miles:
One Better (Bunch) 2:20 2-5
Vernon McKinney (Parker) 2:05
Quarters, :31 3-5, :30 2-5, :32, 2:05; first eighth, :16 2-5.

WILL ANNOUNCE PURSES JANUARY 1ST.

Ray Mead, proprietor of the San Jose Driving Park, states that on January 1st San Jose will announce a fair and race meeting for 1911, with full particulars as to purses, dates, conditions, etc., and that it will be one of the most attractive and liberal programs ever offered barners horsemen on the Pacific Coast. The purses will open for entry very early, those naming their horses first being given the privilege for a very small entry fee, which is to be gradually increased from month to month until entries finally close. The San Jose Chamber of Commerce is to aid in the giving of a big county fair during the same week of the meeting and it is confidently believed that ten thousand people can be attracted to the fair grounds each day. Mr. Mead says that full particulars will be announced through the Breeder and Sportsman January 1st.

There are a dozen trainers at work at the San Jose Driving Park, and while the work is not heavy at this time of year, they are all out on the splendid track every day jogging their horses. Budd Doble has his magnificent young trotter Kinney de Lopez going barefooted at present as he is not speeding him any and believes it does a colt as much good to go barefoot part of the time as it does a boy. Kinney de Lopez is one of the grandest formed trotters that ever looked through a bridle and is now handsome as a picture and as good as he looks. It don't make a bit of difference whether he is shod or barefoot, is booted or not, he always has that perfect trotting gait, clean and clear before and behind that a champion trotter should have. He was permitted to cover a mare or two in 1909 when a three-year-old and there is a weanling foal by him down at Soquel, whose owner, John Hogan, says is the best looking foal of its age on the coast, and consequently several breeders have asked Mr. Doble the privilege of sending mares to Kinney de Lopez in the spring of 1911. Mr. Doble has not yet fully decided to accede to this request, but he is considering it and if the chestnut son of Kinney Lou makes a season it will be a limited one. Kinney Lou himself is in fine shape and it is amusing to see him call Mr. Doble with a low whinny when the latter is yards away. The stallion knows his master's voice as far as he can hear it.

John Phippen is working four head, among them a big three-year-old by McKena (son of McKinney 2:11½ and Helena 2:11½) dam by Nutwood Wilkes 2:16½ second dam Novelist 2:27 by Norval, third dam Elsie by Gen. Benton. What a splendid mixture of producing blood there is in this colt. He is a trotter. Bon Roy by Bon Voyage, that trotted a mile in 2:27 as a two-year-old is another very highly bred colt. His dam is by Dexter Prince, second dam by Electioneer and third dam by Gen. Benton and fourth dam, a thoroughbred mare by Ashland. Phippen has a two-year-old pacer by Dictatus Medium out of Letter B. 2:17½ a mare that made a good campaign on this coast in 1896, and took her record at Stockton. She was by Ward B., a son of Eros, and her dam was Brown Irish by the thoroughbred horse Judge McKinstry. The remaining one in Phippen's string is Bonnie Derby a five-year-old trotter by Bonnie Direct 2:05½ out of a mare by Charles Derby.

Henry Helman has seven head in his stalls. His stallion Alconda Jay will do a good season next spring as there are several youngsters by him that are showing a lot of speed. The McKinney trotter Thomas M. 2:12½ is in Helman's string and there is a hay mare, full sister to him, called Maggie M. that has a lot of speed, although she is green yet. The three-two-year-olds by Alconda Jay are looking well, and "Deacon" Church's roan filly by Birdman out of Mountain Maiden, dam of Thos. Carneal 2:08½, etc., looks like a real race horse right now.

Ted Hayes has five head—Bon Voyage and his four sons, Bon McKinney, Voyageur, Jean Valjean and Bon Volante. Bon Voyage now has twelve standard performers as follows: Jean Valjean, pacer, 2:10, and the trotters Bon Vivant 2:10½, Bon Guy 2:11½, Sweet Bow 2:17½, Voyageur 2:23½, Phyllis Winn 2:24½, On Voyage 2:25, Le Voyage 2:25½, Bon Volante 2:25½, Bonaday 2:27½, Bon McKinney 2:28, Manager 2:30. Of these Sweet Bow, Bon Volante, Bon McKinney and Manager all made their records as two-year-olds. Manager is owned over east somewhere and made his record this year. He is out of Ruth Mary by Directum, and is a full brother to Viaticum that took a matinee record as a three-year-old this year of 2:21½. Hayes wants to buy a Bon Voyage that is staked and says he will never again buy a colt that is not staked. He offered Ray Mead \$500 for his yearling filly by Bon Voyage, dam Carrie B. 2:18, the dam of Ray o' Light 2:08½, etc., and offered to pay \$250 more if she won a stake as a two-year-old and \$250 additional if she won as a three-year-old. Mead replied that \$1000 cash would take her.

This filly of Ray Mead's is as grand a yearling as there is anywhere and she is a trotter, and she is as fully developed as many two-year-olds, but not over developed for her age. She should be heard from next season when the stake races are trotted. Mead's three-year-old filly Lovelock 2:19½ by Zolock out of Carrie B. is a very fast pacer, goes without hoppers and one of the promising side wheelers in the country. Mead got a broodmare prize when he bought Carrie B. Her weanling by Kinney Lou is a magnificent youngster.

Will Scott, son of the veteran horseman H. Scott of San Jose, has quite a string of promising young horses that he is breaking and training. The stallions Scott McKinney and Owynee are both in fine shape, and the former is being trained a little to show that he has speed. A six-year-old by Scott McKinney is a nice going trotter and a two-year-old by the same

horse is a very sweet gaited pacer. A two-year-old filly by Owynee was driven an eighth in 20 seconds by Will Scott the other day and it is only just broken. Mr. Scott has two good stallions in Scott McKinney and Owynee and has had a very liberal patronage for them from the farmers of Santa Clara county, who like to own good, fast roadsters.

Jos. Cuicello has his horses at the San Jose track again after a successful season on the coast this summer. Prof. Heald 2:24½ proved himself one of the best mud trotters at the races up north, and earned \$900 over and above all expenses including the payment of a big bunch of last year's entrance money. Lady Inez dunched her record to 2:12½ and came home in good shape while little Mamie Alwin won several races and now has a three-year-old record of 2:20½. Her yearling half brother Wilbur Lou distinguished himself this week at Phoenix as is noted elsewhere.

Jack Villar has a nice string. He has the green pacer mare Bertie Logan by Bert Logan 2:16½, out of Blue Bells 2:19½. Bert Logan is by Colbert 2:07½, out of Miss Logan 2:06½, and was bred by Dr. A. W. Boucher, who sold him East, where he has sired the phenomenal two-year-old pacer Pat Logan. Others in Villar's string are Demonio Nutwood, chestnut horse by Demonio 2:11½, dam by Nutwood, a free-legged pacer that has been a mile in 2:11; also a black two-year-old by Nearest McKinney 2:14½, dam Maud Sears 2:23 by Wayland W. 2:12½; this is a very promising colt that with only two months' work has been a mile in 2:26 and a quarter in 35 seconds without the straps; Jane is a two-year-old filly, also by Nearest McKinney, and out of a mare by Algona. She has been a mile in 2:32 on the trot; a yearling colt trotter, full brother to Just It 2:19½, and a two-year-old filly by Scott McKinney, dam by Dictatus completes Villar's string. This trainer is a San Jose resident, bred and raised in the Garden City, and during the last year has trained nearly all the local horses that have been trained at this new track and has met with considerable success. Among those he has developed during the past season are Princess Lou, Pacer, matinee record 2:13½; Mike, pacer, matinee record 2:18½; Manuel, pacer, trial 2:17; William B., trial 2:17; John C., trial 2:19; Belle Seymour, trial 2:25, and Chief, trial 2:25.

E. W. Flagg has three horses owned by J. F. Bennett. They are the bay pacer stallion Diablo McK. by Diablo, dam by McKinney; a green pacer gelding by Native State 2:14½, dam Belle McKinney, and a three-year-old colt by Arthur Holt, dam by Sinbad. All are doing well.

The Breeder and Sportsman's whilom correspondent, C. C. Crippen, has a few horses at the track, his pride being the grandly bred three-year-old colt by Guy Dillon 2:23, dam Carlotta Wilkes, the dam of Inferlotta 2:04½, Carlokini 2:08½, Mary Dillon 2:06½, and several more in the list. This is beyond any question one of the best bred young stallions living and as he was not staked nothing has been done with him, but he will be given a chance to serve a few high-class mares, and when he has fully matured will be given a record. He is a good individual, with the best disposition one could ask, and there is a future for him on the track and in the stud.

The San Jose track is in perfect condition and could be made ready for record breaking in 24 hours. Ray Mead deserves a lot of credit for the work he has done here on a very limited capital and we are glad to know that he has arranged to make many further improvements for the accommodation of horses and horsemen. There will be 150 or 200 horses in training there by the first of March.

THREE-YEAR-OLD TROTTERS OF 1910.

The season just closed was by far the most notable one in respect of colt trotters even seen. While it is true the record for two-year-olds was not lowered, those for three and four-year-olds were beaten so badly it seems likely a long time will elapse before another step toward 2:00 is taken by the nags of those ages.

Until Native Belle appeared in 1909 no trotter had been capable of a mile in 2:10 at two years, and it naturally was supposed the Moko filly would for some time be the only member of the 2:10 list at her age. This season two others have made good their claims to the highest place that can be assigned to a two-year-old—to enter the 2:10 list in a winning race. Miss Stokes did this at Columbus, her best mile being 2:09½, and Justice Brooke won his race at Lexington in 2:11½, 2:09½, so the novelty of a two-year-old trotter in the 2:10 list disappeared in a twelve-month from the day it was established.

It was only a few seasons ago that the first three-year-old trotter to beat 2:10 in a race appeared, but now the Kentucky futurity—if the day and track be good—that did not furnish a heat or two under the 2:10 mark would be considered an apology for a race, and this season when Colorado E., Grace, and Emily Ellen were the heat winners they put in five miles that averaged under 2:10.

Aside from the trio, only two other three-year-olds beat 2:10, they being J. Malcolm Forbes 2:09½, in a race, and Lou Billings 2:08¾ in a trial against time. So of the hundreds of three-year-old trotters trained last summer the championship simmered down to four at the best, because it was known Lou Billings would not be allowed to compete in races.

Of these four Colorado E. and Grace were so much the best the others did not class with them, and horsemen give Colorado E. credit for being much the superior of Grace, as when she beat him he was

three seconds short of his best speed, as he showed the following week by taking a record of 2:04¾ in the second heat of a winning race, while in the event where Grace was victorious the fastest heat was 2:08, and Colorado E. lost that by a retrousse nose, after winning the opening heat in 2:08½ and then, after breaking in the first quarter of the second mile, being beaten only a little by Emily Ellen in another performance better than 2:10.

As showing the blood lines that produced the crack three-year-old trotters of 1910, the ones able to trot in 2:10, I give a list of the distinguished ones, as follows:

Colorado E., b. c. by The Bondsman, dam by Jay McGregor2:04¾
Grace, ch. c. by Peter the Great, dam by Onward2:08
Lou Billings, b. f. by J. A. McKerron, dam by Sidney Dillon2:08¾
Emily Ellen, blk. f. by Todd, dam by Bow Bells2:09¼
J. Malcolm Forbes, br. c., by Bingen, dam by Grand Sentinel2:09½

But there are a good many interesting facts about these young trotters the tabulation does not show. For instance, the dam of Lou Billings is Lou Dillou 1:58½, world's champion trotter, and as she is the first foal of the mare it looks as if the champion was certain to make a name for herself as a broodmare, just as another champion, Nancy Hanks 2:04 has done.

The dam of Grace is Orianna 2:19½ and she also produced the wonderful colt trotter Czarevna (sister to Grace), which was unbeaten as a two-year-old and got the best race record for that age by a filly. At three Czarevna won a heat in 2:07½, the best race record for a three-year-old filly, and should have been victor in the Kentucky futurity. No mare other than Orianna ever produced two foals to beat 2:10 at three years of age, and in a way the circumstances places her high among broodmares, especially as fourteen years ago she had out a three-year-old, Barnetta, that still is talked about by Kentuckians as the one that should have won the futurity that fall. Barnetta took a record of 2:15 and as her sire, Barnhart, brother to Allerton, never got anything else worth talking about the credit of Barnetta will have to go to Orianna. She has had, I think, not more than four foals by the Peter the Great. Bred to Hinder Wilkes she produced a 2:26 trotter, but there appear to be half a dozen years in the history of Orianna when she was barren or the foals did not amount to anything as trotters.

Another mare that figures largely in the above list of crack three-year-olds is Santos, by Grand Sentinel. She is the dam of Peter the Great, which furnished the Kentucky futurity winner in Grace, and she likewise is the dam of J. Malcolm Forbes, which made a race record of 2:09½, and before he trained off was figured to be a worthy opponent of the mighty Colorado E. The story of Santos and her seven 2:30 or better trotters got by seven different sires, was interestingly told in this column last winter by Peter V. Johnston of Kalamazoo, Mich., who broke Peter the Great as a yearling and drove him to victory in the Kentucky Futurity.

Peter the Great was one of the early foals of Santos, while J. Malcolm Forbes is her last, the old mare having been barren for the last two years. To have produced a colt capable of winning the three-year-old Kentucky Futurity, and then going on and becoming a great sire, as did Peter the Great, and then have the foal of her old age race better than 2:10 as a three-year-old, makes Santos look to some people even better than Orianna, because it is only now and then that a truly notopch sire comes along while fast colt trotters come every season.

The fact that the sires of four of the five 2:10 three-year-olds of 1910 have fast records—Peter the Great's mark being 2:07½; J. A. McKerron's 2:04½, Todd's 2:14½, and Bingen 2:06½—is the best sort of evidence on the question of whether the possession of a record necessarily improves a stallion as a sire. It certainly in many instances improves his opportunities immeasurably by causing to be bred to him a lot of high class mares that—but for his record—assuredly would be mated with other horses, —H. T. White.

The Old Glory Sale will open one week from next Monday. This sale is always looked forward to as a gauge of the market for next season.

Work on the Los Angeles track is progressing, but it will hardly be ready to work horses on before next March.

With good hay to be had at \$10 per ton, trainers can make a little more profit in 1911, than has been the rule with their during the past two or three years when \$20 to \$25 was the price of hay in California.

There are at least a half dozen of the get of Kinney Lou in California that are high class trotting prospects.

The next new moon will occur December st. That's the day that entries close for Pacific Breeders' Futurity No. 11. See that your mares are nominated in this stake.

Pleasanton, San Jose and Sacramento will be favorite training grounds this winter.

Drink Jackson's Napa Soda.

NOTES AND NEWS

Detroit will have a \$10,000 purse at the fall meeting there next year.

Hedgewood Boy 2:01 hurt a tendon at Louisville last month and has not started since.

Arion 2:07½ now has five 2:10 trotters to his credit the latest being Governor Francis 2:08½.

Major Delmar 1:59½ and George C. 2:05½, are now used as run-about horses at the Ardmaer Farm of their owner, William Bradley, at Raritan, N. J.

Nearly 75 trotters are going through the weaning and halter-breaking process at Walnut Hall Stock Farm, under the direction of Superintendent Burgoyne.

Boy Voyage 2:12½ is now eight years old and has 12 standard performers. His three fastest are the three-year-old Bon Guy 2:11½, Bon Vivant 2:10½ and Jean Val Jean 2:10. The last named is a pacer.

Sidney Dillon will have about one dozen new standard performers for 1910 when the season is ended. Eleven of his get have already entered the list this year.

Mr. A. R. Shreve, owner of Ruby Light (2) 2:19½ has moved from Cathlamet to Portland, where he is engaged in the commission business.

What 2:05 trotter will be the first to sire a 2:05 trotter. John A. McKerron 2:04½ was thought to have a cinch on the honor this year with his son Jack McKerron 2:07½ but the latter went wrong and was thrown out of training.

Gus Macey has worked Lillie W. in 2:09½ twice since the close of the Lexington meeting and is satisfied she will be all right for 1911. Lillie W. worked in 2:10 at Detroit about July 1 and then fell a prey to sickness and was thrown out of training.

Dudie Archdale, owned by Frank G. Jones of Memphis, Tenn., and driven by Geers, was the largest money winning trotter on the turf the past season. She made thirteen starts, of which she won seven, was second five times, and was third once, and her total winnings amounted to \$29,734.33.

N. A. Richardson, administrator of the estate of Ben Davies of San Francisco, has petitioned the court for permission to sell the real and personal property of the dead horseman valued at \$20,154. The pacing stallion Zolock 2:05½ is a part of the estate.

Kingbrook 2:12½ by The King Red, has gone into winter quarters at the home of his owner Mr. Higgins of Deer Lodge, Montana. This four-year-old was one of the best trotters seen in the northwest this summer and that he will trot well below 2:10 next season is freely predicted. He showed better than 2:10 this year.

General W. B. Chisholm of Cleveland, O., has traded the noted pacing stallion Blacklock 2:04½ to W. H. Stubblefield, Jr., of Oran, Mo., for the two-year-old pacing colt Pat Logan, by Bert Logan, p. 2:16½. Will Rash drove Pat Logan a mile in 2:09½ at Galesburg, Ill., this season. Blacklock was formerly owned by Mr. Stubblefield, who sold him to C. K. G. Billings for \$10,500. Blacklock will be in the stud at his old home.

A dispatch from Lexington states that Gus Macey has purchased from John Waters of Baltimore for George H. Estabrook, the five-year-old bay gelding Aero, by Arion. The price paid was private, but said to be a good one. Aero is thought to be one of the most promising candidates for the slow class events in 1911, and will join the Estabrook stable, which is now resting up in Lexington until Dec. 1, at which time they will be sent to Denver for the winter.

The Valley Driving Club of Hemet, Cal., has taken membership in the National Trotting Association, and the project of holding a fair and race meeting next year is under consideration. One of the best half mile tracks in the country is located at Hemet and a good fair and race meeting could be made a great success there as it would appeal strongly to the farmers and land owners of that section. The club has held several very successful matinees during the year and now has a balance of nearly six hundred dollars in its treasury.

Miss Katherine Y. Wilks, proprietress of the Cruickston Stock Farm, of Galt, Ont., has an ambition to win the Kentucky Futurity with a colt of her own breeding, and she believes that in Kentucky Todd she has a sire capable of doing the trick. One colt by this futurity winning stallion out of a daughter of Bingen, which took a yearling record of 2:28½, was driven a quarter a shade better than 32 seconds. This is a shade faster than Colorado E. showed before his purchase as a yearling by George H. Estabrook.

Wilbur Lou 2:23, by Kinney Lou 2:07½ is a world's champion trotting colt.

Copa de Oro 1:59—California's first two-minute pacer. He is by Nutwood Wilkes.

Helen Stiles 2:09½ by Sidney Dillon has won very close to ten thousand dollars this year.

Bon Vivant (3) 2:10½ by Bon Voyage, goes to the Old Glory Sale which opens at Madison Square Gardens on the 21st instant.

Capt. McKinney, son of McKinney and sire of last year's good trotter Lady Jones 2:07½ is one of the stallions consigned to the Old Glory Sale this month.

Rio McKinney, own brother to Sweet Marie 2:02 and said to be sensationally fast, will go under the hammer at the Old Glory Sale.

From 1905 to 1910 Zombro 2:11 has never missed having from one to three new 2:10 performers enter the list.

As long as horses without records have a greater earning capacity than those with records, just so long will trainers be trying to win money with a horse without marking him.

The yearling brother to Native Belle is one of the most impressive youngsters at Walnut Hall, and grooms all say that he is a trotting wonder. Superintendent Burgoyne regards him as one of the best, if not the best colt they ever raised, judged by present appearances. He will probably not be sold, but retained for stud purposes on the farm.

Geo. T. Beckers left Columbus, Ohio, on November 3d via Denver and Salt Lake for his home in Los Angeles and expected to reach there Monday, November 7th. On the same train in an express car was his great stallion Zombro that served 100 mares this year, thirty-five of which had records. Mr. Beckers states that he will probably stand Zombro in California in 1911. John Shank, of the Wannamaker Horse Goods Department, Philadelphia, says the numerous sucklings by Zombro owned in Pennsylvania are very highly regarded by their owners who are very anxious to breed back to the great son of McKinney.

"Prevention and Treatment of Diseases of the Domestic Animals" is a new work from the pen of Dr. Kemlin Winslow and is published by William R. Jenkins & Co., of 851 Sixth avenue, New York. To stock owners this book should prove very valuable, as by it the more common diseases of animals can be diagnosed and prescribed for. Each disease and its symptoms are carefully described and the proper treatment given. The book is neatly bound in cloth, is 6½x9½ in size and the price is \$3.50.

An exchange says: "All indications forecast the horse in the ascendancy and is likely to continue so indefinitely. This is true of track, speedway, show ring, carriage, family, saddle, general purpose and also heavy draft horses, in fact all kinds except hobbled pacers. It has been proven that intelligent, good headed horses can easily be educated not to fear automobiles and may be driven with safety on roads where automobiles are frequently met, provided the automobiles are driven at a reasonable rate of speed and give the horse a chance to turn out. The present scarcity of good horses will have a tendency to encourage farmers in the country to breed more extensively in 1911 than they did in 1910."

General Watts (3) 2:06½ by Axworthy 2:15½, has been given a limited amount of work during the summer with a view of keeping him in condition and trotted on Monday of last week the most extraordinary mile of his entire career. Although the horse has been jogged constantly for three months and has been given a few fast miles, he is still very high in flesh and, having been out of active training for two years, must be short and far from his best form, yet he was driven by Mike Bowerman a mile in 2:08½, the last quarter of which was in 28¾ seconds.

W. D. Grand, one of the prominent men in the horse sale circles of New York, speaking of a recent sale where the offerings were what is called "second hand" horses, said: "Everything that looked like doing winter work in the city brought astonishingly good prices. I don't think that in 20 years' experience I ever saw second hand seasoned horses as high. Pairs brought from \$650 down, single horses from \$340 down, and some useful hacks brought around \$250 to \$300 each." The "horseless age" seems to be getting farther away instead of nearer.

Geo. H. Estabrook, of Denver, Colorado, owner of the world's champion three-year-old Colorado E. 2:04½ has purchased from J. D. Grover, of Georgetown, Kentucky, the yearling colt McKinney Mac 2:27½, paying \$5000 for him. The colt is out of Lady Brussels by Wilton, a mare than Senator Bailey recently paid \$3000 for. Lady Brussels is ten years old and is already the dam of Soudan 2:14½, Zarina 2:19½, Eleanor C. 2:22½ and McKinney Mac (1) 2:27½. The second dam of McKinney Mac is Mignon by Robert McGregor 2:17½, and is the dam of five standard performers.

Helen Stiles' winnings for this year are very close to \$10,000. She started without a record and now has a mark of 2:09½.

Geers tops the list of winning drivers, Cox coming second, Murphy third, McDonald fourth and McDevitt fifth, all with more than \$30,000.

Salinas, San Jose, Pleasanton, Santa Rosa, Woodland and Chico could organize a circuit and give racing next summer before the North Pacific Circuit or the California State Fair opened that would be successful with competent management.

A number of young mares by Prodigal (4) 2:16, owned by Senator Bailey, will be bred this spring to Border Knight 2:12½, the handsome son of Bingen 2:06½, that is the property of an eastern fancier, but will make the coming season in Kentucky.

Is it not singular that neither Uhlan 1:58½, the world's champion trotter without a runner pulling a dirt shield in front, and Joan (4) 2:04½, that holds the world's champion four-year-old trotting record, are from dams that were not eligible to registry as standard-bred trotters?

In his campaign of 1910, The Abbe, in winning eleven straight races, took the word in thirty-two heats, of which he won thirty-one, the fastest in 2:04 and the slowest in 2:12, the average time of the thirty-one being 2:07½. The one heat which he lost was won by Evelyn W., 2:02½, who beat him a short head in the opener in the C. of C. at Detroit in 2:05½.

The preliminary catalogue of the dispersal of the Claihourne Farm, Lexington, Ky., has just been issued by the Fasig-Tipton Co., and all of the horses will be sold at the Old Glory sale at Madison Square Garden, New York, November 21 to 26. J. K. Newman selected nothing but the best when he established this farm and the public will have the advantage of securing a wonderfully well bred lot of mares and colts at their own prices.

Secretary Horace Wilson, of the K. T. H. B. A., stated Tuesday that already forty box reservations for 1911 have been made. He said that if present indications can be taken as a criterion that the meeting in 1911 will be the greatest that Lexington ever witnessed and even greater than we have dreamed of. Mr. Wilson now faces a problem, that of having enough boxes to fill all requests, but he knows what to do and it's a safe bet that everybody will be satisfied.

Chas. James left for Pleasanton last Tuesday with five head of horses that he will train over that track this winter. The horses are Rey McGregor, Billy Burk, a three-year-old filly owned by Mr. Chase of the Sperry Milling Co.; a mare by Cupid owned by William Michtelson, and a filly by Strathway that belongs to S. Christenson. Mr. James, who has conducted the McKinney stables just outside the park, close to the stadium track, during the summer, and cared for a large number of matinee horses, says he is very grateful for the patronage extended him there during the year, and hopes to meet many of his friends at Pleasanton during the winter.

General H. 2:04½, the Iowa-bred trotter, is the latest trotting stallion to enter the 2:05 list, and is the fourth stallion to cross the 2:05 line this season. The others are The Harvester 2:01, Boh Douglass 2:04½ and Colorado E. 2:04½. This brings the total number of 2:05 trotting stallions to eight. In the order of their records they are as follows: The Harvester 2:01, Cresceus 2:02½, Bob Douglass 2:04½, John A. McKerron 2:04½, Colorado E. 2:04½, Admiral Dewey 2:04½, General H. 2:04½ and Main-sheet 2:05. Thus it will be seen that the 2:05 list for trotting stallions has doubled up this season, very good evidence that the speed of the trotter is increasing. All of these trace to Hambletonian 10 in the direct male line; The Harvester, Bob Douglas, General H. and Admiral Dewey trace to Electioneer in the direct male line, and two, John A. McKerron and Colorado E. to George Wilkes.

A horse owner who has been up against some "plowed field" tracks this year, writes as follows to Spirit of the West: "Owners and drivers have no kind of protection under the present rules. Unless the A. T. A. makes a change in the behalf of owners and drivers there will have to be an organization formed by the horsemen themselves to get protection. Under the present rules an association can take a road grader and scrape off the grass of a half-mile circle, call it a track, join the A. T. A., advertise a first class track, give a meeting, get the horse owners and drivers to make entries, and when they ship there they find a half-mile of ground scraped off with no brace in the turns, rough, unlevel and called a track, and not fit to speed a farm team over with safety. But the horsemen that have made their entries must either start or pay their entrance fees or else they are suspended by the A. T. A. Now this is not an honest rule and does a great deal of injustice to the ones that furnish the sport and life of the meeting. The A. T. A. should have a rule compelling each track to be constructed and built to a certain standard and kept in good condition before it could become a member of the A. T. A., and when said track failed to do this it should be punished by not allowing it to collect any entrance fee. If we had this kind of a rule we would have better tracks, faster racing, less crippled horses and

discouraged horse owners. Every circuit should also have a circuit secretary that is a horseman who knows the rules and would take an interest in the horsemen as well as in the associations. I would be glad to bear other horsemen express themselves on this subject."

Arner 2:17 $\frac{3}{4}$ came very near getting a 2:10 performer to his credit when Celia K. paced a mile in 2:10 $\frac{1}{2}$ at the stadium Sunday. She can beat 2:10 over a mile track. Arner should be given a chance in the stud. He is out of the greatest broodmare in the world.

Fred H. Chase & Co. have decided to postpone the date of their next sale to December 19th. It was intended to hold this sale on the evening of November 28th, but it was finally decided that the later date would be better, especially as several owners who could not have their horses ready by the last of the month will have them in shape for a December sale. Chase's holiday sales have always been very successful.

There are several buyers in the field for colts that have stake engagements, but the prices asked by owners are pretty stiff as they have their own eyes on the stake money.

A larger percentage of those trotters that have entered the extreme speed list 2:10 this season are members of the George Wilkes than any other family; that is, they trace directly in the paternal line to George Wilkes 2:22. Electioneer 125 ranks next to George Wilkes 2:22 in this respect.

Full brothers and sisters differ greatly in speed capacity, and campaigning qualities, says the American Horse Breeder. Clara, by Seely's American Star 14, produced several foals by Hambletonian 10; but Dexter 2:17 $\frac{1}{4}$ was the only Champion trotter among them. Miss Russell produced several foals by Harold 413, but none of her others were the equals of Maud S. 2:08 $\frac{3}{4}$ in speed. Waxana produced several foals by Electioneer 125, but Sunol 2:08 $\frac{1}{4}$ was the only one distinguished for extreme speed.

It is only when the men most deeply interested in harness racing devise some means to actually put a stop to the annoying scoring which characterizes almost every harness race that this branch of sport will attain the standing in popular favor which it deserves. If an earnest effort were made to do away with scoring it could be done. If a rule should be adopted requiring horses to turn much nearer the start than they do now and limiting the scores before a heat to two it is dollars to doughnuts that the trainers would adapt themselves to the conditions such a rule would bring about, and the start would be on the first score more times than it would be on the second. With every driver trying to jockey to get the best of the start and a starting judge who thinks he is filling the position by waiting for the drivers to get in line of their own accord scoring becomes so prolonged and so tiresome to the spectators that it does more harm to the racing interests than any other one condition. Who is not tired of it?—Exchange.

WHAT THE BRONCHO SAID.

I did not know what they wished, and they never told me. I am a horse, and the horse has been for ages the servant of man, and one of the most easily trained and managed of all animals. But they insist that I am different from the rest of my kind. And so they must "but" me. The other day I was brought out into a ring before a crowd of brutal men and women. In the throng I noticed one man in particular, a man who wore things—blinders, I suppose—over his eyes, and had prominent teeth. They called him Teddy. Well, they brought me out before the crowd, and a beast of a man tried to ride me. I was not angry, but I was frightened out of my horse wits. I was nervous, excited, and worse than all, puzzled and perplexed. The man tried to get on my back. I heard them talking about a fight, and so I gave them one, supposing that that was what they wished. The man acted as though he were my enemy. Was I to blame for treating him so? There was a fight, and I won. The man could not stay on my back. After a hard struggle I threw him.

Then someone cried: "Bulldog him." I did not know what was meant, but I soon found out. While I was held fast by two or three men, another man reached over another horse, caught hold of my ear and bit through it. The idea, I learned, was to make me submissive. They told me that I "shivered," and I guess I did. Certainly the pain was great. But it did not make me submissive. For when the man tried a second time I ran into a fence and through a gate, and thus upset him again. But how my ear did hurt! For that, however, no one seemed to care, not even the man with blinders in the stand. I was only a broncho, and so it did not matter. To this hour I have no idea as to what was desired of me. All I know is that the day was hot, the ground hard and parched, the crowd noisy and cruel, and that I was frightened, excited and bewildered. Oh, yes, I know, too, that my ear is very sore and painful. I have heard that in other parts of the country there are societies for the prevention of cruelty to animals. But there does not seem to be any such organization in Clevenne. Perhaps people who belong to them are molly coddles. If I am a brute, what is the man who bit my ear?—Indianapolis News.

THE ESTABROOK STABLE.

Colorado E., together with Country Jay 2:05 $\frac{1}{4}$, C. The Limit 2:06 $\frac{1}{2}$, Spanish Queen 2:07, and the new recruit, Gold Dollar (4) 2:09 $\frac{1}{2}$, have been turned out at the farm of ex-Sheriff Henry Bosworth on the Versailles pike, where they will run until about December 1, when they will be shipped to Denver, which place Macey considers as the best winter training ground at which he has ever been located, says Trotter and Pacer.

The Estabrook stable will be a formidable one the coming season. For the M. & M. and other show classes he has that fast pair of green mares, Fanny Lawson, now four, and Lillie W., now a five-year-old. Fanny Lawson was second to the crack filly, Czarevna in 2:12 $\frac{1}{2}$ and 2:13 $\frac{1}{2}$ when this great little miss annexed the major part of the purse in the two-year-old division of the Kentucky Futurity, this mark at that time being the record for two-year-old fillies and the fastest two heats by a two-year-old of any sex.

She had not received regular training because of curbs which had been bothering her, and her performance was considered high class. She was also second in the Horse Review Stake to Czarevna the preceding week at Columbus, and took second money to Robert C., since known as The Wolverine, when that youngster won the Lexington Stake in 2:13 $\frac{1}{4}$, 2:14 $\frac{1}{4}$, then the record for two heats by a two-year-old colt.

This was her last appearance in a professional race, but she was matined the past season by her owner, and gained a matinee record of 2:18 to wagon over a half-mile track, which is a creditable performance, as not much was done with her in the way of regular training.

Lillie W. trotted a mile in 2:07 with the last half in 1:01 $\frac{1}{4}$ in the late fall of her four-year-old form

his last two starts in the season by a severe curb. Still he has accomplished so many wonderful feats that his admirers, and every lover of the light harness horse is an admirer of the aged chestnut, would not be surprised at anything that he should do, and it is expected that he may take a mark in that very select list, the 2:05 class, before he makes his surrender to Father Time, and as he will be fifteen before another opportunity will be accorded him, it does not seem that his days on the turf can number many more, for he has from youth been seriously afflicted with unsoundness that would long ago have put an end to any other horse's career.

Gold Dollar is the latest acquisition to the stable and has never started in the Estabrook colors. He has won in the neighborhood of fifteen races this season, which was creditable, as he started the season green. His races were all in the Southern circuit, in which he suffered but one defeat, to the seasoned campaigner, Pansy Elknut 2:09 $\frac{1}{2}$. He was brought to Lexington to start in the 2:13 trot, won by The Plunger 2:07 $\frac{1}{2}$, but was acting badly at the score and trying to run off.

When the word was given he got from under control of his driver, and ran practically the whole mile, being declared distanced. After the heat he was brought out and worked a mile nicely in 2:06, which Macey timed, and which so pleased him that he purchased the horse and thinks him the making of quite a useful trotter, a belief that is shared by everyone who witnessed the performance.

The price paid for him was a reasonable one, and said to be considerably less than any horse bought by Mr. Estabrook, who has sought the best and paid splendid prices for them.

Before seeing the work of the horse Macey had paid more than ordinary attention to him on account of his marked resemblance to Country Jay, which fact the

KINNEY LOU 2:07 $\frac{3}{4}$

Sire of the champion yearling colt Wilbur Lou 2:23.

and did it in such impressive style that she was soon afterward purchased by Macey and Mr. Estabrook named her in the M. & M. and many other important stakes.

She worked in 2:10 early last season, which, at that time, was about as good as any of the stable had been. She soon afterward, however, when the M. & M. was not very far off, took distemper and did not round in time to start in any races, but recently trotted a mile and repeat in 2:09 $\frac{1}{2}$.

With such a pair of good green ones it would seem that no owner had a much better chance of duplicating the victory of Spanish Queen in the M. & M. in 1908 than will the Estabrook stable in the coming year.

For the faster classes the stable is unusually well provided for, as they have Country Jay 2:05 $\frac{1}{4}$, Spanish Queen 2:07, and Gold Dollar 2:09 $\frac{1}{2}$. The two first named are too well known to need any comment here, for both have been in the limelight during the past two or three seasons. In 1908, the white-faced daughter of Onward Silver 2:05 $\frac{1}{4}$, won first money in the coveted M. & M., Transylvania and other races, so that her total for the season was more than \$30,000, a feat which few trotters have ever accomplished, and trotted possibly the best race of her career here in the 2:07 trot, in which she defeated that sterling trotter, General H., 2:04 $\frac{3}{4}$, and was separately timed in 2:05. She should be especially good next year, as she closed the season the season in better condition than in either of the preceding ones.

Some doubt exists as to whether Country Jay, the world's champion come-back horse, can again come back, as the old hero was prevented from making

former owner apprised him of before the horse was seen by him. Since going to the paddock he and Country Jay have taken up with each other and at a little distance it is hard to distinguish one from the other. Gold Dollar is, however, a better individual than Country Jay, which is a much better looking horse than when he was on the turf nine years ago.

The mile in 2:06 of Gold Dollar is one and one-quarter seconds better than the world's record now held by Uhlan at 2:07 $\frac{1}{4}$. As above stated he is now but a four-year-old and his sire is Pulsus 2:09 $\frac{1}{2}$, a son of Egotist, while his dam is by Goldust, which, together with the color of the gelding, is doubtless responsible for his name.

The only doubtful feature about Gold Dollar is his manners, and the fact that he won so many races during the recent season proves that he is not generally a bad actor and under Macey's handling will likely be well behaved next year.

San Francisco is today one of the handsomest and smoothest turned stallions to be seen in Kentucky. Walnut Hall, Moko and Ozono, the other leading stallions at Walnut Hall Farm, are all good-looking, but San Francisco takes the shine off them all when he is led out for inspection. In this respect he throws back to his great ancestor, Alcyone, who had the distinction of heating Mambrino King in the show ring. He is, too, one of the most popular sires that ever stood at the farm; over eighty mares were bred to him this year.

They have been small fields at Phoenix but the racing has been good.

Drink Jackson's Napa Soda.

THE KNOCKED-OUT LIST.

The new 2:30 list for the year is well nigh completed and is being compiled in many different quarters by various persons. But there is another quite large list that might be made up were it as readily secured that would possibly prove quite as important and suggestive. It would be composed of the vast number of prospects blighted in the making, knocked out by one agency or another, or for this or that reason, not generally accounted for. There would be found at every point where speed development was carried on to any considerable extent, horses that were as sound, and well put together and richly endowed on the first day of January as the best seen on the tracks of the country that never attained any credit, or won anything but the odium of being crippled, broken down, or put aside for some future day, if it chanced that they were ever taken up again. Some of these were victims of accidents, or happenings quite likely unavoidable with only the average thoughtfulness and foresight of men to guard against such occurrences. Others came to an evil fate from the parsimony or greed of cruel owners or handlers not willing to make the expenditure of time and money needed to prepare them for the severe ordeals they would be required to sustain, or demanding of them performances that they were not conditioned up to the point of sustaining. But the vast majority undoubtedly were brought to grief because of lack of comprehension of the science of making and fitting and using horses in as strenuous life as that of the race track, by those engaged in the business. It would not seem, from actual examination and observation of horses put into training stables, that there is one in a hundred, if in a thousand, so inherently defective as not to admit of being trained, conditioned and raced, if judicious-

down are frequently patched up and brought to large serviceableness by unusual care and painstaking shows wise methods at the start would have obviated such result, since nothing that is patched can equal the sound and unharmed. Like the doctors who use the graves to bury their bad work, there are trainers burying under excuses and defamation of the best of horses more animals than they ever make, and carve permanent success and fortune out of it. It would be a Godsend to the horsekind if some would devise a scheme for listing and showing up the spoiled and ruined specimens of every trainer's handiwork, as well as his proud credits.—Spirit of the West.

RACING FOUR-YEAR-OLDS.

It is only in the last two years that there has been any change of sentiment in regard to racing four-year-olds, and even now the average horseman figures that the good ones at that age that are not injured by being raced are the exceptions to the general rule, writes Henry White. Six four-year-old trotters entered the 2:10 list this year, and another, Soprano, which was a brilliant three-year-old in 1909, taking a record of 2:08¾, reduced her mark to 2:07¼ in a six-heat race where two world's records were beaten and a third tied.

She was first or second—never beaten more than a head—2:08¾, 2:07¼, 2:08¾, 2:06¾, 2:07¾, 2:09, doing that sort of work against aged horses. The fourth heat of that race was a new world's record, the fifth tie, and the sixth a new record. The race showed Soprano to be a wonder, but it also demonstrated that it is foolish to expect a four-year-old to cope with aged horses unless the youngster is a speed wonder of the Joan brand.

The four-year-old trotters that entered the 2:10

Joan, and Billy Burke was something of a star in 1909. He was worked a mile in 2:07¾, which certainly was fine, but he did not race well. He had shown 2:10¾ as a two-year-old, only to be beaten in races through breaking, and as a four-year-old he was uncertain, winning a brilliant race one week and losing a poor one the next.

Captain George is another of the jumpy ones that keep owners and trainers in a state of nervous strain from spring till fall. The Captain trotted around 2:08 as a three-year-old, but his manners were bad and he was beaten. Then Tom Murphy took him in hand, and in the first part of the campaign the stallion seemed reformed—so much so that he won a race at Kalamazoo and beat 2:10 three times. Later along Murphy worked him a fourth beat in 2:06½, but when it came to racing the Dewey colt was not a good proposition.

PRINCIPAL MONEY WINNERS.

The principal money-winners in the meetings of the Grand Circuit and at Lexington, which is practically a continuation of the big series of meetings, are as follows:

Trotters.	
Dudie Archdale 2:06¼	\$23,759.33
Colorado E. (3) 2:04¾	18,255.50
Joan (4) 2:04¾	17,243.75
Emily Ellen (3) 2:09¼	17,127.75
Grace (3) 2:08	16,670.50
Hailworty 2:05¾	13,260.00
General H. 2:04¾	9,942.00
Billy Burke (4) 2:06¾	8,690.00
Willy 2:07¼	6,895.00
Bob Douglass 2:04¼	6,700.00
Alice Roosevelt 2:08¼	6,460.00
Native Belle (3) 2:06½	6,434.00
Gamar 2:07½	6,350.00
The Harvester 2:01	4,575.00
Bisa 2:10¼	4,350.00
Henry H 2:07¾	3,950.00
Justice Brooke (2) 2:09½	3,900.00
Creighton 2:09¼	3,750.00
Ario Leyburn 2:17¼	3,250.00
Startle 2:05½	3,240.00
Bervado 2:08¼	3,190.00
Eva Bellini (3)	2,751.00
Oxford Boy Jr. 2:17¼	2,750.00
Major Strong 2:07¼	2,550.00
Peter Dorsey 2:07¾	2,350.00
Country Jay 2:05¼	2,235.00
Necia (3) 2:13¼	2,000.00

Pacers.	
The Abbe 2:04	\$17,510.00
Evelyn W. 2:02¾	8,120.00
Branham Baughman 2:24¼	5,936.75
Ess H. Kay 2:02¼	5,400.00
Earl Jr. 2:03¼	5,220.00
Twinkling Dan (3) 2:10¼	4,450.00
Nell Gentry (3) 2:09¼	4,287.00
Leftwich (3) 2:12¼	4,185.75
May Day 2:03¼	3,910.00
Ross K. 2:01¾	3,875.00
Lady Isle 2:06¼	3,710.00
Independence Boy 2:03½	3,400.00
Aileen Wilson 2:02¼	3,181.00
Directum Regent (3) 2:09¼	2,961.25
Merry Widow 2:05¾	2,740.00
Darkey Hal 2:02¼	2,725.00
Sara Ann Patch 2:06½	2,350.00
Walter W. 2:04¾	2,330.00
Baroness Evelyn (3) 2:09¼	2,182.00
Ella Ambulator 2:05¼	2,120.00

A large number of these performers won money in addition to that credited to them in this list at meetings other than those in the Grand Circuit and at Lexington. Several of them raced at Terre Haute and Grand Rapids before the Grand Circuit opened, and a number also raced at the meetings in the Great Western Circuit later in the season.—Horse World.

The fame of Paronella, who is generally considered the world's greatest brood mare, was considerably enhanced when the black stallion, Ormonde, was given a time record of 2:08¾, one morning during the trots at Lexington, says Trotter and Pacer. As she had already produced those sterling horses, Country Jay (14) 2:05¼, Kentucky Todd (3) 2:08¾, and Judge Parker (5) 2:10¼, she became the dam of the three fastest trotters ever produced by one mare and also the four fastest to the credit of any one matron. By this she regained the credit of having produced the three fastest trotters, as Nancy Hanks had displaced her of this honor when Nancy McKerron took a race record early in the season of 2:10½, as she previously had to her credit Admiral Dewey 2:04¾, Lord Roberts 2:07¼. Paronella is also the dam of Nella Jay (3) 2:14¼, winner of the Kentucky Futurity and credited with a mile in 2:08, and Paronhurst (3) 2:27¼, who trotted a trial in 2:11 at that age. Paronella is by Parkville, son of Electioneer.

No man, since Robert Bonner passed away, has taken so much interest in high class trotters for pleasure driving, or paid so high prices for several of them, as has C. K. G. Billings, the owner of Lou Dillon 1:58½ and Uhlán 1:58¾. Like the late Mr. Bonner, Mr. Billings never races his horses for money. It is hinted that Mr. Billings may become the owner of Joan (4) 2:04¾.

Zombro 2:11 got a new 2:10 performer at Phoenix when Zombronon won the third heat of the 2:09 trot in 2:08¾. This gives him two new 2:10 performers for 1910.

CARLOKIN 2:08¼

Winner at Phoenix this week.

ly and wisely handled, without suffering injury or harm in any way interfering with capacity to perform the service expected and exacted. This is emphatically the case when the trainer is not put under stress requiring forcing unduly development or precipitating use before fully prepared and ready for it. It is true the capacity of endurance is not the same in all animals, and it is not discoverable on the mere surface, and previous to the application of actual test, though it is equally true that nature in every animal gives unfailing and accurate indications to those watchfully and closely discerning when the limits are being reached, and when the danger point of injury is being approached, and if a man is not expert enough to discover and be guided by these premonitory warnings his place is somewhere else than at the head and in charge of a training or racing stable. The case is a very rare and exceptional one indeed where the man in whose hands the breaking down of an animal occurs, if not of purely accidental kind, should not lay it to his own door and blame himself for it. A very wise and largely experienced divine addressing a young man just entering upon the pastorate of a church, said to him, "Whatever goes wrong, always blame yourself for it," and there was a vast deal of sense to the admonition. It is common to lay the blame on the poor creature, as though possessed of weakness or defect of some sort, though in reality nothing of the kind either is apparent or existent. It is nothing in justification or examination to cite the examples of the same things occurring in the charges of noted drivers and trainers, as is a common resort to fly to, because many such employ the license of their success to justify little more than real butchery practiced in building themselves up. The very fact that the crippled and badly broken

list in 1910 were the following:

Joan, br. f. by Directum Spier 2:11¼; dam by Axtell 2:12. 2:04¾
 Billy Burke, b. c. by Silent Brook 2:16¼; dam an Ondale 2:06¾
 Dr. Treg, b. h. by Tregantle 2:09¼; dam by Moquette 2:10 2:08¾
 Martha Tipton, b. mx. f., by Walnut Hall 2:08¼; dam by Moko 2:09¼
 Capt. George, br. c. by Admiral Dewey 2:04¾; dam by Jefferson 2:09¼
 Vito, b. c., by Prodigal 2:16; dam by Moko. 2:09¼

Every one of the new 2:10 four-year-old trotters is by a fast record sire, and four of the six—Joan, Billy Burke, Dr. Treg, and Capt. George—are from record mares, the dam of the champion being a hobbled pacer with a 2:18¼ performance to her credit. The breeding of the second dam of Joan is not well established, but investigation in progress makes it appear probable she was a member of the Wilkes family, being a daughter of Newton's Allie Wilkes.

Like a good many champions of recent years, Joan was unthought of as a possible record maker when the season began, and even now, when she has done far more than any other four-year-old, her pedigree does not impress, except in the male line, where it is of the sterling sort, going to Dictator through Directum and Director, with a dash of Axtell through the dam of the sire of Joan. Unlike the other champion colt trotters, the great four-year-old is purely an accident and a freak in breeding, and it is safe to say that, in spite of all she has done, no hopple pacing mares by Hal Braden will be mated with Directum Spier on the theory that another Joan will result.

The other four-year-olds that got into the 2:10 list this season were better three-year-olds than was

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT.

AFTER TINAMU IN SOUTH AMERICA.

Our southern "first" was March 1st, and our bird a tinamu, the *Nothura maculosa* of naturalists. I was asked to shoot on the opening day with a neighbor, and rode over to his estancia the day before, escaping a dust storm by arriving early. We had at night the familiar talk and smoke outside the house in brilliant moonlight—so bright, that it almost killed the light of the occasional firefly which sailed past, and you could read easily.

The "first" was a hot, dazzling day, with the thermometer up to 90 degrees in the shade, and to anything you like in the sun and a nasty strong wind. We were three guns in all, attended by a peon (on foot, much to his disgust) and a little daughter of our host on her pony, as bag carriers. We had two pointers; one was a rather small English dog, with a nervously sensitive nose, retrieving well from land or water; the other was one of a breed found in the country, of which I have seen several. They are big, heavy dogs, with short tails, about half the length of those of the ordinary English pointer. The make and shape of these dogs greatly resembled that of the Spanish pointer figured in Daniel's "Rural Sports," but their tails were even a little shorter. Daniel, remarking upon the Spanish origin of the breed, adds that the original type "possesses all the gravity of his nation, both in the solemnity of his appearance and the slowness of his motions." If he could have seen Don ranging over the camp, he might have modified this opinion. Don was a good enough dog, but rather wild, and had to be logged sometimes by the simple expedient of thrusting one of his forefeet through his collar!

The English prejudice against starting upon any work without a firm foundation of food prevented our getting off before 8:30. The early meal indulged in by most "Ingleses" must not be called breakfast; for that meal takes place a little before noon. Eating in the early morning is contrary to the custom of the country—a native being satisfied by sucking "mate" and smoking a black cigarette. We made for the maize chacra first, and found a few birds among the late crop; then beat the pajonales along a canada and a bare hill—bare of birds and grass alike; and so down to the big pajonales on the coast of the river. As we worked along into the rincón of this and the tributary canada—the hanks of both which were wooded there—a flock of screaming green parrots banished the ideas of a September day at home which the "bang, bang!" and the plump little brown birds almost induced. The strong wind taking the birds on, or bringing them back high overhead at speed, gave many hard shots; and by the time we had worked back over open campo to the house, at about 11:30 a. m., we had only accounted for sixteen and a half brace and a couple of pintail ducks.

One of the beauties of tinamu shooting is, that as the birds do not go in coveys you get all single shots; and, indeed, though the birds are more often than not found in couples, a chance at a right and left shot is rare. Then followed a wash, a deep, deep drink, breakfast, a pipe (until it dropped out of one's mouth), and a long siesta—that unutterable blessing in a sun-scorched country, if only you can have the luck to keep your room fairly cool and the flies outside. A cup of tea at four o'clock finished off the remains of the morning's thirst, and then we turned out to get a few more brace before six o'clock.

We found the maize crop in the chacra full of birds. But something had gone wrong. We were quite demoralized; broke line, and finally had to cease firing for fear of plugging one another. A beat over the camp at the back of the house served but little purpose, beyond showing that our host was the only one of us in any form at all, or capable of hitting anything more lively than a sitting merino, or a troppilla of mares. This hour or two brought up the bag only to twenty-eight and a half brace. But I think we were more concerned in getting our "sundown" dinner, pipes and yarns, and so to bed (as Pepys might have said) well nigh done to a turn.

It was really too hot to shoot in early March; and you could only go about it in a half-hearted way. It was pleasant at that time of the year to start out between seven and eight in the morning, shoot for three hours or so, and get back in time for a good wash before the noontide breakfast—which would be followed by a long siesta, but no more shooting. By noon the mercury was often crawling well up above 90 degrees in the shade; and the sun blazing down through the gums and wattles on the white roof, out of a dazzling yet deep sapphire sky; while the birds were mostly hushed, and the cicadas whirled in the hot gums with a shrill ear-trying tre-e-e-e.

Sometimes, as far as scenery (but not heat) went—when you were shooting along a boggy canada in a trough in the camp—you might imagine yourself in a bit of rough English land, especially when a Paraguayan snipe went away with a true snipe-like "quair-eak," or a pair of teal sprang from a little laguna. The honeyed scent of the yellow oxalis would cheat you into thinking you could smell a clover field, or if you came on a solitary flower of vivid scarlet verbenas, you had only to fancy it was a corn poppy. But again, grey ostriches clearing out, and the dust of a

tropilla of flying hares they had disturbed; a Chilean eagle soaring skywards or a pair of black vultures, like great shuttlecocks, wheeling over the camp, bring you back to the far south.

When tinamu get up, they rise steadily on whirling wings and then sail. They nearly always give to the wind, and so, in addition to the arc of their flight, they describe a curve to one side also. But, so long as they go away in front when they got up, they afford fair enough shots, when you get used to their peculiar flight and to the effect of the dazzling whitelight and bare open country. When, however, the wind is strong, and you hunt up it (as you must if your dog is to have any chance, and is not to turn it up exhausted in a few hours if the weather is hot) they come "back over" at a tremendous pace and give difficult shots worthy of any gun. The tinamu, indeed, always flies fast, and unless winged wants a hard blow to bring it down. I often wondered if the fact that tinamu are lowly organized birds (they are placed by systematists near the ostriches) is the reason why they do not succumb readily to injuries. For I have noticed how very seldom a "perdiz" was killed outright. On going to pick the bird up, if you found it lying still, it more often than not flapped violently when you touched it, and you had to rap its head against your boot-toe. A runner in a pajonale is a puzzler to retrieve; indeed, except when you can find it at once, a wounded bird may as well be given up, unless you have a good dog. You often hear tinamu before you see them—the bell-like "pe-pe-pe-pe" of the bird telling you when there is one on foot. They have an aggravating way of running just a little bit faster than you can walk, and rising finally at such a distance as to give only a long shot—sometimes too long to take; for the tinamu gets away very quickly when it rises. The only alternative is to run, and pull up directly the bird gets up; a capital recipe for flurrying yourself and scoring a miss. You can tell when the tinamu is just going to rise, because it stops calling and running, and half crouches for a second, having previously had head and neck stretched up.

The changes and chances of uncertain sport were brought home to me once in tinamu shooting. There were plenty of birds at a little distance from the house in any direction, but we were not satisfied with this, and thought we would lay ourselves out for a really big shot. A distant part of the camp was chosen, where it ran to a point in the triangle formed by the junction of two monte-clothed rivers. Here there was no end of cover, and we anticipated that there would be no end of birds. We arranged with a puestero, living out that way, to come with us as bag-carrier, and decided on an early start. Sunrise, however, showed us nothing but driving grey mist; and it was after ten o'clock before the weather showed signs of improvement, and we thought it worth while to saddle up and start. We had three leagues of rolling camp to ride over, the monotony of which was only relieved by occasional sights of grey eagles, ostriches, a few red-breasted troupials and screaming teruteru, plovers—accursed of all sportsmen.

As we rode up to Pedro's rancho, we were (as is usual in those parts) received by the dogs which espied us from afar, but, being audibly exhorted in a female voice, contented themselves with conducting us to the puesto with a compromised demonstration made up of growls, tail-wagging, and barks, instead of hanging on to our horses' tails. Pedro had given us up, and had his breakfast, but his mottled horse stood ready saddled under the "enramada," and as we resisted his hospitable invitation to get down, he was soon mounted on his "recado" and pile of sheepskins, and we jogged along to our beat. Having unsaddled at a spot by the river, where some rocks and thorny tala bushes gave our horses some shelter, we ate our breakfast, Pedro becoming much excited about what he called a "Cuervo da agua," which turned out to be a cormorant. We had a lot of cana all round, and then began the beat—Pedro far from blessed with a big bag of cartridges. To our great surprise he said he preferred to go on foot—a decision he bitterly repented of later on; for, although we merely sauntered along and did not do more than four or five hours, he told us afterwards that he went to bed immediately he got home and was stiff for days afterwards. Yet this man would, I have no doubt, have ridden for two days straight on end without feeling any subsequent inconvenience.

We beat all our splendid cover, but hardly saw a feather, and picked up only one bird and a monte dove. As we came back up the other river I pushed into the thick monte in the hopes of getting some big pigeon—a grand dark-colored bird with a patch of black-and-white feathers at the back of the neck, golden eyes and crimson eyelids and feet. But the luck was entirely against us. Once or twice as I pushed through the scrub or crept under the branches, I disturbed one of those huge rodents, the capybara or carpincho, which rushed through the branches and plunged into the river with a heavy splash. But no big pigeon came to bag; I only saw one and did not get a shot. We now relieved Pedro of his useless incubus of cartridges and crossed into the potrero near his house. Here we found a few birds by beating up some long pajonales.

Pedro would have hardly done for a bag carrier if we had been walking partridges up in England, as he was rather noisy. As it was, his excited cries amused me. "Hay perdiz, señor," he would yell, pointing to one running in front, as they do; and he could not for the life of him make out why I did not shoot it on the ground. He kept up a continuous fire of these remarks, "hay dos, a laderesha," "mas adelante," etc. His get-up was very striking, and more suitable for a fiesta than suggestive of sporting. His clean white alpagatas and red-socks contrasted brightly with baggy bombaches of an aggressive cinnamonbrown, and a blue Basco cap. Pedro pursuing a runner in a pajonale was a sight to see. He skipped about among the paja tussocks with the greatest agility, whirling round his head the cowhide reveneque which always hangs to the native's wrist (except when it is hitched over his knifehandle), with a blow from which the perdiz is finally laid low. He marked and made a long search for a distant wounded bird, while we sat on a rock and watched him. Finding himself growing warm at this work he took off his blue coat and laid it down, and then it appeared that it was lined with scarlet, and it an once became a spot of vivid color amid the surroundings of sad yellowish green. He said he should ride and fetch it when he got home; and there was certainly no chance of his losing it, as it was the most striking object in the camp for miles.

Mosquitoes attacked us savagely as we saddled up and rode home, with the miserable bag of six brace, a dove, and a spotted pigeon which I had stalked just before we started home. This was all we had to put into the intolerable amount of sack which hung from our saddles; besides the conviction that we might justly be chaffed at dinner about the magnitude of our expedition and the minuteness of the result. Yet the very next morning, wishing to get five brace, I knocked them over near home in a couple of hours, and stopped shooting, as I did not want any more.

Besides the small tinamu we had another species, the great tinamu (*Rhynchotus rufescens*), of naturalists, the perdiz grande of the Orientales, and the big partridge of the Ingleses. It weighs usually about two pounds, but occasionally nearly three pounds, and, like its relations, has not been blessed by nature with a tail. It is a bird of luck. That is to say, there is a strong element of luck about getting a shot at it. You may work for hours in a good place for them, and not get a shot. On the other hand, I remember one morning, just before the shooting season opened, putting up half a dozen, one after the other, just by chance as I was coming home, and all the easiest shots imaginable. From what I have seen of the bird before dogs, I fancy they never lie to a point, but always run before the dog; and I have heard an experienced man say he could always tell if his old pointer was on the scent of a big partridge by the way she followed on among thick cover; and he added that the only thing to do was to run up to her at once.

The perdiz grande is usually found in the larger pajonales which lie outside the river monte. Indeed, except when they wander up into the campo to feed morning and evening, they are very seldom seen far away from the monte. If you come upon one suddenly in an open patch in a pajonale, it will, if you are on horseback, merely walk away and will require pushing before it will rise. Their tameness under these conditions enabled the gauchis in former days to capture them with a noose of ostrich feather on the end of a long stick. If you are on foot (and do not almost step on the bird), it often runs before you. Perhaps they know it is no fun to pot them on the ground, and trade on your scruples; anyway, if you do not press them, they will not rise as a rule. Their dodge is to run until they can get inside the monte among some thick bushes, when you are beaten.

I remember being completely sold in that way by a bird which looked at me in a simple and most confiding way when I came on him, and then proceeded to walk away, like the picture of innocence. It walked behind some paja grass, and, when I followed, why it was not there, having run into the monte at best speed as soon as it was out of sight. After having had it played low down on you in that fashion, you learn that it is best to run in on the birds at once. I went with another man one hot day to shoot in the rincón between two rivers, with the especial purpose in view of getting big partridge, for which the place had a reputation. We found several, but only got one. Another got off in this way. We were walking parallel with the monte, some 200 yards from it, my companion being next to it, and I further up the slope of the camp. The bird got up under my feet, and flew straight at the other gun. I could not shoot, and he had to wait until the bird got by him, by which time it was going like an express train in a falling line; the miss which followed would have disgraced few people. All the others except one ran before the dogs in thick covert, and rose out of shot, or out of sight behind trees. This is how the perdiz grande loves to disport himself.

But I once had a tremendous piece of luck with these birds. It was on a Sunday, and perhaps it is true that "the better the day the better the deed." In the Western antipodes it is permitted to a man to amuse himself on Sunday; nay, it is expected of him; and you should always follow the customs of the country you live in—as far as you like. Anyway, Sunday in the camp is the day not only for visiting your neighbors, but for the man who is hard at work all the week from the rising up of the sun until the going down of the same, to take his gun and go for a

quiet shoot. And these men lead others astray who have no such excuse.

However, on this particular day I had no fell purpose in my heart when I polished my boots, saddled my rosillo, and rode over to visit some neighbors. It was the other fellow's fault, and his wife's. The universal provider of mischief put it into his head to talk about the number of big partridges he had seen along the monte near the house. Then, like a good fellow, seeing how the spirit worked within me, he said he supposed I should not care to stroll down and see if I could get a shot. I could have his gun (and a beautiful little Parker it was). Of course I was anxious to fall in with anything he proposed; and his wife put the finishing touch on it by saying that there were only seven cartridges loaded, and it was no good going with those few. I could only reply loftily, that if I could not kill a big partridge with seven shots I should not deserve to get one at all; but I might have remembered missing ten shots at snipe straight on end not long before. Six of the cartridges were loaded with snipe-shot, and one with big shot for duck; the latter I put in the left-hand barrel. I fired at, and did not kill, a green parrot on the top of a poplar to try the gun—one shot gone. After going along the edge of the monte in one potrero, and nearly giving it up, one of the dogs (which was no respecter of point, being, in fact, a half breed bulldog) put up a perdiz grande, which rose with a great noise from a pajonale and made for the monte, according to the usual habit of these birds. It was at least 60 yards off, but I let it have the duck shot, and it came to ground with a thump. What a nice sound that thump is!

We worked the rest of the pajonale but without success. A little way further on I saw a bird on the ground, and, hurrying forward, pressed it until it rose; when there happened another thump. Just as I fired, B. called out that another big partridge had run into some thick paja in front. I ran up, flushed and bagged it also. Three grand birds in about a quarter of an hour was good enough. I felt quite satisfied to be able to lay out three big partridges (and three cartridges) in the patio, and to think that I could afford to forget and forgive magnanimously that remark about the seven cartridges. Besides which, when you are got up in your store-clothes for visiting purposes, you are not in form for walking with a gun under a hot sun.

But a nemesis overtook me as we strolled up to the house, talking about sheep, and thinking about something cool to drink; I put my foot down on a snake. Now nothing makes you so angry as being badly frightened, and I am scared at snakes—whether they are harmless or not makes no difference at all to me at the moment. I sprang off like lightning, and proceeded to boot him, but found him very brave. He sat up on his tail and struck at me several times before I could kick him over and get my heel on his head. In fact, I had no show with him for a minute, he was so arisco; and in jumping about I wrenched my leg, causing a hard and painful bump to rise just where you want to fit nicely to the saddle. However, after a smoke and an exceptionally luxurious sundown of Martell's Three Star, I was able to jog home in the golden glow of one of those marvellously clear and brilliant southern evenings, with a dinner in prospect in the shape of a perdiz grande tied on to the saddle. The teru-teru called, and the snipe drummed down by the river, and the calm and peaceful aspect of Nature in the golden evening fitted well with a conscience soothed by reflecting upon a well-spent day.

A WILD TURKEY HUNT.

[By Black Jack]

Reading a short time ago about the tracking of turkeys in an old file of one of our Western sporting magazines, carries me back to one of my many trips. I was at that time living in Chillicothe, Missouri, at that time the finest locality for deer, turkey, geese, duck, prairie chickens, squirrels, snipe, quail, and other game that I have ever seen, and our favorite mode of hunting turkey was by tracking them in the snow. They were very numerous, especially on small streams and the large river bottom. Grand River bottom was our favorite place. The river is quite large and very crooked and too deep to be waded, so we had to wait until the river became frozen over hard enough to cross on the ice, as during the fall the turkeys had learned that as soon as they were disturbed their safety depended on getting across the river as soon as possible, and if they were disturbed then they would again cross the river, but always one bend above or below from where they first started. Now this was only a short distance for them but a long ways to one who had to follow the river avenue frequently two or three miles, and every fall we all waited very anxiously for the river to freeze over.

I remember one of these trips especially. I had not been very well all fall and was afraid I would miss the first hunting, as tracking turkeys all day perhaps is no child's play with the snow from six to twelve inches deep, and if you are successful, with one or more turkeys to pack home, as we nearly always started out on foot, as there was no telling what direction they would take if you found them. Sometimes we would go on horseback until we struck fresh tracks and then get down and tie our horses and start after them afoot, and many times after our hunt would be over we would be much nearer to our homes than to the horses. Our mode of hunting them was, as soon as we found their tracks, to follow them for two or three miles as fast as we could walk. Sometimes we would get a sight

at them and other times we would not see them at all, although they could see us, and sometimes they will take up or down the river in nearly a straight line, crossing the river from one bend to another; at other times they would swing in a large circle. In either case they always returned to their usual place of feeding sooner or later, so after getting them and ourselves well warmed up, we would stop following them for perhaps thirty to sixty minutes. We would sit down on some log and take a good smoke and talk of our prospect. Now as soon as the turkey finds out he is not followed he will go more slowly, and finally some of them will squat in some treetop or bunch of grass, and if you give them time sooner or later all of them will run into grass or treetops, although it may be several miles from where the first one stopped, and being quite warm they soon become chilled and many times I have gotten within five or six feet of them before they would move. They never stop on a straight line the way they are going, but will run off one side or the other, and frequently several times, before they find a place to suit them.

If you know the lay of the land and can get them to go out of the timber into the prairie bottoms or can find an old, dry, grassy lake, they will all get them up either with a good dog or by walking them up almost like quail.

But to go back to my story. One night two of my old turkey hunting friends, Will Moore and Zael Bargdoll, came to my house about 9 o'clock for me to go with them next morning after turkeys, as they had left a big flock of about thirty only three miles from town. So we concluded to go horseback and if I could not stand it I could come home. We got down and hitched our horses and started to make a circuit and soon found a fresh track leading north or up the river. Mr. Bargdoll took this one. We soon found another leading northwest and Moore took this one, and I kept on around the circle. I soon found another one leading west and across the river. I did not go very far before I was following two tracks and a little farther three, and before I got to the river (some two miles) I found I was following the whole flock of about thirty, so the turkeys, my dog and myself soon crossed the river and kept straight on for another mile and we came to an old river in the shape of a horseshoe. We crossed one and soon came to the other end of it. We crossed over it again but this time the turkeys turned up the side of it and did not go far before we struck high prairie grass from three to four feet high.

I looked down on the cutoff and noticed the tracks leading back and into the high timber again, so I came to the conclusion that I had about enough of it for that day as I had followed them at least 4 miles in snow 18 inches deep, so I concluded I would sit down, have a good smoke and think about it. About the time I had finished my pipe I noticed my dog had gotten up and was following the trail in the grass; at the same time I noticed an old dead tree ahead of me and a hawk sitting in the top of it. Then I noticed my dog at a point and I moved up a little nearer to him, but thinking he was pointing a flock of quail, without taking the gun off my shoulder told him to go ahead. He moved on slowly and up jumped a turkey. In my surprise I missed it with the first barrel but killed it with the second, and at the crack of the gun some fifteen or eighteen more got up and flew off some three hundred yards. I then started after the ones that had flown and soon came to where I had seen them go down and found it was in an old, dry, grassy lake, where the grass and snow were at least four feet high. I at once made a circuit of the lake and found that the most of them were still in the grass, so I commenced at the lower end of the lake, crossing back and forth about six or eight feet farther up the lake each time, and by the time I got up to the other end of it I had jumped up eight and killed six of them and followed one of these that got away out in the grass and killed it. And now comes the strangest part of it. About this time my two friends began shooting where I had killed my first turkey. They had an old hound with them that was good for running turkeys, but they could not control him, so he was always from 100 to 200 yards ahead of them. I saw him get up two turkeys and they got but one of them. They came up about that time and asked me how many I had and I said nine. So after consultation we concluded that we had all we wanted to carry over four miles to our horses, as it was then about three o'clock, so we divided them, I getting the odd one. We did not get back to our horses until nearly dark, and I don't think that I was ever as near played out in my life, but was all right next day. I have had many turkey hunts before and after this, but this was the most successful one in point of number killed by myself.

Government Rifles for Sale.—The Chief of Ordnance, U. S. Army, has set aside a certain number of model 1898 "Krag" rifles for sale to members of the National Rifle Association of America and its affiliated clubs at a price of ten dollars, to which should be added \$1.15 for the packing case and twenty-five cents for appendages. These rifles are new and will be selected as far as practicable so that they will be an ideal target rifle.

Rifles may be ordered in the regular way through the Adjutant General of the State in which the member resides, the requisition to be accompanied by a certificate from the secretary of the National Rifle Association. All requisitions should be sent to the commanding officer of the Springfield armory.

Drink Jackson's Napa Soda.

NATIONAL MATCHES BIENNIALY.

There is considerable quiet talk as to the advisability of making the national rifle matches a biennial affair instead of holding them yearly. That they have been a tremendous factor in arousing interest in shooting throughout all branches of the military service and the national guard is not denied. Since they were instituted by an act of Congress appropriating money for the national trophy, medals and prizes, Congress has increased the appropriation for the national guards from one to two million dollars annually, with the understanding that \$500,000 of this appropriation was to be expended in rifle practice. Out of this money the expenses of the teams at the national match are paid. In many cases these expenses constitute a very formidable drain on the State's allotment. Especially is this the case with the smaller States and Territories. These usually have long trips involving heavy transportation charges and considerable pay for the members of the team while on duty coming and going. An officer in the Arizona National Guard receives the same as an officer of similar rank in the New York National Guard while on duty, so that the team expenses for the smaller states are as high as those for the larger States although the amount of money received from the national government is very much less.

The result has been that where a small State sends a team to the tournament each year it finds itself with little left for rifle practice at home. These States and Territories are anxious to apply a certain amount of the Federal appropriation to the construction and equipment of State ranges and for rifle practice among the members of the guard at home. It is also felt that if the matches were held every two years there would be a greater novelty and more interest taken in them. The army has adopted a two year system instead of annual matches partly on account of the fact that the army maneuvers and individual camps of instructions are held in alternate years. Preparations for the national matches and attendance thereon consume considerable time on the part of the members of the teams and practically eliminates them from participation in the maneuver. For the last two years the army has supplied the officers and men for the Camp Perry range during the National Rifle Association Matches as well as during the National Matches. As this involves the services of more than one hundred officers and over one thousand experienced enlisted men it seriously handicaps the training of the national guardsmen by the regular officers during the maneuver years. It also accentuates the serious shortage of regular army officers. If however the National Matches required the services of twice as many officers and enlisted men from the regular army, to conduct them, their value as a military feature to the country would be well worth the expenditure.

By next year the government of the United States will possess a rifle range of sufficient size and equipment to take care of the national matches. It is constructing a new range near Sparta, Wisconsin, in connection with the artillery range there and on this range the national matches can be accommodated. It is doubtful, however, whether the National Rifle Association matches could be shot there as there will probably be only one bank of targets, fifty in number, so that only one stage of one match could be shot at a time. At Camp Perry with its equipment of more than two hundred targets it is possible to shoot several matches simultaneously. The National Guard is not partial to the idea of going to Sparta, which is not accessible to civilization. New York expects to have its range completed by 1912 and if it invites the tournament it will be a formidable bidder.

PRACTICE MAKES PERFECT.

A high military authority, who has spent much of his life in trying to perfect target practice among the enlisted troops, believes that the time to teach accuracy in shooting is to begin with the boy. It is a recognized fact that except in rare cases, one cannot learn to become an expert telegrapher unless he begins in early youth, because the ears and the fingers of adults are incapable of making the fine distinctions that the service demands. Similarly, the army authority asserts that if this nation desires to equip companies or regiments of sharpshooters, the beginning must be made when the boy is still in the lower schools. The saying that it is hard to teach old dogs new tricks applies with variations to human beings.

It is no doubt true in a measure that the natural aptitude of the child is more pronounced than anything obtainable from one of adult years, but back of training and discipline and long practice, it seems as if good marksmen, like poets, were born and not made. There are fine young fellows who spend hours every week at ranges and in shooting galleries, striving diligently to hit bullseyes and become adepts at marksmanship, who can never hope to rise above commonplace. There are qualities of nerve and eye and brain that no amount of training can produce. Now and again we see a slouching and gawky youth step out from the crowd at a turkey shoot and capture prize after prize, though we feel certain that outside this gift of hitting the mark he is a very commonplace individual. The parents of this country are spending millions to equip their sons and daughters with what they choose to call "a musical education," though the chances are that there is more of the real soul of music in one corduroyed Italian laborer on a railroad embankment, than can be found in a whole "conservatory" of American bred children.

A certain amount of youthful training helps in making expert marksmen, but unless one is born to the craft, he soon learns where his limitations are.

The idea which the foregoing tends to convey is one which we believe to be incorrect, for the old saying that riflemen are born, not made, has been long since exploded. In no branch of sport does assiduous practice so surely bring its reward as in rifle shooting. Some, of course, may acquire skill more readily than others, but given normal health and eyesight, with the requisite opportunity for practice, and not only will progress under proper instruction be steady, but the ultimate standard attained will be such as to entitle the individual to compete with the best in the land.

NOTES FROM THE NORTHWEST.

[By August Wolf]

Two Alaskan moose, believed to be the first ever brought to this country, are owned by A. E. ("Happy Jack") Carr of Spokane, who has trained them to work in single and double harness. He bought the twins for \$200 and a stock of provisions while in the Northland, 15 months ago, and now values them at \$2000, for which amount they are insured.

That Carr succeeded in bringing the moose to this country alive was by the rarest stroke of good fortune, an indomitable will and an unceasing vigilance that lasted weeks. Back of it is a story of hardships and danger that rivals the adventures of "Buffalo" Jones when that celebrated frontier character attempted to add to the collection of wild beasts.

Carr was more fortunate than his gun-fighting predecessor, inasmuch as he succeeded in escaping from the country without the wrath of the Indians having been visited upon him. However, it cost him days of pain and hunger, nights of ceaseless watchfulness and long tramps through snow and blinding storms, besides a deal of money.

The moose were caught on a small, deserted island in the north by a band of Slavonians, who were searching for food, following an influx of their countrymen, shipped into the country to work in the mines.

The mother moose was with the pair when first spied, but she soon was aware that she was watched. Immediately she cached her young and swam to the mainland to divert the attention of the men from the calves. The Slavs, however, were keen for the capture of the babes, and after a long search found them hidden in a deep, narrow gully in a secluded part of the island.

Although driven almost to a point of desperation through want of food, the game-seekers realized the importance of their catch and carried the young moose with them until they were met by Carr, who paid \$200 in gold and a quantity of food for his purchase.

Then began the long journey to the outside world. Long tramps through the snow, many nights without sleep and a long journey with but little food were some of the hardships endured by Carr until he reached Circle City, where a new supply of food awaited him.

Along the route to Circle City, however, Carr was forced to keep a watchful eye for prowling Indians lest they should discover his mission and hand him the same dose the British Columbia Indians handed "Buffalo" Jones. Also he had to be exceedingly careful about his charges, feeding them carefully and seeing that nothing befell them. He was fortunate, as they thrived on a condensed milk and crushed oats diet.

Carr decided on reaching Circle City that it would be wise to stop awhile to train the moose before they became too old. Under his tutelage they made progress and are now driven in single or double harness, attached to a light wagon. Carr uses regular bits and manages the moose as he would a horse.

The attempt of "Buffalo" Jones to bring a band of musk-oxen out of the British Columbia wilds, referred to in the foregoing, is yet discussed in Spokane by prospectors who were in the Northwest at the time. It is related that after Jones had driven the small herd hundreds of miles through heavy going and raging blizzards and was congratulating himself on his apparent escape from the territory where danger lurked at every corner, his camp was set upon at night and the animals killed by the Indians.

"There are tribes of Indians in Alaska and British Columbia, who believed, and who still retain that belief, that both the moose and the musk-ox are sacred animals, to be left untouched by the hand of the white invaders," said Carr. "Thus when Jones made his famous attempt to bring the musk-ox to the outside world, the natives followed silently on his trail and patiently bided their time to undo the work which he had suffered untold hardships to accomplish."

Officers of the Spokane Fish Protective Association have perfected plans to remove the carp and suckers from the hazz lakes in Spokane county and will then extend their operations to other parts of Washington. This is the first organized attempt to do this kind of work in the Northwest, and it is expected that lake fishing will be greatly improved as a result.

Fish Trap lake will be the first one to be cleaned and then these lakes will be taken in the order named: Clear, Williams, Silver and Newman, also all other lakes where the work can be done without expense. The anglers are enthusiastic over the plan and many of them have offered assistance in doing the work.

Al Wieseman, secretary of the Association, and Game Warden Uhlig will direct the work. The former said in an interview:

"It is certain that when the carp and suckers, both spawn-eaters, are removed from the lakes there will be a big increase in the number of eggs that will mature each year.

"The plan to be used by the association is to solicit the aid of the farmers and others owning land on the lakes and by the use of nets clean the lakes and by of the scavengers. The carp and suckers will be given to the farmers for fertilizer.

"It is planned to do the work without any expense to the Association or the property owners and from present indications there will be little trouble in securing the required help. The plan has been carried out successfully in the East and we believe it will work in the Northwest.

"It will require several years to accomplish results in some of the lakes. The nets to be used by the Association will be furnished by the State Fish and Game Commission. It is planned to have the work completed in six weeks."

RANDOM NOTES.

[By Loch Laddie]

It is extremely interesting to watch the types of action different dogs show when at work. It is especially noticeable when handling a number of young dogs and watching them develop. As with man, so may be said of dogs, that no two seem alike, especially in point work. Their work on point may be compared to the handwriting of men—no two exactly alike, though all may have gone to the same school and used the same forms of writing to copy after. There is the expression of individuality in the handwriting of each that makes the broad difference. Some dogs crouch low on point with tail crooked down and the body as though in some rigid contortion from pain; others stand straight as can be, head up and point of tail even in line with the back. This is generally the type of point aimed at by all. But to the sportsman who loves the hunting bird dog there is hardly a method which the dog shows while crimping into a frozen statue on game that does not become a thing of inspired beauty to him. Character of point is not always a sign of great merit for I have seen dogs whose position on point could not be improved by the brush of an Osthaus, yet the dogs I am thinking of were very ordinary dogs, could scarcely be called persistent hunters or great in any one point, except in the act of standing birds where their pose reached the ideal.

To the contrary I have at the same time in mind a pointer bitch, which at that time belonged in the south, whose pose when on game bordered on the ridiculous. Yet I am satisfied she is the greatest hitch bird finder I have ever known. A description of the lady's point may not be out of place. As soon as she drew up on game her front legs were braced wide apart, and her tail curled over her back like a beagle's until the tip almost touched her back in its curve. Was one to send a picture of this lady on point to one of the leading dog journals, appending an article on her field work I am afraid dubious smiles would meet it. Yet so enamored have I been with this bitch that to this day I cannot recall a field trial champion which I have seen, though I have by no means seen all, that can approach her in fast bird work. I don't mean alone in number of finds, but that part which appeals so much to the spectacular side of the field trial game—where the dog comes up with a rush of speed to a bird and without a semblance of doubt or check in gait, suddenly freezes in point on the bird.

The breeding of shooting dogs of this day has lost in some things a certain amount of natural bird sense, but has gained in speed and searching qualities, both of these things resulting by the development of the field trial strains. Many of the field trial dogs of today lack bird experience, not that they are not bred for this purpose, or the opportunities cannot be offered, but the broad limit of the word "class" in a field trial sense is so closely attended with speed that too often dogs are held up to speed as their chief characteristic and bird sense, the greatest attribute in a great dog, is to some extent neglected.

The trial class of dogs could have gone to the extremes in their line, just as the hench show breeds have done. Breeding to much for one thing lost some of the most desirable qualities in the dog. The slow dog's beauty of type, held in greater prominence than intrinsic merit of what field dog should possess, left the bench dogs on a pinnacle of their own from which they have not been able to gracefully descend. The field trial breeders came near almost falling into the same error, i. e., breeding for speed in preference to all else, and a few years ago and in fact almost to date, the reports of the trials were redolent with the word speed—speed above everything—so that in the eyes of a judge a dog of great bird finding qualities, staunch on his game, was ignored in a decision when put against a faster dog who was not even ordinary as a bird finder.

When criticism was offered on this point the reply was to the effect that they were not running a shooting dog game, but a field dog game. However, conditions on this point are much madder now; bird work is looked on with more esteem; the demands of the sporting public, judges who loved dogs for what they were bred for and the co-operation of the sporting papers, will eventually develop the field trial dog into the highest type of a bird finding animal.

It is a good thing, too, for the shooting dog man to get desirable blood lines must recruit each year from

the field trial studs, to get the pointer or setter that will make his outing after quails, chickens, Mongolian pheasants, etc., a pleasant one.

Many disappointments of the amateur trainer may be traced by selection of his pupil from the field trial ranks. For months the dog would rather get out and search for game than point game and he is inclined to pronounce his charge worthless.

I would advise the beginner to be patient. Your friend may have a scrub of same age pointing staunchly, and putting them together the sting of criticism from your friend's tongue may cause you to fail to notice the different types of the two dogs. Because the one is already a thing of use, you are inclined to feel ashamed of the thoroughbred for lack of pointing. As I said before, be patient! When the pup's time does come to exhibit his divine instinct, it will be your time to laugh and 'he who laughs last laughs best.'

There are a lot of good fellows who are running their legs off in the attempt to get a well broken field dog, pointer or setter, so they can hunt the bountiful supply of quails which are everywhere in evidence this season. The man who has waited until now to prepare for his quail shooting must understand that he can only get a good dog by paying a good big price as an inducement for his owner to part with his. A cheap dog at this time is apt to prove a disappointment and a waste of money. It requires good breeding, an experienced trainer, and field experience, to develop a dog worth owning and this combination is worth a corresponding cash consideration, and the buyer must understand this when he wants a good dog. He must not expect something for nothing. A good, healthy, strong bird dog, a willing worker, not afraid to force his way through tangled undergrowth and thickets; staunch on a point, and a good retriever, is worth a good big wad of anyone's money, and they are hard to get at that.

Don't buy an "amateur dog" because he is cheap unless you expect to fool yourself into the belief that the seller is a chump who has brains enough to train a dog and not brains enough to get paid for doing it. What you want a dog for is to find birds and to make your shooting a real pleasure. The man who has once shot over good dogs knows what fun is, and will not be satisfied with any old dog because his name is "Sport."

DOINGS IN DOGDOM.

Curly poodles are well established in England at the present time, as many as 75 have been hench at the leading shows recently. Following in line the Eastern fancy is giving a deserved recognition to the breed, about 40 curly ones were benched at the last New York show we are informed.

On top of this, one of the best specimens of the breed today, an unbeaten dog, winner at Crufts, New York and everywhere shown, Ch. Orchard Cabin Boy, is at stud here.

The tendency to better the breed by eliminating the medium sized ones is closely followed abroad and in the East. Dogs of 40 or more pounds and bitches weighing 35 or more pounds are desirable. Size, bone and strength are now the sought for qualities, and rightly too.

For intelligence the poodle is in the lead, as a house dog or companion they are as good as the best and better than many. The best bred stock in the country can be secured here, we call attention to the sale announcement in our advertising columns.

A significant bit of criticism may be made by comparing the awards in the catalogues of the Larkspur and San Jose shows with the awards given at the recent L. K. A. show in this city. Every exhibitor at the latter show that had put in a dog at either National shows got a beautiful bumping. Just note where the "outlaws" were placed and go back over the catalogues for a couple of years.

"Gaffer" Watson had his lesson well learned. But he came decidedly near mixing things several times.

The officials and judges of the San Jose show (N. D. B. A. rules) have been served with notice of "suspension" and requested to appear before the P. A. C. and show cause why the 'suspension' shall not be made permanent.

Strong efforts are being made to secure a leading N. D. B. A. man to sit on the P. A. C. vice H. H. Carlton superannuated and resigned.

At the recent L. K. A. show, one of the lady exhibitors expressed her opinion, in a rather spirited manner, of the judges' award in placing her entry third.

The former owner of the winner of the blue ribbon overheard the remarks and requested the angry exhibitor to "send your husband to me and let him repeat those remarks."

This fellow was approached in a few minutes by a well known fancier who remarked, "Mrs. ——— has no husband, but step outside and I'll repeat the remarks!"

Needless to say that the scrub who challenged a woman refused to make his threat good.

A. K. C. tactics include mailing warnings to daily newspapers threatening to take away advertising if anything is mentioned favoring the N. D. B. A. or not extolling A. K. C. interests.

The fellow who refused the chance of deserved chastisement knows something about this, so does the disgruntled collie man.

LONG VERSUS SHORT IN STANDARD PEDIGREE.

Something like twenty years ago the writer, under the above caption in the Horse Review, announced the following proposition and adduced what appeared like evidence in actual facts in support of it, viz: "No really great trotting performer or producer was ever yet produced through a long trotting pedigree without the introduction of widely divergent lines, or without outcrosses of an entirely foreign character." Instances cited in exemplification were such performers as Goldsmith Maid 2:14, Dexter 2:17½, Maud S 2:08½, Sunol 2:08½, Kremlin 2:07½, Belle Vara 2:08½, Palo Alto 2:08½, etc., and such producers as Electioneer, George Wilkes, Nutwood, Blue Bull, Alcantara, Jay Bird, with mares like Alma Mater, Green Mountain Maid, Woodbine, Miss Russell, Midnight, Beulah, etc.

Later it was discovered that as noted a student and writer as Helm had over a decade earlier spoken of the matter as "the well known fact that our great trotters and trotting sires do not, as a rule, come from the long and brilliantly drawn out pedigrees," and adding this strong statement, "take the stallions from some distinguished sire and from dams whose pedigrees are six to eight generations deep, every link bringing out the name of some distinguished family or animal, and these are generally failures."

It may not be thought by those who have not investigated closely that thirty-five or forty years ago when Helm wrote this there were mares bred in the standard, "six or eight deep," but there were, and of course the number and class have multiplied enormously and passed the six or eight by several removes, in simply pure standard. But is it not a rather startling truth that when the roll up of the world's champions as either performers or producers has been gone through with, that exactly the same state of affairs is found today as existed a half-century ago, and the long drawn out purist trotting pedigree does not appear, shall we say, in a single instance or as a rule, with numerous counts enough to commend it as a system of breeding.

However, it is not in mind, at this moment, to go into a general discussion of the question, or even to array facts, on a broad basis, ending to substantiate such contention. Picking up the catalog of the Patchen Wilkes Stock Farm, Lexington, Ky., where such noted assemblage of great producing brood mares, as well as noted sires are found, coming down now in the Twentieth Century to 1910, the impression could be profoundly felt of the striking absence, all around, of the to be expected, not six or eight, but ten, twelve or fifteen generations or even more, pure standard bred. Starting with their premier sire, with world's fame second to no trotting stallion living, Peter the Great 2:07½, his sire has but a single standard cross dam, and his own dam is but one cross before the outcross shows up, and two in all, anything but "simon pure" at that. His chosen son, and supporter in the stud, was but two and then thoroughbred, the sensational Peter Donna 2:08.

The third in the stud, Crystallion 2:08½, goes to the fourth only in dam or sire with blue blood that runs abounding. The distinguished son of the great Alcyone 2:27 that had half-thoroughbred dam, John J. Audubon 2:19, has a single cross dam, then out. Axtellion 2:15½, fifth and own brother to a champion among present day young sires, Axworthy 2:15½, is by a sire, Axtell (3) 2:12, with a single standard cross dam, and his own dam, strange to say, has but two crosses, being short of present rule requirement, and the second comes through performance only, that would be cut out if not already in, and the first is likewise. And Mighty Onward 2:22½, trial 2:08, selected to perpetuate the family founded by the great cross bred sire, Onward 2:25½, has only two, then the blood of the desert. And, queer the taste, another founder that would be perpetuated, Patchen Wilkes 2:29½, has as his successor a son, John Wentz Jr. 2:29½, trial 2:10, with but two removes from a pure thoroughbred that sired the third dam.

Even a second to hold up the Onward banner, Onfield 2:22 has but two counts in sires of dams till a hang tail is reached, and the representative pacing sire, Be Sure (p) 2:06½ has so little of the pure standard leaven that without performance he had never been known at all in the harness bred registers. A nine-year-old, the eleventh in the stallion category, By Mac, by the peerless McKinney 2:11½, having a sire with a one cross dam and out of a one cross dam, has the distinction of four dams by standard sires in succession, the three at the top with close to thoroughbred dams, and the only untested one in the lot.

The condition is certainly anomalous, that with fifty years breeding since six or eight cross standard-bred dams were in existence, this foremost farm in the land, with close to a dozen stallions listed should have only two reaching a four cross mare, barely meeting by breeding exaction the requirement for registration is standard bred. Why and wherefore is it thusly, and where are the many count, numberless generation deep in nothing but registered breeding products? Echo, answers, where.

But turning to the magnificent lot of producing and performing matrons, numbering a hundred and thirty-eight, a no less amazing condition appears. If no egregious blunder has occurred in scanning the list, only one appears with the seventh dam by a standard sire, and this one has three dams at the top with but a single credit for the three, the strength being in the fourth, about the weakest in the entire number in close-up production. One also shows up with a sixth dam, by a horse bearing a number, a

non-performer and producer with first and second dams bred in the height of fashion, though no other credit; the next three dams at the bottom having all the credit even if minus some breeding.

This comprises all the "long-breds," with a couple running to fifth, and not the famous in the great harem. But turning to some that have attained the highest fame, the most illustrious of all is Marguerite A. 2:12½, dam of Margaret O. 2:05½, and two others, with two cross dam only. Right beside her is Axtelleta 2:22½, a producer of two good trotters, with only two dams by standard sires. Onadonna 2:17½ with Peter Donna 2:08. Onadonna 2:17½, Don O'Donna, trial (2) 2:22, looks good with a single numbered horse topping running ancestry galore. Mary Marshall 2:12½ merits consideration also, though only her dam's sire carries a number to help her out, mothering such as Nathan Strauss (p) 2:03½, Mary the Great (2) 2:28, etc.

Carlotta Wilkes, dam of Inferlotta (p) 2:04½, Mary Dillon 2:06½, Carlokin 2:08½, Volita 2:15½, Lottie Dillon (3) 2:26½ and Ida Dillon (3) 2:27½, would please most establishments though stopping short with a two cross dam. Cocoon 2:15, dam of Robert C. (2) 2:13½, champion of his age at two years. Thomas Stokes (2) 2:25, Coco Onward 2:29½ and Lady Green Goods (1) 2:30, champion yearling of 1908, is another that no sensible farm would turn down because the second dam was by a thoroughbred.

Not even would Tosa 2:19½ be tossed ruthlessly aside by everybody because her first three dams were great brood mares sired by stallions with no standard breeding even in a stone's throw of them and five thoroughbred stallions lined up in order back of the first dam. Even Maude Freeman could be tolerated, with nothing whatever to give her standing with purest advocates, but having to her account Clematis (4) 2:18½, trial 2:09; Monte 2:25, Peter Mc (2) 2:29½ and Lady Mc 2:29½. The three sisters Lydia Thompson 2:20, dam of Peter Guy (2) trial 2:17 Madam Thompson, dam of Eva Tanguay (2) 2:16½ Madam Peters (3) 2:22½, and Tillie Thompson, dam of the champion yearling, Miss Stokes (1) 2:19½, race record at three years old 2:09½; Guy Onward (3) 2:26½ and Guy the Great (2) 2:27½, a second dam by a horse ineligible to standard registration Ohphelia M, dam of Miss Ohphelia (p) 2:09½, and six others, justly belongs where she is with all her dams from second down thoroughbred pure or mixed.

But space forbids more than mention of Annie D. trial 8:17; Madam Thompson, dam of standard-bred origin; Calpe, dam of four, with two crosses; Oriana 2:19½, dam of the two-year-old champion Czarevna (2) 2:12½, (3) 2:07½ and Grace (3) 2:08 and three others, with one cross dam, then thoroughbred; Belle Archer 2:12½, familiarly pedigreed, with four to her credit; Bell Onward 2:19½, dam of Cornelia Belle 2:10 and another, with two standard cross dams; Elenor B. 2:11, dam of two in 2:10, five in the list, with no standard sire back of dams, and numerous others scarcely less noteworthy with performing or productive potency or both, but with no long line of pure unadulterated standard breeding such as is abundant in the registered trotting family.

It tells this, not that inheritance is non-important, but that it must be virile inheritance of racing blood with caliber and quality stimulated and enriched from fountains other than mongrelized plug. Multiplying much called standard serves merely to intensify cold blood and absolutely nullify. Fresh infusion from almost any source is preferable to flaccid, nerveless impotency and dung-hill caliber.—Spirit of The West.

GRAVEL ROAD CONSTRUCTION.

The Colorado Agricultural College has been investigating and experimenting in the building of gravel roads and has issued a bulletin from which the following extracts are made:

Before the actual construction of the road is started, the proper equipment should be secured, including plows, wheelbarrows, slips, dump wagons, a sprinkling wagon, grader, road machine and either a large traction engine or a steam road roller.

For good construction the old road surface should be plowed (speaking now of the repair of old roads) and graded down to a smooth surface with the center high or crowned. This can best be accomplished with a grader and then surfaced with a regular road machine. The materials which have been put in loose must now be rolled and, if dry, should be gone over with the sprinkling wagon, so that it will pack down securely into place. The portion rolled need not be greater in width than eight or ten feet, and the loose material on the sides will serve as a support to hold the gravel in place. In preparing this sub-grade all matter subject to decay should be removed therefrom, as such matter may produce a weak spot in the finished road. Roots or stumps of trees should be taken out.

The finished sub-grade should be smooth and practically free from depressions. The center of the road should be three to four inches higher than the sides.

The application of the gravel should be done somewhat in the following manner: The sub-grade being finished, the gravel in dump wagons, or ordinary wagons with movable plank bottoms, is driven to point where the work is to begin and dumped in the center of the road. This is spread by hand over the surface. To secure an even depth in the layer blocks of wood are cut and set upon the sub-grade, the height of the block to be six inches. Three at each end and one at the center. By laying a straight

edge from one block to the other we can readily secure an even depth to the layer of gravel.

The larger stones contained in the gravel should be placed in contact with the sub-grade and the finer materials be used as a binder.

The completion of the work is now accomplished by means of the road machine and steam roller. The road machine securing an even surface with the edge of the gravel layer and the shoulder of clay left by the formation of the sub-grade, the roller passing over this gravel will pack it down to a depth of three to four inches—depending upon the weight of the roller and the kind of gravel.

If the gravel is too wet the material will have a tendency to crowd ahead of the roller and a good bond will not be secured. For good results the gravel should be damp, but not too wet.

Th question as to what constitutes a good road material is best answered by experience or test. Select a favorable point in the road to be improved and try your gravel. You may find that it will be necessary to mix it with some clay to make it bond, or in other words to make the surface appear to be hard when rolled. If it is found necessary to do this it can best be done after the gravel is in place but not yet rolled. Spread a thin layer of clay over the gravel and then thoroughly harrow this in until the clay and sand are well mixed.

ILLINOIS STALLION LAW.

The Illinois stallion registration law became operative on January 1, 1910, and the registration board has just issued its report for the year. This report contains matter of great interest to every owner of a stallion, and copies of it may be obtained by writing to the secretary of the registration board, J. K. Dickinson, Springfield, Ill. In the introduction the board says: "The object of this bulletin is to give in concrete form an idea of the present status of the stallion registration law of Illinois, explain its provision, and enlist the interest and co-operation of the horse breeders in its wise enforcement."

"While stallion owners have, on the whole, recognized the value of the law, and have complied with its requirements, some little dissatisfaction has been manifested, but there is no doubt in the minds of the members of the Illinois Stallion Registration Board that when the law and its benefits are thoroughly understood it will receive the unqualified support of every horse owner, as well as of every breeder, in the State."

"On January 1, 1910, there were, according to the statistician of the United States Department of Agriculture, 1,653,000 horses in Illinois, the largest number in any State in the Union. Although the average value of \$124 per head was exceeded in a few States, their total valuation on the farm was \$205,220,000, nearly one-tenth of the value of all the horses in the country. With so large an amount of money invested in this class of live stock, self interest alone demands that every protection be given this industry, and its value only not decreased, but positively increased by judicious selection of breeding stock animals, which not only show unimpeachable lineage, but have individual characters and soundness as well."

"It can readily be seen that if some of the States have such a law, and others none, animals which can not receive a license in protected States will be shipped to the States having no such law, and in a very short time the quality of the horses in licensed States will show an appreciable improvement, while those having no stallion law will become dumping grounds for unsound animals. Merely as a matter of self interest, therefore, the stallion registration law should receive the hearty endorsement of every stallion owner in the State. Notwithstanding the fact that the use of automobiles is rapidly growing, there is a constantly increasing demand for first-class horses, and as the cost of raising a pure bred or high grade horse is no more than that of a scrub even the farmer who has but one or two mares should see that his colts are of such character that they will command high prices."

That the board has been very busy is evidenced, as since January 1 they have issued nine thousand three hundred and seventy licenses. Of this number 5140, or 55 per cent, are for pure bred animals; 4225, or 45 per cent, for grade animals, and 5 per cent for cross-bred animals. With this law in operation, there is no doubt but that the proportion of pure bred licenses will increase each year.—Western Horseman.

A performance of more than passing interest was reported from Lexington during the recent trots, when two green pacers, Minor Eel and Sirena S. worked miles in 2:08½ and 2:08½, respectively. Minor Eel is by J. J. Audubon 2:19½, son of Alcyone 2:27, and Sirena S., by The Bondsmen, and both are out of the same mare, a daughter of Kaiser, by George Wilkes.

No use to deny it, ABSORBINE is the most successful remedy for removing soft bunches from horses that is on the market. No blister, no hair gone, and you use your horse during the treatment. H. H. Claus, Pittsfield, Ill., under date of September 16, 1910, reported: "My horse is now able to work all right. Would not take \$150 for him, and four weeks ago would have given him away. I tell you I cannot speak well enough for your wonderful treatment." Use ABSORBINE for Wind Puff, Soft Swellings, Rheumatism, Stiff Shoulders, Capped Hock, Bog Spavin, Thoroughpin, etc. On sale at druggists, \$2.00 per bottle, or sent direct, express prepaid, upon receipt of price. Write for descriptive pamphlet, sent free upon request. W. F. YOUNG, P. O. F., 54 Temple St., Springfield, Mass.

THE FARM

ACCOUNTS WITH COWS.

A Massachusetts dairyman gives the New England Farmer some good hints on the subject of keeping records of cows, as follows:

For some time past I have been reading of persons who kept accounts with their cows, and I put it down as a fad.

Having a few days off about a year ago, I called at some of the different farms, just to see what I could see; and I noticed they all kept records of their cows. So I commenced to sit up and ask questions.

I asked the foreman at one place what he thought of such a plan. His reply was: "When I first came to work here, I thought it was a loss of time and a bother, but now, if I had but two cows I would keep an account with them. You see that young cow there (pointing to a small, ordinary looking cow), well, she never gave any better than 30 lbs. of milk per day when fresh, and I did not think much of her. So I told her owner that she was not much of a cow to keep for profit (all other cows of the herd giving from 45 to fifty pounds when fresh). But the owner said he would keep her as she was a well-bred cow, and we would give her another trial before we got rid of her. What was my surprise when the

end of the year came and accounts were taken, to find that same cow the third best cow in the herd, and better than her mother, whom we thought a great deal of!"

Well, brother farmers, that set me thinking. As I was buying a cow for which I paid \$75 to \$80, I decided to keep account of my cows. I got a set of milk scales and record sheets and I weigh the milk morning and night and put it on record. What seemed a bother at first, appears of no moment now, and the satisfaction of knowing what my cows are doing is worth more to me than the extra time it takes to weigh the milk. What a tale that sheet and scales tell! If a cow is not milked dry; if a cow is not feeling well, or if any change is made in the feed, it will be indicated by the scales. By a glance at the record, I start an investigation to find out what is wrong.

And say, brother farmers, some of my pet cows have lost prestige and some ordinary cows have taken on new value, while others have had to go to the butchers as I cannot afford to keep them when I know what they are doing.

The scales are also useful in finding the value of the different feeding rations.

I feel satisfied as to the results of keeping records of my cows, and I think if farmers once started the practice they would not keep cows without it.

TOO MANY PURE-BRED SCRUBS.

There are altogether too many pure-bred scrubs in the flocks and herds of

this country. This will follow so long as inferior pure-bred animals are entitled to registry in the herdsbooks.

The honest breeder who cares for the welfare of the breed will not have his pedigreed scrubs registered and sell them to unsophisticated farmers for breeding stock; but there are many breeders, reasonably honest in the ordinary affairs of life, who seem to think that because the animal comes from registered stock he is justified in selling it for breeding purposes, regardless of its defects.

Like does not heget like in every instance. In fact, each year there are found in every flock and herd of pure-breds inferior calves, sheep and pigs that are fit only for the butcher and should not be sold under any circumstances for breeding stock.

DAIRY NOTES.

Do not use the milk within twenty days before calving, nor for three to five days afterward.

Brush the udder and surrounding parts just before milking and wipe them with a clean damp cloth or sponge.

The milker should be clean in all respects; he should not use tobacco; he should wash and dry his hands just before milking.

Never complain that your cow eats too much, as the more she eats the more milk she will give.

A cross of Plymouth Rock and Brown Leghorns makes very good hollers; they are quick-growing birds with a yellow skin.

Butter-fat is in greatest demand during the winter. The farmer can make the most money by producing it in winter provided he has the right kind of a cow given the right care and proper feed. Where the most money is made in dairying there you will find a community doing winter dairying.

Pacific Breeders Futurity Stakes No. 11

To be given by the

Pacific Coast Trotting Horse Breeders Association

For Foals of Mares Covered in 1910 to Trot and Pace at Two and Three Years Old.

Entries to close Thursday, Dec. 1, '10

\$4250 for Trotting Foals. \$1750 for Pacing Foals.

\$800 to Nominators of Dams of Winners, \$450 to Owners of Stallions.

MONEY DIVIDED AS FOLLOWS:

\$3000 for Three-Year-Old Trotters.

200 for Nominator on whose Entry is Named the Dam of Winner of Three-Year-Old Trot.

1250 for Two-Year-Old Trotters.

200 for Nominator on whose Entry is Named the Dam of Winner of Two-Year-Old Trot.

100 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot when Mare was bred.

\$1000 for Three-Year-Old Pacers.

200 for Nominator on whose Entry is Named the Dam of Winner of Three-Year-Old Pace.

750 for Two-Year-Old Pacers.

200 for Nominator on whose Entry is Named the Dam of Winner of Two-Year-Old Pace.

100 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when Mare was bred.

SIX SPECIAL CASH PRIZES FOR STALLION OWNERS.

Given to Owners of Stallions standing biggest in number of Mares nominated in this Stake that were bred to their respective horses, divided as follows:

1st Prize, \$100.

2nd Prize, \$50.

3rd Prize, \$35.

4th Prize, \$25.

5th Prize, \$20.

6th Prize, \$20.

The Above Prizes will be Paid on December 24, 1910.

ENTRANCE AND PAYMENTS—\$2 to nominate mare on December 1, 1910, when name, color, description of mare and stallion bred to must be given; \$5 May 1, 1911; \$5 October 1, 1911; \$10 on Yearlings, May 1, 1912; \$10 on Two-Year-Olds, January 2, 1913; \$10 on Three-Year-Olds, January 2, 1914.

STARTING PAYMENTS—\$25 to start in the Two-Year-Old Pace; \$35 to start in the Two-Year-Old Trot; \$35 to start in the Three-Year-Old Pace; \$50 to start in the Three-Year-Old Trot. All Starting Payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Colts that start at two years old are not barred from starting again in the three-year-old divisions.

For entry blanks and further particulars, address the Secretary.

CONDITIONS:

The races for Two-Year-Olds will be mile heats, 2-in-3, and for Three-Year-Olds, 3-in-5. Distance for Two-Year-Olds, 150 yards; for Three-Year-Olds, 100 yards. If a mare proves barren or slips or has a dead foal or twins, or if either the mare or foal dies before May 1, 1912, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1910.

Entries must be accompanied by the entrance fee.

Nominators liable only for amounts paid in. Failure to make any payment forfeits all previous payments. This Association is liable for \$7,250, the amount of the guarantee, only. Hopples will be barred in trotting and pacing divisions.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

Money divided in each division of the Stake 50, 25, 15 and 10 per cent. There will be no more moneys in each division than there are starters.

Entries open to the world. Membership not required to enter; but no horse, wherever owned, will be allowed to start until the owner has become a member.

"SAVE-THE-HORSE"

Registered Trade Mark

SPAVIN CURE

What Makes It the Greatest Remedy Known in Veterinary Practice? What Makes Its Sales Grow?

Just one indisputable reason—MERIT! Concentrated and irresistible power, with unequal absorptive properties, constitute the power and merits of "Save-the-Horse." Regardless of usual or unusual complications, severity or age, which accompanies conditions that are given up and thought to be incurable, after having been treated by every known method, "Save-the-Horse" will accomplish a perfect and absolutely permanent cure, and this cure will stand the severest endurance tests, or the infallible eye of veterinarian or expert. It has no baneful or vicious features and you will obtain results without delay, relapses, blistering, fevered, severely and permanently thickened conditions or suspended use of the horse.

Is it then wonderful why we give a contract which takes all the chances out of the matter, so far as the user is concerned?

H. G. PUTNAM,

Dealer in

COAL AND WOOD, DRY GOODS, TIN WARE, ETC.

Danvers, Mass., Sept. 21, 1910.
Troy Chemical Co., Binghamton, N. Y.:
Dear Sirs: I am pleased to write you that about two months ago we began to notice the thoroughpin was growing less and today has entirely disappeared. "Save-the-Horse" must have the credit of making the cure. Respectfully yours,
H. G. PUTNAM.

Palenville, N. Y., Oct. 3, 1910.
Troy Chemical Co., Binghamton, N. Y.:
Dear Sirs: I enclose \$5.00 for one bottle "Save-the-Horse," express paid to Catskill.

I cured a bad case of bone spavin with your liniment on a valuable horse, so I know it is good. Very truly yours,
O. E. SAGE.

Burlington, Vt.
Troy Chemical Co., Binghamton, N. Y.:
Dear Sirs: I have a horse that has given me considerable trouble for two

years. I used your "Save-the-Horse," and he is now completely cured; am training him absolutely sound. Yours truly,
J. C. DEVLIN.

Westchester, Pa., Oct. 5, 1910.
Troy Chemical Co., Binghamton, N. Y.:
Dear Sirs: I have used your "Save-the-Horse"; it is fine.
Have you any remedy that will make hair grow on a place that was cut?
T. W. DAVIS, 129 E. Market St.,

Flemingsburg, Ky., July 18, 1910.
Troy Chemical Co., Binghamton, N. Y.:
Dear Sirs: Find enclosed \$1.00 for can of "Save-the-Horse" Ointment. Can buy the Spavin Cure at The Reynolds Pharmacy, and it sure does the work. Very truly,
NORTHCOTT LEE,
R. F. D. No. 2, Box 8.

West Pittston, Pa.
Troy Chemical Co., Binghamton, N. Y.:
Gentlemen: Enclosed herewith please find check for \$5.00 for one bottle "Save-the-Horse." I have used it successfully before on horses. Yours very truly,
A. C. BRYDEN.

Let us send you proofs—letters which go as far and mean as much as the contract, for they tell of results that are true. They are not from friends or agents, but from actual users, and are honest in every word they say.

Bottineau, N. D., Oct. 6, 1910.

Troy Chemical Co., Binghamton, N. Y.:
Dear Sirs: I have used your "Save-the-Horse" on a mare with a bone spavin and it has cured her. One-half of the bottle did the work. I enclose \$5.00. Please send me another bottle, which I am going to try on a mare for had tendons or knuckling, and the guarantee as in the other bottle, and I am willing to do my duty in using it. Yours truly,
JNO. STEINMEIER.

JAMES H. McMANUS,

Expressman and Truckman,

257 West 64th St.

New York, June 30, 1910.

Troy Chemical Co., Binghamton, N. Y.:
Gentlemen: Please advise me where in the city I can secure some of your worm medicine and condition powders. Having tried your "Save-the-Horse" for splint and it proving satisfactory I would like to try your other remedies. Yours very truly,
JAMES H. McMANUS.

\$1 a bottle, 6 for \$5. At all drug stores. Ask for free book, "Treatise on the Horse," or write to—
DR. B. J. KENDALL CO., ENOSBURG FALLS, VT.

CARE OF POULTRY.

The essentials to profitable egg production are a healthy flock of fowls possessing constitutional vigor, bred from a laying strain; proper housing; and correct feeding. The best way to secure a laying strain on the farm is to select the hens of greatest vigor that naturally produce the most eggs during the winter, mate these hens with a good male, also from a laying strain and then select only the best daughters from this mating.

Not enough importance is usually attached to the selection of laying hens. They must be properly cared for, if they are to lay well during both winter and summer. Houses must be kept sanitary and the fowls free from vermin. Care must be exercised to avoid their being chased by dogs or other animals, or unnecessarily frightened. Poultry houses must be well ventilated, and one or more windows should be opened every bright day, so that the house will not become warm during the day and grow cold again at night.

Give Hens Exercise—Poultrymen should remember that hens should always be kept busy searching for food, so that they may get sufficient exercise. The fowls should be sent to roost at night with full crops and gotten off the roost in the morning to scratch in straw or leaves for grain during the day.

For winter egg production the best method is to imitate natural summer feeding conditions for fowls, which involves some grain for the litter and some green food. A cabbage or a few beets suspended from the roof or some clover or alfalfa chaff fed either dry or wet are good. It is preferable to keep a box of dry chaff constantly before the fowls allowing them to eat all they wish.

Feed Hens Meat.—The meat food must not be omitted as this takes the place of the insects eaten naturally by fowls during the summer. Either green bone or beef scrap will do or pieces of meat left at butchering time. Some skim milk may also be fed to advantage, and will help greatly in egg production. The amount given should be small at first, and then increased gradually until the flock has all they will drink up clean each day.

As much poultry feed as possible should be grown on the farm, but additional feeds may be bought as necessary, such as bran, middlings, gluten meal or beef scraps. If farmers would use the same judgment in feeding their poultry that they use in feeding their dairy cows, they would soon find the results quite satisfactory.—Professor J. G. Halpin, University of Wisconsin.

FOR SALE.—Magnificent Black French Poodle of rare quality; 6 months old. Will make an ideal companion for gentleman or lady. Pedigree shows blood lines of famous English winner. Box 38, Menlo Park, Cal.

SAVINGS INVESTED IN REALTY.

Put your money in residential building lots. Be sure they are in improved sections. Buy close to a big city. Purchase early; don't let others make profits out of you. The greatest fortunes were made by realty investments. We will offer 1000 choice building lots on December 1st, at prices that will pay very handsome profits. Terms of purchase, \$25.00 cash per lot, balance in thirty-six equal payments. No interest or taxes during this period. If you die before completing your payments, a deed is given your heirs, without further cost. Size of lots, 25 feet by 120 feet and upward. Price of lots, \$75.00 and upward, according to location. By investing in land you own something for your money. Investments in stocks or savings accounts are under the control of others. We guarantee you a profit of at least 25% for the first year. Subscription lists are now open. By remitting us \$10.00 per lot, subscribers get first selections. The first 500 subscribers will also receive a credit of 10% on their purchase. Act now. Let us make money for you and protect your savings.

We want agents in your locality. Write us the names and addresses of some of your neighbors. Do it now.

BUFFALO LAND SECURITY CO.,

THE JERSEY COW.

The Jersey cow makes an ideal family cow where cream and butter as well as milk is needed for domestic use, because her milk is unusually high in percentage of buttermilk. The whole milk of the Jersey cow has high nutritive value, because of its large percentage of milk solids, both fat and casein, and the digestibility is good. Butter made from the cream is of the best quality, color and flavor.

The breed of Jersey cows has been developed for many generations on the Island of Jersey by small farmers who have handled the animals almost as members of their families, housing them warmly, feeding them liberally, and treating them with the utmost kindness. For these reasons almost all of the members of the breed are very gentle and easily handled. Besides this quality of extreme gentleness and docility both in form and color of all dairy breeds, the Jersey is noted for her beauty, especially the young animals, hence a Jersey cow for the small farm or suburban place is really an ornament in the animal line. If a good young specimen is secured and handled properly she will soon become a pet of the family, and admired and loved by all.

It is claimed by breeders of Jerseys that the cows are the most economical of all the breeds, the food given them being turned largely into milk rather than in forming fat or flesh. The Jersey is a small cow, requiring a relatively small amount of feed for bodily maintenance, and therefore it is reasonable to assume that she will produce more on the same amount of feed. Another good quality of the breed is that they are persistent milkers, holding up well in milk flow for long periods.

More and more every year people are inquiring for good dairy heifers.

DENATURED ALCOHOL IN SOLID

FORM. Cleveland Special Dispatch. A well-known Wheeling, W. Va., chemist has succeeded in producing chunks of denatured alcohol in crystal form by means of a small infusion of certain acids whereby crystals of an alkaloidal nature very closely resembling physiologically the effects of ethyl alcohol distilled from sawdust. The method employed and the results obtained are somewhat similar to the crystalizing of rock candy or that of Saccharine containing as it does 350 times the sweetening strength over that of cane sugar, so this alkaloidal crystalized alcohol contains many times the strength over the ordinary denatured fluid alcohol; they will yield 194 proof denatured alcohol with a greater heating and cooking power for stoves than gasoline, and it is absolutely non-explosive.

A sample can containing 50 solid cubes, 1 stove and the secret formula how simple it can be made at home, will be mailed to you, postpaid, on receipt of \$5.00. Address

Three-Legged Horses

are not curiosities by any means. The country is full of them. The fourth leg is there all right but it is not worth anything because of a curb, splint, spavin or other like hunch. You can cure the horse of any of these ailments and put another sound leg under him by the use of

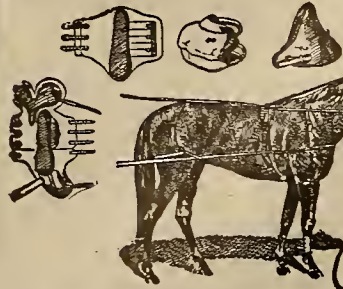

Quinn's Ointment.

It is time tried and reliable. When a horse is cured with Quinn's Ointment he stays cured. Mr. E. F. Burke of Springfield, Mo., writes as follows: "I have been using Quinn's Ointment for several years and have effected many marvelous cures; it will go deeper and causeless pain than any blister I ever used. I thought it my duty for the benefit of horses to recommend your Ointment. I am never without it." This is the general verdict by all who give Quinn's Ointment a trial. For cures, splints, spavins, windpuffs, and all hunches it is unequalled. Price \$1 per bottle at all druggists or sent by mail. Send for circulars, testimonials, &c.

Arrow and Nitro Club Steel Lined Shot Shells

Shooters are everywhere awakening to the advantages of the steel lining in U M C Arrow and Nitro Club Shells—the shells that have won every Interstate Handicap event in the past two years.

The steel lining improvement, as used in U M C Arrow and Nitro Club Shells, has been adopted by the leading shell manufacturers of Europe. It protects the powder from moisture, insuring uniform loads under the most severe weather conditions, and adds to the strength of the shell.

Sold by all first-class dealers. Do not accept a substitute. Communicate with us if your dealer does not carry U M C or Remington.

The Reducine Co., 90 West Broadway, New York City.

Gentlemen: I write to inform you that I have a mare which had been severely lame with navicular disease for the last three years. Her case was a bad one, was becoming chronic, and was considered incurable. As a last resort, I began to use Reducine, and persevered in its application. The mare is now sound and has been going sound for the last three months. It took time and perseverance, but I was bound to cure her if Reducine would do it, and Reducine has done it. Naturally, I am a friend of Reducine and lose no opportunity in recommending it. Very truly yours,

J. M. OATMAN.

THE REDUCINE CO.

Gentlemen: This is to certify that I have given Reducine a thorough trial and have obtained the very best results from it. I have recommended it to several of my running horse friends, and they all like it.

Yours truly,

J. H. THAYER.

364 MAIN ST., HACKENSACK, N. J., OCT. 30, 1910.

THE REDUCINE CO.

Dear Sirs: I think you will remember receiving a letter from me some time in August in regard to a year-old filly that had a bad bog spavin and thoroughpin, and how I had given the leg three ten-day applications of your remedy and that I could see no improvement. I thought perhaps I wasn't using it right and wrote to you for advice. You replied that you had sent me by express another can of Reducine and for me to use it as directed, for it would surely do all you claimed for it. I made two more ten-day treatments and when the stuff peeled off, I was very much pleased to find that the leg was absolutely clean, no puffs or anything to show that there ever had been any trouble.

Thanking you very much for your advice, I am,

Yours respectfully,

E. N. CHAPMAN.

A PAIR OF ROADSTERS were sold for \$25,000 during the horse show in New York this week. They were sold by E. F. Stotesbury and purchased by Walter Winans, a wealthy American who lives abroad and is a large exhibitor at the National Horse Show in London every year. The pair of horses were awarded the blue ribbon on Monday and Mr. Winans purchased them the next day. This is the highest price ever paid for a pair of horses for show purposes. Evidences increase every day that the harness horse for road, show and track purposes is regaining all the popularity it may have temporarily lost on account of the automobile. In all the large cities of Europe the carriage horse is in greater favor than ever, and dealers are having difficulty in supplying the demand, while the saddle horse is higher priced than ever. There is no fear of an over supply of good looking, sound and well mannered horses of any breed. Apropos of the horse situation, the following statement by Mr. Carroll, a member of the firm of Fiss, Doerr & Carroll, of New York, who buy and sell an immense number of horses every year, was recently printed in the New York Herald:

"I remember," he said, "that we were selling rail-roads to the Metropolitan Street Railway Company for \$96 a head back in 1897, or about that time, and we are selling the same horses to the same company today for just about double that price. They buy all horses on specifications, and it may surprise you to know that they still take five or six hundred head every year, while the Belt line bought 1000 horses from us this year. The time was when the street railroads of New York and Brooklyn used up from eight to ten thousand horses every year, and, curiously enough, they could buy them for fifty cents on the dollar as compared with what they have to pay at present, when electricity is doing most of the work.

"Our books show that when our company was organized we sold delivery horses to one of the big department stores at \$110 per head, and the same store is now paying us \$250 for a horse no better than the other. For comparison again take the heavy draught horse. In 1896 you could buy a first class brewery draught, weighing 1900 pounds, for about \$250 or \$275 on the Western feeding farms. We have to pay from \$425 to \$450 for such a horse today, and when we sell him we have to take a smaller profit than we could make on the horse that cost us \$250 in the old days. But, of course, volume of business makes up for the smaller margin of profit.

"When it comes to coach horses and fine harness and saddle horses the increased cost to the dealer is something astonishing. Why, fifteen years ago, our daily shipments from the West were all the time bringing in chancy horses that cost us \$150 to \$200, and that we would sell to members of the Coaching Club and others who would often make show horses of them. I remember one horse particularly that cost \$140 in the West and that we sold with another horse for \$1200 to a man who got \$7500 for the pair. Then there was old Sundown, picked up in the street here for something like \$200 and later sold at auction for \$5000, after winning at the National Horse Show. Some of the horses that we bought in those days for \$200 or \$300 would cost us now \$2000 to \$3000 if we could find them in the country."

FRED H. CHASE'S HOLIDAY SALE will be a combination affair and he wants draft, business, road, matinee and saddle horses. Those who have horses to sell should communicate with Mr. Chase immediately. The sale will be held Monday evening, December 19th, and entries for the sale will close Monday, December 5th.

PHOENIX closed the harness racing season of 1910 in a haze of glory, and not a day of the five days' racing passed without a sensational performance of some kind. During the week Wilbur Lou, a yearling son of Kinney Lou 2:07½ lowered the world's record for a trotting colt to 2:19½, three and one-half seconds below the former record; Happy Dentie 2:05½, another California bred and owned horse, won three races, every one in straight heats and every heat below 2:10, a wonderful performance; Zombronut, a son of Zombro won a four-heat race, trotting three of the heats below 2:09, which is the fastest race ever trotted on the Pacific Coast; Copa de Oro, by Nutwood Wilkes, also California bred and owned, lowered his record to 1:59, being the first pacer bred west of the Rocky Mountains to beat 2:00; Lady Maud C. a member of the Savage aggregation of sensational pacers, lowered her record to 2:00½, becoming the second fastest pacing mare in the world; Buck, a California bred son of McKinney, paced to a record of 2:09¼ in a winning race, being the fourteenth California bred pacer to get into the 2:10 list this year. It was a record breaking week and the directors of the Arizona Territorial Fair Association are to be congratulated on the splendid success of their meeting, while the horse-men are entitled to great praise for the excellent racing and fast time that was made in nearly every event.

THERE MAY BE much difference of opinion as to whether the rules of registration for standard bred horses are worded just as they should be, but this should not prevent owners whose stock is eligible from registering all of them that come under the rules. Registration will not make your horses trot or pace any faster but it will help their sale and enable you to get a larger price than you can possibly get for horses of the same breeding and individuality that are not registered. Hardly a day passes but a buyer turns down a trade because the horse is not registered. Registration stops all argument as to pedigree and a certificate of registration often has more effect on a buyer than a half hour of "strong conversation." If your horses are eligible register them and do it now.

BOOKMAKING IN THE WEST.

Spirit of the West, one of the leading horse journals published west of the Mississippi river, is alarmed at the encroachment of the bookmaking fraternity on trotting tracks, and in its last issue gave the following editorial comment on the subject.

"The amount of bookmaking done in Kansas and Oklahoma on races has never been enough to attract any serious attention, or to be occasion of any great alarm to those who are greatly interested in seeing innocent forms of racing only indulged, avoiding the hostile legislation which has proven such a handicap in many of the older States. But a positive push is evidently being made by a class of men run out of other territory with their gambling tools and following and machinery to get a foothold in these newer commonwealths where their odious methods have never been fully exploited and where the vengeance they sooner or later bring down is not dreamed of. And the one source of danger is the fact that the class of men conducting the large number of fair and racing societies over these States is chiefly made up of business and professional men and farmers, rather than of those who have given any large attention to racing history and practices, and who cannot be made to understand the dangerous fire they are tampering with when countenancing and treating with these sleek, scoundrelly manipulators of the gambling end of the racing sport. The Trojan horse they are introducing has only the appearance of an ordinary race horse, a runner, but inside is concealed an army of scavengers and touts who have practiced and become experts in every form of theft and wholesale robbery known to blacklegs and scoundrels of the deepest dye. Just a chance to put on some faces for very moderate money and to run books on them is their modest appearing request. But what follows and attends this no one who has anything even approaching thorough knowledge of the institution and its workings, wherever allowed any foothold whatever in the past, fully comprehends and awfully realizes. Before aware of what is taking place a damage is done and a flame of indignation enkindled scarcely to be measured or resisted. We have mildly protested and

sounded warning notes hitherto because the menace had not seemed great. But the development is much more positive the past year, and some good societies manned with worthy officials have been inveigled into a measure of tolerance and even support verging on real danger. It is gratifying to note what Dr. Battey, in the Horse Review of October 28, has to say on the subject, which is perfectly in keeping with the sentiments of all the anti-gambling class of horsemen, who compose almost the entire rank and file of breeders, owners and drivers of the light-harness horse. The Doctor says:

The writer never saw so many touts at a race meeting as there were at Muskogee, and we have noticed a few in our time at various meetings. Of course, those parasites are only found at meetings where bookmakers are the "whole works," as they are at Oklahoma meetings, and came nearly being so at the recent Hutchinson, Kans., meeting. The men having control of the booking privilege at Hutchinson and Muskogee are the very same fellows who placed betting on the "bum" in Texas, and they will queer the business in both Kansas and Oklahoma if allowed to control matters another season. It was rumored at Muskogee that an early running meeting would be held, or attempted, at Hutchinson, Kans., next season. If managed by the same people who controlled the running at the recent Hutchinson meeting, and who have been operating in Oklahoma ever since they were legislated out of Texas, the early meeting talked of will do more harm to legitimate racing in Kansas than can be righted in years.

This is not the utterance of a novice in race horse matters, nor can it be attributed to prejudices, or puritanical, or even "preacher" notions, as sometimes is asserted when such sentiments are voiced, but they are words of truth and soberness that have their justification in the entire history of racing in this country. If men will not heed the warning then the consequences will come down upon their own heads, and they will be fearful and fatal enough.

KINNEY LOU AS A SIRE.

The get of Kinney Lou are just beginning to make breeders sit up and take notice of the fact that he is siring early and extreme speed. We have no record of all his get that have been trained, but from every track where they have been given any work there are reports of their great speed.

Kinney Lou is the sire of the world's fastest trotting yearling colt—Wilbur Lou 2:19½. This alone is a great distinction and a few years ago would have sent breeders rushing to book their mares to the yearling's sire.

The same week that Wilbur Lou took his championship record, a daughter of Kinney Lou known as Della Lou trotted second in 2:12½ over the Phoenix track driven by an amateur trainer and owner who never drove in a race before this year.

At San Jose Budd Doble has a four-year-old trotter, Kinney de Lopez by Kinney Lou, that many good judges believe to be a 2:10 trotter with a few months' work.

There is a pacer by Kinney Lou owned in Chico that has repeatedly been miles in 2:10.

One of the fastest two-year-olds ever seen at Pleasanton was the colt Four Stockings owned by Mr. Frank J. Kilpatrick, and that but for lameness would have been started in stake races and taken a very low mark.

Mr. P. W. Bellingall of Oakland owns two four-year-old fillies by Kinney Lou, one a trotter, the other a pacer, that are both very fast. They have recently been sent to Chas. DeRyder to train.

These are only a few of the get of Kinney Lou that are now in training. He already has five or six others that have taken standard records, and they are all good looking young horses with splendid legs and feet.

Kinney Lou will be one of the greatest sons of McKinney if he has half a chance.

MATINEE AT RIVERSIDE.

J. H. Gaut and Col. William J. Hogan of the Pasadena Driving Club have received the assurances of the Los Angeles Driving Club members that they will be glad to co-operate with the local club in the matinee driving contests at Tournament park on Thanksgiving day.

A committee from the Los Angeles club will meet with local members at the office of Mr. Gaut and will inspect the track which is being re-surfaced and will talk over the details of the matinee.

The Los Angeles horsemen have promised to send over some fast horses so that the lovers of the sport will be assured of first class entertainment. A number of the Los Angeles men have promised to become life members of the local club and to do all in their power to further the interests of the club.

Col. Hogan has donated a handsome silver cup to the club which will be one of the principal prizes to be contested for. The Los Angeles club has signified its willingness to present a cup. No cash prizes will be offered. The local club is strictly a gentleman's driving club and not even the faintest taint of professionalism will be tolerated. Aside from the silver trophy cups, ribbons will be the only prizes awarded.

WILBUR LOU LOWERS WORLD'S RECORD.

Yearling Son of Kinney Lou Trots Mile in 2:19½ at Phoenix, Fair.

On the front page of this issue is a picture of the world's champion yearling trotting colt, Wilbur Lou, sired by Kinney Lou 2:07¼, dam Louise Carter 2:24 by Chestnut Tom 2:15.

Wilbur Lou was bred by the late Martin Carter of Irvington, California, but was foaled the property of William F. Whittier of San Francisco at the latter's stock farm at Hemet, Riverside county, California, and was driven to his record by F. H. Holloway, superintendent of the farm, on Friday, November 11, 1910, at the mile track of the Arizona Territorial Fair Association at Phoenix.

For sixteen years the world's yearling colt record has stood at 2:23, where it was placed by the Palo Alto bred colt Abdell, son of Advertiser and Beautiful Bells in 1894. Last year the wonderful filly Miss Stokes by Peter the Great, trotted to a record of 2:19¼ at Lexington, but until Wilbur Lou entered the lists this year, no stud colt in America was thought to have a chance to equal, let alone lower the record of Abdell.

When Mr. Holloway notified the Breeder and Sportsman during the latter part of September this year that he had driven Wilbur Lou a mile in 2:27¾ over the Hemet half mile track, and that if everything went well he would take the colt to Phoenix to try for the world's colt record, there were few who thought he would accomplish the difficult feat although a mile in 2:27¾ over a half mile track by a colt that had had only a few weeks' training was admitted to be a wonderful performance.

Mr. Holloway found his colt was doing everything asked of him however, and a week before the Phoenix meeting shipped him to that track and on Monday, the opening day of the fair, Wilbur Lou trotted in 2:23, thus equalling the world's record for a colt trotter held by Abdell for sixteen years.

On the following Friday Wilbur Lou was again asked to beat the watch and driven by Mr. Holloway he turned the track in 2:19½, lowering Abdell's record ¾ seconds and coming within a quarter of a second of the time made by Miss Stokes.

When everything is considered the performance of Wilbur Lou is more wonderful than that of Miss Stokes, as he got what little training he had on a half mile track and was trained and driven by a gentleman who lays no claims to being a professional.

As will be seen by the picture Wilbur Lou is a grand looking colt, and we do not doubt but he will add still further to his great reputation, as he is owned by a gentleman and is in the hands of a trainer who are determined that he will have the best of care and opportunities to develop and break more records if possible.

A word about the sire of this world's champion yearling colt will not be amiss here. Kinney Lou was bred by the late John McCord of Sacramento and was sired by McKinney 2:11¼ and out of that famous and game race mare Mary Lou 2:17. He was sold as a yearling and little was done with him until he was a four-year-old when he worked a mile over the Red Bluff track in 2:18. Budd Doble, his present owner, then got him and the following year took him east. He was not raced that year but in the fall, over the Memphis track, Mr. Doble worked him a mile in 2:09¾. The following season he was well staked and raced through the Grand Circuit, and although at no time was he a well horse he raced consistently and closed his campaign with \$11,500 to his credit and a record of 2:07¾, which was at that time the world's record for a green trotting stallion. No purer gaited or more level headed trotter ever lived than the sire of Wilbur Lou. In all his training and racing he never made but one break and that was not his fault. C. C. Crippen worked Kinney Lou the last half of a mile in 1:03 one day in 1907, and when just past the three-quarter pole a large piece of paper blew directly in front of him. He was within a few feet of it before he saw it. For the smallest fraction of a second, Crippen says, the horse hesitated. It was too late to go around it and he didn't want to step on it, so he gave one big jump, cleared the paper and landed trotting, going at a 2:06 gait. This little incident illustrates his perfectly balanced head and tenacity to stick to the trot.

So much for the sire of Wilbur Lou (1) 2:19½. He also has a dam—Louise Carter (3) 2:24, which record shows that she was some colt trotter. Louise Carter is also the dam of Mamie Alwin (3) 2:20½, her first foal. Louise Carter was much faster than her record indicates, but she had a faulty gait which prevented her training to as fast a record as she otherwise would have obtained. She is by Chestnut Tom 2:15, a son of Nutwood Wilkes 2:16½, and her dam Ingar by Director 2:17, is the dam of John A. McKerron 2:04½ that obtained a three-year-old record of 2:12½ and has proved himself a sire of early trotting speed.

This has been a great year for yearling trotters, no less than seven of them having taken trotting records in standard time during the year. To show how far Wilbur Lou has beaten all the other year-

lings of the year we give below the names and breeding of the seven that have taken records and the records they now hold:

Yearling Trotters of 1910.	
Wilbur Lou, by Kinney Lou 2:07¼	2:19½
Princess Todd, by Kentucky Todd 2:08¾	2:24¾
Benear, by Bingara	2:27¾
McKinney Mac, by McKinney 2:11¼	2:27¾
The Baronet, by Kentucky Todd 2:08¾	2:28¾
Dandy G., by Axworthy 2:15½	2:29¼
K. L. Todd, by Kentucky Todd 2:08¾	2:29¾

HORSE NOTES FROM SEATTLE.

John Conway, a city councilman of Seattle, recently purchased the brown stallion Van Coronado by Del Coronado 2:09½, dam by Montana Wilkes. This is a beautiful stallion, an exact counterpart of his sire. The late A. T. Vandeverter raised him and the estate sold him to Mr. Conway who will have him developed. He is a trotter.

Ed Dunn, our Alaska millionaire, is here with his beautiful high class filly by C. The Limit-Bonner Belle, that is now nicely broken. She is full of speed and is in all the stakes. Mr. Dunn's black trotter Rose Lecco by Lecco, dam Rose McKinney by McKinney is also here, as is his bay pacer by Searchlight. He is jogging them all on the Seattle speedway and is enjoying the sport.

John W. Considine's black mare Ida Millerton 2:12¼ by Millerton has been shipped to Geo. W. Ford's Santa Ana farm to be bred to Neerut 2:12¼. This mare and Neerut should produce speed via the Wilkes-Electioneer route. Mr. Considine has sold all his high actors and is now one of the most enthusiastic harness horse fanciers in the west. I went to Oregon to buy a three-year-old for him but the owner gave me a solar plexus blow by asking ten thousand for the colt. I did not buy at the figure although I had carte blanche.

North Star Pointer is a fine big horse and six weeks after being gelded paced a quarter in 3¼ seconds so he is no bad colt.

Alex Miller, proprietor of the Burran Stables, Vancouver, B. C., now owns the elegant show stallion and fast trotter, Zobono by Zombro. Mr. Miller will race him in Canada next year. Zobono is a most beautiful horse and his new owner is delighted.

Josephine 2:07¼ by Zolock, went into winter quarters at Vancouver, B. C., sound and in good condition. She is a good mare and will be a 2:05 pacer next year.

J. T. Wilkinson, of Vancouver, B. C., has put his war horse, Texas Rooker 2:05¼ in winter quarters at that place. Tex looked fit and good as he passed through Seattle, and will be out in 1911 ready to do battle in Wilkinson's colors.

Sherlock Holmes is in Col. Paine's stable at Spokane and finished his racing season in good form.

Henry Gray, by Zombro, is at the Seattle speedway undergoing an operation by Dr. Hartnagle who says he will have Henry sound for 1911. If so it will be 2:10 for him sure.

D. C. Hamm, owner of Red Seal 2:10 has as fine a lot of two and three-year-old colts by Red Seal at I ever saw on any farm. Each and every one is a stout, clean, well made, beautiful horse, and all are trotters and out of first class mares. Mr. Hamm wants to sell about ten head as he is too busy to develop them.

C. A. H.

THANKSGIVING MATINEE AT KENTFIELD.

The following horses will compete in the various classes in which they are named at the half mile track as the Kentfield Speedway in Marin county on Thursday afternoon, November 24th, under the auspices of the Kentfield Driving Association.

2:30 class—C. W. Rice's Billy B., Mr. California's Black Eyes, Hugh McCurdy's Gen. Smith, Frank Peratia's Little Medium, Hugh Boyle's Medicum.

2:40 class—Hugh Boyle's Lady Boyle, C. W. Rice's Skidoo, Frank Peratia's Little Sid, O. Emerald's Little Don.

3:00 class—Ed Martin's Maud M., Hugh McCurdy's Dolly Grey, P. H. Cochran's Honor.

It is the intention of the association to put on one or two specials for horses owned by members who were not present at the Monday evening meeting, and also a running race for horses owned by non-members.

Several of the trotters and pacers named above have shown their speed on the track in Golden Gate Park, and also in regular races on the circuit, and they will be able to make the afternoon's sport very interesting.

THANKSGIVING AT ALAMEDA.

The Alameda County Driving Association will hold a Thanksgiving race meet at the Alameda track. There are now 28 of the best horses entered, such as Celia K., Walter Wilkes, Harold K., Ginger, Deroll, Clipper Jr., Fraga's Babe, Golden Mane, Georgie Z. and many others. Entries will remain open until Monday evening, November 21st. We invite entries from other associations and trust that they will favor us on this occasion. Races start at 9:30 a. m.

Respectfully,

G. H. NISSEN, Secretary.

The past season Colorado E. (3) 2:04¼, served but one mare, that speedy but unfortunate Dorothy Axworthy, two-year-old record 2:21½, trial at the same age 2:12½, and she is thought to be safely with foal.

WILL BREAK RECORDS AT SAN JOSE.

Copa de Oro 1:59, Happy Dentist 2:05¾, Carloklin 2:07½ and Helen Stiles 2:09¼ in Exhibitions.

About three weeks ago an effort was made, as has been mentioned in this paper to get the Savage Combination of two-minute pacers to come to San Jose and give exhibitions of speed on Thanksgiving day. As these champion exhibition horses could not be obtained it was suggested that they try to get C. A. and W. G. Durfee to bring Copa de Oro, Carloklin, Helen Stiles and Happy Dentist here and give exhibitions of speed with our own California horses. The party suggesting this proposition stated that they could show faster miles at the trot and pace than has ever been seen in California. Since the proposition to secure these horses was first made the great pacer Copa de Oro has reduced his record from 2:01¼ to 1:59 and his race record from 2:03¼ to 2:01, at Phoenix last week. Happy Dentist, the other pacing son of Nutwood Wilkes, won one \$1000, one \$1500 and one \$3000 race at the same place last week, winning each race in straight heats, and reducing his record from 2:08 to 2:05¾ in his last race. Happy Dentist's performance of last week I believe constitutes a world's record. I know of no other horse that ever won three races in six days, winning each race in three straight heats, with all the heats better than 2:10.

At Phoenix last week Helen Stiles 2:09¼ added one more winning bracket to her long list of victories without being obliged to extend herself, and Carloklin won his first and only start this year and later in the week in a trip against time reduced his record of 2:08¼ to 2:07½.

Messrs. Durfee were wired the same proposition that was made the Savage people to bring their horse to San Jose and on last Sunday a telegram was received from them stating that they would accept the proposition and would ship from Phoenix the next day to San Jose. Therefore November 24th there will be exhibitions of speed at the San Jose Driving Park and the fastest miles ever seen in California at both trot and pace will be made on this track, with favorable day and conditions. Very few people in California have ever seen a harness horse, either trotter or pacer, negotiate a mile in 2:00. Copa de Oro will attempt to beat his record of 1:59 made last week at Phoenix which is faster than any of the Savage combination was able to do at the same place. Their best mile was the 1:59¼ made by Minor Heir. With a good day and good track Copa de Oro will beat 1:59. The fastest pacing mile ever seen in California is the 2:03¼ of Mona Wilkes made in 1907 at Santa Rosa, and the fastest trotting mile, if I am not mistaken is 2:07 made by Azote 2:04¼, about 15 years ago, over the Sacramento track. The other fastest miles is the 2:07½ of Dione made several years ago over the Santa Rosa track. Both Helen Stiles and Carloklin will beat the California trotting record. The great race horse Happy Dentist will also be driven the fastest mile of his life. Besides the exhibition of fast miles there will be two or three regular harness races. An effort was made to induce the managers of the world's champion yearling colt Wilbur Lou 2:19½ to bring that great youngster here and make an attempt to beat the record of 2:19¼ of Miss Stokes, which is the yearling record for trotting fillies, but Mr. Holloway replied that the colt was well and sound and he thought it best to ship him home and not subject him to any more chances of injury. If the weather remains fair the track will be faster than ever and with a good day on November 24th records will be broken at the San Jose Driving Park.

The program will be as follows:

Copa de Oro 1:59 to beat his record.
Happy Dentist 2:05¾, exhibition mile.
Helen Stiles 2:09¼, exhibition mile.
Carloklin 2:07½, exhibition mile.
Matinee race—Carrie B., Billy L., Judy C., Lady Rea, Directory.
Matinee race—Sidmont, Baldo, Lady Patrone.
Matinee race—Prof. Heald, Reina D., Lovelock.
Purse race, \$20—Ishmael, Princess Lou, Santa Clara.
Purse race, \$20—Kiss-Kee-Dee, Bon Roy, Bon Volante.

C. C. C.

ZOMBRONUT WINS FASTEST RACE.

The fastest race trotted by any horse campaigned on this coast this year was won by Zombronut, driven by Fred Ward at Phoenix last week. Zombronut won the first, second and fourth heats in 2:08½, 2:08¾ and 2:08¾, while Fair Maiden, a mare in Dick McMahan's string took the third heat in 2:09¼ thus earning second money. Third money went to Gen. Francis 2:08½ by Arion, a Texas horse in the stable of W. O. Foote. No other horse that has raced on this coast this year has trotted such a fast race—three winning heats below 2:09. Zombronut was bred by W. S. Mott, of Salem, Oregon, and is owned by the Table Rock Mineral Water Company of Portland. He was foaled in 1902. He was sired by Zombro 2:11, dam Mont Rose by Pilot Lemont 20292, an Oregon bred horse sired by Lemont (son of Almont and a mare by Swigert's Lexington, thoroughbred). Zombronut's second dam was Rose by Rosmont, third dam Figit by Inauguration, fourth dam Mollie not traced. None of these dams are standard bred, and until Mont Rose produces another standard trotter it will not be possible to register Zombronut as standard. He is a very handsome horse in action and a dead game trotter.

PHOENIX RACES.

Copper Stake, 2:19 class trot, \$3000:
Helen Stiles, b. m. by Sidney Dillon (C. A. Durfee) 1 1 1
Fair Maiden, b. m. by Prince of India (McMahon) 2 2 2
Princess Louise, b. m. by Del Coronado (Nugent) 3 3 3

Time—2:11½, 2:10¾, 2:10¼.

2:08 pace, purse \$1500:

Happy Dentist, ch. g. by Nutwood Wilkes (C. A. Durfee) 1 1 1
Colonel Forrest, b. h. by Gen. Forrest (McMahon) 2 2 4
Francona, b. m. by Greystone (Russell) 4 4 2
Dick Allen, b. g. by Ben Hur (Frost) 3 3 3

Time—2:06¼, 2:09¾, 2:07¼.

2:09 trot, purse \$1000:

Carlokin, h. s. by McKinney (W. G. Durfee) 1 1 2 1
Zombronut, b. s. by Zombro (Ward) 2 2 1 2
Gov. Francis, br. h. by Arion (Foote) 3 3 3 3
Vestale, br. m. by Parole (McMahon) 4 4 4 4

Time—2:10¼, 2:08¾, 2:13¼.

Second Day.

2:18 pace, purse \$1000. Two heats Monday:

Buck, b. g. by McKinney (Russell) 2 1 1
Maggie Barkley, blk. m. by Leland D. (McEwan) 1 2 2
Roxie Leland (Barkley) 3 4 3
Atalanta (Clark) 4 3 4

Time—2:11¼, 2:11¼, 2:09¼, 2:10¼.

2:23 trot, purse \$1000:

Little Branch, b. m. by Nutwood Wilkes (W. G. Durfee) 1 1 1
Della Lou, b. m. by Kinney Lou (Imhof) 3 2 2
McKinney Wilkes 2 3 3

Time—2:16¼, 2:18¼, 2:12¼.

2:27 trot, purse \$1000:

Major 3 1 1
Col. Randolph 1 2 3
Zona B. 5 4 2
Electwood J. 4 6 6
Cream DeMenthe 6 7 5
Coon 7 5 dr
Forest Glen 8 dr
Burnear dr

Time—2:25, 2:23, 2:26, 2:24.

Two-year-old pace, purse \$400; half mile heats:

Lillian Greene 1 1
Carl Hayden 2 2
Milos Baby 3 3

Time—1:09¼, 1:06¼.

Third Day.

Copper Stake, 2:12 pace, purse \$3000:

Happy Dentist, ch. g. by Nutwood Wilkes (C. A. Durfee) 1 1 1
Wild Girl, b. m. by Wild Nutting (Wallace) 1 1 1
Vera Hal, b. m. by Expressive Mac (Liggett) 2 3 5
Chiquita, by Highland C. (Maben) 6 2 3
Don Densmore 5 2 2
Col. Forrest 3 4 4
Conqueror 4 6 6

Time—2:07¼, 2:07, 2:07¼.

2:15 trot, purse \$1000:

Fair Maiden, b. m. by Prince of India (McMahon) 1 1 1
Alfretta Belle 3 2 2
Dr. Lecco, blk. c. by Lecco (C. A. Durfee) 2 3 3
Dr. Clark 4 4 4

Time—2:14¼, 2:09¼, 2:10¼.

Two-year-old trot, half mile heats, \$400:

Peggie B. 3 1 1
Nordica 2 2 4
Ella J. 4 4 2
The Chief 5 3 3
Shirly 1 5 d

Time—1:24½, 1:22, 1:23.

Fourth Day.

This day was devoted to automobile racing, no harness events being on the card.

Fifth Day.

2:12 trot, purse \$1500:

Zombronut, br. s. by Zombro (Ward) 1 1 2 1
Fair Maiden, b. m. by Prince of India (McMahon) 3 2 1 3
Gov. Francis, b. s. by Arion (Foote) 2 4 4 4
Alfretta Belle 4 3 3 2

Time—2:08¼, 2:08¾, 2:09¼, 2:08¾.

2:20 pace, purse \$1000:

Roxie Leland 3 3 1 1
Alatanta 4 1 3 2
Duke 3 2 3 2
Robert D. 1 4 dr
King Cyrano 5 dr

2:27 trot, purse \$1000:

Wild Girl, b. m. by Wild Nutting (Wallace) 1 1 1
Creme de Menthe 2 2 2
McKinney Wilkes 3 3 3
Robert D. 4 fell

Time—2:27½, 2:34¼, 2:24¼.

Three-year-old pace, purse \$400:

Lillian Green 1 1
Count Modjeska 2 2
Carl Hayden 4 dr
Baby 4 dr
Pack d

Time—2:24¼, 2:24¼.

Sixth Day.

2:10 pace, purse \$1000.

Happy Dentist, ch. g. by Nutwood Wilkes (C. A. Durfee) 1 1 1
Allerdaw 3 2 2
Vera Hal 2 4 5
Chiquita 5 3 3
Conqueror 4 5 4

Time—2:05¾, 2:08¾, 2:06¼.

Special Trot, purse \$100.

Lena Lou, by Kinney Lou 1 2 2
Creme de Menthe 2 1 1

Time—2:25½, 2:28½, 2:25½.

Three-year-old trot, purse \$600.

Miss Arizona 1 3 1
Frances B. 2 1 4
Shriner 5 2 2
S. L. McKinney 3 5 3
Roberto 6 4 5
Bostonia 4 6 6
Claytonia 7 7 7

Time—2:41½, 2:36¼, 2:35½.

2:15 pace, purse \$1000.

Don Densmore 2 1 3 1
Maggie Barkley 1 2 1 2
Tommy Lawson 3 2 3 3

Time—2:11¼, 2:12¼, 2:12¼, 2:12¼, 2:13¼.

Free-for-all pace, purse \$1000.

Copa de Oro, by Nutwood Wilkes (W. G. Durfee) 1 1
Dick Allen, by Ben Hur 2 2

Time: First heat—34, 1:08, 1:43½, 2:15½.

Second heat—29¾, 59¼, 1:30, 2:01.

Time Records Made During Meeting.

To beat 2:02¼, pacing:
Lady Maud C. by Chitwood (Erwin) won

Time by quarters—30, 1:00, 1:29¾, 2:00½.

To beat 2:00, pacing:
Minor Heir by Heir-at-Law (Hersey) won

Time—30¼, 1:00½, 1:30¼, 1:59½.

To beat 2:02¼, pacing:
Copa de Oro, by Nutwood Wilkes (W. G. Durfee) won

Time—29¼, 58½, 1:28, 1:59.

To beat 2:30¼ trotting:
Wilbur Lou, ch. c. by Kinney Lou-Louise Carter

by Chestnut Tom (Holloway) won

Time—2:23.

To beat 2:23 trotting:
Wilbur Lou, ch. c. by Kinney Lou (Holloway) .. won

Time—2:19½.

To beat 2:08½ trotting:
Carlokin, h. s. by McKinney (W. G. Durfee) .. won

Time: First heat—31½, 1:04¼, 1:35¼, 2:07½.

Second heat—32, 1:03½, 1:35¼, 2:07¼.

THE HUGUENOT GOES TO GEER.

One of the trotters upon which "Pop" Geers will rely to get the money in the Grand Circuit stakes next season will be the bay six-year-old stallion The Huguenot, which took a record of 2:27¼ two years ago. More than the usual amount of interest attaches to this horse on account of his relationship to two of the most famous horses in the history of the harness turf, both of which were trained and raced to their best records by Geers. These are The Abbott 2:03½, former world's champion trotter, and The Abbe 2:04, the unbeaten pacer of the past season, which won no less than eleven straight races for Geers, including the Chamber of Commerce, at Detroit, losing but a single heat the entire season. These horses are full brothers to The Huguenot, being sired by Chimes, out of the famous brood mare, Nettie King, by Mambrino King, and all are products of the famous village farm, where the Silent Man was for so many years head trainer.

The Huguenot is owned by Arthur H. Parker, of Bedford, Mass., the man who at one time owned the famous sire Bingen 2:06¼, and also the breeder of his most famous son, the world's champion Uhlán 1:58¾. The past season he was in the stable of Ed McGrath, but for educational purposes only, as he was not raced. That he has a touch of the speed which made his brothers famous he showed in his work, for he stepped a mile in 2:12, with a half in 1:04 and a final quarter in 0:31½.

Geers made a champion of The Abbott, that gelding being the first to beat the 2:03½ of "sweet little Alix," and he held the honors for one year, when the huldgo trotter from Toledo, Cresceus, came along and wrested his laurels from him. The Village Farm horse, however, compelled Cresceus to trot the world's record of 2:03¼ in a race, a record which stood for eight years as the best contested heat, the ill-fated Hamburg Belle being the first to surpass it when she took the measure of Uhlán in the memorable match race at North Randall last season.

The Abbe was a good colt trotter for Ben White during the fall of 1906, but the unfortunate wreck in which he was mixed up in the third heat of the Kentucky Futurity, along with the winner, Siliko, resulting in the black colt being sent to the barn, seemed to hoodoo him, and for three seasons he did not get to the races. He showed an inclination to pace, was converted to the lateral gait, turned over to Geers, and the past season swept the boards from Terre Haute to Lexington. He is one of the very few horses which after being headed in the home stretch will come on again and win, a quality of huldgo courage which he displayed on more than one occasion during the past season. He is one of the few pacers which have gone through the Grand Circuit without meeting defeat, Dan Patch and Direct Hal, the latter also a Geers pupil, being a pair to claim a like distinction. If The Huguenot turns out well next season it will be pleasing to Geers, for he certainly has a warm spot in his heart for the two brothers to that horse, with which he won so many hard-fought races.—Western Horseman.

One factory at South Bend, Indiana, has 4200 men employed at the present time in the manufacture of horse drawn vehicles, and arrangements are being made to increase the force in the spring.

Drink Jackson's Napa Soda.

WHY COLORADO E. IS GREAT.

In a recent number of the Trotter and Pacer, appeared the following:

Colorado E. 2:04½, the new three-year-old record holder, is bred just as any champion should be, according to the best thought of the most intelligent breeders of the day. His sire is The Bondsman by Baron Wilkes 2:18 by George Wilkes 2:22 by Hambletonian 19. The Bondsman's dam is Sorrento by Grand Sentinel 2:27½ by Sentinel by Hambletonian. His second dam is Empress by Abdallah Mambrino by Almont 33 by Abdallah 15 by Hambletonian; his third dam is Big Ellen by Clark Chief by Mambrino Chief, and his fourth dam is Virgie by Abdallah 15 by Hambletonian 10.

The dam of Colorado E. is Flossie McGregor by Jay McGregor 2:07½ by Jaw Hawker (?) 2:14½ by Jay Bird by George Wilkes by Hambletonian. His second dam is Black Bess 2:22½ by Wellington by Kentucky Prince; his third dam is Strathlene 2d by Strathmore by Hambletonian, and his fourth dam is Pathienne by Hambletonian, and his fourth dam Chief. A deep fountain of Hambletonian blood, resting on a Mambrino Chief foundation, coursing through the veins of many celebrated sires and famous producing mares, and no running foolishness close up. It is a combination that will never be beaten.

In regard to which a correspondent of the Kentucky Stock Farm makes the following comment: "All of which is perfectly easy to say. But to my mind it does not mean anything. There have been scores of colts fully as well bred as is Colorado E. But nobody has ever heard of their doing great things at the races. Colts by sons of Baron Wilkes and out of mares as well bred as Flossie McGregor have cluttered up the pages of the American Trotting Register for a great many years, but few of them have ever had the trotting ability to put their names at the head of a summary. If the gentleman who penned the matter quoted above will look into the subject carefully he will be apt to find that Colorado E. was foaled a great colt for the very good reason that his sire and the sire of his maternal grandsire were both produced by the same great mare—Sorrento. He will find, if he cares to go further into the matter, that some of the very best colts of the past two years, colts that are speed marvels and promising race horses, are bred very much as Colorado E. is bred. It is not a question of the Hambletonian-Mambrino Chief combination, for there has been so much of that in the failures that to talk about it is sheer nonsense. But it is a question of doubling up the blood of such superlatively great brood mares as Sorrento. And if I were embarking on a breeding venture I would buy Colorado E., or lease him, or steal him and surround him with a band of young mares sired by Peter the Great, Trampfast, The Tramp and Jay McGregor, (I would be willing to risk some very close inbreeding to get more of the blood of Sorrento) and in a very short while my venture would be turning out colts that would get the money at the races. Or, if I could not get Colorado E. I would buy me some young mares by Peter the Great, Jay McGregor, The Bondsman, The Tramp and Trampfast and I would make Jimmie Magowan breed the whole hunch to J. Malcolm Forbes 2:09½, son of Bingen and Santos, dam of Peter the Great. Why not?"

STALLION REGISTRATION ASSOCIATIONS TO MEET.

The various State authorities in charge of Stallion Licensing and Registration will meet at Chicago, Friday, December 2, in the Assembly Hall of the Live Stock Record Building, Union Stock Yards. This will be the first regular meeting of the Association, which was organized last August by representatives of seven of the 15 States having stallion boards. Dr. A. S. Alexander of the Wisconsin College of Agriculture, Madison, is President and Prof. R. J. Kinzer of Kansas Agricultural College, Manhattan, is Secretary.

Much important work will be considered at the meeting, committees on legislation, supervision of stallion pedigree registration, inspection of stallions for soundness and certification will report. It is expected that an interstate soundness certificate scheme will be adopted and a list of approved veterinarians chosen for each State having a stallion registration board. Dr. J. M. Wright, State Veterinarian of Illinois, will present the latter subject.

Short addresses will be given by several members and visitors and the following program presented: "Disqualification of Stallions for Service," Dr. Carl W. Gay, V. S., Harrisburg, Pennsylvania.

"The Kansas Law on Soundness," Prof. R. J. Kinzer, Manhattan, Kansas.

"The North Dakota Law Relating to Soundness," Prof. W. B. Richards, Fargo, North Dakota.

"What I Learned About Horse Pedigree in France," Prof. J. G. Fuller, Madison, Wisconsin.

Each stallion registration board is entitled to membership in the association and a vote in its meetings. All executive officers of such boards may attend the meetings as delegates and others interested in matters pertaining to horse breeding, inspection and registration are cordially invited to attend.

The Dan Patch electric line, a pet project of M. W. Savage, will be running into Northfield, Minn., from Minneapolis, by November 10, a distance of 40 miles. The construction from there on to the Mississippi is going right ahead. The road has been built by the people without a cent of bonded indebtedness. The work is carried on as the income from sales of stock justifies on a safe business basis, and is bound to prove Mr. Savage's contention that small investors can own and control a big enterprise and make it pay well.

NOTES AND NEWS

Kinney Lou 2:07¾ has sired a champion.

He hasn't had the best of opportunities, but he'll do it some more.

Lou Dillon and Sonoma Girl will both be bred to The Harvester next spring.

There will be very close to sixty new 2:10 trotters when the reports of the 1910 races are all in.

Happy Dentist won three races and reduced his record to 2:05¾ at Phoenix last week. He won \$2750 during the week.

The Old Glory Sale opens next week at Madison Square Garden, New York. Very few California bred horses will be offered.

With two such sires as Bon Voyage and Kinney Lou standing at the San Jose track last year there should be some stake winners produced in that section.

Seven yearling trotters have entered the 2:30 list this year and the fastest is Wilbur Lou, chestnut colt by Kinney Lou 2:07¾ owned by Hemet Stock Farm, California.

Twenty-eight head of draft horses weighing from 1600 to 1900 pounds were recently bought in Chicago for an eastern coal company at an average price of \$315 per head.

A brewery firm in New York recently gave a dealer an order for one hundred head of draft horses at \$500 each, to be delivered during the coming winter and summer.

Mr. Frank J. Kilpatrick has consigned to the Old Glory Sale the following horses: Wilmar 2:11¾, Oliver Todd, Monicrat 2:13¾ and the two-year-old Bird Peter by Peter the Great.

C. W. Williams of Allerton and Axtell fame, has a big ranch at Wilcox, Saskatchewan, Canada, and report has it that his wheat crop this year will net him nearly if not quite \$40,000.

Margin 2:05¾, arrived at Bologna, Italy, in good order and she will be started this month in a race at Milan, as will Ward 2:10¾. Both will be driven by the well known Neapolitan trainer, Frank Mauro.

Della Lou, Henry Imhoff's mare by Kinney Lou was second to Little Branch in 2:12½ at Phoenix last week and was separately timed the last half of the mile in 1:04. She was driven by her owner, an amateur.

Little Branch 2:12½ trotting is a new member of Nutwood Wilkes' 2:15 list. She took her record in the third heat of the 2:23 trot at Phoenix. She is ten years old and took a record of 2:22¾ as a three-year-old.

It is probable that there may be a fine crop of foals by The Harvester next year. The patrons that he has already received are high class, both as regards inheritance and individual merit. Few young stallions have ever been more fortunate than he in this respect.

The Stockton pacer Vernon McKinney may be seen at San Jose on Thanksgiving Day. The San Jose Driving Club will ask Dr. Thompson, owner of this much talked of green pacer to send him to San Jose and exhibit his speed. He would be a drawing card for the meeting without a doubt.

Babykin, a three-year-old filly by McKinney, out of Bouncer by Hummer, has taken a record of 2:29¾ recently and is expected to be a high class trotter next year. Comely McKinney, a three-year-old by McKinney out of Sylphine by Hummer, took a record of 2:15¾ at Lexington recently.

Nancy Bingen, the daughter of Bingen and Princess of Monaca, who took a record of 2:23¾ this past season, is the dam of a yearling by William Albert 2:16¾, that C. C. Mayberry considers the best youngster he has ever owned. The granddaughter of Nancy Hanks is in foal to William Albert again.

F. E. Alley, proprietor of the Bonaday Stock Farm, Roseburg, Oregon, has nominated 24 mares in Pacific Breeders' Futurity No. 11, of which 19 were bred to the farm's premier stallion Bonaday, by Bon Voyage, dam Welladay, sister to Klatawah 2:05¾, Chas. Derby 2:20, etc. Mr. Alley has collected a fine lot of broodmares on his farm and in mating them with this young sire is combining the blood of winners and record holders in a manner that cannot help but bring good results. Among the mares he has nominated in the stake is the dam of that great trotting stallion San Francisco 2:07¾.

One of the pleasant things that occurred during the Lexington meeting and which seems to have been overlooked by most of the scribes in their reports of the meeting, was the presentation of a very beau-

tiful whip to Mr. L. P. Lane, Westfield, Mass., treasurer of the Westfield Bank, and enthusiastic horseman, to Mike McDevitt, driver of the winner of the Transylvania stake. Westfield is a big manufacturing center for the whip trade and this was one of the finest whips ever turned out by a Westfield plant. The actual cost of it was \$25.

The record for two-year-old trotters bred in Eastern Canada was set at 2:30 at the recent Halifax (N. S.) meeting, by the bay colt Achille The Great, a son of Achille 2:15¾, he by Bingen, out of Starlight 2:15¾, the daughter of Electioneer and Sally Benton 2:17¾, the one-time champion four-year-old trotter. The previous record was 2:26.

Of the horses trained in California this year Helen Stiles 2:09¼ is the largest money winning trotter and Happy Dentist 2:05¾ the heaviest money winning pacer. Helen Stiles has won nearly \$10,000 and Happy Dentist half that amount. Chas. A. Durfee trained and raced both these horses.

Stallion owners should begin getting their announcements for 1911 ready for publication. There will be more breeding done next spring than there was in 1910 and owners of mares will want to know where the stallions are to be kept and what the service fee is going to be.

Information of the whereabouts of Gus Peters is wanted at this office. When last heard of was employed at Oakland Riding Academy in spring of 1909, and left to take a shipment of horses up north after the Pleasanton sale, March 27, 1909. He is a Swede, light complexion about 5 feet 8 inches in height, and owned a bay mare by Zolock.

Klatawah, who shares with Jim Logan the honor of holding the world's record of 2:05¾ for three-year-old pacers, will go under the hammer at the big Chicago sale in December. He was foaled at the Oakwood Park Stock Farm, Danville, California, in 1895, and has for several years been owned by A. G. Danforth & Sons, of Washington, Illinois.

The first day of December will be the last day on which nominations to Pacific Breeders Futurity No. 11 can be mailed. The stake has a value of \$7250 and to win a portion of it it is necessary to get your nominations made on or before December 1st. If you have not received an entry blank drop a postal to Secretary Kelley, 366 Pacific Building, San Francisco, giving your address, and he will send you one.

A yearling by Stormcliffe 2:13¼ out of Parla by Parole, was sold at auction at Pekin, Illinois, week before last and brought \$2000, the top price of the Maple Lawn Farm sale. F. E. Smoot, proprietor of the Searchlight Stock Farm, Petersburg, Illinois, was the purchaser and has sent the colt to Charley Dean to prepare him for his stake engagement as a three-year-old.

L. W. Tomlinson, of Lebanon, Ind., had the misfortune recently to lose, by lung fever, his grandly bred young stallion, Alto Palo, son of Allerton 2:09¾, and Palita (2), 2:16 by Palo Alto 2:08¾, second dam Elsie 2:20¼, the dam of six, and third dam the great brood mare, Elaine 2:20. Alto Palo was a half brother to Palite the son of Nutwood Wilkes, owned by E. D. Dudley, of Dixon, Solano county, California.

One of the members of the Estabrook stable for next year will be the very fast filly Lady Jayquita, who will carry the colors of the Denver sportsman in the Futurities for three-year-olds. This year the Lady trotted a mile over the Lexington track in 2:21 and a quarter in 30½ seconds. It is doubtful if any young trotter possesses more speed or better manners. She is by Jay McGregor and her dam is by The Tramp.

Jos. McTigue, the popular harness dealer of this city, slipped while alighting from his buggy last Wednesday and broke his hip. The injury is a very serious one and will lay him up for a long time. He is now at St. Luke Hospital and is doing as well as could be expected under the circumstances. Mr. McTigue is a prominent member of the San Francisco Driving Club, and takes a very active interest in all its affairs, having served several terms as president of the club.

Joe Patchen 2:01¼ was raced for ten years over all kinds of tracks. He started 100 times. He won fifty-three firsts, was second thirty-nine times, third once, fourth four times and unplaced three times. He won ninety heats in 2:10 or better, sixty-eight in 2:07 or better, sixty-four in 2:06 or better, thirteen in 2:03 or better and five in 2:02 or better. After all this he left the turf absolutely sound. He was an iron race horse. His sire traced directly to George Wilkes 2:22 in the paternal line and his dam to Vermont Black Hawk 5.

A western reporter for "The Horse Review" states: "At less than half the meetings attended by the writer this season was public betting allowed upon the ground, and the meetings without book making, or other forms of public betting, furnished just as large fields of horses and equally as good contests, as well as enjoying as liberal patronage at the gate, as did the meetings granting betting privileges. This showing is ample proof that harness racing in the West does not depend upon public betting, but has become an established sport."

The pacer Ross K. 2:01½, met with a misfortune at Dallas, Tex., during the meeting there which will lay him up for the remainder of the season. Dick McMabon was working him a slow mile when the stallion suddenly went lame. It was ascertained by the veterinarians that the lameness was the result of a severe strain to the left hind pastern.

John Benyon will again be one of Ed Geers' assistants. He left Lexington for Memphis, Tenn., the past week. He has been at work for a time at the Claiborne Farm, preparing its stock for the Old Glory Sale, and at the recent Lexington meeting, drove Ormonde 2:08¾ to his present record.

The black pacing stallion, Postman 2:13¾ that raced successfully through the east this season, will in all probability be tried out in the Grand Circuit next year. Postman 2:13¾ is by Ponce de Leon 2:13 and out of the dam of Centrifuge 2:09 and is the property of W. J. Wright, Duxbury, Mass.

A match trotting race was settled over Belmont track, Philadelphia, a few days ago, when Toddles, by Todd, beat The Ape, by Beau Brocade, in 2:15¾, 2:16¾. The match, as originally made during the progress of the Empire City track meeting in New York, was for \$500 a corner, with four horses in—A. B. Coxie of Paoli naming Toddles; George Willing of Chestnut Hill naming The Ape, and two New Yorkers naming two other horses. A forfeit of \$125 each was posted and that let the New York men out, since they never materialized to race. Toddles, driven by Joseph L. Serrill, won in straight heats.

Charles Buckley, a veteran of the civil war, and one of the oldest horse trainers and drivers in this country, died suddenly in this city about two weeks ago, and was buried under the auspices of the San Francisco Driving Club of which he was a member. The interment took place in the National cemetery at the Presidio. Chas. Buckley was formerly a resident of Indiana and was widely and favorably known by horsemen all over the United States. He came to California for his health several years ago and resided here until the day of his death. He leaves a wife and son in Indiana.

There have been received by the Presidents of the Park Amateur and San Francisco Driving Clubs of this city two very beautiful and expensive silver cups donated to the clubs by Mr. Frank Kilpatrick of New York. These cups are to be awarded to the horses representing each club that have won the greatest number of heats during the entire racing season of 1910. Three or more horses to start in each race. Both cups are of elegant design and made of sterling silver. At the next meetings held by the clubs these cups will be duly awarded to the owners of the winning horses.

SIR POLEON, RACE AND BLUE RIBBON WINNER

Charles M. Marley writes us that the Woodland borsemen are already talking about the stake winners of 1911 and are training their yearlings and breaking the weanlings to harness. He is working his mare Nusta 2:23½ as there is talk of a matinee in the near future.

The Woodland Driving Club is preparing to announce their purses for 1911, and will try to arrange a program of generous purses that will draw a large entry list and result as their meetings have in the past in good races and large attendance.

Mr. Marley's horse Sir Poleon 52065, will be one of the handsomest three-year-olds of 1911 there is in the country. He made three starts in 1910 and won them all in straight heats. His first race was in April and won in 2:33 and 2:27. His last start was August 26th when he won in 2:23½ and 2:24. Sir Poleon also won a blue ribbon at the State Fair and also at the Woodland Fair. He is by Nushagak, sire of Aristo 2:05¼, etc., and his dam is Anselois, also the dam of Nusta 2:23½, by Prince Ansel, sire of Prince Lot 2:10¼.

ADOPTS PROTECTION POLICY.

The Racing Commission of the Argentine Republic has adopted the American policy of protection to home industry by barring from all ordinary races hereafter all horses not born and bred in Argentine. The Buenos Ayres Standard of October 9th contained the following:

"At a meeting of the Racing Committee held at the Jockey Club on Thursday last it was resolved to create a new law treating on the participation of imported horses on the Palermo and other race courses under the jurisdiction of the Jockey Club.

"The new law reads as follows:

"No. 1—In all hippodromes under the patronage of the Jockey Club at present subjected to the old regulations, it is understood that in future all the ordinary races will be open only to animals born and bred in the Argentine.

No. 2—Imported horses will only be able to compete in classics and special races provided for them by the Jockey Club.

"No. 3—The new law will take effect from the 1st of September prox., and will only apply to horses imported into the Argentine and inscribed in the Argentine Stud Book, after that date."

This action on the part of the Jockey Club will close Buenos Ayres for all time as a market for American bred yearlings. In recent years J. B. Haggin has sold scores of young thoroughbreds in the Argentine Republic.

HAPPY DENTIST 2:05¾.

Son of Nutwood Wilkes Wins Three Races in Straight Heats all Below 2:10.

Dr. D. E. Nash, a well known and popular D.D.S. of San Jose, is the owner of a gelding that has this year won more money than any other pacer trained in California, and by winning three races in one week at Phoenix, all in straight heats and all heats below 2:10, has accomplished a feat that has been beaten by but one other horse, the famous pacer Independence Boy 2:04¾. Happy Dentist is the name of Dr. Nash's horse, but this name was not bestowed on the pacer by his owner, but by the trainer who entered him in his races last year.

Happy Dentist was bred by the late Martin Carter at the Nutwood Stock Farm, Irvington, Cal. His sire is Nutwood Wilkes 2:16½ (son of Guy Wilkes and a mare by Nutwood) and his dam was the Palo Alto bred mare Azrose, a daughter of Azmoor purchased by Mr. Carter because her breeding and individuality led him to believe she would produce to his stallion. That Mr. Carter made a good selection is proven by the fact that Azrose produced Happy Dentist 2:05¾ to the cover of Nutwood Wilkes and also the pacer Azmoorie 2:20¾ by the same horse. She had previously produced the trotting mare Little Louise 2:17 by Boodie.

Happy Dentist was trained and raced last year by Henry Helman. He started but twice, taking a record of 2:11¼ in a race at Pleasanton which he won in straight heats in 2:12¾, 2:11¼ and 2:13¾. As Mr. Helman decided to race on the eastern tracks this summer, and Dr. Nash wanted his horse to remain on the Pacific Coast, he turned him over to the veteran Chas. A. Durfee when Helman went east. The gelding showed great speed in his work at Pleasanton and San Jose but after being shipped north after the San Jose races went lame and was not the horse he had been earlier in the season although he won his first race at Portland in straight heats, all below 2:10, reducing his record to 2:08. His lameness bothered him after this and he was beaten several times but always got some of the money.

When the Durfee string reached Phoenix Happy Dentist was almost unbeatable and from the manner in which he defeated Allerdaw (the horse that had beaten him up north) it was plain to be seen that he outclassed this son of Allertonian. His three races during the six days of the Phoenix meeting were all won in straight heats, and as the slowest of the nine heats was in 2:09¾ and the fastest in 2:05¾, the average is 2:07¾. When it is taken into consideration that his fastest heat was paced in the third race, the gameness, speed and endurance of this gelding are plainly in evidence.

Happy Dentist's breeding is of the sort to delight our friend Parlin of the American Horse Breeder as it contains the hot blood of the thoroughbred close up, and it might be well to state in this connection that a more level headed, sensible pacer never lived than Happy Dentist and his inclination seems to be to stick to the pacing gait no matter how hard he is driven, although he wears the hoppers.

Azrose, the dam of Happy Dentist, was sired by Azmoor, trotting record 2:20½, who was by Electioneer out of the thoroughbred mare Mamie C. by imported Hercules.

The second dam of Happy Dentist is Arodi by Piedmont 2:17¾, third dam Arol 2:24 by Electioneer, fourth dam Aurora 2:27 by John Nelson, a horse that was largely thoroughbred, and fifth dam the Lamott mare, grandam of Albert W. 2:20, whose breeding was never traced.

Happy Dentist's winnings amount to very close to \$5000 this year and he looks like a 2:02 prospect for 1911.

FUNNY—BUT THEY ENJOY IT.

All summer long Walter Cox told entertaining stories about the race meeting at Hillsgrove. Every other day he thought of a new one, an actual occurrence that had come under his observation at the Rhode Island track, and every new one was funnier than the one which immediately preceded it. Some people doubted the accuracy of certain of the stories, but Cox always proceeded to prove his case. The American Horse Breeder representative attended the last meeting of the year at Hillsgrove and the following is a part of his story of how the officials officiated:

"One of the funny things that occurred at the meeting was when the judges removed a driver for the reason that he was not in a fit condition to handle his horse, and putting up another teamster, on the second score down fined the substitute reinsman \$25 for scoring down in front of the pole horse. The teamster dismounted and informed the judges that he would see them outside of the State before he would loosen up to that extent this late in the year. On being informed that the fine would be charged up against the horse he resumed his seat and kept on coming down in front of everybody. He finally got the word with all of the best of the start, but the horse was not up to much and he failed to better his position in the race.

"The man who officiates at the distance flag has a far more responsible position at a track where there is any real effort made to enforce the rules than the prominent citizen who gets his name in the paper as one of the judges, though all the latter does is to say yes, yes to the starter or the presiding judge, but anybody who happens along is considered by the average track manager as good

enough to say whether this or that horse finished in front of the flag or not. This often means the loss of thousands of dollars to those interested, but as often as not the duty is intrusted to some hanger on, that the manager would not trust with a \$5 note around the corner. In one case here the starter waited about six scores for a bad actor to come down on his gait. The horse was a favorite. He was finally sent away on a break and finished so far behind the flag that there was not the least question as to his having been distanced. He was so announced. But a short time after the starter cleared his voice and made the following announcement, or something near it: 'Ladies and gentlemen, the judges find that owing to a mistake on the part of the flagman, who thought that it was necessary that not only the horse but the sulky must have passed him when he dropped the flag, and he being of the opinion that the horse's nose may have been at the mark when he dropped the danger signal, the judges, having consulted the rules, have decided to place the horse.' As a matter of fact had the rules only required that the man at the flag be required to see the horse on the stretch he would have still have been distanced. But it happened, in this case, to make no difference as the horse in question had a decidedly off day and was up at the quarter pole in the next heat. The point is that the judges did not enforce the rules with any degree of uniformity. The man who is shut out will usually take his medicine if he is convinced that he is not being made a mark of. He does not like to have the rules strictly enforced in his case and then see another get something that does not belong to him."

BLOOD LINES OF UHLAN 1:58¾.

Uhlán 1:58¾ stands at the head. His sire, Bingen 2:06¼ is a direct descendant of Electioneer 125, in the paternal line, as he was by May King 2:20, a son of Electioneer. The dam of Bingen 2:06¼, however, was Young Miss, by Young Jim 2009, a son of George Wilkes 2:22; and his second dam was Miss Mambrino, by Red Wilkes 1749, another son of George Wilkes 2:22; so that Bingen inherited two strains from George Wilkes and but one from Electioneer.

The dam of Uhlán derived none of her inheritance from either Electioneer 125 or George Wilkes 2:22. Her sire, Sir Walter, Jr. 2:18¾, was by Sir Walter 2:24½. The dam of Sir Walter, Jr. was Kate Clark, whose sire was American Clay 34, The latter was by Cassius M. Clay, Jr., 22, and his dam was a thoroughbred daughter of imported Tranby. The dam of Sir Walter, Jr. derived at least seven-eighths of her inheritance from thoroughbred sources for his second dam was Mimosa, a thoroughbred daughter of Alexander Churchill.

Sir Walter 2:24½, the sire of Sir Walter, Jr. 2:18¾, was by Aberdeen 27, whose sire was Rysdyk's Hambletonian 10, and whose dam was Widow Machree 2:29, by Seely's American Star 14, a horse whose inheritance was derived largely if not solely from thoroughbred sources. The dam of Sir Walter 2:24½ was by Edward Everett 81, whose sire was Rysdyk's Hambletonian 10, and whose dam was Fanny, a registered thoroughbred daughter of imported Margrave. The second dam of Sir Walter 2:24½ was by Long Island Black Hawk 24, and his third dam was by Exton Eclipse. The latter was by the famous four-mile race winner American Eclipse, and his dam was by imported Exton, a son of Highfly, one of the fastest of the get of the renowned Herod.

Uhlán gets a strong infusion of the richest of thoroughbred race winning blood from his dam and it is close up, too. This may be very annoying to those theorists who are opposed to the introduction of near infusions of thoroughbred blood in the trotter. They can shut their eyes to the fact that it is there, however, just as the silly ostrich can shut his eyes, thrust his head in the sand and think he is hidden from sight. This may give the no-thoroughbred fellows some relief, but it won't change the fact. The Electioneer and George Wilkes strains must share with the thoroughbred the credit of producing the wonderful trotter Uhlán 1:58¾.—American Horse Breeder.

UNITED STATES LEADS.

New York, November 16.—The American Horse is the finest in the world and the United States now leads all nations in the breeding of horses, according to George M. Rommel, chief of the animal husbandry division of the Department of Agriculture. Dr. Rommel, who is in New York for the horse show, declared on his arrival that nothing "but an ancient prejudice would lead people to buy imported stock when the American bred horse is obtainable."

Dr. Rommel paid his compliments to the old controversy as to whether the automobile is driving out the horse.

"Well," he said, "figures show that horses are not diminishing—in fact, that there are more horses in the country than ever. If the automobile has driven out the saddle and carriage horse generally, why is it that these are higher in price than before the auto came? The people who, before the advent of the automobile, were the best customers for saddle horses, were such as could afford to have horses and automobiles. When the auto came it drove out the cheaper grades, but the prices of the better ones went skyward. There is a better market than ever for the good horse and a poorer than ever for the poor one."

THE RECORDS OF 1910.

The best performances of the season, trotting and pacing, are now as follows with small chances of there being any further changes.

Yearling colt—Wilbur Lou, by Kinney Lou 2:07¾, dam Louise Carter 2:24 by Nutwood Wilkes2:19½
Yearling filly—Princess Todd, by Kentucky Todd (3) 2:08¾, dam Grace Bingen, by Bingen 2:06¼2:24¼
Two-year-old colt—Justice Brooke, by Baron-gale 2:11¼, dam Expectation, by Autograph 2:09½
Two-year-old filly—Miss Stokes, by Peter the Great 2:07¾, dam Tillie Thompson by Guy Wilkes 2:15¼2:09¼
Three-year-old colt—Colorado E., by The Bondsman, dam Flossie McGregor, by Jay McGregor 2:07¾2:04¼
Three-year-old filly—Native Belle (2) 2:07¾, by Moko, dam Julia D. C., by Gen. Washington2:06½
Three-year-old filly—New performer, Grace, by Peter the Great 2:07¾, dam Orianna 2:19¾, by Onward 2:25¼2:08
Four-year-old colt—Billy Burk, by Silent Brook 2:16¾, dam Crystals Last, 2:27¾, by Ondale 2:23½2:06¾
Four-year-old filly—Joan, by Directum Spier (4) 2:11¼, dam Sara W. 2:18¾, by Hal Braden 2:07¾2:04¾
Four-year-old gelding—Dr. Treg, by Tregantle 2:09¾, dam Helen H. 2:19¾, by Moquette (4) 2:102:08¾
Stallion—The Harvester (5) by Walnut Hall 2:08¾, dam Notelet, by Moko2:01

AN OLD TIME RACE.

All the older horsemen of New York, says Trotter and Pacer, remember the great race trotted by two then famous stallions over the old Ferry street track during the Grand Circuit meeting of 1882, says a Buffalo writer. These stallions were Jerome Eddy 2:16¾, and Black Cloud 2:17¾. The race is probably the only one in the history of Grand Circuit racing in which it took six heats to decide a contest in which only two horses took part. Jerome Eddy won the first heat in 2:16½. Black Cloud got the next in 2:18½. Both the third and fourth heats were decided dead heats by the judges, as they could not see that one had the advantage of the other at the finish, the time of the heats being 2:19 and 2:20. Black Cloud won the fifth heat in 2:18¾, and the sixth in 2:19¾, with Eddy right up to his throat-latch in each. The race was the greatest stallion race that had been trotted up to that time. The following winter, just after Jerome Eddy had been sent to Chicago to Peter V. Johnston to get ready for another campaign, Henry C. Jewett of this city made a trip to that city, looked the horse over and bought him to place at the head of the Jewett Farm stud, paying \$25,000 for him. Attention was drawn to the great race Black Cloud trotted over the Buffalo track by the announcement a few days ago of the sale of the new 2:10 trotter, The Plunger 2:07½, to European parties, his pedigree showing that Mrs. Cluke, the dam of Black Cloud, was also the fourth dam of The Plunger, thus, after a period of nearly 30 years giving the blood of that great old mare another sensational stallion to testify to its excellence as a speed producing factor.

Kilpatrick 2:21¼, the two-year-old brother to Grace 2:08, and Czarsena 2:07½, will be in the stud at Patchen Wilkes farm next spring.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT.

TREATMENT OF RATTLESNAKE BITES.

People will tell you that the rattles on a rattlesnake denote the years of its age. Mark that down as a fallacy. The rattlesnake sheds its skin once or as many as four times a year. Every time the skin is shed another rattle appears. Occasionally rattles are broken off or lost at the extreme end, and that snake may, by popular rating, be reckoned younger than it is. Among some old Californians, particularly the cattlemen with a tinge of Spanish blood in their veins, there has revived a tradition amounting to belief that the rattles themselves contain a fine dust, which will destroy the eyesight of a human being. Such old-timers may caution a "gringo" not to wear rattles on a sombrero, lest by chance they get broken and some of that insidious dust reach the wearer's eye. The only poison about a rattlesnake is in a gland in the reptile's head. The rattles are absolutely harmless unless you insist upon handling them while attached to a live snake.

In all the vast territory of California, throughout its 800 miles of length and some 200 miles of width, the rattlesnake is the only poisonous reptile. California lizards are all harmless. All the snakes in California are absolutely harmless except the rattlesnake.

But there are five different kinds of rattlesnakes within the confines of California. Four of the five kinds are never found north of the Tehachapi. They fall to the lot of Southern California.

The Pacific rattlesnake, sometimes called the black rattlesnake, is found all over California, except on the Mojave and Colorado deserts; that is, it is found in places where civilization has not yet stamped it out. But the day of the rattlesnake is going. The Pacific rattlesnake is common in Lake county, the western part of San Bernardino county, parts of Santa Clara and Monterey counties, and lots of other places. It is rather dark in color, sometimes a kind of green; it has dark blotches on the back rimmed with lighter areas. But individual snakes of the same kind differ considerably in coloring.

Then there is the red diamond rattlesnake. It is found only in the western part of San Diego county in California, but it is common over the border down in Lower California. It is bright reddish yellow, and is the largest of all rattlesnakes found in California.

Also there is the sidewinder, or horned rattlesnake. It lives only in the Mojave and Colorado desert country of California, but is found over the border in neighboring Nevada and Arizona. It is a very pale ash gray in color and is distinguishable by little horns over the eyes.

Next comes the tiger rattlesnake, so called by reason of the resemblance of its markings to the cross stripes of a tiger. It is tawny yellowish in color.

Lastly there is Mitchell's rattlesnake, found in California only in the Colorado desert region, that area where the map shows Indio, Palm Springs, and the Imperial Valley. Its real home is Lower California, but it ranges up into the southern desert end of California and over also into the neighboring part of Arizona. This rattlesnake was named for Dr. S. Weir Mitchell, novelist, naturalist, physician, and one time authority on snake venoms.

A great many people insist that the so-called coral snake in California is poisonous. The real coral snake is venomous. But it is not found in California. Its territory is Texas, Arizona, New Mexico, the Gulf States and the most of Mexico and even way down into South America. The California snake that some call a coral snake is easily noticeable for its alternating rings of black and white or red and white, encircling it like hands about an inch wide. But it has no power to harm.

Now for the Pacific rattlesnake, which may be encountered nearly any place in California, particularly in warm and rocky regions. You want to know how it attacks and what to do if a person be bitten.

First know this: Rattlesnake bites result in death in only about one case out of ten. That is the average. The percentage of fatalities is greatest among children, for the simple reason that a child's body is smaller and the amount of venom is relatively greater for the bulk affected.

A rattlesnake bites only when it has to bite. It prefers to run away. It will bite when attacked, when cornered, and when suddenly surprised and too near to escape. It usually rattles a warning if it hears you coming.

A rattler can strike and inject venom only three or four times in succession. Then its supply of poison is for a time exhausted. But after about half an hour the sac containing the poison secretes another supply, and the snake is ready for business again. In a big rattler these poison glands hold as much as half a teaspoonful of venom. The poison is a yellowish white fluid, something like the white of an egg, only not quite so firm. The snake does not waste its poison, as that is its only means of defense; it will not bite aimlessly. But it will bite

any time it has to, day or night, and with deliberate aim, excepting only when it is shedding its skin and the skin is temporarily pulled down over its eyes. Then it strikes out blindly.

Let us see what happens when a rattlesnake bites a person. It strikes downward; its two curved needle-like fangs pierce the flesh and inject the venom. Results then depend a good deal upon just what spot on the body is bitten and upon the amount of venom injected. If the fangs penetrate a large vein that vein will the more readily carry the poison right along toward the heart. But if the venom strike the shin bone or where there is little tissue or few veins the chances are better.

The arteries and veins of the human body are akin to the water system and the sewer system of a great city. The heart is the big, powerful pumping works forcing fresh arterial blood through the mains for the use of tens of thousands of consumers. The veins are the sewer pipes draining the waste matter and impure water back to the lungs, which are purifying works. And so the round goes endlessly on, as long as the heart pumps. The arteries are pressure pipes. Their little branches reaching out through the tissues are called arterioles. They are the small service pipes to the consumers. Tiny muscles keep these arterioles contracted into smaller orifices, and the heart has to pump vigorously to force the blood through.

The instant effect of a rattlesnake bite is to relax the tiny muscles that hold the arterioles contracted to small orifices. So the service pipes swell. Then it is easier for the blood to pass through; it flows more slowly; and the heart beats decrease in force. There isn't enough pressure in the service pipes to get a full supply of blood up into the brain; and the person becomes giddy and laments; that faint may last an hour, or even twenty-four hours. It all depends upon where the venom was injected and how much.

The first thing to do in case of a rattlesnake bite is to take a knife and quickly slash open the spot bitten and then apply the mouth and suck blood and venom out and spit it away. In the next few seconds a handkerchief or a stout strip of cloth should be tied about the limb loosely, between the bite and the heart, and a stick inserted and the circlet of cloth quickly twisted and twisted very tight to check the flow of any remaining venom toward the heart. And then some one should be sent in a hurry for a doctor. The doctor will inject strychnia or some such heart stimulant to overcome the sluggish action induced by the venom.

Whiskey is not the thing for snake bites. This will be a bitter blow to amateur fishermen and hunters and husbands who have always taken along a large supply. If no doctor be available and the wound be slashed and sucked, then a very little whisky may be administered, never to exceed two tablespoonfuls every three hours for a day following the bite. More whisky than that given after a snake bite is dangerous to the life of the patient, though a good deal depends upon how much of any thing some constitutions can stand, be it snake venom or heart stimulant.

Ordinarily the venom is absorbed into the tissues within the first three to five minutes. Acute conditions will develop within the first few hours. As soon as the patient begins to feel better the worst is generally past. If the subject gets sick and then gets better these stages will be gone through within the first ten or fifteen hours. After that there need be no great apprehension. The flesh will discolor around the wound like a black and blue bruise, and in bad cases there will be considerable swelling. The local effect of the venom is to destroy the natural immunity of the tissue at that point. It becomes easily liable to infection and to blood-poisoning from microbes that would naturally find no lodgement. So, even after the snake venom, or most of it, is sucked out there is danger of the wound developing blood poisoning.

Although I have had the grim pleasure of killing a good many California rattlesnakes, with sticks and stones and shotgun, I am not presuming to present this little treatise out of my own experience or knowledge. What is here given for the good it may do is based on the information of a snake expert, who has studied California reptiles for a great many years and who has for long been connected with the California Academy of Sciences, Dr. John Van Denburgh, of San Francisco.

Also, I have it from Dr. Robert Blue, the United States Government expert on contagious epidemics, —yellow fever, hühonic plague, and the like—that whisky is one of the worst things that a man can take for snake bite. What Dr. Blue prescribes is this: Slash open the wound, suck out the venom; then soak into the cut a solution of permanganate of potash. This is a powerful antiseptic. It comes in tiny discs as you buy it at any drug store. Water should be added until the dissolved tablets produce a liquid about the color of claret wine. This is strong enough. A little of this solution can be carried in a very small bottle by any one having occasion to be about in a snake country, either for his own use or for the emergency need of others. The

permanganate is supposed to check the venomous tendencies of the remaining poison and to prevent the development of bloodpoisoning.

Horses and cattle are not known to be fatally affected by snake venom. Their bulk is probably too great for the amount introduced into the system. Hogs are immune to snake bites, possibly because of their tough hides and underlying fatty tissues with few veins. Hogs will kill snakes and then will eat them. But what will a hog not eat, even to its own young pigs? And Indians seem to be strangely immune. But the Indians are mightily afraid of the rattlers just the same. In the annual ceremonial of the snake dance among the Moquis, the dancers actually hold rattlers in their mouths and hands. Frequently they get bitten. But always after the dance the participants partake freely of a peculiar herb soup or concoction made by their medicine man. It is a violent emetic. What it is made of or why an emetic should be effective are not yet known to science.

TIBURON'S BIG GAME FISH.

Some day, if half the wonderful stories told about that little understood part of the continent be true, Tiburon island in the Gulf of California, will divide with Catalina and Aransas Pass the honor of constituting the big fishermen's mecca to which pilgrimages will come from all over the world.

Combining many of the attractions of both places, with a few of its own added, Tiburon, according to Arizona Charlie Meadows, who led several expeditions there, is as near a Paradise for the rod and reel fishermen as any similar stretch of salt water on the globe. Southern California sportsmen have only prospected around the edge of its possibilities, but a few have tasted of enough of its pleasures to know that in addition to the big fish prevalent on the Southern California coast, a few strangers of game disposition and immense proportions are to be encountered. One angler had some special hand lines and extra large bone jigs made especially for these Gulf of California fish but the way they did business with his tackle would have been a credit to sharks or a whale.

Meadows is quoted as authority for the statement that tuna and tarpon both are found in the gulf in season. Yellowtail, albacore, and, in short, all the local marine game fish are wonderfully plentiful there; a sort of Spanish mackerel peculiar to the warmer seas and a fine food fish is also found, but the noblest game of them all, bar the tuna, which attains immense size around Tiburon, is the papagallo.

This fellow is a sort of big cousin to the yellowtail with a characteristic dorsal fin longer than that of the local representative of the Seriola family, and possessed of flexible filaments along its upper edge. These serrated processes bear a remote resemblance to a cock's comb, and in some measure account for the native name of the fish, which has been translated freely as "father of roosters."

Reports agree upon the size of the papagallo and ascribe to him considerably greater poundage than the yellowtail. He is said to run up to 60 or 80 pounds quite regularly and frequently attains a weight of 100 pounds, which, considering his race and ancestry, ought to make him a worthy game fish. It is not known whether the capture of a papagallo has ever been consummated on a rod and reel. He is said to be hard game with the stoutest hand-line. Thicker through the shoulders than the yellowtail and of stockier build, with a massive head and a tail like a 20-horse power screw propeller, he is an incarnation of power and speed.

He haunts of the papagallo appear to be similar to those of the yellowtail so far as can be ascertained. He is fond of the shores and at times is taken from the beach by handliners. The Mexicans fish a little in this manner.

Tiburon island, around which the big game fishes of the gulf seem most numerous, is not a difficult point to reach, although conflicting reports exist relative to the character of the native Seri Indians. By some they are set down as blood thirsty cannibals, while others say they are not different from those of the mainland.

The trip would be a pleasant one for a yachtsman of sporting proclivities as he would be independent of landing. A launch could be put on hoard the cars, however, and unloaded at Yuma for use on the Colorado. If she were large enough quite a cruise might be made in her, although the region is one of rather sudden storms and no places to replenish supplies.

Fine Striped Bass Fishing.—J. A. Demond and Max Kavanagh, two Napa anglers, made a fine catch of striped bass recently in Fagan and Steamboat sloughs, south of Napa. One of the fish landed weighed 52 pounds, one of the best catches of the season in that vicinity. Eleven others were caught, weighing 6 to 12 pounds each. The fish were all landed with rod and line.

E. G. Manasse and Frank Horstmeyer caught 25 fine striped bass in the river south of Napa the following day—all of the them big beauties.

Yellowtail Fishing Good.—Santa Monica anglers are having great sport at present with yellowtail, live bait in the shape of a small mackerel or anchovy is the best lure. The Japanese market fishermen on the long wharf on the 10th inst., shipped 75 boxes of the fish, the boxes ran from 150 to 200 pounds.

SPORT IN THE CEYLON MOUNTAINS.

[By D. O. Wallaby.]

Before tea became the staple industry of Ceylon, the higher mountain ranges of the country were almost uninhabited. The temperature at such altitudes is not suitable for the cultivation of paddy, and above an elevation of 3000 feet, hardly a village was to be seen. From base to summit the hills were one huge forest, patched only with game tracks made by elephants, and kept in order by the smaller animals.

Now, in place of the immense jungles, are monotonous tea estates, which stretch mile after mile along the hillsides, ugly and uninteresting to all but those who are concerned in them. But though the high country has been mostly spoiled for big game, there are still parts which have escaped the planter's axe, and, at certain season, yield rare good sport amongst jungle fowl, spur-fowl and pigeons. It is with these birds that I always associate the mountain forests, for when the "nillu" (strambilanthes) has flowered, not only do they literally swarm to feed on the sweet berries, but display a tenacity towards them that rivals that of the fly in the confectioner's window. The plant is so erratic in habit, and the harvest so soon over, that I made it a rule to be kept well posted by friends in various districts as to when the berries in their localities became ripe. A letter would arrive one day, and amid great excitement and confusion we would dash off the next, making wild excuse to get leave. These days off were great fun in more ways than one; the change of climate, the good sport and fellowship, and the spontaneity of the whole thing, each had its charm.

One day lingers in my memory more clearly than the rest. Three of us, deep in long teak chairs, were slowly melting on the verandah, wondering whether life were really worth the living. Everything seemed so empty, even to our glasses, and another round of unneeded refreshment appeared—and disappeared—and we groaned and perspired afresh. Then the boy came in with some letters—they were mostly hills—and I turned mine over gingerly, till the sight of a well known hand-writing on one caused me to drop the rest and tear it open eagerly.

An invitation, nay, an entreaty, from S. to come at once and bring two or three friends. Some large patches of nillu were ripe, and jungle-fowl plentiful. Life suddenly brightened, and in five minutes the place was ringing with contradictory orders to our scurrying boys, who flew about in all directions, while we bundled a few necessities, and a good many unnecessary, into our ant-eaten kit bags.

Next morning behind us puffing away from Colombo in high spirits, and it was late in the afternoon, while the engine was snorting laboriously up a deep valley, miles between stations, that the train suddenly stopped, and we heard S.'s hoisterous voice calling for us. Half a dozen coolies were with him to carry our luggage, and, balancing the loads on their heads, clambered up the steep sides more quickly than we could follow. Looking back, we saw our train crawling along like a great centipede far below, where the mists were already gathering in every sheltered hollow; and in another hour we were dining in a semi-temperate atmosphere. The change from steamy Colombo to the dry air of the hills was as new life to us, and our spirits rose as the thermometer fell. From the depths of morose boredom we rocketed to the heights of joyous hilarity; and S., who had not seen a white face for over a month, declared we had saved him from suicide.

Despite a late sitting that night, dawn found us wide awake the following morning. A light rain was on the grass, and we who had awakened limp the day before now rose and bustled about full of energy and keenness. The crow of a jungle-cock reached us in the still morning air, and whetted our appetites for sport. Already a gang of betel-chewing coolies had gone on to await orders for beating, and we scrambled eagerly into the trap. S.'s sturdy cob soon covered the few miles to the shooting ground, an 10 minutes' walk brought us to the chosen glade. As we took our stand the sun just topped the hill crests and started at a dew-laden world. Golden here, purple there, the mountains glowed with magic splendor, while the whole forest resounded with the melancholy cooing of the pigeons. But this was no moment for romance or melancholy, and now the drive commenced. The distant din of advancing beaters made the heart beat faster, and every nerve tingled as the sharp metallic cries of running jungle-fowl reached one's ears. Owls and pigeons soon began skimming over, and presently I saw a wily old cock run to the jungle edge, peer out, and then disappear. Then another and another pattered up indecisively, till at last one took wing with tremendous outcry, and dashed into the open, followed by three dowdy little hens. The report of my gun startled the whole neighborhood, and as the cock fell in a plutter of golden feathers there was a general rise, and the birds came out all along the line. The shooting grew fast and furious, for nillu berries are unfailing ground bait for jungle-fowl, and the place was full of them. As the heaters drew nearer hill hares came slipping out and streaked through the long grass, scattering the dew in little glittering showers. These were exhilarating moments, and though many birds broke back and many also were missed, the drive came to an end all too soon. We walked up some stretches of grass and short bush and knocked out a few spur-fowl, whose black breasts splashed with white showed up significantly as they turned over in their fall. The second drive was much

as the first. The birds ran about at the border of the jungle, their gaudy plumage gleaming amongst the dark undergrowth; then suddenly they came out like arrows.

We shot till 9 a. m., getting a nice lot of pigeons as they circled round and back to the magnetic feeding grounds, and then we drove back to a bath and breakfast. The better hours passed pleasantly enough, and at four we started out again for the drive of the day. A better place there could not be. We stood in a narrow gully, and the driven birds flew high overhead from one jungle to another, offering the most sporting and difficult shots. The light was good, the fowl plentiful, and the shooting all one could desire. So much so, that we sent the heaters round and had them over again; and though many birds passed out of shot the second time, there was still plenty of work for four guns. Knocking off, wisely, while things were still at their best, we returned in highly merry mood.

Curried jungle-fowl figured on the menu that night, and I have never tasted better. Then cheroots glowed and pegs flowed, and we voted our host the best fellow on earth. I think we also called the day's bag a record, ourselves the finest shots on the island, and the nillu plant man's greatest blessing.

OLD-TIME SHOOTING.

Some idea of what could be done in the old days may be gathered from the writings of Col. Hawker and others in the last century. The former tells us that he has seen fourteen successive double shots at partridges scored without a miss, and on another occasion fifteen "rights" and "lefts" straight off the reel. In both instances the guns used were of a smaller caliber than those employed today—the one a 14-bore and the other a 22!

Any twentieth century sportsman who could do equally well with a modern, 12-bore would have reason to be proud of his performance, but the feat would be very much less remarkable than either of those just referred to. And how many of us could emulate the prowess of a certain friend of the Colonel's, whose record for five days' shooting was sixty head of game of various kinds in an equal number of shots!

Lord Walsingham of course holds the record for the most remarkable single-handed day's shooting ever recorded in these islands. On August 23, 1872, his lordship, using two muzzle-loading guns and two breech-loaders in turn, bagged 842 grouse on Blubberhouses Moor, Yorkshire, shooting for about twelve hours. Sixteen years later, however, Lord Walsingham eclipsed his earlier performance.

Beginning to shoot soon after 5 o'clock in the morning on August 30, 1888, his lordship had killed to his own gun no fewer than 1070 grouse by 7:30 in the evening. The birds on this occasion were driven to the butts by forty beaters, and four breech-loaders—loaded with black powder—were employed.

The late Sir Frederick Milbank, one of the most skillful all round shots ever seen in this country, had 728 grouse to his own gun during a day's driving as one of a party of several guns in August, 1872.

Heavy bags of snipe and woodcock are, one hears, chiefly a thing of the past; they are at least much less common nowadays than formerly. But strangely enough it is only fifteen years ago that the biggest bag of woodcock on record for a single day was obtained.

This was at Ashford, Ireland, on Lord Ardilaun's estate, where no fewer than 205 'cock were killed on January 25, 1895. The bag for six days was 508 'cock. Lord Elcho once bagged 1250 'cock in a season at Muckcross, Ireland, 840 of these being obtained in ten days' shooting. Nothing like this has ever been done in England, the best single day's bag ever recorded being one of 105 woodcock in Swanton Wood, Norfolk, during December, 1860.

Probably the most famous shot at woodcock ever made was that which Chantrey, the sculptor, brought off, quite by accident, it is said. By great good fortune a couple of woodcock rose simultaneously and happening to cross at the moment that Chantrey pulled the trigger both were brought down by the single shot. This remarkable performance was immortalized by its hero, who carved the two woodcock in imperishable marble.

Though heavy bags of snipe have often been obtained in Great Britain—70 to 80 couple have been killed in a day before now—India will always hold the record in this branch of shooting so far as Englishmen are concerned.

Col. Peyton, who was a renowned snipe shot, frequently had his 90 couple before midday in the Indian paddy fields. There is a story of an Irishman who once bagged 212 snipe in the course of a morning shoot, but the name of this gunner has never been given and there is therefore some doubt as to the authenticity of the performance.

The best season's bag of snipe ever put together in Great Britain is stated to be 658 couple, shot by Patrick Halloran in County Clare in the season 1880-81, but Mr. Pringle's snipe shooting exploits in Louisiana, U. S. A., constitute the world's record. In the years 1874-75 that gunner bagged 6615 snipe to his own gun and three years later killed 366 birds in a single day. His total for twenty seasons was nearly 35,000 couples.—London Globe.

Drink Jackson's Napa Soda.

SHOOTING GEESE IN ALBERTA.

One of the best sporting diversions in Alberta is shooting geese in the grain fields. The birds began to show themselves about the middle of September being then on their way south for the winter. At that time the grain fields have a fascination for sportsmen such as they possess at no other time of the year, states Rod and Gun in Canada, the reason being that the geese make these fields their feeding ground while they remain in the province.

At daybreak and in the early afternoon the birds hasten to the fields picking up the grain that has fallen out during the removal of the sheaves, and it is at such times that the sportsmen get-in their fine work.

The first thing to do is to find a field in which the birds congregate in the greatest numbers. A hole is dug deep enough to conceal a shooter or shooters. The soil removed is thrown around the edge of the hole and covered with loose straw to hide all traces of the digging. This has to be done carefully as the game is wary and suspicious. The birds seem to detect the slightest change made in the appearance of the field. This being done, the decoys, generally made of sheet iron, and painted to represent geese as closely as possible, are set around in a semi-circle, twenty yards away and facing the direction from which the birds are likely to come. Sometimes the sportsmen have to undergo a long wait, though generally, if the sportsman knows what he is about, the birds are on their way from the lakes where they have rested all day by the time the cache is ready.

After entering the cache keep well hidden and refrain from bobbing up and down. The geese are keen of sight and easily frightened away. Keep quiet and presently a harsh, "honk, honk" will be heard from afar, but clear and distinct, and the hunter should crouch lower still. The sounds come nearer—click, click, go the hammers and the trusty gun is clutched more firmly. Almost immediately there is heard a swish, swish of mighty wings and the discordant cries of the birds. They have discovered the deception practiced upon them and are practically endeavoring to climb upwards out of danger.

Bang! bang! speaks out the firearm and perhaps two geese come tumbling down, and maybe three! If a "pump" or "automatic" is used, four or five shots may be fired before the birds get out of reach. Falling from a height of 40 yards the geese bound upon striking the hard ground, the impact sometimes splitting open their breasts.

For the next two hours may be the birds will continue to come. The bunches are small but fairly continuous, and the gun becomes almost too hot to be held by the naked hand. Occasionally, however, the birds all leave the water at the same time and only one chance is had at them.

It is difficult to approach grey geese in the open, as they seem to be continually on the look out. Sometimes a depression or a deep furrow makes it possible to approach them within easy gun shot. More often a quiet horse is used to stalk them, the hunter concealing himself behind the animal until within easy gun shot.

A good story is told of an Alberta rancher who is fond of hunting geese in this manner. During the summer he lent a nearby friend his gun. This friend, finding the hammer pull-off harder than he liked, filed down the locks, making them respond to the slightest touch. Upon returning the weapon to the owner, he omitted to mention what he had done. Shortly afterwards the rancher observed a flock of geese in his stubblefield. Making use of his saddle horse he approached to within easy range. Then wishing to make the animal step out of line he gave him a rap over the head with the end of his gun. The might-have-been-expected happened. The gun exploded, the geese took fright and the man was knocked down by his frightened horse in his mad rush to get away. Moral: Keep your favorite gun for your own use.

Hotel Man Fined.—Mine Host Fred Tegeler, proprietor of the Southern Hotel, Bakersfield, has again been arrested and fined for violation of the game law. One day last week he was arrested, plead guilty, and paid a fine of \$50 in Judge Marion's court.

Tegeler, who seems to be a persistent offender, was arrested upon complaint of Deputy Fish Commissioner I. A. Bordner, who, after obtaining a search warrant from Judge Marion, instituted a search for wild game at the hotel, where he found the proprietor in possession of 56 wild ducks.

Good Mallard Shooting.—One of the best bags of the season reported at Sacramento was made recently by Joe Manke, who shot the limit on mallard at the Buffalo hunting grounds. He was accompanied by Boh Callahan, Jim Patterson, H. Schaaf and Con O'Brien, and all made good bags, killing many mallard.

The total of their bag is said to be one of the best recorded this fall, and is thought remarkable, as the water has not fully come in at that region as yet.

Bear Hunting.—W. A. Levee and Tom Jefferson killed a 400-pound brown bear near Dutch Flat last Saturday. Jefferson was hunting for small game when he discovered the bear and fired a charge of huckshot into him, but could not bring him down. He hurried to the home of Levee, who took a rifle and "landed" the bear. It is thought the bear followed some stock down from the mountains.

THE CARE OF GUNS.

After cleaning the bore of your shotgun with hot water and carefully oiling it inside and out, do it again within a day or two, especially if you have been shooting shells loaded with nitro powder or half and half and smokeless powders. In the days before acid powders were used, the sportsman had confidence in the combination of sulphur, charcoal and nitre and depended upon the residue from the combustion of the ordinary black powder making a cake in the barrels of his gun and resisting oxidation.

It was a peculiar chemical action, when it is considered that nitrate of potash was the active element, but it is a well known fact that guns in which the burned powder was allowed to dry were clean and polished when brushed out with a dry swab. It is not so with modern breech-loaders, in which smokeless powder is used. The action of the nitric acid causes pitting in the steel and iron barrels and attacks the steel first. To keep a barrel free from pitting requires several washings with hot water and oiling between the washings, which may occur several days apart. This is especially necessary when a gun has been used for shooting on salt marshes or in wildfowl shooting on the bays. The salt air penetrates the inmost fibers of the Damascus or twist barrels, which are merely twisted ropes of metal forged into tubes. The salt gets into the most intricate formation of the metal and is thirsty for moisture. The chlorine is replaced by oxidizing compounds which result in what we ordinarily call rust, an oxide of iron.

There is just one sure thing which will prevent this rust, and it has been known for a century. It is the blue precipitate of mercury, commonly known as blue mass or blue ointment. Oxygen will not attack anything smeared with this metallic compound. In every old case of flintlock duelling pistols was a little box of blue ointment, and it was used internally and externally on the weapons. Every old English gun case contained in its fittings a metal box of this stuff. It is a sure preventive for rust, and don't let anybody tell you that it has an equal.

For treating weapons so that they can be handled with impunity there is another combination which might be improved by the admixture of blue precipitate, although it is good in its way. It consists of heating camphor crystals in olive oil until the oil has absorbed all the camphor gum that it can in twenty-four hours on the back of a stove or steam radiator. This combination rubbed on a gun or other steel or iron weapon, will effectively resist rust for years, although the weapon may be handled with sweating palms and fingers. The non-drying oil and gunpowder form a almost imperceptible lacquer or varnish on the bright or blued steel and effectually prevent oxidation.

A piece of cotton rope or wicking saturated with vegetable oil or mixed with a small quantity of mercuric precipitate, either red or blue, and packed in the barrel of a shotgun or rifle will insure it against rust in any climate as long as it remains in the bore. Pure olive oil saturated with gum camphor and then beaten up with mercuric ointment will protect the weapon inside and out, and it is so cheap that it is ridiculous to place any faith in advertised rust preventive. It can be put up in collapsible tubes, tin boxes or jars, and carried anywhere from tropical Africa to the Arctic regions without spoiling.

Hunting Ground Sold.—A recent sale of 1000 acres of marsh land on the Suisun was made by Edw. Dinkelspiel, Frank Maskey, Mrs. Louise Harvey and Frank Daroux. This property lies between Jacksnipe station and Joyce island and brought \$50 an acre. Although without any ponds and not cut up by sloughs it would have made one of the best shooting preserves on the marsh, the fly-way of the ducks being across one section, a bend in Suisun slough.

The land was a part of the Chamberlain tract and will be cut up into small holdings and sold to settlers. This soil is about as rich as can be seen anywhere and will raise fruit, berries or vegetables in luxuriant crops.

There is left for sale now only about 800 acres of the 5500 acre tract bought several years ago for \$120,000 and sold off for nearly three times that amount.

Duck Shooting Not Good.—Up to a week ago San Jose sportsmen were up against poor shooting conditions. "Combined shooting has depleted the ranks of the home-bred birds on the south bay marshes. Thousands have fallen and others have been driven to more secluded haunts. Were it not for the baited preserves the quackers would not linger longer in Santa Clara County.

A change in the weather will undoubtedly benefit shooting. It can hardly make it any worse. A good freeze in the north will bring the northern birds, and until that time it will be hardly worth while to visit the marshland.

Professional scullers managed to get a few birds by hard work last week. The weather was warm and the birds lay close in the marsh grass during the middle of the day. These ducks are feeding by night in the big Schilling preserves north of Milpitas. They are fed the year round on this land and have established a flight between the baited ponds and sloughs and the bay shore country. It is almost impossible to hunt them successfully at this time of the year."

RANDOM NOTES.

[By Loch Laddie.]

The age at which to start a dog in its training for a shooting dog varies considerably with size, capabilities, physical makeup and a whole lot of other things too numerous to mention. The majority state to start the dog as young as possible, especially so if it is of a precocious disposition, but we must remember that smartness in a puppy is by no means the whole thing, for many bright puppies that quickly attract the attention of an observer are sadly lacking often in the attributes that go to make up a crack shooting dog, for some of the greatest dogs living for shooting purposes show but very ordinary intelligence aside from their field work. This is the kind that has centered its abilities of intellect alone on field work, and many a bright puppy has been crowded into obedience during its young months enough to rob its future of the snap it should possess. Young dogs are quick to learn, and when we speak of young dogs we mean from six months to a year old. The reason of this is he has not seen enough to argue the question, as he has not the experience yet to know of his own capabilities to sidestep the opinions of his master. Truly enough natural retrieving and subservency to commands of his handler can be developed at an early age, but the greatest of all points—bird work—can it be developed safely at such an early age? In some puppies the reply comes promptly yes, provided that he points naturally with a snap, and finds his birds without having to resort to trailing methods. But there is his opposite kind to whom it is natural to chase a quail until his divine instinct clutches him within its grasp, as it is for a young boy to follow a circus parade. And if this dog is taught to point at an earlier age, simply by commands, he is nothing but a machine which only stops at the bird to save himself from punishment. So you have an automaton at work instead of the dog, for he has never been allowed to develop up with his natural gifts to bird work, so has certainly acquired but a small proportion of his sense, for had he been developed correctly from the first few months of chasing then drawing to a nice point, he would have mastered the intrinsic points of the game, during his hours of supposed unruliness, and it is far the safest to allow this young puppy unlimited range in his work and permit him to hunt as he wishes until showing signs of drawing on his bird in a nice, high-headed manner.

Sometimes give a young dog several months' work on quail and let him hunt them wild as he wishes, will teach him more actual bird sense than all the rules written in the ordinary manual of training. The actual yard work, obeying commands, retrieving inanimate objects, are but secondary in importance to actual work on game, and if the puppy is gifted with ambition to get out and hustle he will forget these in his excitement.

The staunchest dog of your string if often made to forego the earliest rules of his education when he comes in contact with the hen quail and her brood. We are at our wit's end to understand why it is that an old dog which is phlegmatic in disposition to the extreme and has practically forgotten what a voluntary flush is, should indulge in a chase after the hen. There appears to be some ability on the part of the hen to hypnotize the dog into forgetting the main part of his education and take a chance after her; to give the young an opportunity to seek safety.

The writer has an old bitch whose years of usefulness have about ended and I am of the opinion that a land turtle could beat her across an 80-acre field, but she still likes to work on scattered birds and as she is overcautious she rarely knows what a flush is, yet this old lady goes into a frenzy when conditions mentioned above present themselves and for a few moments almost forces the conviction in my mind that she has found the fountain which Ponce de Leon made such a vigilant search for.

It impresses me that a hen with a late brood acts differently than those with a summer brood; the hen with the summer brood flutters slowly above the weeds, not far from the dog's muzzle, offering a temptation the dog can't resist, until, finding her brood is safe, she flies back to them, or within short calling distance. The fall hen runs in the grass or weeds first, then makes a straight, low flight to the brush, the difference being the one hides the youngsters before flight and the other leads the dog away and lets the little ones seek safety for themselves. That they are adapts in hiding cannot be denied, especially the fall youngsters.

One day an old hen performed a new trick on me and that was in some wheat stubble. As soon as the dogs began to draw her on she gave a faint sound, then walked deliberately to a bare spot and squatted, making herself a conspicuous object to the dog. If scent failed him, sight would not be at fault. She remained in this position until the faint "cheeping" became inaudible, then only took flight when the dog had been on point for some time.

It is the scribe's invariable custom when blundering on these kind of bevsies to get the dogs away as soon as possible. In 12 years I have seen the dogs only catch two young birds, though I confess I fear it will happen oftener but it don't as at this period of the year I was forced every day to unwillingly blunder into eight or ten of these young covies that some belated mamma had brought into the world to accentuate the Rooseveltian idea against race suicide. Corn patches, cowpea and wheat stubble that had a cover of crab grass, or ragweed form the favorite hiding grounds for the little fellows, though

all of the July and August hatchings were full grown.

Two problems confront the quail hunter often in his first few days afield, unsteadiness of his dog to shot and disposition to mouth his birds. So often has the subject of unsteadiness been written of by many writers that it is hardly worth while to repeat it. Be careful and use judgment in permitting your youngster to catch cripples. If your dog is steady, do not permit him to seek again until you give the word of command and if you follow this advice with the youngster you have been developing through the summer while you are steadying the dog, don't be impatient yourself and try to beat him to the bird, for the spirit of competition incited by races of this kind may soon destroy the result of several months' work.

Often when birds pitch to trees their flight is very deceptive. You feel assured that you have marked them accurately, when they may have swerved aside and dropped in an opposite direction. You will take the youngster where you felt sure they were and be angry at him when he appears unable to find any signs of birds and berate him severely for it. It is always wise to work over wooded stretches carefully, rather wait and give the birds opportunity to move around again, so some faint scent will be made for the dogs, for often in brush they will bury themselves completely under the leaves and but little scent is given until the bird gets in motion.

Here is where a young dog may be unsteady, as often under such circumstances one bird flushes another. Steady the dog with your voice. Don't shout at him. You will only add to his confusion.

Dogs that mouth their birds may be cured with the force collar. Let him retrieve while the collar and lead is on and permit the spikes to rest gently on his ears, applying the punishment as he shows a disposition to crush. Do not be too severe, for retrievers are often ruined by cruel punishment, so that a method that might be a benefit may act to the contrary, when an irascible temper on the part of the handler leads him to cruelty rather than judicious punishment.

Working trials of most dogs used in field sports, and even of bloodhounds, were never more popular in England than they are at present, but the trials of fox terriers and dachshunds, which are so attractive at some of the Continental shows, have not been introduced into this country for reasons which need not be mentioned, says an English exchange. At a time, however, when the breed is beginning to boom in the United States—for several good dogs have been exported lately from this country—it is not at all surprising to hear that, always on the lookout for novelties, Americans have had trials of Dalmatians. It was at the show of the Piping Rock Kennel Club at Glen Cove, Long Island, that the tests were made. One can imagine such tests being made especially interesting, and although it is only in certain districts, notably around Lancaster and Newbury, that support might be forthcoming, trials of Dalmatian coach dogs might be included in the catalogs of shows at which horses as well as dogs are exhibited. Such tests would be a novelty in England, and they would certainly draw attention to the utility of a dog which is not fully appreciated by the majority of dog owners. The Dalmatian as a coach dog went out of fashion many years ago. In the early days he usually preceded the horses; now, where he is used at all, his proper position is accepted as being behind the heels of the horse or horses, or under the body of the carriage itself. The dog's instincts have, however, in no way changed, and as a lover of horses he is without a rival. As a guard the Dalmatian is unequalled, and Mrs. Hebe Bedwell, who has broken several of her champions to the gun, has found them steady and reliable. They possess good noses among other qualities; in condition they are good water dogs.

Henry Beach of Corcoran, an old-time market hunter, was arrested by Deputy D. H. Hoen for disregarding the limit law on ducks. He pleaded guilty and paid a \$25 fine last week.

Suisun Marsh Note.—Shooting conditions for the various gun clubs were not very good last Sunday, save on a few favored grounds. The mid-week shoot, however, was different. On Wednesday one of the highest tides of the year prevailed, a fraction over 6 feet. The result was that hundreds of small ponds and puddles were formed and there was a plenty of water wherever needed. Ducks were in evidence by thousands, every gunner out in the blinds shot the limit. Indications for tomorrow's shooting are most favorable.

The Volante, Calhoun and Joyce Island Gun Club members have had fine shooting ever since the season opened. Limits were the rule, particularly so at the Volante club last Sunday and during the week.

Sacramento Valley Duck Shooting.—The recent rain had the effect of bringing large numbers of ducks that have been staying at Honey Lake and at other lakes in Northern California and Southern Oregon, into the Sacramento valley. A large number of the birds find the Gridley hunting preserve an ideal place. They are there in thousands at present.

Striped Bass.—The saltwater anglers have, with the exception of the Napa branch of the fraternity, had indifferent luck recently at the various striped bass resorts.

Every Horse Should Be Clipped in Season

It is the wise thing to do for the clipped horse not only is easier to clean and looks better, but clipping does much to make him immune from coughs, colds and the usual ills that come to a horse from standing in a coat of long, wet hair after any hard exertion. The perspiration evaporates quickly from the clipped animal and leaves him dry. On cold days a blanket when he stands keeps him comfortable.

The Best Clipping Machine the World has ever Seen is the Stewart Ball Bearing Enclosed Gear Machine

It is the easiest turning, fastest clipping and most enduring of all machines. The materials in it are all of better quality, the workmanship is superior. All file hard cut steel gears, protected from dust and dirt and running constantly in oil. It couldn't be better for twice the money.

THE FARM

FEEDING THE FARM HORSE.

Probably the most important part in the care of the horse is the feeding. A large majority of the diseases among farm horses result from faulty feeding. So many make the mistake of not securing the best feed. Their trouble begins when partially matured, musty and dusty feed is used.

Several points should be taken into consideration when we decide upon the amount of feed; whether the animal is accustomed to dry feed, and if in good flesh or in a thin, emaciated condition.

A horse should not be fed a large quantity of hay and grain without exercise. Many think that because a horse is thin in flesh no work should be required of him. It is always best to work the flesh into the animal rather than to fatten him as you would a steer.

A good plan is to have a stated program as to time and amount of feed to be given. Horses, by all means, should be fed regularly. Hay requires time for mastication and digestion. For this reason the large percentage of the hay should be fed at night. Horses soon learn the manner of giving food and water, so it is best to have one feeder and have his plan followed out for all the horses. The horse should receive

some water the first thing in the morning. After watering the horse is fed a small amount of hay and then given grain after all the hay has been eaten. By this plan the feed which is the most difficult to digest is left in the stomach, and therefore receives proper digestion. The noon feed should be given after the horse is cooled and has been allowed to rest for fifteen minutes or half an hour. A small quantity of water may be given soon after the horse is brought to the barn. Feed hay, and when the animal is thoroughly cooled, give all the water he desires, after which feed the grain. At night feed the same as at noon, only give more hay; in fact feed as much hay at night as is given at both morning and noon meals. When a horse is working hard and is fed large quantities of grain, it is found advisable, once a week, to give a bran mash for the evening meal. The bran acts as a laxative and prevents indigestion and possibly a case of colic.

Colorado Agricultural College, Fort Collins.

HOW TO FATTEN HOGS.

G. E. McCabe, of Lyons, Kansas, is a practical and successful hog raiser. Mr. McCabe has been experimenting around a little until he has discovered that the cheapest and best way to fatten hogs as a rule, is to just turn them right into the cornfield. At the present time Mr. McCabe has in his cornfield 168 shoats. This number of shoats were raised from

26 sows, which shows a very good record, as it is a little better than six pigs each. He handles the Duroc breed.

"In feeding hogs," said Mr. McCabe, "I have figured around considerably, and find that by turning them right into the field they do best. In feeding that way, of course, I have some grown hogs and small shoats. The large hogs break down the corn and the small ones pick up all the grains that are left and scattered about. So in that way there is very little waste, unless it happens to turn very wet, and the ground become soft. Then another good feature about feeding hogs in that way is, that they are out doors in the pure air, and better off than if they were confined in small and poor quarters, where the surroundings are unhealthy.

"Then there is still another item in connection with feeding hogs by turning them right into the field that must not be lost sight of, which is the cost of husking and cribbing. The way farm help goes now, and other expenses, it costs about 6 cents per bushel to crib the corn. So that will much more than pay for the waste in allowing them to run in the field. The cost does not include the cost of handling the corn again as when it is fed to the hogs. It may seem like a backwoods plan and a poor way to fatten hogs, but when the costs are counted, I believe it will be shown to be the best."—Stock Yards Journal.

As a rule farm horses are soft in the spring and when put at the heavy spring work they perspire a great deal more than would be the case if they were kept

regularly at work during the winter months. As the hair is long the moisture is held in it and dirt. This condition has led to the practice of clipping all farm horses in some communities before putting them at the heavy spring work, and the general opinion of those who have to do with such horses, both in working them and in the maintenance of their health, seems to be in favor of the clipping.

Warranted
to give satisfaction.

GOMBAULT'S CAUSTIC BALSAM

A safe, speedy and
positive cure for

Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diptheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

Pacific Breeders Futurity Stakes No. 11

To be given by the

Pacific Coast Trotting Horse Breeders Association

For Foals of Mares Covered in 1910 to Trot and Pace at Two and Three Years Old.

Entries to close Thursday, Dec. 1, '10

\$4250 for Trotting Foals. \$1750 for Pacing Foals.

\$800 to Nominators of Dams of Winners, \$450 to Owners of Stallions.

MONEY DIVIDED AS FOLLOWS:

\$3000 for Three-Year-Old Trotters.

200 for Nominator on whose Entry is Named the Dam of Winner of Three-Year-Old Trot.

1250 for Two-Year-Old Trotters.

200 for Nominator on whose Entry is Named the Dam of Winner of Two-Year-Old Trot.

100 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot when Mare was bred.

\$1000 for Three-Year-Old Pacers.

200 for Nominator on whose Entry is Named the Dam of Winner of Three-Year-Old Pace.

750 for Two-Year-Old Pacers.

200 for Nominator on whose Entry is Named the Dam of Winner of Two-Year-Old Pace.

100 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when Mare was bred.

SIX SPECIAL CASH PRIZES FOR STALLION OWNERS.

Given to Owners of Stallions standing highest in number of Mares nominated in this Stake that were bred to their respective horses, divided as follows:

1st Prize, \$100.

2nd Prize, \$50.

3rd Prize, \$35.

4th Prize, \$25.

5th Prize, \$20.

6th Prize, \$20.

The Above Prizes will be Paid on December 24, 1910.

ENTRANCE AND PAYMENTS—\$2 to nominate mare on December 1, 1910; when name, color, description of mare and stallion bred to must be given; \$5 May 1, 1911; \$5 October 1, 1911; \$10 on Yearlings, May 1, 1912; \$10 on Two-Year-Olds, January 2, 1913; \$10 on Three-Year-Olds, January 2, 1914.

STARTING PAYMENTS—\$25 to start in the Two-Year-Old Pace; \$35 to start in the Two-Year-Old Trot; \$35 to start in the Three-Year-Old Pace; \$50 to start in the Three-Year-Old Trot. All Starting Payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Colts that start at two years old are not barred from starting again in the three-year-old divisions.

For entry blanks and further particulars, address the Secretary.

CONDITIONS:

The races for Two-Year-Olds will be mile heats, 2-in-3, and for Three-Year-Olds, 3-in-5. Distance for Two-Year-Olds, 150 yards; for Three-Year-Olds, 100 yards. If a mare proves barren or slips or has a dead foal or twins, or if either the mare or foal dies before May 1, 1912, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1910.

Entries must be accompanied by the entrance fee.

Nominators liable only for amounts paid in. Failure to make any payment forfeits all previous payments. This Association is liable for \$7,250, the amount of the guarantee, only. Hopples will be barred in trotting and pacing divisions.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

Money divided in each division of the Stake 50, 25, 15 and 10 per cent. There will be no more moneys in each division than there are starters.

Entries open to the world. Membership not required to enter; but no horse, wherever owned, will be allowed to start until the owner has become a member.

What Makes It the Greatest Remedy Known in Veterinary Practice? What Makes Its Sales Grow?

Just one indisputable reason—MERIT! Concentrated and irresistible power, with unequal absorptive properties, constitute the power and merits of "Save-the-horse." Regardless of usual or unusual complications, severity or age, which accompanies conditions that are given up and thought to be incurable, after having been treated by every known method, "Save-the-Horse" will accomplish a perfect and absolutely permanent cure, and this cure will stand the severest endurance tests, or the infallible eye of veterinarian or expert. It has no harmful or vicious features and you will obtain results without delay, relapses, blistering, fevered, severely and permanently thickened conditions or suspended use of the horse.

Is it then wonderful why we give a contract which takes all the chances out of the matter, so far as the user is concerned?

Let us send you proofs—letters which go as far and mean as much as the contract, for they tell of results that are true. They are not from friends or agents, but from actual users, and are honest in every word they say.

H. G. PUTNAM,

Dealer in

COAL AND WOOD, DRY GOODS, TIN WARE, ETC.

Danvers, Mass., Sept. 21, 1910.
Troy Chemical Co., Binghamton, N. Y.:
Dear Sirs: I am pleased to write you that about two months ago we began to notice the thoroughpin was growing less and today has entirely disappeared. "Save-the-Horse" must have the credit of making the cure. Respectfully yours,
H. G. PUTNAM.

Palenville, N. Y., Oct. 3, 1910.
Troy Chemical Co., Binghamton, N. Y.:
Dear Sirs: I enclose \$5.00 for one bottle "Save-the-Horse," express paid to Catskill.
I cured a bad case of bone spavin with your liniment on a valuable horse, so I know it is good. Very truly yours,
O. E. SAGE.

Burlington, Vt.
Troy Chemical Co., Binghamton, N. Y.:
Dear Sirs: I have a horse that has given me considerable trouble for two

years. I used your "Save-the-Horse," and he is now completely cured; am training him absolutely sound. Yours truly,
J. C. DEVLIN.

Westchester, Pa., Oct. 5, 1910.
Troy Chemical Co., Binghamton, N. Y.:
Dear Sirs: I have used your "Save-the-Horse"; it is fine.
Have you any remedy that will make hair grow on a place that was cut?
T. W. DAVIS, 129 E. Market St.,

Flemingsburg, Ky., July 18, 1910.
Troy Chemical Co., Binghamton, N. Y.:
Dear Sirs: Find enclosed \$1.00 for can of "Save-the-Horse" Ointment. Can buy the Spavin Cure at The Reynolds Pharmacy, and it sure does the work. Very truly,
NORTHCOOT LEE,
R. F. D. No. 2, Box 8.

West Pittston, Pa.
Troy Chemical Co., Binghamton, N. Y.:
Gentlemen: Enclosed herewith please find check for \$5.00 for one bottle "Save-the-Horse." I have used it successfully before on horses. Yours very truly,
A. C. BRYDEN.

Bottineau, N. D., Oct. 6, 1910.

Troy Chemical Co., Binghamton, N. Y.:
Dear Sirs: I have used your "Save-the-Horse" on a mare with a bone spavin and it has cured her. One-half of the bottle did the work. I enclose \$5.00. Please send me another bottle, which I am going to try on a mare for bad tendons or knuckling, and the guarantee as in the other bottle, and I am willing to do my duty in using it. Yours truly,
JNO. STEINMEIER.

JAMES H. McMANUS,
Expressman and Truckman,
257 West 64th St.

New York, June 30, 1910.

Troy Chemical Co., Binghamton, N. Y.:
Gentlemen: Please advise me where in the city I can secure some of your worm medicine and condition powders. Having tried your "Save-the-Horse" for splint and it proving satisfactory I would like to try your other remedies. Yours very truly,
JAMES H. McMANUS.

MAKES A TENDON LIKE A ROD OF STEEL.

\$5.00

A BOTTLE with Signed Guarantee.

FACTS ABOUT FEEDING STEERS

J. H. Skinner and W. A. Cochel have issued data concerning steer feeding tests at the Indiana station to determine the influence of age on the economy and profit from feeding calves, yearlings and two-year-olds, with results summarized as follows:

1. The initial cost per hundred of calves is greater than that of older cattle.
2. The length of time necessary for finishing steers decrease with the increased age of the cattle.
4. The proportion of roughage to concentrates consumed increases with the increased age of the cattle.
5. The amount of grain necessary in finishing cattle of equal condition decreases as their age increases.
6. The difference in total quantity of feed necessary for finishing cattle of different ages and fed to the same marketable finish is negligible.
7. The average margin required between buying and selling prices to prevent loss was \$1.60 per hundred on calves, \$1.71 on yearlings and \$1.55 on two-year-olds; the margin secured on a stationary market were \$2.02 on calves, \$2.22 on yearlings and 2.09 on two-year-olds, resulting in a profit of 42 cents per hundred on calves, 51 cents on yearlings and 54 cents on two-year-olds.
8. The increase in live weight necessary to make calves prime was 103 per cent; yearlings, 54 per cent and two-year-olds, 43.6 per cent of their initial weights at the beginning of the feeding period.
9. At a uniform price for feeds the difference in cost of gains between calves and yearlings was \$1.35; between yearlings and two-year-olds, 28 cents per hundred pounds.
10. The experienced farmer who feeds cattle should handle older cattle in preference to calves; while the farmer who produces and finishes his own cattle may find calves more profitable.

A comparison of alfalfa meal with bran is very interesting. Chemically they are practically the same. Any place bran may be employed to advantage alfalfa meal may be used just as well. Alfalfa meal is equally palatable and quite as digestible. It has just as much protein and its fattening qualities are equal. It is slightly more bulky which is often an advantage. Experiments made with milk cows have always shown alfalfa meal a better milk producer pound for pound than bran. The only real differ-

ence is in the price. The man who pays \$22 a ton for bran when he can get alfalfa meal for \$12 a ton is just losing that much money. However we would add twenty-five per cent of ground grain to complete the ration and then we would come pretty nearly to having it.

DENATURED ALCOHOL IN SOLID

FORM. Cleveland Special Dispatch. A well-known Wheeling, W. Va., chemist has succeeded in producing chunks of denatured alcohol in crystal form by means of a small infusion of certain acids whereby crystals of an alkaloidal nature very closely resembling physiologically the effects of ethyl alcohol distilled from sawdust. The method employed and the results obtained are somewhat similar to the crystallizing of rock candy or that of Saccharine containing as it does 350 times the sweetening strength over that of cane sugar, so this alkaloidal crystallized alcohol contains many times the strength over the ordinary denatured fluid alcohol; they will yield 194 proof denatured alcohol with a greater heating and cooking power for stoves than gasoline, and it is absolutely non-explosive.

A sample can containing 50 solid cubes, 1 stove and the secret formula how simple it can be made at home, will be mailed to you, postpaid, on receipt of \$5.00. Address

DEPT. A, THE WOOD WASTE DISTILLERIES CO., INC., Wheeling, W. Va., U. S. A.

SAVINGS INVESTED IN REALTY.

Put your money in residential building lots. Be sure they are in improved sections. Buy close to a big city. Purchase early; don't let others make profits out of you. The greatest fortunes were made by realty investments. We will offer 1000 choice building lots on December 1st, at prices that will pay very handsome profits. Terms of purchase, \$25.00 cash per lot, balance in thirty-six equal payments. No interest or taxes during this period. If you die before completing your payments, a deed is given your heirs, without further cost. Size of lots, 25 feet by 120 feet and upward. Price of lots, \$75.00 and upward, according to location. By investing in land you own something for your money. Investments in stocks or savings accounts are under the control of others. We guarantee you a profit of at least 25% for the first year. Subscription lists are now open. By remitting us \$10.00 per lot, subscribers get first selections. The first 500 subscribers will also receive a credit of 10% on their purchase. Act now. Let us make money for you and protect your savings.

We want agents in your locality. Write us the names and addresses of some of your neighbors. Do it now.

ABSOLUTELY CURES SPRAINS SWELLINGS REMOVES BRUISES

QUINN'S OINTMENT

Take It In Time

If you have the remedy on hand, and are ready to act promptly, you will find that there is nothing in the form of Sprains, Splints, Cuts, Bruises and Bunches which will not yield promptly and permanently to

Quinn's Ointment

It has saved thousands of good horses from the peddler's cart and the broken-down horse market. Mr. C. B. Dick, of Minneapolis, Minn., who conducts one of the largest livery stables in the Northwest, writes as follows: "I have been using Quinn's Ointment for some time and with the greatest success. I take pleasure in recommending it to my friends. No horseman should be without it in his stable. For cuts, sprains, swellings and all bunches it has no equal." Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write us for circulars, testimonials, etc. Sent free for the asking.

Every Horse Should Be Clipped in Season

It is the wise thing to do for the clipped horse not only is easier to clean and looks better, but clipping does much to make him immune from coughs, colds and the usual ills that come to a horse from standing in a coat of long, wet hair after any hard exertion. The perspiration evaporates quickly from the clipped animal and leaves him dry. On cold days a blanket when he stands keeps him comfortable.

The Best Clipping Machine the World has ever Seen is the Stewart Ball Bearing Enclosed Gear Machine

It is the easiest turning, fastest clipping and most enduring of all machines. The materials in it are all of better quality, the workmanship is superior. All file hard cut steel gears, protected from dust and dirt and running constantly in oil. It couldn't be better for twice the money.

NEXT THURSDAY, December 1st, is the last day on which mares may be nominated in Pacific Breeders' Futurity No. 11, a stake that is guaranteed to be worth \$7250. This stake, now in its tenth renewal, has given trotting and pacing bred colts owned on this coast a value many times greater than they would have attained had it not been inaugurated. From its inception this stake aroused a new interest in the breeding of trotters and pacers that has since done much to keep the industry alive, and were it to be discontinued stallion owners would experience a tremendous falling off in the patronage extended to their horses. The Breeders' Futurity is the most important stake given annually on this coast, inasmuch as there are four contests to be decided before the money is finally distributed. There are races for two-year-olds at both gaits, and the following year the colts and fillies battle for supremacy as three-year-olds. These four races keep up an interest in each stake from start to finish and the desire to win seems to grow more keen with owners from year to year. With a revival of the old district fairs, which it is now confidently believed will be brought about at the coming winter session of the California Legislature, there is certain to be a big revival in the sport of harness racing, and that will mean ten buyers in the market each year where there is now one for colts with stake engagements. Owners of mares should not forget this fact. It is well engaged colts that attract the buyer with money. We would like to see every mare that was mated with a stallion last spring with the idea of getting a fast trotter or pacer, nominated in Breeders' Futurity No. 11. There were probably six or seven hundred mares so mated, and at least three hundred will be nominated on or before next Thursday, but we would like to see this renewal break all records of the stake since its inauguration, as it would be a "vote of confidence" in the trotting horse industry that would do a vast amount of good at the present time. California for many years was second only to Kentucky as a horse breeding state and with a circuit of district fairs at which good harness racing programs are given, this state can soon be placed first among horse breeding states of the union. We have the best land, the best climate and can raise more hay and grain to the acre, and produce it more cheaply than any place on the North American continent, and there is no reason beyond our own lethargy why California should not be within a few years the greatest horse breeding country in the world. We hope those who bred mares to trotting or pacing stallions last spring will recognize the importance of keeping California to the front as a horse breeding section, and will aid the cause by making as many nominations as they can afford in Pacific Breeders' Futurity No. 11, on or before next Thursday. It only costs \$2 to nominate a mare, and the expenditure of this money is an investment that may bring large returns. The owner who sits in the grand stand and sees a colt of his own breeding win a hard fought futurity stake, experiences a thrill of pleasure that is worth more than the rich purse the performance brings him, but unless he enters his colt in the stake and keeps him eligible to the day of the race he will never experience that thrill. Get in line by sending in your nominations to Secretary Kelley, 366 Pacific Building, on or before next Thursday.

At the meeting of the Stallion Registration Association to be held at Chicago, Friday, December 2d, among the addresses to be delivered will be one by Prof. G. M. Rommel, on "Approval of Stud Books by the Department of Agriculture." Prof. Rommel is well qualified to speak on this subject which is one that greatly interests stallion owners.

HELEN STILES 2:09¼ SOLD FOR \$7000.

Capt. Burnett of Los Angeles Buys Daughter of Sidney Dillon and W. G. Durfee Will Train and Race Her Next Year.

C. A. Durfee and S. S. Stiles returned this week from Phoenix where they had raced their mare Helen Stiles 2:09¼ during the Territorial Fair. They stopped over at Los Angeles and while there sold the daughter of Sidney Dillon to Capt. Burnett, a wealthy resident of the southern metropolis for \$7000. Capt. Burnett has placed the mare in W. G. Durfee's care and that expert trainer will campaign her next year. Helen Stiles is considered by C. A. Durfee to be the greatest trotter ever seen on the Pacific Coast, and his opinion is shared by his son, W. G. Durfee. The mare was bred by Mr. S. S. Stiles, of Oakland, California and is by Sidney Dillon and out of his mare Silver Haw by Silver Bow 2:16, second dam by Hawthorne, son of Nutwood. As a three-year-old Helen Stiles was trained by Jack Phippen at Pleasanton and was started by him in the Pacific Breeders' Futurity of 1908. She was quite lame from a splint, but finished fourth in every one of the four heats of that race which were trotted in 2:15¾, 2:13¾, 2:14¼ and 2:15¾, the winner being Cleo Dillon, with the last three heats to her credit, second money going to Don Reginaldo, winner of the first heat, third money to Katalina, who was second three times, and fourth to Dr. Lecco, who was third once. Helen Stiles stood fifth in the summary at the end of the race in which there were nine starters.

It was the speed shown by Helen Stiles in the final heat of this race, in which she out-trotted Mr. Durfee's colt Dr. Lecco, that induced him to pay Mr. Stiles \$2000 for a half interest in her. She did not start again that year.

The following year, as a four-year-old the splint still bothered her and nothing much was done with her and she ran out the greater part of the time. During the winter she was taken up and when Durfee began work on her at Pleasanton early in 1910, he soon found that she was just such a trotter as he had believed her to be when he purchased an interest in her, and she was entered in all the large stakes open for trotters on the Pacific Coast. A summary of her campaign this year will show what sort of a mare she has proven to be.

San Jose, August 24, purse \$1000—Won in straight heats. Time, 2:11, 2:11, 2:10¾.

Portland, Sept. 8, purse \$10,000—Prince Lot won first two heats, Helen Stiles last three. Time, 2:12 2:10¾, 2:09¾, 2:11¾, 2:14.

Salem, Sept. 15, purse \$5000—Won in straight heats. Time, 2:09¼, 2:09¾, 2:09¼.

Walla Walla, Sept. 22, purse \$1500—Won in straight heats. Best time, 2:10.

North Yakima, Sept. 27, purse \$1000—Won in straight heats. Time, 2:12¾, 2:13, 2:11¼.

Boise, Idaho, Oct. 12, purse \$2500—Raced in mud. Helen Stiles drawn after one heat.

Phoenix, Arizona, Nov. 7, purse \$3000—Won in straight heats. Time, 2:11¾, 2:10¾, 2:09¾.

Recapitulation—Started seven times. Six times first, once unplaced. Total winnings, \$10,750.

When Mr. Durfee took Helen Stiles to Phoenix he fully believed that the great three-year-old Colorado E. 2:04¾ would be there to start in the same race with her, and failing to get the news that Mr. Estabrook had decided to take none of his horses to Phoenix he concluded to key Helen Stiles up for a hard race. Ten days or so before the meeting opened he worked Helen five heats, the fastest in 2:12 and in this heat she trotted the first eighth in 15 seconds and the last eighth in 14½ seconds. The week before the meeting he gave her another workout of heats and after three warming up heats concluded to give her a moderately fast one and then let her step the next at her best. He had Billy Welch, driving Happy Dentist, accompany him in these heats. In the fourth heat they went away pretty fast, reaching the first quarter in 30½ seconds and the half in 1:03¾ and here Mr. Durfee concluded that as Helen was going so well he would make this heat the fast one and let her have her head. She trotted the third quarter in 30½ seconds, and Billy allowed Happy Dentist to get a long way behind. Durfee called to him to come on and as he had to yell pretty loud and crane his neck, he permitted the mare to go to a break, which occurred just as she had turned into the stretch. Durfee says it was almost a standstill break, and by the time he had the mare on her feet Billy and the pacer were a long way in the lead. He got her straightened, however, and she trotted the last eighth in 14½ seconds and beat the pacer to the wire in 2:06¾. When he took Helen to her stall after this wonderful mile she was not the least distressed and as Durfee expressed it "would not blow out a candle."

Durfee junior, who had watched and timed the performance, came in the stall to look her over, and said: "Pop, she's the greatest trotter I ever saw. I believe she is faster than Sweet Marie and as fast as Hamburg Belle."

Helen Stiles was then given another heat and without apparent extra effort trotted it in 2:08 with the last eighth once more in 14½ seconds.

When she won the \$3000 Copper Stake at Phoenix the next week she trotted the last heat in 2:09¼, and finished far ahead of the second horse. In this heat, Durfee pulled her almost to a stop just before reaching the wire in order to prevent getting her out of the 2:10 class. She is one of the greatest

trotters ever bred on this coast, perfectly level-headed and dead game. We hope she will be able to beat all race records next season in the hands of that accomplished reinsman, W. G. Durfee.

STALLION WINNERS AT NEW YORK HORSE SHOW.

Trotters.

Class 3—Stallions, 4 years or over, kept for service—First prize, \$150, won by Camera, b. s., 15.3 hands, 6 years, by The Bondsman, dam Lillie McGregor, C. C. Hendricksin; second prize, \$75, Mograzia, b. s., 16 hands, 7 years, by Moko, dam Congrazia, Miss K. L. Wilks; third prize, Sir Robbins, b. s., 15.2 hands, 13 years, by Stamboul, dam Addie Lee 2d, Horatio N. Bain; highly commended Roquefort, b. s., 15.3 hands, 6 years, by Moko, dam Vinvera, James F. Hause.

Thoroughbreds.

Class 1—Stallion, 3 years old or over; to be judged by his appearance in the ring and his ability for improving the breed of horses for general use; racing performances not to be regarded—First prize, \$200, won by Masterman, ch. s., 16 hands, aged, by Hastings, dam Lady Margaret, the Canadian National Bureau of Breeding; second prize, \$100, Shotgun, b. s., 16.1¾ hands, 10 years, by Artillery, dam Princess Novetti, Major W. A. Wadsworth; third prize \$50, Advance Guard, ch. s., 16.1 hands, aged, by Great Tom, dam Nellie Van, Augustus B. Gray; highly commended, Crackenthorpe, ch. s., 16 hands, 5 years, by Woolthorpe, dam Louise, Farnhill Farm.

Hackneys.

Class 8—Challenge cup, for the best hackney stallion in the show. Open to all stallions taking first or second prizes in classes 9, 10, 11, 12 and to first and second prize winners in previous years; all first and second prize winners in these classes at this show must compete for the cup or they will forfeit the ribbons and prize money they have won in their classes. Cup value, \$250—won by Oxford, ch. s., 15.0¾ hands, aged, by Cadet, dam Portia, William White; reserve ribbon, Dand o' Burns, ch. s., 15.2 hands, 5 years, by Mathias, dam Terrington Wilful; Clarence H. Mackay. To be won twice by the same horse two years in succession before it becomes the property of the owner of the winner.

Class 9—Stallions, 4 years old or over (foaled in or before 1906), 15.1 hands and over. The winner of the challenge cup two years in succession not eligible for this class—First prize \$100, won by Land o' Burns, ch. s., 15.2 hands, 5 years, by Mathias, dam Terrington Wilful; Clarence H. Mackay; second prize, \$75, Tige; Lillie, ch. s., 15.2½ hands, 10 years, by Fashion, seventh dam Jersey Lillie; third prize, 10 years; by Ganymede, dam Maude, Florham Stud Farm; highly commended, Cudham Gentleman, br. s., 15.3 hands, 4 years, by Atwick, Jr., dam Cudham Princess, George B. Brewster.

WHERE DO THEY GO?

The mediums through which the so-called "second-hand" horses of the big cities are handled are past the ways of complete finding out. The Rider and Driver, in speaking of what becomes of this class of horses in New York, says:

"A question which is puzzling the horse trade is what becomes of the 'second-hand' carriage horses. Thousands must be annually replaced by fresher and more stylish animals, but a very small percentage are to be found on the open market. The demand is very brisk and prices are exceptionally good, but a canvass of the leading sale marts brings out the fact that comparatively few are coming in for sale.

"The cab companies are no doubt using more horses every year, and the very slight inroads which the auto has made on the cab business have nowhere nearly kept pace with the increase in population and wealth of the metropolis. But where the majority go and through what medium they reach their new owners is a mystery the trade is trying hard to solve." The same mystery prevails in every big city. That some go to the country to farmers and not a few to the 'Gyps' who manufacture pedigrees for them and try to palm them off—and often with success—as trotters on those unwary fellows who are looking for a \$500 horse for about \$85 is pretty well known, but aside from those taken care of in this way there is an enormous number to be disposed of each year through other channels than these affords."

COUNTY MAY BUY PROPERTY.

Stockton, Nov. 22.—If a clear title to the old Agricultural Association's racetrack can be obtained the county will acquire the property, consisting of sixty-five acres, and will use it for agricultural fairs such as were given in Stockton annually prior to the burning of the pavilion.

The matter came before the Board of Supervisors yesterday and by a vote of four to one, Supervisor C. L. Newton standing against the proposition, it was decided to enter into negotiations for the property. The matter was passed up to District Attorney Mc Noble for an opinion as to the validity of title. The racetrack property has been under litigation for years. Believing that the land should be conserved for public purposes, the litigants have finally agreed to sell to the county for \$8000.

The old racetrack has an interesting history and during the old days of the kite-shaped track a number of world's records were established here.

R. J. McKENZIE'S HORSES REACH PLEASANTON.

The trotters and pacers owned by Mr. R. J. McKenzie, of Winnipeg, Ontario, and trained by Havis James, reached Pleasanton last week all in good shape, and are about the classiest bunch of light harness horses ever seen at the Pleasanton track in one training stable. Mr. McKenzie, who is one of the most liberal buyers of good prospects in the country has evidently had an eye to size and good looks as well as speed and breeding when selecting these horses.

One of the most magnificent pacing stallions ever seen on the "horse centre" track is Joe Patchen 2d 4791. This is a bay horse, foaled 1905. He was sired by the famous Joe Patchen 2:01½ and his dam is the great race mare Bessie Bonehill 2:05¾ by Empire Wilkes, son of George Wilkes and a mare by Mambrino Patchen. That's good enough breeding for any horse, and in looks Joe Patchen 2d is fully up to his breeding. He is a bay horse with white markings, we should say pretty close to 16 hands, and is a rangy fellow with one of the best looking heads and finest necks imaginable. They say he did a "show me" mile in 2:10 on a half mile before Mr. McKenzie wrote his check to pay for him, and the check was made out at or about \$6000.

Merry Widow 2:0¾, bay mare by Red Pac has shown herself to be a great race mare, and took her record this year, reducing it from 2:09¼, the mark she held at the close of 1909. She won something over \$5000 this year and started in the fastest kind of company.

The calico horse March McEwen 2:08½ is a member of the string and while his color is not attractive he is a very stout made horse and looks to be in great shape after his campaign of thirteen races, twelve of which he won.

Peter Wilton, a good looking chestnut five-year-old stallion is considered a very promising horse for the slow trotting classes in 1911. He is by Peter the Great out of a mare by Wilton, and is a fine individual.

Joe McGregor 2:21¼, the chubby little son of Fergus McGregor, hasn't lost any flesh since he left California last spring, and will be raced this year. The ankle that bothered him last summer seems to be all right again and he jogs sound and all right. He will be put to work soon and if the leg stands will be a hard one to beat in his class.

Other horses in the McKenzie string are Star Brino 2:10¼, pacer, winner of twelve races, St. Thomas 2:20, trotter, that has four first moneys to his credit out of five starts, Pan Boy 2:12¼ pacer, Sister Florentine 2:14¼ by Constantine, and Duncan Direct by Direct 2:05½.

The McKenzie horses came over in charge of Geo. Sherman, second trainer for Mr. McKenzie. Havis James, head trainer, is expected to arrive from the east any day. The McKenzie horses will be one of the attractions for visitors to the Pleasanton track, and the best of them will be raced on the Grand Circuit next season.

BLOOD LINES OF CHAMPION YEARLINGS.

The first yearling to trot in standard time was Freedom 2:29¾ that was sired by Sable Wilkes 2:10, a son of Guy Wilkes that was out of Sable by The Moor. Freedom's dam was by Arthurton, a son of Hambletonian 10.

Adbell, that took a yearling record of 2:23 in 1894, was by Advertiser a son of Electioneer that was out of a mare by Geo. Wilkes. Adbell's dam was Beautiful Bells by The Moor.

Miss Stokes, the filly that was the first yearling to lower Adbell's record is by Peter the Great 2:07¼, a son of Pilot Medium that is out of Santos by Grand Sentinel. Miss Stokes dam is Tillie Thompson by Guy Wilkes, and her grandam is Eva by Sultan, son of The Moor, next dam Minnehaha, a full sister to Beautiful Bells by The Moor.

Wilbur Lou 2:19½, the new champion yearling trotting colt by Kinney Lou 2:07¾, a son of McKinney that is out of Mary Lou 2:17 by Tom Benton. Wilbur Lou's dam is Louise Carter (3) 2:24 by Chestnut Tom 2:15, a grandson of Guy Wilkes.

Of the four yearlings here named, three—Freedom, Adbell and Miss Stokes—all carry the blood of Geo. Wilkes and The Moor, while the fourth, Wilbur Lou has two crosses of Geo. Wilkes blood, although none of The Moor.

What a lesson in breeding would be taught if Wilbur Lou and Miss Stokes were mated several seasons in succession and their foals all trained. While Miss Stokes is now two years old and has a record of 2:09¼ and Wilbur Lou is but a yearling, they are the two fastest colt trotters yet produced, and their mating would be an interesting experiment in scientific breeding.

ANSWERS TO CORRESPONDENTS.

H. O. D. Phoenix, Arizona—Rosie O'Moore, chestnut mare by Sidmore took a pacing record of 2:12 at Los Angeles, July 21, 1906. No other information about her is given in the Year Book.

Louis Lorillard, who recently died at Paris, France, was a patron and devotee of the light harness horse and was a conspicuous figure on the speedway when Fleetwood Park was the fashionable headquarters of the New York Driving Club. He was a modest gentleman and never took an interest in the running turf as did his brothers, Pierre Lorillard, who established Ranocas Farm, and George L. Lorillard, who was president of Monmouth Park Association.

ADDITIONS TO CHAS. DE RYDER'S STRING.

One of the classiest looking youngsters in California is a two-year-old seal brown stud colt by Carloklin 2:07½, that Claude Jones of Modesto, former owner of Carloklin, recently sent to Chas. De Ryder at Pleasanton that he might be educated to race. The colt is a trotter and his gait is so natural that Mr. De Ryder is very sanguine that he will make a very fast colt. When Mr. Jones sent this colt to De Ryder a few days ago, he also sent two others, a four-year-old mare by Zombro 2:11 and the young stallion Carl Rea that is by Carloklin 2:07½ out of Lady Rea by Iran Alto 2:12¼. Both are trotters and will be handled by Mr. De Ryder for speed at that gait.

The Meek estate has also sent a couple of prospects to the De Ryder barn at Pleasanton. One is a very handsome young stallion, Kalitan, by Kinney Lou 2:07¾ out of Cricket 2:10. This five-year-old is a trotter. Mr. De Ryder trained him a little last year in the spring and he showed him a half in 1:06. He bears quite a resemblance to his famous sire, that has the distinction of siring the fastest yearling trotter the world has yet seen—Wilbur Lou 2:19½. The late H. W. Meek used Kalitan in the stud as a three-year and four-year-old, and while the colt only served a very few mares his get are said to be uncommonly fine looking youngsters. A three-year-old filly by Star Pointer 1:59¼ out of Crispiana 2:22¼, second dam Cricket 2:10 by Steiny is the other, and she is a pure gaited pacer.

De Ryder owns a filly by Star Pointer out of a mare by Cupid 2:18 (full brother to Sidney Dillon) next dam by McKinney, that he expects to show a high rate of speed. If there is anything in breeding to the champions this filly should be some pacer. She is by the first two-minute stallion, her dam's sire is a producer and brother to the sire of the world's fastest trotter, and her second dam is by the world's greatest 2:10 sire. This looks like a combination of speed producing and performing lines that should produce speed to a certainty.

All visitors to the Pleasanton track are pleased with De Ryder's black stallion Count Hannibal that he recently purchased from Mr. Leadbetter, of Napa. Count Hannibal has size and good looks to recommend him and De Ryder drove him a mile in 2:35 the other day so it looks as if 2:20 or better is within the stallion's reach with only ordinary work during the winter. Count Hannibal is eligible to registration and Mr. De Ryder is preparing the documents to send on to the A. T. R. that will give him a number, and put his among the registered stallions in the next volume of the Register. The Pleasanton horsemen say Count Hannibal is the very counterpart of old Director 2:17, grandsire of his dam. The Count is by McKinney out of a mare by Secretary, second dam by Alcona 730 (an unbeaten horse in the show ring), third dam Fontana, the dam of Silas Skinner 2:17, by Almont 33, fourth dam by Abdallah 15, etc. Count Hannibal has never had any opportunities in the stud, but he should make a great stock horse.

WILBUR LOU'S NAME.

When Mr. F. H. Holloway sent the papers to Chicago to have the yearling son of Kinney Lou 2:07¾ and Louise Carter 2:24 registered he sent the name of Wilbur Lou which had been selected by Mr. W. F. Whittier, owner of the colt as a most appropriate name for the youngster. The surname Lou not only represented the maternal family name of the sire whose dam was Mary Lou 2:17, but it also was part of the given name of Wilbur Lou's dam, and was deemed a most appropriate one for the colt. When the registration papers reached the Hemet Stock Farm however, the name had been spelled Wilbur Lew on the certificate and consequently the colt started at Phoenix under that spelling of the name. Mr. Whittier is making an effort, however to have the name restored to the original spelling and the American Trotting Register Association has been requested to print the colt's name as Wilbur Lou in the Year Book to be issued within a few months and also in the next volume of the Register; a request that will doubtless be granted.

From the time the colt was put in training he was always known as Wilbur Lou and his name was given that spelling in all the newspaper reports of his doings, and we notice that all the Eastern turf journals, in reporting his world's record breaking performance at Phoenix week before last have spelled the name Wilbur Lou, the same name by which the colt has been known by the readers of the Breeder and Sportsman. It is to be sincerely hoped that the Year Book of 1910 and the next volume of the Register will have it Wilbur Lou 2:19½, world's champion yearling colt trotter.

FASTEST MILE TROTTED IN CALIFORNIA.

Vacaville, Nov. 19, 1910.

Breeder and Sportsman—In your last issue I noticed the statement of "C. C. C." crediting the trotter Azote, with a mile in 2:07 as being the fastest mile ever trotted in California. I wish to say that I witnessed a mile by Alix in 2:05½ on the Los Angeles track on December 26, 1894.

Yours truly,

C. J. UHL.

SUTHERLAND & CHADBOURNE'S STRING.

Fred Chadbourne, of the firm of Sutherland & Chadbourne, Pleasanton, has received from Mr. W. E. Meek, of Hayward, three horses to train which are pretty fair prospects. Last Saturday Chadbourne was working one of them, a brown pacer, and the natural speed shown by the gelding was the subject of considerable comment and caused the strangers at the track to ask the usual questions a trainer has to answer when he brings a horse on the track that shows well. This horse is a good sized pacer with a free open gait and he was driven without any weights, boots, bopples or other speed or gait controllers. During the morning Fred worked him a mile in 2:19 and the horse did not turn a hair or appear to be making any extra effort.

While the pacer looked good to the bystanders Chadbourne thinks more of a brown trotter, also owned by Mr. Meek that has been a mile in 2:18. This fellow is nine years old and has been used on the road. He is good headed and acts like a race horse that several heats would not bother even though they were all up to his speed limit. He is by Welcome 2:10¼ out of a mare by Antevolo. A mile in 2:18 with little or no track work makes this horse a good prospect. The other of the Meek horses is a stallion by Mendocino out of a mare by Nutwood Wilkes. He is a trotter and has shown a mile in 2:21¼.

Chadbourne is giving a little early education to a two-year-old colt by C. The Limit 2:06¼, dam Ruth C. by Guide 2:16, that is owned by Mr. C. McNally of Livermore, and is very promising.

A yearling filly by Palite, dam by Capt. McKinney, owned by E. S. Servis of Durham and a yearling pacer by The Limit out of Rosie Woodburn, owned by C. L. Crellin, make up all the horses Mr. Chadbourne has in his speed school that belong to outside parties. His stallion Moorrix 2:07¼ is looking well and will be out again next season if there are any classes for him. Chadbourne expects a number of horses soon, among them the great pacer Aerolite, owned by Mr. Gifford of Boise, Idaho.

WILL MATE TWO CHAMPIONS.

The most notable piece of news in the eastern harness horse world last week was the making public of the fact that George C. Moore, owner of Dromore Farm, St. Clair, Mich., home of the world's champion two-year-old trotting colt, Justice Brooke 2:09½, has purchased Native Belle, holder of the world's record of 2:07¾ for two-year-old trotters and of the world's record of 2:06½ for three-year-old trotting fillies. Mr. Moore bought the famous daughter of Moko expressly for use in the breeding ranks and in the spring and mate her with Justice Brooke (2) 2:09¼, the mating being the first in the history of the trotting horse when a mare and stallion have been mated each of which had a record below 2:10 as a two-year-old. The mating will not only be a striking example of combining developed lines of blood, but it will also be a doubling up of certain blood lines in an unusual degree, for both the sire of Justice Brooke and the sire of Native Belle are bred in Wilkes-Strathmore lines and there will also be three other Wilkes crosses in the product of the union, two to Alcantara, through Justice Brooke and one to Red Wilkes through Native Belle. The price which Mr. Moore paid for Native Belle has not been made public, but it is said to be the largest that has been paid in many years for a mare to be used strictly for breeding purposes.

HIS MAJESTY THE HORSE.

Enthroned in the show ring of Madison Square Garden, his majesty, the horse, again holds his annual court and receives the tributes of social leaders and his admirers generally.

Prophets who have foretold the passing of this noble beast because of the growing popularity of the automobile will have difficulty in reconciling their prophecies with the magnificent list of entries shown, particularly in the trotting and heavy-harness classes. These classes, the types most affected by the automobile's popularity, actually show larger and better fields than in other years, while the exhibits from Europe easily outrank those shown at earlier exhibitions.

The automobile is with us to stay; it has become a necessity instead of a luxury, and its use will expand, but it cannot entirely fill the place of man's useful and affectionate friend—the horse.—New York Herald.

THE FAST PACING MARES.

When Lady Maud C. paced to a record of 2:00¼ at Phoenix, Arizona, last week she became the fastest out-in-the-open pacing mare. Dariel with her record of 2:00¼ behind a front runner holds the best record for her sex. The other fast pacing mares, those which have paced in 2:04 or better are:

The Broncho 2:00¾, Citation 2:01¾, Ecstatic 2:01¾, Darkey Hal 2:02¼, Aileen Wilson 2:02½, Mona Wilkes 2:03¼, Cheery Lass 2:03¾, Fanny Dillard 2:03¾, Hal Raven 2:03¾, Maud Keswick 2:03¾.

The events of this year again go to prove that the mares which pace are not as fast as the stallions which take to the side-wheeling way of going. Five stallions are in the list of two-minute pacers but not one mare.

A GREAT COLT YEAR.

While due credit must be given to the aged trotters that established new world's records in 1910, the colt trotters were even more prominent in making the season just closed a sensationally successful one in harness horse history.

Uhlán, the fast unsexed son of Bingen 2:06¼, cut the world's record for a mile in the open to 1:58¾, and set the figures for trotting geldings to wagon at 2:01. The handsome and speedy The Harvester by Walnut Hall 2:08¾, dethroned Cresceus as the champion trotting stallion with a mile in 2:01, and followed this up by reducing the ex-champion's two mile record to 4:16¾. Many race and technical records were also shattered by the aged trotters the past season.

But the showing made by the colt trotters in 1910 was a truly remarkable one and surpassed the most optimistic prediction of enthusiastic trotting fans. The yearling and two-year-old stallion records as well as the three and four-year-old records for all sexes, were shattered by the sensationally precocious youngsters of 1910.

The world's record for yearling trotters was set at 2:23 in 1894 by Adbell son of Advertiser 2:15, and stood the test for sixteen years or until 1909, when the Kentucky-bred filly Miss Stokes, a daughter of the famous Peter the Great 2:07¼, trotted a mile in 2:19¾.

On November 11th, at the Phoenix, Ariz., meeting, the yearling colt Wilbur Lou, after having equalled Adbell's record of 2:23 earlier in the week, trotted a mile in 2:19¾, a new mark for yearling trotting stallions. He is a son of Budd Doble's good stallion Kinney Lou 2:07¾, his dam being Louise Carter (3) 2:24 by Chestnut Tom 2:15 (son of Nutwood Wilkes 2:16½), with the next dam the great brood mare Ingar (dam of John A. McKerron 2:04½).

No less than six other trotting yearlings have taken standard records in 1910, as follows: Princess Todd 2:24¼ by Todd 2:14¼; Benear 2:27¾ by Bingara, son of Bingen 2:06¼; McKinney Mac 2:27¾ by McKinney 2:11¼; The Baronet 2:28¾ by Kentucky Todd (3) 2:08¾; Dandy G. 2:29¼ by Axworthy (3) 2:15½ and K. L. Todd 2:29¾ by Kentucky Todd (3) 2:08¾.

The record of 2:10¾ for two-year-old trotting stallions, credited Arion back in 1891, was not equalled until just twenty years after it was made. The Michigan owned colt Justice Brooke by Baronale 2:11¾, won the first heat of the two-year-old division of the Kentucky Futurity in 2:11½, and then came back the record heat with a mile in 2:09½, not only reducing Arion's world's record for stallions of his age, but also setting a new two-heat race record for two-year-old stallions. Miss Stokes, holder of the champion yearling title of 2:19¾ made in 1909, cut this to 2:09¼ this season in her two-year-old form, and while this is not as fast as Native Belle's (2) 2:07¾, it must be set down as a great performance.

The three-year-old trotters of 1910 were certainly a brilliant aggregation, by far the greatest ever seen. When Gen. Watts set the record for three-year-olds at 2:06¾ in 1907, the trotting world stood aghast and it was freely predicted that it could not be expected that his like should be seen again for years to come. And now comes the Kentucky-bred, Colorado-owned colt Colorado E. by the Bondsman, dam Flossie McGregor by Jay McGregor 2:07¾, winning a number of races that not many aged trotters of the year could duplicate, and placing a fitting climax to his brilliant campaign by setting the world's record for three-year-olds at 2:04¾, and in a race. His only defeat was administered by the Cleveland filly Grace, a daughter of Peter the Great 2:07¼, that won the rich Kentucky Futurity and with it a record of 2:08 in the third heat of a thrilling five-heat contest. Native Belle not content with the world's two-year-old trotting championship, set new figures for three-year-old fillies with a mile in 2:06¾.

Other three-year-old trotters to enter the select 2:10 list in 1910 are: Lou Billings (3) 2:08¾ by John A. McKerron 2:04½ and the oldest daughter of the world's champion Lou Dillon 1:58¾; Emily Ellen (3) 2:09¼ by Todd 2:14¾, and J. Malcolm Forbes (3) 2:09¼ by Bingen 2:06¼.

The Cleveland four-year-old filly Joan proved herself the star trotter of 1910, meeting and defeating the best aged campaigners of the year and annexing first money in such rich stakes as the \$10,000 Hoster-Columbus, \$5,000 Ohio, \$5,000 Transylvania and \$2,000 Walnut Hall. Showing improved form every week she wound up the season with a world's record of 2:04¾ for four-year-olds, and in the same race established a new three-heat race record for trotters of her age, with miles in 2:05½, 2:05¾, 2:04¾. Joan is by Directum Spier (4) 2:11¾, the latter being a son of the ex-champion four-year-old trotter Directum, 2:05¼ whose record stood for eighteen years, until displaced by his grand-daughter Joan, thus making three straight generations of four-year-old trotters. Joan's dam is Sarah W. 2:18¾ pacing, by Hal Braden 2:07¾.

A number of other very high class four-year-old trotters were campaigned in 1910. Billy Burk (4) 2:06¾ by Silent Brook 2:16½, won some excellent races, including the \$3,000 United Railway purse at Kalamazoo and the \$10,000 Empire State stake at Syracuse. Other 2:10 four-year-old trotters that merit mention are as follows:

Soprano 2:07¾ by Bellini 2:13¾; The Plunger 2:07¾ by The Bondsman, sold for export to Austria; Silver Silk 2:08¾ by Moko; Dr. Treg 2:08¾

by Tregantle 2:09¼; Capt. George 2:09¼ by Admiral Dewey 2:04¾; Vito 2:09½ by Prodigal 2:16 another 2:10 stallion that goes to Europe, and Gold Dollar 2:09½ by Pulsus 2:09½.

The phenomenal showing made by the colt trotters of 1910 is conclusive evidence and a glowing tribute to the remarkable progress made in breeding and training methods. It convinces us that the "trotting-bred" trotter whose pedigree shows five or six or more trotting crosses on sire's and dam's side, is destined to give us not only extreme speed but the uniform stamina and racing manners that his rich trotting inheritance assures.

Our breeders are rapidly learning the necessity of the blending of proper blood lines, as well as individual qualities, in order to make the success of their breeding investments more of an assured-in-advance fact than a gambler's-chance venture.

Another prominent factor in the remarkable progress made in speed development of recent years, is the advancement in point of intellectuality, and merit of our trainers combined with the modern training methods.—American Sportsman.

SIRE OF WILBUR LOU'S DAM.

Chestnut Tom, sire of the dam of Wilbur Lou 2:19½, champion yearling, is an inbred horse, as his sire and dam were both out of the same mare—Lida W. 2:18¾ by Nutwood. Chestnut Tom, when foaled, was the apple of the late Martin Carter's eye, and he named him T. C. in honor of his deceased brother Thomas Carter. He had T. C. trained as a colt and he showed considerable speed. Taking a record of 2:30 trotting, as a three-year-old, Mr. Carter afterwards sold him to Geo. T. Algeo, of Oakland, Cal., who still owns him. Mr. Algeo had the horse registered as Chestnut Tom, and gave him a record of 2:17¼ at Salinas in 1906 in a race which he won in straight heats. On June 24th, 1908, Mr. Algeo started Chestnut Tom in the free-for-all trotting race, dash of one mile, at the Butcher's Day races at Emeryville, for a purse of \$75. He won the race in 2:15, and while the race was not reported in the Year Book, there is no question but Chestnut Tom trotted the race in that time and it has been a bar against him being entered in slower classes ever since. The track was deep and heavy that day and on a good track he would have been capable of a mile in 2:12 or better.

Chestnut Tom's daughter Louise Carter is the only one of his get that ever started in a race and took her record as a three-year-old, and Wilbur Lou (1) 2:19½ is the only colt out of a Chestnut Tom mare that ever started.

STATE VETERINARIAN'S REPORT.

Dr. Charles Keane, State Veterinarian of California, has filed his biennial report with Governor Gillett. On June 1, according to the report, there were in the State 420,000 horses, having an aggregate value of \$44,000,000 and 83,000 mules, having an aggregate value of \$10,126,000. The sheep numbered 2,372,000, milch cows 452,000, other cattle 1,120,000 and hogs 540,000, bringing the total number of live stock up to 4,987,000, having an aggregate value of \$106,350,400.

Dr. Keane points out that by virtue of the laws enacted at the last session of the Legislature the department has been able to extend its sphere of usefulness to the live stock industry. The act requiring all veterinarians to report immediately outbreaks of infectious diseases has enabled the department to uncover diseases that otherwise would not have come under observation.

In two years 463 inspections, involving 29,519 head of cattle, were made for movements of cattle from the quarantine area to points outside but in this State. Eight hundred and two horses were destroyed on account of having glanders. Because of the new law, making reports of all cases compulsory, the disease has been brought well under control.

WORLD'S RECORDS.

The fastest records—both pacing and trotting—held by stallions, geldings and mares are as follows:

Trotting in races:

The Harvester, br. h. by Walnut Hall 1910....2:02
Uhlán, blk. g. by Bingen, 1909.....2:03½
Hamburg Belle, h. m. by Axworthy 1909.....2:01¼

Pacing in races:

Minor Heir, br. h. by Heir at Law 1910.....1:59
Prince Alert, h. g. by Crown Prince 1901.....2:00¾
Bolivar, b. g. by Wayland W. 1906.....2:00¾
Citation, br. m. by Norvalson 1908.....2:01¾
Ecstatic, b. m. by Oratorio 1906.....2:01¾

Trotting against time:

The Harvester, br. h. by Walnut Hall 1910....2:01
Uhlán, blk. g. by Bingen 1910.....1:58¾
Lou Dillon, ch. m. by Sidney Dillon 1903.....1:58½

Pacing against time:

Dan Patch, br. h. by Joe Patchen 1905.....1:55¼
Prince Alert b. g. by Crown Prince 1903.....1:59½
Dariel, b. m. by Alexander 1903.....2:00¼

Trotters have been brought this fall for export to Austria, Russia, Italy, Denmark, South Africa and Australia. All indications point to a long period of high value for trotters bred right and which can demonstrate the value of their inheritance. The man who likes the trotters and who has an aptitude for giving the young trotter his first lesson in speed work can breed the horse of his choice now with a greater certainty of realizing a profit than at any previous time in the history of trotting horse breeding.

JOE PATCHEN 2D ONCE DEFEATED HAL B. JR.

The horse most talked about at Pleasanton is Joe Patchen 2d in R. J. McKenzie's string. An Eastern turf writer tells the following of his history:

Joe Patchen 2d is by Joe Patchen 2:01¼, and out of Bessie Bonehill 2:05¾, owned at one time by D.A. Sprague, of South Charleston, Ohio. He is an eastern bred pacer and when a three-year-old was secured of H. S. Osborne, Pittsfield, Mass., by Mr. Hodgson of Orilla, Ontario, for \$1,000. At that time he was quite a large, loosely built and big gaited colt, with no particular preference as to his method of locomotion being quite an adept at either the trot or the pace. Nothing much was done with him the balance of that year, except to give him the best of care so as to make him strong and naturally aid in his physical development. In 1909 he was placed in charge of Jim Powell a careful and capable trainer of that section and while making a limited stud season, was educated lightly along speed lines.

Last fall he was given a preparation for the winter ice events and before making his first start in February of this year at Ottawa he stepped a full mile in 2:14¼ on Orilla Bay, which was indicative of the fact, that he was possessed of extraordinary speed. His career at the meets, attracted attention from all sections and well it should, as he showed his ability to beat all the cracks, as fast as he could get to them.

Among the green ones that he defeated was Hal B. Jr. 2:10¼ and since we know that the latter closed his season's campaign through this country without losing a single one of his ten races we must necessarily have a great regard for Joe Patchen 2d. The son of Hal B. 2:04½ is unquestionably one of the slickest pieces of horse flesh today eligible to his class, and there is no doubt in our minds that a mile in 2:05 would not have fully taxed his speed capacity.

In his seven heat race at Akron, Ohio, he proved himself a race horse of the first water and but for an accident in the third heat the contest would have ended at its conclusion. Among the contestants on that occasion was Major Brino 2:05¼, whom all will agree was up to miles right close to 2:03 yet the little stallion had it on him at all points of the game and on several occasions out brushed him in the stretches with the ease of Minor Heir or George Gano.

Now when any young pacer during his first season out can successfully beat his fields with never failing regularity be it in the 2:25 classes or the free-for-alls made up of racing veterans of ability, he is "some horse," consequently one capable of "hanging it" on him must be out of the ordinary. We have seen Jimmy Easson, "ease" Hal B. Jr. around a sharp turn and over to the first eighth in 14½ seconds and bring him the last quarter in 30¾ without making a move with the whip consequently we have reasons to be a little enthusiastic over his speed.

Now then, if Joe Patchen 2d can—as parties claim who have seen both young stallions perform—do everything that Hal B. Jr. is capable of doing, and then some," we may expect to see an extreme speed merchant when the Canadians bring this fellow down.

Mr. Hodgson, the former owner, states, that in his opinion, providing Joe Patchen 2d meets with no accident, and is fit when turned for the word, "that there is no horse living that will beat him in a race." He is a large powerfully made, free legged wiggler, and of a determined type, and it is to be hoped that he will come to his engagements in condition to race for a ransom, for we feel that in his day and age, there will be numerous other sidewheelers spring up in the meantime, capable of giving him an argument. A good hot contest drives dull care away and is what we desire.

Guss Macey added another good one to his stable during the past week when he purchased for his employer George H. Estabrook, the three-year-old pacing filly Countess Marie 2:14¼, from Frank Caine, of Knoxville, Ill., says the Stock Farm. The price paid for this clever little pacing mare whose work during the season just ended was high class in every respect was not given out, but it is understood that he paid \$2,500 for her. Countess Marie is a three-year-old black filly by The Earl 2:14¼, dam Marie Moody by Moody 2:18½; next dam Lady Peck by Hambletonian Prince \$19; next dam Lady Rathbone by thoroughbred Revenue. She was bred by the Eastman Brothers, of Augusta, Ill., and was trained and driven by Frank Caine. Mr. Caine did not have to push her to the limit of her capacities and although she won a race at the Wisconsin State Fair at Milwaukee in September and took her record of 2:14¼, those who saw this performance are of the opinion that she could have paced in 2:10. Some declared themselves as believing her capable of beating 2:10 away off.

Empire Queen 2:08¾, one of the new 2:10 trotters of 1910, is an inbred Electioneer, but has one cross of Wilkes blood. Her sire is Empire Expedition, he by Expedition 2:15¾, son of Electioneer, and her dam is Candida, by Candidate 2:26½, son of Electioneer. She gets her Wilkes blood through Puss, the dam of her sire, she being a daughter of Red Wilkes.

The New York Rider and Driver publishes this bulletin: "The Wells Fargo Express Co., after giving up all its horses, substituted automobiles. At the time, it was another harbinger of the 'horseless age.' Now the Wells Fargo Express Co. has given up its automobiles and returned to the use of horses. Is the company, in the language of the day, retrogressive?"

NOTES AND NEWS

Pacific Breeders' Futurity No. 11 will close for nominations of mares December 1st.

The Director General, sire of Mainsheet 2:05, etc., brought \$1100 at the Old Glory sale this week.

The Old Glory Sale opened last Monday and we expect to receive a full report of the same in time for next week's issue.

The team record for Colorado is 2:24½, made November 12th, 1910, by Rheata and Lillian Axworthy, driven by Frank S. Byers.

Helen Stiles 2:09¼ has been sold by Stiles and Durfee to Capt. Burnett, of Los Angeles, for \$7000. Will Durfee will train her.

Having won both the trotting and pacing divisions of the Copper Stake at Phoenix, C. A. Durfee is now known in that country as the copper king.

Don't fail to nominate your mare in Pacific Breeders' Futurity No. 11, if she was bred to a trotting or pacing stallion this year. Nominations will close December 1st.

W. J. Kenney, 531 Valencia street, has a number of second hand carts for sale at very low prices. These carts have all been put in good order and will be sold "worth the money."

The Alameda Driving Club could not hold its matinee Thanksgiving Day owing to rain and a muddy track. With good weather the races will come off tomorrow (Sunday), however, beginning at 10:30 a. m.

The Durfee horses did not go to San Jose for the Thanksgiving exhibition. Copá de Oro 1:59 had a slight attack of shipping fever on the trip from Phoenix to Los Angeles, consequently it was thought unwise to make the San Jose trip.

If you are interested in the breeding of trotting or pacing horses you should make as many nominations as you can afford in Pacific Breeders' Futurity No. 11, which closes December 1st, and get your friends to make nominations also.

With an even dozen two and three-year-old performers to his credit at eight years of age Bon Voyage stands high among the young sires of America, especially as he has one 2:10 performer and two three-year-old trotters with records below 2:12.

John C. Henry, a mulatto, 38 years of age, who resided in Butte county and owned the stallion Dick Russell 2:22½ by Diablo 2:09¼, fell from his seat on a cart to which he was driving a colt last week and was instantly killed, his neck being broken.

N. A. Richardson, administrator of the estate of Ben Davies of San Bernardino, has asked the court for permission to sell Zolock 2:05¼ and other horses owned by the estate. As soon as the permission is granted Mr. Richardson will advertise a list of the horses to be offered.

Dan McKinney, Joe Maguire's son of Kinney Lou 2:07¾ out of Queen C. 2:28½ by Nutwood Wilkes is said to be one of the best prospects for the slow classes there is in training. All the California horsemen who saw him race up north this year predict great things for him in 1911.

The movement to revive county fairs in California is making good headway. Meetings have been held in several places recently at which the subject has been discussed and seems to meet with the approval of citizens generally. There is every prospect of the incoming legislature passing a bill that will restore these fairs.

Several breeders in California have expressed the hope that Mr. R. J. McKenzie, of Winnipeg, whose string of horses are now at Pleasanton where they are to be trained until spring by Havis James, might permit his stallion Peter Wilton to serve a few mares before being taken east again. Peter Wilton as his name suggests is by Peter the Great 2:07¾, dam by Wilton, and is a fine individual as well as being a fast trotter and royally bred.

C. A. Durfee, who recently returned from Phoenix, where he and his son, W. G., won nearly all the purses with their horses, says that Wilbur Lou, W. F. Whittier's colt that lowered the world's colt record to 2:19½ during the meeting, is the grandest little trotter he ever saw. He is not a large colt and does not have that mature look which most precocious youngsters have, but can fairly fly at the trot and has a head like a veteran. Mr. Durfee is confident that the colt could have beaten 2:19½ two or three seconds had he been given another opportunity a few days later. He was improving in speed and ability to carry; it every time he was brought out, and he thinks 2:16½ or 2:17 would have been within his reach if given another trial.

Every person that visits the Pleasanton Training Park these days is enthusiastic over the little yearling pacer by Bonnie Searchlight that H. Busing is training. Busing has a hard time trying to keep the youngster back, and when another horse comes alongside the little fellow fights for his head and wants to race. If no accident befalls this colt he will be heard from in the stakes.

Nutwood Wilkes 2:16½ is now being recognized as one of the great speed progenitors of the country. When he was in California he was not largely patronized by breeders, the vast majority of his get being from Mr. Martin Carter's own mares. There are many stallions standing for service now in this State that are looked upon with little favor, but whose services will be eagerly sought after when they have been sold out of the State.

At the present price of disinfectants there is no excuse for offensive odors in any stall or stable where an animal of the horse kind is kept. Odors from the floors saturated in urine or moisture from fresh manure are not only offensive but are detrimental to the health of animals. A weak solution of sulpho naphthol applied to the floors of the stalls once or twice a week by means of a watering pot with a perforated muzzle attached will prevent unpleasant odors and promote the health of the animals.

One of the "trottingest" things at Pleasanton is a yearling filly by San Francisco 2:07¾ out of Birdie by Jay Bird that William Brown has been breaking for Thos. Ronan. This little miss is deer-like in conformation and has a marvelous lot of speed for one of her size and age. She had the misfortune to lose an eye from an injury which mars her beauty greatly, otherwise she would be one of the handsomest yearlings at the track. Unfortunately her owner allowed her to drop out of Pacific Breeders' Futurity No. 9 to which she was originally eligible.

The reason Sir John S. 2:04¼ was not taken to Phoenix where he was entered was on account of the serious illness and death of a nephew of Mr. W. L. Vance, owner of the stallion, which occurred on Sunday, November 13th, at Marysville. Sir John S. was in fine fettle and Mr. Vance had given him four fast miles in from 2:05 to 2:05¼. When it is recalled that the son of Diablo had been but five miles faster than 2:20 before he drove Mona Wilkes out in 2:03¼ at Santa Rosa, it is reasonable to expect he would have done some fast pacing if taken to Phoenix.

It is said that Wilbur Lou could have trotted his record mile at Phoenix a half mile faster and thus lowered the record for all sexes had it been known he was capable of trotting such a good mile. He was at the half mile pole in 1:08¼ and was taken back a little as it was thought the pace was too fast. From the manner in which he finished the mile, however, Mr. Holloway, his trainer and driver, is now confident that he made a mistake in slowing him up during the third quarter. He and Mr. Whittier, the colt's owner, are satisfied with the record he made, however, which is three and one-half seconds faster than was ever trotted before by a yearling colt. Wilbur Lou goes into winter quarters perfectly sound in every way, and will make a great two-year-old barring accidents. He is said to be one of the best headed yearlings ever hitched to a sulky and trotted all his heats without a mistake of any kind, acting like a mature and sedate race horse. His head is very much like that of his sire, who is one of the most intelligent of horses.

From the Trotter and Pacer of Nov. 17th: "Last Saturday's football game between the college teams from Yale and Princeton was won by Reed Kilpatrick, a member of the former team, who made the touchdown in the second half which gave Yale high score. Young Kilpatrick, who is a magnificent young athlete, standing five feet and eleven inches tall and weighing 190 pounds, is a son of Mr. Frank J. Kilpatrick, of New York, and San Francisco, and well known in both cities as an ardent lover of the harness horse and a master reinsman. Mr. Kilpatrick pere is a man of high ideals in sport with the courage and determination to proclaim and defend them on all occasions, and it is easy to see where the son gets the stuff that has made him the stalwart fighter and popular hero on the gridiron that he is. Mr. Kilpatrick will contribute an article to the coming Christmas number of The Trotter and Pacer upon the subject of "Needed Reforms in Trotting." He will treat the topic with his usual keen discernment and vigor, and it will offer something for racing managers to think about."

HEMET DRIVING CLUB GIVES BANQUET.

Hemet, November 20.—A banquet was given last night by the Driving Club in honor of the performance of the yearling stallion, Wilbur Lou 2:19½, at Phoenix, November 11. A world's record of sixteen years' standing broken by 3½ seconds was sufficient to bring the greatest horsemen of the west to Hemet to help celebrate.

The banquet was held at Hotel Hemet. Speeches were made by W. F. Whittier of San Francisco, owner of Wilbur Lou; Mr. W. G. Durfee of Arcadia; F. D. Meyers, Frank Miller of Riverside and Frank Holloway. Ed. Dolland was toastmaster. It was announced that Wilbur Lou will trot an exhibition mile at the Hemet Driving Club matinee New Year's Day.

THE BONDSMAN COMES TO CALIFORNIA.

Capt. C. B. McCan of Hood River, Oregon, Buys the Sire of Colorado E. (3) 2:04¼ and Dick Wilson Will Stand Him at Pleasanton.

The following telegram, received by the Breeder and Sportsman Friday morning, is good news for the trotting horse breeders of California:

"New York, Nov. 24, 1910.

"The Breeder and Sportsman, San Francisco: I heartily congratulate the horsemen of the Pacific Coast, for on the recommendation of my sincere friend Dick Wilson, the famous Indiana trainer, I bought The Bondsman at the Old Glory sale. Mr. Wilson will be his manager and in the future train his colts. The Bondsman will make his first season at Pleasanton, California.

"CAPT. C. B. McCAN."

The Bondsman is sire of the world's champion three-year-old, Colorado E. 2:04¼, and is by Baron Wilkes 2:18, dam Sorrento, dam of Jay Hawker 2:14¼, Sorrento Todd (4) 2:14¼, Belle Sentinel 2:15, Eola 2:19¼, Lazy Bird 2:26¼, Teddy Sentinel 2:29¼ and The Tramp, a successful young sire. The Bondsman is the sire of ten new standard performers for 1910, all but one taking its record in an actual race. The last Chicago Horse Review said of The Bondsman:

"It is the hall-mark of the get of their sire that THEY RACE. Colorado E. won seven out of eight races, and should have retired unbeaten, as his sole defeat cannot be attributed to any inferiority upon his part. The Plunger won eight out of nine races, and the only one in which he was beaten was a courtesy affair, gotten up for the purpose of allowing J. Malcolm Forbes to take a race record of 2:10 or better. On this occasion The Plunger prompted Forbes two heats in 2:09¼ and 2:10¼ with the greatest ease. As an example of what the get of The Bondsman were at the same time doing on the minor tracks, the season's work of The Algerian will serve. He was raced on the West Tennessee Circuit and in Mississippi, where he won nine out of eleven races and was second in the other two.

"With the addition of his ten new ones for 1910, The Bondsman has a total to date of thirty-four standard performers. Of these all but one are trotters, showing how impressive as an action-controlling sire he is. Previous to the constellation of luminaries by him that flashed up in the trotting firmament this year he was best known as the sire of Grace Bond, one of the most sensational colt trotters of the past, the winner of the Kentucky Futurity both as a two and three-year-old, taking a record of 2:14¼ at the former age and 2:09¼ at the latter.

"The Bondsman is now only fourteen years old. That he surpasses all other horses of his age as an extreme early speed progenitor is only to state a plain fact. That he ranks thus, however, is only another illustration of the reliability of that oft-quoted breeding maxim, 'Like begets like.' The Bondsman was himself a great colt trotter, although he never was allowed to take a standard record. The tremendous part he played in the Kentucky Futurity of 1899 is fresh in the memories of all. In that historic six-heat contest, which Boralma won after so spectacular a struggle, he retired with third money, showing himself among the fastest and gamest colts of his age that had at that time been seen in public. That, had he stood training, he would later on have been an equally notable aged performer there can be no question. The M. and M. of a couple of seasons later, upon the work of the candidates, looked almost to be at his mercy, but he went wrong just on the eve of its decision and never raced again.

"His showing as a sire is still more wonderful when it is remembered that his owner, Mr. J. H. Thayer, has never owned a stock farm or a stud of brood mares. The Bondsman's success has been won solely as a 'public stallion,' and his trio of 1910 sensations, Colorado E., The Plunger and Creighton, were bred by three 'outside' patrons, each of which was a 'small breeder.' He has never made a season which was as heavy as those which many noted sires make annually. This, of course, adds greatly to the quality of his success. It also adds to his present value, for his vitality has never been impaired by excessive drains upon it, his procreative powers being as vigorous as those of a horse just entering upon his stud career. Individually he is an admirable specimen of the American trotting breed—a rich seal brown, truly and symmetrically made at all points, of perfect temper and rarely pleasing personality, in type distinctly a member, as he is in blood, of the famed 'futurity family.'"

FOR COUNTY FAIRS.

Chico (Butte Co.), November 18.—At a meeting of farmers held last night in the banquet room of the Methodist Church, a movement was started for the re-establishment of annual or bi-annual County and District fairs. J. H. Guill, newly elected Assemblyman from this District, was present at the meeting and in a speech frequently interrupted by applause expressed his advocacy of the idea and promised his hearty support and co-operation to the movement. "It helped," he said, "to create and keep alive the interest of the general public in the farming community."

F. J. O'Brien, who followed Mr. Guill, spoke along the same line, telling of some of the benefits to be derived from the local fairs and promised his support and influence to any concerted movement toward their re-establishment.

GOOD ROADS FOR TEN DOLLARS A MILE.

Ten years ago a Missouri farmer, who had grown tired of wading through a "slough of despond" every spring when the roads were soft and who had seen his neighbors lose time, money and patience when their wagons were hub deep in the mire or their horses tugging and straining in their harness to get a half load to market, decided that there must be some remedy for this condition, says Farming.

One day in thinking it over he made the astonishing discovery that what made the roads muddy was mud, and that if the road was worked into such shape that the water would drain off instead of soaking into the ground after the rain the roads would cease to be muddy. He wisely refrained from talking about what he had discovered, because he knew you had "to show" a Missouri man, there was no use telling him. So he proceeded to show him.

He rigged up a home-made contrivance out of an old wooden pump stock that the frost had spoiled, and an oak post. By means of three pieces of fence board, he nailed those together so that they were held parallel to each other. Then he made a rough plank platform on which to stand and by means of wire hitched his team to this clumsy affair at such a point that it would drag along the road with a slant of about 45 degrees.

He began with the road that ran in front of his own farm. When it was at its worst, he drove up and down, from his own gate to that of his nearest neighbor. Like a huge mason's trowel smoothing off mortar, it scraped along, cutting down the inequalities and rough places and filling up the wagon ruts.

He kept at it and after a number of draggings, in place of the flat hasin that had served as a water course for every storm to settle in, he had built up a road with a crown and surface that was smooth enough to shed water "like a duck's back." In short, he simply demonstrated the soundness of his major premise, "If I get rid of the mud the roads will cease to be muddy." The device he made he called a "split log road drag."

Even after having perfected the road drag, the reason that it worked this wonder was not entirely clear to its inventor until he received inspiration from observing a hog wallow. He says: "One day I noticed water standing in one of these wallows long after the ground all about it had become dry. Probably I had many times before observed this fact, but not until now had it occurred to me to inquire into the cause.

"Examining the edge of the wallow, I was impressed with the fact that it was almost as hard as a piece of earthenware. Clearly this was because the wallow of the hogs had mixed or 'puddled' the earth and the water together, forming a kind of cement which dried into a hard and practically waterproof surface."

The man who has by such simple means worked such wonders with his road was D. Ward King, of Maitland, Mo. His idea was soon taken up by the Missouri State Board of Agriculture, and an active campaign was started for better roads through Missouri. Co-operation was soon secured from the railroads running through the great corn belt section. The result is that today Mr. King is traveling throughout the States of Iowa, Kansas and Missouri, in fact, all through the Middle West section on special trains in company with college professors and railroad officials preaching the gospel of good roads and showing farmers how to make a road drag and use it.

Villages and townships, citizens and neighbors are forgetting their traditional differences of opinion and becoming "soldiers of the common good" in making better roads. The Atchison, Chicago & Alton, the Burlington, in fact, all the great granger railroads, are running special "good roads without money" trains, giving demonstrations of the King idea of road dragging and encouraging the organization of good roads associations in the communities through which they pass.

The cost of making and operating this drag is so small and the idea that is embodied in it is so simple that the wonder of it is that its application has not already become universal. Roads can be worked up into excellent condition and maintained at a cost of from \$3 to \$10 a mile.

The dragging accomplishes a number of useful things. The most important one is that by giving it a smooth surface and a rounding shape, it makes it possible for the road to shed water instead of absorbing it. Then, too, it kills the weeds and takes off the bumps at the sides of the culverts. It also destroys the old trail and thus prevents deep ruts being formed.

The time to use the drag and the manner of its use are important. Until a road has been worked into some sort of shape the first dragging should be done when it is very wet or when it is thawed on top during the early spring. After that the time to drag is after a rain storm or wet spell when it begins to dry out.

The proposed endurance test between a Vermont Morgan horse and a horse from the U. S. Army will not be attempted, at least not just as proposed in the challenge sent army headquarters by the committee of the Morgan Horse club. General Wood declines to enter the proposed endurance race. He says one horse is no test. The best horse in the world might meet with an accident and be defeated. Then, if the army horse were injured, the soldier rider would have to stand the loss out of his own pocket, as Uncle Sam would not pay such a bill.

PERCHERON SOCIETY OF AMERICA.

Chicago, Ill., November 18, 1910.
To the Members of the Percheron Society of America, and Breeders Not Members—

Dear Sir:—The opportunity to re-record pure bred Percherons, not already properly recorded in the Percheron Stud Book of America will soon be past.

January 1, 1911, is the time limit set by the Board. Before this date, American bred mares, now recorded in other associations recognized by the government, may be re-recorded for \$2 per head, if eligible; imported mares at \$5 per head. After January 1st, the charges are \$100 per head for re-recording imported animals, and will be strongly advanced on American bred.

This liberal offer is made to permit breeders to straighten out their stock, and every breeder should act at once, if he has any animals affected.

Important Facts.
The Percheron Society of America is the only organization possessing the original records.

It represents fully 95 per cent of all Percheron breeders in America.

Every one of the 3000 (three thousand) shares of capital stock has been taken, and numerous applications for stock are now on file, awaiting an increase in capital stock.

Almost 3000 Percheron breeders are members of the Percheron Society, nearly all the stock being held in single shares by individual breeders.

The strength of the Percheron Society, the weakness of other associations, and the uselessness of attempting to maintain more than one record association for Percheron horses, has been so clearly recognized, that the few breeders who have previously recorded their stock elsewhere, have nearly all taken out membership, and re-recorded their stock in the Percheron Stud Book of America. This includes such men as Senator E. B. White of Virginia, formerly vice president of the McLaughlin organization; H. C. Lowrey, Nevada, Iowa, a director in the organization just named; Stream and Wilson, Creston, Iowa, who formerly did business with the Forney organization; Champlin Bros., Clinton, Iowa; C. E. Hilton, Malvern, Iowa, and many others.

794 (seven hundred and ninety-four) new members have been added to the Percheron Society of America between December 1, 1909, and November 1, 1910; 360 of these have been added between August 1st and November 1st.

No animals are recorded in the Percheron Stud Book unless sire and dam are recorded. If your stock is not properly recorded in the Percheron Society of America, write to the secretary at once, and straighten up your stock while you have the chance.

Don't buy or breed to a Percheron stallion unless the owner produces a certificate from the Percheron Society of America. By taking this course you are safe. The chances are that a horse lacking such certificate, is not eligible. It costs you nothing to require the papers before doing business and may save you much grief and expense at a later date.

For information, address

WAYNE DINSMORE, Secretary.

A writer in a recent number of a farm journal announces the discovery of the cause of barrenness and abortion in mares, which, according to the theory of this writer, is due wholly to the smallness of our pastures.

This writer uses much space in trying to explain that Western mares with millions of acres to roam over produce a much larger per cent of foals than do the mares of the Eastern States, where the pastures are small. Of course, they do, but the difference in their conditions as to hard work, overheating, concentrated foods and dangers of infection he has omitted from his calculations.

Then again, while it is impossible to get at an exact per cent, yet very careful investigations of the mares bred in Belgium for the years 1908 and 1909 show that from 80 to 85 per cent of them produced live foals, a higher per cent than was produced in any other part of the world. These mares when not at work run in very small pastures, some of which have been used to pasture brood mares for more than a century. More than this, some of these mares are grazed at the end of a chain when not at work, and yet they are better producers today than our own mares running in large and comparatively new pastures.

In the Perche district of France the pastures will average much larger than in Belgium, yet the per cent of foals scarcely reaches 40 per cent of the number of mares bred. The manner of handling stallions in the two countries will explain this difference of foal production much more intelligently than the size of the pastures.

The same journal, in an editorial, expresses the belief that the cause of this great national loss will yet be discovered. There may be a ray of hope in this statement for such of its readers as read no other journal, but the discovery has been made. If better care, better handling, better feeding and better sanitation be observed, discoveries in troubles of this nature will be unnecessary.

In addition to this must be remembered the part the stallion plays in foal production. Just so long as stallions are handled by incompetent men and permitted to serve mares in all conditions of disease, thus spreading infection wherever he goes, mares will be found to produce but few foals. Premature parturition and foals of low vitality will always be found in those districts where stallions are permitted to make two and three services daily.—Ex.

FAST COLT TROTTERS.

The total number of trotters that secured records of 2:10 or better from the start of racing at Terre Haute early in July to the close of the main season at Phoenix, surpassed all former records by twelve performers more than the best season we have had in the past.

The high water mark formerly was a total of forty-four performers as the result of one single season against fifty-seven this year.

The greatest increase, however, has been among younger performers as of the total of fifty-seven so far recorded, twenty-three are two, three, four and five-year-olds, while of the sixteen formerly in the fast list and who obtained still faster marks, one is a three-year-old, one four and two five.

In each of the four age divisions, the world's championship records were lowered, an instance which again and more fully demonstrates the wonderful development of speed in young trotters.

For the first time in the history of American harness turf and horse breeding, we have a two-year-old colt with a record faster than 2:10, the honor being due to Justice Brooke 2:09½, a reduction from 2:10¼ of the former best by Arion.

In the three-year-old division the season has produced six performers for the 2:10 list, or nearly 60 per cent of all three-year-olds we have had since Fantasy 2:08¾ (in 1893) a record which stood for fourteen years before it was equalled by Kentucky Todd and reduced by General Watts to 2:06¾.

This year's list for three-year-olds is headed by Colorado E. 2:04¼, while Native Belle 2:06½ and Grace 2:05, beat Fantasy's mark and Lou Billings 2:08¾ equalled it.

That the time would ever arrive when the harness turf will see no less than nine four-year-old trotters in the fast list during a single season's racing, was beyond all belief, yet such proved the case this year and the list is correct, headed by Joan 2:04¼, who reduced all records for age, including fillies, stallions and geldings.

The first four-year-old to obtain trotting records of 2:10 flat were the stallion Moquette, and the mare Alix, both made in 1892, while the championship colt and filly records were made a year later and stood until this year.

Six five-year-olds are new in the 2:10 list of this season, headed by Dudie Archdale 2:06¾, whose mark is a quarter of a second faster than that of Susie J. 2:06½, who until eight years ago was the champion of her age and sex.—Stock Farm.

WILSON IS VISITING.

The well known Indiana trainer, Dick Wilson, of Rushville, Ind., who moved to Oregon last winter, is again in Indiana, visiting friends. Mr. Wilson is very much pleased with the outlook in Oregon, and declares he is going to make his home there in future.

He has had a very successful season the past year, training a large number of colts, and will winter at Pleasanton, Cal., in order to educate a large number of youngsters during the winter. In the spring he will move back to Oregon.

Mr. Wilson is accompanied East by Capt. C. P. McCan, of Hood River, Ore., who recently purchased The Patchen Boy, 2:10¼, of him. Captain McCan is looking for first-class brood mares to add to his breeding establishment in the Hood River. Dick's son, William, who is training for The Bonaday Stock Farm, of Roseburg, Ore., is as much pleased with the northwestern country as is his father.

While at the present time there is a scarcity of high-class race prospects in the Northwest, there is considerable breeding going on, and farmers in that section are constantly adding good brood mares to their list, so that it will be only a short time before that section of the country will be very much on the light harness racing map. Before returning to the West Captain McCan and Mr. Wilson will take in the Old Glory sale at New York City.—Western Horseman.

WILL RACE NEXT TUESDAY.

San Bernardino, Nov. 22.—Tuesday, November 29, is the date set by the officers of the San Bernardino County Driving Club for the first racing matinee of the season at the local track.

Not in years has there been such a large amount of good racing stock in sight for matinee meets and the local enthusiasts see bright prospects ahead for an exciting season.

The drawing card for the San Bernardino meeting will be the free-for-all pace in which will be entered the speedy little Monk, of Riverside, who has been in the hands of a professional trainer for some months. The Conqueror, owned by M. S. Severance, with a record of 2:10½ made this year in the Pacific Coast Circuit, and On Bly, owned by James Campbell, of this city, will be available for the meet. There promises to be fast horses entered in the other events. Riverside and Hemet will be represented, it is expected, with several fast horses.

There are a number of horses on the local track at the present time, some of which have never entered in previous meetings. Several new fast trotters are expected to be developed this season.

The trotting mare Lady Stately 2:06¼, that was raced and marked this season by Lon McDonald, has been sold to Ossiano Giacchino of Florence, Italy, and she and Adboe 2:14¼, the son of Advertiser, bought recently by the same gentleman, have been shipped abroad.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT.

RANDOM NOTES.

[By Loch Laddie]

It is scarcely ever that one sees an article concerning the feet of sporting dogs and we doubt that among the purchasers of a hundred dogs one buyer ever gives the fact even second consideration. Like unto the saying, "no frog, no foot, no horse," the last four words may almost as aptly apply to the field dogs if the word dog were substituted in place of horse.

A dog to perform his work must not only have more stamina and bird intelligence, but the foot is an important point; that adds additional value to these essential characteristics. While each of these first mentioned points invariably receive more attention in the usual inquiry about a dog, the pads of his feet are accessories that, if good, accentuate these points, for the showing of one cannot be so pronounced without the other.

A dog that has tender feet is often a detriment rather than a benefit. He may appear at first all right and just when you get into the heart of the bird country he becomes lame and refuses to do further work. You may try to persuade and work him on but to no use, and if you have not another good dog you will be obliged to either quit hunting or resort to the unpleasant method of walking up the birds. Truly many dogs are so game that they will keep up the whole day in spite of physical pain never giving much sign until they reach home. If all the soils of different places were the same, the dog's feet would not suffer so much, but the Coast country presents such a varying condition of soil formation that a good foot that will stand all kinds of places is an absolute necessity; here one place will be a soil of rough gravel, another of sand, and another of something else—all these are trying to the dog. The city dog, in spite of possessing a naturally good foot, invariably from his place of abode, becomes lame the first or second day afield, not always from the lack of a good foot pad but because the conditions at home were such as to encourage a sensitive foot. Nature, finding no necessity from rough contact, to cause callous growth, the change to uneven surfaces is at once felt by the dog. Generally city dogs that have been carefully domiciled and possibly for exercising places were limited to some grass lawn, suffer greatly when put afield in the country, not from tender feet but from abnormally long nails. If the weeds, wild blackberry vines, burrs or briars do not tear one or two out they will cause inflammation at a point that is very tender.

So if you live in any city or anywhere else where the dog's nails have become long, do not fail to give them a careful trimming prior to putting them in briar patches. In sandy bottoms, where the rich soil encourages a luxurious growth of cockleburrs, it will do well to give the feet careful attention for they ripen and fall to the ground and their sharp stickers will cause excessive annoyance to dogs with sensitive feet.

I have always been an admirer of the feet that the Pape strain of black pointers possess. I have never seen the breeders of this race of field dogs make any claims on this point, but personally I have never seen a single one with a sensitive foot. As usual they possess a very thick covering and so much so that some give one the impression at first glance as if they had pads on their feet. The nails of the foot set very high and the padding is often so thick and long on the toes that they make the toes appear as if turned up. I know of one breeder of black pointers whose dogs I have handled, who sent some that had never been out of a kennel yard. They would start at once to work in the roughest hill country, go day in and day out without the least sign of foot soreness, and careful examination would not show that the rockiest points had inflicted a single scratch on the tough soles of their pedal extremities. To this breed alone cannot be claimed the entire race of tough footed dogs but many belong to all other strains of field dogs, both pointers and setters; in these latter it is rather a gift to the individuals than to the masses.

Many setters are very sensitive about their coats and if you want to test their gameness on this point put them in the rank chemise and burr patches, where quail love to frequent in the fall; you will soon find the quitters. Some will work about ten minutes, lay down in bed and pick burrs for another ten. Trimming the coat is a big help but even then a quitter will show himself. But two-third of setters that are dogs of ambition and courage, in spite of the handicap they are under in such cover, will go through it and take heart in their work as they go through as though nothing out of the way was confronting them.

Mr. Bayden, president of the Star Ranch Company in southeastern Missouri, possessed the little setter, Countess Mae Gladstone. She was a bitch of a timid nature, which we cured of gun shyness, and one would naturally expect her to turn tail at the first touch going that presented itself. Aside from this she possessed the finest coat of hair that I ever saw. It was like spun silk to the touch, yet this sensi-

tive looking animal went through the rankest burr cover without winking an eye. The most peculiar thing about it all is that a burr would scarcely stick to her coat. Some will say that she was raised in this kind of country and became accustomed to it. The truth is she never saw a burr until almost three years of age. But lest I may appear too biased on this subject I will say that dogs otherwise game may possess such a sensitive skin that the irritation of burrs acts on their nerves to such an extent as to unfit them for going of this kind.

Speaking of this subject reminds me of a great setter that even when at home never picked up a burr himself. Jocko was the property of R. G. Mostif, and trained by himself, an enormous dog, weighing about 65 or 70 pounds. He was a finely put up fellow but had a severe case of chorea. He shook all the time and always reminded you of the young sport who had been on a two-weeks' drinking bout and the whisky had been suddenly shut off, for Jocko was shaky all over, never quiet. He had a coarse coat to which every cockle burr that came within range of him stuck. He never appeared to notice them and would return home a brown mass of burrs, lie down and never would try to pick one off or appear cognizant of the fact that anything out of the ordinary was on his coat.

The coming of the different field trials through the fall and winter always opens up the discussion between the shooting man and the field man, which degree of test for merit should each dog have to place it as the ideal bird dog. One dog's performance may be ideal to him, but lack a whole lot of it in the eyes of the follower of the field trials. All degrees of performance are not measured by the same standard; what appeals to one mind excites derision in another. The idea promulgated by the field trials is to give honor to quality of performance, rather than the number of times accomplished. The shooting dog man on the contrary expects in his dog a thing of utility who not only seeks opportunities for performance on game, but must grasp the situation offered whether near his master or at a distance. He is often just as well pleased if his dogs find birds within 50 yards of where put out as when they make a third mile cast, locate in a stylish manner and the birds have voluntarily flushed long before the master has reached shooting distance.

The two types of modern field dogs, while aiming always at the same thing, excellence of bird work, are usually diametrically opposed in their standards of judgment, and to reach these standards different methods are pursued. One man wants his dog to secure game over the other; wants his dog to excel his competitor; by instilling in his own mind the ambition that incites him into active spirit of competition. So with the field trial dog's other characteristics the one of aggressiveness must be prominent. Many have the other requirements, range and speed, but lacking in aggressiveness make only ordinary competition. The field trial dog must do all he can in the short time allotted to him. So at once it can be seen that speed is a chief factor with his nose second.

The usual cry of trying to run field trial dogs on shooting dog standard will be out of place for many years. Until greater length of time can be given the trials and one can judge then how far trial men are from it. For to give the dog full limit of time (one day), a shooting standard would require it, it would take an average of 15 to 20 days to run a trial. We must permit things to go as they are and accept the honor bestowed on the meritorious ones.

The shooting dog man wants to kill game and firmly believes that with this end the bird dog was originated. And right he is at that, for continual betterment has been reached in this way alone. The other side, the trial men, want their dogs to excel in competition, to have something that has defeated another before the public on game. He is more of the believer in the spectacular side of a dog's work and the same spirit enters him that does the owner of the trotting or running horse as he watches his animal cross the line in the lead. This is the pleasure he enjoys. The field sportsman enjoys his dog in the field, a companion that adds zest to his work across the stubble, obedient to his commands and assists him in securing sufficient number of birds as a recompense to the hours spent outdoors.

There is no good reason why anyone should permit his hunting companion, the dog, to fret and scratch himself sore from a pest of fleas. A nice clean wash with good carbolated tar soap is a good start to give the poor fellow relief if he has been previously neglected. This much accomplished, proceed to clean and thoroughly whitewash his kennel; fit a good piece of tar-paper to the floor of his house; get some cedar shavings or sawdust to cover the tar-paper and put in plenty of excelsior packing for bedding, and note thereafter the absence of fleas, and also how the dog will resort to his flea proof home. If the weather be too warm this bed should be in an open, well ventilated place and during cold weather should be in a protected place, just as a human being would like to be treated.

A GOOD COUNTY LAW IN JEOPARDY.

For many years past, in Sonoma county, there has been an ordinance in force prohibiting the taking of fish with seines in any of the county waters. This county law was originally intended to protect the steelhead trout from the wholesale operations of the net fishermen particularly.

Incidentally the county trout streams were protected against poaching with nets, this being a custom generally of foreigners—woodchoppers, ranch hands, railroad laborers and the like shifting set, which gentry has the reputation of being persistent fish and game law violators. The operations of the market net fishermen in illegal catching of striped bass in the tidal creeks and sloughs were also materially curbed.

The coast and interior trout streams were frequently stocked by the State Fish Commission. The wisdom and utility of the county law has been fully demonstrated by the increased supply of fish in those waters. The angling offered has induced the visits annually of hundreds of fishermen to the county streams and creeks. This means thousands of dollars spent by visiting sportsmen in hotel, livery and incidental expenditure.

The county law has always been an eyesore to the netmen, especially the steelhead fishermen, who, notwithstanding the State law prohibiting the taking of this variety of trout with any other appliance than hook and line, have frequently been arrested for illegal seining of steelhead and innumerable nets have been seized from time to time.

The Russian river operators seem to have been the most delinquent in this respect. The illegal fishing is usually done near the mouth of the river when the fish run in from the ocean ready to go to the upstream spawning grounds. What this system of depletion in one river, for instance, may be is readily discernable.

The river in the vicinity of Duncan's Mills has been for many years a favorite steelhead angling resort. Most of the fish caught by the net men are peddled through the interior towns. Catching steelhead with hook and line for sale throughout the countryside is perfectly legitimate, but evidently not productive of a wholesale quantity of fish, and therefore too slow.

Such being the state of affairs the following petition was recently filed with the Board of Supervisors: "We, the undersigned residents of Sonoma county, hereby respectfully petition that the ordinance prohibiting the seining of streams of Sonoma county be abolished, so that the law of this county shall be the same as the other counties of the State."

This petition, it is claimed, is misleading, and was signed by about 200 names, some being the names of "first class progressive citizens."

J. R. Lepp, a prominent attorney and sportsman of Santa Rosa, sent the following communication to the State Fish and Game Commission:

"I am satisfied that the signatures of most of the best people were procured through a misunderstanding of the facts. The petition was circulated just before election and the county officers were almost forced to sign it, as they now tell me. They also say that they did not know anything about its merits, as they did not have time to investigate. I am satisfied that a number of those who have signed the petition will ask that their names be withdrawn. I have prepared the form of such request and will have it circulated."

The further suggestions were made that the Fish and Game Commission send a letter protesting against the repeal of the law and commending its wholesome provisions. Also that sportsmen at large who take an interest in the preservation of fish write personal letters protesting against the repeal of this ordinance and co-operate with the leading sportsmen of Sonoma county in the matter.

The Fish and Game Commission has always upheld this county ordinance as much as if it were a State law. When the ordinance was first urged, Chief Deputy Commissioner John P. Babcock, then in the same official position, was actively interested in the passage of the ordinance. The matter is one that appeals strongly to local anglers and has already induced a large opposition.

Outside of steelhead and rainbow trout, striped bass is the only variety of fish taken in the county waters by net fishermen. The State law prohibits the taking of any variety of trout with nets. Striped bass may be taken only in legal nets, not less than five and a half-inch meshes. They may not be taken less than of three pounds weight, nor from sunrise of each Saturday until sunset of the following Sunday. There is also a close season on striped bass from May 1st until July 1st. It therefore, follows, that the trout fishing of the county, as a sport, is menaced and that the minor industry of netting steelhead will be fostered should the ordinance be repealed.

The illegal netting of steelhead trout in the coast streams is followed to greater or less extent at all of our coast river points, despite the vigilance of the Commission deputies. Instances are known where the net men have ambuscaded the watching deputies and shot at them with rifles and destroyed their boats. Deputy Sheridan Smith of Bolinas seized a number of illegal nets near Fort Bragg and in the Noyo river last week. He was unable to locate after a week's search the Russian-Finn fishermen who operate in the Mendocino waters.

Drink Jackson's Napa Soda.

FLY-CASTERS ANNUAL BANQUET.

The San Francisco Fly-Casting Club's annual meeting and banquet at the St. Francis hotel Thursday evening, November 10th was, as usual, an occasion where the jolly anglers enjoyed a fine dinner, good speeches and matters of sentiment that appealed to the sportsman.

The board of directors elected for the ensuing year was with the exception of two new names, J. D. McKee and J. F. Cooper, the members that composed the board for 1910, viz: C. T. Kierulff, H. B. Sperry, F. H. Reed, W. D. Mansfield, C. G. Young, Dr. W. E. Brooks and George C. Edwards.

T. C. Kierulff presided as toastmaster and announced the medal and trophy winners for the Stow lake fly-casting contests this year, as follows: J. Boswell Kenniff won the Louis Titus trophy for the best average in long-distance casting—121.2 feet.

The Golcher Brothers' trophy for best average in accuracy casting resulted in a tie between C. G. Young and T. C. Kierulff. The contest for this trophy will continue, open to every member, for another year. The high averages were practically 99 per cent, possibly a score that could not be equaled by any other club in the United States.

The E. A. Mocker trophy, for highest average in lure casting, was also continued for another year. J. B. Kenniff's score was the best for the season. The club custom, however, rather discountenances the outright winning of more than one trophy in a season by any one member.

Colonel W. H. L. Dinkelspiel, on behalf of Achille Roos, presented T. C. Kierulff with a handsome trophy for the highest average during the season in accuracy—99 per cent.

The medal winners were: J. B. Kenniff, long distance champion class; T. C. Kierulff, delicacy champion class; T. C. Kierulff, accuracy champion class; T. C. Kierulff, long distance, first class; F. H. Reed, delicacy, first class; J. B. Kenniff, accuracy and lure casting, first class; E. A. Mocker, accuracy, second class; C. G. Young, lure casting, second class; Austin Sperry, novice accuracy; C. H. Kewell, novice lure casting.

Walter D. Mansfield, on behalf of the club members, presented T. C. Kierulff, the retiring president of the club, with a handsome and valuable stickpin as a token of esteem and appreciation of the president's many services for the benefit of the club.

The board of directors elected the following officers for the ensuing year: H. B. Sperry, president; F. H. Reed, first vice-president; Dr. W. E. Brooks, second vice-president; F. J. Cooper, secretary-treasurer.

The national fly-casting tournament rules, which made contestants who were connected with the sporting goods trade ineligible—designating such competitor as a professional—have been amended, and a representative team of expert rod wielders from the San Francisco club will enter the national events next year.

Efforts are being made for the purpose of holding an international fly-casting tournament in this city in 1915. Chief Deputy Fish Commissioner John P. Babcock and F. F. Moody were elected members of the club.

Among those present were: T. C. Kierulff, F. V. Bell, W. W. Richards, C. G. Young, W. F. Bogart, Walter D. Mansfield, Horace Orear, Harry C. Golcher, F. M. Haight, Dr. W. E. Brooks, F. H. Reed, J. D. McKee, J. B. Kenniff, A. Suro, J. S. Carman, W. H. L. Dinkelspiel, J. F. Cooper, Charles H. Kewell, H. B. Sperry, James Watt, I. R. D. Grubb, I. R. D. Grubb, Jr., E. A. Mocker, Senator Voorhies, Colonel Burgin, J. X. De Witt and others.

TUNA CLUB RECORDS.

The Tuna Club summer season terminated Sept. 30 and was succeeded next day by the winter tournament. The tournament of last winter was fully as successful as the summer feature, and had the added advantage of being so timed as to permit thousands of tourists an opportunity to participate in the competition.

The tuna record of 251 pounds made by Col. C. P. Morehouse, of Pasadena, seems safe enough, as the largest fish landed this season was over seventy-five pounds shy. Probably bigger fish than Morehouse's were hooked. Murphy, whose 175-pounder leads for 1910, had no less than ten on that day before he finally stopped one. There is no harder fish fighter or more capable heavy angler than the veteran Murphy. He has had a world of experience and is noted for quick finishes, but this 157½-pounder used up two and a half hours of his time, fighting every minute.

Colonel John Eldredge Stearns took the season record swordfish, a 292-pounder, and believes the swordfish is destined to supplant even the tuna. He says the fame of Catalina was established as an angling resort by the tuna, and is to be sustained by the swordfish. Commodore Conn's 339-pounder of last year is the record.

The largest black sea bass ever taken was a 426-pounder caught by L. G. Murphy several years ago. The record this summer was 385 pounds, by Jesse Roberts, of Philadelphia.

Dr. B. F. Alden of San Francisco caught a 45¼-pound yellowtail, the season's record for light (nine-nine) tackle. W. W. Simpson's San Clemente record of 1908, 60½ pounds, remains unapproached.

The largest white sea bass landed in the summer season was a 44-pounder taken by Benjamin Thaw, of Pittsburg. Several bigger ones were caught late in the winter tournament, one of 49½ pounds the last day thereof by Simon Spier, of this city. C. H.

Harding took the record 60-pounder some ten years ago.

The albacore have been scarce comparatively speaking, but the season for them is now approaching. J. W. McIntyre, of Catlin, Ill., took the record fish, a 65-pound 3-ounce long-fin, the biggest landed last summer being taken by H. A. Ohmsen, of Los Angeles, 37½ pounds. W. N. McMillan got a pair of big ones late in the winter tournament preceding.

The Tuna Club, in view of the fact that some back-sliding has been manifested in the use of the Three-Six tackle by those who had no other love for it than to get their cards and buttons as mementoes, has decided upon a step that will give those who need other inducement than their sportsmanship, a business reason for using Three-Six in their fishing. Heretofore the yellowtail has been the only fish recognized by the Three-Six division. It has been decided to discontinue issuance of cards and buttons by the Three-Six class, and to open a premium of 25 per cent. added weight to all light tackle entries caught upon Three-Six. This is to apply in all classes recognized in the Light Tackle competition—tuna, yellowtail, albacore and white sea bass. Thus a sixteen-pounder of any of these varieties taken upon Three-Six will earn the bronze button that it takes a twenty-pounder to earn on light tackle of the nine-thread line persuasion. The taker of a 32-pound yellowtail upon Three-Six will receive a gold button and a 40-pounder in the other classes; if using light tackle he would have to land a 40-pound yellowtail, or a 50-pounder of any of the other three varieties.

The Tuna Club is in better shape than ever before. Additional sleeping rooms have been arranged for with a view to increasing the club's revenue.

WOUNDED GAME.

[By Black Jack]

There is supposed to be a crumpled petal in every bed of roses, and if there is one thing to disturb the equanimity of a true sportsman and cause him regret at the end of a day's shooting, it is the thought of game he has wounded, or seen go away wounded to suffer and die. One of the comforting reflections of a skillful shot is that he is able to kill his game cleanly, and not mangle it, and for this reason alone the good shot has preference when a shooting party is being got together. A clean miss is better than a wounded bird any day, although it is to be feared every one does not think thus, for how often do we hear a novice comforting himself with the remark that a bird was hit which he failed to bring down!

Sportsmen are more inclined than ever to look askance on the novice in the shooting field, and they will no longer endure to see their game wounded continually. There was a period when the aspiring shot was obliged to practice on live game before he attained even a moderate amount of skill; but this is not necessary at the present day, and no one would think of placing a beginner actually in the field for his first lessons in the art of shooting. With the excellent shooting schools now available, the novice may learn far more than the rudiments of that art, and can be turned out at bluecocks fairly fit to take his place in the shooting field. He still has much to learn, but has passed through the initial stages without practicing on live game and wounding a big proportion of the things fired at. All this tends toward the mercifulness of shooting. Browning a covey is so strongly condemned that the veriest pot-hunter dreads to resort to such tricks when out with a party.

As far as the actual shooting is concerned, the driving methods so much in vogue in England are far less prolific of wounded game than the older systems. There is no necessity to indulge in long shots, and the birds are killed at shorter distances, where the pellets are much more effective.

The sportsman fond of dogs, with a liking for seeing them work, never considers a quarter of an hour occupied in search for a running bird badly spent. To him such a bird, when brought to hand by a clever dog, is worth a dozen shot dead, and the animal will probably be successful simply because it is placed on the trail of the game at the earliest opportunity. The long wait till a shoot is over causes many a trail to become stale.

When a dog is placed on the trail of a running bird he should be given every chance of performing his work. Frequently the dog is not utilized till every one of the party has trampled all over the ground, and failed to find the bird, and by that time the scent has to a large extent disappeared or has most certainly become faint. While a dog is striving to take up the trail of a bird, it is no rare thing to see a number of beaters, carrying game in their hands, walking about all over the spot. If this will not handicap the dog, it is difficult to say what will. Let every one stand still, and do nothing to attract the dog's attention.

Salinas Sportsmen's Club.—A new duck club has been formed in Salinas, and has taken up the tract of land east of town on the Stirling Carr ranch, which was recently the preserve of the Flood Duck Club. The land has been leased by Frank Stroud of Monterey and rented to the new organization. The club is known as the "Mallard Duck Club," and is composed of ten well known sportsmen, practically a re-organization of the Flood Duck Club. Chris Thorup is president, and Grover C. Tholcke is the secretary.

AMENITIES AFIELD.

[By D. O. Wallaby]

There are certain rules that should govern actions of men in the field which, if not followed, mar greatly the pleasures of field sports. In no situation in life should a man forget he is a gentleman, if he has any idea at all of what the term means and implies. And if ever a man should remember, in his intercourse with men, to behave like a gentleman; to extend those courtesies and amenities that mark the well-bred man, it is in camp, or participating in a day's sport afield, for strange to say, it is here that the natural selfishness and disregard for the rights and feelings of others will come to the surface, and more pronounced if on a camp hunt.

Life in camp brings out a man. If there is any "oneness" in him, it will come to the surface after a day or two in camp. From the camp growler and the shirker of camp work deliver us. The camp growler makes himself miserable and those around him superlatively so, and there is a deep-down heartfelt wish that the growler were hundreds of miles away. The more he growls the worse he growls, until at last the frightful disease becomes chronic. If his companions find that he is one of the incurable kind not likely to learn the philosophy of camp life by experience, they promise themselves they will not have life made a burden again by such company.

There is but one species of camp growler; he may be classified as *genus homo ad nauseam*—commonly known as a man, in everyday life a good fellow; one you are, perhaps, pleased to know—but beware of him when taken from his native heath and into the hunter's camp.

The following suggestions with reference to politeness and courtesy should be observed where two gentlemen are shooting in company:

If a bird flushes and flies to the left, the sportsman at the right should not fire, but give the shot to his companion; and the same vice versa. This not only as a matter of courtesy, but safety as well. This rule afield was originally adopted as a precaution against the accidental pointing or firing a gun in the direction of a companion.

Should the dogs point to a covey, both may advance, and as the birds flush, cover those birds that fly to the right and left respectively. Should you be standing at the left of your companion, cover those birds that fly nearest to the left; your companion should fire at those nearest the right. If the whole covey bunches and flies to the right, aim for those birds nearest the left edge of the covey. Should they fly sharply to the right, so as to bring your companion almost between you and the birds, do not fire at all. Your companion should, of course, observe the same rule from his side.

When the dogs are working on a scattered covey, and single birds are getting up, the same rule holds good on right and left quartering birds. In this case of single birds it is courtesy to take turns shooting, but if he whose turn it is misses the bird his companion can then fire. Often this shot is successful, and causes much amusement.

If the birds have settled along the banks of a ditch or small stream, it will be found advantageous and comfortable to work the dogs between the sportsmen, a gun thus being on each side. As the birds rise they will usually cross to the right and left, quartering away from the shooters. Here again, the rule is observed of taking the shot at right and left flying birds. Very often a bird will fly so as to invite a shot from both guns at once. Should, under these circumstances, the bird be killed, it is bad form for either shooter to claim it. The gentleman who first retrieves it by hand, or receives it from the dog, should offer it to his companion, remarking possibly, "You killed it, old fellow, at the same time slipping the bird into his companion's game pocket. The latter will have an opportunity to return the compliment before the day's shooting is done. Thus everything moves pleasantly and satisfactorily, all tending to a day of perfect sport.

The man who, in company with others, shooting any kind of game, lays claim to every bird he shoots at, when others have fired simultaneously with him, eventually loses caste. The sportsman does not care for his company afield, and he finally earns the sobriquet of "claimer."

The rules of courtesy that govern sportsmen apply to all kinds of shooting. The beginner should learn, remember, and practice them, keeping constantly in view the fact that there is scarcely a position in life where true politeness should find place in the pursuit of game. Hence we should be on our behaviour, and never for a moment forget our good breeding.

A Goat Hunting Club.—The Hunters' Club was organized at the hunters' lodge, Avalon, Catalina Island, last week. The lodge is practically ready for its opening. The organization is along the same lines as the Tuna Club of Catalina, except that it has to do with the wild goat shooting instead of light tackle fishing. The purpose of the new club, the rules of which are to be formulated at once, is to give recognition, in the form of buttons or badges, to those who bring down wild goat, the awards to be based upon the wild goats with horns measuring a certain distance apart from tip to tip. The caliber and make of the gun used, the number of shots taken and the distance of range also figure in the awarding of prizes by the club. The founders of the club, the name of which is yet to be determined, are: Henry B. Perrin, Washington, D. C.; John B. B. Perrin, Pasadena, and B. C. Mackley, San Francisco.

LONG ISLAND HUNTING.

As a comparison that may be of passing interest to Coast sportsmen we give the following account, from an Eastern exchange, of shooting conditions on Long Island, N. Y. Somewhat meager as they are, if we are not mistaken, the opportunity for sport with the shotgun is rather more than that locality has been given credit for:

Summer visitors on Long Island, city sportsmen as well as natives, have been made aware of the fact that there is every indication of an excellent season for quail. "Bob White's" familiar call has been heard very frequently this summer and many birds have been started up as pleasure seekers have wandered through meadows and woodlands. Two seasons ago heavy rains came just at the time the quail were bringing forth their young and the result was that many young birds lost their lives and game was scarce. Destructive forest fires have interfered with good shooting in Long Island woods in the past, but all signs point to good shooting for quail as well as snipe for the coming season. Extensive tracts have been reserved by sporting clubs in various sections of the island so that the sportsman who is not a member of one of these organizations finds difficulty in reaching fields that are wholly unrestricted. Quail, however, are very widely distributed. Vast numbers of them have been released in tracts leased by the sporting clubs and not all of them have remained there. These tracts are not fenced in and there is nothing to prevent quail, partridge, snipe and pheasants from wandering into unrestricted territory to be captured by the hunter who perhaps can only run down on Long Island for very short visits and who does not care to belong to one of the clubs.

Rabbits are very plentiful on Long Island, and they abound on land which is unrestricted. An interesting fact is that rabbits are found in large numbers on the beach along Great South Bay and many are shot there. Just how these rabbits came on this territory separated as it is from the main land by the Great South Bay, has never been satisfactorily explained. But there the rabbits are, and some sportsmen find pleasure in hunting them amid the sand dunes and within sound of the surf.

Duck shooting probably gives more pleasure to city sportsmen than any other kind of hunting. These birds swarm on the Great South Bay and points like Amityville and Babylon can be reached by train from the city within an hour. Shooting brant from a battery and with the use of decoys is a favorite sport. A recent writer on this subject has said: "It is one of the most inspiring sights in the world to see a bunch of these lordly birds headed for the stool, and a great many people are deceived as to the distance they are off on account of their great size—often losing a good chance by raising too quickly. I watch them with one eye above the edge of the box as they gracefully set their wings as they come down to the stool and when they are in good range I say, 'Now, let's try 'em,' and we sit up with our guns in our hands and fire." Brandt are small wild geese. They breed only within the Arctic circle, and come South in the autumn in vast numbers. Many of them are shot on the shores of the Great South Bay. Stringent laws restricting duck shooting on Long Island and their vigorous enforcement has resulted in an abundance of water fowl every year which affords no end of sport for those who enjoy getting away from business for a few hours now and then, and taking a shot at ducks, brant and other wild geese. Residents of New York City are especially fortunate in having such a splendid field for real sport as the Great South Bay, located at almost their very doors. The number of those who indulge in fall shooting is increasing every year.

As the law only permits the shooting of deer on Long Island on the first two Wednesdays and the first two Fridays after the first Tuesday in November, deer hunting has become almost a farce, because of the fact that so many men with guns in their hands rush to the woods in the expectation of bagging a deer. A few deer are shot every year. Some of these animals escape from such preserves as William K. Vanderbilt's Idle Hour at Oakdale and the South Side Sportsman's Club at the same place. They breed in the woods while protected by the law, so that there are always a few deer to be found on the island. One night the writer was going down on a Long Island train that stopped between stations. Inquiring the cause of the delay he was told that a deer had been struck by the engine, had been picked up and placed on the rear platform of the last car. Going back a beautiful doe was seen. She evidently had been attracted by the headlight of the locomotive and had been hit and killed. About as many deer are killed on the railroad track as are shot by the hunters.

Rabbits may only be shot on Long Island from November 1 to December 31 and the same restriction applies to gray squirrels. The open season for quail is the month of November. Ducks, geese and swan may be shot on Long Island from October 1 to December 31, but they must not be shot in the night, between sunset and daylight. Brant may be hunted from October 1 to April 30.

Prominent Sportsman Due—Harvey McMurchy, who has made annual trips to the Coast for twenty-five years past, for the Hunter Arms Company, is due in this city on the 28th inst. Prince Mac is always welcome on Sportsmens' Row and will receive a cordial reception from the Copper Kettle Club.

GOSSIP FOR SPORTSMEN.

Southern California Hunting Notes.—Press reports, a week ago gave the following information relative to the sport of duck shooting in the vicinity of Los Angeles:

Many of the members of Southern California gun clubs are making complaints of poachers on their preserves. Not only are the residents in the vicinity of the club grounds guilty but many shotgun enthusiasts from Los Angeles make a practice of visiting the preserves on mornings of the days when the clubs hold no regular shoot; they not only succeed in getting away with a good bag before they are detected by the keepers but frighten the ducks so that they are few on the preserves on the days the members set aside to do their gunning.

Although the law forbids the discharging of firearms on the public highways, there are a number of hunters who travel the roads almost daily in the districts where the clubs abound and shoot at the ducks as they fly back and forth between the preserves and the ocean. The only complaint that the gun club members make is that their firing frightens the birds so that they do not alight on the feeding grounds, but fly on over and into the Orange county district to the celery fields where they do much damage to the young crops.

There is also complaint as to the attitude of many of the farmers in the neighborhood of the preserves. They look upon the club members as millionaires with more money than they know what to do with. Some of them who control land adjacent to the clubs get out with their guns on the days when a shoot is scheduled and make all of the noise possible in order to scare the ducks out of the vicinity so they will not injure the crops. This game has worked in several instances and the grangers have either been paid to discontinue the practice or their lands have been rented by the injured club at a good stiff price.

Usually the lands secured by duck clubs have no value for farming purposes and make very poor pasture, as about the only forage that grows on them is salt grass and tules. When the gun clubs secure the land, in order to get water they have to drill wells which are valuable assets to the owner upon the termination of the lease. The land is also very much improved as the water standing in the ponds dissolves much of the alkali and is carried off during the rainy season, making the ground much easier to reclaim.

The sportsmen say that all of the ducks that are being killed in the county are in the best condition, some of them being almost too fat to be good for eating. The birds that have been coming in from the North, until lately, have been so poor that the hunters assert they could tell them as soon as they were handled. The feed in the sloughs here is in its best condition, as the grass is long enough to be easily plucked and is yet very tender.

The clubs in the Del Rey country are having the best shooting that they have had this year. Sprig that have been the most numerous in the district since the season opened, are being bagged in greater numbers than any of the other kinds that frequent this part of the State. Spoon-bills are beginning to put in an appearance on many of the clubs and nearly all of the hunters who bagged the limit during the week had a few of these birds on their string.

On the Centinella preserve where there has been very little shooting recently because of the building of new levees to put more land into feeding grounds, W. J. Phelps, H. L. Corson and F. K. Eckley made limits during the week and Arthur Jackson succeeded in knocking down fifteen. All of the men made their kills without being in the blinds more than three hours.

The El Patron members, whose club is not far from the Centinella, assert that last week's shooting was the best that they have had on their grounds this season. J. B. Banning, Capt. Hancock Banning, Dr. R. Wernicke and W. Lacy, shot the limit Sunday, and J. W. Vaughn and S. Harwood came within one and two birds, respectively, of getting all the law allows.

The Green Wing Club members who were to shoot Wednesday found only a half-dozen birds on the ponds when they arrived at the club preserve. Oscar Tripet, one of the disappointed clubmen, is of the opinion that poachers had been on the grounds earlier in the morning, as the Sunday previous there was good shooting and many birds were seen in the club's territory during the first of the week. In the Sunday shoot, Tom Stovall was one of the lucky bunch to get the limit, bagging teal, widgeon, sprig and a few spoonbills.

Nearly all of the quail hunters have given up the quest of game for this season in the hills near Los Angeles.

A. F. Woodward has just returned from a trip to Wildomar, near Elsinore, where he spent two days hunting on Col. A. W. Woodford's ranch, where, he says, quail are plentiful and that he got the limit of ducks on two successive days.

Woodward made the trip from Los Angeles in his Overland car, and used it in hunting over the ranch, going over plowed ground and through sands that were almost hub deep. The car was not stuck once on the trip. Part of the ranch is marsh land and good feeding ground for ducks, but it is quite a distance from the edge of the marsh to the favorite ponds of the birds, and because of this few hunters get to the places of the best shooting.

Woodward acted on the judgment of his chauffeur, and ran his car into the swamp, which is covered with tullees and grass that served to keep the

wheels from sinking into the mire and afforded good traction. The biggest sport of the trip was shooting jack-rabbits from the car in the sagebrush and cactus.

The jacks were not accustomed to the coughing of the motor, and all within a half-mile of the path of the Overland took to their heels; when one was jumped close to the car the chauffeur gave chase, while Woodward let loose with his gun. The bounding of the machine and the running of the frightened animals made them an exceedingly hard target to hit, and often it took two or three shots before the fleeing jack was halted.

Valley quail are plentiful in the district, but are hard to get, few hunters without dogs having success in bagging limits. Woodward says that he scared up one covey that numbered at least 150 birds. The quail in the vicinity are in the best of condition, the feed at this season being especially fattening.

Woodward asserts that there is much illegal hunting being done in the neighborhood. There are a number of hunters killing game for the market, and as there is no game warden in the vicinity, many of them pay no attention to limits, and do their shooting any time of day or night. Doves are also being killed. Woodward was lucky in bagging a goose, there being few that come to this end of the State.

Sport On the Suisun.—Duck hunting members of the Suisun marsh clubs with but few exceptions, a week ago, had the poorest day's shooting since the season opened. Birds were not only scarce but kept well out of range of the guns in the blinds.

A reason for the scarcity of birds now is given that the marsh has been about shot out. Since October first many guns have been on the ponds twice a week; Sundays and Wednesdays being the generally accepted shooting days. This bombardment in itself is quite extensive, coupled with it is the practice of some clubs to shoot every day—there being two or more different members in the blinds every day of the week. The result is, it is claimed, that the birds have become exceedingly wary and the shooting days produce attenuated bags. The ducks have probably been feeding in the ponds at night and resting out on the placid waters of Suisun and San Pablo bays during the daytime. The weather for several weeks past has been unusually pleasant for this time of the year.

Down Alviso Way.—Last Sunday was a better day for the gunners than has prevailed since the season opened. Quite a few hags were shot at the "bridges." The midweek shooting in that section was also enjoyable.

Further north, with but few exceptions, returns reported were light and indifferent. Last Sunday, just fair results were obtained on the bay shore stretches off Alvarado.

Near Mt. Eden quite a few good strings of sprig and teal were shot. Ed Hammond and friends found the Marsicano ponds productive of sprig and spoonbills in fine condition.

Canvasbacks and bluebirds are coming in to the southern portions of San Francisco bay. This means some good shooting in the marsh sections when the weather turn gives a rough twist to the, at present, smooth bay waters.

Valley Shooting.—General reports from the Los Angeles country up to Newman give news of improved shooting conditions a week ago.

Otto Feudner brought up a limit string from Newman a week ago that is without doubt one of the best bags returned to this city in many seasons. The birds were all sprig and mallard, heavy and plump to a degree, with plumage fully matured. So good did these birds look to a bon vivant on the ferry-boat that an offer of \$25 was urged for the string, but not accepted.

Good News from Belmont.—Clarence C. Nauman, who through ill health, has been resting in a sanitarium near Belmont is improved to a pleasing and encouraging degree we are pleased to announce. A number of local sportsmen have paid Nauman several visits during his illness and were most happy to observe a gradual improvement in the daily progress of the patient.

Striped Bass Angling.—Local saltwater anglers are yet awaiting the expected run of large fish. Last Sunday was an off day for the many anglers who were at Wingo, San Antonio, Benicia and other fishing resorts, but few bass were taken.

At Wingo, one fisherman hooked on to a 75-pound sturgeon and finally landed the big fish. Probably this catch will shed a ray of light on a number of mysterious losses of tackle striped bass anglers have recently reported. A strike of a heavy, but unseen, fish would be felt and after a few minutes of futile endeavor to hold and play what felt like a huge fish on the line, the tackle would be cleaned out. The chagrined fisherman's only satisfaction would be in the telling of the story about being "carried away" by a big bass.

The sturgeon has evidently thriven to a certain extent during the past years when it was protected from net and "China line" fishermen. The embargo has been taken off and now it is allowable to catch sturgeon over 25 pounds in weight. The fish mentioned above was hooked with the ordinary clam-baited striped bass tackle.

Drink Jackson's Napa Soda.

HOW TO TRAIN HORSES.

Never break his spirit by long wearisome drives when he becomes so weary that his mind becomes so dulled that he sees but does not observe and the same objects later, when seen with fresh eyes, become the cause of a runaway, writes Prof. Jesse Berry.

The words "breaking colts" has become obnoxious to me, for I have seen too many well bred, high-spirited colts broken in spirit and strength by some of the old time methods of "breaking." A colt should be trained when his brain and body are alert. The training should not be a subordinate part of some other work. The future usefulness of the colt should be of sufficient value to make the lesson the only thing on hand at the time. Many colts are unnecessarily confused because the trainer was thinking more of the stone to be loaded on the drag, or of the errand he had to do when he reached his destination.

When colt training is done as it should be, eight or ten half-hour lessons given in systematic order will accomplish more, and put a colt in condition to stand more severe tests than the haphazard go-as-you-please methods now commonly practiced can do in two years.

The trainer should put his whole mind on the work at hand and strive to keep the attention of the colt that he may get the idea of what is expected of him. As soon as he gets the idea repeat always in the same way until he understands his lessons thoroughly. No one can do this correctly until he has gained the end sought. Whoever does this will find that he has enough to keep him busy without any other matter on hand.

There are several reasons why it is not good policy to train a colt by hitching it by the side of an old horse. The old horse is slow in starting, and plodding in motion, probably, while the young one is impetuous and lively. Soon the young horse, if it be very ambitious becomes confused when the old one holds back, and this confusion ends in balking.

If the old horse starts before the colt, this leaves your lines slack and gives an opportunity for the colt to leap forward, and soon the habit of bolting is formed, and the pleasure of a good steady driver forever vanishes.

There are very few old horses that are so free from bad habits that you would desire a colt to be just exactly like them. Whatever their peculiarities may be, they will be learned by the colt if compelled to endure the same conditions.

I try to make it plain that horses do not reason, and that their acquirements can not be explained by themselves to their own kind. If they could do so we would have no colt training to do. The colt's mother would do all that for us. Since the old horse can in no way explain to the colt what it ought to do, the old horse simply serves as so much dead weight to prevent the colt getting away, either sideways or forward, and becomes only a power to assist the colt to move forward if it does not desire to do so.

Rather than have the colt lunge against so much dead weight, how much better it would be to let the colt come up against the bit controlled by the sensitive hand of a man who knows just how much he should pull, and when to give more freedom. It only takes a few moments in a small lot where the colt cannot get away from you, to teach it that it must submit to the controlling power of the bit, so there is no danger of the colt requiring more than man's strength to control it.

When trained at the side of an old horse, the first intimation that the colt gets that it should stop is, when it feels the dead weight of the old one fastened to the bit sawing through its mouth, and that is rather a severe way of learning. It is usually thought that the man can handle the old horse, and let the old horse keep the colt in place. For my part, I prefer not to have an old horse as a sort of an interpreter, but prefer to handle the colt directly through my own sense of feeling.

When a colt is trained alone, you have more of its attention than can be had otherwise. There should be nothing to divide his attention. Every attempt should be made to impress upon his mind that a certain signal means a certain action, and not allow that action to become confused with another signal. A very common mistake is to attempt to train a horse to do too many things at a time. No horse and but few people can comprehend more than one thing at a time.

In some parts of the country it is a common thing to see a colt have the harness thrown on him, and then dragged and whipped up to the side of a wagon pole, hitched up and driven several miles, during which time the commands "Whoa" and "Get up" were given, and besides, it was expected to turn to the right or left upon the slight pull of the bit against the opposite side of the mouth. It was expected to learn the six or seven different signals given it, all in one lesson. Whatever you may have expected, rest assured that it did not learn more than one signal, if any at all.

If my many years of experience taught me anything at all it is this fact, a horse can get but one idea at a time. An idea may be more simple than is commonly expected. It is one thing for a colt to get the idea that "Get up" means go, and another thing to learn that "Whoa" means to stand. Each of these commands should be taught separately and so thoroughly drilled into the colt that whatever accident might happen the word "whoa" would be associated with the act of standing, and that, stand it must.

These commands should be taught, and can be taught more easily and comprehensively before attempting to hitch the horse. Although the double lines are fast taking the place of the "lead horse" with the single line, some farmers prefer the single line. The aim is to teach the horse to respond to the words "Gee" and "Haw," or some such term, to have the horse step to right or left. Instead of taking the horse to the field and hitching to the plow with another horse tied to the leader, the work would be made more effective and pleasant if the lessons were given in a small enclosure and each command thoroughly drilled separately. The teaching of the command is sufficient to keep either horse or man busy without anything else on hand.

Some time ago my attention was attracted to a man plowing potatoes with a one-horse cultivator. All other horses being busy, he was using his driving horse. Both were having a hard time of it, the horse being accustomed to long strides gave the man all he could do to keep up. It knew nothing of the commands and had to be guided by pulls of the lines which often became severe jerks. The man was throwing his weight against the horse's mouth to keep it slow enough. He was particular how his potatoes were plowed, and the awkwardness of the horse often caused him to plow too near the row or to plow too deep. This was the cause of the angry jerk on the lines. It is useless to say this continued the greater part of the summer before the horse became anywhere near being a pleasant horse to plow potatoes with.

Plowing potatoes is enough without training a colt at the same time. This young horse should have been taken to a small lot or enclosure, and in half an hour trained one command; the next day it should have learned another command in the same length of time. In three lessons of a half-hour each the horse could have been taught to step to right or left and to walk slowly. This can only be done by the man giving the horse his undivided attention and receiving the attention of the horse, and neither man nor horse would have lost their tempers, and all the remaining season the work would have been done with pleasure to both.

It is disgusting, to any one looking on, to see a man lose his temper with a horse that is doing just what his master taught him, by giving signals that varied frequently in kind and never clearly taught. I have frequently heard three or four different terms used for the same thing, and also have heard the same term used for three or four different ideas. The horse could do nothing else but have vague ideas of the commands used and would always have the name of a disobedient sluggish, or stubborn horse and only because the trainer had been careless and indifferent in his manner of training.

Much time can be saved by knowing what end you want to gain, and go directly to it with the least hindrance possible, and it will never have to be repeated. Keep your mind clear and temper cool. An irritable man produces an irritable horse.

TREATMENT OF COLIC.

The following article written for the Chicago Horseman by T. B. Rogers, D. V. S., will be of as much interest to veterinarians as to horse owners:

I think we bury a great many colic cases every year from the fact that we include all of our cases of intestinal pain under one class as colic. I have for a large number of years tried to differentiate these cases, and I think with some degree of success, and I divide them into three sections. The first, where you get the intense pain, with intervals of ease, normal pulse and respiration, between the paroxysms of pain. In those cases which years ago we called true spasmodic colic, I have never seen the necessity of giving more than a small hypodermic of morphine, and they are the only cases in which I do give morphine.

There is another class, what the French term congestive colic, that will give us a great deal of trouble, if we do not arrive at a correct diagnosis. In this condition you get carbon dioxide poisoning, pulse thin and thready, and if the temperature is taken you will usually find it subnormal. There is a tendency to lie down quietly, and that tendency in some cases is so great that he even won't get up under the whip.

When I get one of those cases I very promptly bleed it, and I take if possible a bucket of blood, and if you bleed one of those cases, with the finger on the artery, you will see how the pulse comes up with the blood flow. The third cases of intestinal pain are those cases where you have loss of intestinal peristalsis, with indigestion, and necessarily must be treated in still another manner, and if we are going to adopt a routine method of treatment, for all the different classes, we are going to fill our corner of the equine graveyard.

I have a friend in England, Mr. Caulton Reeks, and you are familiar with his writings; he is the English authority on colic. He recommends $2\frac{1}{2}$ grains of eserine.

You get a great many symptoms from this you do not want. You put the horse out of business, and what you want from eserine is to get increased action of the muscular coat of the bowel, and when you get that you have all you want. I wrote to Mr. Reeks and told him I thought the dose was excessive, and sent him a tube of tablets I was accustomed to use, and some few months ago I received a letter acknowledging the same. He said that from that $\frac{1}{4}$ grain of salicylate eserine and $1\frac{1}{2}$ grains pilocarpine nitrate, he got all the effect necessary, and was fully convinced that the dose he advised in the last edition of his work on colic was too large.

The gentleman spoke of barium chloride. I use it, but would be very careful in using barium chloride until I had taken other means to soften up the impaction. I should rather expect to get in trouble, and I think some of the troubles with barium chloride have been through giving it in ill advised cases. You cannot take up the use of any remedy as a routine and not get in trouble once in a while. To soften up the impaction powdered ipecac is very valuable. It promotes secretion. We all know how we are called to see a case of colic, and in a few days after get pneumonia. The owner has drenched the patient, got some liquid in the hrachea, and set up traumatic pneumonia; he is going to die. I do not like to drench a horse. I get a great deal of benefit from continued irrigations of warm soap suds.

Another condition I would like to say a word on. It is a very important thing for us to be able to differentiate the pain due to a twisted intestine from colic. It is a very nice thing to go in and examine a horse carefully and finally turn to the owner and say: "In my judgment you have a case of twisted intestine and this patient is going to die." After the patient dies and you show the owner the trouble on autopsy, you have a client for life.

In most cases of twisted intestine you have got the Hippocratic fact of peritoneal pain, constant pain and tendency to get on back. Another point that is present in most of my cases is, that if you auscultate the flanks you get a dropping sound as of water falling into a well. Your pain is practically continuous, and morphine is a good diagnostic agent, because while morphine is an antidote to pain, pain is an antidote to morphine. If you can give a horse from 10 to 15 grains without effect, you can make up your mind you have a twisted intestine. I have felt considerable satisfaction in mapping out these cases.

In impaction you get continuous pain, put your horse will have more or less comfort.

I never saw a case of twisted intestine eat or drink. Another point in that connection is this, Is twisted intestine primary or secondary? I mean, is it due to something occurring before the manifestation of pain, or is it due to rolling? I had a case some years ago where the condition showed it was primary.

A pet horse was taken to the blacksmith shop; he was in perfect health when taken to the stable; the owner allowed him to take his customary roll; when he arose he evinced pain which was constant until he died. Autopsy showed intestinal strangulation.

FREE-LEGGED PACING CLASSES.

When it was announced last spring that hopped pacers would be barred from the 2:30 class throughout the Illinois-Iowa Circuit, there was some curiosity as to how the class would fill, says Western Horseman. There were some pessimists who declared that the class would be a failure, as while there are a large number of free-legged pacers the straps wearers would be needed in order to fill the class. Others maintained that the trainers would be glad to patronize such a class, and declared that there were a large number who placed the pajamas on their horses merely because the others did, and wished to have an equal advantage when the money was down. They feel that it is considerable of a handicap to race a free-legged horse in with a field of hoppers, especially when the drivers of the latter are using their whips too freely. Sometimes it looks as though cutting, slashing and yelling goes with the hoppers and not every free-legged horse can stand for the extras.

Well, the Illinois-Iowa Circuit has come to a close and the following testimonial from J. T. Williams, of Sterling, Ill., the circuit president, will be of interest to the trotting horse public and to the secretaries of every association throughout the country: "Our free-legged 2:30 pace which we announced last spring, was the most satisfactory race of any one of our program. Taking the five towns together, it out-averaged any other race advertised, not only from a standpoint of entries, but from a standpoint of actual starters as well. The interest was well sustained throughout the entire circuit and the success we had with it proves conclusively that the critics are all wrong, and that it is possible to hold free-legged pacing races on a half-mile track."

Now that it has been proven that the trainers are really in favor of racing their pacers without the straps if every other trainer in the race will do the same the promoters of the rule for the gradual elimination of the hoppers on all National and American Association tracks should feel encouraged to believe that they are on the right track. The arguments in favor of abolishing the hoppers are so many and so well known that it is unnecessary to rehearse them at this time. That their abolition will add to the earning capacity of the horse and will force trainers to use more skill and patience in developing green horses are two excellent reasons for the new rule. The greatest objection to the rule has come from those who feared that the pacing classes would fill so lightly as to make the giving of meetings unprofitable, but the experience of the members of the Illinois-Iowa Circuit would indicate that these fears are groundless. It may be that there will be fewer pacers, as many of the trainers will educate their horses to race at the diagonal gait, but this will be a distinct gain to the turf.

If the trainers throughout the country take as kindly to the no-hopper rule as did those who race on the Illinois-Iowa Circuit, there is no question that at the end of a few years the hopped pacer will be a thing of the past. President Williams, and his associates deserve the thanks of the secretaries and the horsemen generally, especially the breeders, for the successful experiment of the past season.

THE FARM

FOOD FOR THE HOG.

It is generally considered that there is no other feed equal to corn for pork production. This is true, provided the corn is used judiciously, says the Drovers Journal. But if it be fed alone for any length of time there are few feeds which are poorer, as the experiments described below strikingly demonstrate. If, however, corn is fed in combination with other feeds, its use is to be highly commended, and it can be used to great economical advantage, too, even though it sells upon the market as high as \$1 a bushel.

The hog is not adapted to living on corn alone, and when we require it of him we are forcing him to do a thing which is not consistent with his nature. Man likes a mixture of feeds or a change in diet; so do the lower animals. The hog in its wild state is omnivorous, feeding upon roots, nuts, fish, grass, fruit, snakes, etc.; in fact, but few feeds can be mentioned that he will not eat if he be given the opportunity. Our domesticated hogs have inherited the tendency to select their feed from a variety of substances, and when we enclose them in a pen and give but one feed we can be assured that we are not allowing them to reach their highest possibilities.

FATTENING LAMBS.

A sheep keeper writes the American Sheep Breeder: After many years of experience I have come to the conclusion that a long light feed is much better than a short heavy one.

In feeding lambs I would proceed as follows: Mix the corn, oats, bran and oil meal in the following proportions: Five of corn, 2 of oats, 2 of bran, 1 of oil meal, by measure. Just as soon as they will eat grain would feed them one-half pound a day in two feeds, for one week. Then three-fourths pound a day for one week; then one and one-fourth pounds for one week, and one and one-half pounds a day for balance of time. I would feed them in flat-bottomed troughs, and would aim to feed them at day-light in the morning, and in the evening early enough so that they would finish eating before dark. Do not have any grain before them for any length of time. Make them eat up grain quickly, and if they get slow cut down feed for a few days. Would feed bean pods and ensilage mornings and clover hay at night, with an occasional feed of straw so as to keep pens well bedded with what was left. Be sure they have all the pure water and salt they want at all times.

Pork is the popular meat in this country, as well as over most of the civilized world, and any shortage in the article is sure to have its effect on the market price of other kinds of meat, says the Traders' Journal. For a year or more

pork products have been luxuries as far as prices were concerned, and the fact that so many people were compelled to turn from pork to beef and mutton has been responsible in a large measure for the prevailing high cost of these meats in the face of unusually liberal marketing. There seems to be only one sane solution of the high cost of meat problem, and that is to raise more hogs. Fortunately for the farmer the solution of the problem is not only very practicable, but promises to be highly remunerative. Under modern conditions the hog is the best money-maker that the farmer has on the place.

SOME INTERESTING ITEMS OF SHEEP INDUSTRY.

Finewool sheep were raised extensively in Spain before the Christian era.

Until the eighteenth century sheep were kept primarily for their wool and milk.

Spanish Merinos were introduced into Sweden in 1723 and into the Argentine Republic in 1797.

The oldest record of the sheep is found in an account of the excavations of the Swiss Lake Dwellings.

History states that the native sheep of Spain were a very indifferent animal until improved by crossing with the Cotswold.

King George III introduced the Merino into England in 1788. There is but a single flock in that country now so far as we can learn.

The first domestic sheep to reach this country came to New Mexico in 1540. Francisco Vasquez de Coronado introduced them. No breed of

sheep is indigenous to this country. The Navajo tribe of Indians have long been interested in sheep; it is estimated that today they own close to one million head.

It is a matter of history that Columbus loaded some sheep at Gomera, one of the Canary Islands, on his second voyage to this continent.

In the early days of Great Britain's

Pacific Breeders Futurity Stakes No. 11

To be given by the

Pacific Coast Trotting Horse Breeders Association

For Foals of Mares Covered in 1910 to Trot and Pace at Two and Three Years Old.

Entries to close Thursday, Dec. 1, '10

\$4250 for Trotting Foals. \$1750 for Pacing Foals.

\$800 to Nominators of Dams of Winners, \$450 to Owners of Stallions.

MONEY DIVIDED AS FOLLOWS:

\$3000 for Three-Year-Old Trotters.

200 for Nominator on whose Entry is Named the Dam of Winner of Three-Year-Old Trot.

1250 for Two-Year-Old Trotters.

200 for Nominator on whose Entry is Named the Dam of Winner of Two-Year-Old Trot.

100 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot when Mare was bred.

\$1000 for Three-Year-Old Pacers.

200 for Nominator on whose Entry is Named the Dam of Winner of Three-Year-Old Pace.

750 for Two-Year-Old Pacers.

200 for Nominator on whose Entry is Named the Dam of Winner of Two-Year-Old Pace.

100 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when Mare was bred.

SIX SPECIAL CASH PRIZES FOR STALLION OWNERS.

Given to Owners of Stallions standing biggest in number of Mares nominated in this Stake that were bred to their respective horses, divided as follows:

1st Prize, \$100.

2nd Prize, \$50.

3rd Prize, \$35.

4th Prize, \$25.

5th Prize, \$20.

6th Prize, \$20.

The Above Prizes will be Paid on December 24, 1910.

ENTRANCE AND PAYMENTS—\$2 to nominate mare on December 1, 1910, when name, color, description of mare and stallion bred to must be given; \$5 May 1, 1911; \$5 October 1, 1911; \$10 on Yearlings, May 1, 1912; \$10 on Two-Year-Olds, January 2, 1913; \$10 on Three-Year-Olds, January 2, 1914.

STARTING PAYMENTS—\$25 to start in the Two-Year-Old Pace; \$35 to start in the Two-Year-Old Trot; \$35 to start in the Three-Year-Old Pace; \$50 to start in the Three-Year-Old Trot. All Starting Payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Colts that start at two years old are not barred from starting again in the three-year-old divisions.

For entry blanks and further particulars, address the Secretary.

CONDITIONS:

The races for Two-Year-Olds will be mile heats, 2-in-3, and for Three-Year-Olds, 3-in-5. Distance for Two-Year-Olds, 150 yards; for Three-Year-Olds, 100 yards. If a mare proves barren or slips or has a dead foal or twins, or if either the mare or foal dies before May 1, 1912, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1910.

Entries must be accompanied by the entrance fee. Nominators liable only for amounts paid in. Failure to make any payment forfeits all previous payments. This Association is liable for \$7,250, the amount of the guarantee, only. Hopples will be barred in trotting and pacing divisions.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

Money divided in each division of the Stake 50, 25, 15 and 10 per cent. There will be no more moneys in each division than there are starters.

Entries open to the world. Membership not required to enter; but no horse, wherever owned, will be allowed to start until the owner has become a member.

sheep husbandry the milking of the ewes for cheese making formed an important part of the farming operations of the Cheviot Hills.

The following is from the diary of a Liddesdale farmer, dated October, 1749: "This day sold to Andrew Wilson, Harwick, 75 stone (ewe) cheese for which he is to pay me at Candlemas. I have no hill for it, but only his receipt that he received so much. I think the price will be 3s 7d a stone."

Ewe cheese was at one time considered a valuable stomachic by the British.—Sheep Breeder.

The body of a sheep should be square and blocky, but the legs must be long enough to enable it to walk a fair distance when necessary. The low blocky sheep with just leg development enough, seems to have the best endurance. It has been suggested that the law of correlation of parts make it difficult to get wool on the legs without getting too much on the face, that the fine woolled sheep naturally has a drooping rump and a cat ham and legginess cannot be made to go with food fleshing qualities, but carried out in moderation none of these objections need discourage us in our attempt to produce a superior type. The feet must be good with hoofs hard and thick enough to stand the wear of range travel. The Merino, which has been accustomed to nomadic ranging for two or three thousand years, at least, has good feet, while some of the mutton breeds of their crosses are apt to become foot sore on the mountain ranges.

RATIONS FOR A LAYING HEN.

When the white of an egg is watery it shows that one is not feeding a good well balanced ration. The lack of protein in feeding causes it. Fourteen and one-half per cent of the egg is protein. This can be remedied by feeding plenty of clover, wheat bran and wheat middlings. As a result the white of the egg is thick and attractive. Ten and one-half per cent of the egg is fat; that is the yellow. If the yellow is pale it can be colored by feeding. How often an egg in the winter is found with a shell so brittle that it won't stand shipping? Sometimes one finds an egg with nothing but tissue, no shell at all, what is the matter with that hen?

The shell is composed of lime, and it is a great drain upon the hen's system to produce the shell. Clover is a rich protein, and it is rich in lime, but in addition to this slake a little lime and put it in the shell box. The hens will go there if they require it, and the result will surprise one if he tries it. Break an egg in a saucer and see the result of proper feeding. The white of the egg is thick, heavy; it is attractive, nutritious; the yellow is the golden hue desired, and the shell is firm and strong and will stand shipment. There is the perfect egg, just brought about by thinking the matter over carefully and feeding intelligently.—Western Farmer.

BUTTER NOTES.

When butterfat is changed into finished butter, the weight gained is called the overrun. From 12 to 16 per cent of this is water, from 1 to 3 per

cent salt, and about 1 per cent casein.

The pure food law allows 16 per cent of water in butter. More than this is not only a violation of law, but gives the butter a bad flavor and injures its keeping qualities.

The butter maker can easily control the amount of water in his butter. To have it contain more water he works his butter when it is warm, and to have less he works it when cold. The soft butter holds more water.

What one gains on water, he is apt to lose in the character of his butter. Hence a dairyman who is careful of his reputation puts no more than 12 to 14 per cent of water in his butter.—Home and Farm.

SAVE-THE-HORSE

Every letter we publish goes as far and means as much as the contract, for they tell of results that are true. They are not from friendly trainers and agents, but from actual users, and are honest in every word they say.

FOR SALE—One Pinto Shetland Pony stallion, three years old. Apply Box E., Watsonville, Cal.

FOR SALE—Handsome bay gelding broken to saddle, sound, gentle and well bred. Price \$125. Also several other well bred young horses suitable for saddle that will be trained to suit purchasers. Address E. A. H., 24 Howard St., San Francisco.

FOR SALE.—Magnificent Black French Poodle of rare quality; 6 months old. Will make an ideal companion for gentleman or lady. Pedigree shows blood lines of famous English winner. Box 38, Menlo Park, Cal.

FOR SALE.—Standard-bred and registered stallion sired by McKinney 2:11 1/4; one imported draft stallion. Pedigrees and photos furnished on application. Would consider trade on heavy stock, cattle or well-bred fillies. Address D. A. BAKER, Box 18, Hill P. O., California.

WANTED.—Standard Bred Trotting Stallion; about 15 hands; with very short hack; smooth blocky conformation; good feet and legs; color, dark bay, brown or black; from 3 to 7 years old; weight, about 1200 pounds. Will pay up to \$500, according to individuality. Send description and price, with breeding and photo, to F. A., Breeder and Sportsman.

FOR SALE—Bay mare, Eleanor S., No. 50362, by Herbert, out of Palianthus, foaled May, 1906, is 16 1/2 hands high, weighs 1100 lbs., in racing condition, sound and gentle.

Sorrel mare, Vivian, about six years old, was raced in Mr. Walker's stable. This mare is in foal by a son of Clarence Wilkes. Will be sold reasonable or let to good man on shares. **PHIL COLLINS**, Gonzales, Cal.

WANTED—The services of a representative in California to look after our old customers and prospective buyers of our Modern Simple Tax-free Industrial Alcohol Distilling Apparatus, by special successful demonstrative methods for making Alcohol, Apple Jack, Aguardiente, Mescal, Tequila, Peach Brandy, Solidified Alcohol in Cubes, Fine Oil, Denatured Alcohol. Most modern simple 5 Gal. Still and all sizes to 500 Gal. daily Capacities. Good Salary and Commission. Address with three references, **THE WOOD WASTE DISTILLERIES CO., Inc.**, Wheeling, W. Va., U. S. A.

FOR SALE—Hiawatha, dark bay mare, 6 years old, 15 1/2 bands high; will weigh about 1140 lbs. Sired by Baron Bretto 39103, a son of Silver Bow; dam Silver Bells by Silver King 3622; second dam Only Hope by Bark, son of Brigadier. This mare is in foal by a son of Clarence Wilkes. Hiawatha is sound in every way, perfectly gentle to drive and handle and is a good roadster. She has had no work since a 2-year-old but at that time could step a mile in 2:55. Price \$225.

Anona L., a full sister to Hiawatha, 5 years old, weight 1100 lbs., is a light bay mare very stylish and handsome. Is city broke and very gentle to drive, afraid of nothing. She has had a limited amount of work but has shown a mile in 2:20 1/2, a half in 1:08 1/2 and quarters in 33 seconds. Price \$500.

Red Devil, bay stallion, 5 years old, 15 1/2 bands high, kind and gentle, suitable for anyone to drive, fears nothing. Sired by Baron Bretto 39103; dam Jeanette by Ottawa; 2nd dam by Snuff Box. A 2-year-old filly sired by this horse won the colt race at Marysville, July 4th. Price \$300. For further particulars address F. W. Kelley, Breeder and Sportsman, San Francisco.

SHAPE OF HORSES' HOCKS.

Strongly made, well shaped hock joints admittedly constitute the most important point to be sought for in the conformation of the hind legs of horses of every class, both heavy and light, says the Farm and Home. Indeed of such importance is this feature deemed by the experienced horseman that the hocks are among the first points to which he directs his scrutiny. The reasons to be adduced why so much stress should be laid upon this requirement are as follows: First, because the degree of propelling power developed by the hind quarters depend more than anything on the strength possessed by the hocks; second, because these joints are the principal seat of unsoundness and lameness in the hind leg, just as the feet and back tendons are in the case of the fore limb, hence it is most desirable that they should be as strong as possible. And a third reason is because good hocks are essential to satisfactory action behind.

The fact of the hock being strong is mainly indicated by being of a large size, broad across, and prominent in its contours, as well as by its possessing a comparatively long os calcis, which is the bone at the back of the joint, and the upper end of which forms the so-called point of the hock. In judging of the shape of the hock joints therefore, these four

features should be primarily looked for as being the principal desiderata. A large coarse hock means that they show a want of refinement in their outline, or are not as symmetrical in shape as they should be, there being unduly noticeable prominence. Although they are generally considered an undesirable feature, there is not much to object to in coarse hocks, for hock joints of this kind are usually of large size, and that is a valuable attribute.

The term curby hocks, which is frequently used has a rather indefinite meaning, though it is mostly applied to hocks in which the rear outline is not quite straight, viewing the joint profile, but somewhat curving outward, giving the idea of a curb. It is often said that many curby hocks are more than ordinarily liable to spring a curb, and they are objected to for that reason, but as often as not one finds such hock joints to be quite as strong as and no more predisposed to contract unsoundness than more normally shaped ones. Still the fact of the horse being curby hocked must be looked upon as a disadvantage. Sometimes the opposite kind of conformation is seen, the hock, looked at sideways, showing a more or less concave outline behind. That is practically always an indication that the joint is weak, and this feature is strongly to be objected to.

DENATURED ALCOHOL IN SOLID

FORM. Cleveland Special Dispatch. A well-known Wheeling, W. Va., chemist has succeeded in producing chunks of denatured alcohol in crystal form by means of a small infusion of certain acids whereby crystals of an alkaloidal nature very closely resembling physiologically the effects of ethyl alcohol distilled from sawdust. The method employed and the results obtained are somewhat similar to the crystallizing of rock candy or that of Saccharine containing as it does 350 times the sweetening strength over that of cane sugar, so this alkaloidal crystallized alcohol contains many times the strength over the ordinary denatured fluid alcohol; they will yield 194 proof denatured alcohol with a greater heating and cooking power for stoves than gasoline, and it is absolutely non-explosive.

A sample can containing 50 solid cubes, 1 stove and the secret formula how simple it can be made at home, will be mailed to you, postpaid, on receipt of \$5.00. Address

DEPT. A, THE WOOD WASTE DISTILLERIES CO., INC., Wheeling, W. Va., U. S. A.

SAVINGS INVESTED IN REALTY.

Put your money in residential building lots. Be sure they are in improved sections. Buy close to a big city. Purchase early; don't let others make profits out of you. The greatest fortunes were made by realty investments. We will offer 1000 choice building lots on December 1st, at prices that will pay very handsome profits. Terms of purchase, \$25.00 cash per lot, balance in thirty-six equal payments. No interest or taxes during this period. If you die before completing your payments, a deed is given your heirs, without further cost. Size of lots, 25 feet by 120 feet and upward. Price of lots, \$75.00 and upward, according to location. By investing in land you own something for your money. Investments in stocks or savings accounts are under the control of others. We guarantee you a profit of at least 25% for the first year. Subscription lists are now open. By remitting us \$10.00 per lot, subscribers get first selections. The first 500 subscribers will also receive a credit of 10% on their purchase. Act now. Let us make money for you and protect your savings.

We want agents in your locality. Write us the names and addresses of some of your neighbors. Do it now. **BUFFALO LAND SECURITY CO.,** Ellicott Sq., Buffalo, N. Y.

OREGON NOW

Never Before Were the Opportunities Greater Than They Are Now.

The world is just beginning to realize this FACT, and the finger of Destiny is pointing clearly, unmistakably to OREGON.

OREGON Is "The Land of Opportunity"

Her apples are unexcelled in the markets of the world, if, indeed, they are actually equalled. Oregon pears are acknowledged to be the leaders—the highest price ever paid for a car of green fruit was paid for Oregon pears, \$10.08 cents per box. Oregon peaches, cherries and prunes are in the same class as her apples and pears.

So is her climate. So are her sheep. So are her cattle.
So is the beauty of her landscape. So are her opportunities.

Oregon is Going Ahead Fast—and is Going to Keep on Going. Watch!

Do you want to keep in the van of progress—to make more than a livelihood—to live in Oregon climate—to grow with Oregon—to partake of the spirit of the great West—this enthusiastic, determined, never-say-die spirit? Do you want to work with men for the upbuilding of a great commonwealth? **Now is the time, if you do.**

Write to-day for literature on Oregon. Ask any questions. They will be cheerfully answered. Address

Every Horse Should Be Clipped in Season

It is the wise thing to do for the clipped horse not only is easier to clean and looks better, but clipping does much to make him immune from coughs, colds and the usual ills that come to a horse from standing in a coat of long, wet hair after any hard exertion. The perspiration evaporates quickly from the clipped animal and leaves him dry. On cold days a blanket when he stands keeps him comfortable.

The Best Clipping Machine the World has ever Seen is the Stewart Ball Bearing Enclosed Gear Machine

It is the easiest turning, fastest clipping and most enduring of all machines. The materials in it are all of better quality, the workmanship is superior. All file hard cut steel gears, protected from dust and dirt and running constantly in oil. It couldn't be better for twice the money.

SPORTSMAN and TELEPHONE

EVERY TIME a man wants to get away from all connection with the busy world, the telephone is an important helper.

The Local Service is useful in arranging his affairs at home, and the Long Distance Service of the Bell System helps him to decide where to go and what to take.

By means of his Bell Telephone he can find out whether the fish are biting or the birds are flying, and whether guides or horses can be secured.

After he has been out awhile, if he wants to get word from the city, the nearest Bell Telephone is a friend in need.

The Pacific Telephone & Telegraph Company.

Every Bell Telephone is the Center of the System.

BON VOYAGE GOES TO LOS ANGELES.

San Jose, Cal., Nov. 29, 1910.

Breeder and Sportsman:—I wish to inform my friends and patrons of Bon Voyage through the columns of the Breeder and Sportsman that I shall move my stable to Los Angeles on December 1st. My reasons for making this move is that Mr. Clark has purchased a home in the southern metropolis and will make his permanent home there and wishes to have his horses near him.

I am more than pleased with the San Jose track and consider it the best all-year-round track I have ever trained on and were I to remain in this section of the State would not think of leaving San Jose. I not only like the track and driving park as training quarters but I like the climate of the Santa Clara valley and San Jose as a place to live.

I wish to take this opportunity to thank the Breeder and Sportsman for its courteous treatment in the many kindly mentions it has made of Bon Voyage and his colts, also to thank the breeders of this section for their liberal patronage of Bon Voyage.

Wishing the Breeder and Sportsman continued success and prosperity I remain

Respectfully yours, TED HAYES.

DEATH OF ROY WILKES 2:06½.

Minneapolis, Nov. 23, 1910.

Breeder and Sportsman—Gentlemen: The old warrior, Roy Wilkes 2:06½, died last night at my farm. On account of his many years we have expected him to die at most any time during the past six months. We have hurried him by the side of Directum 2:05¼ on the bank of the beautiful Minnesota river.

Very truly yours,

M. W. SAVAGE.

Roy Wilkes was over 27 years old, having been foaled in 1883. He was by Adrian Wilkes 6560 out of a mare of unknown breeding. He took his record of 2:06¼ pacing in a race. He was a horse of handsome proportions, and in the stud has sired 3 trotters and 42 pacers with records, and has 11 producing sons and 7 producing daughters. The fastest of his get are Pearl C. 2:06½ and Royal Victor 2:08¾. He was kept in California during the season of 1890 and stood at Pleasanton at \$150. It was two years after that he made his record. His owner, Mr. Davies, claimed that Roy Wilkes' dam was by Blue Bull 75, second dam by a son of American Elipse and third dam thoroughbred, but this breeding was never accepted by the Register association.

THE BONDSMAN.

The coming of The Bondsman to California for the season of 1911, means much to the breeders of this State, as he represents blood lines that are considered the best in the world.

His sire is Baron Wilkes 2:18, sire of 12 2:10 performers, and his dam is the great brood mare Sorrento, dam of six standard performers by Grand Sentinel 2:29¼, whose daughters have produced Peter the Great 2:07¼, Mahel Onward 2:09¼, the fast three-year-old of this year, J. Malcolm Forbes 2:09½ and many others.

The Bondsman has sired the fastest new trotter of 1910, the fastest three-year-old trotter the world ever saw, and has had three three-year-old trotters enter the 2:10 list this year.

A four-year-old son of The Bondsman won the first prize for trotting stallions four years old or over at the recent New York Horse Show. Sons of The Bondsman are already producing sires and one of his daughters has produced two two-year-olds to take standard records.

The wonderful achievements of the present four-year-old champion trotter, Joan 2:04¼, and the fact that nothing further was known of her breeding on the maternal side, other than she was out of the hopped pacing mare, Sarah W. 2:18¼, by Hal Braden 2:07¼, has naturally caused a vigorous search to be started, in an effort to ascertain more fully the history of her dam. From late advices, it is learned that the second dam of Joan (4) 2:04¼ was a brown mare called Mahle Wilkes, pacing record 2:24¼, by Allie Wilkes 2:15, next dam by Strathmore, and tracing back to Clemmie G. 2:15¼ by Magic, a trotter of the high wheel days.

VANCOUVER HARNESS HORSE NEWS.

Mr. C. A. Harrison of Seattle, always ready to drop a line and say a few good words about harness horses sends us the following from Vancouver, where he spent a few days last week.

Texas Rooker 2:05¼, the champion pacer of British Columbia is in fine fix and will be ready to race next year. He is now 11 years old and plays like a kitten. He is owned by H. S. Rolston and J. T. Wilkinson.

I sold Ed Dunn's hay mare Bonner Belle 2:16¾ to John McLeod of Vancouver, B. C. She is in foal to McKena, son of McKinney 2:11¼ and Helena 2:11¼ by Electioneer. I also sold for Mr. Dunn to the same man the two-year-old filly by C. The Limit 2:06¼, dam Bonner Belle. She is a grand filly and Mr. McLeod is highly pleased.

I was in Vancouver this week and everywhere one goes it is standard bred horses and good ones. Stallions by Moko, Zomhro, Oro Wilkes and other fashionable sires are as thick as fleas on a dog's back. You know I told you often in the years gone by that British Columbia was a coming standard horse center. It is a fact and the Canadian fancier insists on standard and registered horses. So it behooves every owner of standard bred youngsters to register all that are eligible.

Alex Miller's recent purchase, Zohono by Zomhro is a sure enough beautiful stallion. I drove him and got nervous from having all the ladies on Granville street and in Stanley Park look at Zohono and say: "What a beautiful horse that old man is driving." Zohono is a show horse, a fast trotter, a well bred one, and has a good owner.

I wish you could visit Vancouver, know the people and see for yourself the good horses owned there. Wishing you a Merry Christmas,

Yours truly,

C. A. HARRISON.

GOOD SPORT ON THE WEST SIDE.

Down at Newman, on the west side of the San Joaquin Valley, where the West Side Driving Club has a half-mile track, a Thanksgiving matinee was held on Thursday of last week, which, owing to the cold disagreeable weather was not largely attended, but furnished good sport nevertheless. During the afternoon the pacer Tom 2:12 by Moses S. won a heat in 2:15½ which is pretty fair time for a half-mile track on a cold raw day. The races were all mile heats, best two in three. Summaries:

Class B, mixed:

Derby Lass, trotter by Arner (Best).....	1	1
Cricket, pacer by Sidmoor (Dalzell).....	2	2
Time—2:25½, 2:23.		

Class C, pace:

Experiment by Sidmoor (Hammett).....	1	1
Queen B. by Dexter Prince (Best).....	3	2
Frances K. by Sidmoor (Kohrs).....	2	3
Time—2:24½, 2:23.		

Class A, pace:

Tom by Moses S. (Hammett).....	1	1
Chancellor by Chancellor (Allen).....	2	2
Los Banos Boy by Derby Boy (Dalziel).....	3	3
Time—2:24, 2:15½.		

R. Kernahan and C. Henshaw were the judges, E. Eshelson and Ben Levy timers, L. Dohrezensky starter, and T. E. Walden secretary.

A TRIBUTE TO KINNEY LOU.

Breeder and Sportsman, San Francisco. Dear Sir: In this week's issue of your paper I read with pleasure your account of Wilbur Lou (1) 2:19½, and of his wonderful record breaking mile at Phoenix last week. It is surprising how so many men, who ought to know better, will knock a stallion before he is given a chance to prove his worth and such is the case with Kinney Lou 2:07¼, the sire of this grand colt.

I am pleased indeed for the sake of that true horseman, Mr. Budd Dohle, and his great stallion, that this equine baby was given a chance to demonstrate his wonderful speed at so popular and prominent a meeting as Phoenix, where great horsemen from all over the country come to witness the record breaking miles.

I must say that Mr. Dohle is the most modest man when speaking of Kinney Lou and especially when asked why Kinney Lou had not done more in the stud. I sincerely hope that the men who have done Kinney Lou such injustice in their estimation of him, in the past will now acknowledge his greatness and send their good mares to him this spring, for there is no better individual and no better bred horse in our midst than the sire of the world champion yearling colt, Wilbur Lou 2:19½.

Yours respectfully,

DR. HARRY CALMES,
1443 43d Avenue, Oakland, Cal.

ANSWERS TO CORRESPONDENTS.

J. H. Nelson, Hanford.—Nut Gregor 23568, record 2:17¼, trotting, is by Preceptor 5301 (son of Nutwood) dam Maud McGregor, dam of 4 in list, by Ben McGregor (son of Robert McGregor) second dam Maggie McGregor, dam of Algregor 2:11 by Robert McGregor. We cannot find any stallion recorded by the name Eagleite.

J. Pride, Bakersfield.—The highest jump ever made by a horse is to the credit of Heatherbloom, who cleared 8 feet, 4 inches. He was ridden by Dick Donnelly.

THANKSGIVING RACES DOWN SOUTH.

Pasadena.

Fifteen hundred horse lovers saw a very successful matinee of the Pasadena Driving Club at Tournament Park Thanksgiving Day. It was the first event put on by the local association and it demonstrated that the track, as rebuilt at a cost of \$1000, is practically flawless.

Good records were made in all the events, and the management was freely commended for the way in which the races were handled.

Because of the success of the event it was decided to hold a matinee every Saturday during the winter, beginning after the first of January.

It was also decided to hold a polo match in connection with each matinee and to have running races whenever first class horses are available. At least one more matinee is promised before the holidays. Results:

Half-mile trotting race for 2-year-olds, two in three—St. Patrick, owned by Louis Schneider, first; Dena C., Arthur Cuthbert, second; San Dirkin, J. W. Wilson, third. Time, 1:30.

Half-mile trotting race, 2:30 class, two in three—Rachael, owned by A. Dubhs, first; Rosewood, W. F. Ducey, second; Cora, C. M. F. Stone, third. Time, 1:21 1-5.

Half-mile trotting race, 2:25 class, two in three—Julia Clay, owned by Nesmith & Sons, first; Baby Wilkes, Rihhins Little, and Crisis, William Morgan, tied for second. Time, 2:26 25.

One-mile trotting race, 2:20 class, two in three—Era, owned by William Morgan, first; Cedric Mac, Revel English, second. Time, 2:26. Happy Clay, Nesmith & Sons, threw herself between the second and third heats and did not start in the last heat.

One-mile pacing race, 2:25 class, two in three—W. W. Whitney's Dolly Zomhro won two successive heats from Harry Snow's Stormy Hal in a close race Time, 2:29.

Half-mile pole team race, two in three—Cora and Rachael, entered by C. M. F. Stone, had an easy time winning two successive heats. Time, 1:25 3-5. Daisy and El Castizo, entered by Revel English, second; Success and Misfortune entered by Charles Parker, third.

Dr. William Dodge's hay gelding pacer Siegfried, with a record of 2:10, paced an exhibition half-mile in 1:08 2-5.

Riverside.

One of the best crowds that has ever attended a race meet in Riverside was at the local driving club's track Thanksgiving Day. Though not the largest that has ever been in attendance, yet the good humor, the interest, and patience displayed until the last race, by the 1500 persons present, is set down by the officials as a record. Results:

2:40 class, Mixed.

Ben Hal (H. Murray).....	1	1
Kid Downey (Chas. June).....	2	3
Big Boy (N. F. McLaughn).....	3	2
June Wilkes (G. M. Carrigan).....	4	4

Time—2:18.	

Phoenix.

The Phoenix Driving Club decided to hold a matinee on Thanksgiving Day and considering that but short notice was given the result was pleasing to all.

The first event was the 2:15 pace. The entries were: Tommy Lawson, Roxie Leland and Anna B. Roxie Leland, W. T. Barkley's little brown mare which proved such a sensation in the 2:20 pace during fair week, won both heats but each time it was an even guess as to whether Roxie Leland or Tommy Lawson, the other local favorite would reach the wire first. Anna B. was third in both heats. Time, 2:16¼, 2:16.

The second event was the 2:26 trot. The entries were Creme de Menthe, Electwood J. and Zona B. Three heats were necessary to decide the race. Zona B. took the first heat but Creme de Menthe claimed the other two. Creme de Menthe is owned by Frank Cavallieri. Time, 2:26, 2:26, 2:26½.

The third and last harness race was a mixed event for pacers and trotters. The entries were Owynex, a trotter belonging to Sidney Goldman; Count Mojeska, a three-year-old pacer, and Carl Hayden, a two-year-old pacer. Owynex took the bun in both heats. Time, 2:39, 2:29.

GOOD RACING IN BAD WEATHER AT SAN JOSE.

Thanksgiving day dawned cold and dreary, dark clouds that threatened rain obscured the sun throughout the entire day and a strong cold wind that militated against fast time prevailed during the afternoon, yet in spite of the unfavorable conditions the matinee meeting of the San Jose Driving Club was about the most successful one that has yet been given, and more spectators enjoyed the races while shivering with the cold than have attended any other meeting of the Club when the weather was warm and pleasant. When a thousand people will turn out in San Jose to watch harness races on a day like that of the 24th it looks as if there was a revival of interest in the sport. Had the day been a pleasant one the attendance would undoubtedly have been the largest ever seen at this track to witness harness races, and had the fast horses that were at first announced to be here been able to fulfill their engagement many more would have been in attendance. As it was there were some that came many miles hoping to see the first mile in two minutes ever made on the coast, not having heard that the program first announced had been declared off. We all regret that Copa de Oro 1:59, one of the greatest of all great pacers was unable through sickness to be here as scheduled. Of course as it turned out, a phenomenally fast, or record breaking mile would have been out of the question on that day, but on some later day and under favorable conditions the son of Nutwood Wilkes should have an opportunity to beat the record he made at Phoenix.

The most interesting race witnessed last Thursday was the free-for-all trot and pace with only two starters, Roy Mead's splendid three-year-old pacing filly Lovelock 2:19½, and Joe Cuicello's good green trotter Reno D. The latter horse is reported to have worked a mile in 2:14 while Lovelock had never been a mile better than 2:17, but while her friends were confident she could beat that time considerable under favorable conditions, few if any expected to see her beat Reno D. that day. They were given the word on the second score to an even start. Lovelock, who had the pole, soon took the lead and was two lengths in front at the quarter in 34½ seconds. After the turn into the back stretch was made and the wind they had been facing was behind them, Cuicello brought his horse up to the filly's girth and forced her to step the second quarter in 32½ seconds, reaching the half in 1:07. No prettier race was ever seen between two contestants than this beat furnished from the half to the wire which was reached in 2:15 with the daughter of Zolock and Carrie B. in front and Reno D. second only by the length of his neck. The second beat was a repetition of the first except that the time was two seconds slower. The first half was made in 1:10 and the last half in 1:07, last quarter against the wind in 33 seconds.

Lovelock is surely a high class racing prospect; she has speed, manners and class, and is endowed with racing instinct of the highest order. At no time in either mile was she fully extended and finished each heat on the bit with speed to spare. Cuicello's horse is a good green trotter. A mile in 2:15 on a day like last Thursday means 2:13 at least under a clear sky in the warm sunshine.

Carrie B. 2:18, Ray Mead's noted old brood mare made her first public appearance on a race track in five years when she started in the 2:18 class for mixed performers and won the first beat in 2:29 and was a close second to Sidmont the next two heats in 2:26. Carrie B. is twelve years old and the dam of Ray O'Light (3) 2:08½, Lovelock (3) 2:19½ and Ishmael 2:21 and previous to her race the other day the fastest mile she has paced in five years was 2:40 made in a preparatory work-out two days before, and she is heavy in foal to Kinney Lou. Her performance was a very creditable one considering her condition as she paced within eight seconds of her record. The winner of this race is an eight-year-old gelding by Altamont 2:26, dam by Sidney 2:19½ and has had but little training. He is bred to go fast and is a good prospect. Summaries:

2:20 pace and trot:
Princess Lou, p., br. m. by Kinney Lou (Hayes) . . . 1 1
Ishmael p., b. g. (Montgomery) . . . 2 2
Kiss Kee Dee, b. g. (Ferri) . . . 3 3
Babe McKinney, p., blk. c. (2) (Villar) . . . 4 4
Rex, p., b. g. (Sherriff) . . . 5 5
Time—2:23½, 2:26.

2:18 pace and trot:
Sidmont, b. g. by Altamont (Cuicello) . . . 2 1 1
Carrie B. p., b. m. (Mead) . . . 1 2 2
Billy L., p., br. g. (Landers) . . . 3 3 3
Judy C., p., blk. m. (Montivaldo) . . . 4 4 4
Time—2:29, 2:26, 2:26.

Free-for-all pace and trot:
Lovelock p., br. f. (3) by Lovelock (Mead) . . . 1 1
Reno D., b. g. (Cuicello) . . . 2 2
Time—2:15, 2:17.

2:25 pace and trot:
Lady San Jose, p., b. m. (Sacadeia) . . . 5 1 1
Director, p., blk. g. (Hanks) . . . 1 2 5
Lady Patrone, b. m. (Patrone) . . . 3 3 3
Lady Rea, p., b. m. (Whitehead) . . . 4 4 2
Valdo, b. m. (Riley) . . . 2 5 4
Time—2:35, 2:27½, 2:32.

Last Saturday Jack Shippen worked the two-year-old colt, Bon Roy, by Bon Voyage, a mile in 2:25½ last half in 1:11½. This colt is likely to make a right good three-year-old, his first, second and third dams are by Dexter Prince, Electioneer and Gen. Benton and all producers. He is in all the California stakes.

Ted Hayes has trained his two-year-old Bon Volante 2:25½ a mile in 2:23. Colts by the son of Expedition can all step.

Since returning from the races C. A. Durfee pulled the front shoes off of Dr. Lecco 2:11½ and has been jogging him barefooted. Last Saturday he started the black fellow out of a slow jog and he went into a smooth pace and apparently takes to that gait like a duck to water.

The yearlings by Alconda Jay that Henry Helman is banding are all good gaited trotters and it looks like the son of Jay Bird will make a sure sire of trotting speed. Henry Struve of Watsonville is soon to send to Mr. Helman for development a yearling filly by Alconda Jay out of the game old trotting mare Princess 2:13½, by Eugeneer 2:28, son of Electioneer. 1:25.

I wish to correct a statement I made in a recent letter to the Breeder and Sportsman in regard to the three-year-old filly Mamie Alwin 2:20¾. I stated that she worked a mile in 2:10 and the same week over the same track was second to Kingbrook in 2:13½. This "dope" was given to me by a member of Mr. Cuicello's stable and it was neither Joe or his brother Louis. I heard my informant make this statement to other parties and afterward I asked him particularly if it was correct and he told me it was. It sounded pretty strong to me at the time but I did not think the party would give me any incorrect information and at the time there was no one else around to verify or deny the story so I wrote it for publication. Since then Mr. Cuicello has told me that the fastest mile the filly ever worked was 2:13½ and when she was second to Kingbrook there was no heat faster than 2:19. To those who knew better, what I said about Mamie Alwin undoubtedly made them wonder where I got my information. I did not manufacture it.

The work of rebuilding and broadgauging the first street railway from town to the Driving Park is being carried on as fast as possible and when completed a first class and much improved car service will be installed, much to the satisfaction of the patrons of the road.

To the regret of all here at the track, as well as his many friends in this part of the country when they learn the news, Ted Hayes has shipped his horses to Los Angeles. Mr. Hayes will be missed, other horses can occupy the same stables, but no one can fill the place of the genial Ted. He will be a great loss to the Driving Club of which he was an enthusiastic and active member. Of late he has done the starting and announcing, and has shown decided talent for the position. The place made vacant in the Club by his removal to the City of the Angels will be hard to fill. The horses he shipped are Bon Voyage and his four sons, Jean Val Jean (3) 2:10, Voyager (3) 2:23½, Bon Volante (2) 2:25½, Bon McKinney (2) 2:28 and a yearling colt by Wayland W. 2:12½, dam by Robin 2:22½. Our best wishes go with him.

ALAMEDA COUNTY DRIVING CLUB

The races postponed from Thanksgiving owing to the bad weather of the feast day were held on the Alameda track under the auspices of the Alameda County Driving Club on Sunday last. The track while fairly good in places, is so wet on the far turn that it is unfit to race on except from the first quarter back to the last quarter pole. On this part of this new track the footing is fairly good and by the time training is actually under way in the spring the entire mile will be safe and fast. There was a good attendance out Sunday to see the sport and all enjoyed the day. The races were all at half-mile beats, and the time made was very good considering the fact that none of the horses are in regular training. Six races were on the card.

Westphal's Clay S. Jr. was the winner of the first races which he took in straight beats from Freeman's Sir Thomas Lipton who was second. The heats were in 1:25 and 1:24.

There was a nice contest in the second race which was between the two trotters, Lecona, owned by Mr. O'Keefe, president of the club, and Harold K. owned by Mr. Galindo. Mr. O'Keefe's handsome black stallion won in two beats, the fastest in 1:09, and he showed to be a very promising trotter.

There was a see-saw race in the free-for-all. Mr. Galindo's Walter Wilkes won the first and the third heats, but Fraga's Babe took the second beat and made the race quite interesting. The best time in this race was 1:06, which is a big rate of speed for this track.

Secretary G. A. Nissen's Duke of Monterey walked over for the fourth race, no other entry appearing. In the fifth event Starlight, owned by S. Gabriel won in straight beats, Burbank being second.

Schreiber's Allegro, and Treasurer Howard's Lady Howard, a couple of two-year-olds, competed in the sixth and last event. It went to the former, but no time was taken.

The Alameda County Driving Club now has rooms in the Merchants' Exchange Building, Twelfth street, Oakland, and holds its meetings there on Monday evenings. The club is receiving new members at every meeting and expects to have the Alameda track in such good shape in the spring that some first class racing may be held over it at mile beats.

Barney Simpson, owner of the stallion Arner 2:17½, has a new addition to his stable at Pleasanton, a four-year-old son of Arner that is out of the dam of Scotch John 2:11½. He stands 16 hands and weighs 1200 pounds. Barney has only sampled him a little and as he showed a 2:40 gait at what appeared to be only a jog for him, he thinks he will make a fast horse.

PLEASANTON MATINEE.

Pleasanton, Cal., Nov. 25, 1910.

In spite of the rough weather, quite a large number turned out on Thanksgiving Day to see the first matinee given by the Pleasanton Driving Club this season. Below is a summary of the events:

First race, free-for-all pace:
Denervo, b. g. by Demonio—Minerva by Guy Wilkes (Smith) . . . 1 1
Rey McGregor by Rey Direct, dam by Robt. McGregor, (James) . . . 2 2
Time—2:14¼, 2:22¼.

Second race, 3-year-old pace:
Hal J. brn. g. by Hal B., Jessie M. by Del Norte (Smith) . . . 1 1
June Pointer, b. s. by Star Pointer, Perza by Alice Wilkes (DeRyder) . . . 3 2
Colt by Kinney Lou, dam by Richards Elector (Webster) . . . 2 3
Time—2:24¼, 2:25¾.

Third race, 2:20 trot:
Borena D., b. g. by Bonnie Direct, Petrina by Piedmont (Dunlap) . . . 1 1
Reginald, b. s., by L. W. Russell, Hazel Mac by Director (Starr) . . . 2 2
Time—2:24¼, 2:31½.

Fourth race, 2-year-old pace:
Tilden Pointer, br. c. by Star Pointer, Jessie Tilden by Rey Wilkes (De Ryder) . . . 1 1
Search Pointer, b. c. by Star Pointer, Record Searcher by Searchlight (Webster) . . . 3 2
Myrtha Pointer, b. f. by Star Pointer, Myrtha Whips by Whips (Smith) . . . 2 3
Time—2:34¼, 2:29¾.

Fifth race, 3 minute class. Mixed. Turkey.
Delah H. br. f. by Hal B., Jessie M. by Del Norte (Smith) . . . 1 1
Black filly by Kinney Lou, dam by Secretary (Webster) . . . 2 2
Black filly by Del Coronado, dam by Secretary (De Ryder) . . . 3 3
Maud A., b. m. by Lockbair, dam by McKinney. 1 drn
Time—2:35¼, 2:29¾.

Sixth race, yearlings; mixed. One-half mile beats
Bonnie Hal, b. c. by Bonnie Searchlight, Sweet Hallie by American Hal (Busing) . . . 1 1
Sirreta, b. f. by San Francisco, Angelica by Antrim (Brown) . . . 2 2
Wahkiakum Patchen, blk c., by Oregon Patch, Jessie M. by Del Norte (Smith) . . . 3 3
Time—1:28¼, 1:26¾.

HAROLD B. TAKES TRACK RECORD.

The Rocklin Driving Club held a matinee at its half mile track Thanksgiving Day a large crowd being in attendance and good racing given. The feature of the day was the lowering of the track record by Harold B., son of Kinney Lou. He won the class A pace in straight beats in 2:16¾ and 2:17½. John Quinn, who drove him says Harold B. could have negotiated both miles in 2:15 if he had been required to do it. The time made broke the former track record of 2:18 held by Jewess, and are the fastest miles ever made by a harness horse in Placer county. The summaries:

Class A pace:
Harold B., b. g. by Kinney Lou (Quinn) . . . 1 1
Jewess, b. m. by Suomi (Levison) . . . 2 2
Alice Roosevelt (Hart) . . . 3 3
Time—2:16¾, 2:17½.

Class A trot:
Stam Rock, b. g. by Stam B. (Quinn) . . . 2 1 1
Major McKinley, b. g. by Stam B. (Metz) . . . 1 2 2
Time—2:25, 2:25½, 2:25.

Class B pace:
Briarwood, b. g. by Diawood (Christie) . . . 2 1 1
Mickey Free (Keena) . . . 1 2 2
Time—2:26, 2:27½, 2:30.

Class C, mixed.
Lady S. by Welcome (Quinn) . . . 1 1
White Hose by Demonio (Holmes) . . . 2 2
Time—2:38¼, 2:33.

Class D., mixed:
Anteo Jr., b. g. by Son of Anteo (Hendrickson) 1 1
Peter J. by Dave Ryan (Johnson) . . . 2 2
Lady Moscow (Hornor) . . . 3 3
Time—2:44, 2:42.

THE THREE FASTEST PACING MARES.

The world's record for pacing mares now has a curious three-cornered aspect. The technical championship belongs to Dariel, which, in 1903, at Memphis, paced in 2:00¼ behind a pace-maker. Then, in 1906, Charley Dean drove The Broncho at Galesburg, not only in the open, but all by herself, without a pace-maker of any kind, in front, alongside or behind her, in 2:00¾. The other day at Phoenix one of the Savage mares, Lady Maud C., split the hair by pacing in 2:00½ in the open, as the rule-allowes. It will thus be seen that the three mares are all within a fraction of a second of the two-minute mark, as well as of each other, and that each of them has performed under different conditions.

Colorado E. 2:04¼ will make the season of 1911 at the farm of Mr. A. B. Cox, at Paoli, Pa., where Zombro 2:11 stood in 1909. Mr. Cox has arranged to breed 15 mares to the great son of The Bondsman and the champion three-year-old trotter will be permitted to serve 15 outside mares beside. The service fee will be \$300 per mare.

THE OLD GLORY SALE.

William Bradley, the well-known New York contractor and owner of Ardmead Farm, Raritan, N. J., who entered in horse-breeding circles only three years ago, practically opened the Old Glory sale of 1910 as a seller.

His entrance into the breeders' ranks was as sensational as his appearance Monday at the Garden in the roll of consigner. Mr. Bradley first came into prominence when he bought the famous stallion, Todd 2:14½, for \$30,000, at the Garden sale, and then authorized Ed A. Tipton to buy every high-bred mare that came to the sale during the next two years, with the result that in a short time he became the owner of the finest bunch of broodmares ever gathered together in the oldest breeding establishment in this country. Todd died at the beginning of the stud season of 1908, and Bradley bought his sire, of Boston at private sale, but it has always been admitted that he paid for the great stallion a sum of over \$50,000.

The same time he bought Guy Axworthy 2:08¾, also at public auction, for \$8000. Breeding operations did not start in earnest at Ardmead Farm until the spring of 1909, and it was the weanlings of that produce which he brought to the Garden Monday and had the satisfaction of seeing a six-months-old filly by Bingen, out of a daughter of Abdell (1) 2:23, sell at \$1400. The rest of his offerings were not older than seven months, with few two-year-olds and two aged horses, and the average price he received for them was surely a record of its kind in the trotting horse sale annals in this country.

The choicest in the consignment were eleven weanlings by Bingen, which sold for a total of \$5116, or an average of \$465.50 per head, a record never heard of during the past decade in public sales.

Of the total consignment of eighty, sixty-eight were sold at prices averaging from \$1400 to \$70, the total amount being \$16,090, or an average of \$236.50 per head. Belle Bingen, foaled May 19th last, which sold for the highest price, was hardly bigger than a St. Bernard dog, yet the oldest horseman around the ring had to admit that he had never seen such a smooth-gaited trotter in his life. No matter how loud the whip cracked at each turn or his leader yelled, the little baby never got rattled, but trotted along like a veteran of many hard battles of the turf.

She was knocked down to J. S. ("Bud") Murray, the Goshen (N. Y.) trainer, but it was generally admitted that the buyer was Richard Delafield of Tuxedo Park, who is getting together a number of the best futurity candidates in sight, his chief ambition being to win the Lexington classic.

The next highest-priced colt in the Bradley consignment was a two-year-old by the late Todd, which was knocked down to Fiss, Doerr & Carroll for \$800, as were several others. As Mr. Bradley is closely connected with that firm it was generally believed that the bid was for him and the youngster would return to the farm, but Manager W. W. Shuit stated publicly that none of the colts were bid in and that Fiss, Doerr & Carroll bought them for their customers.

The attendance was the largest seen on the opening day of Old Glory sales, trotting horsemen and well-known breeders being here from every State in the Union, while foreign countries were well represented.

Second Day.

Brisk bidding and higher prices were features of the second day of Old Glory sale at Madison Square Garden Tuesday. There was a big addition of horsemen to the large crowd of the opening and prospective buyers were in the majority in and around the sale ring.

Like Monday, the offerings were made up of young and tried stock, yet the general average for the entire day was higher on account of highly bred brood mares from the Claiborne and McEllwaine Farms consignments, also the individual offerings, which as a rule were of a better quality and made of a more serviceable lot.

J. K. Newkirk, owner of Claiborne Farm, Lexington, sold fifty-five head for a total of \$20,720, or an average of \$376.50 per head. The star of the consignment was the 16-year-old stallion The Director General, sire of Mainsheet 2:05, trotting, William O. 2:04½, pacing, and several other standard, but the price of \$1100 proved quite a disappointment, and he was considered one of the first real bargains of the sale so far. The highest-priced horse of this consignment was the five-year-old mare Bonalin, by The Bondsman, from Crystalline, by Onward, which was purchased for \$1650 by L. V. Harkness, who will add her to his collection of brood mares at Walnut Hill Farm.

The record high-price horse sold was the 11-year-old Nella Jay (3) 2:14½, which George G. Moore, owner of Dromore Farm, St. Claire, Mich, bought for \$1500.

Narion, by Arion, dam Nancy Hanks 2:04, became the property of T. B. Haddon, Sharon Station, N. Y., for \$1200, while Abe Johnson, the veteran Brockton (Mass.) trainer, bought Orlena 2:19½, the mare that almost caused the death of Pop Geers at Grand Rapids for \$1400. Mr. Moore also purchased from this consignment the once famous race mare Helena 2:11½, one of the very few living daughters of Electioneer. She is now 21 years old, but her new owner believes that even one foal from her by his young stallion, Barongale, will be worth more than the price he paid for her.

The lowest-priced horse sold was \$75 and the general average, considering number, age, and quality, was more than satisfactory.

Although Electra, a two-year-old filly from the consignment of McElwain Farm, Springfield, Mass., sold for \$1000, yet the total of twenty-two head sold averaged only \$210 per head.

Previous to the sale of Electra the highest-priced horse sold was Worthy Lady, by Axworthy, from Empire City Farm, which went to a Syracuse buyer for \$625.

The first real good trotter purchased at the sale for Speedway driving was the gray trotter, Robbie B. McGregor 2:09¾, a new 2:10 performer of 1910, which Alonzo McDonald raced with good success down the Grand Circuit last season. He is a trotter of speed and good manners. The buyer was M. C. Reynolds, owner of Dr. Thrier, who paid \$910 for him. Gov. Horace White sold two horses—Grace Regent 2:24½, pacing, and the eight-year-old trotting stallion Wayfarer, with a matinee record of 2:17¼—and while both came into the ring in fine shape, yet buyers valued them only \$250 and \$225, respectively.

Lively bidding kept up during the entire evening session, with a large crowd present.

Wilkes Heart 2:06½ was purchased for \$1500 by "Chas. R. Twaddle, New York," but it was believed that the fast trotter is now the property of a well-known local road driver, as is also Clover Patch 2:09¾, one of the season's best pacers in the string of W. L. Snow.

Third Day.

The sale of the Shultshurst Farm consignment was the feature of the third day of the Old Glory auction at Madison Square Garden Wednesday, and helped make the total, as well as the average per head, equal to the best one day sale in the history of the big November vendue.

Every horse catalogued for sale was brought into the ring—a total of sixty-one head, which sold for \$45,015, or at an average of a shade less than \$740 per head.

The highest price paid was for Morgan Axworthy, a three-year-old by Axworthy, dam full sister to the famous stallion, Bingen 2:06½, for which Senator Bailey, owner of Fairland Farm, Lexington, Ky., paid \$4000. This colt was purchased to take the place of the Senator's famous stallion Prodigal.

Morgan Axworthy was brought into the ring and sold for \$4100, but there was some misunderstanding between the buyer and his agent, so the horse was put up a second time and sold for \$100 less.

From the Shultshurst Farm consignment Senator Bailey bought six head, four mares and two stallions, paying a total of \$11,100, or almost \$2000 per head.

The highest-priced mare he bought was the once-famous Elore 2:09½, by Delmarch, at \$1600, the next being the five-year-old mare Miss Sub Rosa 2:28½, by Barongale.

A. H. Cosden, former president of the Road Drivers' Association of New York, paid the second highest price of the day, \$3700, for the four-year-old filly Queen Worthy (2) 2:26½, by Axworthy, dam Queen 2:10½, by Chimes. She will be trained and raced to take the place of Vito (4) 2:09½, which Mr. Cosden sold for export, at a reported price of \$7500. As a two-year-old this filly showed much speed, and as she is one of the most fashionably bred mares, will eventually become famous on the turf as well as in breeding ranks. She is now in foal to Prince McKinney.

After the last horse in the Shults horse consignment, Prince McKinney by McKinney, dam Extacy, world's champion two and three year old double performer, was knocked down to Senator Bailey for \$1750. Mr. Shults said to the Senator: "I never sell or buy horses in private sales, but I will buy a box of cigars from you for \$3000 if you throw in Prince McKinney." Senator Bailey accepted the offer. Prince McKinney cost Mr. Shults \$6000 two years ago.

Harry Burgoyne, manager of L. V. Harkness' Walnut Hall Farm, Lexington, Ky., bought several of the best-bred mares from Shults' consignment, including Ecstacy 2:01¾, world's champion pacing mare, the price being \$3000.

J. D. Callery, president of Pittsburg street railways, secured what was considered the best bargain from the Shults lot, when he paid \$2725 for the three-year-old in-bred Axworthy filly Nell Olcott (2) 2:28, by Alcott Axworthy, dam Nell Worthy, by Axworthy.

A number of New York road drivers were around the sale ring all day, but only one was able to secure what will surely be one of the best trotters seen on the Speedway. The buyer was E. Botemus, who owned Rose Electrite for several years, and bought the pacer Peerless Pete recently. The new-comer is Za Za 2:09½, which two seasons ago was a famous race mare down the Grand Circuit. She can step a half around a one minute clip and has fine manners.

Fourth Day.

The high price of the 1910 Old Glory was placed at \$11,000, the price Captain R. P. McCann, of Hood River, Ore., paid Thursday for the stallion The Bondsman, sire of Colorado E (3) 2:04¾, The Plunger (4) 2:07½, and other noted performers.

When the horse was brought into the ring the Garden had one of the largest crowds seen at a sale. There was a perfect silence when Auctioneer George Bain introduced The Bondsman to the prospective buyers, and he had hardly got through when Matt Dwyer, said to be acting for Peter B. Bradley, of Boston, bid \$5,000. A. H. Parker, of Boston, who sold Bingen 2:06½, to William Bradley at a reported price of \$50,000; R. L. Nash, acting for William Simpson, of New York, owner of McKinney and Axworthy,

fought it out at \$1,000 raises until the price reached \$10,000, when Dick Wilson, formerly a well-known trainer from Rushville, Ind., but lately from Oregon, raised the bid to \$11,000 for Capt. R. P. McCann.

George Bain used his most persuasive manners to get \$1,000 or \$500 raise, but there was no response, and the horse was knocked down to the last bidder. In less than ten minutes The Bondsman was paid for and taken out of the Garden. He will be shipped to the Pleasanton, Cal., track and kept there in public service for the season of 1911 and then taken to Oregon.

The lowest figure put on The Bondsman before the sale by prospective buyers was not less than \$10,000. The horse is now 14 years old, and will more than earn himself out in a few seasons, consequently he was considered a good bargain at the price.

The man who sold The Bondsman also sold four others, getting for the five \$13,385, or an average of \$2,673 per head.

The second highest priced horse sold during the day was the 2-year-old colt, Silent Brigade 2:10¾, winner of the world's fastest two-beat race by a trotter of his age. He was consigned by J. D. Grover, owner of Groverland Farm, Georgetown, Ky. The bidding started slow, the opening offer being \$1,000, but after the price had reached \$3,000 there were two contending bidders, John Coakley, a well-known racing man from Boston, and Ed A. Tipton. The bidding was brisk and lively at \$100 and \$200 until \$6,500, when Mr. Coakley withdrew and the fast youngster was knocked down to Mr. Tipton, who gave the name of Thomas F. Dwyer, Philadelphia, as the buyer.

The highest price horse sold before The Bondsman was brought into the ring was Oro Bellini 2:08¾, one of this year's 2:10 trotters which John H. Dickerson raced with success in the string from W. B. Dickerman's Hilland Dale FaFrm. After lively bidding the horse was knocked down to Dr. Charles Tanner of Cleveland for \$2,600, who announced that the purchase was made for C. K. G. Billings, who will use him under saddle on the Central Park bridge path.

A. H. Cosden of New York, former president of the Road Drivers' Association, who paid \$3,700 for a 4-year-old inbred Axworthy on Wednesday, again appeared in the sale ring and after lively bidding bought Eva Tanguay, one of last season's best 3-year-old fillies, for \$4,900. This filly belonged to the Glenmore stable of John R. Townsend, Goshen, N. Y., and was raced by W. J. Andrews, of Hamburg Belle 2:01½ fame. Eva Tanguay, as well as the Axworthy filly, go to the training stable of Tommy Murphy at Poughkeepsie.

After selling his fast and well-bred mare Bisa 2:10½ to A. B. Cox, Paoli, Pa., for \$3,500, Walter R. Cox, the New England trainer bought the 4-year-old mare Belvira 2:12½, for \$5725 from D. W. Cotton, of Foxboro, Mass. Curiously enough the mare that Cox sold and the one he bought are both by Bingara, a son of Bingen, the difference being that his new possession didn't cost him \$12,000 as did the one he sold.

A number of fast trotters and pacers were bought by road drivers and will be seen on the speedway. James A. Murphy added to his string, Ardele 2:04½, with which Ed Geers won the C. of C. three years ago, the price being \$1,600. William Kelly, owner of such high class trotters as Oro 2:05½ and Norman B. 2:06¾, bought Emboy 2:08¾, the former grand circuiter, who showed many a half around the minute. He was never beaten on the speedway, the price being \$900, while R. H. Graham bought Meadow Brook 2:06¾, for \$1,300 for a well known road driver.

Fifth Day.

The D. C. Palmeter consignment from Riverside Park Farm, Berlin, Wis., was the feature of Old Glory sale at Madison Square Garden Friday. It was a complete dispersal sale, and of the forty-two head brought into the ring all were sold to the highest bidders.

The consignment was headed by the famous stallion Baronmore 2:14½, the sire of such noted colt trotters as Ed. Custer 2:10, winner of a double futurity; Peter Sterling 2:11½, world's champion three-year-old trotting gelding; Kelly 2:10, fastest three-year-old pacer of 1906; Barongale, who sired the world's champion two-year-old colt, Justice Brooke 2:09½, and over thirty other standard performers, most of them young horses.

Baronmore, who is now 20 years old, was knocked down to W. Harry Orr, the Reading, Pa., horseman, for \$1700, a price far below the expected one, due to his advanced age.

The total amount received for the forty-two head was \$27,280, or an average of about \$650 per head, which equals the best average of any past consignments, considering the number sold.

Senator Bailey bought from this sale a weanling by Baronmore, out of the famous brood mare Marble, by King Clay, for \$1500, which set a new record for this Old Glory sale, in spite of the fact that several high-priced babies were sold during the past five days.

The four-year-old Bertha C., which was a contender in the six-beat race for the Kentucky Futurity of 1909 and won the fourth heat, passed at \$1500 to A. B. Cox, Paoli, Pa., who with Senator Bailey has paid the highest prices for young and fashionably bred mares in this sale, exclusively for breeding purposes.

Mr. Cox also bought at the same price the three-year-old filly Jane Jones 2:14½ by Barongale out of Medio, the dam of Peter Sterling. Geo. G. Moore, owner of Dromore Farm, St. Claire, Mich., the home of Barongale, paid \$1300 for the 19-year-old mare

(Continued on Page 7.)

NOTES AND NEWS

\$11,000 for The Bondsman.

\$6500 for the two-year-old Silent Brigade 2:10¾.

\$5725 for the four-year-old mare Belvasia 2:12¾.

\$4900 for Eva Tanquay (2) 2:16½, timed in 2:09 in a three-year-old race this year.

The above are the best prices of the Old Glory sale last week, yet the average was around \$400 for nearly 900 head.

Nearly all the California driving clubs held matinees on Thanksgiving day.

Havis James arrived last week from Winnipeg and is now at Pleasanton in charge of Mr. R. J. McKenzie's string of trotters and pacers.

General Isaac R. Sherwood, former editor of the American Sportsman, has been re-elected to Congress from the ninth Ohio (Toledo) District.

Fanny Patch 2:08¾, makes the fourth new 2:10 pacer for 1910 for her sire, Dan Patch 1:55¾. He now has a total of nine in the "select list."

Mr. G. F. Helman of Cotati has purchased the hay mare Pitless by Searchlight 2:03¾, dam Babe Marion 2:17¾ by Steinway from H. H. Elliott of Santa Rosa.

Bon Vivant 2:10¼, three-year-old by Bon Voyage, dam Reina del Diablo, dam of Chiquita 2:08½, by Diablo, brought \$1500 at the Old Glory sale and was purchased by E. Jacobson, New York.

A fast green mare by McKinney 2:11¼ owned by M. H. Reardon of Indianapolis, Ind., was recently so badly injured in a runaway that it is possible she may never again stand training. She had shown 2:10 and \$7000 was refused for her.

John Madden has re-purchased Siliko 2:08¾ and will place him at the head of Hamburg Place. He sold Siliko for over \$30,000 and it is said paid close to the same price to get him back.

Peter the Great 2:07¾, ranks as the leading sire of the new 2:10 trotters with four to his credit. The Bondsman has three, Todd two, Margrave a like number, as has Arion 2:07¾.

The sensational three-year-old trotter J. Malcolm Forbes 2:09½ has been shipped from Lexington to Mt. Sterling, Ky., the home of his owner, James R. Magowan. He will be trained and raced in 1911.

Entries for Pacific Breeders' Futurity No. 11 which closed Thursday have probably not all reached Secretary Kelley at this writing (Friday) but the chances are that the stake will receive more nominations than were made in No. 10.

Make your entries for Chase's Holiday Sale. Entries close December 5th. This should be a good sale. There is a demand for all sorts of horses. Write to Fred H. Chase, 478 Valencia street, San Francisco, for entry blanks.

The Old Glory Sale was a big success considering that only three horses brought more than \$5000. The average up to and including Friday night's sale was over \$400 per head for nearly 700 horses sold. This shows the market was good.

The United States Cavalry secured second place at the National Horse Show against England, Holland, France and Canada, and this was expected, as the United States' horses were those actually used in the service and were not especially schooled for the Horse Show.

The Alameda County Driving Club will hold matinee racing on the Alameda track, at north end of Bay street, tomorrow, Sunday, at 12 o'clock, if it does not rain. The regular business meeting of the association will be held Monday evening, December 5th, at the Merchants' Exchange building, Twelfth street, Oakland.

Lomo and Lugano, the pair of horses sold for \$25,000 to Louis Whans of England during the recent horse show are 15.2 hands high, six years old. Lomo is a bay gelding and is standard bred; Lugano is a bay mare and is by a saddle stallion out of the trotting bred mare Lottie Day 2:23½, the dam of Fleming Boy 2:07½.

Capt. McCan, the new owner of The Bondsman, purchased the weanling filly Ethel Toddington at the Old Glory sale, paying \$725 for her. She is by Toddington (son of Moko and half brother to Sadie Mac 2:06¾ and Todd 2:14¾) and her dam is the famous pacing mare Ecstacy 2:01¾ by Oratorio, second dam the great broodmare Ethelwyn, dam of 10, by Harold. This is one of the best bred fillies in America.

In order to be entered free of duty, all animals imported into the United States by citizens of the United States for breeding purposes on and after January 1, 1911, must be accompanied by certificates of the Bureau of Animal Industry that the animals are pure bred of a recognized breed and duly registered in the foreign book of record for that breed.

The blood of Grand Sentinel figures largely in the production of 2:10 trotters this year. Peter the Great 2:07¾ who is out of a mare by Grand Sentinel leads all sires with four new 2:10 trotters to his credit this year, while The Bondsman standing second with three new 2:10 trotters in the list is also out of a mare by Grand Sentinel.

The two-year-old Bon Roy by Bon Voyage, dam Athena D. P. by Dexter Prince, stepped a mile last Saturday, Nov. 26th, in 2:25¾ over the San Jose track. The last half of this mile was in 1:11¾, the last quarter in 35¾ seconds. Bon Roy is paid up to date in all the principal Pacific Coast stakes and will bear watching for another year. He is being trained by Jack Phippen.

There has been some talk about California sires that have put two two-year-olds in the list of standard performers this year, but heretofore no mention has been made of the number of two-year-old performers to the credit of Bon Voyage during 1910. Three of his two-year-olds entered the standard list this year—Bon Volante 2:25¾, Bon McKinney 2:28 and Manager 2:30, all three trotters.

Despite the fact that the old four-cornered track at Terre Haute, Ind., has been turned into a half-mile track, that city gives promise of being quite as popular a training ground as in former years. The makeup of the track has much to do with this, its home-stretch being the same as in former years, 60 feet, the backstretch 50 feet, and the turns 70 feet wide. The surface of the new track has the same consistency as the old, the new parts of it having been surfaced with the coating of the old track, the old part of the track also having been resoled.

W. J. Kenney, 531 Valencia street, San Francisco, has added a consignment of handsome new runabouts to his stock of speed vehicles and has marked them at prices that should clear them out in short order. He also has a lot of new and second hand speed carts just the things for winter use when the roads get muddy. Ring him up or write him about them, or what is better go out to his place and look them over.

The Ohio trainers have the winner of the 1911 C. of C. already selected in Sir R. 2:12¾. He wears no hobbles and has worked two heats in 2:06¾ and 2:05. Perhaps the California pacer Vernon McKinney may have something to say about first money in that race. He has beaten 2:07 four times this fall, the fastest heat in 2:05. He wears no hobbles or other contraptions, a "huggy" harness and Houghton cart being his favorite hitch.

In Calgary, Canada, at the Alberta Provincial Exhibition, futurities are provided for running and harness horses in 1913. Foals of 1910 are eligible and entries close December 31 next. Besides Canadian foals those owned and foaled or bred in Minnesota, North and South Dakota, Montana, Idaho, Washington, Wisconsin and Iowa may be entered. California and Oregon are barred, probably because they think our colts are too fast for them.

Six pacers have beaten two minutes: Dan Patch 1:55¾, Minor Heir 1:58¾, Copa de Oro 1:59, Auduhon Boy 1:59¾, Star Pointer 1:59¾ and Prince Alert 1:59¾. All are stallions except the last named. Three trotters have beaten two minutes, Lou Dillon 1:58¾, a mare, and Uhlán 1:58¾ and Major Delmar 1:59¾, geldings. The fastest trotting stallion is The Harvester 2:01, and the fastest pacing mare is Daryl 2:00¾.

C. A. Durfee and S. S. Stiles went up to Stockton last Sunday to see Vernon McKinney and stayed over till Monday to see W. H. Parker drive him a mile. The mile was in 2:06¾, and is the fourth he has paced below 2:07. Durfee says he is a great pacer. He was also much taken with the two-year-old One Better by Nearest McKinney 2:14¾, dam Much Better 2:07¾. He saw Bunch drive him in 2:16 and says the two-year-old did it easy.

The Pasadena half mile track has just been rebuilt at a cost of \$1,000 under the supervision of William Mosher of Los Angeles and is a good track to work horses on. The turns are well banked and it is one of the best half mile rings on the coast. Among the horses now at the stables are those of William Morgan, including Era, Crisis, Cena and three colts. William Whitney, Willis Tiffany, Louis Schneider, C. F. Stone and Harry Stone all have horses there. Revell English has twelve horses at the track, W. A. Glasscock of Los Angeles is to send two horses over next week. Dr. William Dodge has Seigried, the famous pacing stallion, in the stables. McClelland of Los Angeles will send Welcome Mac over this week. L. J. Christopher has asked for stable room for several good horses. W. G. Durfee, who is known to every horseman in Southern California, has fourteen horses in the stables, and has asked for stalls for twenty more. Some of these are the best trotters and pacers in Southern California.

P. W. Hodges reached Sacramento with his horses last week, all arriving in good shape and they are now nicely located at the State Fair Grounds. Mr. Hodges expects to place his grandly bred young stallion Montbaine 48667 by Moko in the stud there during the season of 1911. Hodges enjoys the distinction of being one of a very few men who have bred a two-minute horse as he is the breeder of the stallion Copa de Oro 1:59 that Will Durfee marked at Phoenix last month. Mr. Hodges brought down from Oregon a couple of fine jacks which are for sale.

Six well-bred young trotters were recently shipped to South Africa by W. M. Gunn, and it is his intention to establish a breeding farm in that far-away country. The sextet consists of Watchful McKinney, (3), by McKinney 2:11¼, dam Keeper, by Keeps; Avon P. (2), by Ozono, dam Ava Simmons, by Simmons 2:28; Slight Promise (weanling), by Fair Promise 2:20, dam Venice, by Bourbon Wilkes; Chatty Dale (2) by Ondale 2:23½, dam Polly Perkins, by Jay Bird; Faverdale (3) by Ondale 2:23½, dam Phallas Chatterton, by Chatterton 2:18; Vanetta (5), by Forward 2:27½, dam by Abe Van Meter.

Mr. W. H. Gaffett, superintendent of the Giant Powder Company's mills at Clipper Gap, purchased the pacer Harold B. by Kinney Lou 2:07¾ last July and placed him in John Quinn's hands at the Sacramento track. Quinn drove him in a matinee at Rocklin Thanksgiving Day and won quite handily lowering the track record from 2:18 to 2:16¾ in the first heat and pacing the next in 2:17½. He could have driven both miles in 2:15 or better had it been necessary. The Rocklin track is a half mile oval and not a fast track by any means. During the few months Mr. Gaffett has owned this gelding the horse has improved in every way and can finish a mile in 2:10 like a race horse. Mr. Gaffett will probably winter Harold B. himself and send him back to Quinn in the spring to be trained for the races and a fast record.

H. Imhof has his string of horses at his home place near the San Jose track and is jogging them on the splendid roads thereabouts. He will probably take them back to the track after the rains and get them ready for the races next year. His mare Della Lou by Kinney Lou, trotting record 2:23 on a half mile track in the mud, is looking well after her campaign. She won two races during fair week at the Hanford half mile track, was second at Newman and second to Little Branch in 2:12½ at Phoenix. She is a good prospect for 1911. The other horses owned by Mr. Imhof are Prince Del Monte, the yearling Prince Malone and the mare Princess Bes-sum, dam of these two.

The old mare Helena 2:11¼ by Electioneer was sold with four of her produce at the Old Glory sale last week. Helena is 21 years old, very nearly 22, and cannot be expected to produce many more foals. She brought \$325. Her four foals were all by the young stallion Ormonde 2:08¾, that is by Wilkes Boy out of the dam of Country Jay 2:05¾, etc. Her yearling brought \$260, the three-year-old \$375, the four-year-old \$1400, and the five-year-old \$885. The four-year-old is a filly with a record of 2:19¾ as a three-year-old, and the five-year-old is a stallion with a record of 2:09¾ made this year. Helena is the dam of the stallion McKena, owned at Palo Alto farm, and she has produced the following horses with records: Orlean 2:09¾, Wild Nutting 2:11¾, Orlena (3) 2:196, timed in a race this year in 2:10, Dobbelt 2:19½.

Chas. A. Fulkerson, a young man engaged in the stable business at 1121 Stanyan street, San Francisco, and a very popular member of the San Francisco Driving Club, died at his home at Novato, Sonoma county, on Thursday of last week and was buried on Sunday. He was 32 years of age and leaves a widow, a mother, four sisters and a brother. Mr. Fulkerson was a born horseman and a fair trainer. He drove many horses at the meeting of the San Francisco Driving Club, and gave the fast pacer W. J. K. owned by W. J. Kenny, president of the club, much of his work. The funeral took place last Sunday at Santa Rosa and was very largely attended, a delegation from the driving club attending in a body.

MILES IN 2:10 AT PHOENIX.

There were many fast records made at Phoenix, Arizona, during the meeting last month, the following being a few of the fast miles trotted there:

New 2:10 Performers of 1910.

Happy Dentist, pacer, by Nutwood Wilkes.....2:05¾
Fanny Patch, pacer, by Dan Patch2:08¾
Buck, pacer, by McKinney2:09¾
Zombronut, trotter, by Zombro2:08½
Fair Maiden, trotter, by Prince of India2:09¾
Helen Stiles, trotter, by Sidney Dillon2:09¾

Reduced Records in 1910.

Copa de Oro, pacer, by Nutwood Wilkes.....1:59
Lady Maud C., pacer, by Chitwood2:00½
Carlokin, trotter, by McKinney2:07½

World's Record for Yearling Colts.

In addition to the above miles trotted and paced below 2:10, there was a world's record made as follows:

Wilbur Lou, yearling trotting colt by Kinney
Lou2:19¾

THE OLD GLORY SALE.

(Continued from Page 5.)

Marble 2:14 dam of Ed. Custer (3) 2:10; Bertha C. (3) 2:10½, and a half dozen other young performers. After she is mated to Baronmore, Marble will be mated with his son Barongale or grandson, Justice Brooke.

A number of prominent breeders were around the ring when the 10-year-old well bred mare, Chimes of Normandy, by Chimes, sire of ten 2:10 performers, including The Ahott 2:03½, and The Abbe 2:04, dam Santos, the dam of Peter the Great, was brought into the ring. The bidding was brisk and lively, but there was some surprise when the mare was knocked down to A. B. Cox at \$2000, or less than half the value put upon her by horsemen in the Garden previous to the sale.

It is quite hard often to account for the way buyers and breeders overlooked some of the best offerings at the sale ring, as was shown in the case of a very handsome and highly bred two-year-old named Baron Santos, by Baronmore, out of Chimes of Normandy, second dam Santos. When the colt came before Auctioneer Bain, it looked the best individual of the entire consignment, yet bidding was slow and it was sold for only \$900 to the well known Pittsburg amateur driver, M. G. Leslie, who certainly picked up the best bargain of the entire week.

Miss Bessie Bond, a seven-year-old daughter of The Bondsman, was the only one of the Riverside Park Farm lot to be purchased for export, the buyer being Emil Jacobson, who paid \$1100 for her for an Austrian buyer.

Outside of the sale of this consignment there were no four figure prices, yet the general average was quite satisfactory to the sale management and consignors.

Sixth Day.

The thirteenth annual Old Glory Sale closed at Madison Square Garden Saturday night with the largest attendance seen on any last day, with brisk bidding and much demand for all the horses offered. Contrary to the custom of former events the bargain hunters who crowded around the auctioneer's stand found no real bargains, although they had waited all week with that purpose.

Prices ruled low all day compared with those of the previous five days, yet considering breeding, quality and market value of the offerings they sold perhaps at a higher percentage than the good ones that had already passed through the ring.

The total amount received for the entire sale was far better than was expected before the sale opened, and in spite of the fact that only two horses sold over \$5000, against five last year, the general average was almost equal to the best former sales.

The so-called big buyers stayed in the Garden longer than they have been known to do in former years to look over the closing day offerings, which though they did not include horses from any special breeding establishment, had a fairly large number of high-class breeding material and special horses with matinee and road experience from individual consignors.

The highest price of the day was \$760, paid for Minnie M. 2:07½ by Strongwood. Among the best buyers was James Farley of New York and Plattshurg, who picked up several really fine bred mares, which he will add to his new breeding establishment. One of the cheapest trotters sold during the entire week was John Caldwell 2:08½, once owned by Col. J. C. Kirpatrick of San Francisco, which was knocked down at \$270 to a buyer who represented a New York road driver.

Only two teams were sold at the Garden, among the sellers being Pierre Lorillard, Jr., Tuxedo, N. Y., whose handsome blue ribbon winners, Lady Chester and Tuxedo, were sold to a Highland Mills, N. Y., buyer for \$510.

Before the buyer had paid for them the team was resold to Trainer Roy Miller at a big advance and will be shipped to a friend of George G. Moore, owner of Dromore Farm, at Detroit.

The following are the best sales during the week. Of the first, second and last day's sales only those of \$200 and over are given, and of the third, fourth and fifth days those of \$500 and over. Of the 850 horses catalogued, the transfers of only about 250 are enumerated. The report of the sale is from the New York Telegraph:

First Day.

Hekla Constantine, blk f, 2, by Constantine—Adette, by Advertiser; L. M. Brooks, Oshawa, Ontario 280
Fullwood, b c, 3, by Moko—Fullwing, by Onward; Dr. J. S. Schofield 300
Allereta 2:22½, blk m, 6, by Direct—Anne Allerton, by Alvin; W. Curtis, Waterbury, Ct. 170

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DOWITT.

RANDOM NOTES.

[By Loch Laddie.]

A question that is often asked is "Where will I get a good pointer or setter puppy; or will it pay me better to breed my own bitch to some prominent stud dog?"

From a financial standpoint the buying of puppies from some of the prominent kennels is as a rule the wisest course to follow. A saving of time, a saving of money, and the almost certainty that you will secure something good is to patronize some of the kennels advertising pups for sale. In such a case you have often the opportunity to select the get of some great stud dog which you might not on your part have the occasion to patronize. The dangers of whelping and those incidental to puppyhood are done away with, for often whole litters are lost after giving to them and the dam the best of care. The kennels assume all this part and usually send you a strong, healthy pup on approval, one that has probably gone through the whole regime of dog diseases, so that you haven't much to worry about on this score. For from \$20 to \$50 you will be able to get a puppy to suit your wants in blood lines, for most of the kennels carry quite a number of matrons and usually breed to different stud dogs, so as to have for their purchasers different nicks to select from. Every dog man who fancies high-class dogs has some blood line, either in pointers or setters, which he fancies above all others, so that a judicious selection of blood lines to your own taste can be easily made. While like produces like, you must not blame these kennels if after you have bought a pup, six months later it fails to develop into the wonder you anticipated.

Breeding is replete with failures, for a sire does not always stamp his entire progeny with his own greatness. Not only a good dam is necessary, but opportunities must be constantly offered to develop the natural instincts of the young dog.

Some puppies have the faculty of developing quicker than others, and the pointing instinct in one may become prominent the first time he is put in the field, while in another after months of work it may not show until the last, though he is just as likely to develop into a classy performer, if not more so, than the one who showed rigid the first time he was put on game. The former quickly becomes "hacked," held to all his points and never permitted the youngster's privileges of a chase. His style is more likely to develop into the slow, cumbersome class than the other fellow who has had his merry frolics before he has settled into the usual field routine and is more than likely to have more snap and zest than the former, though this is not always the case, for some youngsters start out from the first and do nice, classy bird work from their first introduction to birds, and increase the bird sense and range in proportion as opportunities are offered. Often young pups are dubbed smart in the yards, i. e., quick to pick up knowledge of all kinds, but have the failing of never developing into field dogs. Smartness in the yard and smartness afield are two entirely different things. The latter appeals to the sportsman the most; a combination of the two is not to be despised.

Do not start your dogs too young or have them sent to a trainer too young, unless, when they are returned, you have the chance to give them occasional opportunities on game.

It is often strange what peculiar accidents may happen to a dog, and like man, they are always running into the unexpected. Once the writer came near losing a fine young setter through a peculiar combination of events. It was a very warm day, as it had generally been all that fall. Working the dog, through a stretch of wheat stubble, the animal disappeared before my eyes. Thinking he might have gotten out of range, I whistled to bring him in, as he was usually prompt to obey, but no sign of dog anywhere. Searching hastily, I was not greeted by a vision of him anywhere. Going to a rise in the field, I heard a loud splashing noise, and at once searched to find the cause of it, and found in a small patch of ragweed not 100 feet in circumference an old well, and on gazing down 20 feet below saw the poor dog splashing away for dear life. The well had been improperly covered with boards for many years, I suppose, and by evidence of broken boards I was satisfied that the dog went through the trap by his own weight. Of course, I was nonplussed for the moment, as assistance was not close at hand, but soon threw the balance of the boards in and some brush lying in the vicinity to help support him until assistance could be secured. Going to the nearest house, I secured a rope, after asking the farmer to help me. All this time I feared the cold water would chill the dog so badly he would not have strength enough to keep up his fight for life. On my return I was overjoyed to still hear him at work trying to get out. It was no easy task to throw the loop over his head, but after ten minutes of unsuccessful attempts the last one coiled the noose slowly over his head. All fear of choking him was quickly set aside as he braced himself against

the wall after every tug. Finally he reached terra firma, where we were both overjoyed at our luck. It was unnecessary to fear pneumonia resulting after this long cold bath, for the big young setter went through the fields like an all-age trial winner, and no evidence of bad effects were afterward shown. But if luck, which is generally against me, hadn't favored me this time, it would have been a casualty I could never have explained, for I had passed through this field at least 100 times a year about twelve years and never knew of the existence of this dog trap.

Many know the trials that beset the handlers of dogs, whether amateur or professional. Something out of the ordinary is more than likely to occur; especially just when one thinks the road to a successful ending of his work is at hand. About the greatest jar to one is when a youngster, after being worked steadily on birds and coming apparently to love a gun as though it was a part of his nature, suddenly turns shy when the bombardment of singles or scattered birds begins. The greatest help in a case of this kind is time to get the youngster's nerves in such shape as will stand anything. It is a peculiarity of high-bred dogs that this trait will occasionally make its appearance.

The exact cause of this sudden antipathy for a gun, when the pup has before shown no timidity toward it, is hard to ascertain. But possibly the wrong physiological effect took place. Personally I have seen dogs which, shot over heavily, with no attempt at abuse or unkindliness offered, without reason show fear of a gun all of a sudden, and it took many weary days to destroy the effects of this unforeseen turn of affairs. I rather hold the opinion that possibly the pup has become tired; his nerves naturally on edge, and an effect of this kind when physical conditions are as stated might be the reason.

I can remember one instance while shooting over an old setter with a friend, the bitch became gunshy. We were caught in a drizzling rain, but continued our shooting, when from no apparent reason the setter became averse to the report of a gun and shrunk at heel, and no effort on our part could induce her to get out and search. She had been heavily shot over for several seasons, loved water, and to this day the cause of her timidity is unknown. In fact, it was at least a month before she regained her former predilection for a gun. In cases of this kind abundance of kindness may aggravate the cause instead of producing the desired results.

Firmness, with a wee bit of petting, will bring back the dog to its normal stage, and if he shows a disposition to slink at heel do not permit it for a moment; snap a lead to the dog and do not take it off until the dog exhibits a desire to voluntarily follow, and when he regains sufficient confidence to hunt game again do not shoot until the dog is on point. Another dog is always a valuable assistant in treating these nervous fellows. Of course, he must not be afflicted in the same manner, otherwise they will develop into a pair, for these little nervous afflictions appear contagious, and a companion that is a trifle overambitious will disprove the most certain rule.

All well-made rules on any point at times fail, and it is essential that the amateur trainer exhibit as much thought on existing conditions that are out of the ordinary as he would if the unexpected occurred in the routine of life he is more accustomed to. The greatest temptation that presents itself to every one is expecting too much at once. Slow developments of pointing senses are many, and it is by no means out of the ordinary to find dogs that have been daily in the field for months on game who still exhibit no sign of the approach of this natural gift, and no doubt it is exasperating in the extreme, but a delay in the youngster's "savoir faire" on this particular part of his education is no reason why he should be condemned. His field carriage will always give you an impression of what his future will be on game when this instinct begins to assert itself, and we consider it folly to force dogs to be steady to wing before their pointing instinct has commenced to show. You are more than likely to go to extremes in your impatience to steady the young field dog. You will either make him overcautious or develop him into a "blinker" (a dog that draws on point), and the moment any action on the part of the bird occurs he leaves it to come to you or shys from it. While these latter two faults are trying to the handler, there is no cure so good as continental contact with birds, a chase or so occasionally if the spirit incites him. Then the situation will be grasped like in the case of an old stager, when nature sees fit to bestow on him his full sense on game.

It is probable that a government fish hatchery will soon be established at Klamathon on the Klamath river. This station will be an important salmon egg taking point.

Drink Jackson's Napa Soda.

A MIXED BAG IN THE WESTERN TRANSVAAL.

[By "Duke of Wallaby"]

An account of a couple of days' shooting in the Western Transvaal may be of interest to those who have not shot in South Africa, and may, perhaps, remind those who have of sunny days on the veldt after buck or birds. We started early one morning, K., myself and a Kaffir boy, and a pointer, intending to camp out for two nights on the veldt and try conclusions with the partridge or koorhaan at Droogkraal, where there is some good bush country which had not been disturbed or shot over for several seasons. A roomy Cape cart carried us and our sleeping bags comfortably, and after an outspan at a pool of water about half way, we reached our destination about 4 o'clock in the afternoon. Several koorhaan and some sand grouse were seen as we drove along, and three of the former and seven of the latter made us feel quite independent of the small supply of tinned meat we had brought with us. We chose a sheltered spot for our camp on the lee side of a large rock at the edge of some thick bush, which covered the slope of some rising ground. After a meal of roasted grouse, bread, jam, and coffee, we crawled into our sleeping bags and had a last pipe before going to sleep. Overhead the sky was studded with stars, and a full moon made every bush and rock stand out clear and distinct. In the kopjes behind us a few jackals were making the night hideous with their howling, but driving all day made one very sleepy, and the next thing I remember was hearing K. call out to the Kaffir boy to make coffee. Bitterly cold it was getting into boots and gaiters, with the ground white with frost, and a pink glow on the horizon telling of the sun which would soon make rather hot work. At the edge of the bush the partridges were calling, so we quickly buckled on our cartridge belts, and, getting to windward, worked Shot, the pointer, up toward them. Ranging wide he found the scent and pointed, but the covey bad run, and after drawing on several yards they rose in some thick cover, and all got away untouched except one, which K. killed with a neat shot as it passed between two bushes.

The sun was now up, and the koorhaan were calling on the flat ground along the edge of a dried-up spruit. Through some old mealie lands we passed, getting some sporting shots at sand grouse as they flew over us to feed on some patches of old lands half a mile away. Then we had a brisk five minutes with some koorhaan, which got up out of some thick grass on the banks of the spruit. Four got up and we secured three; then a hare whisked out of some grass in front of K., who bowled her over neatly. Our shooting pockets were rather full and heavy, so we left the game by a dead thorn tree, and made a beat toward the foot of a stony kopje. Nothing was bagged except a quail, which got up in front of the dog and afforded me an easy straight-away shot. Then back to breakfast, getting a couple of blue pigeons from an old kraal on the way. After breakfast we sat in the sun and smoked, and talked of sport in other lands, and pictured our friends in the Livermore hills with a brace of setters working on the quail. The afternoon was spent rather fruitlessly among some stony kopjes, where we saw various steinbuck and duiker, but bagged only three koorhaan and some sand grouse. The old dog was about tired out when we reached camp that evening and we were all quickly asleep after the evening meal.

The following morning saw us early afoot, as we had a large belt of brush to work, and a narrow kloof between two kopjes which promised to give us some good sport. We had a great day; old Shot found bird after bird, the powder was straight and the Kaffir boy was twice sent back with game. We lunched at a ruined house which had once been a store, but had been destroyed during the war, and from thence we moved up the kloof. Sand grouse were numerous, and an occasional partridge was added to the bag, although the shooting was not so good as in the morning. In some thick grass about waist high Shot stopped dead and pointed. K., who was near the dog, came up to him, and, seeing something move in the grass, fired, and out came a lynx. He passed me at about 10 yards, and a charge of buckshot bowled him over like a rabbit. It was a fine beast, with very good fur, and had been making a meal off a spring hare which he had caught the night before. We routed out a Kaffir from a kraal close at hand, who in return for the meat skinned the animal and took it to our camp. Turning homeward we worked through some thick grass, where K. said he had seen some steinbuck, and, sure enough, three got up and crossed me, and I got the buck with a lucky shot as he passed through an opening between two clumps of thorn trees. From my diary I take the following figures, giving the bag for the two days: Seventeen sand grouse, 11 koorhaan (lesser bustard), 10 partridges (francolin), one guineafowl, three quail, three hares, one steinbuck, two pigeons, one lynx. The following morning we drove back to town with enough game to vary the monotony of our friends' and our own meals for several days.

Hungarian Partridges Liberated.—This week Deputy Fish Commissioner Thos. K. Duncan turned loose, near Clayton, in the Mount Diablo foothills, two dozen Hungarian partridges. The birds were liberated on the ranches of R. C. Terry and D. Marchio where they will be protected and given a chance to propagate, and were supplied by the State Fish and Game Commission and came from the State game farm near Haywards.

AMERICAN GAME BIRDS DISAPPEARING.

As an argument for the continued protection of Coast shore birds the following account, which pertains to conditions existing more in the Middle West and East than in our territory at present, is worthy of attention, particularly so at this time, for if we are not mistaken changes in the game law, for the worse, will be advocated at the coming session of the State legislature for a more open season on shore birds.

Those who are interested in game protection are aware that while most of the states carefully protect such game as the partridge and deer, the law for preserving migratory birds, ducks, woodcock and snipe, plover, etc., has always been inadequate. The result has been a far greater destruction of game of this class than the annual increase could replace.

One of the best known of them is the wood duck, which has perhaps the most beautiful colored plumage of all North American birds. One of the chief reasons why it is so fast disappearing is that instead of going far north to breed it breeds in the temperate regions within the limits of the United States. The chance of so conspicuous a bird as a duck being able to raise its brood in safety is in most parts of the United States a remote one.

The wood duck is not the only species of wild duck that is sadly in need of greater protection. The famous canvashack has been almost entirely driven away from its former haunts in Chesapeake bay, and is becoming rare in the other parts of the country where it was formerly found in abundance. It appears never to have been common as far east as New England. The ruddy duck is also fast becoming rare, both because it is not as wary and clever in avoiding its enemies as most of the other species and because its flesh is of unusual excellence. One American species of wild duck has been absolutely exterminated although in the first half of the last century they were often seen in the New York market. A fine mounted group of these birds, which it would now be impossible to duplicate, may be seen in the American Museum of Natural History.

Of all the important families of game birds, none are vanishing faster than the plover and snipe, popularly known as shore birds, bay birds and by other names. In some states they get no protection whatever; in many others the closed seasons are arranged to cover only or chiefly the seasons when the birds are absent at their breeding grounds in Arctic America.

A few are still to be found—perhaps one bird where thirty years ago there were fifty. On the Virginia and Carolina coasts and further south they may yet be found in somewhat greater numbers and at some points in the interior and western states some kinds are still abundant, but among the American species of these families, there are some that are already growing rare and probably not one that is holding its own.

One well known game bird of this kind that is disappearing from the eastern section of the country is the upland plover. Though called a plover it really belongs to the snipe family. As its name indicates it is not a bird of the seashore and marshes, but of the hills and pastures.

It formerly nested in such situations throughout a large part of the United States, but has become rare in most parts of the east, especially in New England, where it has become a bird of the past. The story of its disappearance in this section is being repeated in the states farther west.

In the last ten years there has been an even more pronounced decrease in the numbers of another bird often found in similar situations, though of different habits. This is a true plover, the golden plover. The golden plover has disappeared absolutely from large sections of the country where up to a few years ago it was to be found in the proper seasons in hundreds or even in thousands. This bird breeds only in the far north, and winters in South America, going even to Argentina and Patagonia. In the United States it occurs only as a migrant in the spring and fall. In the spring it travels northward through the inland states and is not found on the Atlantic coast. In the fall its southward migration until recently took place by both routes, but now it is very rarely found on the coast and has become much less common in the interior.

In the case of the large snipe family a dozen or more species of which are, or were, game birds of more or less importance, the outlook is hardly more promising. At least one of them, which was formerly not uncommon along the Atlantic coast as far east as Cape Cod, though never as numerous there as farther south and west, is already practically extinct except in some States where it has the benefit of protective measures, but so great has been the depletion and lack of protection that no attempts now even if taken promptly are likely to save it. This is the largest and finest species of the family, the long-billed curlew, or sickle bird.

A much more familiar species, the woodcock, is now often mentioned as threatened with extermination. There is, however, every reason to expect that if it receives protection promptly it may be preserved.

Another curlew, the Esquimo curlew, was often found in company with the golden plover during the migrations. In all its former haunts this species is now a very rare bird, and is believed by some to have been already exterminated. Both of the two species of godwits are now rare in most places where they formerly occurred and the total extermination of one of them, the marbled godwit, is not likely to be postponed for many years.

The red-breasted snipe, dowitcher or brown back, as it is variously called, is another vanishing species. It is the earliest of the snipe family to appear

along our coasts in the fall, and is the gentlest and most unsuspicious of all the larger species of the family; in fact it should never be treated as a game bird at all, for it requires no skill to kill it. There is another snipe, the knot, of about the same size as the dowitcher and like it, having a red or reddish brown breast when in good plumage, but distinguished by the much shorter bill. It is slightly more wary than the dowitcher, but is being fast exterminated in the middle West.

The willet has totally disappeared from many regions where it was formerly common. It is a fine large bird for a snipe, inferior in size only to the curlews and godwits among our species. Yet it is far from being as wary a bird as one of its size should be, and moreover, it breeds largely in temperate latitudes, instead of in the far north, and is consequently exposed to danger during the breeding season as well as at other times.

COUNTY GAME LAWS ATTACKED.

A press dispatch from Porterville this week brings up again the much vexed question as to the powers of county boards of supervisors to shorten the open seasons on game.

That all game laws which conflict with the general State regulations, and which were passed by county boards of supervisors subsequent to 1902 are unconstitutional is the opinion of District Attorney McFadden, set forth in a motion made by him to dismiss cases brought against J. D. Thomas and W. T. Campbell.

Campbell and Thomas were arrested on complaint of up-country cattlemen for having shot deer prior to September 1, this date being set in an ordinance passed two years ago by the Tulare county supervisors and which ordinance shortened the season established by the State, by 30 days.

This decision is a disappointment to members of the Porterville Fish and Game Protective Association and the Tule River Game Association, the members of which waged a contest extending over several months before the supervisors finally passed the law.

As it is said that the two years of short seasons have resulted in an almost unbelievable increase in the number of deer, the club members have prepared a petition addressed to Assemblyman Mylie asking him to introduce a bill at the next session of the legislature providing that deer may not be shot until after September 15.

NOT IN CALIFORNIA.

Its killing work but great sport, states an Eastern writer in the following descriptive note of Eastern duck hunting conditions:

The elementary details of the duck shooter's outfit are familiar to all who have patiently braved the blustering weather in a blind, watching the waterfowl from dawn to sunset. Duck shooting demands that you adopt high waders, heavy rasping flannels, visored caps with ear-flaps, corduroy trousers and gloves. These and the host full of decoys seem essential to complete success for usually—and in some localities always—they are the proper things for the duck hunter.

His alarm clock scares him out of a troubled sleep and routs him from a warm bed at 3:30 a. m. of a nasty, storm-tormented morning, and he rigs himself hastily in flannels and canvas and corduroy and rubber that he may live through the pleasant work on the choppy waters, with only the sleet and the north wind, and occasional streaks of ducks to keep him company.

I have often gone through a day of such tortures and only duly considered it great sport—after the flight was over and the ice driven out of my system by the blazing log fire of the clubhouse, and something else with hot water in it. A good supper and an easy chair before the fire put a fellow in a contented humor, even if the flight was thin and the weather thick.

It honestly is killing work hreasting the icy blasts, freezing slowly from fingers to toes if the fowls are not plentiful enough to keep the guns in active play, and finally doing a numb-fingered stunt at gathering ice-covered decoys into a hounding boat. Sometimes the duck shooter has balmier weather and suffers less at his chosen sport, but not often.

Call Of The Wild.—A once tame greyhound, owned by Martin Smith of Sandy, Ore., says a Portland exchange, has become wild and now lives with the coyotes it formerly chased in the surrounding hills.

It has been three years since this greyhound heard and responded to the "call of the wild," and it has never ventured back to his old home in Sandy except to come to the outskirts to steal chickens from hen roosts.

The companion of this greyhound is a coyote, and they have frequently been seen together running through the outskirts of Sandy. Several persons have tried to get photographs of the strange couple, but have failed.

The greyhound has lost all desire to return to his former home, and has become even more wild than his companion. The animal has quite a history, having been raised from a puppy in the neighborhood. One day he disappeared from his home and several weeks afterward was seen with the coyote, which has been his constant companion ever since.

Albacore fishing is reported to be excellent for a winter angling sport at Catalina island.

INDOOR CIVILIAN RIFLE CLUBS, 1910-11.

In reply to a circular letter, from the National Rifle Association calling for a vote on the conditions to govern this winter's indoor rifle shooting league, Secretary Albert S. Jones states that replies were received from twenty-seven clubs. These replies tabulated represent the following expressions of opinion:

In favor of retaining the conditions of 1910.....	3
In favor of using strictly military rifles.....	5
In favor of not using telescopes.....	7
Total not in favor of using telescopes.....	15
In favor of using telescopes.....	6
In favor of any sight, not telescopic, on the stock. 1	

In regard to the number on a team, expressions differ. Three or four voted for ten, about the same number for eight and the balance for five. A good suggestion was received from the Tacoma Club, that of allowing ten members to shoot and counting the best five scores. This, we have decided to do. The number shooting will not be restricted to ten, but any number from five to ten may shoot. It is thought that this may be instrumental in keeping a large number of club members interested in the work.

The following will be the conditions to govern the shooting in the 1910-11 indoor league matches and will not be changed or deviated from in any respect. Clubs entering the league will, therefore, bind themselves to strictly adhere to these rules:

Team.—Any number of men up to 10. The five best scores to count for the team.

Distance.—75 feet.

Number of shots.—20 each man. Four targets to be used, five shots on each target.

Target.—The N. R. A. official gallery target (1 to 10 count). Forty official targets will be furnished free by the N. R. A. for each match. These targets will be marked for identification and no other targets will be received for record. These targets will be sent to the N. R. A. judge and will be retained under his control before and after the shooting.

Position.—Prone. No part of extended arm to touch the ground except the elbow. No artificial support to any part of the rifle except the sling.

Rifle.—Any .22-calibre, weighing not over ten pounds.

Ammunition.—Any.

Sights.—Any, in front of the firing pin and not containing glass. Telescopes not allowed.

Trigger pull.—Not less than three pounds.

Time allowance.—Five minutes will be allowed for each string of five shots.

Preliminary practice.—No member of the team to fire more than five shots preliminary to firing his scores in the match on the night of the contests.

Judges.—The Judge appointed by the N. R. A. or his representative will act as executive officer at each contest. He will see that all conditions are lived up to; weigh the rifles; test the trigger pull and measure the range. Special care must be taken to see that five shots, no more or no less, are fired on each target. He will certify to the scores and take charge of the official targets before and after the contest and forward the same to the Secretary of the N. R. A. at the completion of each match.

Matches when Shot.—All official targets for each match are stamped "For the week ending—."

The scores may be shot any time during the week for which the targets are stamped, providing the results of the shoot are in the office of the N. R. A. by not later than Friday night of each week. This is absolutely necessary so that they can be compiled and given to the press associations on Saturday. Arrangements have been made with "Arms and the Man" whereby the result can be telegraphed in at "night press rate" (which must be prepaid). If no scores are received up to Friday night of each week from clubs competing in the league, they will receive a zero for that week's shoot. Scores published in the daily papers compiled from advance information will be unofficial. Bulletins of official scores will be furnished to shooting periodicals weekly.

The schedule for the season's shooting will be made up on Monday, December 5th, on a basis of the number of entries received in the office up to that date, and the first match will be shot the week ending December 24th.

To make conditions to suit even a majority of civilian rifle clubs in this country is almost impossible, and to those clubs that are not in accord with conditions finally drawn up, we would state that, first and foremost, the aims and purposes of the National Rifle Association of America is to promote military rifle shooting and make our citizens familiar with the military arm so that they will be efficient volunteers in case this country is forced into war.

Pursuing our work along these lines we believe that in all matches the strictly military rifle should be used, but as the time is not yet ripe to enforce such rules, we have met the sporting rifle shooters half way. Some of the clubs requested permission to use the military rifle with reduced ammunition in these matches. Our reply to this is that it would be manifestly unfair to allow a .30 caliber bullet in competition with the .22, as the increased diameter of the bullet would naturally favor a higher count.

Set triggers and sights on the stock are of little practical value as aids to marksmanship, either military or sporting, and nothing would be accomplished by adopting either. The telescope has its value for indoor work, but was objected to by most of the clubs on the score of extra expense.

Targets such as are used in the league matches may be secured from the N. R. A. at a cost of \$2.50 per thousand and in lots of one thousand or more.

Drink Jackson's Napa Soda.

GOSSIP FOR SPORTSMEN.

Striped Bass Angling.—The expected pioneer trip of local saltwater anglers to the Napa creek fishing grounds did not materialize last Sunday word was received by Chas. Kewell that the creeks and sloughs near the "drawbridge" were muddy and consequently not in favorable condition for either bait or spoon fishing.

During the week Al Wilson and Boh Sangster made a launch trip to Napa creek. A report was current that two large bass were caught by Wilson on Tuesday in Fagan slough.

A large gathering of rodsters visited Wingo last Sunday. The largest fish reported, a 36-pounder, was taken by Chas. Bouton, who also caught a 12 and an 18 pound bass. E. Malsbury's bass weighed 28½ pounds.

At San Antone about 15 boats were out, but not over a half dozen fish were caught, none over 6 pounds in weight.

The striped bass is a fish apparently of a decidedly roving disposition, if the presence of the bass in various localities during the past six months is any guide to go by. Recently the waters of Carquinez straits from Selby's up to Port Costa and Benicia seemed to be the best resorts for indulgence in the sport of striped bass angling. Prior to this, the San Pablo bay shores off Rodeo and San Pablo had a brief spell of fairly good fishing. During the interim several good catches were made in Tiburon lagoon. At Point San Quentin there was a spasmodic indication that anglers would meet with success in those waters. San Antone and Schultz sloughs were on the fishing map for short intervals, as were the sloughs near Wingo station. But with all of these fishing grounds the continuance and regularity of results has been intermittent. Raccoon straits and the Marin shores as bass trolling grounds have been barren of striped bass now for several seasons past.

Napa creek and sloughs in the vicinity of Napa City have for several months past afforded fine striped bass fishing to numerous anglers. While the sport has been more or less inducing for seasons past, the present run of fish is apparently a record one.

Fire Chief C. F. Oterson of Napa, who is an ardent angler, in writing to J. B. Kenniff, gives out the information that fishermen who go to Wingo station should take the course "out toward the bay, instead of up the slough. Follow the first slough that runs toward Napa. At the mouths of all the smaller tributary sloughs use a No. 5 Stewart or Wilson spoon, with a light sinker attached to the leader. Row the trolling boat rapidly and keep 'teasing' the fish with the line, that is, giving the line frequent jerky motions. There is a big difference between dragging the spoon through the water and 'teasing' with it. And this counts here."

The fishing season for striped bass runs from July 1st to about January 1st, and is fully believed to be favored by the fact that net fishing in the Napa creeks and sloughs is prohibited.

Chief Oterson intimates that if local anglers feel disposed to put up a club-house or shacks near the Santa Rosa drawbridge on Napa creek, favorable arrangements can readily be made. This location is in the center of the fishing grounds. Napa anglers are not inclined to be exclusive, and "are glad to see all sportsmen enjoy a day's good fishing."

According to William West of Napa, a prominent disciple of the sport, whose presence among the Wingo levee trotters has not been evident for some time past—and for good cause—the sport around Napa has been generally excellent. The fish, however, are uncertain in their haunts, shifting from place to place. One day fishing in Fagan slough will be good, the next day the fish have either swam elsewhere or else the usual lures are not inducing. One day a catch of ten fine bass occurred, shortly following but two fish were taken. At another locality, in Napa creek, from one to two miles below the drawbridge, between seventy-five and eighty striped bass from six to thirty pounds in weight were caught one recent Sunday.

In Huichica slough, near Sonoma, on some days many fish were landed. In the Stretch slough the trolling spoon is the best killing lure. This latter water is nine or ten miles from Napa, the angler's starting point, "Bentley's wharf" being a mile or more from any railroad station. Either of these fishing places can be readily reached by a launch or a long pull in a rowboat. Boats for hire, however, are few, if any. Private rowboats and duck hunting craft are plenty. The shooting boats are not suitable for fishing.

The train to Santa Rosa via Vallejo will land anglers at the "Napa drawbridge" about 10 a. m., returning at 4:15 p. m. This bridge is within easy reach of Fagan slough. A few boats can be hired at the "drawbridge."

Both Napa creek and Fagan slough have been clear up to last week. Huichica slough has been roily by reason of the high tides. This slough clears rapidly, however. The best results with the trolling spoons are obtained when the water is clear. In Fagan slough bass have been caught with both spoons and clam bait.

Conditions at Benicia recently were not favorable for striped bass fishing, the water being very muddy. Few fish were taken taken by E. Cunningham, J. I. Uri, D. Wolff, F. Messenger, J. White and other fishermen. At Port Costa B. Brockman and son landed four bass.

Ducks Seek Ocean Refuge.—Passengers on the boat from Sausalito Thanksgiving Day, when the southwestern came up in full force about 2 o'clock in the afternoon, state big flocks of canvasback and bluebills came in through the Golden Gate seeking shelter in lee coves of the bay shores. These birds have been loafing outside on the ocean for two or three weeks. Coast vessels making port from the north report big flights of wild ducks down the coast for about ten days past.

Stormy weather on the bays will cause the ducks to seek a haven in the creeks, ponds and sloughs of the marsh sections, mostly the deep water ducks. Sprig, mallard and other varieties will scatter to the interior districts.

Last Sunday thousands of ducks were noticed off the Bodega bay shores. The birds were moving up and down all day. Will J. Golcher and C. W. Golcher shot limits, mostly widegame at the Salmon creek lagoon. Quail limits were also shot on another part of the Salmon Creek Gun Club preserve.

Canvasback Shooting.—For the first time this season canvasback shooting prevailed two weeks ago on Petaluma creek. San Pablo hay has been covered with ducks for several weeks, but they were wise enough to stay out in the open water most of the time. Henry Klevesahl, E. Klevesahl and Fred Herring shot good strings of canvasbacks near Reclamation.

The birds are working in to the southern portion of San Francisco bay and excellent "sculling" has been enjoyed for a week past by Alviso and San Jose gunners.

Poaching.—Near Los Banos the club preserves are, it is reported, systematically poached upon by "bull hunters," men who shoot for the market and use a steer or horse, behind which animals they work up to the ducks, and when the opportunity for a big pot-shot offers the four-bore swivel gun is discharged, sometimes killing fifty or sixty birds at a single discharge, besides wounding many others.

The poaching "bull hunter" is evidently an individual to be handled gingerly by the gun clubs. One club recently secured an injunction against a market hunter, one Jeffreys, but the writ has not been served and Jeffreys pursues the even tenor of his duck slaughtering proclivities.

Various gun club buildings and club houses have been, in the past, burned down by incendiary means, it developed. It was believed that market hunters or their friends knew something about the damage done. One market hunter, who had been arrested a season ago, was suspected of setting fire to property which caused a loss of \$19,000 to the owners of the land. This act of reprisal included the destruction of an immense hay stack valued at \$10,000.

At Gustine last week Judge Meredith fined M. Amoral \$25 on conviction of shooting without a license. Amoral appealed the matter, by reference, to the State Attorney-General. The ruling, of course, was against the defendant, who refused to pay, claiming the fine was excessive. On the matter coming before Judge Meredith with a refractory coloring the fine was increased to \$100.

Holiday Trap Shoot.—At the Los Banos blue rock shoot Thanksgiving Day, premier honors and the principal purse prizes were won by San Francisco shooters. Lon Hawhurst shot high professional average, 181 ex 200; Ed Schultz 174, Pete McRae 172, were first and second amateur high average. Billy Varien of Pacific Grove broke 170. The Selby trophy was won by Fred Faulkner 19 ex 20. W. W. Sears won the DuPont bronze trophy with 19 out of 20. Dick Reed managed the shoot and everything ran smoothly. W. W. Terrill, Fred Willet, H. E. Poston, Clarence Ashlin "also ran." A three-day duck shoot kept the city shooters busy until Sunday following.

Illegal Nets Destroyed.—The collection of nets that Deputy Fish and Game Commissioners Armstrong of this city and Moore of Napa have captured during the past year, and condemned by the courts as being of too small mesh, set nets, etc., states the Vallejo Chronicle, were hauled to the outskirts of town one day last week and destroyed. The estimated valuation of the nets was approximately \$4000.

Deputies Armstrong and Moore should be highly commended for their untiring efforts in arresting the market fishermen that have no respect for the laws of the State whatsoever, their ability in capturing these lawbreakers places them in a class by themselves, when it comes to patrolling the water in the vicinity of Vallejo.

Ducks and Geese Slaughtered.—Despite the rain two weeks ago, the soldiers and others stationed at Fort Stevens, Ore., reaped a harvest of helpless, wild fowl. The wild geese, in their southward flight, after passing Washington's forests and the wide stretches of the lower Columbia, alight for rest on the sand flats on the fort side of the jetty. They stop, exhausted, and are killed by the score. Ducks were equally numerous, consequently post families are surfeited with a supply of wild game. Strict orders have been issued by the commanding officer, Colonel Foote, restricting the limits of the game area and prohibiting outside sportsmen, unless by special permit, from taking advantage of the unusually favorable local conditions.

Drink Jackson's Napa Soda.

TIMELY SUGGESTIONS.

Now that the time for the convening of the State legislature is near at hand suggestions for changes in the fish and game laws are being voiced by many interested sportsmen.

Deputy Commissioner M. A. Carpenter of Yuba City, and a zealous official in his district, is quoted here on several material topics that have the merit of utility and consistency:

"We have certain sections of the fish and game statutes we do not need, for instance the one forbidding the use of salmon eggs for trout fishing after the daily catch is limited to 50 fish or 25 pounds and the manner of fishing designated as hook and line only, each trout not to exceed five inches. We need a law enabling officers to enforce the laws, the duck limit for instance.

"It is also absurd that an officer should be forbidden to go upon lands where hunting is indulged in, by the owner or tenant of such lands, Cottontail rabbits should be protected during the season of propagating, and the meadow lark should be unprotected at least six weeks out of the year, prior to the opening of the dove season, which is a month too soon. Put a bag limit of fifty or thirty-five birds on larks and have the sportsman limber up their artillery while waiting dove shooting, thus thinning out the lark against which so much is said by the farmer. I would advocate an act raising the minimum penalty for unlicensed hunting on the part of aliens or non-citizens from ten dollars to thirty-five dollars.

"Ten dollars is sufficient for one required to pay but a dollar for his license, but an alien oft times finds it cheaper to pay a minimum fine than to procure the twenty-five dollar permit as the present law stands.

"An automobile party often returns from a dove hunt and is hailed by the deputy. Unless armed with a search warrant or other document the driver may turn on steam and whiz past the officer rather than expose a too-full bag and pay a fine, while the lone driver of a buggy or other horse vehicle could not escape if so inclined. Officers should have the right of search for such conveyances.

"Holding membership in any gun club by a person not possessing a hunting license, should be made a misdemeanor. There is such a case in this section. The man belongs to a gun club but having no citizenship papers prefers to be constantly on the alert for the game warden, rather than pay the twenty-five dollars for a hunting tag.

"There should also be a law against employing men to hunt for market at monthly or weekly stipend. Every market hunter should receive the proceeds of his labor himself.

"Twenty-five ducks per man is none too many at the present rate of propagation and increase, if the enforcement of this limit law is made possible. Considerable prejudice exists against the salmon law, because fishermen below Sacramento (tide water) may take salmon a month earlier than people who reside along the rivers and streams of the interior. We should strike an average in such cases. Make the close season six weeks instead of two months and when it is raised let it be open for everybody."

WASHINGTON GAME LAW.

The new game laws drafted by the State Game Commission will prohibit the bounding of deer and change the open season from October 15 to December 31, instead of from October 1 to November 30, according to the present laws in vogue. Each hunter will be limited to one deer in one week or two during the entire season.

The grouse season, according to the new bill drafted, will open October 15 and will close December 31. The quail season will be the same and the bag will be limited to 15 in one day or 30 for any one week of shooting.

According to the new laws, the water-fowl season will open September 1 and close January 15. The limit on water-fowl will be 20 for one day or 30 for one week.

It will be unlawful to hunt deer on any island in the waters of the State, according to the new law. Heretofore, it has been permissible to "still" hunt on islands, but the use of dogs was prohibited.

Under the new laws, \$50 will be paid for each cougar, being \$30 more than heretofore. The gray or timber wolf will also draw a bounty of \$50, the wild cat \$7.50 and the coyote \$5.

Bear Stops Auto.—While enjoying an automobile ride with some lady friends one evening on the Douglas City road, Trinity county, W. A. Goetze found the road blockaded by a big black bear, which stood up on its hind legs as the auto hove in sight around a curve on the grade, defying the machine to approach. When Goetze swung out to go around the animal the machine struck a rut and broke off the front wheel. The screams of the women just at this juncture probably frightened the bear, for he beat a retreat, striking off down the side of the mountain. Another auto happened along and took the party to town.

Sacramento sportsmen are now having a pleasing lunings on northern ducks.

Raisin City Gun Club members have recently enjoyed the opportunity of shooting numerous duck limits.

The Herbert Stock Farm, Denver, Colo., owns a very promising three-year-old Peter the Great colt. He arrived at the Denver meeting on Monday afternoon after having been shipped the previous Saturday from Lincoln, Neb., and on Tuesday started in the three-year-old trot, which we won in straight heats in 2:21½ and 2:21½. On Saturday he was started in the 2:30 trot against nine aged horses, including some with records as fast as 2:16½. He won the fourth and fifth heats in 2:19½, distancing all of the horses but one. Since the Denver meeting he has worked miles in 2:14½ and has shown two-minute speed in rushes. He not only is a fast, level-headed race horse, but he is a show horse as well, for at the Interstate Fair of Colorado, he won first in the three-year-old stallion class, and first in the grand champion class, defeating a large field of good stallions from California, Iowa, Nebraska and Colorado. He is well bred on the maternal side, his dams being by Onward, Guy Wilkes, Sultan, etc.

TROTTING HORSE BREEDERS MEET.

The fourth annual meeting of the American Association of Trotting Horse Breeders was held at Madison Square Garden, New York, last week, with a very large attendance. The meeting was called to order by Senator J. W. Bailey, president of the association, and most of the session was given to the report of Secretary H. K. Devereux.

The report showed that financially the association was in more prosperous condition than formerly, as, while last year there was a deficit of nearly \$600, on November 1, 1910, it was wiped out and there was a surplus of nearly \$200.

The membership list on the first of November had reached to \$45, and the total dues paid amounted to \$4286, and more to be added to it when all dues are paid. The regular membership fee is \$5, each member to pay an annual membership fee of \$2, which is used for the maintenance of the association and its running expenses.

He gave in detail all amounts received for the different futurities, expenditures, payments to winners of No 1 stallion and No. 1 matron stakes this year; also all moneys received for other colt stakes and turned over to the treasurer as trust funds to be deposited by him in the interest of different stakes.

Mr. Devereux's report shows that the total amount received for the Matron Stake raced at Empire City track in August and Championship Stallion Stake raced at Lexington in October amounted to a total of \$20,596, which was distributed among winners of trotting and pacing divisions.

The total value of the Matron Stake was \$3441, of which \$6024.50 went to the trotting divisions, \$1916.50 to pacers and \$500 to two silver trophies presented to nominators of the dams of winners.

Money division for trotters was as follows: Colorado E., \$3012.25; Emily Ellen, \$1506.13; Native Belle, \$903.67, and Eva Tanguay, \$602.45.

Winners in the pacing division were Leftwich \$1149.90; Nell Gentry, \$479.13, and Tommy Tight, \$287.47.

The Championship Stallion Stake was worth a total of \$12,155, of which \$11,655 was distributed among winners of both divisions and \$500 set aside for the two silver trophies.

Of this amount trotters won \$8804, as follows: Grace, \$4402; Native Belle, \$2201; Lula Arion, \$1,100.50, and Emily Ellen, \$1100.50.

The pacing stake was worth \$2351, of which Nell Gentry won \$2138.25 and Leftwich \$712.75.

The amount on deposit to the credit of coming futurities was \$13,209 on the first of November, divided as follows: Championship Stallion Stakes of 1908, 1909 and 1910, respectively, \$7890, \$3735 and \$865; Matron Stakes of 1908 and 1909, respectively, \$4165 and \$555, which added to the amount paid in for stock, worth \$5 a share, by 845 stockholders, makes the total liability of the association \$22,595.

Hon. Sterling R. Holt, of Indianapolis, treasurer of the association, read a brief report, giving dates and amounts forwarded to him from the secretary's office, which agreed with the estimate presented by Mr. Devereux.

After both reports were adopted by a unanimous vote, Mr. Devereux told the members present what had been accomplished by the committee appointed at the last annual meeting to look after matters pertaining to transportation of horses at all times, but specially during the racing season.

He said that on account of the members of the committee living at distant points no meeting of a full committee had been held, but efforts made so far has convinced them that the express companies will assist horsemen if the latter can secure some concessions from railroad managers.

He showed what difficulties they have experienced with transportation managers on account of a lot of red tape, but hoped that before the next racing season opens some concessions will be obtained.

President Bailey, upon a motion, selected Messrs. Tipton, Devereux and Burgoyne a committee to recommend such changes in the list of board of directors as they saw fit. One change, however, was made in the list, which contains fifty names. F. E. Marsh, an Illinois member of the executive committee, was replaced by J. Howard Ford, of Stony Ford, N. J.

After the close of the meeting the board re-elected the officers, with H. K. Devereux as secretary.

That great trotting stallion and sire of early and extreme speed, Jay McGregor 2:07½ will make his home in the future at the Danforth Farm, Washington, Ill. Jay McGregor was a mighty race horse the season he raced so successfully down the Grand Circuit and since he has been retired to the stud he has transmitted his great speed to his sons and daughters; that his blood breeds on is shown by the fact that one of his daughters produced the world's champion three-year-old, Colorado E.

The light harness horse breeder, be he the proprietor of an extensive stock farm or the owner of but a single good mare; the trainer and owner; the men engaged in the many varied lines of trade and commerce directly and indirectly connected and influenced by the trotting horse industry, and last, but not least, the man, and there are many thousands of him, who loves the speed horse and the royal sport he affords, have every reason to feel jubilant over the outlook for a bright and prosperous future for the trotter and pacer.—American Sportsman.

THE FARM

THE UNPOPULARITY

OF THE BIG STEER.

No longer is the portly hullock popular. Just a year ago he was riding on the crest of a wave of popularity. The more beef he carried the better killers liked him. But popularity is ephemeral and a buyer who now took a load of cattle weighing upwards of 1500 pounds before the fall had been dissipated would be inviting severance of his name from the pay roll.

There are several reasons for this radical reversal of market form. One is that a year ago prime bullocks were an unknown quantity in the market. There were a few, but the majority were counterfeits. This season quality and weight in combination have been common and buyers assert that heavy steers appraised at \$6.75 to 7 recently were better than \$9.25 stuff a year ago. At any time a few too many of this kind lower prices and October and November runs demonstrated that many feeders had overstayed a good summer market by shooting at the fall target in confidence that big steers would enjoy at least some of the popularity that came to them a year ago.

Even New York Kosher buyers have been rapping the big steer. They accuse the retailer of at least partial responsibility. Marketmen have been holding up the price of good beef because since the drop in live cattle that stuff has shown a wide margin of profit. The consumer to get away from cost has demanded a smaller package, hence the call for handyweight 1,100 to 1,550-pound steers and yearlings. While 850-pound yearling heifers have readily elicited 6½-cent bids, finished 1,700-pound steers have had difficulty in getting the same money, minus the fill the heifers carried, by reason of going to the scales promptly.

Feeders are naturally disgusted with the big steer and this season's demand for fleshy feeders, which brought killer and beefmaker into such ruinous competition to the latter, will be missing next spring, as most operators take their cue from what happened the previous year. A general determination exists to cash in earlier next year, which means a radically different supply and of course a different market.

Year in and out the feeder who markets handyweight stuff fares best. The big steer may have intermittent popularity, but fitting him has an element of chance that only those who can afford to play for an average can afford to take.—The Breeders Gazette.

That the Hereford breed of cattle has made great progress in the past twenty years no one will doubt, and the appreciation with which they are regarded by the American beef producer is the strongest evidence of their worth. This rise in the popularity of the Hereford is but what was naturally to be expected by one who was familiar with the quality and history of the breed.

In the first place, they are one of the oldest known breeds of English cattle. They have been bred to a uniformity of type and purpose for a long period, viz: for a strong constitution, the production of the best quality of beef, also early maturity and economy of production—and they are preeminently a grazing breed. These were the ideas kept in view by the early Hereford breeders in this country.

TWO NOTED COWS AT NATIONAL DAIRY SHOW.

Since the Third Day Show it has been customary to have one or more cows with high yearly productions on exhibition. This year Dairy Maid of Pinehurst, a Guernsey, was the center of attraction. She is the champion three-year-old cow of the world. Her record for one year is 14,562 pounds of milk, containing 800 pounds of fat, equivalent to 1003 pounds of commercial butter. This cow is a beautiful as well as talented animal and capable enough to enter the most fastidious cow society. Her owner is W. W. Marsh, Iowa.

The other cow was a grade Jersey that produced in one year 11,446.6 pounds of milk containing 600.4 pounds of fat, equivalent to 700 pounds of commercial butter. This cow shows the value of a pure bred sire and what is possible for any good dairyman to accomplish. She is a splendid cow and has a conformation capable of doing a large amount of work. Her owner is F. W. Voorhees, Ia.

There is a town in Sweden which probably is the only one in the world that has the usual municipal expenses but no taxes. This is due to the fact that years ago it caused trees to be planted in every place available and laid down rules for judicious cutting and replanting. During the last thirty years it has received fully \$5,000,000 from the sale of timber, and the same rate of income is guaranteed as the intelligent propagation is continued. That is proof of the value of forest conservation. This country must follow the example of the old world and give the same care to its forest trees which it does to its orchards. Unless this is done timber in a very few years will be very scarce and the farmers especially will have to go back to mother earth for material for building mud residences.

Wheat is generally considered as the best grain for laying hens, but the old standby of corn is not to be sneezed at. Several tests between corn and wheat at the Massachusetts Station show eggs were produced at 25 to 35 per cent less cost, both in summer and winter, by rations consisting largely of corn and corn meal. Plymouth Rock pullets were used and showed rather more tendency to get too fat on the corn ration than on the wheat diet. Anybody who has fed chickens, knows a hen prefers corn to all other grains. When a mixture of grains is thrown among the flock, the hens invariably pick out the corn first; whether this was because the kernels were larger than the other grains or because they liked it better was hard to determine, but when experiments demonstrate that corn produces better results than wheat, then corn should be declared the best food for them. To offset the fattening propensities of corn, some other less fattening grains should be fed. A variety also is apt to give the fowls a better appetite. But the bulk of the food should be corn, corn meal and Kafir corn.

All indications forecast the horse in the ascendancy and is likely to continue so indefinitely. This is true of track, speedway, show ring, carriage, family, saddle, general purposes, and also heavy draft horses—in fact, all kinds except hobbled pacers. It has been proven that intelligent, good-headed horses can easily be educated not to fear automobiles and may be driven with safety on roads where automobiles are frequently met, provided the automobiles are driven at a reasonable rate of speed and give the horses a chance to turn out. The present scarcity of good horses will have a tendency to encourage farmers in the country to breed more extensively in 1911 than they have in 1910.

A TRIBUTE TO THE JERSEY.

Velancey E. Fuller, editor of Practical Dairyman, pays the following tribute to the Jersey cow:

"The charge has been laid at my door that because I admire and appreciate a dairy cow, no matter of what breed, that I have ceased to love the Jersey. Nothing could be further from the truth. I admire and love her. I believe there is no cow so perfect in type, so beautiful in udder, having the same tenacity in milk, who can average so high a percentage of fat and who will make as economical a yield of a hundred pounds of butter-fat as the Jersey cow. She breeds true to type as no other breed except the Ayrshire does. She responds to good care and requires it. Her globules of fat being large, the grain of her butter can not be excelled. Her butter remains firmer in heat than that of any other breed, her milk creams readily and there is a perfect separation between cream and milk. As a butter maker she is preeminent and in her symmetry of form and beauty she is the aristocrat of the dairy world.

DENATURED ALCOHOL IN SOLID FORM.

Cleveland Special Dispatch. A well-known Wheeling, W. Va., chemist has succeeded in producing chunks of denatured alcohol in crystal form by means of a small infusion of certain acids whereby crystals of an alkaloidal nature very closely resembling physiologically the effects of ethyl alcohol distilled from sawdust. The method employed and the results obtained are somewhat similar to the crystallizing of rock candy or that of Saccharine containing as it does 350 times the sweetening strength over that of cane sugar, so this alkaloidal crystallized alcohol contains many times the strength over the ordinary denatured fluid alcohol; they will yield 194 proof denatured alcohol with a greater heating and cooking power for stoves than gasoline, and it is absolutely non-explosive.

A sample can containing 50 solid cubes, 1 stove and the secret formula how simple it can be made at home, will be mailed to you, postpaid, on receipt of \$5.00. Address

DEPT. A, THE WOOD WASTE DISTILLERIES CO., INC., Wheeling, W. Va., U. S. A.

SAVINGS INVESTED IN REALTY.

Put your money in residential building lots. Be sure they are in improved sections. Buy close to a big city. Purchase early; don't let others make profits out of you. The greatest fortunes were made by realty investments. We will offer 1000 choice building lots on December 1st, at prices that will pay very handsome profits. Terms of purchase, \$25.00 cash per lot, balance in thirty-six equal payments. No interest or taxes during this period. If you die before completing your payments, a deed is given your heirs, without further cost. Size of lots, 25 feet by 120 feet and upward. Price of lots, \$75.00 and upward, according to location. By investing in land you own something for your money. Investments in stocks or savings accounts are under the control of others. We guarantee you a profit of at least 25% for the first year. Subscription lists are now open. By remitting us \$10.00 per lot, subscribers get first selections. The first 500 subscribers will also receive a credit of 10% on their purchase. Act now. Let us make money for you and protect your savings.

We want agents in your locality. Write us the names and addresses of some of your neighbors. Do it now. BUFFALO LAND SECURITY CO., Ellicott Sq., Buffalo, N. Y.

SAVE 208 SHAVES
\$20.80 a year. Also save the razor, your face, time and temper by using "3 in One" on the blade.

3 in One
keeps the blade keen and clean, by preventing surface rusting which is caused by moisture from the lather. Write for free sample and special "razor saver" circular.

Why not know the truth?

CAKED UDDERS.

We are approaching the cool, damp days of winter, when many farmers allow their cows to lie out on the cold, damp ground. This causes a check in the circulation of the blood in the udder, through which an enormous amount of blood passes. Such check is very apt to bring on udder troubles and garget follows.

It is much the best to prevent such troubles but, if they come, it is well to try the remedy used by the noted veterinarian, Dr. Peters, of the Nebraska Experiment Station. Here it is:

"I fill up the affected quarter with air. I do not probe in there with darning needles and other kinds of instruments, but I fill up this spongy organ with air, and it is like filling a sponge with water. If the udder is caked, you put in as much air as you can. Then you massage or work with your hand, and work that air all through the quarter and you can hear the bursting of those little vesicles—those little tubes. You can burst all of them in two or three applications of that kind, and you will generally restore the udder. I have treated several hundred very bad cases and I know it works all right, and any one of you can easily do it."

About the next surest investment after a government bond is a patch of thrifty alfalfa. During the growing season it is as bad as a family of eight kids and a washing about keeping a fellow at home, but with hay from three to six cuttings in a season and the hay worth from \$12 to \$20 a ton a fellow is compensated for having to stay at home. Another cause of the high regard in which alfalfa is held is that it is a soil enricher and not a soil robber.

Feeding horses as a commercial enterprise for market has become a great industry. Nearly all the agricultural experiment stations have conducted feeding operations and issued bulletins on the best compound rations for finishing thin horses for sale. In nearly every horse breeding community either the professional feeders or the general farmer who has a few surplus horses conduct special feeding operations as a financial enterprise.

For the first time the Columbian cattle were shown at the New York State Fair this year. This is a new dairy breed which originated in Otsego Co., N. Y., about 30 years ago. It was founded by selecting the best cow in the herd of the owner and breeding her to a line back bull who was the son of the best cow in a neighbor's herd. Constant selection for 30 years have served to fix the breed character and the breed is now established, all line backs. The largest herd is now on the farm of the founder of the breed, who is said to have many animals which produce more than 500 pounds of butter per year each. This new breed is said to be characterized by strong constitutions with great vitality and feeding capacity and free milkers.

"SAVE-THE-HORSE"

H. L. MURPHY, Perkins, Sacramento Co., Cal. Berkshire swine and Shorthorn cattle.

H. B. WINTRINGHAM, Middletown, Lake Co., Cal. Breeder of Tamworth swine.

FOR SALE—Two fine young Jacks, of the Black Spanish and Mammouth breeds. One two years old and one six years old. For particulars address P. W. Hodges, No. 416 Stanford Avenue, Oak Park, Sacramento, Cal., or call at State Fair Grounds.

FOR SALE.—Magnificent Black French Poodle of rare quality; 6 months old. Will make an ideal companion for gentleman or lady. Pedigree shows blood lines of famous English winner. Box 38, Menlo Park, Cal.

FOR SALE.—Standard-bred and registered stallion sired by McKinney 2:11½; one imported draft stallion. Pedigrees and photos furnished on application. Would consider trade on heavy stock, cattle or well-bred fillies. Address D. A. BAKER, Box 18, Hill P. O., California.

WANTED.—Standard Bred Trotting Stallion; about 15 hands; with very short hack; smooth blocky conformation; good feet and legs; color, dark bay, brown or black; from 3 to 7 years old; weight, about 1200 pounds. Will pay up to \$500, according to individuality. Send description and price, with breeding and photo, to F. A., Breeder and Sportsman.

FOR SALE.—Bay mare, Eleanor S., No. 50362, by Herbert, out of Pallantus, foaled May, 1906, is 16½ hands high, weighs 1100 lbs., in racing condition, sound and gentle.

Sorrel mare, Vivian, about six years old, was raced in Mr. Walker's stable, will be sold reasonable or let to good man on shares. PHIL COLLINS, Gonzales, Cal.

WANTED.—The services of a representative in California to look after our old customers and prospective buyers of our Modern Simple Tax-free Industrial Alcohol Distilling Apparatus, by special successful demonstrative methods for making Alcohol, Apple Jack, Aguardiente, Mescal, Tequila, Peach Brandy, Solidified Alcohol in Cubes, Fine Oil, Denatured Alcohol. Most modern simple 5 Gal. Still and all sizes to 500 Gal. daily Capacities. Good Salary and Commission. Address with three references, THE WOOD WASTE DISTILLERIES CO., Inc., Wheeling, W. Va., U. S. A.

FOR SALE.—Hawatba, dark bay mare, 6 years old, 15½ hands high; will weigh about 1140 lbs. Sired by Baron Bretto 39103, a son of Silver Bow; dam Silver Bells by Silver King 3622; second dam Only Hope by Hawk, son of Brigadier. This mare is in foal by a son of Clarence Wilkes. Hawatba is sound in every way, perfectly gentle to drive and handle and is a good roadster. She has had no work since a 2-year-old but at that time could step a mile in 2:58. Price \$225.

Amona L., a full sister to Hawatba, 5 years old, weight 1100 lbs., is a light bay mare very stylish and handsome. Is city broke and very gentle to drive, afraid of nothing. She has had a limited amount of work but has shown a mile in 2:20½, a half in 1:08½ and quarters in 33 seconds. Price \$300.

Red Devil, bay stallion, 5 years old, 15½ hands high, kind and gentle, suitable for anyone to drive, fears nothing. Sired by Baron Bretto 39103; dam Jeanette by Ottawa; 2nd dam by Snuff Box. A 2-year-old filly sired by this horse won the colt race at Marysville, July 4th. Price \$300. For further particulars address F. W. Kelley, Breeder and Sportsman, San Francisco.

KENDALL'S SPAVIN
CUREThe Remedy You
Can Depend Upon

No other preparation has done as much for the horse and horsemen. Kendall's has saved millions of dollars in horse values for thousands of owners during the past 40 years. It is the quick, sure, safe, dependable remedy for

Spavin, Ringbone, Curb,
Splint, Swellings, Cuts,
Sprains, Bruises, all Lameness

\$1 a Bottle—May Save Hundreds

CURES SPAVINS, CURBS, SPRAINS,
MAKES CHEAP HORSES VALUABLE
Gallen, Mich., Jan. 6, 1909.

Dear Sirs: I hesitate no longer in buying horses with Spavins or Curbs, in fact with blemishes of any kind, for I know what your medicine will do. I always make a handsome profit buying such horses cheaply, cure them up with your medicine, and sell them for a grand price. Your medicine can't be beaten.
Respectfully yours,
JOSE HAAS, (R. R. No. 2)

ALSO FAMOUS AS A FAMILY REMEDY

Accidents will happen and the greatest "First aid to the injured" is the old standby, Kendall's Liniment. Sold by druggists everywhere at \$1 a bottle, 6 for \$5. Prepare today for the emergency of tomorrow. Stop at the druggist's and be sure you get Kendall's. Ask for a copy of "A Treatise on the Horse and His Diseases," or write direct to

DR. B. J. KENDALL COMPANY, - ENOSBURG FALLS, VT.

With first class manure spreaders to be had at from \$85 to \$125 there is absolutely no good reason why thousands and hundreds of thousands of tons of farm fertilizer all over the country—one of the most valuable by-products of American farms—should be allowed to leach and weather and lose a good half or more of its fertilizing value before being spread on the land. The manure spreader is one of five or six farm improvements which a fellow is justified in going into debt for.

While efficient pasteurization destroys disease germs and affords a safeguard against certain diseases, it should not be regarded as an insurance against future contamination of milk, and the proper precautions should be observed in the case of pasteurized milk as well as with ordinary milk. Do not keep milk over twenty-four hours, even if it seems to be sweet, as milk may become unfit for human food before it sours.—Farmers' Bulletin No. 413.

FOR SALE—One imported German Coach stallion; sure foal getter; 7 years old. Price \$700. For particulars address Dan O'Connor, Arroyo Grande, Cal.

The mules used by the government are classified as wheel mules, swing mules, lead mules and pack mules. They have to be strong and sound and from four to eight years old. The sizes vary and it is a shame that our western ranches have not been producing these hybrids by the thousand instead of allowing the Missourians to do all the breeding. We have not been so smart as the Missourians. There is always a steady demand for good mules. A buyer will always handle them. If there are plenty of mules raised in any section of the country, there will be plenty of mule buyers there.

While there may be no greater nutrition in a certain food added to a dairy cow's ration than in the food she has been accustomed to, still it is a fact that a new food adds to the palatability of the ration, which is nearly always healthful.

When it is known that three tons of corn-stover is practically equal to one ton of mixed clover and timothy hay, any farmer can easily figure out whether it will pay him to save his stover or not.

The Holiday Number

Of the

BREEDER AND SPORTSMAN

TO BE ISSUED

December 24, 1910

Get your copy
ready.

Be sure to place your advertisement in the Holiday Issue. It's only a few weeks now to Christmas. Get your order in as soon as possible. It will be time and money well employed and bring results.

The HOLIDAY NUMBER

will be a feature of the mid-winter season from the all around sportsman's viewpoint. It will be largely devoted to hunting, fishing and field sports. It will be handsomely embellished by beautiful illustrations and have an attractive cover in colors. It will contain original, attractive reading matter and will be a splendid advertising medium, as well as a highly entertaining and valuable issue in all respects. It will be sold for 10c a copy and will reach everyone interested in the interests it represents on the Pacific Coast.

Rates for display advertising: One page, \$40; half page, \$22.50; quarter page, \$15. For any other information address

SMITH GUNS

HUNTER ONE-TRIGGER

WEATHER conditions aren't always at their best in the "blind" or in the skiff. That's when you don't want your gun to balk or double.

YOU CAN easily wear gloves if you shoot with a Hunter One-Trigger. And without "fiddling." It won't balk—because there is no friction to make it balk. And it won't double—because there is no second trigger to get tangled up in your glove.

The very newest Hammerless Smith Gun is the 20-Gauge Hunter One-Trigger. Weighs only 5½ to 7 lbs. Just the finest gun that can be made at the low price.

WINCHESTER RIFLE AND PISTOL CARTRIDGES.

The grab-bag method of buying cartridges is apt to lead to dire results. Be specific and ask for Winchester cartridges when you buy, and you will get cartridges that are unexcelled for accuracy and strong shooting. Winchester cartridges are the kind that were selected for use at the National Shoot, as they were found upon test to be "the most accurate." This is the kind you want, as when you go shooting you like to be sure that the cartridges you are using shoot strong and accurately. All Winchester cartridges are made from exact formulas and by automatic machinery, and therefore are always uniform and of equal shooting strength.

Always Ask For Winchester Cartridges---The Red W Brand.

Every Horse Should Be Clipped in Season

It is the wise thing to do for the clipped horse not only is easier to clean and looks better, but clipping does much to make him immune from coughs, colds and the usual ills that come to a horse from standing in a coat of long, wet hair after any hard exertion. The perspiration evaporates quickly from the clipped animal and leaves him dry. On cold days a blanket when he stands keeps him comfortable.

The Best Clipping Machine the World has ever Seen is the Stewart Ball Bearing Enclosed Gear Machine

It is the easiest turning, fastest clipping and most enduring of all machines. The materials in it are all of better quality, the workmanship is superior. All file hard cut steel gears, protected from dust and dirt and running constantly in oil. It couldn't be better for twice the money.

STATE AGRICULTURAL SOCIETY.

OCCIDENT STAKE OF 1913

Trotting Stake for Foals of 1910.

Entries close January 1, 1911.

To be trotted at the California State Fair of 1913. Entries to close January 1, 1911, with J. A. Filcher, Secretary, at the office in Sacramento. One hundred dollars entrance, of which \$10 must accompany nomination; \$15 to be paid January 1, 1912, \$25 to be paid January 1, 1913, and \$50 thirty days before the race. The Occident Cup, of the value of \$400, to be added by the Society. Mile heats, three in five, to harness. First colt to receive cup and six-tenths; second colt, three-tenths; and third colt, one-tenth of the stakes. Five to enter, three to start. A horse not winning a heat in the first three shall not start for the fourth heat unless said horse shall have made a dead heat; but horses so ruled out shall have a right to share in the prize according to their rank in the summary at the close of their last heat. Otherwise N. T. A. Rules to govern. Nominators are not held for the full amount of entrance in case colt goes wrong, only forfeit payments made, which relieves you from further responsibility, and declares entry out. The stake of 1913 should receive a large entry, and be very valuable. Every breeder should enter in it.

Remember the Date of Closing is January 1, 1911.

Communications must be accompanied by the writer's name
and address, not necessarily for publication, but as a private
guarantee of good faith.

THAT COUNTY OR DISTRICT FAIRS will be restored to the people of California by the Legislature which meets at Sacramento next month is almost certain provided those who are promoting the project agree on a bill that will be reasonable and meet the approbation of Governor-elect Hiram Johnson. There is no question but fairs are popular with the people and that they are worthy of State aid if properly managed. They must be given in the interests of all the taxpayers and producers of the districts where given and must be managed in a manner that will allow no deficits to accrue. A county fair conducted on a broad-gauge plan of instruction and clean amusement will be popular with the people and no taxpayer will begrudge the small amount it will cost him. It is with pleasure we note the fact that the advocates of these fairs are getting together and discussing proposed plans for them. There was a meeting of this kind at Stockton this week where the fruit growers of California are holding a convention. It was the consensus of opinion at this meeting that each county was entitled to a fair if it desired to give one and that the Legislature should be asked for an appropriation to make such fairs possible. Addresses were made by J. W. Davidson of Modesto, C. B. Messenger of Los Angeles, James B. Carroll of Escondido, Frank Johnson of Hardwick, Charles Wiggins of Lathrop, Arthur Roberts of Rippon, D. S. Pinniger of Tracy, W. J. Kenney of San Francisco, C. H. Edwards of Merced, P. J. S. Montgomery of Tulare, George Catts of Stockton, J. E. Dickinson of Fresno county and G. W. Harney of Marysville.

THE OCCIDENT STAKE, the oldest stake for colt trotters on this coast, will close for entries on January 1st, 1911. This stake will be for trotting foals of 1910, to race as three-year-olds in 1913, and the conditions are such that the stake is always certain of closing as only five entries are required to fill and three to start. The total entrance fee is \$100 per colt, of which \$10 must be paid with original entry, January 1st, 1911, \$15 January 1st, 1912, and \$25 January 1st, 1913. A \$50 starting fee is then required to be paid 30 days before the race. To the money paid in by nominators, the Occident Cup valued at \$400 is added by the State Agricultural Society. There are three moneys awarded: The cup and six-tenths of the stake to the winner, three-tenths to the second horse and one-tenth to the third horse. First money is seldom less than \$1500 and sometimes exceeds \$2000. There should be not less than one hundred entries to this stake, which has become one of the most popular races ever given in California and annually attracts a large crowd to witness it. Remember the date of closing is January 1st, and entries must be made with J. A. Filcher, Secretary, Sacramento, Cal.

A SIGNIFICANT SALE of Percheron stallions and mares from the Lakewood Farm, importers and breeders, was held at Sioux City, Iowa, Nov. 15th. The oldest stallion sold was five years old, and of the 31 head sold a majority were two-year-olds and yearlings. Forty-two mares and fillies were sold. The average for the stallions was \$479.50, and for the mares \$445.25, the general average for 73 head being \$460. The highest priced stallion was a three-year-old that brought \$1040, and the highest priced mare also a three-year-old that sold for \$900. The low mark was \$185 for a yearling stud colt. This sale is proof that there is a wide demand for registered Percherons, as one-third of the entire lot offered were yearlings.

PACIFIC BREEDERS' FUTURITY NO. 11 has received 410 nominations, the second largest in the history of this eleven-year-old stake. If anything were needed to disprove the often heard assertion of a few pessimistic horsemen that the trotting horse breeding interests of the Pacific Coast are dying out, the splendid list of nominations received in this last renewal of this futurity supplies it. Only once since the stake was inaugurated has the number of nominations received this year been equalled and that was when stake No. 8 received 416 nominations. It is said by all stallion owners that the number of mares bred this year was less than usual and the fact that the number of mares nominated in stake No. 11 is 69 greater than the list for stake No. 10, is conclusive evidence that there is an increased interest in the training and racing of the trotting and pacing bred colts. The history of the eleven Pacific Breeders' Futurities thus far closed shows that it has been a most popular stake with breeders since its inauguration, and the following summary of the stakes, with value and number of mares nominated in each will be of interest to all our readers:

	No. Mares Nominated
Stake No. 1, foals of 1901, value \$6000.....	305
Stake No. 2, " " 1902, " 6000.....	299
Stake No. 3, " " 1903, " 6000.....	331
Stake No. 4, " " 1904, " 6000.....	403
Stake No. 5, " " 1905, " 7000.....	389

Stake No. 11, " " 1911, " 7250.....	410

As the full amount of each stake guaranteed by the Pacific Coast Trotting Horse Breeders' Association has been paid in by the nominators each year and distributed to the money winners according to the conditions of the stake, it will be seen that when the present stake is finally decided no less than \$74,000 will have been distributed to the owners of the money winners. The full list of nominations made to stake No. 11 will appear in the Holiday Edition of the Breeder and Sportsman to be issued Saturday, December 24th. It will be found a most interesting list and as it will contain the awards made to the stallion owners whose horses are best represented in the number of mares bred to them that have been named in the stake, breeders will no doubt anxiously await its appearance.

A SALE OF SHIRE MARES is to be held by Fred H. Chase & Co. on Monday evening, December 19th, in place of the sale of trotting bred horses that was previously advertised for that date. Chase & Co. found it impossible to get a sufficient number of good horses for the holiday sale, and rather than hold a sale of inferior stock, declared the sale off and have filled in the date with a consignment of fifty highly bred Shire mares from the well known Bihler Farm at Lakeville, Sonoma county. These mares are all in fair condition, have all been thoroughly broken, and a majority are in foal to Shire or Percheron stallions. The demand for draft horses is on the increase. California's big ranches are being rapidly cut up into small farms and to every small farmer a pair of good work animals is an absolute necessity. If he is wise he will own a pair of well bred mares of some popular draft breed and will mate them every year with the best available stallion of the same breed. He will work these mares on his farm, carefully of course, and the colts they produce will be one of the best assets of the farm, and as ready sale when three years old as anything his farm produces. This sale of Shire mares offers an opportunity to small farmers that they should not overlook.

BIT AND SPUR'S Christmas number is a story of the National Horse Show held at Madison Square Garden, New York, in November, and is a gem of the printer's and photo-engraver's arts. It contains 60 pages and is very profusely illustrated.

THE NEW YORK STATE FAIR paid a profit of \$70,000 last year, which amount has been turned back into the State treasury. Another world's record.

ONE of the most cheering signs of the present and future of the trotting horse breeding industry, is the fact that as good a judge of horse values and the demand for the different breeds as Mr. Joseph G. Carroll, of New York, has recently purchased a number of high class trotting bred mares and will establish a breeding farm. Mr. Carroll is a member of the firm of Fiss, Doerr & Carroll, of New York, probably the largest dealers in pleasure and utility horses in America. He knows every angle of the horse market and he believes there is a profit to be made in breeding the right sort of standard bred horses. At the recent Old Glory sale he was a heavy buyer and it is reported that he will place about 50 highly bred and handsome mares on his farm with three or four young stallions of the same description that he has selected at the auction sales. Mr. Carroll is not the only wealthy business man who is a new comer to the ranks of trotting horse breeders. It is said that at least a dozen wealthy New Yorkers are arranging to breed trotters on their farms in that State.

THE FUTURE OF THE HORSE.

Morris Woodhull of Dayton, O., retired from the carriage business after a lifetime of successful work, delivered the address which opened the convention of the National Carriage Builders' Association in Cincinnati last week. Mayor Louis Schwab delivered an address of welcome at the opening of the convention and recalled the history of the carriage building industries in Cincinnati, telling of the number of conventions which have been held here by the national association, itself the oldest trade organization in the United States. Mr. Woodhull responded on behalf of the carriage builders with an excellent address, in which he made a keen analysis of the past history of the industry and its future possibilities. Speaking of the talk which has gained credence of late that the business of making horse vehicles is dying out because of the immense strides in the automobile industry, Mr. Woodhull said that it would be strange if the horse and carriage should fail to survive the introduction of the automobile. He said that while these things had come apparently to compete with the horse and buggy, it had been found that each of them opened up entirely new fields which kept it busy developing, while the demand for horses and horse-drawn vehicles continued to increase steadily to the present time. "We must admit frankly," he said "that there are certain styles of carriages, such, for instance, as the horse-drawn cab of the cities, the victoria, brougham, or in other words, what is known among carriage makers as heavy work, that were greatly affected by the automobile, for the very good reason that automobiles did the work for which they were intended much better, faster and more economically than they could do it. While we freely admit this, it is perhaps not generally known that these so-called heavy vehicles never constituted to exceed 10 or 15 per cent of the aggregate number of horse-drawn vehicles built for pleasure, leaving 85 per cent of the horse-drawn vehicle industry untouched by the automobile. In proof of the foregoing, let me tell you that in 1906 and 1907, coincident with the enormous demand for automobiles, the demand for buggies reached the highest tide in its history." Mr. Woodhull said that while the auto has its uses, and will live like everything that is good, he thinks that it will cease to enjoy the immense popularity which has been accorded it during the past three or four years.

PULSUS 2:09½ SOLD.

New Orleans, Nov. 19.—A horse sale that has attracted more than usual interest among the horsemen of the South was closed last week at Montgomery, Ala. Fred Newell, the well-known trainer and driver of the Alabama capital, bought from Col. P. J. Bowman of Birmingham the high class trotter Pulsus 2:09½. The price paid for the stallion has not been made public, but it is reported to have been of considerable size, and Mr. Newell expects to keep Pulsus in the stud until next summer, when he predicts that he will be able to give him a mark of 2:06, with the right preparation.

Pulsus is well known throughout this section, and is considered a trotter of unusual class. He is by Egotist 2:22½, out of a producing mare that is the dam of Goetist 2:23½, and Pulsus 2:09½. His second dam is the dam of W. J. Lewis 2:06½, and three other performers. Pulsus is a sound, exceedingly well made horse, weighing close to 1200 pounds, and aside from his class as an individual, he has shown his ability as a sire of speed through Gold Dollar 2:09½ (trial 2:06), the winner of thirteen races out of fourteen starts this year, and purchased for a long price by Geo. Estabrook of Denver when at Lexington.

Pulsus himself in 1906 won fourteen straight races, including the Memphis handicap. He also trotted a mile in 2:11¼ over a half-mile track, thus, establishing the Tennessee State record. He trotted the Birmingham mile track in 2:09½, and this mark still stands as the Alabama State record. He was driven at the time by Ben Whitehead. His new owner says that the stallion is at present in excellent condition, and is possessed of all his speed. He has trotted a quarter several times in :28½.

WELL BRED AND HANDSOME WEANLINGS.

Los Angeles, Cal., Nov. 30, 1910.

Editor Breeder and Sportsman:—You have already received an account of the matinee given by the Pasadena Driving Club Thanksgiving Day, which was a very successful and enjoyable one. Some 1500 or more people attended, this being the first matinee given here in years. Lots of interest and enthusiasm were manifested, and undoubtedly the club will do much to advance light harness horse interests in these parts. The club has a membership of about 60, although only organized this fall, and we are confident we will increase the membership to 100 or more during the winter. With so many wealthy winter tourists here during six months of the year, there would seem to be no better place in the country for a good driving club. Besides the regular program of racing there was a half-mile exhibition by the pacer Siegfried, an exhibition by Mr. Revel English's high class saddle stallion Highland Chief, and an exhibition eighth by my baby Carloklin trotter, beside his dam. A race for trotting teams, in which there were three starters, also attracted lots of interest. I have been told by many that my baby trotter was the real feature, however, and it seemed to me he received more enthusiastic applause than any other event—but I may be prejudiced. All the horsemen who saw my colt pronounced him the finest individual and fastest trotter for his age they had ever seen. One of the trainers claims to have timed him an eighth on the back stretch (which I did not time) in 22 seconds. I would not be surprised if this was correct, for all the horsemen agreed that he trotted the last end of his exhibition eighth at a 50 gait or better. He is a magnificent individual, and a perfectly gaited fast natural trotter, and it may be in another year they may have to publish his picture on even terms with Wilbur Lou's—he seems to have his head set on getting there.

But to me his dam made a more wonderful showing Thursday than the baby. A year ago in May (as I think I wrote you) she broke her front leg above the elbow, and the vet. advised destroying her at once. I refused to allow that, and since then she has had this colt and is again safely in foal to Carloklin, due to foal in March again. She has only been able to take light jogging, two or three times a day since last May, with very short little brushes, but Thursday she trotted a half in 1:27, last eighth in :20½ without boots of any kind and hare-footed, although the broken leg seems over an inch shorter than the other, and that foot only about two-thirds the size of the other. She was full of race, and to me it was amazing how she could get around the turns of a half mile track with the short leg on the outside and not injure the other knee at all, and could brush a little ways much better than a 40 gait. I consider her a great mare. I shall probably breed her to Copa de Oro next year.

I enclose a picture showing my Carloklin colt and a Trampfast weanling that I received by express two weeks ago from Mr. L. E. Brown, Delavan, Ill., where I went and purchased him last summer. Disposition has put him far behind the Carloklin in development, as the picture shows (he being about six weeks younger), but he is a good individual and a nicely bred one. His dam is Lizzie Clinch (dam of Matt L. 2:15, trial 2:12, and Ludwig 2:30), by Barou Wilkes, second dam Belle Medium (dam of four and grandam of five) by Pilot Medium; third dam the great old brood mare Winnie (grandam of seven) by Mambrino Gift 2:20; fourth dam the famous old mare Baby, by Walkin Chief by Hambletonian 10, dam Dolly Mills by American Star 14.

I made a special trip from Denver to Delavan in August to pick out and purchase a Trampfast colt that I thought had a chance to develop into a colt trotter, and bred well enough to suit breeders in California if he turned out to be a good trotter. Mr. Brown told me I could have my pick of the Trampfasts, and I finally decided on this one after spending a day and night at the farm looking them all over, and afterwards discussing the breeding of the different ones with a number of trainers and breeders, such as Billy Durfee, Walter Maben, Charley De Ryder, Harry Hirsey, Charley Dean, J. B. Chandler, and many others; all of whom agreed that this colt's breeding should suit anyone. He is entered in the prominent eastern colt stakes, and I shall try to get substitutes for him in the California Breeders and other California colt stakes. Of course my Carloklin weanling is in the Breeders' stake as well as about all the other colt stakes in the country.

Very truly yours,

W. N. TIFFANY.

Just before the big special carrying the local breeders and harness horse fanciers who went to New York to attend the horse sales was about to pull out those present got into a warm discussion as to the probable price that would be paid for The Bondsman. One man thought that \$10,000 would about reach the spot. Another thought \$12,000. There was a wide variance of opinion and so they decided to make it a jackpot, each man to guess and the man who missed the right figure the furthest was to pay for a supper for the crowd. There were eleven men present and the guesses ran all the way from \$10,000 to \$20,000. Joe Thayer promised to pay the bill of the \$10,000 man if the horse brought such a large figure that he would be the loser. The horsemen in the Blue Grass are much interested in the sale of this horse. The \$20,000 man had to pay.

Drink Jackson's Napa Soda.

LOW PRICED HORSES AT OLD GLORY SALE.

Out of the long list of horses that brought less than \$500 each at the Old Glory sale last month, we find the following California bred animals, whose names and the prices brought will be read with interest by the horsemen of this State:

Directea, bl m., (15), by Direct, dam Fanny Box, by Anteo; Frank Lee, Pawtucket, R. I. \$100

Vina Belle, br. m. (21), by Nephew, dam Flushing Belle, by Dictator; F. E. Barrett, New Milford, N. Y. 170

Sucino, b. m. (6), by Mendocino, dam Susera, by McKinney; J. F. Carroll, New York. 170

Helena 2:11½, b. m. (21), by Electioneer, dam Lady Ellen; Dromore Farm, Port Huron, Mich. 325

Muda S., b. m. (13), by Stamboul, dam Nancy Lee, by Director; H. Jackson, New York. 235

Serpollita 2:25½, gr. m. (11), by Mendocino, dam Sally Benton, by General Benton; Fairland Farm, Lexington, Ky. 400

Rowellan 2:09¾, b. g. (12) by Adbell, dam Rowena by Azmoor; Chas. G. Dubois, Red Bank, N. J. 260

Abe Miller 2:17¾, br. g. (11) by California Titus, dam Gazelle, by Gossiper; J. W. Jackson, Detroit, Mich. 310

Uldeen, ch. m. (11) by Dexter Prince, dam Wildmay, by Electioneer; W. S. Tod, New York. 150

Miss Cairns, b. f. (3) by Nutwood Wilkes, dam Twenty-third, by Director; G. A. Gregory, Sidney, N. Y. 150

Captain McKinney, b. s. (15) by McKinney, dam Middy Belle, by Gossiper; D. D. Cavanaugh, Clarks Corners, Conn. 229

Virginia McKinney, hl. f. (3) by Capt. McKinney, dam by Searchlight; A. J. L. Shannon, Pittsburgh. 155

Brother Eckley, h. c. (1), by Bon Voyage, dam She by Abbottsford; Charles Dean, New York. 335

Coronado Jr., b. g. (1) by Del Coronado, dam Electric Maiden, by Electric Bell; I. Paulson, Passaic, N. J. 120

Bon Diablo, b. c. (1) by Bon Voyage, dam Reina del Diablo, by Diablo; M. B. Martin, Orange, N. J. 220

Mary Seton, b. f. (1) by Bon Voyage, dam Hazel Kinney, by McKinney; L. S. Gray, Swansea, Mass. 110

John Caldwell 2:09½, br. g. by Strathway, dam Annie, by Kentucky Hambletonian; J. Enright, Middletown, N. Y. 270

Romeo, b. g. (9), by James Madison, dam Heather Lady, by Albert W.; James McClenahan, New York. 675

Dredge 2:14½, br. g., by James Madison, dam Rosa Clay; Wm. H. Mickel, New York. 270

Monicrat 2:13½, b. g. (13), by Woodmon, dam Altacrat, by Altamont Jr.; Geo. W. Howard, Yonkers, N. Y. 375

Button McKinney 2:29¾, b. g. (4) by Washington McKinney, dam Dinah Button; John Mehl, Brooklyn, N. Y. 410

TO SUCCEED MCKINNEY.

Though he carries his twenty-three years as lightly as any stallion I ever saw, McKinney's days are numbered, and it has behooved the Simpsons to select a son of the great stallion for the heirship when McKinney shall have passed away. The selection has already been made, and the heir apparent is Amar McKinney, a three-year-old replica of his great daddy, and out of Amaryliss, a great brood mare by Director 2:17 (half-sister to Baron Wilkes 2:18), by Governor Sprague 2:20½ (another ex-champion), writes Palmer L. Clark, who has recently visited Empire City Farms. Fashionable and potent as are these blood lines, the individuality of Amar McKinney is his prime asset. He has been pronounced by every critic the best colt McKinney ever sired; and, better still, he could trot in 2:10 this year as a three-year-old. He will, however be allowed to fully develop before a race record commensurate with his pedigree and individuality will be given him. Then after his sire is no more, Amar McKinney will occupy the throne room in "The Palace of McKinney" and beget champion after champion from Axworthy mares. From stall to stall, from stable to stable and from paddock to paddock I was conducted and I recognized great mares, now matrons, which had made turf history. I was shown the McKinney and the Axworthy babies out of these mares and out of their daughters; and, I herewith predict, without reservation, that the McKinney cross on Axworthy mares, and, by the same sign, the Axworthy cross on McKinney mares, will prove the "Golden Nick" of the very near future.

August Uihlein, of Milwaukee, Wis., who owns the world's champion trotting stallion, The Harvester 2:01, has just sent to Ed Geers at Memphis, three highly bred young trotters to train for next season's races. One is the four-year-old stallion, High Admiral (3) 2:16, by Admiral Dewey 2:04¾, dam Averia P. 2:27, by Palo Alto 2:08¾, second dam Astoria, by General Benton. One of the others is a yearling filly by Noko, out of a highly-bred mare by Chimes and the third is a two-year-old filly by one of the good sons of McKinney, and out of a good mare. Both the yearling and two-year-old are heavily engaged in futurities. High Admiral is regarded as the making of one of the real fast trotters of 1911. As a two-year-old he was a colt of sensational speed, but sickness interfered with his three-year-old campaign. This year he has been in the stud and now appears to be in the best possible form to go into training for next year's campaign.

OLD GLORY SALE RECORDS.

Year.	Horses.	Total Am.	Av. Price.
1898	714	\$258,111	\$361.50
1899	810	315,110	389.25
1900	702	352,180	501.70
1901	920	499,355	542.80
1902	965	372,165	387.17
1903	944	333,940	353.75
1904	987	447,175	473.70
1905	1,014	423,450	417.60
1906	1,013	425,024	419.57
1907	891	414,947	465.70
1908	673	291,180	431.16
1909	745	310,428	431.68
1910	769	319,655	415.67

The market value of trotters for the coming winter, as well as the entire year of 1911, was practically settled by the big Old Glory sale of last month, and with better prospects than ever in the past decade.

In several respects the sale was quite different from all former events, notably the fact that the time for fancy prices has now passed, and the real value of the American light harness horse is permanently based upon real demand and supply.

Only three of the 769 head sold brought over \$5000, this being the smallest number on record for any of the twelve past sales, yet the general average not only did not fall short of former sales, but made a splendid showing, considering the number of horses sold.

The greatest feature of the sale was the unusually high prices offered by breeders and racing men for highly and fashionably-bred weanlings, the prices running as high as \$1400 and \$1500 for six and seven months olds.

It is true that fancy prices have been paid for youngsters in the past, sometimes before they were even foaled, yet these were individual cases and due exclusively to a fancy for a certain line of breeding. That the time would ever come when nearly fifty head of weanlings, all from one breeding establishment, would sell for an average for \$400, was no more dreamed of than a record of 2:04¾ by a three-year-old, yet such was the actual fact at the sale, as demonstrated in the dispersal sales of William Bradley, John H. Shults, D. C. Palmeter and others who had the goods.

The general impression throughout the week was that these fancy prices were paid for babies because of their breeding and futurity engagements, yet the real secret is that most of them were bought by men who will use them almost exclusively for breeding purposes, although some of the best prospects will no doubt be tried in their colt engagements.

Racing men have paid high prices for futurity prospects at all times, but never as much as they did for weanlings that were hardly halter broke and had shown absolutely no real speed. That the breeding industry of trotters is on a higher boom than during the past ten years was also demonstrated by the record prices paid for richly bred mares that will do as additions to the matron list of the future.

The regular moneyed element that formerly patronized the Old Glory sale ring merely through fancy, was decidedly absent last month, and they were replaced by practical breeders, who are in the raising of trotters with a view to financial gain, as are followers of any other practical business affairs.

The many dispersal sales announced for the week meant the going out from the breeding business of only two stock farms, while the sale list showed that many others are on the market to replace the older establishments with a more modern and fashionably bred stock as their foundation.

Members of the Eastern contingent of the Amateur Drivers' League, including New York, Syracuse, Pittsburg and Boston, were present throughout the week in larger numbers than in any former sales, buying better horses at more liberal prices than they have done in past years, showing that that branch of harness sport is as much on the boom and as popular as the breeding and regular track racing.

Every trotter and pacer with a reputation as a likely ribbon or cup winner on speedways and wagon matinees, found many buyers at lively bidding and higher prices, and in all cases when gentlemen drivers failed to secure their choices, was due to the fact that such trotters and pacers would also answer the purposes of professional trainers and race drivers who naturally could afford to overbid the amateurs.

Trainers were prominent as they have been formerly and hardly failed to secure what impressed them as likely candidates for Grand Circuit honors. Nearly every well known big line driver who was at the Garden bought one or more prospective race-horses at higher prices than they have paid formerly, while most of them found men of money who took their advice and suggestion.—N. Y. Telegraph.

The Hackney horse did not cut so much of a figure at the recent National Horse Show, as was the case several years ago when the Hackney was the whole thing. In fact, the Morgan horse has rather taken the place of the Hackney with that class of millionaires who do not care to take up with the acknowledged leading trotting strain. The Morgan is an exceedingly handsome little horse and a very useful one as well, and he seems to be coming back in popular favor. The Morgan Horse Club is opposed to increasing the size of the Morgan above 15 hands, and has tahoosed the suggestion of mixing Hackney blood with the Morgan blood, preferring rather to select the best Morgan strains obtainable.

NOTES AND NEWS

Pacific Breeders' Futurity No. 11 has 410 entries.

This is the largest number but one in the history of the stake.

Interest in breeding and racing trotting and pacing colts is certainly increasing.

At the Old Glory sale 769 head of horses were sold for \$319,655, an average of \$415.

Eleven weanlings by Bingen 2:06½, sold for an average price of \$465.50 per head.

Chase's Holiday Sale will consist entirely of draft horse offerings—50 head of Shire mares.

The pacing mare Grace G. 2:05¼ started in fifteen races during 1910 and won eleven of them.

The Horse Review thinks it strange that a level headed, sensible pacer should wear the hoppers. Why?

Ed. Willis, trainer of Miss Stokes (1) 2:19¼, (2) 2:09¼, stated that he could have beaten 2:06 with his great filly, had a record of that low a figure been desired.

When a weanling by Bingen 2:06¼ brings \$1400 and another by Baronmore 2:14¼, \$1500, at a public auction, the bottom has not yet dropped out of the horse market.

The big sale of trotting bred horses at Chicago will begin next week. It will be interesting to compare prices there with those received at the Old Glory sale at New York.

Trainer Charley Dean, of Palatine, Ill., has added a promising youngster to his string recently in purchasing a yearling pacing by Searchlight 2:03¼, dam Ripples (3) 2:27 by Glenbrook.

Trotting, pacing and running races will be held at Escondido, California, on Christmas day. Purses will be given and a barbecue will be one of the features of the afternoon's outing.

Walnut Hall Farm made some valuable additions to its broodmare band in Dell Bingen by Bingen 2:06¼, \$850; Clear Silk 2:20¼, \$1000; Ecstacy 2:01¼, \$3000, and Melva J. 2:10¼, \$2000.

Among the mares A. B. Coxie will breed to Colorado E. 2:04¼, are The Leading Lady 2:07, Czarevna 2:07¼, Tuna 2:08½, Hazel Kinney 2:09¼, Bisa 2:10¼, Muda Guy 2:12¼, American Belle 2:12¼, and Little Sweetheart 2:12¼.

The Readville race track has been sold to a syndicate which will remodel it for the purpose of holding agricultural fairs. It is proposed to construct a half-mile track inside the present mile track and make over the rest of the inclosure into a forty-acre lawn.

Within the last eighty days eleven colts and fillies bred at Allen Farm, Pittsfield, Mass., have been sold for \$25,860, six at private sale and five at auction, the oldest six years old, the youngest a weanling. All by the great young sire Bingara.

W. C. Brown of Vancouver, B. C., has been visiting some of our California horse breeding farms recently. He was at Santa Rosa last week and made Frank Turner a very flattering offer for California Dillon, which offer Mr. Turner had to refuse, as he considers the horse worth more.

The Ohio pacer Cinnamon stepped into the 2:10 list at Lexington by winning in 2:09½. He is by Hal Dillard 2:04¼, and is out of the dam of Red Pepper 2:11¼; Little Mustard 2:13¼, and Ginger 2:18¼, all being owned by Mr. F. E. Freeman, of Phoneton, Ohio, who marked them all.

Mr. George Stengel's yearling filly by Cochato 2:11½, dam Bush 2:09½, by Alcione 2:27, bids to develop into a fast trotter. She has shown an eighth in 18¼ seconds, a 2:26 gait. Bush 2:09½ is still living and as active as the average of horses of half her years. She is a wonderful mare.

Fred Chase found it impossible to secure enough trotting bred horses for his Holiday Sale, and has filled the date with a sale of fifty head of Shire mares from the well known Bihler ranch, Lakeville, Sonoma county. Farmers who want good stock should not overlook this sale.

The dates of the auction sales of the personal property owned by the late Ben Davies of San Bernardino, must not be confounded. The personal property, other than the three stallions, Zolock, Izalco and Blackmoor, will be sold next Saturday, December 17th. The three stallions will be sold Saturday, January 14, 1911, at San Bernardino.

The county fair of Imperial county, California, will begin December 18th and continue through the week. The winter months are the most pleasant in that section of the State and while warm the temperature is not oppressive like it is in summer. There will be five days of racing for trotting, pacing and running horses, purses ranging from \$25 to \$150.

Lou Dillon's foal of 1910, which is a colt and her first and only male offspring, is a handsome chestnut in color, and said to be the largest and strongest weanling she has yet produced. The colt is a full brother to Lou Billings (3) 2:08¼. Lou Dillon is certainly in foal to Bingen 2:06¼, and will be shipped to Memphis to be bred to The Harvester next spring.

The breeding of the champion four-year-old trotter, Joan 2:04¼, has been traced. Her dam is Sarah W. 2:18¼ pacing by Hal Braden 2:07¼, second dam Mabel Wilkes 2:24¼ by Allie Wilkes, third dam by Strathmore, and fourth dam Ned, the dam of Clemmie G. 2:15½ and five others and grandam of eight or ten standard performers. Ned's breeding is unknown.

William A. Maloney of Menlo Park, Cal., was seriously injured last Monday by his stallion Menlo Direct, which attacked him as he was entering the horse's stall. Mr. Maloney's brother came to his rescue and felled the stallion with an iron bar, putting the horse down and out for fully six minutes.

George C. Graddy, long identified with the breeding of the trotter in the Blue Grass, died at his home in Versailles, Ky., November 15, after an illness lasting several weeks. Mr. Graddy was the owner of Daytona Stock Farm and among others, bred Governor Francis 2:08¼, his dam Gracie Onward 2:12, J. N. Blakemore 2:11¼, Woodford Todd (2) 2:24¼, the latter being the last one he had trained.

A special order, effective at once, has been issued by the Secretary of Agriculture prohibiting the landing at any of the ports of the United States, its territories or dependencies, of horses, asses, mules, sheep, goats and swine from any of the countries of Asia and Africa. The order is the most sweeping prohibition of the kind ever promulgated. It was issued because of the prevalence in Asia and Africa of surra, a disease affecting horses.

Herman Johnson of Great Falls, Montana, has recently sold to E. E. Kelly, of Kalispell, a weanling colt by Directus J. son of Montana Director, and to Dr. Barth, of Great Falls, the five-year-old mare Lillian J. by Senator H. Mr. Johnson has a number of fine mares booked to Directus J. for 1911, among them Floy Direct 2:13¼ by Direct Hal 2:04; Dolly Dimple 2:12¼ by Hal Ensign; Adwilt 2:21 by Advertiser, and others.

Buck, the gelding by McKinney that took a pacing record of 2:09¼ at Phoenix last month, is not out of the trotting mare Tuna 2:08½ by James Madison, as several of the eastern papers have stated, but is out of Tuna 2:12¼ by Ethan Allen Jr. Buck was bred by Walter Hobart and took a trotting record of 2:20¼ in 1906.

Orlena 2:19¼ as a three-year-old, and timed in 2:10 in a race this year as a four-year-old, is coming to Pleasanton in Dick Wilson's car. Orlena was purchased at the Garden Sale for \$1400 by Abe Johnson and resold at a handsome profit to Wilson who was acting for Chas. P. McCan, the new owner of The Bondsman. Orlena is by Ormonde 2:08¼ and her dam is the great broodmare, Helena 2:11¼ by Electioneer.

Almaden D. 2:19¼, son of Direct 2:05½ and Rose McKinney by McKinney, has been registered as standard under rule 1. His number is 54055. Almaden D. was bred by Chas. A. Durfee and won the two-year-old trotting division of Pacific Breeders' Futurity No. 1, and the Occident Stake the following year. He was sold this summer by Mr. Durfee to Dr. C. L. Ransom, of Mill City, Oregon.

Dick McMahon, who attended the Phoenix meeting had the following to say of Wilbur Lou 2:19½, the yearling son of Kinney Lou 2:07¼, when he visited the Horse Review office the other day: "That California yearling, Wilbur Lou, is a wonder and he would have beaten Miss Stokes' record of 2:19¼ had he been rated a little better, but he was taken to the half too fast—1:08½. I never saw another yearling trotter like him. He is a splendid individual, beautifully gaited."

Will Logan Jr. whose name is well known to all readers of trotting horse literature, died in New York on Wednesday of last week from pneumonia. Mr. Logan began as a writer of trotting turf literature on the Horse Review of Chicago when that journal was established by Palmer Clark over twenty years ago. About five years ago he was one of the owners of the Trotter and Pacer of New York, but sold his interest in that journal a few years since and has since been a free lance writer. Mr. Logan had a deep knowledge of trotting horse affairs, a splendid memory, and was a close observer, consequently his contribution were always widely read. His remains were sent to his old home at Lebanon, Ohio, for interment.

Mr. E. R. Dunn, the Seattle capitalist who recently disposed of all his trotting horses, passed through San Francisco this week on his way to New York where he will take a steamer to Buenos Ayres in the Argentine Republic. His son who recently graduated from the University of California, accompanies him, and the young man will engage in cattle breeding if the country suits him. The best wishes of a host of friends go with them.

W. P. Dickinson, of Chicago, thinks he has a coming stake horse in the three-year-old chestnut filly by Sidney Dillon, out of Wilna M. 2:17¼, by Bonnie Red, 2:25½. This filly was broken last May and was used on the road until August 15, when she was taken up and worked until October 15, when she was given a record of 2:23¼. She is a good looking, stout-made filly, wears no boots, and certainly gives promise of being exceedingly fast.

Every farmer should own a few good draft mares with which the farm work should be done. They will raise better colts and be healthier if they are worked. There will be an opportunity to get some good Shire mares at Chase's Holiday Sale, December 19th. Fifty head have been consigned from the Bihler ranch, Lakeville. They are all broke to work and the majority are in foal to Shire or Percheron stallions.

Sonoma Girl 2:04½ has been sold by Miss Lotta Crabtree to Geo. C. Moore, of St. Clair, Mich., owner of the Dromore Stock Farm. The sale price is not given out but is doubtless much less than the \$26,000 that Miss Crabtree paid Mr. John Springer for the daughter of Lynwood W. Sonoma Girl is said to be hopelessly broken down, and Mr. Moore bought her to breed to Barongale in 1911 and to Justice Brooke (3) 2:09¼ in 1912. She is now twelve years old.

General C. C. Watts, owner of General Watts (3) 2:06¼, has leased from Senator Bailey, the place owned by that gentleman adjoining the track of the Kentucky Trotting Horse Breeders' Association and will winter his colts there. The weanlings by General Watts will be sent there from the farm in West Virginia and as soon as a trainer is selected they will all be sent to school. Their sire will remain all winter in the care of Mike Bowerman and may be raced in 1911. He is as full of trot as ever he was and those who have seen him step the past fall believe that he is not far from a two-minute trotter.

Ramey Macey, one of the newest additions to the driving contingent on the Grand Circuit and a promising young horseman, will leave Lexington this week for Paoli, Pa., where he will take the world's champion three-year-old trotter Colorado E. 2:04¼. The latter, whose great record during the season just closed, has placed him in great demand, will do service in the stud during 1911, being located at the farm of A. B. Coxie. Macey will stay at Paoli until spring, when he will go to Denver to help his father prepare for the 1911 season.

Tommy Murphy will train Gen. Brayton Ives' new purchase Silent Brigade 2:10¼ and will train him for his three-year-old engagements in 1911. He is engaged in the Kentucky Futurity, \$21,000, Western Horseman stake, \$10,000, Kentucky Stock Farm purse, \$6000, and the Matron stake which will probably be worth nearly \$10,000. Silent Brigade took a record of 2:26¼ as a yearling, and one of 2:10¼ as a two-year-old. He is by Silent Brook (son of Dark Night) and his dam is Carietta 2:18 by Directman, a son of Directum 2:05¼, second dam a daughter of Stranger and third dam a daughter of Jay Bird. He brought \$6500 at the recent Old Glory sale.

J. W. Zibbell, the well known Fresno farmer and horse breeder, was in this city last week, showing a brother from Michigan, who has been visiting him, the sights of the metropolis. Mr. Zibbell has just taken up a lot of youngsters by Tom Smith that he will get ready for the stakes and races next year. He is greatly pleased with a two-year-old sister to Katalina 2:11¼. He states that the four-year-old stallion Eddie G. 2:30, that started twice as a two-year-old in 1908, getting his record in a walkover at Fresno, is in fine shape. He has been running out for nearly a year, but will be worked now with the idea of racing him in 1911. He is a very fast colt.

In 1869, or 42 years ago this winter, ice races were held in Port Perry, Canada, a picturesque little city on Lake Scugog, about 50 miles northeast of Toronto. The old club, in name, but with new faces at the helm, will celebrate their 42d anniversary the second week of the New Year, 1911, with a three-day meeting that will do credit to the oldest ice-racing association in the world. The race course is laid out on Lake Scugog, at the foot of the main street, within two minutes' walk of the leading hotels. No admission is charged, but the business men in town and suburban horsemen and agriculturists contribute freely to the support of the annual meeting.

C. A. Harrison writes us the following as the latest news from Seattle: "Dr. Oscar Hartnagle, trainer of Henry Gray, the white son of Zombro, now has quite a classy stable of horses at Seattle Speedway Stables, having recently received three well bred ones. They are Rose Lecco, trotter, by Lecco-Rose McKinney; Starlight, pacer, by Searchlight; Abbie D., two-

year-old trotter by C. The Limit 2:06 3/4-Bonner Belle 2:16 3/4. Dr. Hartnagle thinks he has solved the question of high railroad rates. He will have built a large automobile with stalls arranged to transport his horses from one place to another. Doc is an expert Malmut (this word was coined by Mark Twain as a correct definition for a man who operates an automobile). While he does love an auto Doc is a good horse trainer, a good race driver and a nice fellow. Next season his big auto will be seen with trotters and pacers heads sticking out of the end gate, his sulkies piled on top, his trunks on the foot-board, all other gear tucked nicely away and himself and assistants comfortably arranged out on the front end and making smiles at the railroad companies that have been holding him up in the past. He says he has found out what a good thing an auto is to a harness horseman. We all wish him success and hope he makes the R. R. sit up and take notice."

Frank R. Hayden, who was prominent as a driver 40 years and more ago, is wintering a large string of horses at the Pine Tree Stables in Lewiston, Me., preparatory to another campaign of the Maine fairs in 1911. Mr. Hayden had six horses out in Maine during the season just closed and won with them something over \$5000, a remarkable showing, particularly when it is considered that first money was rarely \$100, and usually less than that figure. At the Bangor (Me.) fair this year Hayden started seven horses and won with them all, which comes pretty near being a record for Maine or any other State. Hayden as long ago as 1871 drove old Daniel Boone and later had the gray gelding Hopeful, marking the trotter in 2:17 3/4, a sensational performance for those days.

The beautiful pair of chestnut horses, once owned and used by the late ex-President Cleveland, are now used by Trueman M. Lothrop of Stockton Springs, N. J., and will probably be used on the stage route between Belfast and Stockton, of which he is the proprietor. The horses were owned by Mr. Cleveland when he was President, and were presented, after his death, to his sister, Miss Rose E. Cleveland, who has a summer home on Seven Hundred Acre Island, Islesboro. Miss Cleveland sold them to Ralph Pendleton of Dark Harbor, who in turn sold them to Mr. Lothrop. The horses are attracting much attention. Mr. Pendleton has used them in his livery business were driven by Miss Cleveland.

There is no disputing the fact that racing colts is the best end of the game just now. A colt that is good can earn as much and even more money than the aged horse and you do not have to carry him over at added expense in order to get to the races. Colt races will become even more popular and when the breeders and owners wake up to the value of colt races on the half mile tracks and will train and start their horses in these races colts will be larger money winners.

Weanling colts are more often underfed than given too much to eat. If you want your colts to thrive you must give them the requisite amount of good nutritious food. Commence by feeding them a pint of ground oats and a quart of bran three times a day, with a fair amount of hay, gradually increasing the quantity from week to week as they grow. It is a matter of great judgment on your part. The better they are fed and cared for the stronger they will be. Watch them closely and feed as liberally as they can digest it.

The Sunday before the Old Glory sale is always a gala day on the New York speedway. All the horsemen from the various sections of the continent who are in New York flock up to the famous \$6,000,000 driveway and often a large majority of the horses which are to be sold at the Garden are judged and speeded. This year Mr. Walter Winans was there with his two trotters Bonnie View and Rip, and won with both of them.

They have discovered another The Bondsman futurity prospect, a weanling filly of the name of Fanny Small that is pronounced to be the proper sort in every way. She is of "Farmer" Spears breeding, her dam a mare called Hazel McGregor by Jay McGregor 2:07 3/4, she out of Axtica by Axtell 2:12, next dam Persica 2:18 3/4 by Belmont 64, next dam Nectarine by William Welch, she out of the dam of Nil Desperandum 2:19 3/4. The breeding is precisely like that of Colorado E. (3) 2:04 3/4 for sire and sire of dam, while the more remote crosses are of blood that has produced many good to great trotters. Aside from Hazel McGregor, who is a young mare, four of the five known dams of Fanny Small are producers. The blood of the Axtell mare Axtica is as highly prized as is that of any brood mare in Kentucky and all her foals are natural trotters with extreme speed. Fanny Small is like all the other members of the Axtica family and shows that she will not only learn to trot without much education but will be very fast. She is in all the futurities and as she comes, on both sides, from the Sorrento family of colt stake winners, she will probably be there or thereabouts when the big races are trotted. James Snell has been breaking her and while he does not say much about her, what he does say indicates that he believes he has found a real prize. If many more of these Bondsman-Jay McGregor exceptionals show up that particular cross will enjoy a vogue that has never been equalled.

Dick Wilson left Lexington with The Bondsman and several other horses on December 2d and should reach Pleasanton today.

A yearling colt by Allerton 2:09 3/4; dam by Axworthy (3) 2:15 3/4, was recently sold under the hammer for \$800 to W. H. Thompson of Tucson, Arizona.

Uhlan 1:58 3/4, the trotting king, is now quartered at Mr. Billings' stable at Glenville. His shoes have been pulled off and he is allowed to run in a pad-dock.

San Jose will announce its program for its 1911 meeting on January 1st. We would like to see about a dozen other California mile track towns do the same thing.

A mare bred to The Bondsman has been nominated in Pacific Breeders' Futurity No. 11, which closed December 1st. The mare is owned by Geo. T. Beckers, owner of Zombro, who likes to ride in front.

Where meetings are numerous during the summer trotting and pacing horses have a good earning capacity. A Maine trainer won about \$5000 with his horses this year and nearly all the first moneys were \$100 or less. He won six races at one meeting.

James Dwyer, a well-known and formerly successful trainer and driver of Washington, D. C., was found dead in his room in that city on November 7, death having been caused by suffocation from gas. The deceased had been for many years in the employ of Gen. Nelson A. Miles, former Chief of Staff of the U. S. Army, and in recent years Gen. Miles has looked after his welfare. Dwyer was about 65 years old.

Representatives of the League of Gentlemen's Driving Clubs met in New York City during the progress of the Old Glory sale and elected the following officers: President, H. K. Devereaux, Cleveland; vice-president, J. D. Callery, Pittsburgh; secretary, treasurer, T. L. Quinby, Boston; directors, H. K. Devereaux, J. D. Callery, W. Cowan, Chicago; E. L. Shropshire, Lexington; Governor Horace White, Syracuse; T. G. Hines, New York City; Arnold Lawson, Boston; J. R. Townsend, Goshen, N. Y.

Nutwood Wilkes 2:16 1/2 is the only stallion that has sired a two-minute pacer and a 2:05 trotter—Copa de Oro and John A. McKerron 2:04 1/2. Nutwood Wilkes is one of the greatest sires ever bred on this coast and as the late Martin Carter used to say "He nicks well with all families." The mares and young stallions bred by Mr. Carter are among the most valuable animals of the trotting breed there are in California.

Frank Lieginger, secretary of the Stockton Driving Club, is one of the most energetic officials in the State. He is a busy man with his own affairs, but finds time to put in lots of work for the Driving Club and knows the breeding, gait and record of every horse that has ever appeared at the matinees given by his club. He is always hoisting for the harness racing game.

Mr. Geo. L. Parker, owner of one of the leading meat markets of Portland, Oregon, is the proud owner of a filly by Hal B. 2:04 3/4, dam by Poscora Hayward that is considered one of the handsomest youngsters in Oregon. Mr. Parker writes us that he greatly appreciated the account of Mr. Frank J. Kilpatrick's visit to the blue grass section of Kentucky and says the descriptions of the various places visited by Mr. K. were so vivid that one could imagine himself at that gentleman's side and enjoying it all with him.

A huge concrete bathtub, some 40 feet long and a few inches more than four feet deep, has been installed in the Henry colliery of the Lehigh Coal Company, at Plains, Pa., for the accommodation of the mine mules. This unique improvement is built at the entrance of the mule barn. The long-eared beasts are pretty tired when they conclude the day's work, but when they strike the bath all fatigue disappears and they rush in, crowding each other for the deepest place in the tub. The bath is expected to prolong the vigor and vitality of the mules. The driver boys are the only workers in the mine who are not absolutely in sympathy with the innovation, the bath keeping them in the mine 10 or 15 minutes longer than before; yet the enjoyment of their dumb charges seems even to offset this inconvenience to a great extent.

It is very seldom that a good trotter or pacer either can be developed in one short season. Where the animal has had the advantages of maturity, is well broken and knows what it means to work, and is in a large measure developed muscularly, they will frequently make good horses with only one season's work of regular track training. "Haste makes waste" in training the trotter as well as in other things, and you will find that if you have a likely sort of a horse that has made a lot of progress with only a limited amount of work, that it will be a pretty good thing to go slowly and wait for the natural development that will come along all right with the right kind of exercise and training.

GOOD HORSES IN DEMAND.

George M. Rommel, chief of the animal husbandry division of the Agricultural Department, went up from Washington to look over the National Horse Show. Mr. Rommel says that horse breeding had advanced to such a stage in America that it was only prejudice that was responsible for people buying imported stock at higher prices.

"The breeding of horses in this country is improving," said Mr. Rommel. "It's got to, because the market won't have anything to do with a horse that is not good."

"Our farmers have gone very largely into breeding draught horses, especially in the more level parts of the country, where there is no hill work. The cheap light horse of 1200 pounds or under is not wanted any more, but there is just as much demand for a good light horse as ever. The farmer has got to breed either a draught horse or a light horse, and whichever he breeds he has got to insure a good one. There is a market only for good horses. If the farmer mixes a light and a heavy animal he gets a lot of pluggy animals that he cannot sell. If he breeds a good big sound draught horse of 1600 pounds he has no difficulty in selling him. On the other hand, if he breeds light horses and is careful to see that they have good conformation, style and action, he has also got a salable horse for carriage and saddle purposes."

"It is harder to breed light horses. Let a carriage horse have a blemish or a scratch and he will be turned down by the big dealers. What made the Americans go into the breeding of big draught horses was largely the increase in the size of farming implements and machinery. The farmer is using bigger ploughs. Where he used to use a single plough he now uses a double one, where he used to employ a walking plough he now rides. Then he has taken to big three-horse ploughs. Besides, pulling conditions in the cities have created a demand for the big draught horses produced on the farm."

"Horse shows have done a great deal toward improving breeding. The farmers are taking more pride in their stock and there are more state and county fairs than ever. It is not as easy to get a prize as it used to be, for there is so much more competition."

"I should say that the most intelligent breeding in this country is being done in Kentucky, in the Blue Grass region. There they have had long experience, and the farmers are horsemen and understand the principles of breeding and they are good judges of horseflesh too. Practically no draught horses, however, are to be found in that region, and it is just as well that there are not. Instead they use mules. When they have a mare that is not fine enough to breed a good saddle or carriage horse they breed her to a jack."

"The best draught horses in this country are bred in what is known as the corn belt, which runs from Kansas and Nebraska on the west to Ohio on the east, and of which Iowa and Illinois are the center. There are parts of the east too where they get good draught horses. Frederick and Carroll counties, Maryland, and Loudon county, Virginia, produce just as fine specimens of this kind as are raised anywhere."

"Do I think the automobile is driving out the horse? Well, figures show that horses are not diminishing, in fact that there are more horses in the country than ever. I believe, however, that there are fewer light horses. The experience of any one buying horses seems to bear this out. For instance, the government finds it extremely difficult to mount its cavalry."

"The automobile, as near as I can ascertain, has driven a great many cheap light horses off the roads, and probably driven some saddle horses out of the cities. But it doesn't appreciably affect draught horses, except the light delivery horses of say 1200 pounds. If the auto has driven out the saddle and carriage horse generally, why is it that these are higher in price than before the auto came? The people who before the advent of the automobile were the best customers for saddle horses were such as could afford to have both horses and automobiles. When the auto came it drove out the cheaper grades, but the prices of the better ones went skyward. There is a better market than ever for the good light horse and a poorer than ever for the poor one."

"What is the department doing to better the breed of horses? Well, it has now three breeding stallions, one of Morgan horses in Middlebury, Vt.; another for breeding carriage horses from American stock at Fort Collins, Colo.; the third for conducting experiments in breeding grade draught horses in Iowa. The Percheron is pretty well established here and is quite equal to the foreign bred. In Iowa we are crossing Shire horses and Clydesdales. There is no reason why a foreign bred draught horse should bring more than one produced here."

The period of gestation in different mares varies from ten and one-half to twelve and one-half months, and is liable to vary in different years in the same mare. The usual period for the average of mares is about 340 days or eleven months and ten days. It was thought years ago that in all cases when the period was protracted the produce would be a male, but in some of the longest periods that have come under the observation of the writer the foals have been fillies.

Drink Jackson's Napa Soda.

AT SANTA ANA TRACK.

Los Angeles, Cal., Nov. 30, 1910.

Breeder and Sportsman:—I have just visited Santa Ana and thought you would be interested to know how the harness horses are doing that are quartered there.

Mr. Jas. Stewart has a very promising stable, amongst which is Lady Mc by Zombro, dam by Titus, second dam, the dam of Era 2:10 that has paced a mile in 2:05½, first half in 1:03½, last half in 1:02.

In the same stable is the green pacer owned by Mr. L. J. Christopher, that is by Symboler. This colt with very little handling has been a mile in 2:16, a half in 1:04 and repeated on several occasions.

Mr. Stewart owns a beautiful colt by Petigru 2:10½, dam Eagleletta 2:11½ that has worked a mile (pacing) in 2:14 and a half in 1:06.

Mr. A. Heller, owner of that fast green pacer Hal McKinney, three-year-old trial 2:04¼, has several very encouraging prospects. One is a very beautiful sorrel filly by Young Hal that has paced a mile in 2:18 and a half in 1:04. Another good one in Mr. Heller's charge is a pacing mare by Neernut that has to her credit a mile in 2:16 and a half in 1:03½.

Mr. V. Campbell has a very good Direcho that with practically no work has been a mile in 2:24½.

I am enclosing you two pictures one of Easter D. and her 15 months old Zolock filly. Easter D., you will recollect, at the age of 25 months, won the Breeders' futurity, beating Jim Logan in his two-year-old engagement.

The other picture is of my green trotter, Etta McKenna, by McKenna, dam Miss Jones, that showed a mile last year in 2:12 for Mr. Stuart. I have just turned her over to that gentleman to work again.

Mr. Lennie Wise's four-year-old filly by McKenna, dam by Atto Rex, is pacing this year, showing quarters in 35 seconds. She is a little high in flesh.

Respectfully yours,

JOSEPH SRESOVICH.

THE CONQUEROR WINS IN FAST TIME.

At the matinee of the San Bernardino County Driving Club held on Thursday, November 29, The Conqueror, owned by Mrs. M. S. Severance won his race in 2:12½ and 2:09½, which equals the track record made by Delilah 2:06¼ on Christmas day, 1908. The race was a most exciting one and H. Ergenbrod's The Monk was only beaten a length or so in the second heat, being separately timed in 2:10. There were six races on the card and all were most interesting. On Christmas day another matinee will be held and there are prospects that several Santa Ana horses will be entered in addition to the speedy steppers from Riverside and San Bernardino counties: Results:

First event, 2:40 pace:
Kid Downey (June)1 1
Big Boy (Teteley)2 2
June Wilkes (Carrigan)3 3
Time—2:39, 2:39½.

Second event, free-for-all trot:
On Coon (June)2 1 1
Neerest (Spoor)1 2 2
Marigold (Judd)3 3 3
Time—2:19½, 8.21, 2:21½.

Third event, free-for-all pace:
The Conqueror (Severance)1 1
The Monk (Ergenbrod)2 2
On Bly (Campbell)3 4
Zenobia (Parker)4 3
Time—2:12½, 2:09½.

Fourth event, 2:25 trot:
Buster Wilkes (Lemm)1 1
Mable Van (Van Tress)2 2
Time—2:26½, 2:25½.

Fifth event, 2:25 trot:
Ben Hal (Parker)1 1
Am. Bonnell (Talmadge)2 2
Time—2:25, 2:21½.

Sixth event, 2:30 trot:
Dark Streak (Webster)1 1
Inyo Boy (Parker)2 2
Time—2:29, 2:29½.

RACE AT STOCKTON.

During the afternoon of Sunday, November 27th, automobile races were held at the Stockton track, and an aviator also gave an exhibition. For those who enjoy harness racing a race was given in which McDougal and Linden Girl, trotters, and Ben Walker, a pacer, competed. The race went to McDougal after Ben Walker has taken a heat.

The two-year-old pacing colt One Better by Nearest McKinney was driven an exhibition mile during the afternoon, pacing a mile in 2:16½.

The summaries of these events follow:

Mixed trot and pace:
McDougal (t) by Stam B. (Kemp)2 1 1
Ben Walker (p) by Guy McKinney (Lieginger)1 2 2
Linden Girl (p) by Guy McKinney (Nance)3 3 3
Time—2:25, 2:25, 2:23.

Exhibition mile; two-year-old pacer:
One Better, by Nearest McKinney-Much Better (Bunch)1
Time by quarters—34, 1:08¼, 1:43, 2:16½.

The total number of new 2:10 trotters for the year is fifty-seven, which is thirteen more than had entered the list in any previous season.

THREE STALLIONS AT AUCTION.

N. A. Richardson, administrator of the estate of Ben Davies, deceased, of San Bernardino, advertises that three stallions belonging to the estate, Zolock 2:05½, Izalco and Blackamoor will be sold at auction on Saturday, January 14, 1911.

Zolock 2:05½ is well known to horsemen everywhere. He is a son of the great McKinney 2:11¼ and one of the best bred ones that ever stood for service on this coast. His dam is Gazelle 2:11½, a first class race mare by Gossiper 2:14¼, son of Simmons. Gazelle is the dam of Zolock 2:05½, Zephyr 2:07¼, Abe Miller 2:17¼, etc. His second dam is Gipsy by Gen. Booth 2:30½, son of Geo. M. Patchen, and she produced Delilah 2:06¼, Gazelle 2:11½, Ed Winslip 2:15, and several others with fast records. The third dam is Echo Belle by Echo, sire dam of Direct 2:05½, etc. Zolock was a good race horse and took his record in a winning race. He is a very successful sire, having twenty standard performers, of which six are in the 2:10 list. He is a grand individual, a very reliable horse in the stud and is considered one of the best bred as well as one of the most successful of the sons of McKinney. Zolock is fifteen years old, having been foaled in 1895.

Izalco, son of Zolock and Blackamoor, son of Nushagak, the other two stallions to be sold at the same time are fine individuals and well bred. Both are coal black, square trotters, level headed and weigh 1050 and 1100 pounds respectively. For their breeding reference is made to the advertisement in this issue of the Breeder and Sportsman.

DEATH OF COL. IRVIN AYERS.

At his home in Oakland, Cal., on the first day of the present month, Col. Irvin Ayers, a prominent citizen of this State passed away at the advanced age of 78 years. Mr. Ayers was a native of East Creek, New York, and came to this coast fifty years ago. He was one of the pioneers of Nevada, but moved to California many years ago and engaged in business in this city, residing in Oakland. He was a great admirer of the trotting horse and in the early 80's established the San Miguel Stock Farm in Alameda county. He purchased the stallion Mambrino Wilkes 6083, son of Geo. Wilkes and Lady Chrisman by Todhunter's Mambrino, and placed him at the head of his stud, and bred Balkan 2:15 and many other standard performers. Col. Ayers was for several years a director of the Pacific Coast Trotting Horse Breeders' Association, but after the dispersal of his stock farm some years ago he did not take an active interest in breeding, but retained his love for this breed of horses and greatly enjoyed recounting the horses and races of other days. His death will be sincerely regretted by a very large number of friends and acquaintances. He leaves a widow and four sons to mourn his loss.

THE FAMILY HORSE.

The hardest kind of a horse to find, is the so-called family horse. To fill the bill The Horseman says he must be first of all, absolutely fearless of all objects. At the present time this means a great deal.

Next he must be of good size, capable of hauling a two-seated vehicle at a comfortable road gait. If he can move along at a good gait, so much the better. Then again, he must be a good looking animal. No sane man likes to drive a homely, rawboned horse. He must be reasonably sound, and willing to stand quietly while the family get in or out of the carriage.

Another important point in the education of the family horse, do not neglect to teach him to hold back heavy loads, and do it gracefully.

Oftentimes in cities the horse must stand on a steep hill, holding the carriage and its four or more occupants while a train blocks the crossing, for five, ten or more minutes (this insult to humanity is only allowed in the United States). With timid ladies in the carriage the horse that will not stand still under such conditions, is a great source of annoyance.

ANSWERS TO CORRESPONDENTS.

Geo. L. Parker, Portland, Oregon.—Poscora Hayward 2898, was a gray horse, foaled 1874, got by Billy Hayward 439 (son of Geo. M. Patchen Jr. 31 and Gray Liz, said to be by Morse Horse 6). Poscora Hayward's was Poscora Maid, by Leonard's Poscora, son of old Poscora, second dam of Horner's Black Hawk. Poscora Hayward's record was 2:23½ trotting.

Subscriber, City.—The August, 1894, meeting of the Pacific Coast Trotting Horse Breeders' Association was held at the old Bay District track. Shylock by Tom Benton, won the \$1000 purse for 2:17 class trotters. There were five heats in the race, Adelaide McGregor winning the first two, and Shylock the next three. Lucy B. was third. The times of the heats were 2:19, 2:18, 2:15½, 2:17½, 2:17½. Shylock was a full brother to Mary Lou 2:17, the dam of Kinney Lou 2:07½, sire of the world's champion yearling colt, Wilbur Lou 2:19½.

"FINEST EVER USED."

Mr. D. McDonald of Montreal writes as follows: "Enclosed find money order. Kindly send me five bottles of Quinn's Ointment. I must say it is the finest I have ever used." For Curls, Splints, Sprains, Windpuffs and all enlargements, use Quinn's Ointment. Price, \$1.00, delivered. Address W. B. EDDY & CO., Whitehall, N. Y., if cannot obtain from Druggist. "First Class Remedy."

BREEDING HORSES FOR ARMY USE.

In the annual report of James Wilson, Secretary of Agriculture, made to the President at the opening of Congress we find the following:

"For some years the United States Army has found great difficulty in obtaining a sufficient supply of horses of a suitable character, and this condition led the Secretary of War during the past fiscal year to invite my co-operation in working out some plan for meeting the difficulty. A representative of this Department was accordingly designated to confer with the representative of the War Department, and these gentlemen have submitted reports pointing out the necessity for government encouragement of breeding army horses and outlining a definite plan with an estimate of the cost. It appears that on the present peace footing the mounted service of the Army requires from 2000 to 2500 horses a year, and in order to supply this number of suitable animals it is estimated that at least 100 stallions would be required. These stallions should be purchased and owned by the government, and arrangements should be made for the use of privately owned mares of suitable type and breed, the War Department to have an option on the purchase of the foals. It is estimated that the cost of putting such a plan into execution would be \$250,000 for the first year for the part of the work to be administered by the Department of Agriculture, and that the annual expense of maintaining this work thereafter would be about \$100,000. It seems essential that the Government should undertake some plan of breeding suitable horses if the efficiency of the mounted service of the cavalry and artillery branches of the Army is to be maintained, and such a plan would also have experimental possibilities of high value to the horse-breeding industry."

DRAFT HORSES SHOULD WORK.

That is the principal argument in favor of a farmer keeping draft mares. While high-class draft mares, either grades or pure-breds, may be kept in idleness and still return a profit, their income is ordinarily much greater and more certain if they are worked. Farmers need the work, and work with intelligent management agrees with the mares. Abundant testimony of successful breeders has been presented in these columns of late showing that mares may work steadily on the farm while breeding regularly and raising strong growthy foals. Of course mares can be abused at work, and they can also be abused in idleness. The draft mare needs exercise. Many of them need more of it and more moderate exercise than they are inclined to take voluntarily in a small pasture where life gets dull. The idle mare is inclined to break the monotony with an occasional frolic, to run and jump and kick, slipping and straining her soft muscles. She may do far more damage to herself in this way than is done by the little extra hard pull to which the hardened muscles of the working mare may occasionally be unavoidably subjected. The Percheron mares of France that produce the colts imported to this country are mostly working mares on the farms of average thrifty farmers, who can afford no such luxury as a big strong idle mare. Many of the largest owners of pure-bred mares in America give their mares as much work as they can find for them to do. The pure-bred mare is one of the best investments for the small farmer if he will also allow her to share the work of the place. She will no nearly as much work as a gelding and raise a colt besides. If she is a good mare and bred to a stallion of the best type, the colt will be worth as much as a weanling or a yearling as a grade colt would bring at maturity, perhaps considerably more. Breeders' Gazette.

THE ESTABROOK HORSES.

The horses that Gus Macey shipped from Lexington to Denver are Country Jay 2:05¼, a world's champion two ways but who will probably not be asked to race again; Spanish Queen 2:07, who holds the world's race record for a six-heat race jointly with Demarest 2:06¼; C. The Limit 2:06¼, Gold Dolar (4) 2:09½, Bonnie Russell 2:10¼, Countess Marie (3) 2:14¼, Hydrangea (2) 2:28¼, McKinney Mac (1) 2:27¼, Lilly W., trial 2:06¼; the pacer Minor Eel, trial 2:08¼; Lady Jayquita, a two-year-old trotter who trialed this year in 2:21, and two others. The Estabrook stable will be engaged next year at all the prominent meetings from Grand Rapids to Lexington and Mr. Estabrook believes that he ought to have two strings to his bow for every big early-closing event. And he has it. The result is that he will be one of the best patrons of the big events next year. Early in June the horses will be shipped to some point in the East, either Detroit or Grand Rapids and given their final preparation for the races.

There are few better business managers among trotting horse trainers than Lon McDonald. Last spring he found he had a number of horses in his stable that were not of Grand Circuit class and, instead of sending them back to their owners, he put them in charge of one of his assistants, and sent them to the minor circuits, where they won about \$8000 for him. This was vastly better for both McDonald and the horses' owners than to let them remain idle, and a few of them improved so much while being raced on the two-lap tracks that they are regarded as good enough to get ready for a mile track campaign in 1911.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DOWITT.

EARLY EFFORTS AT GAME PROTECTION.

(From advance sheets of "American Game Bird Shooting.")

Most of the efforts at restocking our covers with exotic birds have been carried on in an unintelligent and aimless way. The belief seems to prevail that because our native species have disappeared—while game birds in Great Britain are still so abundant that good shooting can generally be had—therefore these foreign species are more prolific and better fitted to survive than our native birds. People who reason in this way forget the widely different conditions prevailing in the two countries—the great size of the land holdings in Great Britain compared with those in this country, the fact that trespass laws are there strictly enforced, and the further fact that game is there regarded as the personal property of the owner of the land, while in the United States up to within a few years the game has been considered the property of whomsoever might reduce it to possession.

On one side of the water are large estates to which the public is not admitted, while game birds are artificially reared and carefully protected to prevent destruction by natural enemies, as well as by poachers. The result of this is that at the end of a season a crop of game is harvested and sold. In the United States are a series of small land holdings, over which until within a very short time, everyone, man or boy, citizen or alien, was at liberty to roam freely and destroy at will. The game is left to reproduce itself, is exposed to attacks by its natural enemies as well as by all human beings who may wish to take it, and is only protected by laws which exist on the statute books, but are inefficiently enforced. Here, each gunner wishes to shoot, and in practice may shoot, from daylight to dark, seven days in the week. Add to this that a large portion of the public here is accustomed to the use of firearms, and that we have the best guns and ammunition in the world, and it is not difficult to see why game is very scarce in most sections of North America.

In the thickly settled districts of the Eastern and Middle States matters have gone so far that it is difficult to suggest a means by which a stock of birds for field shooting may again be obtained, except the one means, which gunners will adopt last of all, the practice of self-control in their shooting. One result of this state of things is that a considerable proportion of the men who formerly followed the dog afield, and a very large proportion of their descendants, have taken to shooting targets at the trap for the reason that within the reach of most of us there are no birds to be had.

I have never advocated the introduction into this country of foreign species of game, believing that our native species answer our requirements better than any foreign birds, and believing also that there is great danger in introducing exotic species into any country. I have believed that by the establishment of game refuges in various sections of the country the native game might be preserved and increased to such an extent that it would overflow into adjacent territory, and that thus in each game refuge we should have a permanent source of supply which would at least prevent the extinction of species for any locality. I feel about the introduction of exotic species much as does Mr. Brewster, who, in his "Memoir on the Birds of the Cambridge Region," says, speaking of the pheasant:

"From the standpoint of the naturalist the introduction of most exotic forms of animal life must be a matter of regret rather than of satisfaction, and these pheasants, despite their undeniable beauty of form and coloring, and reported value as game, seem deplorably out of place in a New England landscape. Even if they did not crowd out our quail or ruffed grouse—as it has been feared they may—or devastate our cultivated crops—as they are already accused of doing—it would have been much wiser to expend the time and money which have been devoted to their naturalization in fostering and increasing our stock of native game birds."

The turning loose of foreign birds to take care of themselves in a climate to which they are unaccustomed and among conditions more or less different from those in which their ancestors have lived, is not likely soon to make much difference in our shooting. A few hundred birds turned loose in a township or a county would have to increase enormously before they would be sufficiently numerous to make the shooting good. Everyone killed would reduce the breeding stock, the process of reproduction would be slow and the final results, even if favorable, might not be important for a generation.

Besides this there are serious possible dangers in the turning loose of foreign birds. There are some reasons for thinking that these foreign birds carry with them the germs of certain diseases to which they themselves are immune, but which may be communicated to our native birds with fatal results. It is believed by some investigators that the domestic fowl carries with it the germ of a disease which is

fatal to the turkey, and to our quail and grouse, although the young of the hen do not suffer from it.

Many examples might be cited of the danger of introducing into a new land an animal, harmless in its own home, but which, when transported to a country where conditions are especially favorable to its existence and it finds few or no enemies, has increased to such an extent as to become a nuisance, if not a public menace. The cases of the rabbit in Australia, of the English sparrow in North America, and of the mongoose in some of the West Indian Islands, suggest themselves at once.

Happily, within the past two or three years, the experiment of hand rearing some of our native game birds has apparently advanced well along the road to success. If it cannot be said that any of the public establishments for rearing such birds have been successful in any great degree, it is yet true that they hatch and partly rear many birds. Almost always it has happened that before the birds reached maturity, certainly before they had reached the breeding age, death in some form or other has overtaken them. It was left to a private individual, to take up this matter of rearing native birds as a hobby and to succeed in it beyond the expectation of anyone, possibly beyond his own hopes. Certain it is that Prof. C. F. Hodge, of Clark University, at Worcester, Mass., has succeeded in rearing from the egg a considerable number of ruffed grouse and quail, which birds are no more timid and fearful of the members of their owner's family than they are of their fellow birds. Not only are they tame in this way, but they manifest no fear whatever of strangers. Within their inclosures they carry on the operations of their daily life with the same unconcern that they would manifest if they were hidden in the depths of one of their native swamps, and this whether human beings are in the vicinity or not. Broods of quail which Prof. Hodge has reared and turned out to shift for themselves will come at his whistle, flying from all directions, expecting to be fed.

Gradually legislators are awakening to the increasing scarcity of bird life about us, and to a comprehension of the invaluable services performed by the birds for agriculture. It has taken the public a long time to begin to comprehend what these services mean, and it is yet, standing only at the threshold of his knowledge. But having made this small beginning our faith may be strong that this interest will increase, and that before long the birds will be generally recognized as a natural resource of this country which should be conserved.

In a number of the States and Provinces the law now provides that there shall be no spring shooting; that non-game birds shall not be killed nor their nests and eggs disturbed, and that the shooting seasons shall be short—not more than two, or at most three months. In some States the laws provide that only a limited number of birds may be taken during one day or during one season. This provision should obtain everywhere, as well as the now very generally accepted view that game birds shall not be sold. In many States we have excellent laws which, however, lack something of satisfactory enforcement.

OUR FRIEND THE FOX.

No doubt it would surprise most sportsmen to be told that fox hunting depends on mice. Nevertheless this is true. The vast population of mice in England—it has been calculated that there is a mouse to every square yard in the country—form the staple food of all beasts and birds of prey.

Every carnivorous animal from the fox to the shrew preys upon the mouse, but with the possible exception of the owl the fox is the keenest mouser of them all. In his infancy the fox learns to hunt by the pursuit of field mice, which the vixen partly maims for the purpose, and all through his life the fox makes mice one of the staples of his diet.

He hunts them as much by the keenness of his hearing as by the acuteness of his nose. A faint rustle in the leaves, a tiny squeak scarcely perceptible to our duller ears, a lightning pounce and the prey is secured, to be devoured there and then, or in the breeding season to be carried back to the cubs.

It is commonly thought that foxes live on rabbits, fowls and pheasants, but these are but a small part of the dietary of the fox. Indeed, if foxes was as destructive as they have the credit of being in the poultry yard and the game preserve it would be difficult to keep fowls or to preserve pheasants at all.

If, as is calculated, 11,000 foxes are killed by hounds every year in Great Britain and at least as many more are destroyed by keepers and other enemies, it is probable that in September in each year there are something like 50,000 foxes in the country.—Baily's Magazine.

Road Hunting.—It is a stand-off between the gun club members and the road hunters of Orange county as to which faction is getting the most sport out of the present duck season. The road shooters admit that they are not getting as much game as the preserve men, but some claim they are having more fun.

HUNGARIAN PARTRIDGES THRIVE.

The experiment of introducing in this State a European game bird, the Hungarian partridge, seems in some localities to meet with success. These birds are hardy and vigorous, are prolific breeders, and will stand the rigors of winter where the valley quail or its mountain cousin will succumb.

In captivity, as instanced at the State game farm, near Hayward, these birds thrive. Consignments of the partridges have been received by the State Fish and Game Commission, and after a brief period of recuperation at the Hayward "runs," the birds have been distributed in favorable territory throughout the State. The partridges are planted on ranges where there is a chance to protect them from gunners, it being illegal to hunt or kill imported game birds in this State, and also from the ground vermin, coyotes, wildcats, etc.

Considerable discussion has arisen as to the ability of this particular bird to protect itself against the onslaughts of ground vermin or birds of prey. In many Eastern States the experiment of attempting to introduce Hungarian partridges has been successful. What the venture in this State will eventually produce is, for the present, a matter of some debate, but if the testimony of different interested sportsmen is of any value, there is apparently a good chance for a successful issue.

A recent report from Deputy Frank C. Cady anent a bunch that were turned out near Susanville states: "They are extremely shy and hard to keep tab on. Seven of the partridges have kept close to the spot where they were first liberated, and one brood of fourteen chicks has been seen. The balance were seen at different places. The pheasants and desert quail liberated at the same time have done remarkably well, and there were a large number of the young birds."

John McNab, writing from Ukiah, states in substance: "For a time it was feared the winter climate had killed the birds. During the summer months they had increased plentifully. They do not seem to stay around the valleys, but are found fairly high up on the mountain slopes. We believe that they are thriving and intend to protect them."

Deputy E. H. Ober offers information concerning partridges put out near Independence, in the Owens River valley, Inyo county: "They have done splendidly and have shown a decided increase. The birds liberated near Big Pine have not prospered as well. However, a good proportion of the old birds are still in evidence. Last winter was exceptionally severe, and from this fact I believe a number of the young birds perished during the unusual cold weather. Six pairs that were put out near Bishop were frequently seen last spring. The ring-neck pheasants are showing up very well, especially so in the upper part of the county."

Willett S. Foster, secretary of the Kings County Fish and Game Protective Association, offers testimony. "The Hungarian partridges shipped to Hanford are doing finely. We have a splendid range for the main bunch, nearly 3000 acres, amply patrolled. The increase has been good, how much we are unable to state. The birds have paired and spread out. Numerous broods of young birds have been seen."

Judge V. Arrasmith of El Dorado is quoted as follows: "Young birds have been noticed within a half-mile of town. The partridges have also been seen near the place where they were first liberated. Our sportsmen have been zealous in destroying ground vermin in this section. We believe the birds will thrive here."

Deputy George Neale of Sacramento reports that young partridges were seen on the Del Paso ranch two months after the old ones were liberated. After August last, however, they were not seen or heard of. A portion of this allotment were put out along the Sacramento river two miles from Tehama. These birds have had better luck. Several large coveys were noticed last year and also this year. Deputy Neale's belief is that the shotgun and not ground vermin—there being nearly 4000 licenses issued for Sacramento county—was responsible for a questionable showing in favorable territory.

Deputy A. L. Tibbet of Bakersfield liberated Hungarian partridges in a hushy country last year. Several small broods were observed this spring and summer. He is of the opinion that the birds have thrived nicely for the first year. There was a goodly number of young ones. It was difficult, however, to keep track of all of them in that district, but from twenty to thirty chicks were in each brood seen.

Judging from the numerous requests received by the Fish and Game Commissioners for parent stock, the Hungarian partridge will thrive in this State when turned loose in territory that is favorable, and evidently such location has been found in many sections.

Record Rock Bass.—Guy H. Feters, a Los Angeles tyro, caught the record rock bass at Newport the 17th inst. The bass scaled 12 pounds and is 4 pounds heavier than the largest taken prior to that in Newport bay. Feters and Charley F. Raynaud, formerly a member of the Schellville Rod and Gun Club of this city, had been doing a little hunting at times when the fish were not biting well and succeeded in bagging twenty-eight ducks on the sloughs hack of the bay, and claim that they did no poaching on the gun club preserves in the district in doing so.

Drink Jackson's Napa Soda.

GAME WARDENS ACTIVE IN ALAMEDA.

L. Philliber and C. A. Muller, residents of Berkeley, were arrested last Sunday by Deputy Fish Commissioners Joseph W. Silva and W. I. Sedgley for having more ducks in their possession than the law allows. The arrested men were taken before Judge Prowse of Hayward, and each deposited \$150 bail for appearance on Monday. When the case was called both defendants pleaded guilty and were fined \$50 each.

The Alameda marsh from Bay Farm island down to Alviso has been under the espionage of the Fish Commission officials since the opening of the season. Next to the Los Banos and Colusa sections, where the market hunters are most numerous, this district has been given particular attention, more so than for many years past. Numerous instances of game-law violations have been reported, but the shooting territory is a hard one to get over.

The arrested men have a shack near Alvarado, two miles below the Continental Salt Works. They had been in the practice of shooting on week days, and avoided suspicion by not hunting on Sundays or Wednesdays, at which times many other gunners were out. It is claimed that observation of fat game hags was averted by the automobile direct route to Oakland and Berkeley, where the overplus bags were sold.

The deputies watched the two men for several weeks. Last Saturday they were in position to note any carelessness in regard to the duck limit. All day Sunday the vigil was kept up, and at 5 o'clock in the afternoon the State officers caught the two gunners coming up with their boats loaded down with many ducks. One hundred and twenty birds were counted—seventy more than the legal limit.

The two arrested men were prevailed upon to carry the illegal wild game into Alvarado, it being dark. About forty birds were surreptitiously dropped here and there, but not enough to ease up the exceeded limit. The birds confiscated were given to the Roosevelt Hospital on the convicting magistrate's order.

The arrest and conviction is one that has the hearty appreciation and approbation of hundreds of sportsmen that shoot in the Alameda marshes.

Night shooting, which is not tolerated by the game law, has for years past been a common practice in the Alameda salt marshes. The Fish Commission has had numerous deputies in this territory ever since the season opened. Night shooters are very cunning, always on the alert, and shift from place to place, ever ready to ditch their illegitimate quarry.

Walter Lamp was arrested at Bay Farm island, Alameda, Saturday afternoon by Deputy Silva for shooting seagulls. He pleaded not guilty before Judge Johnson of Alameda and deposited \$10 cash bail and will appear for trial.

C. Strout, manager of the wild game department of the Galli Fruit Company, Oakland, was fined \$50 Monday by Judge Geary of Oakland, for having more than the legal limit of ducks in his possession.

LONG DISTANCE SHRIMP SEIZURE.

The shrimp fishing industry in San Francisco and San Pablo bays as carried on by the Chinese shrimp netters has long been under the ban of suspicion that the business has not been carried on in strict conformity with the State law, particularly in the matter of exporting dried shrimp from this State.

Despite the espionage of the Fish and Game Commission deputies the dried crustaceans are frequently shipped from this State in various ways and by different subterfuges, for which the wily Oriental shippers are never lacking. Chinese cunning, however, is not always potent. Several months ago a schooner left San Francisco for Monterey with quite a consignment of dried shrimp for that port. The boxes of shrimp were shipped by rail to San Jose. From this point the consignment was reshipped, billed through to New York under a fictitious invoice title. The eventual destination, a Chinese port, would then be merely a matter of shipping, and in due course the shrimps, regarded in China as a table delicacy, would be served on the tables of Chinese epicures. One thing spoiled this careful arrangement—the entire shipment was seized at San Jose and confiscated by deputy commissioners.

The conviction of Lee Hoke Suey in Judge Welles's court last Tuesday and sentence to pay a fine is a case illustrative of a cunningly contrived scheme to beat the export law on dried shrimps, but which failed to materialize.

When the Korea sailed August 22d a modest portion of her cargo was one lot of seventy hags of "coffee," properly invoiced to Hongkong.

The Fish and Game Commission received information concerning the contraband sacks, and, notwithstanding the dried shrimps were on the high seas, efforts were immediately made to get at the crux of the matter.

Governor Gillett wired the State Department at Washington, this, by the way, being the initial Fish and Game Commission case in which a Governor of this State took active part. Cables from Washington to George E. Anderson, the American Consul-General at Hongkong, and also from Governor Gillett and the Fish and Game Commissioners, eventually placed the matter before the Colonial Government at Hongkong, with the result that when the Korea arrived in that port the suspected sacks of "coffee" were opened in the presence of the steamship agents, Captain Sauberg and First Officer Allman of the Korea and examined by English port officials, with the

result that every sack was found to be filled with dried shrimps, covered with an outer thin layer of coffee.

The shrimps were found under British jurisdiction, and could not be seized and sent back to this port, notwithstanding the proper documentary evidence and affidavits were prepared and forwarded to this city. Although the prosecution of the case depended upon circumstantial evidence, this evidence was so complete and conclusive that it was accepted as strong enough to convict the defendant shipper.

The dried shrimps were in a safe port; the \$100 fine is amply covered by the big profit that will be made. The tip is out that Chinese shippers propose now to store their shrimps and send them out of the State concealed in packages of other goods. It being next to impossible to examine every package or case of goods exported, a shrimp famine in China may be partially averted.

RANDOM NOTES.

[By Loch Laddie.]

In answer to an inquiry regarding pups, from brief description, I would say, choose the one that gets out and hunts. The dogs are so young it is hard to make a fair decision regarding them. One thing in choosing youngsters, forget type, color and other show point features and judge by field performance. Most dogs are kept for their use afield, and in this respect conformation is not an easy guide to go by and the average man wants a dog that will hunt and not to pose. But at the age of six months many pups do not show what is in them and the one that might in the future show class of the most desired shooting type possibly may hug your heels and refuse to get out and search for a long time.

Judgment on young field dogs is replete with failure. So many things turn up to contradict one's first impression that it is always best to reserve opinion until the dog has been given plenty of opportunities. Young dogs are not difficult to handle, but they are very susceptible to failure in changing hands, and that is one reason why a majority of sportsmen buy dogs at three years of age, for then if the dog has had proper field experience, the retention of game knowledge can be depended on as a certainty. And field condition is the only accessory to a pleasant outing. A dog that possesses field condition is a desirable companion; one without it, after a few hours, a pest. Many dogs can go a half day with ease, and in fact the whole day, but what a difference in the morning—too sore to hunt—and many a one that is sent out to brave the brush, stubble fields, high weeds, etc., willingly indulges in the task set before him, but the next day is so sore that he can hardly move.

The best diet I have ever found for working dogs is one easily secured—and one I have chiefly used, and rarely, even under the warmest conditions, does eczema result from it. Bread is baked at the bakery in 300-pound lots of wheat shorts and graham flour; two pounds of blood meal is added to this bread; cost comes to about three cents a pound. A broth of well boiled rice and beef scraps is cooked and the bread broken into it and fed when cool. This is the best working diet I know of and in all will cost you about 3½ cents per pound and possibly in a large city the baker can figure more closely.

Great caution should be exercised in drying out the bread so that it will not become mouldy. If it is set upright in a sunny room with sticks between each layer of bread, there is not much danger, but if piled up, loaf upon loaf, (25 pounds each) you are certain to lose two-thirds of it.

Many like to feed meal. In a more northern climate it is not to be despised, but with the writer it invariably, if persisted in, brings about skin troubles.

Buttermilk, while its nutritive value is not very great, keeps the stomach of a dog in good condition, and as it possesses a certain amount of protein and could be fed with some fattening food to make a balanced ration. With field dogs, a bone and muscle maker is more essential than a fattening diet. All kinds of vegetables cooked in with other foods form a relish and help keep the blood in condition. Cabbage seems the most favored of any, for dogs are very fond of it and not so likely to become tired of it as of other vegetables.

Often it takes time to teach a dog to eat rice, but after he has become accustomed to it, well cooked with cheap beef scraps, there never seems to be another food that can take its place as an essential in a working diet. Of late years there are many prepared foods for dogs on the markets that one with a modest kennel is not obliged to do any cooking. The only caution he should show would be in changing foods as soon as a dog is tired of one diet. Dog biscuits are invaluable to many and can be secured in any large city. Fresh raw beef can be safely fed a few times a week, possibly oftener. The dog owner in a large city should have no difficulty in securing the fresh cheap cuts of meat. Many are prone to trace distemper to a meat diet, an idea that has long ago been exploded. To the contrary, it is possible enough of it will put a dog in condition to pull through a hard siege of the scourge.

When a dog is seen eating grass the average amateur trainer is apt to rush for the dope box on the erroneous theory that a grass diet is a sure indication of approaching canine illness. This is not infallibly correct. Often an animal eats grass as a tonic or a relief from worms, but more often as a relish, as a

human eats lettuce. In winter note the readiness with which a physically sound animal will rush to the patch of green rye or oats and browse therein with apparent delight. This is the well animal, not the sick, mind.

The true field trial enthusiast is the one who is accustomed to disappointments; his youngster may show all the class necessary to outstrip his competitors both in speed and bird work, but at the last moment goes wrong, perhaps from some kennel accident, disease or just out of form. His second choice is then started and if he secures place he is satisfied, but never so much so as if his first selection had secured the coveted place. But the more so is a winning greeted with enthusiasm when a dog of his own breeding, both dam and sire, places the honors of a championship in the kennels of his master.

Possibly in no kind of sports are there more uncertainties than in the field trials. The different sets of opinions of the judges and more than all the varying dispositions of dogs cause the unexpected to happen invariably. One dog may be bold, dashing fellow, unawed by the presence of strangers, another his equal in everything requisite in field competition, but possessing sufficient antipathy towards strange company, enough so as to affect his work at the trying moment—adds emphasis to the uncertainties of the sport.

The writer remembers several years ago when trials were held in Minnesota, of a certain bitch, the daughter of Ch. Sports' Boy, her speed and bird work was a revolution to the old-timers and it was freely predicted that there was no competitor in an all-age stake who had the least show with her. Together with her great class she had the advantage of having been constantly worked on the grounds where the trials were to be held. The day of the race, she and her opponent were put down; suddenly she espied a roan horse, ridden by one of the judges. She at once went to heel of this horse and no coaxing of the trainer could induce her to leave the horse, though so far as was known she had never set eyes on it before.

There seems to be a broad distinction nowadays between the class field trial dog and the crack shooting dog. Regarding the latter there is so much difference of opinion as to their merits it would be hard to set a standard in the average sportsman's opinion, as to which kind of dog is the best broken for a shooting dog. I rather think the dog that adapts himself quickest to environments is the dog that will please the most as a field companion. One man wants the dog that works to signal, never to range further than his master's wishes, and to hunt out every piece of ground in a zig zag fashion. Another man wants the dog to hunt the fields and not himself; the greater his range and staunchness and the quicker the dog acts in locating the better suited the master. So the average trainer must bear in mind the wishes of his patron and forget his own likings on the subject. The first dog soon loses his natural bird sense in his subservience to the master becoming a mere automaton. The latter gains in bird sense the oftener hunted. The contrasts in these dogs and their individual value become more apparent in a quail country—a country made up of fields and coverts. In the open the rangy dog has all the advantages and even in woods he often outclasses his brother on the single bird work, but where the shooting is at grouse or woodcock, the slow zig zag worker gets results to prove that he is all right in his place. The nearer a dog, by this is meant a shooting dog, that borders on the field trial class, though subservient to the gun and master's commands, the greater his market value, and there is always a demand for this kind of a dog; but when we speak of range we have more in mind the range of the ideal dog, not the dog who races out as far as he can to find one covey and leave three or four behind him entirely missed through his burst of speed. But rather the dog who goes fast for every likely place near you, then straightens out his range and stride as the make-up of the country demands, and if necessary cross a half mile of barren land to hunt a birdy-looking place, never loafing, but always hustling in a business way. The dog that is a great covey and great single bird dog combined, is rarer than one imagines, and it is not often that a great covey dog becomes an exceptionally good one on singles without sacrificing some of his former efficiency. In the first place he dislikes to be held up on scattered birds and if held up continually he will lose his snap for coveys. Though there are some dogs who are the equal on both points, we consider them the rarity—while a good covey dog can make a good single bird finder, it is out of reason to expect the horn single bird finder to become wide enough and fast enough to gain the name of a crack on covies.

The greater part of dogs now are naturally the rangy kind and this is not to be wondered at, considering the majority of dogs used for field purposes are direct descents from the winners of several trials, so naturally the law of heredity stamps its predominating traits on its offspring. Some sires have the power of doing this greater than others and the more apparent are different traits handed down when the dam also is possessed of the highest qualifications. And this is why the selection of great dams should be as carefully looked into as the sires.

The youngest dog that comes under training has the same instinctive knowledge of human character that a child has. Not all, perhaps, would show the nice appreciation of temperament displayed by an older dog that belonged to the father of one of my

friends. Shot was a black and white pointer with a long head and ears, and a conformation of head nearer that of a foxhound than of an ordinary dog of his kind. He was a first rate dog on birds, and conducted himself with the greatest decorum in the field. But one day his high spirits carried him out of his usual self-restraint. He was racing along at such a pace that he dashed into a covey of birds and flushed them. It did not need his master's angry voice to bring to him a sense of his misdeeds.

As the birds rose Shot stopped short, his tail went between his legs and with only a momentary pause he set off wildly to save himself from chastisement. Making straight for a neighboring hog, he waded through it up to his neck in mud till he reached a dry spot. Then he sat up and regarded his master serenely. He stayed quietly where he was until the storm blew over, then took up his duties as if nothing had happened. So well did he do his work that at the end of the day he received nothing but praise. A beating would have given Shot a new view of his master's character that would have gone far to destroy the good fellowship existing between them.

PACIFIC COAST TRIALS.

The twenty-eighth annual field trials of the Pacific Coast Field Trials Club will start on the trial grounds near Bakersfield on the morning of Monday, January 23d. Henry L. Betten of Alameda will be presiding judge, John H. Schumacher of Los Angeles and Jack W. Flynn of San Francisco will be the associate judges.

Four events will be run—the Derby, all-age, members' and champion stakes.

The club guarantees a \$300 purse for the Derby stake and a \$200 purse for the all-age. The purses in the members' and champion stakes depend upon the number of entries. Purses will be divided 60, 30 and 10 per cent, three moneys. In the guaranteed stakes all moneys paid in will be included, even if exceeding the guaranteed amounts.

For the winning owners of dogs running in each stake there will be three cups or trophies. The cup committee consists of Joseph E. Terry, chairman; T. J. A. Tiedemann and S. Christenson. Among the cup prizes already donated are: The Tevis trophy, from Gordon, Lansing and Lloyd Tevis; Fred Tessler of Bakersfield, Elmer Cox of Madera and Handler T. C. Dodge.

Handlers W. B. Coutts, R. M. Dodge and T. C. Dodge are now located in the vicinity of the trial grounds with strings of dogs. Charles Coutts will shortly arrive from La Conner, Wash., with a string. John Lucas, who has been on the Eastern field trial circuits for two sessions, will reach here with a string of dogs, including several owned by Sidney Smith, a Chicago sportsman. W. B. Coutts will be again located on the Ashe place as his training headquarters.

John W. Considine will send his dogs down from Seattle in charge of N. Hansen, a northern trainer. The entries for the all-age stake will close January 1, 1911. The entries for the members' and champion stakes will be made during the meeting at Bakersfield.

The trial grounds have been patrolled for several months, with the results that birds are plentiful. The rains have helped ground and cover conditions very favorably. The gathering of club members and sportsmen next month promises to be the largest in four years past.

The Derby stake is the important event of all field trials. Dogs whelped on or after January 1, 1910, only are eligible. The dogs here entered represent the best setter and pointer blood lines in the United States, the progeny of famous field trial champions, twenty-one English setters and four pointers, viz:

Melrose Countess, w. b. and ticked setter bitch, whelped Dec. 19, 1909, by Melrose Prince-Melrose Jessie; J. W. Considine, Seattle, owner and breeder. N. Hansen, handler.

Melrose Lill, w. b. and ticked setter bitch, whelped Dec. 19, 1909, by Melrose Prince-Melrose Jessie; J. W. Considine, owner and breeder. N. Hansen, handler.

Melrose Count, w. b. and tan setter dog, whelped Dec. 19, 1909, by Melrose Prince-Melrose Jessie; J. W. Considine, owner and breeder. N. Hansen, handler.

Melrose Terry, w. h. and tan setter dog by Ch. Kilgariff-Melrose Toodles, whelped Nov. 6, 1909; J. W. Considine, owner and breeder. N. Hansen, handler.

King, w. b. setter dog by Mallwyd Bob Jr. Rockline Flirt, whelped June 5, 1909; Geo. B. M. Gray, Oakland, owner and breeder. T. C. Dodge, handler.

Prince, w. and h. setter by Mallwyd Bob Jr. Rockline Flirt, whelped June 5, 1909; G. B. M. Gray, owner and breeder. T. C. Dodge, handler.

Duke, w. and b. setter dog by Mallwyd Bob Jr. Rockline Flirt, whelped June 5, 1909; G. B. M. Gray, owner and breeder. T. C. Dodge, handler.

Queen, w. and b. setter bitch by Mallwyd Bob Jr. Rockline Flirt, whelped June 5, 1909; G. B. M. Gray, owner and breeder. T. C. Dodge, handler.

Dot, w. b. and tan setter bitch by Avalon-Lady's Count Gladstone's Dot, whelped Jan. 4, 1910; G. B. M. Gray, owner and breeder. T. C. Dodge, handler.

Babe, w. h. and t. setter bitch by Avalon-Lady's Count Gladstone's Dot, whelped Jan. 4, 1910; G. B. M. Gray, owner and breeder. T. C. Dodge, handler.

Light, w. b. and tan ticked setter dog by Glow-Lightsome, whelped June 30, 1908; F. J. Ruhstaller, Sacramento, owner, Hon. C. N. Post, breeder, W. B. Coutts, handler.

Wander Whitestone, b. w. and tan setter bitch by Count Whitestone-Chumucka, whelped July 2, 1909; Julian Wilson, owner, W. W. Titus, breeder, T. C. Dodge, handler.

Kent's Hal, h. and w. pointer dog by Savannah Kent-Clutchman, whelped June 9, 1909; E. L. Dennison, owner, Richard Taylor, breeder, T. C. Dodge, handler.

Joyeuse, w. b. and t. setter bitch by Master Courtney-Lightheart, whelped June 15, 1909; D. L. Crane, owner, Hon. C. N. Post, breeder, T. C. Dodge, handler.

Count Mack, b. w. t. setter dog by Count Whitestone-Chumucka, whelped July 2, 1909; George L. Hopper, owner, W. W. Titus, breeder, Chas. Coutts, handler.

Merry Buck, w. b. and t. setter dog by Merry Dude-Lovell, whelped June 20, 1909; Wm. Dormer, Oakland, owner, Hon. C. N. Post, breeder, W. B. Coutts, handler.

Floramour, w. b. t. setter bitch by Merry Dude-Lovell, whelped June 20, 1909; Hon. C. N. Post, Sacramento, owner and breeder, Chas. Coutts, handler.

Strongheart, w. and b. setter dog by Master Courtney-Lightheart, whelped June 18, 1909; Hon. C. N. Post, owner and breeder, Chas. Coutts, handler.

Lad of Kent Jr., w. and b. pointer dog by Savannah Kent-Devonshire Daisy, whelped Feb. 7, 1909; Lansing Tevis, Stockdale, Cal., owner, L. S. Niel, breeder, R. M. Dodge, handler.

Navajo Nellie, w. and b. pointer bitch by Cord's Lad of Jingo-Cornish Fan, whelped June 25, 1909; Gordon Tevis, Stockdale, Cal., owner, J. R. Daniels, breeder, R. M. Dodge, handler.

Chula, w. and l. pointer bitch by Fishel's Frank-Alford's Babe, whelped Feb. 9, 1909; Lloyd Tevis, Stockdale, Cal., owner, U. R. Fishel, breeder, R. M. Dodge, handler.

Shasta Toodles, w. and l. setter bitch by Ch. Kilgariff-Melrose Toodles, whelped Nov. 6, 1909; J. E. Terry, Sacramento, owner and breeder, W. B. Coutts, handler.

Maggie Lauder, b. w. and t. setter bitch by El Ciervo-Kil's May, whelped Oct. 7, 1909; W. B. Coutts, Kenwood, Cal., owner, breeder and handler.

Wallace Bruce, b. w. and t. setter dog by Sensation-Hazel, whelped March 4, 1910; W. B. Coutts, owner, breeder and handler.

GOSSIP FOR SPORTSMEN.

Hunting Grounds Reclaimed.—The Suisun and Suisun Bay district marsh lands are increasing steadily in demand for reclamation purposes. How much these changes will affect the duck shooting preserves on the noted hunting grounds is a question that is being seriously considered by a number of clubs. Whether the shooting will be so abridged by the proximity of cultivated areas that the club owners will have to join the reclamation movement or sell out, and how soon this may take place, if at all, is the problem. At all events, if the duck shooting preserves are put out of business, the value of the lands will return a handsome profit on the original investment and the passing of a hunting ground famous for half a century will take place.

Eight hundred acres of marsh land belonging to E. L. Stewart and located near Denverton, a splendid duck shooting tract for years past, may soon pass into the possession of the Stewart Gun Club, the members of which are: Guy T. Wayman, Dr. Clyde Payne, Fish and Game Commissioner Lendal M. Gray, William Denman of San Francisco and Congressman-elect William Kent of Marin county. The club secured an option on the property after having had it surveyed. This contemplated change of ownership will continue its use as a duck-shooting preserve.

Dr. E. E. Brownell of this city has purchased 535 acres of the old "Chamberlain" tract from Frank Maskey, Frank Daroux and Mrs. Louise Harvey. This land lies east of Cygnus station and extends to a tract owned by the late Joe Harvey at the junction of Cordelia and Suisun sloughs. The land will be reclaimed and put under cultivation. Several shooting ponds, however, will be made at suitable locations. One in particular will be in line with one of the best duck flyways on that part of the marsh.

One thousand acres were purchased by the Pressley Company from the same owners. This tract will be reclaimed and cut up into small holdings.

On Joyce island a tract of 500 acres has been reclaimed by Patrick Calhoun and George P. Dubose. A big supply of fresh water has been secured by sinking wells.

The sales of marsh lands on Grizzly island have run up into thousands of acres during the past six months. Wheeler, Hammond and Rich islands, comprising 5500 acres, were sold a few days ago by J. Warren Dutton to T. B. Berry, B. Bangs and S. P. Eastman. These lands will be reclaimed and cultivated, it is reported.

Among recent sales of marsh land on Grizzly island by Dutton are: Frank H. Howell of San Francisco, 500 acres; H. D. Williamson of San Diego, 500 acres; G. W. Stephenson of San Diego, 634 acres; Mrs. E. I. Denman of Pasadena, 540 acres; J. S. Bridenstine of Imperial valley, 600 acres. F. N. Chapin also brought 910 acres south of Grizzly island from Titus Hale. This tract is supplemental to 2000 acres previously purchased from Dutton. All of these tracts not now under cultivation will be reclaimed. This change will see the passing of quite a bit of duck shooting ground.

Another big run of yellowtail is attracting the Redondo Beach anglers at present.

Suisun Marsh Poaching.—During the past week several keepers employed by different Suisun marsh gun clubs have been discharged. In one section of this hunting territory the shooting has been exceedingly poor and far below the average of past seasons. In other territory the sport has been excellent, much to the discomfiture of the sportsmen who repeatedly returned to this city with attenuated gamebags.

A reason advanced for the non-appearance of wild ducks on the ponds of several gun clubs on the regular shooting days—Sundays and Wednesday, was that an incessant bombardment of the ducks was the rule every day during the week on different preserves. Various clubmen were regarded as being indifferent to the equities of the situation and were looked upon as factors in disturbing the general balance of duck shooting. Whatever truth there may have been in this particular theory has been temporarily sidetracked.

A prominent member of one gun club happens to be none else than the chief of police of San Francisco. The systematic dearth of ducks in a part of the marsh, which in former seasons was on the good shooting map, struck the practical police official as being a question of cause and effect. Cutting out the various theories of different sportsmen, after investigation, when a Jap cook went through a process of questioning, the facts developed that certain keepers were in the habit of allowing shooters from nearby points in the Suisun foothills to shoot their heads off in the pick of different club pond blinds—for a consideration. Several keepers are now looking for other jobs.

Squirrels Retard Forest Work.—The forestry officials who have in charge the work of reforesting the area that was burned over during the last summer, find that their operations are being seriously hampered by the squirrels and chipmunks that abound in the burned section a few miles north of Nevada City. For several weeks the work of planting has been going on, and nearly the entire area has been covered with the seeds of the pine and the fir and other trees that thrive in this climate.

When a tour of inspection was made a day or two ago by Ranger Mitchell, he discovered that much of the seed had been dug up and eaten. Investigation proved that the squirrels and chipmunks were having a harvest and had no difficulty in getting all the food they wanted from the seed that was planted an inch or two below the ground.

Just what steps will be taken to prevent this loss has not been determined, but it is evident that something must be done.

King Salmon.—The propagation of the king salmon, one of the best food fishes of the Alaskan waters, at the Brookdale Hatchery, near Santa Cruz, is claimed as a successful experiment.

King salmon fry were planted in different Santa Cruz county streams several years ago. Grown fish have recently made their appearance in the streams. Some of the salmon caught were identified by marks as the same fish that had been liberated from the hatchery. Monterey bay has been a favorable habitat apparently. King salmon weighing thirty-five pounds have been recently caught while trying to run up the San Lorenzo creek.

Button Tunas Caught.—Immensely elated over their success in winning the much prized light tackle button for catching tunas, F. W. Webster, a hanker of Boston, Baron S. Fchleisen of St. Petersburg, Russia, and Henry M. Blaskoff of New York last week enjoyed a two days' trip to Catalina Island. The three gentlemen went fishing Saturday for tuna and succeeded in catching fish weighing over twenty-five pounds each. This entitled them to the much desired minor tuna button.

Newport Duck Shooting.—Taken altogether, many ducks have been bagged during the past week by Newport sportsmen, the bags, however, for individual shoots have averaged small. The best bag of the week was secured by Lee Collins and C. H. Way who secured 14 on the upper bay Tuesday morning. These ducks were all widegons, but a number of fine mallards have been killed. The upper bay is full of white geese but they are not very highly prized in the southern part of the State and no great effort has been made to hunt them.

Striped Bass.—The usual large delegation of salt-water anglers were at the Wingo sloughs last Sunday. Several nice size fish were taken in Napa No. II. San Antonio rosters drew blank, the sloughs in that section are full of deep sea crabs (cancer magesticus) "as large as your hat," and that means that the "still fisherman" is not on the books. The trolling results in both San Antonio and Schultz sloughs have been very indifferent.

Tomorrow is regarded as a most propitious day, for the tides will be of pleasing promise to the most indifferent angler.

English Setter Club.—An important meeting of the Board of Governors of the English Setter Club will be held in Philadelphia Tuesday, December 20th.

A shooting party in two automobiles recently, on a goose-hunting trip, completely circumscribed Tulare lake, going dry shod close to the lake on all of its boundaries.

SPEED KEEPS TROTTING ALIVE.

[By Henry Ten Eyck White]

What keeps the sport of trotting going along smoothly while running races are few and far between (it being admitted they cannot be brought off unless betting is allowed) is the fact that every trotting bug wants to breed a swift steed, and as soon as he is old enough and gets the money he starts in to play that angle of the game.

For this reason the famous matrons of the Trotting Register are well known by reputation to the enthusiasts, and the names of a few of them scattered through the pedigree of a yearling will furnish food for all sorts of arguments.

Therefore, the performance the other day over the Lexington track of the stallion Ormonde, which took a record of 2:08½, will call attention to his dam, the already famous Paronella. She would be entitled to a lot of credit if she had produced nothing but the wonderful gelding, Country Jay, which, old and spavined, beat all the cracks in the 2:08 class this summer, took a record of 2:05½, and made Sonoma Girl go in 2:04¼ to beat him a neck.

But while the heating of 2:10 by Ormonde of course, added to the reputation of his dam, the event that sets the mare in a way above all others of her kind is the fact that this season three yearling trotters by Kentucky Todd, another son of Paronella, entered the 2:30 list. This gives their sire two championships, as he is the only stallion with more than two yearlings in the standard list, and he is also the only six-year-old sire that ever had as many as three trotters to his credit.

The yearlings by Kentucky Todd that beat 2:30 at that tender age are from his first crop of foals, and the circumstance is so utterly unprecedented in the annals of harness horse breeding that it has put Kentucky Todd right in the front row among trotting stallions, and it is a sure thing that his book for next year could be filled right now and every mare be a high class one.

Kentucky Todd was a born trotter. He could easily have beaten 2:30 as a yearling, and at two he won some stakes and took a race record of 2:14½, those figures at the time they were put in the books being the best for a trotting stallion of that age. But with all his terrific speed, Kentucky Todd was not a young trotter of the bulldog type, such as horsemen fancy most. On the contrary, he was an in and out at the racing game, losing some races that made him look cheap. He had been bought as a yearling for about \$6000 by Miss Katherine L. Wilkes (whose brother married Hetty Green's daughter), a rich Canadian woman who has sent some crack trotters to the races, and is still owned by her, although now established in Kentucky.

It always has been considered a marked distinction for a stallion to be represented in the 2:30 trotting list by the time he is seven or eight years old, and any horse that begot a yearling able to enter the 2:30 list was something of a star—at least until it was proven that his yearling was a fluke. But to start a 2:30 list at six years of age from his first crop of foals, as Kentucky Todd has done, have three of them become standard by performance, all yearlings, is an astonisher to breeders.

A peculiar interest attaches to one of these baby trotters, known as K. L. Wilkes, from the fact that its dam, Katherine L. (that was enough of a colt trotter to make a record better than 2:13 as a three-year-old) was one of the first trotters campaigned by Miss Wilkes, and was named for her. The same idea has been followed in the second generation of the family, and if K. L. Wilkes proves to be the high class nag his early speed and fashionable breeding gives him a chance to be it is pretty certain no sale of the nag from the Canadian farm ever will be made.

Another point in connection with the miles better than 2:30 done by the Kentucky Todd yearlings is the fact that they were driven their record trips by Clem Beachey, who weighs 200 pounds, and the excess fifty pounds over the weight called for by the rules cannot but make a lot of difference with a yearling trotter when the distance to be covered is a full mile. One of the young trotters has been a quarter in :32, a 2:08 gait, from which it is argued that, specially prepared and not asked to draw any overweight, it could have been driven close to 2:20 this fall.

Getting back to Paronella, the dam of Kentucky Todd and a lot of other notable trotters, it may be said that she is by a son of Electioneer, which makes Kentucky Todd inbred to the last named horse, as Todd, his sire, was a grandson of Electioneer, being got by Bingen 2:06½, a great colt trotter and sire, and out of Fanella 2:13 by Arion 2:07½, champion two-year-old trotter to high wheels, his mark at that age being 2:10½.

Todd himself was a windsplitting trotter as a yearling and as a two-year-old, but a had leg kept him from a showing better than 2:21 at the latter age. Later in life, with limited training, he took a record of 2:14½, and it therefore was natural that when a mare like Paronella, that had produced at least two foals with extreme speed in colthood—Country Jay and Ormonde—was mated with him the result should be a horse of superlative speed early in life. That is the sort of horse Kentucky Todd was, and common knowledge of the laws of heredity will account for his being an early sire of colt speed far beyond the ordinary, both in quantity and quality.

Paronella shows her greatness as a producer of speed in more ways than one, her list of 2:30 or better trotters, seven in number, having been sired by six different stallions. That is the highest test of a supremely great broodmare, and the placticity of

Paronella's blood as well as its potency, is demonstrated by the following list of her record foals, the sire of each being given:

Name.	Record.	Sire.
Country Jay	2:05½	Jayhawker
Kentucky Todd (3)	2:08½	Todd
Judge Parker	2:10½	Jay McGregor
Ormonde	2:08½	Wilkes Boy
Nella Jay (3)	2:14½	Jayhawker
Malise C.	2:17½	Clay King
Lady Ripples	2:19½	The Tramp

This list of foals from one mare is remarkable for more than the fact that its members were sired by six different stallions. A feature that shows the quality of the nags is the fact that all of them have records better than 2:20, that three of them are marked under 2:09 and four under 2:11. One of them, Nella Jay, is a winner of the three-year-old Kentucky Futurity, and another Kentucky Todd, was victor in the two-year-old division of the same stake. The most notable of them all in some ways is Country Jay.

He was a very fast three-year-old, then became a big money winner on the grand circuit, then retired with spavins and other things for five years until he apparently became so useless he was sold for \$500 when 12 years old, and finally reappeared on the turf, won some of the best races on the grand circuit in 1909 and 1910, now carrying a record better than 2:06.

Two of the old mare's sons in the above—Ormonde and Kentucky Todd—are sires of standard speed. Although two of Paronella's foals, Country Jay and Nella Jay, are by Jayhawker, and two others, Judge Parker and Lady Ripples, are by his sons, Jay McGregor and The Tramp, it is significant that her fastest colt trotter and best foal generally, Kentucky Todd, is a double Electioneer, while Ormonde, Nella Jay, and Judge Parker trace in the male line direct to George Wilkes, and in the case of Country Jay there is a second strain to that horse, his grandam being by William L., son of George Wilkes. From the success, in the second generation as well as the first, of the blood of Jayhawker, it is only reasonable to suppose that the foals of so positive a mare as Paronella, sired by Jayhawker, and his sons, Jay McGregor and The Tramp, both of which horses are above the average as sires, will produce as good or better trotters than themselves, and that thereby the blood of the best grand-daughter of Electioneer in the broodmare line will be perpetual and take a band in the ultimate triumph of light harness horse breeding—which is to produce three-year-olds capable of holding the world's record for a mile, just as was done years ago with thoroughbreds.

It is rather a remarkable fact that Kentucky Todd as a two-year-old resembled another colt of that age—High Admiral, by Admiral Dewey—enough to have been his brother, and in the matter of speed, I am sure, from personal observation, that High Admiral had as much or more at the same age than Kentucky Todd.

High Admiral's dam was a granddaughter of Electioneer, and his sire was by Bingen and out of Nancy Hanks 2:04, by Happy Medium, so there is a similarity of blood lines in the two stallions to which the student of trotting horse pedigrees gives more than casual attention.

What High Admiral will accomplish in the stud is, of course, problematical. He is now only a four-year-old, was not mated with any mares until last spring, and the chances are he will be trained and raced next season as a five-year-old, in which case he will at best make only a short stud season.

Another fact likely to militate against High Admiral as a sire is that his owner likewise is the owner of the world's champion trotting stallion, The Harvester, whose record is not likely to be equaled for a good many years unless by himself. Naturally the choice mares owned by Mr. August Uiblein of Milwaukee, who has hot stallions, will go to The Harvester. About twenty selected matrons are to be bred early next spring, and no doubt a like number will be allotted to High Admiral.

There is such an element of luck in breeding that possibly High Admiral may after all receive the mares that "nick" best with him, and coming as he does from the Bingen family, which breeds on, he may outsize his world famous stable mate.

REARING ORPHAN FOALS.

Some care is necessary in introducing a foal to a foster-mother, for mares are not always willing to undertake the duty at our request. It is desirable that the mare should be feeling the pressure of an overfilled udder without its being tender to the touch.

The foal should, if possible, have the smell of the mare's own dead foal imparted to it by rubbing the inside of the ears or the skin from the hollow of the pasterns about the head and withers of the foster-foal.

If an interval has occurred and this is not practicable on account of commencing decomposition—or for other reasons—the parts named should be made odorous by a mixture of oil of rhodium (amyris balsamifera) and aniseed, which should also be used to give an aroma to the hands of the person who is to introduce the new arrival. These essential oils have a pleasing influence upon most horses, and are much used by horse tamers. If the perfumed hands are stroked about the face of the mare and she gives signs of gratification, she will be likely to act kindly toward the orphan which also has that odor.

A fairly wide stall with the mare tied is a suitable place to which to bring the foal, and the men (two

are necessary) should take it to the mare's left side. One man should then draw a little milk with his finger and thumb before allowing the orphan to touch its foster-mother. While the foal is kept with its hind quarters toward the mare's head, and one man guides it to prevent its getting within the kicking area, the other can soothe the mare with appropriate words and caresses. It must not be supposed that all risk is passed when a preliminary suck is allowed in these circumstances; the foster-mother must be watched till a friendship is established.

Although some brood mares have more milk than their own foal can consume, great caution must be used in allowing a foster-foal to share the milk.

If, however, a mare is being worked, she can be hindfolded when some distance from her stable and when her bag is partly filled with milk. Her own foal and the orphan can be moved around her on her arrival at her home without either of them coming near enough to her head to be smelled. The foster-foal may then be permitted to take a considerable quantity of milk, and when her own foal is brought to her, after the other one has been removed, the blinder should be taken off her eyes. She will then see her own progeny only, and this device will sometimes answer to the extent of the mother's milk capacity.

But mares do not usually carry a great deal of milk in their bag at any one time, so that only a good half filling for two foals can be expected on any single occasion. The mare's bag, however, will become half filled again very quickly, and when valuable foals are concerned frequent applications may be made to the mare's udder which will respond for a time to the extra demand made upon it, provided that the animal has a first-class digestion and can convert a plentiful supply of suitable food into milk.

The great difficulty with an orphan foal is to feed it during the first six weeks. If it is possible to get mare's milk during this time, it should always be obtained.

Supplementary feeding must be begun very cautiously. Mare's milk contains the largest quantity of water and smallest amount of fat of any of the domesticated animals. Unless the milk of an ass can be secured, we must use that of the cow. Cow's milk contains one-third more fat than mare's, consequently no foal can digest it, and it is necessary to add water. As cow's milk contains twenty per cent more casein than is present in the milk of the mare, more water should be added, a total of one-third of this fluid to whatever quantity of cow's milk is being given to the foal. Milk sugar ought also to be added, because, although mare's and cow's milk contain about the same percentage, the addition of water has reduced the proportion of this important constituent.

A few drops of lime-water will aid the foal's digestion in addition to being useful in bone-building. It seems to correct a disposition to flatulence and enlargement of the belly, but too much of it is injurious.—Horseman.

NO MATINEES FOR NEW YORK SPEEDWAY.

The custom of using the New York Speedway from twelve to fourteen weeks each year for set matinees is to be abolished, and the drive is to be the scene of impromptu hushes, as in former years; this is the unanimous decision of the members of the New York Road Drivers' Association.

This change has been brought about through causes which virtually threatened the wide opening of the drive to all public vehicles, saddle horses, and eventually even to automobiles, instead of reserving it exclusively for light vehicles and fast trotters and pacers.

Matinee racing for valuable silver cups was originally started by Miss Giulia Morosini, who was the first patron of the drive to offer cups, one for each year, to be contested for by road drivers, and, although she later withdrew her gift, the drivers kept up the practice by offering similar trophies individually, by subscriptions or through the treasury of the organization, so liberally that during the spring and fall seasons, the best horses were saved for racing, and in summer were entered in track matinees, which meant the entire absence of the real amateur sport on Sunday mornings, while brushing on week days—formerly as important as Sundays—became a thing of the past.

Several leading members and owners of fast step-pers, for instance Natban Straus, James A. Murphy and others, never approved of the set events, believing that a drive built by public funds and maintained by and for the public, should be used in a manner to entertain the public, especially Sunday mornings, yet the temptation of winning a cup had become so strong that only second class horses of no speed merit are on the drive Sundays, with no chance for the few good ones to have a brush.

While no official action has been taken, it is fully settled that racing for cups over the public drive must now be abandoned for all time, and owners, of fast horses must, from now on, entertain the general public in return for the privilege of having the drive for their exclusive use.

To fully eliminate the drive from the rank of a racing ground, strong pressure will be brought upon the regular members of the association to abandon the custom of brushing their horses to carts or sulkeys.

The main effort of the officers of the association will now be directed toward bringing out the best Speedway horses in large numbers every Sunday morning, and certain week days, too, so that the public may be entertained.—N. Y. Telegraph.

THE FARM

FEEDING FOR MILK.

The Holstein is my favorite breed, says J. A. Leach in N. E. Homestead. Our greatest difficulty at first was in not having as good quality as I had liked. I stick steadily to the rule of improving my herd in every way possible. I now have 100 head. One two-year-old heifer has given 55 pounds of milk a day and a three-year-old 62 pounds, both on ordinary dairy care. I have had my dairy at different times average 40 pounds each a day. I do not breed for show or market, but to get business cows, as I term them—the kind that pay men a good profit nearly the year round. The calves are kept clean from the moment they are born and are fed three times a day in clean pails.

Soon after being dropped the calves are taken away and placed in warm, light stalls. For the first four to six weeks they are fed whole milk, then skim milk until six or eight months old. They are taught to eat hay and given all the wheat bran and ground oats they will eat. After being weaned they are given silage, roots, hay, wheat bran, corn and oats—all they will eat up clean. The calves are bred at two years of age and when they freshen they are large and strong. The milking animals are stabled about nine months in the year. They are kept warm, comfortable and quiet. The cows are turned out daily for exercise, air and sunshine. I think this an important point, and should be strictly adhered to. When in milk cows are fed daily a hushel of silage in which are put four to eight quarts of bran in distiller's grain, depending on the amount of milk the cows give. This is again repeated at night. This feeding is done after milking, so there will be no odors to affect the milk in any way. The young stock in our herd goes mostly as breeding stock at various prices, according to value. A word now about the silo. One of ours was built 18 years ago, the capacity being 100 tons; another was built three years ago with a capacity of 200 tons, and cost \$400. My experience teaches me that I cannot keep a dairy with profit without silage.

SPREADING OF MANURE.

Most farmers believe that the greatest value to be derived from a manure spreader is in the saving of labor. As a matter of fact, this is only one of the advantages offered by the use of such an implement. Another advantage which is even more important in many ways, is the fact that manure scattered evenly and rather thin over a wide area will give very much more return per ton than where scattered irregularly and on the thinner places, as is usually done when distributed from a wagon. This increased return is due to the fact that there is less loss in fermentation when put on thinly, and also to the fact, that a considerable share of the value of manure comes from the addition of beneficial bacteria to the soil, so that when this takes place over a wide area it is much more beneficial than when limited to a small area.

Another reason why the manure spreader is advantageous is because a man who has his money invested in an implement of this sort will take better care of the manure on the farm. He will not allow it to lie around and leach, but will get it back on to the fields where it should be placed.

The very best way of handling manure is to haul it out day by day, or

week by week, as it is made, if this can be done. Many farmers think that manure applied in this way will lose its value before the next crop is grown on the land, but experiments show that there is very little loss in this case unless the land is very rolling.

The next method of handling manure, is to feed under an open shed where the manure is kept tramped down compactly through the feeding season and then hauled during the summer at a leisure time. Manure kept compacted in this way under cover, loses very little. Of course, the practice of feeding the animals directly on the fields is a good one, but the difficulty is in getting the manure scattered over the whole field. The scattering is too often confined to a small sheltered feeding ground.

Farmers should understand more thoroughly the advantage to be derived from the use of a manure spreader and every farm of 100 acres or over where cattle are fed around the buildings, should not be without this implement.—M. F. Miller.

DIVINING ROD A FAKE.

Washington, Nov. 20.—In a cold and scientific report M. L. Fuller of the United States Geological Survey, has shattered the popular belief that the divining rod is a water finder. Faith in the dipping twig is based on a delusion, he asserts, and the man who says he can locate water supplies by its use is a pretender.

"No appliance, either mechanical or electrical," says Fuller, "has yet been devised that will detect water in places where plain common sense will not show its presence just as well. The usefulness of the divining rod is indicated by the fact that it may be worked at will by the operator, that he fails to detect strong water currents in tunnels and other free courses that afford no surface indications of water, and that his location in regions where water flows in well-defined channels are no more successful than mere guesses. In fact, its operators are successful only in regions where ground water occurs in a definite sheet in porous material. In such regions few failures to find water can occur, for wells can get water almost anywhere."

This exposure of the divining rod fraud, however, is only a side feature of the report. It tells farmers about the various kinds of rocks and deposits that contain and convey underground water, the advantages and disadvantages of different kinds of wells, boring methods and measures for the protection of springs and wells from pollution.

It is never wise to put cattle on full feed at the start. They should be fed up to it gradually, else they will "stall" and may be attacked by scours and other troubles.

DENATURED ALCOHOL IN SOLID

FORM. Cleveland Special Dispatch. A well-known Wheeling, W. Va., chemist has succeeded in producing chunks of denatured alcohol in crystal form by means of a small infusion of certain acids whereby crystals of an alkaloidal nature very closely resembling physiologically the effects of ethyl alcohol distilled from sawdust. The method employed and the results obtained are somewhat similar to the crystallizing of rock candy or that of Saccharine containing as it does 350 times the sweetening strength over that of cane sugar, so this alkaloidal crystallized alcohol contains many times the strength over the ordinary denatured fluid alcohol; they will yield 194 proof denatured alcohol with a greater heating and cooking power for stoves than gasoline, and it is absolutely non-explosive.

A sample can containing 50 solid cubes, 1 stove and the secret formula how simple it can be made at home, will be mailed to you, postpaid, on receipt of \$5.00. Address

SAVINGS INVESTED IN REALTY.

Put your money in residential building lots. Be sure they are in improved sections. Buy close to a big city. Purchase early; don't let others make profits out of you. The greatest fortunes were made by realty investments. We will offer 1000 choice building lots on December 1st, at prices that will pay very handsome profits. Terms of purchase, \$25.00 cash per lot, balance in thirty-six equal payments. No interest or taxes during this period. If you die before completing your payments, a deed is given your heirs, without further cost. Size of lots, 25 feet by 120 feet and upward. Price of lots, \$75.00 and upward, according to location. By investing in land you own something for your money. Investments in stocks or savings accounts are under the control of others. We guarantee you a profit of at least 25% for the first year. Subscription lists are now open. By admitting us \$10.00 per lot, subscribers get first selections. The first 500 subscribers will also receive a credit of 10% on their purchase. Act now. Let us make money for you and protect your savings.

We want agents in your locality. Write us the names and addresses of some of your neighbors. Do it now.

HUMP-BACKED CATTLE.

The offspring of the sixty head of sacred cattle of India which were imported to Texas in June, 1906, have spread to many branches in that State. The half breeds from the original herd number more than 2,500 head. These animals have proved peculiarly adapted to the climate of south Texas, and crossing them with native breeds has given such good results that they are now looked upon as a very important factor in the upbuilding of the cattle industry in that region. A remarkable trait of these cattle is that they are immune from Texas fever. To the Texas stockman who has experienced losses and marketing difficulties on account of the tick fever, it is quite a godsend for a species of cattle to be immune from the malady. This is one thing that has served to spread the popularity of the zebu or humped cattle of India among the ranchmen.

PERTINENT DAIRY QUESTIONS.

Q. How much does a gallon of milk weigh?
Ans. About eight pounds.

Q. How is a farmer with a number of common cows to work up a good dairy herd?
Ans. He should first decide upon the breed he likes the best. Then purchase a pure bred sire to use with his herd. He should weigh and test the milk from each cow and keep the heifer calves from those showing the best dairy tendencies.

Q. Should sweet and sour cream be mixed just before churning?
Ans. No, they should not. The sour cream churns quicker than the sweet and may be over-churned before the sweet cream is gathered. On the other hand if the churning is stopped when the sour cream first gathers much of the butter fat in the sweet cream will be lost in the buttermilk.—North Dakota Agricultural College.

The cow is manufacturing milk while she is lying in the stall at night. Make the bedding soft and dry, and make the barn in general so comfortable that nothing will prevent her from turning all surplus feeds to milk during the night. She can not do it on a cold and rainy night around the straw stack. Let the lower part of the cow stable to a height of about four or five feet be perfectly tight and wind-proof, but above the cows fresh air may enter without harm through cracks, windows, doors and other openings.

By keeping all the skim milk at home, you can easily keep two pigs for each cow. With a herd of ten cows twenty pigs can be grown to marketable size, realizing at present prices of hogs about ten dollars each on milk consumed, or twenty dollars on each cow per year. With good cows and good pigs, the skim milk can be made to yield double this.

DAIRY CATTLE IMPROVE.

There has been a wonderful advance in the quality of dairying cattle during the last few years.

The various breeds are improving and there are more big records now than ever before. Splendid records were made during the world's fair in Chicago, but the succeeding generation of cows did much better at the St. Louis exposition. We have a number of cows today that can do better than the holders of old time records that stood for years.

The present system of test records is the cause of most of the recent development. We have the ring show, where the animals are judged on appearance, and in addition there are the yearly records of the cow. The cow of today is far superior to the animal of the same breed twenty or thirty years ago, as her capacity and effectiveness are much greater. Without the use of the accurate records many a dairyman would be deceived regarding the value of his cows. By means of records we are able to weed out the poorer individuals of the different breeds and the result is becoming apparent with remarkable rapidity.

One of the most important features of modern dairying is the building up of herds by crossing with highly productive stock. Grade cows, or those that are partly of high class stock, are exceedingly valuable as producers. The improvement in dairy conditions has been gradual, but not nearly as rapid as we wish. Some of the dairymen have not taken advantage of what is now within easy reach. There is still much room for improvement in general conditions.—B. H. P.

W. E. Durkee, an Oklahoma farmer, believes he has made a record worth noticing in raising hogs. Fourteen months ago he paid \$12 for a sow that shortly afterwards brought a litter of nine pigs, three of which were killed for meat and six were sold for \$105. From a second litter of nine pigs, he sold eight for \$116.47, keeping the extra hog. The sow now has a third litter of nine pigs, weighing about fifty pounds each, and worth not less than \$4 each. Counting the sow's progeny that he did not sell as being worth as much as those that were sold, Mr. Durkee has received in fourteen months \$324.45 from an original investment of \$12. The sow has brought him a gross income of \$23.17 for each of the fourteen months.

TYING A HORSE

A horse should always be tied to a hitching post with a strong strap or rope which there is no possibility of its breaking. If a horse once breaks loose he is apt to acquire the bad habit of breaking at every opportunity. A check strap or rope which passes round the neck through the ring in the bit is better than the ordinary strap fastened in the ring such as usually comes with bridles. If a horse has acquired the habit of breaking loose, try this plan and fool him when he tries it again.

FOR SALE—Hiawatha, dark bay mare, 6
years old, 15 1/2 hands high; will weigh about 1140
lbs. Sired by Baron Bretto 39103, a son of Silver
Bow; dam Silver Bells by Silver King 3622; sec-
ond dam Only Hope by Hark, son of Brigadier.
This mare is in foal by a son of Clarence Wilkes.
Hiawatha is sound in every way, perfectly gen-
tle to drive and handle and is a good roadster.
She has had no work since a 2-year-old but at
that time could step a mile in 2:58. Price \$225.
Anona L., a full sister to Hiawatha, 5 years
old, weight 1100 lbs., is a light bay mare very
stylish and handsome. Is city broke and very
gentle to drive, afraid of nothing. She has had
a limited amount of work but has shown a mile
in 2:20 1/2, a half in 1:08 1/2 and quarters in 33 sec-
onds. Price \$500.

Red Devil, bay stallion, 5 years old, 15 1/2 hands
high, kind and gentle, suitable for anyone to
drive, fears nothing. Sired by Baron Bretto
39103; dam Jeanette by Ottawa; 2nd dam by
Snuff Box. A 2-year-old filly sired by this horse
won the colt race at Marysville, July 4th. Price
\$300. For further particulars address F. W.
Kelley, Breeder and Sportsman, San Francisco.

Some dairymen believe that if the
food of their cows is changed it will
have a bad effect upon the milk flow,
but repeated scientific experiments
show that changing from one feed to
another, and frequent additions to the
regular food, helps the milk flow.

MOLASSES GOOD FOR COWS.

More molasses is being fed in the north than ever before, but most dairy farmers are not yet satisfied that it is profitable.

In an experiment at the Hatch station, Professor J. B. Lindsey says, molasses contains about three per cent of protein and 70 per cent of digestible sugar.

"Compared with cornmeal," says Professor Lindsey, "it equals substance pound for pound, in results obtained in feeding milch cows, but when fed to horses it does not seem to be quite equal to the same weight of corn and oats."

"It is estimated that cornmeal at \$1.20 per hundred pounds, molasses would be worth about \$1 per hundred pounds. Its quoted price in Boston is twelve cents per gallon by the barrel, and 8.6 per gallon in ten-barrel lots."

"A gallon weighs about twelve pounds, so that, at present relative prices, the molasses would be a little cheaper feed than cornmeal."

"A good point with the molasses is that it is agreeable to stock and makes them all ready to eat such substances as cut corn stubble, malt-sprouts, distillery feeds, etc., when mixed with the molasses."

"A serious objection is that molasses is not very convenient stuff to handle and attracts flies in summer."

"As a mixture with high-grade protein feeds, I suggest one-third distillery grains, one-sixth cottonseed-meal, one-half molasses, or one-third malt sprouts, one-third gluten meal, and one-third molasses."

"For working horses, nine pounds of provender and one quart of molasses, or twelve pounds of provender and three pints of molasses, or, for hard-working horses substitute one-half pound dry blood or one pound cottonseed, or linseed meal, in place of an equal quantity of provender."

DRY-PICKED POULTRY BEST.

Poultry for the markets should never be scalded, as it does not keep so well as dry-picked poultry, and does not look so fresh and plump after it has lain on the counter a few hours, says "Home and Farm." By the modern methods, fowls can be dry-picked as quickly as if scalded, and, besides, the feathers can be saved for the market, if one is situated where there is a demand for such goods, which are now used for many purposes.

Fowls, to be properly dressed, should be killed by being stuck in the mouth with a sharp pointed knife, and the picking should be done while the fowl is dying, when the feathers are warm and will come off easily. A rapid picker will take off all the large feathers by the time a fowl is dead, and then an assistant will finish the job by picking off the pin feathers.

Care must be used not to break the skin, as it is, the fowl is unsightly, and will always command a lower price. The feet and head should always be left on, as one can tell from these when a fowl is young and tender. Always pack them carefully in the box, as much depends on the looks.

PRODUCING COWS FOR MARKET.

Hoard's Dairyman comments editorially as follows:

"The high prices which prevail for first-class dairy cows ought to induce

more farmers to keep registered bulls and to make a more thorough study of the business of successful calf and heifer raising. It is surprising how few farmers there are who are really good calf raisers. The final value of a good cow depends in a great measure upon how well she has been raised from calfhood to maturity."

"We have noticed that four things contribute very greatly to success in this particular. (1) Good dairy blood in the sire; (2) clean, dry, quarters, frequently disinfected; (3) plenty of sweet skim milk fed in pails kept well scalded; (4) good, well-cured alfalfa hay after the calf is three to four months old and from that time on. A heifer given alfalfa hay will make a decidedly better growth and size on that account."

"Such raising, feed and care seem to have a stimulating effect on the maternal organs, and the heifer makes a better cow on that account. Of course, the dairy breeding is the foundation. It is of no use to try and make a good cow out of a heifer that has no such tendency in her. But it is true, and often lamentably true, that the best bred heifer in the world can be utterly spoiled by stupid, unskillful handling and feeding in the first two years of her life."

Three Stallions AT AUCTION.

On Saturday, January 14, 1911, I will sell at auction in San Bernardino, Cal., a part of the estate of Ben Davies, deceased, as follows:

ZOLOCK 2:05 ¹/₄

brown stallion by McKinney 2:11 ¹/₄, dam Gazelle 2:11 ¹/₄ by Gossiper 2:14 ¹/₄; second dam Gipsy, dam of Delilah 2:06 ¹/₄, etc., by Gen. Booth; third dam Echo Belle by Echo, etc. Zolock is standard and registered and is the sire of Sberlock Homes 2:06, Delilah 2:06 ¹/₄, Bystander 2:07 ¹/₄, Josephine 2:07 ¹/₄, Velox 2:09 ¹/₄, R. Ambush 2:09 ¹/₄, etc.

IZALCO

black stallion, 7 years old, weight 1050, by Zolock 2:05 ¹/₄; dam Gipsy, the second dam of Zolock. Izalco is a full brother to Delilah 2:06 ¹/₄ and is untrained but is a steady, good gaited trotter and has shown 2:30 in a matinee race without training.

BLACKAMOOER

black stallion, six years old, weight 1100, by Nushagak, sire of Aristo 2:08 ¹/₄; dam Ione by McKinney; second dam Gipsy, dam of Delilah 2:06 ¹/₄ and grandson of Zolock 2:05 ¹/₄, etc.

Zolock 2:05 ¹/₄ is known to every horseman on the Pacific Coast as a great race horse and successful sire. The death of Mr. Davies prevented the training of Izalco and Blackamoor, but both are steady trotters, perfectly clean and sound and very handsome animals. It is doubtful if there is a handsomer stallion than Blackamoor anywhere in America.

San Francisco.

"The business of producing well-bred, first class dairy cows is a profitable one. After two years of age, the cow has a double line of profit in the milk she yields and in her progeny. All that is needed on the part of the farmer is an intelligent understanding of what it means to produce a good cow."

HIGH-PRICED JERSEYS.

Ross Nelson, a farmer near Independence, Polk county, Oregon, has been in the East and South for several days looking for some choice Jersey cattle, to add to his herd which he purchased last spring through importation from the Island of Jersey, and also is securing some for John B. Stump, of Monmouth. Word comes from him to the effect that he attended the W. R. Spann sale, at Burr Oaks Farm, near Selhyville, Ky., on the 3d inst., and while there hid in the great hall, "Noble Peer," for the sum of \$3350, besides procuring a few other Jersey cattle of rich breeding. "Noble Peer" is a grand Jersey sire, hearing the reputation of a prize winner wherever exhibited in the United States.—Pacific Homestead.

The farmer who goes in for hogs one year, only to abandon the business the next seldom succeeds. He

is as likely to strike a low market when loaded up with hogs as to get next to a high market. One cannot always forecast the vagaries of the hog market. But the farmer who sticks to hogs year in and year out takes his medicine when the price is low and rolls up the profits when the market goes high, is the one who makes money in the long run. Just now hogs are valuable property, and they will probably continue in the Croesus class for two years at least.—Murray's Swine Breeder.

PREVENTION BETTER THAN CURE

A poultry bulletin issued by the Rhode Island Agricultural College recommends methods of prevention rather than treatment of poultry diseases. The turkey production in New England has been on the decline for several years, and especially in that State where so many turkeys have always been produced. This bulletin states that black-heads cause a great loss among the New England turkeys, and that this disease, like all others, is due largely to carelessness. The bulletin explains how the farmer and poultry raiser can save a whole lot of work and loss provided he gives the chickens and turkeys the proper feed and care. The treatment of disease is of little value, this bulletin states, after it gets into the flock.

The Holiday Number

Of the BREEDER AND SPORTSMAN

TO BE ISSUED

December 24, 1910

Get your copy ready.

Be sure to place your advertisement in the Holiday Issue. It's only a few weeks now to Christmas. Get your order in as soon as possible. It will be time and money well employed and bring results. The

HOLIDAY NUMBER

will be a feature of the mid-winter season from the all around sportsman's viewpoint. It will be largely devoted to hunting, fishing and field sports. It will be handsomely embellished by beautiful illustrations and have an attractive cover in colors. It will contain original, attractive reading matter and will be a splendid advertising medium, as well as a highly entertaining and valuable issue in all respects. It will be sold for 10c a copy and will reach everyone interested in the interests it represents on the Pacific Coast.

Rates for display advertising: One page, \$40; half page, \$22.50; quarter page, \$15. For any other information address

Three-Legged Horses

are not curiosities by any means. The country is full of them. The fourth leg is there all right but it is not worth anything because of a curb, splint, spavin or other like hunch. You can cure the horse of any of these ailments and put another sound leg under him by the use of

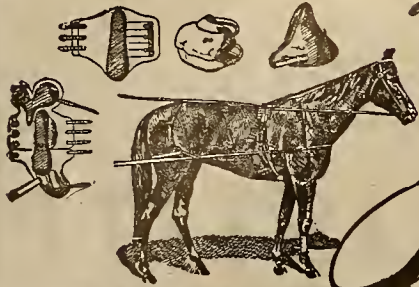

Quinn's Ointment.

It is time tried and reliable. When a horse is cured with Quinn's Ointment he stays cured. Mr. E. F. Burke of Springfield, Mo., writes as follows: "I have been using Quinn's Ointment for several years and have effected many marvelous cures; it will go deeper and cause less pain than any blister I ever used. I thought it my duty for the benefit of horses to recommend your Ointment. I am never without it." This is the general verdict by all who give Quinn's Ointment a trial. For curbs, splints, spavins, windpuffs, and all bunches it is unequalled. Price \$1 per bottle at all druggists or sent by mail. Send for circulars, testimonials, &c.

Arrow and Nitro Club Steel Lined Shot Shells

Shooters are everywhere awakening to the advantages of the steel lining in U M C Arrow and Nitro Club Shells—the shells that have won every Interstate Handicap event in the past two years.

The steel lining improvement, as used in U M C Arrow and Nitro Club Shells, has been adopted by the leading shell manufacturers of Europe. It protects the powder from moisture, insuring uniform loads under the most severe weather conditions, and adds to the strength of the shell.

Sold by all first-class dealers. Do not accept a substitute. Communicate with us if your dealer does not carry U M C or Remington.

WINCHESTER RIFLE AND PISTOL CARTRIDGES.

The grab-bag method of buying cartridges is apt to lead to dire results. Be specific and ask for Winchester cartridges when you buy, and you will get cartridges that are unexcelled for accuracy and strong shooting. Winchester cartridges are the kind that were selected for use at the National Shoot, as they were found upon test to be "the most accurate." This is the kind you want, as when you go shooting you like to be sure that the cartridges you are using shoot strong and accurately. All Winchester cartridges are made from exact formulas and by automatic machinery, and therefore are always uniform and of equal shooting strength.

Every Horse Should Be Clipped in Season

It is the wise thing to do for the clipped horse not only is easier to clean and looks better, but clipping does much to make him immune from coughs, colds and the usual ills that come to a horse from standing in a coat of long, wet hair after any hard exertion. The perspiration evaporates quickly from the clipped animal and leaves him dry. On cold days a blanket when he stands keeps him comfortable.

The Best Clipping Machine the World has ever Seen is the Stewart Ball Bearing Enclosed Gear Machine

It is the easiest turning, fastest clipping and most enduring of all machines. The materials in it are all of better quality, the workmanship is superior. All file hard cut steel gears, protected from dust and dirt and running constantly in oil. It couldn't be better for twice the money.

STATE AGRICULTURAL SOCIETY.

OCCIDENT STAKE OF 1913

Trotting Stake for Foals of 1910.

Entries close January 1, 1911.

To be trotted at the California State Fair of 1913. Entries to close January 1, 1911, with J. A. Filcher, Secretary, at the office in Sacramento. One hundred dollars entrance, of which \$10 must accompany nomination; \$15 to be paid January 1, 1912, \$25 to be paid January 1, 1913, and \$50 thirty days before the race. The Occident Cup, of the value of \$400, to be added by the Society. Mile heats, three in five, to harness. First colt to receive cup and six-tenths; second colt, three-tenths; and third colt, one-tenth of the stakes. Five to enter, three to start. A horse not winning a heat in the first three shall not start for the fourth heat unless said horse shall have made a dead heat; but horses so ruled out shall have a right to share in the prize according to their rank in the summary at the close of their last heat. Otherwise N. T. A. Rules to govern. Nominators are not held for the full amount of entrance in case colt goes wrong; only forfeit payments made, which relieves you from further responsibility, and declares entry out. The stake of 1912 should receive a large entry, and be very valuable. Every breeder should enter in it.

Remember the Date of Closing is January 1, 1911.

H. A. JASTRO, President.

J. A. FILCHER, Secretary,

Sacramento, Cal.

FRANK H. BURKE, a leading horseman, stock breeder, business man and clubman of California, is no more. The expected has happened, and after an illness of several months he passed away at his beautiful La Siesta Ranch, near San Jose, on Thursday morning, December 15th. His death will cause a void in the ranks of the horse owners and breeders of California that will be hard to fill, as besides taking a great interest in breeding, he was also a patron of clean racing, and his stables of trotters and runners have been prominent at the State and county fairs for over thirty years. He was a director of the State Agricultural Society and of the Pacific Coast Trotting Horse Breeders' Association, of which latter organization he has been the honored treasurer since the death of Captain N. T. Smith. He was a member of the Park Amateur Driving Club and at his own expense, but in their name, donated to the stadium track in Golden Gate Park the handsome concrete judges' stand that graces that course. As a member of the large real estate firm of Madison & Burke of this city he was widely known as one of the most thorough business men of this metropolis, and as a member of the Union League Club of San Francisco, Sutter Club of Sacramento, Jonathan Club of Los Angeles, and St. Claire Club of San Jose, his quiet, genial, gentlemanly manner and true friendship endeared him to thousands who had the pleasure of his acquaintance.

At La Siesta Ranch he bred many prize-winning Holstein cattle and owned a model dairy, while the trotters and thoroughbreds that he bred there have won many races on this coast and on eastern tracks. He was born in Milwaukee, June 13, 1848, and came to California with his parents in 1851, his father, Martin J. Burke, being a prominent figure in the early history of San Francisco, serving as Chief of Police from 1856 to 1865 and founding the real estate firm of Madison & Burke on his retirement from public office. When a young man Frank H. Burke entered upon newspaper work and like everything else he attempted he did his work well. He afterwards went into the real estate business with his father and since the latter's death has been president of the firm. He was an enthusiastic autoist, and while on a fishing trip last spring met with an accident, an auto in which he was riding on a narrow road overturning and falling on him, breaking several of his ribs and otherwise injuring him internally. While this was not the immediate cause of his death, it doubtless brought on other complications, and for the past few months he had been confined to his bed. His faithful and devoted wife has been at his bedside constantly, and the sympathy of thousands will go out to her in this her hour of trouble.

The funeral will be held at the chapel at Cypress Lawn Cemetery to-day at 1 p. m.

FROM EVERY SECTION of the country there are reports of many sales of trotting and pacing mares and stallions and the outlook is very bright for a large amount of breeding being done in 1911. The fact that the Pacific Breeders' Futurity for the produce of mares covered in 1910 filled with the largest number but one in the history of the stake proves that breeders are alive to the fact that stake engagements are necessary if they desire to either race or sell their colts. The numerous valuable stakes for three-year-olds in the United States have made the earning capacity of a three-year-old trotter so great that any colt of that age showing ability to trot in 2:10 can be sold at a very large profit on his cost if he is well engaged. There are also many

rich stakes for aged trotters with records not faster than 2:10 and sound horses that can show three heats around that time are also eagerly snapped up at good prices. The demand for pacers is not so great, but it is very good and any 2:10 or better side-wheeler that can do the Missouri stunt need not be kept long by an owner who really wants to sell. That there are many new men entering the breeding business is very evident. Buyers of broodmares and young stallions were very numerous at the New York and Chicago sales and paid good prices for the kind that suited them. All through the eastern and middle west country harness racing is more popular than ever, and there were more meetings and larger crowds in 1910 than ever before. Oregon and Washington, Idaho, Montana and Arizona are becoming harness racing States, and if we get county fairs restored to the people of California next year, this State will again take its place among the leading States where harness racing is given. We hope every breeder and owner of a harness horse will make it a point to communicate with the assemblyman and senator of his district and get their support to some measure that will give the State a circuit of good agricultural fairs. It is at these fairs that the people expect to see contests of speed between horses and while there are all sorts of stunts invented to help draw crowds to the fairs nothing has ever yet been found that suited as many persons and drew as large crowds at the gates as good clean horse racing. They have found in many parts of the east that if the book-maker is barred from these meetings the people turn out in larger numbers and racing without betting has been found to be not only possible but profitable. The New York State Fair had a splendid program of harness racing this year and the attendance was so large that a profit of \$70,000 was made and turned back into the State treasury. The same thing can be done on a smaller scale in other States. The American trotting horse is a popular animal with the masses and all signs point to his popularity being greatly increased during the next ten years. Owners of well bred mares should study the situation as it exists in the United States today and if they do they will not allow their mares to be unmated in 1911.

DEVELOPING THE "UNCLE SAM HORSE."

Uncle Sam is going to have a horse of his own. Out in Colorado he has established a breeding station, and has made an encouraging start toward founding a type of carriage horse that will be like nothing else in the world, and that will thrive, instead of degenerating, under American conditions. There are more than half a hundred colts trotting about the brown pastures of Uncle Sam's experiment station on the high plains—sleek, proud-gaited animals that represent the pick of the Yankee-breed of carriage horses. They are Uncle Sam's horses of the future. They represent but a small part of the colts that have arrived at the Government breeding station, for only a small proportion conform to the type desired by the Government experts who are directing the work of selection that is to give Uncle Sam the ideal carriage horse he has been signing for. The colts that are not regarded as the true type are sold, but enough of the animals have conformed to the rigid demands of the experts to warrant the high hopes that horsemen have centered in the Fort Collins project. Secretary of Agriculture Wilson looked over the horses at the breeding station not long ago and expressed himself as highly pleased with the results being achieved, and did not hesitate to declare his belief that in time all the world will be turning to Fort Collins for its ideal carriage horses.

The establishment of the breeding station at Fort Collins grew out of the disadvantageous conditions faced by American horse breeders for years. The millionaires who had developed the American trotting horse had perfected a great machine for speed, but too often without beauty and style. The demand was for something with all the attributes of speed and grace and endurance, but nothing seemed to be forthcoming. The ideal carriage horse must, first of all, be so full of the indefinable quality called style that the first impression of the onlooker is to cry: "What a beauty!" He must not be too large, for, if over 15.3 hands in height, he loses that appearance of frictionless action which stamps him as a wonderful individual machine. In sustained action he must always give the impression of plenty of reserve force—like an athlete who is always ready for the supreme test that never comes. The aristocratic note must be predominant and every quality must stand out in bold relief. There can be no hint of ugliness overlooked for the sake of speed, as in the trotter. On the other hand, if speed is not there, no amount of prancing or "bluff" will carry the carriage horse through the connoisseur's test.

Millions of dollars have been spent in the purchase

of heavy draft stock from France and hackney stock from England, but millions more must be spent in the maintenance of the strains thus produced. It has been alleged that the ideal carriage horse cannot come from any foreign breed, but for years nobody has been inclined to make a practical start toward solving the problem by developing a type that can be called national and that will improve under American surroundings.

The man who interested the Government in the project and secured the establishment of the breeding at Fort Collins is Mr. Eugene H. Grubb, probably the foremost rancher in the Centennial State. Grubb is of a scientific turn of mind, and his ranch at Carbondale, in the heart of the Rocky Mountains, is almost the "last word" in intensive agriculture and up-to-date stock breeding. Grubb had been to Europe several times investigating stock conditions over there, and he was convinced that importations would never solve the problem of producing the stock types desired by American breeders. He was particularly impressed with the futility of spending millions for foreign strains of carriage horses. Finally Grubb went to Washington and interested Secretary of Agriculture, James Wilson, in the idea of developing a national type of carriage horse. The Secretary gave the idea his approval and spoke warmly in its favor; Congress appropriated \$25,000 to purchase foundation stock. The State of Colorado tendered the use of buildings on its agricultural college grounds at Fort Collins. It was decided to accept the offer, as Fort Collins is in the high plains country, sloping east from the foothills of the Rocky Mountains, where livestock of all kinds thrives on the succulent buffalo grass, and develops great lung power in the dry, crisp air. Horsemen recognize, too, that the dry climate of the high plains will give stock of any kind a solidity of bone structure that cannot be secured under more humid conditions. Western bronchos that have matured under these ideal conditions have long been famed for their powers of endurance.

After long deliberation a commission, consisting of some of the most noted horse experts in the country, purchased the celebrated stallion, Carmon, one of the sensational performers in Mr. Thomas W. Lawson's celebrated coach four. Carmon, when purchased from Mr. Lawson in 1903, was known as Glorious Thundercloud, his name having been changed from the less spectacular title he now bears. He stands 16 hands high, weighs 1340 pounds, is twelve years old, and has a long list of prizes to attest to his virtues of beauty, style and disposition. Some critics found fault with the purchase at the start, but the admirable type of colts now at the Fort Collins experiment station would indicate that the commission did not err in judgment in putting Carmon at the head of the Government stud.

The purchasing commission collected thirty-five mares, representing the best carriage horse stock to be found in seven States. After long deliberation, fourteen mares were selected for purchase. Three others were donated by Mr. W. C. Brown, Judge William Moore, of New York City, and Col. Fred Pabst, wealthy horse fanciers who were deeply interested in the experiment. This gave the foundation stock desired. Many of the mares are noted prize winners. They are of varying colors, as there has been no thought of arbitrarily establishing a color standard for the ideal carriage horse. The mares are generally of the hackney type, though having more speed and "form" than the average hackney. Mr. J. O. Williams is the Government expert in active charge of the experiment station, while the horses have been, since the outset in the care of Mr. James Hutton.

The colts at the station have exceeded the expectations of those who have been in charge of the experiment. The process of elimination has been unsparingly carried on, but such magnificent animals as Alva and other three and four-year-olds have shown that classic perfection which has been demanded. A careful record is kept, and in a few years, when the Government is ready for the work of distribution, the aristocrats of the new stud will be distributed among the various States. Probably the agricultural colleges will be made the State distributing points. The strain will be jealously maintained until the "Uncle Sam horse" may be regarded as a type that is definitely established, and whose characteristics cannot be eliminated save through the most careless sort of cross-breeding. Then, as Secretary Wilson said on visiting the station at Fort Collins, horsemen from all over the world will be turning to America, and the millions that are now spent abroad will be kept at home.

The experiment at Fort Collins will not only be valuable in the actual results accomplished, but it will form an object lesson to farmers who are in earnest in the desire to breed a better type of carriage horse. It will show what mistakes to avoid in selecting parent stock, and it will arm the farmer with information that will render him proof against the wiles of the individual with traveling stallion that has no license to be considered in the carriage horse class. In carrying out the experiment the Government will merely be following the excellent example of England, France, Germany, Japan and other nations that have spent millions in improving their horse breeds. It will mean elimination of the "scrub" carriage horse and the substitution of a national type whose perfections will challenge the admiration of the world.—Arthur Chapman in Rider and Driver.

SONOMA GIRL 2:04¼.

To Be Mated With Justice Brooke (2) 2:09½ at Her New Home, Dromore Farm.

Sonoma Girl, speed marvel, race mare, and the most faultlessly gaited trotter that ever lived in the judgment of more than one close observer, has found a new home, having recently been purchased by George G. Moore, the proprietor of Dromore Farm, whose short career as a breeder has met with phenomenal success, and whose selections have shown a degree of judgment rarely found in a man of even greater experience. The daughter of Lynwood W., whose racing days are over, first flashed into prominence in 1907 when she came across the continent from California and took part in the great struggles for supremacy against the best of her division, and who from that day to this has been, not only a public idol but a genuine trotting sensation. In her first year of active racing on this sire of the Rocky Mountains, Sonoma Girl met with sharp resistance, and Highball, another speed marvel, was such a thorn in her side that their battles resulted, for a time at least, in the undoing of each. The mare won several of the most important events of the year, and was subsequently bought by Miss Lotta Crabtree for something like twenty thousand dollars. Although more or less of a disappointment to her owner, she gained her present record and had she been fortunate enough to find conditions to her liking, might have trotted at least two seconds faster than the one she now holds. Sonoma Girl is a hay or brown mare, about fifteen hands, three inches high, foaled in 1899, and is by Lynwood W., a son of Guy Wilkes, and out of Maud Fowler 2:21¾, a daughter of Anteo, who was by Electioneer, out of the famous Columbine. Her grandam Eveline, was a producing daughter of Nutwood, whose descendants in the maternal line have done so much in the breeding world. She is a very striking looking mare, well made, with an almost faultless head and ear, deep girth, great muscular development and tremendous length from hip to hock. In motion, she is the most attractive trotter I ever saw, and when she first appeared struck more than one horseman as being something new in horse flesh. She has the catlike tread that indicates phenomenal speed, and could rush away at a two-minute gait without the least apparent effort. While she was not a mare of excessive action, her stride was tremendous and her gait was as frictionless as a piece of machinery. I know of no other trotter whose gait is exactly like hers, and I have often thought that I would rather watch her at speed than witness a race between any field of horses I have ever known. That she should make a famous producer, there seems to be no doubt, for she has so many of the qualities of a successful matron that it should be but a question of proper mating for her to become the dam of stake winners at the very outset of her career in the stud. Her paternal grandsire, Guy Wilkes, was one of the very greatest sons of his sire, and her dam, Maud Fowler, already takes place among the best of the brood mares of the Electioneer family, while her grandam being by Nutwood, needs little else by way of commendation. In breeding her to Justice Brooke, her new owner gives her ample opportunity to distinguish herself, for this wonderful colt trotter who is not only a speed marvel, but a youngster of extraordinary class, comes from a family in which great brood mares play an important part. The result of this meeting will have a double infusion of the blood of George Wilkes on the paternal side, Justice Brooke being by a great grandson and out of Autograph by Alcantara, one of the best sons of this phenomenal stallion. It will also have an additional cross to George Wilkes through Sonoma Girl, whose grandsire, Guy Wilkes, was by that horse. It will combine the Electioneer and George Wilkes strain through individual members of each family that possessed individual merit to an extraordinary degree, and being by one of the great colt trotters of his day, a world's champion and a Futurity winner and from one of the fastest mares that ever lived as well as one of the best gaited and richly bred, its inheritance will be equaled by few foals that have thus far been produced. The career of a mare such as is Sonoma Girl is always a matter of interest to breeders, and her new owner who has shown such extraordinary discrimination and such rare judgment is sure to give her every opportunity. If she were mine, I would give her a chance of producing to a representative of the Bingen family particularly one with a great brood mare in his pedigree and would choose J. Malcolm Forbes, who next to Sonoma Girl, is the most perfectly gaited trotter I have ever seen. I would then mate her with either Peter the Great or with a son of this extraordinary horse, and with three foals such as these by Justice Brooke, by J. Malcolm Forbes and by Peter the Great, I would feel that my chances of winning a Futurity were indeed bright. It is possible that Sonoma Girl may become the greatest producer of any of the brilliant mares at Dromore Farm, certain it is that if she ever has a foal possessed of her marvelous speed and her faultless way of going, her owner can congratulate himself on his good fortune in securing her to add to his collection. Such mares as these, when bred to the great colt trotters of their day, will produce more than one of the Futurity winners of the future, for they, themselves, have something of their own to impart to their produce, some intrinsic merit to give to their offspring and are not dependent solely on their immediate ancestors.

Breeders of the light harness horse have had

abundant opportunity during the history of the production of the American trotter to note the extraordinary influence of certain mares, and some few men have taken advantage of the lesson that has been learned by close observation of the merits possessed by certain individuals. Breeders of English thoroughbreds long ago discovered the value of certain families coming from certain tap roots, or fountain heads, and as is very well known these have been divided for the convenience of students of breeding, by numbers, each representing some famous brood mare. Beginning with the history of the light harness horse until today, students of breeding will find that a few mares have played a more important part in the production of this type of horse than have the stallions whose names are in most instances more conspicuous than those of the females. An example of what has been done by the successful matrons of the past, and of those living today, can be had by looking through the Year Books and enumerating the descendants of such mares as Clara, Miss Russell, Green Mountain Maid, Beautiful Bells, Mamie, Santos, Sorrento, Paronella, Alma Mater, Ethelwyn, and a few others who have done much in the way of producing high class performers, successful sires and who, through their sons and daughters have founded lines that are imperishable. The wise breeder is he who closely follows the results of the past, that have been achieved by brood mares, and while, of course, it is imperative that good judgment be displayed in mating, that stallions of genuine merit be patronized, greater success can without doubt be achieved if one obtains as much of the blood of great dams as is possible. Green Mountain Maid, although a matron whose breeding at this time would be regarded as almost entirely lacking in every thing that is suitable, must have been a wonderful mare. She produced to Hambletonian one of the greatest sires that ever lived (Electioneer) if, indeed, he was not the most wonderful horse of all time. To Messenger Duroc, she produced several trotters of great capacity, and in doing so, she stamped herself as even more remarkable than when she produced her greatest son, for while Messenger Duroc without doubt possessed the ability to sire early and extreme speed, he was a horse of so many glaring defects that at this time his blood is regarded rather as a taint than as beneficial. The family of Green Mountain Maid has bred on until today her descendants are found in almost every breeding establishment in the land, and they number many of the most superior race horses and speed marvels in the world. Miss Russell founded a family nearly as great as that which takes its descent from Green Mountain Maid. She produced to Belmont the successful sire, Nutwood, who was also a trotter of some merit, to Harold, the trotting queen, Maud S., as well as the latter's own brother, Lord Russell, himself a successful sire. To King Wilkes, the fast pacer, Slavonic, as well as own brothers and sisters to Nutwood and Maud S. who added to her fame as the dam of trotters and producers. Harold never got a trotter from any other mare that was comparable to Maud S., nor did Belmont sire a son the equal of Nutwood, which goes to prove that the influence of this wonderful daughter of Pilot Jr., was greater than that of either stallion. The family founded by Beautiful Bells is identified with Electioneer in its entirety, yet it can be said without contradiction that great as was the success of the son of Green Mountain Maid, the greatest measure of it came through the mare who gave to him a number of record breakers. Through Chimes, Beautiful Bells furnished many of the fastest and gamest trotters of their day, including The Abbott. Through Bow Bells was given the world more than one sterling race horse and record breaker, and the same is true of Adbell, while others of her sons accomplished much to prove the merit this glorious mare possessed.

Mamie, the daughter of Star Almont who founded the Leyburn family, must be credited to a very great degree with the success of the trotters and pacers of that name. She was not only a wonderful producer, each of her foals having added to her reputation, but her family has bred on with striking regularity, and probably today has a greater reputation at home and abroad than that of any other in the Trotting Register. Some of her descendants found their way to Europe, and in the countries where racing the light harness horse is conducted extensively, are more highly prized than the members of any other tribe sent from America. This mare in some respects possessed a greater degree of merit than any of the other brood mares who have done so much to make history. Each one of her foals possessed speed and each in turn that had any opportunity whatever, added to the reputation of the tap root. There were probably fewer failures in this tribe than in any other in the annals of the light harness horse, and had the daughter of Star Almont lived for the same number of years as some others, she must today have taken first place in the list of truly great brood mares. Alma Mater had few equals and possibly no superiors in respect to her ability to produce speed and to transmit her great qualities through her sons and daughters. The own brothers, Aleyone and Alcantara, would in themselves have done her the greatest credit, yet there were others besides these to carry her fame down to posterity. Her son, Aleyone, in some respects the most extraordinary sire that ever lived, was lost to the breeding world after a very brief period in the stud, yet he left imperishable fame and an extended 2:30 list, a remarkable group of 2:15 trotters and through his sons and daughters founded one of the greatest families in the world.

Among the mares that have lived more recently, the names of Santos, Sorrento, Paronella and Ethelwyn stand out most prominently. The two last named, in many respects, take precedence over all others as they have produced a greater number of stake winners, as well as several record breakers. Paronella, through the performances of Country Jay, Nella Jay, Kentucky Todd, Judge Parker, Malise C. and several others, is at this time more conspicuous than any of her kind and while her sons and daughters have as yet had little opportunity to prove their real worth, those that have had a chance have done brilliantly. Kentucky Todd, one of the younger members of the family, at five years of age is the sire of three in the 2:30 list, each performance having been made by a yearling and in this respect he is absolutely unique, as no other horse in history has his entire roll of honor confined to trotters one-year-old.

Ethelwyn, who is still alive, each year adds to her reputation, and that her family is destined to become truly great, there can be no doubt. She produced among others the champion of her year, Impetuous, whose performances at two and three, stamped her as one of the most extraordinary mares that ever lived, and who in turn has become a double producer, Ethelwyn also gave to the world Ecstasy, a champion at two, and a heat winner in the Kentucky Futurity at three, and who has since then been credited with a 2:30 performer. The daughter of Harold is the dam of Ethel's Pride, a winner of the Transylvania, of Ecstatic, one of the fastest pacing mares that ever lived and of many others of great merit.

Santos is at this particular time more conspicuous than at any period of her life, as one son, Peter the Great, is the sensation of the breeding world, and another, J. Malcolm Forbes, a trotting marvel and one of the most valuable horses ever foaled. Peter the Great first brought Santos into public notice by his victory in the Kentucky Futurity, which reputation was enhanced the following year by his performance as a four-year-old. His success in the stud at the very outset was pronounced, and today in almost every important event representatives of his family can be found struggling for supremacy.

Sorrento closely allied to Santos through Grand Sentinel, while her successes in the stud do not cover as wide a scope as some others, gave to the world one of the most phenomenal trotters and sires that ever lived. In Jay Hawker, she produced the best young trotter of his time, and this stallion in four seasons in the stud accomplished more than is done by the average sire throughout a career lasting over two decades. Another son, The Bondsman, recently sold, sired Colorado E., the most spectacular colt of this or any other era, a holder of the world's record for trotters of his age, and whose career as a three-year-old included only one defeat. The families of Santos, Sorrento, as well as those of Paronella and Ethelwyn will soon rival those of the other great brood mares in history, and the sons and daughters descended from each mare by reason of their worth will be eagerly sought after by discriminating breeders.

A daughter of a great brood mare, if she be a good individual, and possessed of genuine merit is more likely to produce speed and racing ability even if mated with an ordinary stallion than is a commonplace mare when bred to a great stallion. It is for this reason that the fillies who come from the families founded by famous matrons are so desirable for breeding purposes. A great performer, no matter how superb she may be, lacks much that is desirable as a good mare if she does not come from a family in which there is at least one famous dam, and it is unwise to overlook the opportunities that are occasionally offered to obtain possession of the female descendants of one of the successful matrons in the list mentioned above, which, while it is by no means complete, represents a majority of the great dams in the history of the American trotter. There was sold during the New York sale a comparatively young mare who combines the blood of two extraordinary dams. The mare in question is Nella Jay by Jay Hawker, out of Paronella. Here is a mare whose sire, one of the real successes of the breeding world, was out of one of the truly great mares in history, whose own dam was a brood mare considered by many to have been the most wonderful success of any of the noted matrons produced during the last half century. If one were to build up a pedigree to order, he could hardly improve on that of Nella Jay, and when it is considered that in addition to her royal breeding, she was a Futurity winner, a speed marvel as well as a genuine race mare, some idea can be had of what was accomplished by her breeder when he mated Paronella with the wonderful sire, Jay Hawker. Just why Nella Jay did not bring several times the price she realized is inconceivable, for despite the fact that she is as yet unknown to fame as a producer, it is hardly possible to believe that she is destined to be other than a wonderful success. If those of her foals who have received training have failed to live up to their lineage, have been responsible for the lack of appreciation on the part of buyers, it does not speak well for the judgment of the latter, for until the daughter of Jay Hawker and Paronella has been given ample opportunity, she should not be condemned as a failure. It will be interesting to watch the careers of her foals by Justice Brooke with whom she will be mated in the spring, and if she does not produce great results by this extraordinary young horse, the theory of breeding by natural selection will have received a severe jolt. It is hard to believe that a Futurity winner, whose sire was a great race horse, and by a great

stallion, and from a wonderful mare, and whose own dam was one of the sensations of the breeding world, should prove anything short of a striking success in the stud, and it is for this reason that Nella Jay will be expected to accomplish something out of the ordinary, to live up to the best traditions of her family, and to take rank with the great matrons of all time. Theoretically, Nella is the most valuable of any of the choice selections made by her owner since he became interested in breeding and I, for one, shall expect him to breed even a greater trotter from the Futurity winner of 1902 than he does from the speed marvel of 1909, the sensational Native Belle, who has so recently been added to his stud.—Hawley in Stock Farm.

DEATH OF A GREAT BROOD MARE.

Rosy Morn, the famous producing daughter of Alcantara 2:23 and Noontide 2:20½, by Harold 413; grandam Midnight (dam of Jay Eye See 2:10, etc., etc.), by Pilot, Jr. 12, died at Dromore Farm, St. Clair, Mich., a few weeks ago, aged twenty-three years. She was foaled in 1887 and bred by John S. Clark, of New Brunswick, N. J., then a prominent figure in the trotting world, from whom she passed at an early age to T. C. Jefferson, of Lexington, Ky., and then, soon after, to the Hermitage Stud, Nashville, Tenn., at which time that now-defunct organization was one of the best-known speed nurseries in the entire country. The daughter of Alcantara was there used exclusively as a brood mare and her produce, especially those which she foaled to the cover of Bow Bells 2:19¼, the son of Electioneer and Beautiful Bells 2:29½, speedily made her famous as a matron. The first of these to attract attention was Boreal, foaled 1892, who, as a two-year-old, took a record of 2:17¼, which he reduced at three to 2:15¾, in both seasons winning rich and important colt stakes. Later, when retired to the stud, Boreal proved a remarkable sire, having to his credit the great gelding Boralm 2:07 (winner of the Kentucky futurity, Matron Stake at Louisville, the Massachusetts, the Transylvania, etc., etc.), Boreazelle 2:09¼ and Loyal 2:09¼, which places him in the select category of sires of three 2:10 trotters; he also has a close fourth to this trio in The Phantom (4) 2:10¼, while among his pacing performers are Pan Michael 2:03, Borowood 2:09¾ and Pender Jr. 2:09¾. Matin Bells was an own sister to Boreal, foaled in 1896. She was a pacer with precocious extreme speed, won the pacing division of the Review's \$30,000 Combination futurity in her two-year-old form, and at maturity was a Grand Circuit winner, taking a record of 2:06¼. Beauseant was an own brother of Boreal and Matin Bells, foaled in 1897. He also was a pacer, and developed such speed at that gait that he was sold, it was stated at the time, for the sum of \$17,000 before he had ever appeared in public. He took a record of 2:06½ in 1903, but was not a reliable race horse. The Curfew, the first of the produce of Rosy Morn, also sired by Bow Bells, was foaled in 1891, was a trotter and took a record of 2:27¼ in 1897. Bogan, foaled in 1899, was another product of the same cross, and in 1905 trotted to a half-mile track record of 2:19¼. Merry Peals, still another member of the family, foaled in 1895, after years of use as a brood mare, was given a record of 2:30 in 1903, at the age of 13, she being the sixth and last of the record produce of Rosy Morn, every one of which, as noted, was sired by Bow Bells.

Aside from her performing produce Rosy Morn has two producing sons without records. Of these, Austral, by Bow Bells, foaled 1894, and first known as Delgado, has 18 standard performers, headed by the pacer Manuella 2:07¼, among them being also Friendless 2:16¼, formerly Her Grace, who paced a public trial in 2:04¼ at Memphis some seasons ago. Prince Leon, foaled in 1893, was sired by Ponce de Leon 2:13, and was the only foal by Rosy Morn not sired by Bow Bells that has attained a place in the speed tables. He is the sire of Van Meter 2:16¼ and the pacer His Grace 2:14¼. Her son, Beauseant (p) 2:06½, is the sire of Emma Welte (p) 2:11¼, and seven other performers.

Thus far Rosy Morn has put one producing daughter—Morning Bells (Wedding Hour), another one of her brood by Bow Bells, and the last of them, she having been foaled in 1900. She is the dam of that grand filly Emily Ellen (3) 2:09¼, one of the best futurity trotters of 1910, and separately timed in 2:07¼ as second to Colorado E. in 2:05¼ at Columbus last September.

Rosy Morn passed from the Hermitage Stud, at its dispersal, to the late Marcus Daly, of Montana, from him to T. W. Lawson, of Boston, and then to Dromore Farm. For two years past she had been in a debilitated condition and she leaves no foals behind her at Dromore. Although she produced last spring by Barongale 2:11¼, her offspring had not sufficient vitality to survive more than a few days. Like many of the daughters of Alcantara, she was rarely blood-like and finished and these traits are reproduced in her offspring. Boreal was a superbly handsome horse and many of his get were of the same stamp, while Beauseant was magnificent in appearance. Austral is another very highly formed horse, while Matin Bells was an exceptionally fine mare in conformation.—Chicago Horse Review.

EASTERN ITEMS OF NEWS.

Mares from six different States were bred to Mobel 2:10¼ during the season of 1910.

Mike McDevitt is in love with the yearling by Moquette 2:10, out of Sarah W. 2:18¼, the dam of Joan 2:04¾.

Alonzo McDonald is in Boston and will remain there until after the holidays. He will winter in Memphis.

The taxpayers of Shawnee county, Kansas, recently voted bonds of \$50,000 for erecting new buildings and making other improvements on their county fair grounds.

Arnold Lawson of Boston has a yearling at Dreamworld that acts like futurity material. The youngster is by Bingara, out of Emily 2:11, by Prince Regent 2:16½.

Ecstatic 2:01¾, purchased for \$3000 by Harry Burgoyne, superintendent of Walnut Hall Farm on his own account, was sold by that gentleman at a premium to Dr. J. C. McCoy, who will breed her to Binvolo 2:09¼.

C. J. Hamlin is quoted as once saying "that to find out how fast a trotter or pacer can go a mile, multiply his best time for a quarter by four, and add six to the result."

A report to the effect that Walter Wiuans purchased the Stotesbury team for \$25,000 is an error. The price in no way, however, prevented the change of ownership, as there was another reason.

The black pacing stallion Director Joe, bred at Cloverdale Farm, Cormar, Pa., sired by Director, out of Josephine Young, the dam of Joe Patchen 2:01¼, was sold at the Old Glory sale for \$410 to W. J. Shepherd, Virginia.

Walter Cox should have a good Grand Circuit winner in 1911 in Belvasia 2:12¼ by Bingara, that cost him \$5725 at the New York sale. This mare was the star half-mile trotter of New England and is rated a 2:06 trotter.

South Bend, Ind., is to have a new trotting park, with both mile and half-mile tracks within the enclosure. A \$50,000 stock company is being formed and the new park will be the scene of at least one big race meeting a year when completed.

J. M. Winder of Bristol, Pa., has shipped the seven-months-old filly by Zombro 2:11, dam Clara Direct (dam of Maggie Winder 2:06¼), by Direct, 2:05½, to Henry W. Jones of Lexington, Ky., for development.

Jay McGregor 2:07¼, was a few days ago shipped from Lexington, Ky., to Washington, Ill., where he will make the season of 1911 at the Danforth Farm, the present home of the great young stallion Ed Custer 2:10.

Mr. Henry Schmulbach, owner of Directus 2:11¼ (sire of Joan (4) 2:04¾, was one of the most extensive purchasers of brood mares at the Old Glory sale, investing in a total of 11, and they are now in Lexington, Ky., in charge of Joe Rea. Next spring they will be bred to the sire of the world's champion four-year-old trotter.

An even dozen pacing mares have beaten 2:04: Daniel 2:00¼, Lady Maud C. 2:00½, The Broncho 2:00¾, Citation 2:01¾, Ecstatic 2:01¾, Darkey Hat 2:02¼, Aileen Wilson 2:02½, Mona Wilkes 2:03¼, Cheery Lass 2:03¾, Fanny Dillard 2:03¾, Hal Raven, 2:03¾, and Maud Keswick 2:03¾.

L. C. Harkness, owner of Walnut Hall Farm at Donerail, Ky., recently purchased another farm of 850 acres situated on the Georgetown Pike at White Sulphur, Ky., which he will use for cattle and sheep. The purchase was made necessary because of recent extensive investments in fine cattle and sheep.

General Brayton Ives, the New York banker who last year bought the Kentucky Futurity winner, Baroness Virginia (3) 2:08¼, is the new owner or Silent Briade (2) 2:10¾. Ed. A. Tipton bid on the colt for \$6500, giving a Philadelphia name as the purchaser, but in reality he was acting for General Ives.

John H. Shults has arranged with Myron E. Henry whereby the latter is to train three or four of the horses from Shults that were not sold at the recent sale. McHenry has therefore decided to open a stable at Poughkeepsie, N. Y., on April 1, and besides the Shults horses will train and race a few horses belonging to other parties.

W. R. Acton of Gananoque, Ont., owns the good son of McKinney 2:11¼, Brad McKinney 52942, out of Lygia, by Nutwood 2:18¾, second dam Iona 2:17¾, by Aleyone 2:27, third dam the famous Jessie Pepper, by Mambrino Chief. He ought to exert a great influence for good over the horse stock of that section of Canada where he is located.

Paul J. Sorg's four-in-hand, winners of the Arrowhead Inn cup at the recent New York horse show, was made up entirely of trotting-bred horses, and they trotted the nine miles from Arrowhead Inn to Madison Square Garden in less than 37 minutes, pulling a road coach and eight passengers.

Captain David Shaw was recently asked to put a price on his champion four-year-old trotter Joan 2:04¾, the past week. The Captain was reluctant about pricing the great trotter, because he said that he did not want to dispose of her, but finally said he would take \$50,000 and nothing less for the mare.

The prophets who foretold the downfall of the horse were dumb after the figures showing the attendance at the Horse Show of 1910 were made public. It was the largest in a decade, and the interest of the spectacle exceeded any thing that the oldest habitues of the great exhibition could record. Continued fine weather, which had favored the show almost without interruption brought out a crowd for the closing day which swelled the total attendance to something like 80,000.

Kentucky saddle horses carried off both championship prizes at the National Horse Show this year, Lawrence Jones' Poetry of Motion winning in the lightweight division and George Watson's Florham Flirtation, formerly Miss Flirtation, in the heavy-weight division. Poetry of Motion has now won the championship three times at the Garden, making a record which no other saddle horse has equalled. As a specimen of the ultra refined, showy park riding horse of the walk-trot type, it is doubtful whether his superior has ever been seen.

C. W. Moore of Detroit, Mich., has established a new stock farm at Coldwater, Mich., which he has named Fashion Stock Farm, and it bids fair to breed some noted horses. A three-year-old son of Peter the Great 2:07¼, is at the head of the farm stud, and his stable mate is a pacing stallion, Patchen Knight, by Twelfth Knight. Scott McLane, a well known Michigan trainer and driver, is superintendent of the farm.

TROTTING IN AUSTRALIA.

The following editorial appeared in the Nov. 9th issue of the New Zealand Referee:

"It is a remarkable fact that while the sport of light harness racing has gone ahead in New Zealand by leaps and bounds, an altogether different state of affairs prevails in Australia. Both in New South Wales and Victoria trotting was established long before it obtained a hold here, and so far back as the seventies horses and mares were imported from America. Amongst its earliest votaries were men of standing and ability, who practically laid a solid foundation to what should have been one of Australia's greatest industries. Yet despite their exertions the business has only progressed in one direction—that of breeding. From those early days to the present, Australia-bred trotting horses have been remarkable for their all-round excellence. In all the large centers the effect of this is to be noticed in the superior order of the utility horses, so that to some extent the industry has served its purpose in raising the standard of the trotting breed. Under the circumstances, it comes as something of a disappointment to find that there has been no corresponding progress made in another equally important direction, that of light harness racing. This branch of the industry has languished for years, and despite the best endeavors of a few enthusiasts, it cannot be made to progress as it should. In Sydney the sport is conducted by the New South Wales Trotting Club, an institution run on entirely non-proprietary lines, officered by a number of gentlemen whose sole object is to raise its standard. Their struggle against vested interests and questionable methods was a strenuous one, for at that time the sport had degenerated to such an extent that no self-respecting sportsman would associate with it. By strenuous exertions the new management gradually improved its standing, and despite continuous opposition, which unfortunately lasts till the present day, has at length put it on a respectable footing. The chief drawback at present is the want of a suitable track. By no stretch of imagination can the Epping course be classed as one ever likely to become popular with the general public. Its appointments are most primitive, but as it is privately owned, the club cannot expect permanent improvements nor cater for the comfort of its patrons. Efforts are being made by the executive to acquire a freehold course, and when this is done the highest hindrance to progress will be removed. There are plenty of highly-bred horses about Sydney to ensure good racing, and each year the trainers are becoming more competent. All that is wanted is to popularize the sport with the right class of people, and the surest way to attain that end is to provide them with clean racing and up-to-date conveniences. Prejudice such as that which hampers the New South Wales Trotting Club is hard to kill, but under its present capable management we have no doubt as to the future of the sport in the parent State. The conditions prevailing in Melbourne are altogether different. There the sport seems to have got into a narrow groove, and under its present vogue there seems little prospect of its gaining in popularity or making much progress. This is to be regretted, for in few centers is there more scope for the extension of light harness racing.

NOTES AND NEWS

Fifty head of Shire mares are to be sold at auction by Fred H. Chase & Co. next Monday evening, at the pavilion, 478 Valencia street.

The next sale by the Fasig-Tipton Company will be the mid-winter auction at Madison Square Garden, New York City, January 30 to February 2, four days only. This will be the first sale of the year 1911.

The sale of fifty head of Shire mares to take place at Chase's pavilion, 478 Valencia street, next Monday evening, offers an opportunity for small farmers to secure stock that will be profitable to own.

Wallace McKinney, a son of McKinney 2:11½, owned in Ohio, put seven new standard performers in the list this year. He is a full brother to Doc Book 2:10 and Jenny Mac 2:09, his dam being Lenor 2:24 by Dashwood.

Don't forget that N. A. Richardson, administrator of the estate of Ben Davies, of San Bernardino, will sell the three stallions Zolock 2:05½, Izalco and Blackmoor on Saturday, January 14, 1911, at auction. The sale will take place at San Bernardino.

If the supervisors of San Joaquin county purchase the old mile track property at Stockton for a fair ground, as is now under contemplation, San Joaquin will own one of the finest pieces of property in the State, and will be able to hold a fair that need fear no rivals.

Wilmar 2:11½, the Wildnut gelding that Mr. Frank J. Kilpatrick used as a speedway horse here and in New York, is now owned by Mr. W. M. Cushman, of Hagerstown, Maryland, where he is the kingpin trotter of the town. There are few horses than can head Wilmar in a half-mile brush on the road.

William S., three-year-old record 2:19½, by Sir John S. 2:04½, was burned to death in the fire which destroyed the stables at Wichita, Kansas, on the morning of November 20th. William S. was considered one of the greatest pacing prospects in Kansas. He was bred in California and was the first standard performer to the credit of Sir John S.

Allendale Farm, Melbourne, Australia, that had such a successful sale last spring, will hold another sale in March next, and has already begun advertising the same and has published a list of the horses to be sold in the Victorian Trotting Record, the official organ of the Victorian Trotting Association. Allendale Farm's management evidently knows that advertising pays.

In a letter to the Rural Spirit of Portland, Mr. C. B. Johnson, of Ogwen, Utah, states that he recently sold to a company at Lewiston, Utah, the stallion Knott McKinney for \$3400, and that he sold the stallion I Direct 2:12½ to Leroy Nelson of Brigham, Utah, for \$1500. Knott McKinney is a large pacing stallion and was sold to Mr. Johnson about a year ago by Capt. Williams of Palo Alto.

The Hemet Driving Club will hold matinee racing on Monday, January 2d, and arrangements have been made with the Santa Fe railroad company to run an excursion from San Bernardino to Hemet and return. The world's champion yearling colt Wilbur Lou 2:19½ by Kinney Lou, owned by Hemet Stock Farm, will be exhibited during the afternoon, and a program of good harness racing will be given.

A dispatch from Lexington, Ky., dated Nov. 29, states that Jay McGregor 2:07½, the fast grandson of Jay Bird that sired the dam of the world's champion three-year-old trotter Colorado E. 2:04½, has been shipped by his owner, W. L. (Farmer) Spears, to A. G. Danforth & Son of Washington, Ill., who have secured a lease of the son of Jay Hawker 2:14½, for the coming season.

The picture on our title page this week is of Kathleen Pointer, a filly foal of 1909, owned by Mr. W. W. Beadle, of Santa Barbara. The half-tone is from the photograph of the filly taken when she was eighteen months old, when she weighed 900 pounds. She was sired by Star Pointer 1:59½, and her dam is a full sister to Directly 2:03½, being by Direct 2:05½ out of Mabel by Naubuc. This filly is a pacer, and her picture shows that she has plenty of size and is of beautiful conformation.

During the last few years Belgium has made great progress in animal breeding, especially of horses, cattle and hogs. The value of horses exported advanced from \$2,600,068 in 1890 to \$5,739,820 in 1908. Germany, Denmark, Italy and Croatia buy in Belgium part of their horses for agricultural purposes. Prices for horses of medium quality have doubled during the last 25 years. First class stallions which sold at \$115 in 1837 and \$2000 in 1905 now sell at \$5000. The number of horses in Belgium for agricultural purposes increased from 216,199 in 1893 to 245,212 in 1908, while the number of cattle advanced from 912,740 in 1840 to 1,861,500 in 1908.—Breeder's Gazette.

Zombro 2:11, with two new 2:10 performers for 1910, leads all sires on this coast as a sire of extreme speed.

The blood of McKinney and Nutwood Wilkes mingle with great success, and while both stallions are gone from California there are many of their descendants here in the first and second generations.

High class brood mares appeared to be even more in demand than either stallions or young stock at the Old Glory sale. This does not look as though there is any falling off in interest among the big breeders of the country.

Nancy Hanks 2:04 is not expected ever to produce another foal, as she is now in her twenty-fifth year and has been barren since 1907. Her last foal, a filly by Todd 2:14½, as a three-year-old, the past season, trotted a mile in 2:26½ and a half in 1:08, with very little work, breaking included.

Trainer Tommy Murphy, who picked out the precocious youngster Native Belle, was so favorably impressed by the appearance of a yearling by Bob Douglas that he saw while in Kentucky this fall, that he persuaded Geo. C. Eno, owner of the fast colt, Dictator Todd (3), trial 2:10½, by Todd, to buy him. Mr. Eno paid \$1000 for the youngster. He is out of Betty B. H., dam of Dictator Todd.

Mr. N. J. McKaughan, of Riverside, who has been training the speedy little pacer Monk, that made such a good showing at the San Bernardino matinee recently against such horses as The Conqueror, etc., has several good colts by Carpus which are being worked and show a high rate of speed. The colt Walter C. is said to be one of the greatest little trotters in that section of the country.

S. V. Barstow, of San Jose, advertises the 2:10 sire Nearest 2:22 for sale. This stallion is a full brother to John A. McKerron 2:04½ and is a grand looking horse. He has such size and style that his services have been much sought after by the horse breeders of Santa Clara county who want carriage horses with speed. There are many of his get used in and about San Jose, and whenever the stallion has been mated with a mare of good breeding he has sired speed. Highly 2:04½ and Alone 2:09½ are by him. He is a sure foal getter and will make a very useful horse in any community where size and speed are wanted.

There are very few colts by San Francisco 2:07½ in the country, as that noted and game race horse was bred to very few mares up to last season, when he was purchased by the Walnut Hall Farm, Donerail, Ky. While trainer Hodges had him at Detroit getting him ready for the Grand Circuit he was mated with a very few mares, and one of these was Crescella, by Crescus 2:02½. The result was a weanling colt which is owned by Doc Simon of Toronto, Canada, and good judges declare that the youngster is as perfect an individual as one would wish.—Western Horseman.

When Driver George Haag returned to Manitoba with General H. 2:05½, after the splendid campaign the pair made down the Grand Circuit, they met a royal reception at the hands of the warm-hearted citizens of Calgary. A big crowd was at the depot to meet them and, escorted by a band, the famous horse and driver proceeded to the Empire Theatre, where a further acknowledgment of their great racing campaign was fittingly made, one of the incidents being the presentation to Mr. Haag of a purse of gold and a beautiful silver cabinet containing an engraved address.

A year ago last October Mr. E. A. Le Febre, of Montreal, came to California and purchased the brown mare Tubelina at the dispersal sale of Mr. A. B. Rodman's horses, held at Chase's sale in this city. Tubelina is by Tuberose 2:25 out of Lena Holly by Mountain Boy. Mr. Le Febre took the mare east and started her this summer in fifteen races in northern New York and Canada, winning thirteen first moneys, one second and one fourth money. Tubelina did so well that the horsemen who raced against her thought she must be a ringer and she was protested. Secretary Gocher sent to California for the identification of the mare which was furnished him and the Board of Review at its meeting in New York last week decided that Tubelina was O. K. and ordered that Mr. Le Febre be paid her winnings.

Private and public sales since the close of the racing season plainly indicate the days of fancy or fictitious prices are past and gone, let us hope, in the best interest of the business, never to return, writes Palmer L. Clark. The market value of the American light harness horse is on a solid basis, regulated by the supply and demand, and as the former is limited and the latter good with every indication of a steady increase for desirable stock for some time to come, it looks like an advancing market, therefore a good time to buy. Western and Southwestern horsemen are in better shape to take advantage of these favorable conditions and are more inclined to utilize their money, abundant stores of feed and extensive pastures in growing to maturity the colts offered by the leading farms, as well as picking up choice brood mares and stallions whenever a good opportunity presents itself.

Plans are being perfected by the San Bernardino County Driving Club for a racing matinee to be held Monday afternoon, December 26th. It is the aim of the management of the club to make the matinee one of the best ever held under club auspices, and this is possible as most of the local steppers are now in winter quarters at home. It is anticipated there will be several entries from Santa Ana and Hemet besides the usual batch of entries from Riverside, Redlands and this city. With this wide field to draw upon some fast events should result. Secretary Holmes is also planning for some novelty events such as mule and hurro races to add interest to the program and attract a greater attendance.

Maywood Stock Farm, of Indianapolis, the home of the champion sire Sidney Dillon, made an important sale a few days ago, when seven head of highly bred stock was sold for export to Denmark. They were three brood mares, one by Chimes, one by Allerton 2:09½, and one by Sidney Dillon, the first two in foal to Sidney Dillon, the latter to Rex Americus 2:11½; two weanling colts by Sidney Dillon, out of the two mares by Chimes and Allerton; a yearling colt by Sidney Dillon, out of a mare by The Patchen Boy 2:10½, and a two-year-old colt by Rex Americus 2:11½, out of Corona H., by Cresson, son of Hambrino. The latter worked a mile the past season in 2:27½. The prices paid for the lot were long ones and the sale shows that the reputations of Sidney Dillon and Rex Americus as sires of extreme speed are world-wide. The lot were shipped to Copenhagen on December 12.

CHARACTERISTIC LETTER FROM MR. KILPATRICK.

35 Wall street, New York, Dec. 10, 1910.

My Dear Breeder and Sportsman:

I just want to "drop a line" to congratulate through you, the State of California on its recent acquisition of one of the greatest trotting bred sires this country has ever produced, The Bondsman. The securing of this horse for California and the election of Gov. Hiram W. Johnson, a broad-minded, conservative, capable and honest man, who is pledged to further in all legitimate ways the development and improvement of highly bred stock of all kinds and to encourage the support by the State of county fairs, to my mind promises more for the future of the light harness horse in your State than anything that has happened in the last twenty years.

That The Bondsman will prove a success in California I have no doubt. I do not know at what figure he will stand, but whatever that figure is, if it were possible to make a guarantee, I would guarantee that the fifty, sixty, seventy, or eighty foals that may be produced to him in 1913 would sell at public auction for an average price of more than the entire cost of his service fee over that of the same number of colts sired by horses of mediocre merit.

I regret very much that I did not meet Mr. Wilson and Captain McCann at the Old Glory Sale, but I offer them my congratulations through the medium of this letter.

That Kinney Lou has "come into his own" must be a source of great pleasure to all who have known the horse and appreciated his wonderful qualities, as well as those who have been privileged to know his famous, genial and kindly owner, Budd Doble.

If California does not show its appreciation during the coming season of this wonderful stallion the horsemen of that State do not deserve the good fortune of having such horses at their service.

With kind regards to all the "office" of the Breeder and Sportsman and wishing them all the felicities of the approaching holiday season, I am,

Cordially yours,

FRANK J. KILPATRICK.

STATE SECRETARIES' FAIR MEET.

A number of State Fair secretaries met last week at the Auditorium Hotel, Chicago, and arranged dates for 1911. Arrangements were made for increasing the purses for harness races, particulars of which will appear in due season in the "Review." They also adopted a rule restricting passes to campaigning horsemen and employees, materially cutting down the free list. Following is a partial list of State Fair dates:

Week of August 2-6—Iowa, Des Moines; Ohio, Columbus; Illinois, Joliet.

Week of September 4-8—Nebraska, Lincoln; Minnesota, Hamline.

Week of September 11-15—Indiana, Indianapolis; Kentucky, Louisville; Wisconsin, Milwaukee; New York, Syracuse; South Dakota, Huron; West Michigan, Grand Rapids; Oregon, Portland; Colorado, Denver; Kansas, Topeka.

Week of September 18-22—Michigan, Detroit; Tennessee, Nashville; Kansas, Hutchinson; N. E. Iowa, Sioux City; Colorado, Pueblo.

Week of September 25-29—Oklahoma, Oklahoma City; Missouri, St. Joseph; Tennessee, Memphis; Montana, Helena.

Week of October 2-6—Missouri, Sedalia; Illinois, Springfield; Oklahoma, Oklahoma City; Utah, Salt Lake City; Washington, Spokane.

Week of October 11-15—Texas, Dallas.

Week of October 30-November 1—Louisiana, New Orleans.

AFTER THREE YEAR'S TRIAL.

A stallion law was placed on the statutes of Minnesota in 1907, and now after three years trial of the same, Secretary J. S. Montgomery of the Minnesota Stallion Registration Board has issued the following report on its workings, which will be of much interest to the horsemen of California who are contemplating having a somewhat similar law submitted to the California Legislature this winter:

In April, 1907, Chapter 436 of the Minnesota Statutes of 1907, went into effect. This was an act regulating the public service of stallions in Minnesota, its objects being to prohibit a horse sustaining any infections, contagious, or transmissible disease or unsoundness, from standing for public service and to require all stallion owners to advertise their horses properly so far as breeding is concerned.

Prior to the enactment and enforcement of this act, horse breeding had commanded a great deal of attention in the State, but the horse breeders of the State had come to realize that the industry was not making the progress that it should; and it had come to be a matter of common knowledge that the standard of the horses, especially the draft horses, produced in the State was not up to that of our neighboring States.

Since the passage of the law much interest has been created in the horse breeding industry. Every community had its questions arising from the effect of the enforcement of the law and a great deal of interest was created among the farming public regarding horse questions. Perhaps this interest has done more toward the improvement of the horses of the State, than the enforcement of the law. The education which the law has given the farmers has done an inestimable amount of good and would be sufficient to justify the law if nothing else had been accomplished.

This, however, only represents a small part of the good done. The greatest good has resulted from the clause barring unsound horses from standing for service. That many of our common unsoundnesses which detract materially from the market value of a horse are transmitted from parent to offspring in a great many cases, and that the predisposition to them is almost invariably transmitted from parent to offspring is no longer a matter of question with those who have made a study of it. It has been a commonly accepted fact in France, England, and Scotland for many years, but our breeders have been slower to accept it, which is one of the reasons that we must continually look to these countries to replenish our studs. Exceptions will, of course, be found but they are only sufficient to prove the general rule and not to disprove it.

When our law went into effect many unsound horses were found. While no definite figures can be given due to the fact that many stallions that were condemned were never reported to the board. I think that it would be a conservative estimate to say that least three hundred stallions were required to retire from service in the State because of rank unsoundness. The harm that this number of unsound horses could do in the State is hard to estimate, but it is certain that the loss of them has done the State a great good. Our system of examination has by no means been perfect, and no doubt many stallions have been "certified sound" by some of our local veterinarians when they should have been condemned. It requires time to perfect a system for handling a problem of this nature, and the only way to develop such a system without doing a severe injustice to someone, is to start in slowly and advance on a conservative basis. Our method has not proven perfect, but it has gotten a large per cent of the unsound stallions out of service and has done so without doing a great injustice to any stallion owner. It has also drawn the attention of farmers and breeders to the importance of matters pertaining to breeding animals and has caused them to avoid not only the unsound horse, but also the horse with poor conformation.

Another great good which has been accomplished by the stallion law has come through the provision, "that the certificate of pedigree must be furnished for each pure bred stallion before license is issued," and if such certificate of pedigree does not show that the stallion is properly recorded in an association which is authorized by the United States Department of Agriculture, he is licensed as a grade stallion. This has brought out many interesting facts and has shown that many stallions were standing as pure bred stallions that had no right to be called such. Some thirty cases have come to our notice of stallions having certificates of pedigree issued by some "fake" association. Such certificates are gotten up with gold seals and written in red ink, and to the inexperienced man may appear to be a "good pedigree," but it is not a certificate of good breeding and means absolutely nothing. It is hard to estimate the harm coming from the use of one of these false pedigrees. People use a horse of this sort thinking that he is pure bred and wonder why they do not get good foals. If the foals do not come out well they say that "pure bred stuff" is no good. It is hard to undo the harm coming from one poor individual with a fake pedigree. They should be put out of business as there are enough poor ones among our pure bred stallions. Thirty such cases have been found in Minnesota since our work started. Besides these, there were a great number of horses whose owners claimed that they were pure bred, but could show no papers for them. All of these have been forced to stand under their true colors. Many cases have been found where a pedigree has

been tampered with or in some way changed so as to be used for a different horse from the one for which it was originally intended. To catch all such cases each pedigree is checked over carefully with the stud book, and when a pure bred license is issued by the Stallion Registration Board it is an assurance that the stallion is of pure breeding.

Many farmers are unwilling to admit that there is any advantage in breeding to a pure bred sire. They will tell you that a "grade horse will get just as good colts"; that the "scrub" is a much surer "foal getter"; and "that the pure bred colt will be as strout and vigorous as one from a scrub." The latter two statements bear some elements of truth and it is a lamentable fact; but it is an erroneous idea to blame the pure blood and pure breeding to this fact. When our stud keepers can be brought to realize that it is the more thrifty condition of the scrub, due to proper care and exercise, and not his lack of pure blood that makes him more prolific, a great stride will have been made in the advancement of the horse breeding industry.

Our stallion law has done a great deal to educate the people along this line. In 1908, which was the first season after the stallion registration work was well organized, of all licenses issued 23 per cent were of pure bred horses and 72 per cent for grades. Since that time the pure bred horse has increased in numbers until at present approximately 38 per cent of all licenses in effect are for pure bred horses. This increase is very gratifying and will do a great deal to increase the value of the Minnesota horse crop. It means that the Minnesota farmers and breeders are coming to realize the fact that a stallion cannot be expected to transmit characteristics which he does not have, and that if they will have good colts they must select good sires. They are beginning to understand that a stallion with 100 per cent of the blood representing desirable type will transmit his characteristics more strongly than a grade with perhaps 50 per cent of his blood representing desirable type and the other 50 per cent of his blood representing the type with opposite and undesirable characteristics. The effect of this education has been very noticeable in the grade of young horses that have appeared in our country fairs and on our local horse markets this fall, and it bespeaks better times for the horse breeding industry of the State.

Our law is not all that it should be. There are three places wherein it can be greatly improved if the greatest good to the horse breeding industry is to result from its enforcement:

First: The stallion owner should be protected by the addition of a clause giving him a lien on the mare and offspring for the amount of his service fee. A lien law is no injustice to anyone; it affects no one except the dishonest man who tries to avoid paying his honest debts and it deals justly with him. A stallion owner cannot afford to have a valuable horse if he cannot collect service fees, and every man in this State and every other State who has a properly licensed stallion should be protected by a lien law.

Second: A change should be made so as to have all examinations for soundness made by a veterinarian appointed by the Stallion Registration Board for that purpose, and giving the stallion owner a right to appeal to a committee of veterinarians if he is not satisfied with an examination.

Third: A provision should be made that all stallions which have neither sire nor dam of pure breeding should be licensed as "Mongrel or Scrub," and not as "Grade." No horse has a right to be considered a grade of any breed which does not have at least 50 per cent of the blood of that breed. A horse with neither pure bred sire nor pure bred dam can hardly be considered as anything but "Mongrel or Scrub," and should be licensed as such.

If these changes can be made and our work can go on as successfully in the future as it has for the past three years, I believe that the State of Minnesota will realize great benefit from the stallion registration law.

MATING ZEBRA AND JENNET.

A number of hybrids from crossing a male zebra with jennets have so far been secured by the Department of Agriculture. The experiments were begun a few years ago in the attempt to reproduce the strong constitution and endurance of the zebra in an animal of sufficient size and tractability for domestic use. The zebra stallion used belongs to the Grevy variety, which is the largest and handsomest of the species. He stands 13.2 hands high and weighs 800 pounds. The most promising colt is one fifteen months old out of a jennet a little smaller than the stallion. The colt is 12.1 hands high, weighs 500 pounds, and is said to be superior in build, action, style and disposition to either parent. He has been broken to harness. He carries the zebra stripes dimly over the body but distinctly on the legs and shoulder where donkeys and mules often have stripes. As the zebra and donkey have a closer similarity in conformation than horses and donkeys it is hoped that the hybrids may prove to be fertile. Some large mares have lately been selected to breed to the zebra so as to get a larger hybrid animal, probably somewhat like the mule in general build, size and strength. If such hybrids are secured and prove fertile much is hoped for them from a practical standpoint.—Breeder's Gazette.

Drink Jackson's Napa Soda.

INFLUENCES OF SIRES AND DAMS.

A correspondent of The Stock Farm takes issue with a recently expressed opinion of this paper, attributing the wonderful speed and racing quality of Colorado E. 2:04½, to the Hambletonian and Mambrino Chief blood which courses in his veins through four or five generations of the best strains from those foundation sires, and says that Colorado E. is a great colt for the reason that his sire and the sire of his maternal grandsire were both produced by the same great brood mare Sorrento, meaning that both The Bondsman and Jay Hawker 2:14½, sire of Jay McGregor 2:07½, who sired the dam of Colorado E., were both out of the daughter of Grand Sentinel. We do not under-estimate the importance of great dams, and no doubt the wonderful form of the champion three-year-old is to no little extent due to the influence of Sorrento. Yet what are great dams without the help of great sires? Why did Green Mountain Maid produce Electioneer by Hambletonian 10, and nothing worthy of special mention by Messenger Duroc or Middletown? Or, why did Dolly produce Onward by George Wilkes and Director by Dictator, and nothing remarkable by Bald Chief, West Wind and several other no-account sires? Or Lady Carr, who produced Amhassador when bred to George Wilkes, but nothing worth recording to Abdallah Pilot, Standard Bearer, Administrator, etc.? These are cases that occur to us without any investigation of the subject, and doubtless many other instances of the kind can be cited. The influence of the dam is a potent one, but it must be supported by the loins of the forceful sire, or it is likely to avail nothing, as was proved when Nancy Hanks was bred to the thoroughbred Meddler. We like the horse that is bred deeply in the standard lines and who traces back through six or more generations to Hambletonian and Mambrino Chief, significant illustrations of which are furnished by the performances of Colorado E. and The Harvester this year.—Trotter and Pacer.

HOUGHTON SULKIES WANTED ABROAD.

Marion, Ohio, U. S. A., Dec. 8, 1910.

Breeder and Sportsman—Gentlemen: It may be a matter of great interest to you to know of the increased interest that is being taken in harness horse racing in some of the foreign countries. No safer estimate could be formed as to the popularity of harness horse racing than from the demand from the different countries for racing vehicles.

A few days ago we received from a large and very responsible concern in Buenos Aires, Argentine Republic, a nice sample order for forty sulkies and carts. In their initial inquiry these people say that they are commencing the trotting races; however the lack of vehicles of this kind is felt. With the consent of the President of the Republic a large horse show was held on November 20th at which time were contested four trotting races in which the greatest of interest was taken.

We also have an order for ten sample jobs to be shipped to Johannesburg, South Africa. Another for a half dozen jobs for Christchurch, New Zealand.

Our foreign inquiries in the last year have become very numerous and it is no uncommon thing to have from two to three of such inquiries in most mail. As it has in this country we feel that the sulky or cart will have much to do in the development of horses and horse racing, so that we are specializing on vehicles for these different localities, building the work to suit their requirements and conditions.

With apparently more interest than ever in the game in our own country, and the increase of interest that is being taken in the foreign countries, the automobile game adjusting itself to its practical plant, the outlook for the harness horse industry never was any brighter.

Very respectfully,
THE HOUGHTON SULKY CO.

OTTAWA'S ICE MEETING.

The ice meeting at Ottawa, the Canadian capital, in February next, promises to be even bigger and better than those given in the past. Eighteen races, with the purses aggregating \$12,100, is undoubtedly a splendid offering, and the association's pluckiness is deserving of recognition on the part of horsemen by a large gathering of owners with their flyers. Nine thousand dollars have been set apart for nine stake events, and horsemen are to mail their entries for these not later than December 13.

The stake events are: 2:08 trot and pace; 2:35 trot; 2:35 pace; 2:13 trot and pace; free-for-all stallion trot and pace; 2:18 pace; a free-for-all; a five-mile, and 2:18 trot. The remaining nine events include five classified races, in which owners will have a good chance to come well within the money in every instance. E. McMahon is the secretary of the organization giving the meeting, and will gladly supply all information desired upon application.

ANSWERS TO CORRESPONDENTS.

W. C. McCully, Corona.—We do not find a mare named Sonnie registered as standard, nor do we find any mare named Rexwood credited with a record of 2:15.

It is said that something like \$5000 is the total of the suspension list the management at Lexington has sent to the National and American Associations for collection.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DOWITT.

SCHOOLBOY RIFLE CLUBS.

Rifle shooting in the public and private preparatory schools of the United States is a new thing and though only started three years ago by the National Rifle Association of America, the boys of the country have taken hold with a great deal of vim. The only drawback to popular success is the opposition met from schools boards in the different cities. Although the short experience which has been had in this work has demonstrated that in these cities where the work has been introduced the school boards have been completely won over to this sport.

There is a bill now pending in Congress which provides for the free issue of arms and ammunition to schoolboy clubs. It has already passed the Senate and will probably be reported favorably from the Committee on Military Affairs of the House within the next few weeks, in which case it is liable to become a law at the present session of Congress. This tardy recognition by the Government of the importance of this work will bring this country in line with all other nations.

France spends over one hundred thousand dollars a year in teaching rifle instruction in the primary schools of that country. Australia has forty thousand schoolboys receiving rifle shooting instruction, and within the last eighteen months the Australian Government has decided to give rifle instruction in all of the secondary schools and the sum of fifty thousand kroners has been appropriated for the experiment and rifles and ammunition are to be furnished by the Government. In Switzerland every schoolboy receives an allowance of one dollar per year for ammunition. Canada has lately taken up this work, and one of its most important citizens—Lord Strathcona—has given two hundred and fifty thousand dollars as an endowment fund, the interest of which is to promote rifle training in the public schools of Canada. In England there is held annually a national shoot for the schools, and last year at the great Bisley range four hundred schools sent rifle teams to compete for the Ashburton shield; and within the last few months one of England's soldiers—Colonel R. W. Schumacher—has presented one thousand carbines to the National rifle clubs on a basis of two carbines to each club.

The work is being carried on in this country with success in New York City, Philadelphia, Baltimore, Washington, Portland, Me., Denver, Col., and Los Angeles, Cal.

Cincinnati, Boston, and St. Louis now have a plan for the introduction of rifle shooting in these cities before the school boards for adoption. Seventy-five school clubs have already been organized and have taken out membership in the National Rifle Association. It is among those clubs that the Inter-scholastic League for the winter of 1911 is being organized. Each club will fire one match each week and results telegraphed to the office of the National Rifle Association in Washington. Efforts are being made to secure from some patriotic citizen a suitable trophy to be given to the school that wins the League series of matches.

The National Rifle Association of America, through Secretary Albert S. Jones, has issued the following important bulletin in respect to the organization and program of the Interscholastic League for 1911, and also the Inter-club Rifle League season for 1910-11:

"We invite the attention of all our affiliated school clubs to the organization of a League among the clubs for a series of inter-club matches this winter.

All those clubs that are in good standing—dues paid for the current year—are eligible to enter. The entrance fee per team will be \$2.50. This entrance fee for the League series is separate and distinct from the Club's annual dues.

All entries must be in by December 19th, and must be accompanied by the entrance fee of \$2.50 to be accepted.

The schedule of the League matches will be made up on the basis of the paid entries in this office on the morning of December 19th, and the matches will start immediately after the Christmas holidays.

Unless there are so many entries that the matches would extend to late in the spring, each club will shoot one match with every other club in the League, and the 1911 Trophy will be awarded on the basis of the number of total wins. In case of tie the teams will shoot off. In case there are more than fifteen teams entered, the teams will shoot a certain number of matches and the prizes awarded on a percentage basis or there will be sectional sub-leagues organized and the winning team of each league shoot-off for the championship.

In addition to the trophy the members of the winning team will receive silver medals and the second team bronze medals.

The conditions to govern the matches will be the same as those of the "Astor" Cup Match, and as the Championship Match will immediately follow the close of the League series, participation in the latter will be fine practice for the premier event.

All the firing in the League series must be done under the direct supervision of a representative of the National Rifle Association—this representative must not be a student member of the club. If there has not already been such a representative appointed for your club, it is suggested that you recommend some one when sending in your entry.

Those clubs that expect to qualify more members for the 1910 "Junior Marksman's" decorations and shoot for the N. R. A. members' medal, are cautioned that only four more weeks are left in which to do so.

All those clubs that have not sent in their report of new officers and list of members should do so at once.

Nineteen civilian rifle clubs representing fourteen different States will take part in the Interclub Rifle Shooting League tournament of 1910-11. The schedule of matches are now being prepared by the National Rifle Association of America and they will begin the week ending December 24th and continue for nineteen weeks. The results of each week's shooting being telegraphed to Washington, where the results are tabulated and given to the press associations Saturday morning of each week.

The clubs which compose the league and will take part in the tournament are as follows:

Alabama—Birmingham Athletic Club Rifle Association.

California—Santa Ana Rifle Club; Southern California Rifle Association, Pasadena.

Connecticut—Winchester Rod & Gun Club, New Haven; The Park Club, Bridgeport.

Georgia—Savannah Rifle Association.

Maine—Bangor Rifle Association; Myles Standish Rifle Club, Portland.

Minnesota—Minneapolis Rifle & Revolver Club; St. Paul Rifle & Pistol Association.

Montana—Rocky Mountain Rifle Club, Butte.

New Jersey—Atlantic City Rifle Association.

New York—Manhattan Rifle & Revolver Association, New York City.

North Dakota—Dickinson Rifle Club.

Ohio—Cuyahoga Rifle Club, Cleveland.

Pennsylvania—Warren Rifle & Revolver Club; Fort Pitt Rifle Club, Pittsburgh.

Rhode Island—South Providence Rifle & Revolver Association.

Wisconsin—Badger Rifle Club.

"NIGHT SHOOTERS" ARRESTED.

A. C. Stuhbe and Harry Jackson, two San Francisco sportsmen (?) were arrested on the Alameda marsh near Alvarado last Sunday evening at 7:05 o'clock for "hunting and killing wild ducks" at a prohibited time, designated by Section 626 M of the Penal Code, relating to fish and game, as "at any time between one-half hour after sunset and one-half hour before sunrise of the following day." Sunset on Sunday occurred at 4:57 P. M. in that district. This infraction of the law is a misdemeanor, the fine for which is not less than \$25 nor more than \$500, or imprisonment not less than twenty-five nor more than 150 days.

The practice of "night shooting" has been long in vogue in the various Alameda marsh shooting districts. The nature of the territory makes the work of detection exceedingly difficult; nevertheless, arrests are made from time to time.

The arrests Sunday night were made by Fish and Game Commission Deputies J. W. Silva, W. J. Sedgely and E. J. Hoffman, who were out on the marsh after "night shooters." Four men were located. Stuhbe and Jackson were each apprehended with guns and ducks in their possession, George Smith and E. J. O'Brien, although in hunting togs and gumboots, were minus guns and birds. Each one of the quartette vehemently denied doing any shooting at that hour. A third gun was found. This was claimed by Jackson, who insisted he had been using two guns. The fourth gun was not found. Possibly it had been hastily "ditched" along with feathered evidences, if any. What its condition was when recovered only a gunsmith could determine.

The arrested men were taken in their own machine, driven by Jackson, to Hayward, where they deposited \$25 bail each in Judge Prowse's court. Jackson's bail was forfeited Monday morning. Stuhbe pleaded guilty and was fined \$25.

C. A. Muller and L. Philliher, who were arrested and fined last week by Judge Prowse for exceeding the limit on ducks, were also caught in the deputies' dragnet. The fusillade at Muller and Philliher's shooting ground all day warranted the deputies in overhauling their game hags. Sixty ducks were counted, but the surplus over the limit was claimed by a youth who accompanied the two hunters, who were, on that showing, allowed to depart.

It is reported that Muller boasted he would "heat the law" by having in his company one or more persons to carry the overplus birds. If such was the case Sunday evening he certainly made good.

Night shooters and other game law violators in the Alameda marsh shooting sections, will, it is claimed be closely watched hereafter.

ON THE ISLAND OF KODIAK.

[By Black Jack.]

Far north, where the Pacific Ocean waves wash the southern shores of the Alaska Peninsula lies an island called Kodiak. Although little known to fame, it is of considerable size, comprising an area of some 3,500 square miles, and can boast of one or two important settlements. In spite of its situation in such high latitudes, we find here what may well be described as "the parting of the ways" between the Arctic and more temperate regions. For, thanks to the moderating influence of the Japanese current which flows along its southern coasts, Kodiak is favored with climatic conditions such as are unknown even in places a few miles north or east of it on the mainland of Alaska.

So pronounced is the demarcation line at "the parting of the ways" that even on the island itself a traveler in summer will suddenly emerge from amid forests and vegetation of almost tropical luxuriance into a barren desolate land of silence, where lofty snow-capped mountains tower aloft, brooding, as it were, over the past terrors of an Arctic winter, which will soon descend once more, enveloping them in its icy grip. But the island is not blessed alone with an abnormal climate, since it is rich in mineral wealth, and, moreover, is a veritable sportsman's paradise. For here is the abode of *Ursus Middendorffii*, the most gigantic species of the bear tribe existing now on earth. Ptarmigan and wildfowl of various kinds are swarming here, and the coasts are deeply indented with countless fjords, into most of which flow splendid rivers teeming with myriads, of the various kind of Pacific Coast salmon. Some idea of the numbers in which salmon ascend these rivers may be gathered from the following fact: At Karluk, on Kodiak island, which is the most celebrated place for the run of the Alaska red salmon (*Oncorhynchus nerka*); a few years ago in one haul of a huge seine net over 100,000 of these fish were caught. Unfortunately for the sportsman who may wish to try his hand with rod and line, these fish seldom look at any form of lure in tidal waters, and never when once they begin to ascend the rivers.

The miniature town of Kodiak nestles cozily in a picturesque land-locked bay, which is sheltered from the fierce storms of the North Pacific by numerous small islands lying at its entrance. The town itself still resembles a Russian settlement, with its quaint Greek church, many of its principal buildings bearing traces of the days when, until 1867, the Russians ruled with an iron hand that vast territory of Alaska. Sheer behind the town rise lofty mountains. Should the wanderer who visits this spot desire to look on a scene such as he may not have encountered before let him climb above the town. Here on a fine summer day, in the clear atmosphere of these northern regions, the view is superb. To the north, east and west, tier upon tier, rise towering peaks, with many of their summits still deeply clothed in snow. The lower slopes in the short summer are verdant with sweet grasses or rich carpets of multifarious flowers, while in the valleys glimpses are caught of silent lakes or silvery streams which wind their serpentine courses through dense pine forests onwards to the sea. Southwards, far as the eye can roam, rests the mighty ocean, now for a while worthy of its name—the Pacific Ocean on which a gentle swell is rolling inwards to the land, only broken here and there as it softly hoids around those cruel rocks which rise near the surface in deep waters on these treacherous coasts, forming veritable death-traps for unwary mariners.

If the watcher gazes sheer below him, here, unfolded, lies a glorious panorama. A host of tiny islands cluster round each other, between which run innumerable channels known only to the native sailors. Flocks of seagulls sail lazily round, on motionless wings in the still air, uttering their plaintive cries, or rest peacefully on the waters of the bay, which are wondrous in their liquid transparency, placid as a sea of molten lead and smooth as glass, save wherever and anon countless salmon swimming in the bay, leap high out of the water. Through the deathlike stillness the echoes of these resounding splashes ascend even to the lonely watcher on his lofty perch, reminding him that rods and lines were means for catching fish, and hiding him wend his footsteps downwards once more to the peaceful village below.

Although the writer has paid more than one visit to this remote island, he was never provided with a proper equipment of salmon rods and tackle. But on the occasion of his last visit to the town of Kodiak he was in possession of a small 9-ft. trout rod and reel, carrying some 70 yards of light line. A native youth stated that the silver salmon (*Oncorhynchus kisutch*) then running in the bay would occasionally take some form of spinning bait if trolled behind a boat. Among other of his treasured possessions the writer, although merely on a big-game shooting expedition, happened to have a small silver spoon which in former seasons had seen much service on certain Norwegian rivers where "harling" is in vogue. A careful search revealed other necessities in the shape of two swivels and a few pieces of single gut leaders. With these a presentable spinning leader was soon rigged up and nothing remained but to find some suitable craft and a boatman willing to row it.

It is by no means easy to induce an Aleut native to see an element of sport in any undertaking, and when fish can be caught in nets, or ptarmigan shot running on the ground, the natives of Alaska regard the sportsman who wishes to catch a fish on a rod, or

shoot birds on the wing somewhat in the nature of a harmless lunatic. In the present case, however, a native schoolboy, imbued with the sporting instinct, was induced to produce his boat and row it according to instructions. The young Siwash himself was neither great in stature nor in years, and his home-made boat was suitable to his size, a mere cockle-shell of wood. The boat, which revelled in the name of a dory, was, in general appearance, a kind of cross between a flat-bottomed dingy and a canoe, but possessed neither the safe qualities of the one nor the speed of the other, and with two people in her was fully loaded to the gunwale. The next item was to improvise a gaff, and after having done this with the aid of a village blacksmith and a boat-hook, a move was made out into the bay to a spot where salmon were seen to be jumping. One great drawback to adopting the orthodox method of trolling was that the bay was thickly overgrown with patches of kelp and seaweed, which constantly fouled the line. Therefore we had recourse to casting the spoon in open patches of water. It was not long ere we had several slight pulls from fish coming short at the spoon, a trick peculiar to salmon, and one which has always baffled the writer to explain how it can be accomplished without the fish getting hooked when spoons are fitted with triangle hooks at both ends.

In due course of time one fish, bolder than the rest, was firmly hooked, and then the fun began. In a moment we realized the awful fact that our line was fouled around the top ring of the rod. An appalling disaster seemed imminent, since if the rod was strong enough to break the line our one and only spoon was lost for ever. Trusting that Fate would prove kind and the line strong, and knowing that our rod was but a flimsy, cheap, split bamboo, we quickly raised the top, held our breath, and waited for something to break. This it soon did, since a salmon is not to be denied in its first rush, and the rod gracefully broke some six inches from the top, the broken tip gently gliding down the line suggestive of further troubles.

Seventy yards of the light trout line is not much on which to play a salmon in the open Pacific Ocean, and his first jump showed our quarry to be close on 20 pounds. During the ding-dong struggle which ensued our guide handled his small craft in a masterly manner, following the fish in its wild rushes, and stopping promptly to order when the fish dashed madly beneath the boat. And in the end, as the final stage was reached, when, after some twenty minutes' battling, our fish came floundering to the boat's side, the diminutive rower, dropping his oars, seized the gaff and succeeded in landing the fish in the most approved style, the latter task being by no means an easy performance if we wished to evade capsizing our small craft. This fish afterwards pulled down the scales at slightly over 18 pounds, and had fought as gamely as any European salmon of similar size.

Having disentangled the broken tip from the line, we started operations once more, with a rod somewhat reduced in length but still serviceable. During the next hour two more fish, of almost equal size to the first one, were landed, besides several others being hooked and lost. As the result of a little over two hours' fishing we returned home well satisfied, with three salmon weighing a total of 52 pounds, all caught on a tiny trout rod, thereby demonstrating the fact that, even in these far Northern regions, good sport may be had with rod and line if we set to work in the right manner; and although the writer has caught salmon of all kinds in most lands where these game fish are found, yet he often looks back with pleasure to that memorable day spent at Kodiak. Although the silver salmon is a very handsome fish and often runs up to a weight of 30 pounds, it cannot be compared for size to the great king salmon (*Oncorhynchus tshawytscha*), which runs earlier in the year, and plentifully on the coasts of Alaska. These fine fish often reach a weight of nearly 80 pounds, and are reputed to have been caught up to 100 pounds; but although the writer has seen many of them, he personally never met with one exceeding 80 pounds. These fish also take the spoon freely in the southern waters of British Columbia and Vancouver Island.

Hunting Casualties.—A Chicago press dispatch of the 1st inst states, the "hunting season of 1910, which closed yesterday, cost 113 lives, according to statistics from twenty-three States collected by the Tribune. This is considerably more than were killed during any previous season of which there is a record. The loss of life in 1909 was 87; in 1908, 57; in 1907, 82, and in 1906, 74.

The number of wounded this season, however, is less than a year ago, only 81 having been hurt this year, against 104 for the season of 1909. It is likely the death list this year will be considerably increased later by reason of the fatal termination in the cases of many of the injured.

"Mistaken for a deer," and "shot by a companion," continue to lead as the reasons for the shooting of hunters. Michigan leads the list, with twenty-seven killed.

Eighty-three albacores was the total catch, on light tackle, of five anglers last Saturday at Avalon, Catalina Island.

Castroville gunners have recently enjoyed excellent duck shooting.

Drink Jackson's Napa Soda.

RANDOM NOTES.

[By Loch Laddie]

The subject of kenneling dogs is a very difficult one to discuss from everybody's standpoint, for no two persons are confronted by the same conditions, such as available space, number of dogs, and location. The owner of one or two dogs has a very easy proposition to handle, but where 15 or more dogs are to be kept, the question assumes larger proportions. If you are in the country where your dogs are not likely to become a menace to yourself or your neighbors, give them their liberty as much as possible; but when your bunch of self hunters begin to develop it is almost necessary to kennel the dogs.

Not only will the self hunters cause much worry, but they will also rouse the ire of your neighbors. No matter how beautiful a ripening field of wheat or oats your farmer friend may have, it only appeals the more likely place to the self hunter. While the dogs may not do a great deal of financial damage to the farmer's crops, still no man likes the idea of these canine nomads taking possession of his fields.

The selection of high ground is a necessity, especially a point that drains quickly, for then no pools will form to make breeding grounds for germs; and as soon as you select your place, sow it well in mixed grass for you will often see how dogs will relish these helps to throw off worms. Eighty rods of fencing will make a large enough yard for a string of 20 dogs. If they are smaller breeds than field dogs a smaller space will be sufficient.

A few shade trees are absolutely necessary; build the gate away from the shade, as dogs, in anticipation of their meals in warm weather will pile together near the gate, producing great dust noies that are at least not desirable; this is especially the case in the south. Consequently many have three gates to a kennel yard and use a different gate for entrance at each feed, so the dogs then rarely acquire the habit of piling around a certain gate. If these entrances are not shady the dogs are not likely to gather and the conditions are simplified.

You should have one room sufficient to the dogs' needs; paint the floors and walls twice a year with coal tar, for this will be of great help in the fight against fleas. Have at least two windows, one to the south, the other to the west. One more would not hurt, as the germicide qualities of sunlight are not to be despised. Benching, etc., can be made to suit your needs and taste. We greatly object to the use of one building for sleeping quarters, another for cooking room and the next a hospital, because the sanitary results from such arrangement are not of the best, and it may be a source of contagion. Your neighbor's harm or some quarters removed at a good distance from your kennel will make a better hospital and less necessity for a closer watch on the other dogs. In treating the sick dog be firm, gentle and patient. Plenty of fresh air of a proper temperature—no draughts, is a requisite. Have his sleeping quarters comfortable as possible. Be regular in administering medicine and all other cares, but get away from your patient as soon as you can. A dog is naturally intensely nervous, a sick dog more so, and with less power to recuperate than a well dog. Wash your hands in some potent germicide and spray your clothes with the same, or, what would be safer still, change clothes for your sick visits. In a year's time you will gain experience that will be of more actual use than all the advice offered.

For the care and special attentions needed in the proper raising of the thoroughbred puppy the following suggestions will apply where but one dog is concerned.

The moment the puppy arrives is the time to take possession of the field as master. For at least a week the utmost vigilance is required. If care be taken to prevent him from erring in that first week, he will know his position and limitations at once. But if he is allowed to own the house it will mean months of arduous and discouraging work later to subdue him.

If the pup shows signs of fear at first caress him a little just to get up his nerve, but be careful to have him alone, as there is nothing so disconcerting to an infant as to be pounced upon by a lot of strangers. When he shows signs of "coming to" let him have a few moments exercise in the yard by himself. The air will benefit after confinement and it will give him an opportunity to answer the imperative calls of puppy nature.

After a slight investigation and a few turns around the yard the pup will regain his nerve and be ready for a feed—most of them are constantly thinking of their stomachs when awake. Be careful to make his meal very frugal, as it is always unwise to feed him while he is in a state of excitement, or immediately after strenuous exercise. I would recommend a little "puppy" biscuit—which can be procured at any of the pet shops—cracked up fine and softened up with hot water. A little pure gravy or meat soup-stock, free from grease, added, will prove very tempting, but if he will take the biscuit alone, it is just as well to omit the gravy until you are sure the pup is healthy.

Pups, like babies, have extremely delicate interior plumbing, and if that can be kept in order until they are well started on their growth there should be no difficulty.

After feeding, procure a solid beef bone—not too large for the dog to handle with ease—with nothing on it but a bit of tough gristle, and let him take it to his bed and be quiet. There is no solace so sweet as a good bone. Left alone he will devote his time to the bone and gnaw himself to sleep. And if undisturbed he will awaken with a kindly disposition toward his surroundings.

The next in order is to introduce him with as little disturbance as possible to the members of the family. These things look trivial on the face but they save a vast amount of confusion in the puppy mind and a deal of trouble for the owner.

One reason for avoiding excitement is that very small puppies have little self-control and a sudden fright, or even surprise, will result in the spoiling of a good carpet, and this accident may render house-breaking very difficult.

A very important problem to decide at once is whether or not the dog is to be raised inside the house. It is very dangerous to allow a dog to sleep one night in a warm room and the next to lie out in the cold. A house dog is much more delicate than one raised outside, not only on account of being tender through the comforts of artificial heat, but from a deficient coat. Few dogs take a proper winter coat if housed.

If the dog is to live inside, have the bed made in one place and make him use it. If he is to live outside, prepare a warm box, which is water tight and fill it well with clean straw. Rye straw will keep a dog almost as clean as washing. Scrupulously avoid rags or old carpets, as they hold the dirt and dampness and are unhealthy. It is wise to raise the kennel several inches from the ground, as it allows a free circulation of the air and prevents dampness.

In cold weather, the kennel should be as small as comfort will permit, as the heat of the body can raise it to a better temperature than a larger one. But whether your puppy is to live inside or out, make the decision at once and put him in his place as soon as possible. If he is destined to live outside take every precaution to have the kennel sheltered and dry. After a feed and a sleep the dog will accommodate himself to his surroundings and it is always best to initiate him into his regular routine as soon as he enters a new home. This is imperative.

Dogs, especially when young, are largely creatures of habit, and it is therefore of the greatest importance to start them right. Bad habits are formed quickly and are so difficult to break, that with puppies a negative course must be pursued for a short time—at least until the idea of obedience is learned. Before teaching your dog tricks, devote your time to the instilling in his mind the fact that he is your companion, but that you are always master.

For a week or ten days keep him in the straight and narrow path that leadeth to dogdom. This is not a difficult task. It requires attention and patience, but in no case is the old saying, "an ounce of prevention is worth a pound of cure" truer than in the training of dogs. Every successful breeder knows this. By cleanliness, proper feeding and exercise he prevents disease, or at least reduces it to a minimum. By beginning training early he prevents the development of bad habits. It is just as important for the house pet to be guarded with the same care. Don't allow your new puppy privileges on his arrival that will be forbidden later. If he is not fed at the table he will not have to be chastised for being a nuisance when his presence is undesirable. Above all, if you would save your pet from the disorders common to young puppies and from untold suffering, refrain from feeding cake and sweetmeats, and scrupulously guard his stomach.

The clumber spaniel, some writers contend, is the original land spaniel, and their contention is certainly borne out by weighty evidence. About 200 years ago the founders of the present race were imported into England by the then reigning Duke of Newcastle from the kennels of the Duc de Noailles in France. The name is derived from Clumber, the Nottingham seat of the house of Newcastle, where they were taken on their landing from France, and have since been maintained.

The breed is rather scarce in America, and strangely so, for not only are they beautiful and attractive dogs, but workers of the "Carter" order of merit.

In the water the clumber is almost as much at home as on the land, consequently he makes a most excellent wild fowl retriever. His light color, however, is against him for this work, as it readily reveals his presence to the keen eyed duck. His scent is of the finest. He ranges close to the gun, requiring less training than any other breed, and being perfectly mute when on game, is enabled to draw right up to the birds before flushing.

Major Venables, stationed at Halifax, N. S., in the year 1842, is credited with bringing the first clumber to America. Clumbers flourished in the Ottawa district. It was left to James L. Little of Brookline, to uphold the breed in the States, but he soon relinquished the field and the Canadians have had matters all their own way for a long time.

The first large class of this breed was exhibited in New York in 1895, with a total entry of 10, with no duplicates. In 1897 there were four entries; then no entries until 1901, when there was an apparent revival of interest, New York having 20 entries. In 1905 the Norwood kennels made 10 entries. Since then there has been a more or less interest shown in the breed, but nothing near what it should be.

The clumber should have the look of great power,

sedate in all movements, but not clumsy; weigh from 35 to 65 pounds, head large and massive in all dimensions; eyes large, deep set and hazel in color, not too pale, with dignified and intelligent expression; ears long and broad at the top, turned over on the front edge; hair short and silky, without the slightest approach to wave or curl; neck long, thick and powerful; shoulders immensely strong and muscular, giving a heavy appearance in front; body very long and low, chest of great depth and volume.

Length is an important characteristic: the nearer the dog is in length to being two and a half times his height at the shoulder the better.

Forelegs short, straight and immensely heavy in bone; hind legs not as heavy as forelegs.

The color should be lemon and white or orange and white. The fewer markings on the body the better, the perfection of the markings being solid lemon or orange ears, evenly marked head and eyes, muzzle and legs ticked.

THE LATE L. M. GRAY.

Fish and Game Commissioner Lendel Morton Gray, who was but recently appointed by Governor James N. Gillett, was the unfortunate victim of an automobile accident on the 11th inst.

In the passing away of L. M. Gray in the prime of life, a keen sportsman, an upright business man and a warm-hearted citizen has departed, mourned by many friends and a surviving widow and son.

He was the Pacific Coast Manager of the Kosmos Steamship Company and stood high in local commercial circles as a sterling business man and public spirited citizen.

As a sportsman he had the reputation of being an ardent and skilled angler. As a devotee of the shotgun he loved recreation on upland and marsh and was a clever wing shot. He was a member of the Stewart Gun Club whose duck shooting preserve is located on the Stewart pond tract near Denverton, Solano county.

His brief term as a Fish and Game Commissioner was sufficient to demonstrate that he was en rapport with the situation and that the sportsmen of this State were represented by a gentleman who was intelligent, fair and would have been an efficient and capable official.

Hurled from his machine as it skidded and turned a complete somersault, he was killed on the road two miles south of Gonzales, in Monterey county. Gray's wife and his chauffeur, James Rooke, who were with him in the machine at the time of the accident, escaped with slight injuries. Gray's favorite dog met the fate of his master by being caught beneath the big auto.

The Grays were returning from a visit to Paso Robles. Gray sat at the wheel as the town of Gonzales was approached, and was sending the machine along at a rate of thirty miles an hour, when suddenly he came upon a sandy stretch. In an instant the wheel was wrenched from his hands, the machine skidded, turning completely over, and Gray was pitched headlong to the side of the road.

Mrs. Gray and Rooke fell out, but sustained only a few bruises. When they reached the injured man's side he was unconscious and he died within a short time, his skull having been fractured.

GOSSIP FOR SPORTSMEN.

Orange Belt Notes.—Hunting conditions for some Southern California sportsmen are not of a very rosy hue, judging from the following recent Los Angeles press accounts:

The individual hunters who are shooting on the highways keep busy cursing the gun club men as they travel back and forth from the city and the club grounds, and that the latter spend most of the time when they are in their clubhouses trying to devise a way to keep the "greenhorns," as they call them, from scaring all the ducks away from the preserves.

The nimrods that are working the roads are having considerable success around the clubs that lie well inland. The ducks generally leave the ocean flying high, but when they get a couple of miles from the shore, especially in the morning, when they are looking for feed, they fly low, and good bags are being taken on the highways in some of the districts almost daily.

The great trouble is that many of those shooting on the road are inexperienced duck hunters and keep banging away at every flock of birds that go over, even though they are far out of range. The unnecessary noise spoils lots of good sport, as ducks behind those shot at immediately take a higher altitude.

The Los Angeles sportsmen have given up the idea of petitioning the Federal government in the matter of protecting the rookeries in Alaska. Some of them claim that the decreasing number of ducks coming south each year is due to the raids made on the eggs in the Alaskan nesting places. Thousands of cases are gathered annually and shipped to the big baking establishments, where they are used in the making of pastry, and to photo supply houses. It is claimed that the proper Federal authorities have been advised of the practice and have promised to look into the matter. [This statement is hardly worthy of credence. The U. S. customs reports do not show that there is a traffic in wild duck eggs. It is an offence against the Federal law to gather eggs of water fowl at any U. S. game reserve.]

The recent cold weather has served to bring down quite a number of jacksnipe from the North and

some of the duck hunters have turned all their attention to bagging them on the hunt days two weeks ago. B. M. Smith and Judge H. H. Rose both got the limit on the Alamitos Club and one limit was taken on the Boisa Chica.

Members of the Aliso and the San Joaquin Clubs, located near the Irvine ranch in Orange county, say that a number of geese have come to their preserves during the last week and that a number of the club men are planning to have wild goose for Christmas.

There is rumor that the gun club men of Orange county are going to unite in trying to get the county supervisors to pass an ordinance that will keep the hunters off the roads. Most of the members of the clubs are residents of Los Angeles county, and it is thought that the Orange county officials will buck if the ordinance is put up to them. The county is mostly a farming district and nearly all of the grangers keep a shotgun for rainy days.

A few years ago, when the ground now occupied by the gun clubs was idle, being used only for pasture, and any one was welcome to hunt on it, there would have been little opposition to the prohibiting of shooting on the roads, but now that all of the sloughs that the ducks frequent are inclosed in preserves, it is not likely that the farmers would take kindly to having their only shooting ground taken from them.

There have been a number of complaints by the gun club men that the road shotgun enthusiasts are abusing their privileges by paying no attention to teams on the roads. It is thought that these guilty of this negligence are not residents of the community but youths from Los Angeles who are not used to the ways of the country and seemingly do not realize that the majority of horses are afraid of the report of a gun.

A West Shore Club member says that a number of the hunters are going after game too early in the morning, there being several who were shooting ducks in the vicinity of the club twenty minutes before sunrise one Wednesday morning.

The duck hunting in the middle of last week was not quite as good as it was Sunday, the game on the majority of the clubs not being as plentiful as earlier in the week. Widgeon are scarcer. Mallards continue to arrive daily. The crops of many of those killed are found to be filled with lima beans showing that they either feasted in the fields of Ventura county on their journey here or visited the ranches between Los Angeles and Santa Monica.

Fish Commission In Status Quo.—The condition existing in the State Board of Fish and Game Commissioners may cause Lieutenant-Governor Warren Porter to make another appointment in the absence of Governor Gillett. The death of Commissioner Lendel M. Gray left the Board with but one representative in California, M. J. Connell of Los Angeles, as Prof. David Starr Jordan is in the East.

Bills against the department have accumulated and the salaries of the large staff of employees are to be paid for the current month. The latter are regarded as specially desirable because of the holiday season. Commissioner Connell signed the demands and Attorney-General Webb was consulted in relation to the legality of receiving Commissioner Jordan's authorization by telegraph to affix his name to the claims. The law officer of the State ruled that this could not be legally done.

Now it is proposed to have Lieutenant-Governor Porter appoint a member to the vacancy in order to meet the situation. While there has been some "kicking" about the Lieutenant-Governor making appointments in Governor Gillett's absence, the fact remains that he is vested with all the authority of Governor while Gillett is away, and his appointments are of full force and effect, as if made by Gillett himself, complaints of the disappointed aspirants notwithstanding.

It is announced that Lieutenant-Governor Porter has several names under consideration and may appoint a Fish Commissioner to succeed Gray, the deceased, at any hour.

Local Hunting Notes.—The general outing of the gunners last Sunday was, in most localities, deficient in wild duck returns. The rain of the day before, followed by a fair day, scattered the birds from many favorite shooting grounds that had heretofore been prolific in well filled game bags.

Shooters who visited the Los Banos region returned Sunday night with many limit bags.

Quail hunters, on the contrary, had better ground and weather conditions to favor them than almost at any other time this season. Many quail limits were shot in Marin county. At the Country Club, Alex Hamilton, F. W. Van Sicken, J. Lawson, Templeton Crocker each shot limits. Several fine strings of English snipe were shot also. Near Marshall's Fred Butler and W. W. Richards accounted for limits Saturday and Sunday.

Steelhead Angling.—At Duncans Mills, since the bar opened nearly two weeks ago, the steelhead fishing in Russian river has steadily improved. During the week days numerous local rodsters enjoyed the sport, Dave Sachs being high book with a 22-pound fish. Last Sunday a large delegation was on the river, quite a number of fish were caught, including salmon grilse running from 2 to 4 pounds in weight.

Last Tuesday six large steelhead were taken and over 30 smaller trout running 1½ to 2 pounds in weight. The gathering of the fraternity tomorrow (unless rains intervene between this writing and

then) will be a notable one. Should the weather hold fair until the end of next week the prospects for lively and sensational fishing are most pleasing, for then will be about the annually expected time for the arrival of the big fellows and the perlick aspect of the sport.

The killing lure has been a No. 4 Wilson or Stewart spoon, silver inside, copper outside. The red ibis No. 6 fly, tipped with a bit of holed shrimp is next in favor. When the fish are fresh run they do not fancy the roe baited hook, after a week or ten days in the fresh water they develop an appetite for an egg diet. Numerous small steelhead, which have probably been in the river since the September run, have been caught with roe.

An Extraordinary Injunction.—If the account in the Los Angeles Times here quoted is correct, the situation down south is at an acute stage.

In one respect, the injunction, against the carrying of firearms in a designated district, is not worth the paper it is written on. As to the stopping of shooting or hunting on the beach, between high and low water mark, the prohibition is laughable.

One clause is an infringement of a constitutional right, the other abridges the action of citizens upon land under U. S. jurisdiction—and which territory is free and open to all.

The question as to the right of the owners of the land, their agents or the general public to shoot where prior hunting rights had been disposed of is a question, of course, of civil law. It is possible, that the Sunset Company may have purchased the land ignorance of the shooting lease, if so, they will probably have to abide by the oversight in not having a carefully prepared abstract of title:

"Fighting to protect its hunting grounds from the public, the Lomita Gun Club Monday last went into the Superior Court and secured an order from Judge West restraining the stockholders of the Sunset Land & Water Company in particular and the public in general from hunting at Sunset Beach. The gun-club will ask that the injunction order be made to extend to August 25, 1913.

The plaintiff in the suit is the Lomita Land & Water Company, with Ward Chapman and Hickok and Crenshaw attorneys, and the defendants are the Sunset Land and Water Company, J. A. Armitage, "John Doe" Armitage, W. R. Petty, W. E. Richey, A. J. Coe, John Venson, R. D. Richards, E. A. Sendy, L. A. Pulliam and "John Doe" Hummel.

The complaint sets forth that on August 25, 1903, what is now Sunset Beach and the Lomita preserve was owned by F. E. Robinson. Robinson sold land to the Lomita club, and gave it a fifty-year lease on the remainder for hunting purposes only. In November of that same year the beach site, lying between the preserve and the ocean, was sold to the Sunset Company.

The complaint states that Armitage and Hummel own a hotel and invite the public to come to Sunset Beach to hunt. Further, it is alleged that the defendants have conspired to destroy the gun club's hunting rights. The beach resort and the land under the control of the defendants is crossed by ducks flying between the ocean and the ponds and sloughs of the club. Ducks in flying across and along the beach are hunted. Game is scared away, and the shooting that goes on about the preserve, upon the land leased by Robinson to the club for hunting purposes is destroying the hunting for the club members.

The temporary injunction prohibits the using or carrying of firearms in what is known as Sunset Beach and if the gun club wins the suit the injunction will stand good, for every open season from now until 1913."

Big Game Is Plentiful.—On both the Oregon and Washington slopes of the Blue mountains big game is more plentiful this fall than for many years, states a Dayton correspondent of the Klickitat, Ore., Independent. William Kendall, ranger in charge of the Wenaha forest reserve, said that more than 25 deer had been killed in one locality on the Oregon side in the past two weeks. Bear, too, are being killed in larger numbers than ever before since the country was settled. Tukano, Turkey Tails, Oregon Buttes and Godman's are proving favorite hunting places this season. Several cinnamon bears, which heretofore have been extremely scarce, have been brought in.

Wolves, cougar, lynx and wildcats are growing more numerous and several trapping parties have gone into the mountains to spend the winter.

Northern Trap Shots After Wildfowl.—Tom Barclay, Jim Lee and John Malloy, well known members of the Spokane Rod and Gun Club, left last week for Arlington, where they will spend a week hunting ducks and geese. The same party made a trip last season and brought back a big bag of geese.

The hunters will spend most of the time hunting along the Columbia river. Reports from that locality state that the hunting this season is the best experienced in years.

Striped Bass Angling.—At Wingo about a dozen striped bass were caught, Tim Lynch with a 22 and a 19 pounder made the best catch of the day. At San Antonio about a score of the regulars tried their luck, Chas. Hollywood landed four fish, all that were caught, the largest scaled about 9 pounds.

Drink Jackson's Napa Soda.

THE FARM

SUCCESS IN DAIRYING.

The dairyman's problem is in himself. The inherent and fatal weakness of many people is that they wholly ignore the really important and decisive factor of success, namely, trained and intelligent judgment, based on sound theory and practice. Our most successful dairymen have won, not by luck, but through intelligent forethought.

The chief obstacles are lack of well balanced intensive methods and not applying business principles. The milk producer must stop guessing and know what the results will be and adopt the ways of most profit. Large sums of money are invested in many acres of land, extensive and expensive buildings, costly horses, tools and machinery, high-priced feed and labor, and all of this outlay turned to raising crops that do not yield anything like the amount of digestible nutrients per acre that should and could be obtained, and to feeding and poorly caring for a herd of poor cows utterly unable to return a profit. The same expenditure of money and labor bestowed in an intelligent manner upon the same farm and an efficient dairy herd would return a handsome profit.

One dairyman produced \$2,000 worth of milk from 20 cows or \$100 per cow. A neighbor bestowed twice as much labor on 40 cows and sold only \$1,800 worth of milk or \$45 per cow, barely paying expenses, while the first man made a profit of over \$1,000. Yet the second man said he had no time to spend a few minutes each day weighing and testing the milk from each cow. Instead, he spent four long weary years in raising and harvesting the crops on a 160-acre farm, and feeding and milking 40 cows to make as much profit as his neighbor did in one year with half the cows, half the lands and half the labor. A dairyman with a poor herd receives quite a large check at the end of the month and he may fail to distinguish between receipts and net profit. This delusion has been the cause of many a failure. All over this country are individual dairymen whose success is noticeable. One dairyman lost a 120-acre farm hiring two men and keeping 20 cows that produced two to four cans of milk per day. His successor on the same farm hired three men, kept 63 cows, and produced 30 cans of milk per day during the flush of the season, one month's return being \$840. This is an example of brain fertility and not soil fertility.

A cow must produce about 4,000 pounds of milk and 160 pounds of butterfat to pay for her feed and labor; 5,000 pounds of milk \$10 profit; 8,000 pounds of milk, \$40 profit. Ten cows averaging 8,000 pounds of milk are as profitable as 40 cows producing 5,000 pounds. The cost of keep increases, but \$35 per cow from 2,000 to 10,000 pounds of milk given, yet the income increases \$1.15, or over three times as rapidly. One-third of the million cows milked twice each day in Illinois are below the dead line, every one losing the owner money. All the profit not eaten up by poor cows comes from the best third. One-third of the energy in milking eighteen million cows in the United States is worse than wasted.

Not a single country, not even a township, in any state has yet come anywhere near reaching the maximum of milk production. One farmer in Illinois had eight cows which an official test produced last year 17,089 pounds of milk per cow. The milk sold at 7 cents per quart and brought \$575 per cow, or a total of \$4,558. A man who milks 12 cows and carries the milk of each 50 further than necessary may in a life time waste the walking of a third the distance around the world. An other large loss is from the sale of low-grade butter to the grocery at half the price of first-class butter. Instead of seeking cheaper lands in less congenial locations and depriving their families of many privileges, the problem for Illinois people is to develop their own agricultural possibilities and use to the best advantage

the human energy now expended upon their farms.

The most serious side of the poor cow question after all is not the money she loses but the drudgery she causes through waste of energy bestowed upon her, which discourages and disheartens the owner and drives the bright boys from the farm. The way to attach the boy to the farm is by achievement. Think of the desolate bome of the dairyman with a losing herd—no paint on the bouse, no boneysuckle over the door, and no time or money for the comforts within that go to make a bouse a bome. Such conditionss are far-reaching in their degrading effects, especially upon children. But in direct contrast, there are other farm homes supported by dairy herds paying large profits, where the enthusiasm of the father has spread to the children. Surrounding these homes are neatly mowed lawns with flowers, trees and vines around the painted, well-kept bouse. Here money is spent for home comforts. Here the question of bow to keep boys on the farm never arises. Higher civilization costs something; the dairyman must increase his earning power.—Illinois Farmers' Institute.

VALUE OF FARM PRODUCTS.

The wonderful value of farm products in the United States for this year is told in the statement of Secretary of Agriculture Wilson in his annual report. At no time in the world's history has a country produced farm products within one year with a value reaching \$8,926,000,000, which is the value of the agricultural products of this country for 1910.

If the value of the products of 1899 is placed at 100, the value for this year is 189, or almost double the value for the census year eleven years ago. "During this period of unexampled agricultural production, a period of twelve years, during which the farmers of this country have steadily advanced in prosperity and wealth and in economic independence, in intelligence, and a knowledge of agriculture, the total value of farm products is \$79,000,000,000."

High prices receive considerable attention in this report. In the farmer's aspect of the matter he receives various percentages of the consumer's prices for farm products. In the case of milk, in seventy-eight cities distributed throughout the United States where the subject was investigated by the department, the farmer received a scant 50 per cent, or one-half of the price paid by the consumer. The railroads get about 7 per cent, so that the remaining 43 per cent of the consumer's price is received mostly by the retailer.

"The milk wagon of the retailer has a long route. It stops at a house or two in one city block, perhaps passes several blocks without stopping, and so proceeds to serve customers thinly distributed along a route of miles. At the same time the milk wagons of other retailers are covering various portions of the same route and so there is a great waste of effort and of expense in the distribution."

The farmer receives hardly more than half of the consumer's price in the case of poultry; 69 per cent in the case of eggs; cabbage 48 per cent when bought by the head and 65 per cent when bought by the pound; celery, 60 per cent when bought by the bunch.

The apple grower receives 50 per cent of the consumer's price when the purchase is by the bushel and 66 per cent when by the barrel; the strawberry grower gets 49 per cent of the consumer's price in purchases by the quart and 76 per cent when by the crate. When the consumer buys a peck of onions at a time, the farmer receives 28 per cent of the retail price; when he buys a barrel the farmer receives 58 per cent.

So, in the case of oranges, when the purchase is by the dozen the grower receives 20 per cent of the consumer's price, whereas, when the purchase is by the box the grower gets 59 per cent. The rule seems to be, the smaller the retail quantity the smaller the farmer's share of the consumer's price.

Among the many other products represented in the list are oats, with 74 per cent of the consumer's price

going to the farmer when bought by the bushel; melons, 50 per cent when bought by the pound; parsnips, 60 per cent when bought by the bunch; potatoes, 59 per cent when bought by the bushel; turnips, 60 per cent in purchases by the bunch; watermelons, 34 per cent when bought singly.

An agricultural explorer of the department has spent the year exploring the plant resources of southwestern Asia. Among the large number of interesting things he has secured is a variety of alfalfa from Erivan, which is said to be longer lived than the Turkistan; a wild almond from the Zarafshan Valley, found growing on the dry mountain sides at an altitude of 6,000 feet; a drought-resistant cherry for home gardens in the Northwest; and a collection of apricots with sweet kernels from Samarkand; the Afghanistan apple and special varieties of pears for trial in the Gulf states; some remarkable olives, which have withstood zero temperatures, and a wild strawberry, fruiting at the end of February on the dry calcareous cliffs of the Caucasus.

AMERICAN PACKERS IN ARGENTINA.

The position occupied by American packing interests in the Argentine is discussed at some length by James D. Whelpley in a review of the meat production and export business of the Argentine. There is little corn-fed beef produced in Argentina. That grain is largely exported, and alfalfa and grass are depended upon to make the beef, consequently at present English consumers do not regard the beef from Argentina as highly as that from the United States, but owing to its low cost its use has rapidly increased.

"From the international standpoint," says Mr. Whelpley, "the most important and recent development in the meat industry of the Argentine Republic is the entrance and growing ascendancy of North American interests. Chicago meat companies entered this field only seven years ago, but have already attained such a position that they are a decided, if not a dominating, influence in the progress of the trade and the control of prices. The extent of their interests is only partially known to the public either of Argentina or the United States, but they admittedly hold two of the seven companies engaged in the production and export of cold storage meat and are believed to have at least a working understanding with several of the others. They have also secured land for purposes, it is believed, of establishing new plants.

"The two avowedly North American enterprises are the La Plata Cold Storage Company and the La Blanca Company. The former, since coming under its present control, has risen from a state of insignificance to that of the largest single producer in the Argentine field. A sensation was created by this company at the recent fat stock show in Buenos Ayres by the extraordinary prices paid in order to show breeders what it wanted and encourage them to develop a superior breed of animals. For five steers the company gave 11,500 pesos, about \$5,000 apiece, and for a total of 177 head gave 310,600 pesos, about \$771 each in United States currency. It was estimated that the available beef on the five steers that brought top prices cost the company about \$5 a pound. Taken together the La Plata and La Blanca companies last year produced a third of Argentina's total output of cold storage beef and almost as large a proportion of mutton and lamb. Their rapid expansion is indicated by the fact that jointly they have chartered all the space in 19 new steamships ordered by the Nelson line for the River Platte fresh meat trade.

"But most important of all, perhaps, as showing the influence of the American companies in the Argentine is the fact that they are generally credited with having stimulated the industry through the introduction of progressive methods, particularly in the development of chilled beef. Chilled beef—the kind to which United States consumers are accustomed and regarded as superior to frozen beef—has been brought into commercial importance within the last year or more by the North American companies and seems destined to supercede in im-

portance the frozen product. In 1909 the La Plata Cold Storage Company produced more than twice as much chilled beef as any other company, and, together with the La Blanca Company, marketed more than 50 per cent of the entire output of the article. The importance of the position of the Chicago companies in the Argentine is that, apparently, it puts the meat industry of the two principal countries in the same hands. Argentina is the largest beef exporter in the world, and, next to New Zealand, the largest shipper of mutton. Argentina now occupies the place formerly held by the United States as purveyor of beef to Europe, the increase in the home consumption having cut down our exports in marked degree.

"Argentina has been looked upon as a competitor of the United States in the beef industry, and has even been considered by some as a possible source of cheaper meat for this country. The present outlook there lends no color to such supposition. Shipments of beef from the River Platte to the United States may come shortly, but they will probably be directed by the same interests which supply the market here, not in opposition to them. So far as American packers are concerned, their present operations in the Argentine field have nothing to do with the meat supply of the United States. The immediate object is to obtain supplies which can no longer be secured at home, for their English market. They have not given up their foreign business, as the diminishing export figures of the United States might lead one to suppose, but have simply transferred their base of operations from the Mississippi Valley to the River Platte."

Just how Argentina's meat export business is growing is shown in comparative tables. In 1909 the beef and mutton exports from Argentina were valued at \$27,720,412. The United States exports in 1909 were \$12,840,048. In 1900 the United States exported beef and mutton to the value of \$29,082,123, and the Argentine exports that year were valued at \$8,951,487. In weight Argentina's exports 10 years ago were equal to 25,000 tons, compared with 150,000 tons from the United States in the same year. Five years later her exports of beef passed ours, and in 1909 they amounted to 210,657 tons, while those of the United States had fallen to 55,746 tons.

The food of a dairy cow is rich, consequently the fertilizing value of the manure is quite an item in keeping a dairy herd. This is where many do not avail themselves of their opportunities in increasing the fertility of the soil. Inadequate barns and lack of help to distribute manure have resulted in a loss of thousands of dollars in fertility elements and caused many herds to be unprofitable.

It is a fact with which all progressive dairymen are familiar, that the feed bill of a dairy herd is always to be reckoned with in estimating the profits from the animals. It is not a difficult matter to count the profitable animals in the herd, if the feed is produced on the farm. The cost of banding the cows and marketing the products do not threaten the profits, like the feed bill. It is then, to the interest of the man who keeps dairy cows, to produce as much of the feed as possible.

It has been carefully estimated that 80 per cent of the nitrogen, phosphoric acid and potash that is taken in the food is voided in the manure. This means that only one-fifth of the fertilizing value of these elements is consumed by the animals, and that four-fifths may be returned to the soil. The value of the manure from an average cow weighing 1000 pounds and fed under average conditions is about \$25. That is, the nitrogen, phosphoric acid and potash contained at its commercial value when bought in commercial fertilizer.

Where cows are pastured, usually about two-thirds of the manure is voided in the stalls and one-third in the pasture. Suppose the average value of the droppings from each cow are worth \$24 a year. This would make the value that could be saved in the stalls worth \$16. If several cows are kept, this amount would, when judiciously applied, increase the crops grown for feed and hence increase the profits from the animals.

THE FARM

GOATS AS MILK PRODUCERS.

Breeding goats for their meat, milk and skins is one of the oldest divisions of the livestock industry. When the curtain of historical civilizations first arose upon the stage of action, we find primitive people herding and grazing goats. Remains of goats have been discovered in the ruins of the ancient lake dwellers of Switzerland. Goats and their products were frequently mentioned in the Bible, and Homer and Herodotus were familiar with these animals and the uses to which their products were put.

There is considerable doubt as to the origin of the goat. A number of zoologists claim that the European goat is descended from the Persian pasang or Bezoar goat; still others think that it can be traced to the Alpine ibex. Whatever may be their origin, it is known that milk goats have had a great influence upon people of European states.

There are several breeds of milk goats and considerable progress has been made in breeding in Europe. In America the goat has never been popular and little effort has been made to improve it.

The Nubian milk goat is a native of Northern Egypt and Abyssinia, where it is still very common. Animals are large, have long legs, polled heads, sunken nostrils, projecting lower jaw, long ears, large and well shaped udders and prominent teats. The Nubian goat is a good milker giving from four to twelve quarts a day. It is quite sensitive to cold and for that reason is not adapted to a cold climate. It should be a good breed to cross with some of the Southern breeds.

The Maltese is another breed that has many good qualities. According to Thompson, who is an authority upon these animals, individuals are about two feet six inches tall and weigh about 100 pounds. It is hornless and the color is generally white, but red, black and brown are sometimes found. The udder is large and the flow of milk is from two to four quarts daily. This breed is a native of Malta, where considerable progress has been made in improving the animals. It is said that the Maltese does not do well when imported. The Spanish Maltese goat, which is said to have been obtained by crossing with several breeds, is found in considerable numbers in Texas and New Mexico.

The Toggenburg milk goats are well known in Switzerland, where they are still extensively bred. These animals are hornless; have slender bodies, covered with soft brownish hair. They have two white stripes on their heads, running parallel on each side of the face from ears to mouth. The Toggenburg is a good milker, giving from four to six quarts of milk a day. They are said to do well under confinement and to consume feed economically.

The White Saanen is a Swiss breed that has been imported within recent years. It is a hornless breed; large and a comparatively good animal for milk. It has been cross-bred with good results.

Milk goats are more prolific than other breeds. They often drop twins and sometimes triplets, and gestation is but five months. Milk goats are called "the poor man's cows," because the animals are cheap and furnish milk under conditions that would not be possible for cows. Goats thrive in that mountainous country where a cow could not possibly subsist. It is said that three or four goats will furnish as much milk as a cow and that the feed of an ordinary dairy cow would keep six or eight milk goats. Two or three goats when managed properly will give milk during the entire year. One cow ordinarily does not.

Goats, it is said, are not as susceptible to disease as cows. Goat's milk is preferable for infants, because its composition is better adapted to the child's stomach. The milk of goats is also recommended for invalids.

Stebler states that the total expense for keeping a common milk goat one year in addition to the summer pasture is about two dollars in American money, and that the income is five dollars, leaving a profit of three dollars upon an investment of seven dollars.

Butter and cheese are made from the milk of goats. However, the globules of fat are so small and irregular that the milk is usually beaten until the surface is wrinkled, then the milk is removed for further rising of the cream. When the cream is churned, coloring must be added, as the product will be white without the coloring material. There are several kinds of cheese made from the milk of goats and some are quite popular.—Farm and Ranch.

PRACTICAL SWINE BREEDING.

There is not the wide difference in breeds or types there formerly was, and that difference is growing less and less every year. The butcher, in a large measure, dictates the type of pig we shall grow, of whatever breed it may be. While this is true to a certain extent with beef cattle and mutton sheep, it is more forcibly illustrated in the case of the pig. With even beef cattle the milk is quite a consideration as well as the meat and they are raised with both objects in view. And with sheep, even of the mutton breeds, the wool is quite an item to consider. But with the pig it is different. There is no milk or wool to take into account. He is valuable for his meat alone. The pig that will attain the largest size in the shortest time on the least grain and command the highest price in the market is the type of pig we must raise, and whether we do it with a Chester White or Berkshire, a Duroc Jersey or Poland China or any other breed is not a matter of very great consequence. The market requirements are resulting in bringing the various breeds more nearly to a common type. Whatever breed we may be interested in, we must so mould or fashion it as to most nearly meet the market requirements. Some may succeed best with one breed and some with another, but any breed is better than no breed. There does not seem to be the wide difference in breeds that formerly existed. There is a more general coming together towards a more uniform type. And this is true also in regard to mutton sheep. There used to be a large difference between the compact little Southdown and the Shropshire; and a still wider gulf between the Shropshire and the Hampshire, but it seems to be growing less. The little Southdown seems to be growing larger, and the big stately Hampshire has become more compact and with less daylight under him than formerly. And this tendency is observed to a greater or less extent in all our domestic animals, whose chief function is the production of meat.

But it is of the utmost importance that the different breeds should be kept pure and the characteristics of each breed preserved. It would be a sad blow to the animal husbandry of this country, if the various breeds of swine, or of sheep or cattle should become so commingled that any one separate and distinct breed should lose its identity or its peculiar characteristics, or even its color markings. And so men are engaged in the breeding of pure bred animals and record associations for every breed exist for the purpose of keeping and preserving accurate records of the ancestry of such animals.

How often have we all heard some one say that if he found the boar, or the ram or the bull that suited him in type and form and individuality, he didn't care for the pedigree. And the too frequent putting into practice of that idea has done more to retard the general development of our domestic animals than other cause. No one can afford to breed a scrub or any breed. If he was the sort of man who would be moderately successful by doing so, he would be the man who would have marked success with better animals.

I know a man who once thought he knew more than all the men who had been working for half a century or more in breeding all the various breeds of swine to their present state of perfection; and he mated a pure

bred Chester White sow with a high class imported Berkshire boar. Nothing very wrong in that, if he made pork of all the pigs resulting. He had a beautiful litter of pigs, all white of course. Their breeding was very fine, he argued, for in their veins was as good Chester White and Berkshire blood as could be found. And this man selected the best boar pig in the litter and grew him to maturity. And he certainly was a beautiful pig. He had the erect ears, short dished face, arched back and aristocratic bearing of his sire and the length and color of his dam. And this boar was used in that community to the neglect of all pure bred sires of every breed. And with what result? The crop of pigs was a large one, but no two were alike. They were of every conceivable shape and color. They were ringed, streaked and speckled; a miserable mongrel set and were raised at a loss to their owners. The failure of this pig as a sire was because he was not entitled by inheritance to the qualities he possessed. He was the chance product of a violent cross. Two distinct and widely separated blood lines were in his veins. He could not reproduce himself. All the defects of his ancestors for generations back came to the surface in his offspring. And a pure bred animal may sometimes be bred on such lines as to furnish no assurance whatever that he will be able to reproduce himself with any degree of fidelity. So we must have first the animal of the type and form we desire to reproduce and perpetuate in our flocks and herds and second we must have his pedigree, as a guarantee that such animal is not a chance product but is entitled

Warranted to give satisfaction.

GOMBAULT'S CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Swamy, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

Every bottle of Caustic Balsam sold is Warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio

DENATURED ALCOHOL IN SOLID FORM.

Cleveland Special Dispatch. A well-known Wheeling, W. Va., chemist has succeeded in producing chunks of denatured alcohol in crystal form by means of a small infusion of certain acids whereby crystals of an alkaloidal nature very closely resembling physiologically the effects of ethyl alcohol distilled from sawdust. The method employed and the results obtained are somewhat similar to the crystallizing of rock candy or that of Saccharine containing as it does 350 times the sweetening strength over that of cane sugar, so this alkaloidal crystallized alcohol contains many times the strength over the ordinary denatured fluid alcohol; they will yield 194 proof denatured alcohol with a greater heating and cooking power for stoves than gasoline, and it is absolutely non-explosive.

A sample can containing 50 solid cubes, 1 stove and the secret formula how simple it can be made at home, will be mailed to you, postpaid, on receipt of \$5.00. Address

THE MAN WHO FAILS.

Some of the more common reasons why failures are made with poultry are given by C. F. Townsend, of Weedsport, N. Y., in the "Poultry Advocate," as follows:

The man who fails with poultry is sometimes lazy. He would rather lie in bed on a cold morning or swing in a hammock on a hot day than "bother" with the birds. He cannot see the need of "fussing" with the little chicks; nor of fresh water once or more daily; nor of keeping houses and yards "spink and spank" clean; nor of always fighting vermin; or, in brief, of any of the routine duties which successful men insist upon as a matter of course.

The man who fails is sometimes a fool. He reads the glowing fairy tales told by truth-killing, grammar-butcherers, of some woman reaching down into her inside pocket and handing out a "five thousand dollar bill and five hundred dollar bills" for half a dozen birds; or of thousands of gullible people viewing a hen said to be valued at thousands of dollars—(the original hen, as the gawks should know, died years ago); or perhaps he has read of three-day-old chicks being sold for \$1000; or of some fat old hen laying 263 eggs in 272 days which is at the rate of 353 in a year. If he has read these lies, and is foolish enough to believe them, he is foolish enough to believe that he, too, can swindle people in the same way. Of course, he fails, because every greedy, plundering knave fails sooner or later, as our prison record show.

The man who fails sometimes lacks judgment. He may be honest; he may work hard, early and late; but because of poor management he makes no more progress than a whale trying to swim in a foot of water. He puts cheap stock into elaborate houses; he puts good stock into draughty, leaky, out-buildings; he overfeeds, under feeds, or fails to give the right sort of feed; he breeds fancy stock and neither exhibits nor advertises; he does not look after little things—forgetting that these very "little things" make up the sum of success; in short, he lacks what is commonly called "horse sense."

The man who fails is often a beginner who has been duped by knaves who should be wearing convict stripes instead of being touted and praised as some of them are. He reads in supposedly "reliable" poultry papers of a "system" whereby a clear profit of \$2,880 can be made in one year from 24 hens—which is at the rate of \$120 per year from each hen; or a "strain" of big birds which "lay when two and a half months old," or a single bird producing 300 chicks in twelve months; or of anything else equally absurd and criminally false. Being wholly inexperienced he cannot see the absurdity of these lies, and he "bites," as the sordid knaves expect him to do. As a result he loses his money and time; and failure, for which he is not to blame, results.

The man who fails is too often an unstable person who does not know his own mind—even supposing that he

has one. He "goes in" for this or that variety, "hooms" it hard for a while, and then throws it aside to take up with something new. This course, followed steadily, is certain to result in failure. If such a man—and his name is legion—would consider the fact that by taking up White Rocks and sticking to them. U. R. Fishel has made a fortune; that Cook, the originator of all the Orpingtons, Lester Thompkins, of the Rhode Island Reds, Tectonius, the Buff Leghorn man, to mention a trio of famous breeders, have hewed to the line and have won success by sticking to one thing; if he would bear these facts in mind he would not believe that poultry spells failure.

As a matter of record, there is no business today in which the chances of success are greater than that of poultry raising. Any man of fair ability and of average industry; who is honest with himself and others; who will not publish lying advertisements nor write lying letters; who has sense enough to see that a knave ends his career sooner or later, either in jail, in poverty or in the contempt of all decent men; if he possesses these gifts he may win success more surely and quickly in the poultry business than in any other.

When lambs are brought in to the feeding corrals they are put on hay alone for from one to three weeks or are run on the lops and tops of sugar beets and then grain feeding begins. In feeding sheep on a large scale, the grain is fed in a separate corral. The sheep are kept in bunches of about 400. The grain is put into feed troughs, the gates are opened and they are allowed about ten or fifteen minutes to eat the grain. Then they are driven back and the next bunch is brought in. By this method

Time Has Told

You don't need to experiment on a remedy for Spavin, Ring bone, Curb, Splint, Capped Hock, Swollen Joints, or any lameness of horse or man.

Kendall's Spavin Cure

has been the unfailing remedy for 40 years.

Silver Creek, N. Y., Apr. 8, 1907

Dr. B. J. Kendall Co., Enosburg Falls, Vt.

I have used Kendall's Spavin Cure for the last 15 years, and it never has failed to do all that is claimed for it. I would not be without it. C. A. Dahlman.

\$1 a bottle, 6 for \$5. At all drug stores. Ask for free book, "Treatise on the Horse," or write to—

DR. B. J. KENDALL CO., ENOSBURG FALLS, VT.

3 in One

lubricates the mechanism, prevents rust on the metal parts and cleans and polishes the stock. For cleaning out the residue of burnt powder, especially smokeless powder, it is unequalled.

Free samples to those who have not tried it.

high, kind and gentle, suitable for anyone to
drive, fears nothing. Sired by Baron Bretto
39103; dam Jeanette by Ottawa; 2nd dam by
Snuff Box. A 2-year-old filly sired by this horse
won the colt race at Marysville, July 4th. Price
\$300. For further particulars address F. W.
Kelley, Breeder and Sportsman, San Francisco.

all of the sheep have a chance to get some grain and even the greediest sheep cannot get very much. The first grain fed is merely sprinkled in the trough so that the sheep may become used to it. The principal skill in feeding is to increase the grain so gradually that the sheep will eat it greedily all the time. Most feeders use pails and reckon the feed by the number of bucketfuls fed daily. A bucketful of twenty pounds to 400 sheep twice a day is one-tenth of a pound a day and this is as much of an increase as is considered safe to make at any one time and it is customary to increase only one-half.

FOR SALE

A Great **Bon Voyage** Stake Prospect.

Bon Bonita, foaled March 31, 1909, is a beautiful bay filly of fine size and perfect conformation, sired by the great stake-winner and sire of stake-winners, Bon Voyage (3) 2:12½, dam the great brood mare Carrie B. 2:18 (dam of the greatest racing three-year-old of 1908, Ray o' Light (3) 2:08½, Love-lock (3) 2:19½, matinee record 2:15, and Ishmael 2:21) by Alexander Button 2:26, a great sire; second dam, Carrie Malone, dam of three in the list, and full sister to Klatawah (3) 2:05½, and Chas. Derby 2:20 (sire of Jim Logan (3) 2:05½, world's record for three-year-old pacers), by Steinway (3) 2:25¾, champion three-year-old trotter in his day, and sire of six in 2:10; third dam, Electioneer's greatest producing daughter, Katy G., dam of four in 2:20 and seven in 2:30; fourth dam, Fanny Malone, grandam of Maud C. 2:14½ and seven others in 2:30, by Niagara, son of the great Mambrino Chief 11; fifth dam, Fanny Wickham (thoroughbred), famous long-distance trotting mare, by Herold; sixth dam, by Imp. Trustee; seventh dam, by Imp. Barefoot; eighth dam, by Sir Archey; ninth dam, Florizel mare, dam of Boston, the greatest four-mile race horse that ever lived; tenth to eighteenth dams all thoroughbreds.

Bon Bonita is nicely broken to harness, never worked and never shod, kind and gentle, and a pure-gaited trotter and absolutely sound; one of the very best Bon Voyages in the world. She is a great stake prospect, and it should be remembered that she will not have to race against any of the get of Bon Voyage, as she is his only living yearling.

When her racing career is ended she will be an exceptionally valuable brood mare, as she represents, on both sides, the blood of the immortal Electioneer, the world's greatest Racing and Producing Family. She is entered and paid up in all of the California and Oregon stakes.

For price address **RAY MEAD, San Jose Driving Park, San Jose, Cal.**

Three Stallions AT AUCTION.

On Saturday, January 14, 1911, I will sell at auction in San Bernardino, Cal., a part of the estate of Ben Davies, deceased, as follows:

ZOLOCK 2:05¹/₄

brown stallion by McKinney 2:11½, dam Gazelle 2:11½ by Gossiper 2:14¾; second dam Gipsey, dam of Delilah 2:06½, etc., by Gen. Booth; third dam Echo Belle by Echo, etc. Zolock is standard and registered and is the sire of Sherlock Homes 2:06, Delilah 2:06½, Bystander 2:07½, Josephine 2:07½, Velox 2:09¼, R. Ambush 2:09¼, etc.

IZALCO

black stallion, 7 years old, weight 1050, by Zolock 2:05¼; dam Gipsey, the second dam of Zolock. Izalco is a full brother to Delilah 2:06½ and is untrained but is a steady, good gaited trotter and has shown 2:30 in a matinee race without training.

BLACKAMOOR

black stallion, six years old, weight 1100, by Nushagak, sire of Aristo 2:08½; dam Ione by McKinney; second dam Gipsey, dam of Delilah 2:06½ and grandson of Zolock 2:05¼, etc.

Zolock 2:05¼ is known to every horseman on the Pacific Coast as a great race horse and successful sire. The death of Mr. Davies prevented the training of Izalco and Blackamoor, but both are steady trotters, perfectly clean and sound and very handsome animals. It is doubtful if there is a handsomer stallion than Blackamoor anywhere in America.

N. A. RICHARDSON,

Administrator Estate of Ben Davies, deceased.

San Bernardino, Cal., Dec. 2, 1910.

FOR SALE—PRINCE DEL MONTE 51341

a magnificent 3-year-old colt by

KINNEY LOU 2:07¾,

sire of

Wilbur Lou (1) 2:19¾, world's champion yearling trotting colt.

First dam, Princess Bessum 2:29½, by Egyptian Prince 14431 (son of El Madhi 2:25½ and Egyptienne 2:18, by Mambrino King); second dam, Carrie Malone, dam of three in 2:30 and full sister to Klatawah (3) 2:05½ and Chas. Derby 2:20 (sire of Jim Logan (3) 2:05½, world's record for three-year-old pacers), by Steinway (3) 2:25¾, sire of six in 2:10; third dam, Electioneer's greatest producing daughter, Katy G., dam of four in 2:20 and seven in 2:30; fourth dam, Fanny Malone, grandam of eight in 2:30, by Niagara, son of Mambrino Chief 11; fifth dam, Fanny Wickham, famous 10 and 20 mile trotting mare by Herold (thoroughbred); sixth dam by Imp. Trustee; seventh dam by Imp. Barefoot; eighth dam by Sir Archey; ninth dam, Florizel mare, dam of the great four-mile race horse Boston; tenth to eighteenth dams all thoroughbreds.

Prince Del Monte was foaled March 17th, 1907, is a handsome chestnut, 15½ hands high, a splendid individual, absolutely sound, and a trotter; good-headed and good-gaited. With little real training, has been a mile in 2:24, a half in 1:09 and a quarter in 33 seconds. Kinney Lou has no better bred foal and none that should trot any faster in 1911 than this colt if the right man gets him. For further information and price, address **HENRY HOF, San Jose, Cal.; R. D. Tully Road**

SMITH GUNS

HUNTER ONE-TRIGGER

WEATHER conditions aren't always at their best in the "blind" or in the skiff. That's when you don't want your gun to balk or double.

YOU CAN easily wear gloves if you shoot with a Hunter One-Trigger. And without "fiddling." It won't balk—because there is no friction to make it balk. And it won't double—because there is no second trigger to get tangled up in your glove.

The very newest Hammerless Smith Gun is the 20-Gauge Hunter One-Trigger. Weighs only 5 3/4 to 7 lbs. Just the finest gun that can be made at the low price.

UMC

Arrow and Nitro Club Steel Lined Shot Shells

Shooters are everywhere awakening to the advantages of the steel lining in U M C Arrow and Nitro Club Shells—the shells that have won every Interstate Handicap event in the past two years.

The steel lining improvement, as used in U M C Arrow and Nitro Club Shells, has been adopted by the leading shell manufacturers of Europe. It protects the powder from moisture, insuring uniform loads under the most severe weather conditions, and adds to the strength of the shell.

Sold by all first-class dealers. Do not accept a substitute. Communicate with us if your dealer does not carry U M C or Remington.

WINCHESTER REPEATING SHOTGUNS.

Of the repeating shotguns on the market, the Winchester is the only one that has the endorsement of the U. S. Ordnance Board as being safe, sure, strong and simple. Besides this, it has the practical endorsement of over 450,000 users. If you are thinking of buying a gun, look well to the reputation of the Winchester. No gun has had the varied experience or stood the hard practical tests that the Winchester has. Although no better gun is made, it is quite inexpensive. Price one at your dealers.

Here Are a Few Practical Dont's

DON'T let your horses' feet get in bad shape while you are treating him for some other ailment.

DON'T let his toes grow too long while you are treating him for bad tendons.

DON'T fail to treat the foot with **Reducine** while treating the horse for sprung tendon, sprained ankle, cocked ankle or sprung knee. Every horse with either of these has a more or less contracted hoof on the leg that he favors and the cure cannot be complete and permanent until a new hoof is grown and the tenderness, fever and inflammation is removed from the foot.

DON'T conclude that your horse is lame in his shoulder until you are absolutely certain that the lameness is not in his foot. In nine cases out of every ten of supposed shoulder lameness the lameness is in the foot.

DON'T fail to carefully inspect the foot before treating your horse whose ankle is swollen. He may be lame from thrush, corns, quittor, etc., and the fever resulting therefrom may be the cause of the swelling in the ankle.

DON'T fail to shorten the toe and raise the heel of the foot when you are treating the leg for sprung knee or cocked ankle.

DON'T fail to cover a surface of at least six inches in diameter over the hip joint, when treating a case of lameness in the hip.

DON'T fail to rub in the **first coat** of **Reducine** with the hand for at least **ten minutes**. Then paint on another coat as thick as it will lay on without running.

DON'T fail to exercise the horse every day that the weather is not too bad for man or beast to be out while he is being treated with **Reducine**. If he is able to walk, walk him—if to jog, jog him—if to work, work

him, but do not in any case compel him to stand in a stall without an opportunity to move himself. He can't get well standing still—**keep him moving**.

DON'T fail to keep your horse's bowels and kidneys in good condition while you are treating him for lameness. External applications cannot cure big ankles, etc., which are caused by bad kidneys.

DON'T buy **Reducine** to use on a case which your **common sense** tells you is incurable. **Reducine** has cured many cases where everything else has been tried and failed, but we would much prefer **not** to sell **Reducine** than to have you use it and not have it cure your horse **completely** and **permanently**. If you are in doubt as to whether the case of your horse is curable or not, write us fully about it, giving all details.

WE WILL GIVE YOU OUR HONEST OPINION. If we do not feel certain that **Reducine** will cure your horse we will say so.

DON'T fail to write us today describing, in detail your horse's ailment. We will give the case careful consideration. You will receive a reply giving the opinions of an expert and experienced horseman, also the opinion of the most successful Veterinary Surgeon in New York City. We will do this free of charge, and you will not be asked to buy **Reducine**. After you have described the case to us and we have given you our opinion, if you conclude to use **Reducine**, you can buy it of your druggist, or harness dealer, or direct from us. You will not be asked or urged to buy, by anyone or at any time.

IT'S UP TO YOU

If you have a **Lame or Blemished Horse,** every word of this **Advertisement** will **Interest You.**

Is your horse lame?

Has he any unsightly enlargements on his legs, throat or body?

Has he a sprung tendon?

Is he knee sprung?

Has he weak or cocked ankles?

Has he a bog spavin or thoroughpin?

Has he a big knee or sprained hock or ankle?

Has he a sore neck, sore back or any other old or new sore?

Has he thrush, corns, contracted feet or navicular disease?

Is he lame in shoulder, back, hip or stifle?

Are his hoofs dry, contracted or brittle?

Has he splint, capped hock, capped elbow or shoe boil?

Has he sitfast or collar boil?

Are the glands in his throat or neck swollen or enlarged from age or from the effects of distemper?

Is his throat sore from cold or distemper?

Has he scratches, cracked heels, mallenders or salenders?

Are his legs gummy, thickened and stiff from long use on hard roads?

Has your horse or dog mange or warts?

Treat him with **REDUCINE**

REDUCINE will cure the lameness. REDUCINE will remove the enlargement, no matter how it was caused, where it is located or of how long standing. REDUCINE will cause the animal no pain, will leave no scar or white hairs; will cure the lameness quickly and permanently; will completely remove any enlargement or swelling and leave no trace of it ever having existed. REDUCINE requires no bandages, no preliminary treatment, no after treatment—simply paint one coat over the other, once a day for ten days, work the horse every day—that's all, nothing more before or after.

REDUCINE—if applied at once—will destroy Tetanus germs, thus preventing Lock-jaw from nail, calk or other wound, and will cure Mange or common Eczema on horse or dog with one application.

NOTICE.

REMEMBER, REDUCINE is not a WASH or a LINIMENT.

N. B.—REDUCINE will take all the soreness, stiffness, bunches and thickness from old second-hand, worn legs, and make them look, feel and work almost like new.

P. S.—If your horse's throat is sore, is swollen from distemper, cold or old age, apply REDUCINE at once. It will relieve the soreness and reduce the swelling—leaving the neck and throat as fine and clean as it ever was. If the horse's wind is thick on account of this sort of swelling, REDUCINE will make him sound again in the wind.

REDUCINE is used and prescribed by leading Veterinary Surgeons everywhere throughout the world.

REDUCINE is made in Ireland and is sold in every country where good horses are used.

REDUCINE is used and recommended by more than 90 per cent of all the professional horsemen, trainers, breeders, dealers and shippers in the United States and Canada.

REDUCINE is rapidly coming into general use by farmers, livery stable men, brewers, truckmen, lumber companies, express companies, fire departments, mounted police and other large users of heavy work horses and business horses.

Here Are Some Letters

We Have on File More Than One Thousand Others of Like Tenor.

RUSHVILLE, IND., DECEMBER 21, 1907.

The Reducine Co., 90 West Broadway, New York:
Gents: Enclosed find my check for two cans of Reducine. I must say it is the greatest remedy of its kind I ever used.
Yours respectfully, DICK WILSON.

From the Man Who Gave Race Records to Strongwood 2:12½, Verna Strongwood (3) 2:12½, Etc.

The City Livery Stable, Corner Main and First Streets.
U. S. Wood, Prop. First Class Livery.
Phones: Home 26; Sunset 191.

POMONA, CALIFORNIA, SEPTEMBER 30, 1908.

Gentlemen: I have used Reducine with marvelous success. I consider it the greatest remedy for absorbing and removing any enlargement, and curing any unsoundness I have ever had any experience with. While I was buyer and salesman for Dunham, Fletcher & Coleman, Wayne, Ill., they used Reducine on several valuable draft stallions, etc., with great success.
Yours very truly, U. S. WOOD.

From the President of the Willamette Valley Fair and Racing Circuit.
Practical Horseshoer. Track and Road Shoeing a Specialty.
Shops at Portland Country Club Track, and Von Gilman Riding School, in Oriental Building and at 237 Taylor Street.
Telephones: Oregon-Pacific, 2280; Home, A3380.
Special attention paid to knee hitting, interfering, forging and lameness. Horses sent for and delivered to any part of the city.

PORTLAND, OREGON, OCTOBER 19, 1909.

The Reducine Co., New York, N. Y.:
Dear Sirs: I have used Reducine with the best of results. My horse grabbed his quarter in a race and tore the foot so bad that I had the hardest kind of a job to heal it, and it left a large quarter which he would often hit with the other foot when going slow. The Reducine reduced it to almost its normal size and the horse has raced sound on it all summer, winning his last race two weeks ago last Friday. The horse I refer to is Red Skin 2:16½, trotting. I believe Reducine is the best horse remedy I have ever seen.
Yours truly, A. C. LOHMIRE.

FROM GEN. C. C. WATTS.

Owner of the former World's Champion 3-year-old Trotter, Gen. Watts 2:06¾.
C. C. Watts. Dabney C. T. Davis, Jr. Staige Davis. H. A. Mathews.
WATTS, DAVIS & DAVIS, ATTORNEYS-AT-LAW.
Citizens' National Bank Building.

CHARLESTON, WEST VIRGINIA, JANUARY 4, 1908.

Reducine Co., New York:
Dear Sirs: I herewith enclose my check for three cans of Reducine. I have used this medicine on my farm with not only satisfactory, but very gratifying results. It is in my opinion an extraordinary, valuable and useful remedy for spavin, thoroughpin and injuries of a kindred nature. I would hate very much to be without it; in fact, regard it as indispensable in my barn.
Very truly yours, C. C. WATTS.

MEMPHIS, TENNESSEE, OCTOBER 30, 1908.

The Reducine Co., 90 West Broadway, New York City:
Gentlemen: I have been using Reducine a good deal for the last two or three years and like it better than anything else I ever used for its purpose.
Yours truly, E. F. GEERS.

KING HILL STOCK FARM, ST. JOSEPH, MO.

SEPTEMBER 12, 1910.

Reducine Co., New York, N. Y.:
Gentlemen: I am pleased to notice your continual success with Reducine. Like old wine, the more you use it the better you like it. I was one of the first in America, if not the first, to use it, and I expect to keep on using it as long as I live, for I hardly believe it possible that it will be supplanted.
Yours very truly, A. L. THOMAS.

F. A. BURNS E. S. NOBLE ELTON NOBLE
BURNS & NOBLE COMPANY,
Wholesale and Retail.
Fine Vehicles, HARDWARE, STOVES AND TINWARE.
Wagons and Farm Machinery.

LAMPASAS, TEXAS, OCTOBER 13, 1909.

Gentlemen: The can of Reducine purchased from you was used on a mare that is owned by the writer. The mare either had a severe strain in the hock joint or a bruise, I could not determine which. In any event, her hock joint swelled to the size of a three-gallon pail and she never rested her weight on the leg for ten weeks. Much of this time she held her foot clear of the ground. The veterinary who had the case in charge (he is a good one) advised me to put her on pasture. This I did and she remained there six months before I took her up and began the use of Reducine. At this time she had a hard growth almost all the way around her hock joint and I was told by three competent veterinarians that the case was hopeless and in a year or two the mare would not be able to use the leg at all, and I am free to admit that it looked that way to me, as she limped constantly and her hip had perished away until it looked one-third smaller than normal. I used one treatment of Reducine. This improved the leg to where the mare was able to be put to work, and I put her in a double team, as you had advised that work was the proper thing. After the second treatment, I put the mare on regular work on the store delivery wagon and she hasn't missed a day in three months and goes without any lameness whatever. There still remains a small bunch and I have just begun the third treatment to remove same, which I am confident will suffice. Her hip has grown back to normal size and she holds up her head and steps along not at all like the average delivery wagon horse, as though she knew that her promotion was not far distant. This one can of Reducine has been worth no less than \$250 cash to me, not mentioning the satisfaction of a man who loves a horse.
Very truly yours, ELTON NOBLE.

402 East Market St., STOCKTON, CALIFORNIA, MARCH 16, 1910.

Reducine Co., 90 West Broadway, New York:
I have used the can of Reducine I got of you in January and find it is the greatest stuff I ever heard of. My horse, McDougall, is as fine as silk, and think when he goes into training he will trot very fast. He is touted to trot in 2:10 this year. I have just sent an order to J. A. McKerron, San Francisco, for five cans more. Sent an order to him in February for three cans. I have recommended it so highly to my friends they all want to try it.
Yours truly, J. G. GRISBY.

FIRE DEPARTMENT, CITY OF PITTSBURG.
T. W. Howe, Chief.

PITTSBURG, KANSAS, MAY 3, 1910.

The Reducine Co., New York, N. Y.:
Dear Sirs: We have used Reducine for the past year with very favorable results. There are nine head of horses in this department, and they have had bowed tendons, contracted hoofs, splints, etc. These have all been completely cured by the use of your Reducine. We have recommended it to several different people, and cannot speak too highly of what it will do if properly used. Our experience is that when used according to directions and given reasonable length of time to act, it will do all that is claimed for it.
Respectfully yours, T. W. HOWE.

From the Owner of the San Jose Track.
RAY MEAD. Phone, James 3212.
TEAMING CONTRACTOR.
Excavations, Sand, Gravel, etc., etc.

501 Spencer Ave., SAN JOSE, CALIFORNIA, OCTOBER 13, 1909.

The Reducine Co., 90 West Broadway, New York:
Dear Sirs: I have used Reducine in various ways, most successfully, and consider it the best of the many absorbents on the market.
Yours respectfully, RAY MEAD.

From One of the Best Known Horsemen in the West.
THE MORRISSEY CARRIAGE COMPANY.

PUEBLO, COLORADO, SEPTEMBER 23, 1910.

The Reducine Co., New York:
Gentlemen: Enclosed find P. O. order for \$8, for which please send me two cans of Reducine by express.
I have used Reducine for a number of years with the very best results. Last year I had a horse with a cartilaginous growth, the after effects of distemper, and after two ten-day treatments he was able to race to a record of 2:13½ on half-mile track. I also used Reducine on a bad leg that looked incurable, with the result that I was able to race this mare, and she proved sound the entire season.
I am placing this order for more Reducine to use this fall, as I think there is nothing better for the purpose Reducine is intended, and can't afford to be without it in my stable. I am, with best wishes,
Yours truly, J. O. KARRICK.

Henry Uihlein, Pres. Cable Address
Edward G. Uihlein, Vice-Pres. Schlitz Milwaukee.

THE LEADING QUESTION with the breeders and owners of trotting and pacing horses in California at this season is: What chances are there for a circuit of harness racing in 1911? For several years past the number of meetings in this State have been so few that it has not paid even the winning owners of horses other than stake colts to campaign them. Last season we had no circuit at all. Racing opened at the Breeders' meeting at San Jose early in August, after which the horses were idle for one week, when a meeting was given at Woodland, and after another idle week the California State Fair gave a meagre program of one harness race a day, the Occident and Stanford stakes being all that saved the program from mediocrity. After the State Fair closed the San Joaquin Valley fairs furnished a few weeks of harness racing for small purses, and this comprised the California racing season of 1910. For a State that is one of the leading horse breeding sections of the globe, one that has produced so many world's champions including the world's fastest trotter, to permit harness to fall into such insignificance is a sad commentary on its citizens who are most interested in the breeding and racing of trotting and pacing horses. Oregon and Washington, with a six weeks circuit of good meetings in which the great fairs at Portland, Salem and Spokane had a place, "saved the day" to the California horsemen however, and the Arizona Territorial Fair at Phoenix, where the California horses closed the season with many brilliant performances, was a fitting climax with many brillianting which showed very plainly that California is still a champion breeding State even though it offers so little inducement for its horses to race at home. In spite of this lack of encouragement there came to the front last season some very notable horses. Helen Stiles 2:09¼, winner of over ten thousand dollars and sold at the end of the season for \$7000, is a California production, bred and raised by a "small owner" who had but one mare. Happy Dentist 2:05¼, winner of \$5000, and Wilbur Lou 2:19½, the world's champion yearling trotter, were also bred and raised in California, though they earned their records outside the State. The Pacific Breeders' Futurity, the California Breeders' Futurity, the Occident and the Stanford stakes, all trotted in California during the season, were the events that "saved the face" of our racing at home, as they brought to the front such three-year-old trotters as Bon Guy 2:11¼, Strathboul 2:13¼ and Donasham 2:13¼, besides the three-year-old pacer Jean Valjean 2:10, all four stake winners. Besides these there were a dozen high class trotters and pacers raced in California, many of them now considered great prospects for future racing on the Grand or Great Western circuits. If the California breeders and owners of light harness horses can make such a showing with the very poor encouragement they receive in their own State, what would they do were there to be a circuit of ten or twelve weeks of good purses offered every year here at home? Is it not reasonable to suppose that with such a circuit California would produce at least a dozen new 2:10 trotters annually and twice as many new pacers in that class? Consider for a moment the great increase in trotting horse values that this would mean, and the eastern buyers who would make pilgrimages here during the winter and spring months to secure stake winning prospects. But every horse owner knows as well as we do what a changed condition of things would be brought about were there to be a good California circuit, and the question naturally arises: Are the present conditions to always exist, or is there to be a change in 1911? From the great interest being shown in the pro-

posed revival of the county fairs we believe the horsemen of California are awake. It would be a very excellent idea of every California town where there is a good mile track would announce a race-meeting for 1911, and make the announcement by the first of January. We believe San Jose has already arranged to do this and we hope a dozen other towns will do the same thing. A circuit of twelve meetings announced not later than February 1st will mean at least 1000 horses in actual training one month later, and this means prosperity in the trotting horse business.

THE COMING OF THE BONDSMAN, sire of the world's champion three-year-old trotter to California has aroused an increased interest in the breeding of colt trotters that can win some of the many big stakes offered for these youngsters annually. Before the news of this great sire's coming to this coast was a week old the writer had heard four or five different California owners express the intention of breeding at least one mare to the son of Baron Wilkes. The few weeks that intervene between now and the opening of the breeding season will give owners an opportunity to study the blood lines of the mares that have produced best to The Bondsman in the past and to figure on how their own mares will nick with him. To assist them we have prepared a list of the dams of The Bondsman's best performers, giving their extended breeding. It will be found on another page and Colorado E's breeding shows that the blood of Robert McGregor and Jay Bird appears quite prominent in the pedigree of the dam of his fastest performer and this leads us to remark that the blood of these sires is to be found on this coast. Silver Bow 2:16, a son of Robert McGregor, has several daughters in California, one of them having produced the largest money winner of the year on this coast, Helen Stiles 2:09¼. The blood of Jay Bird is not very prevalent here. Henry Helman's Alconda Jay and Thos. Ronan's Birdman and the full brother to that horse having a few daughters here—all very young. But it has often been said that good California blood nicks well with all the best sires and we have no doubt but more than one 2:10 three-year-old will result from The Bondsman's first season in California.

TRAP SHOOTING ON THE COAST during the past year has had a generally good support, with the promise of renewed interest and an increased following for 1911. One pleasing feature connected with the "clean sport" is that target shooting has taken a strong hold in many interior points. There are now many small clubs organized. This means a gradual widening of the scope of operations, more members and a keen rivalry at the traps between different sections.

A movement is on foot, at present, to form an association of gun clubs of the various towns of the San Joaquin valley, with the object in view of holding a series of tournaments. This project will undoubtedly go through successfully.

Since the passing of the Ingleside grounds, two seasons ago, local sportsmen have broken clay pigeons at the Oakland and Bay View Gun Club's grounds. Some of our shooters have attended tournaments in the northwest, at many different points in this State, and also in Arizona—with the added distinction of winning numerous high averages and getting in on the purse distribution to a marked degree.

The Breeder and Sportsman, for twenty-eight years past, has been the only journal on the coast that has regularly published trap-shooting news and scores and will continue to do so during the season of 1911.

THE GAME AND FISH LAWS of this State have been the subject recently of much discussion by sportsmen in general. Various changes in our laws have been advocated for the better protection and conservation of fur, feather and fin.

Among the bills for remedial legislation that will be introduced at the coming session of the State legislature will be the following:

For a shorter season on English snipe, it is claimed that the present open season is at least two months more than it should be.

The non-sale of wild ducks is strongly advocated by numerous sportsmen's organizations. The sale of wild ducks is prohibited entirely in some States and in others it is regulated by allowing the sale of ducks during a certain period of the open season only. A non-sale clause in the law would put the market

hunter out of business. The game slaughtering methods of the professional hunters have been of such unsportsmanlike degree that the remedy here advocated will be strongly urged. One of the principal reasons for suppressing the market shooters is the persistent violation of the bag limit. Although many arrests have been made and convictions secured, the objectionable traffic still prevails.

The automobile is regarded as a medium of game extermination. Possibly an effort may be made to put some phases of the machine adjunct to the shooting trip in the same class as the motor and power boats for duck hunting. By this means of transportation hunters can cover a vast extent of country in a short time. Quail hunting by auto assistance has been effective in the shooting of more birds in quicker time than for years past.

The open season for deer is claimed to be at least a month and a half too long. An effort will be made to have the restriction on the use of dogs taken off. In some sections a dog is absolutely necessary in hunting deer.

A change in the open season on shore birds is advocated by many. These birds are migratory and do not breed in this State, it is claimed. During the season when it is lawful to shoot them they are not as numerous as in the months prior to the opening of the shooting season. This change does not meet the approval of some sportsmen who claim that hunting shore birds before the 1st of October will offer unscrupulous hunters a chance to kill ducks on the breeding grounds.

Tree squirrels are on the protected list, the annual limit being 12 squirrels to one individual. The protection given these rodents for several years past has resulted in a noticeable increase. These squirrels and all other varieties, native of this State, are severely condemned by forest officials who claim that enormous damage is done by the destruction of sugar pine and other forest tree seeds. Instances have been reported where squirrels have dug up seeds planted by forest rangers, in burned and other barren sections, faster than they could be placed in the ground.

The hunters' license law, as it now stands, has been the subject of much discussion. A system of tags for deer hunters has been suggested. At present there is no way of ascertaining how many deer an individual hunter may secure in a season.

A SUNDAY LAW IN CALIFORNIA is "the handwriting on the wall," if current rumor is correct. The dragnets of the "wave of reform" have gathered in the sportsmen, who find Sunday the only day for recreation with gun or rod. Along with those who like a Sunday outing trip will be named, as objectionable to the truly good of our community who are zealots in the prevention of desecration of the Sabbath day, are the theaters, baseball and football games, various kinds of business, Sunday picnics, and, in fact, everything that our citizens have for 50 years past almost, been in the habit of doing on Sunday.

It can be readily assumed that such legislation does not emanate from a native son or daughter source. And what is certain in this respect is, that a native son and native daughter opposition, augmented by the support of fair-minded associates, will be quick and strong in effectively checkmating any attempt at abridging the going and coming of our citizens on a Sunday.

GAME AND TROUT FARMS for the rearing of game animals, birds and fishes in captivity are established successful industries in different Eastern States. A trout farm is in operation near Inverness, in Marin county, and in the short time it has been established it was demonstrated that the enterprise is no longer an experiment. The success of the pioneer trout farm in this State has prompted the location of a second one near Healdsburg, which will soon be in active operation.

The State game farm near Haywards is an illustration of the feasibility of rearing wild game birds of the pheasant and partridge varieties. Wild turkeys have also thriven at the farm.

A venture at raising wild ducks in this State, on anything like a scale of business magnitude, is yet to be heard of. This industry, however, is a paying one in several Eastern States. Wild ducks are prolific and can be raised at a cost that will enable the breeder to put young ducks on the market at a price less than wild ducks cost the dealer.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT.

THE PATH OF GOOD INTENTIONS.

The sale of such birds and fishes can be controlled in a manner that will afford protection to the denizens of marsh, upland or the waters. This has been done in other States and could be done in California.

Here, it is argued, is a solution of the market hunter and fisherman problem. Furthermore, if wild game and game fish can be obtained in this manner the draft on the native stock of the State will be moderated to quite an extent.

KENNEL AFFAIRS HAVE BEEN LIVELY in San Francisco and on the Coast in 1910. There has been a breakaway from A. K. C. jurisdiction; the National Dog Breeders' Association was organized and has

Once more the hands have crept round the dial, and we stand with backs to the past, and faces to the future, each man laying his own causeway whereon he shall walk. Ever and anon there is a backward glance over the shoulder at the old trail started a year ago, then a neat paved way, now, alas, a confused track of uprooted stones, scarcely to be recognized for a way, at all. The sight causes a smile, a shrug, or a sigh, as the case may be, but in most cases it has no further effect. The past and the future are widely sundered just now, and we turn to the good resolutions with enthusiasm undiminished, confidence undisturbed. Tomorrow marks the dawning of a new era and another fishing season brings the golden age in which a man can

reasoning which suggests that the Wickham is the imitation of some kind of sedge. It is not; it is a match-hook, a spear, a—but no it is beneath the paving stone, and of the dead we must speak no ill. It is odd how difficult a thing is unless you are constantly doing it. Once a year is not enough to keep a man in practice. The third stone is, it is true, more or less in position, but it lies at an absurd slant and if that projecting edge does not cause a stumble, it will be a miracle and a mercy. Now for chalk and an inscription. Hic jacet—no, this is foolishness; it is not a tombstone, but an item in the path of virtue. What if it does cover the mortal remains of our beloved rod, companion of our joys, partner of our sorrows. Let the dead bury their dead. It weighed 9 ounces, and was unthinkable, for the word has gone forth and it is up to us to make our path the path of progress. The rod of 1911 shall be such as shall give the poor fish a chance, the kind whose weight is less than the gold it costs. Big rivers? Long casting? Wind? Why it will throw the cable from New York to London, across an Atlantic gale, and it will intensify the angler's pleasure by playing his fish for a week. Not throw a line from New York to London? Not want to play a fish for a week? In 1911 we are no longer back number in these matters. We shall get a hustle on our actions, and add refinement to our perceptions at the same time. A great thought, and the stone seems a little more on a level for it.

The fourth stone leans upon the third in a rather symbolical manner. Beneath it is the reel, that has so often made music to our willing ears. It is a good old reel, and has served us well, but it must suffer a like fate, with the rod in the interest of progress. It is not fit to be placed on the dainty weapon used in 1911. For that we shall have the 4 tarpon power machine fitted with a lightning multiplier apparatus, two acetylene lamps, a number—yes, and a license. So equipped we shall get much interesting sensation without bothering about trout, and that ought to satisfy any fly man. It were mere sentimentality to reject the old reel, with its cheerful voice, when you can have a new one which will in three turns of the handle wind a fish up to the top ring—if the fish be small enough.

Beneath the next few paving stones nothing tangible is buried. The resolutions which they mark pertain to procedure, not to equipment. The first concerns the rise. The day of chucking and chancing is past. No more shall the medium olive float over a spot merely because it is a new hold for a trout; no more shall a fish be invited to take a red quill merely because he is visible. The rise is the thing for 1911, and no rise, no cast. There is a certain purist of my acquaintance, whom I have long admired from a distance. He collects natural flies and puts them in bottles; he fishes solely with an imitation of the insect which is visible or presumably on the water; he uses the new toy rod, and he returns nine-tenths of what he catches. In brief until quite recently I thought him something more than human. But one day I discovered that a leaven of frailty still lingers in him. It was a cold day, the rise was over, and he was casting a blue-winged olive at a venture, and catching fish withal. In 1911 we shall do all else that he does, but we shall not do this, and then we shall be greater than he.

There are, so really great ones tell us, rises and rises. The complete purist will announce whether that ring thirty yards away, is caused by a sizeable trout, or a small one, and if it is a small one, he will of course leave it alone. We are going to do that too; nay, more; we propose to go further and discriminate between sizeable fish, confining our attack to male trout over 1 pound and female over 2 pounds. Also we are to make only one cast over each trout. Thus we shall escape the charge of "worrying the fish."

There are many more noble things we shall do in 1911, many other base ones we shall leave undone, and the roughly paved path we have laid for ourselves stretches into the grey and distant future. How long we shall walk upon it without stumbling, how soon we shall begin feverishly to demolish the

Sprig and canvasback—
A strap of proper type.

steadily gone ahead since. With an official kennel paper, studbook, registration system and other necessary features now connected with it, the N. D. B. A. is gaining ground. Three shows have been held and they were well supported.

The officials of the Marin Kennel Association and the Santa Clara Kennel Club have been disqualified by the Pacific Advisory Board. The Alredale Club, which gave a show in Kansas City, will probably be put on the "black list" also. And for all this, the insurgent fanciers do not care a fig, but are going along on the even tenor of their way.

The San Francisco Kennel Club's franchise was lost through "kennel politics" of the A. K. C. and an unsuccessful attempt was made to put the Oakland Kennel Club out of business.

The A. K. C. cohorts organized a club in this city and gave a show that was ignored by the majority of local fanciers. The best show given on the Coast this year was that of the Ladies' Kennel Club of Southern California.

One result of the split has been to bring out a lot of new exhibitors, and that is something gained at all events.

go steadfast and secure. From this moment we and ourselves are at unity and peace.

Thump! The first paving stone is heavy carrying and I fear it has fallen slightly askew. It is no light matter in 1911 to abandon that project of March browns. Yellow bodied they were to have been, and so like a fresh water shrimp as they moved in short jumps under the water, that no trout could have resisted them. They would have proved just the thing for saving a blank day at the beginning of the season when flies hatch not, and the purist spikes his rod. But no matter "more was lost at Mohacs field," and we, too, will spike the rod. Shall not a new season make temper serene? Very likely, moreover, we shall not fish a dry fly stream next year. For two years we have vowed not to do so again; three is a lucky number, so 1911 should see us renew that vow to some purpose.

Alas! the second stone grievously out of line, and it is ill-hewn besides. Still it seems securely rooted in its soft bed, and it will take much to disturb it. Under it reposes that gold bodied abomination the Wickham. No more shall humorous troutlets rise for its deceitful glitter, no more shall we blush for shame as we meet the cold eye of the exact-imitation man; no more shall he drag confession from us as to the fly which did our basket of trout to death. There will be nothing to confess. We shall have no trout. We shall thereby flatter him, with the sincerest flattery and he will pat us on the head as well meaning young-beginners. Pride will be ours in 1911 and what are a few trout compared with a clear conscience? Away with the insidious

A Cosy Clubhouse.

work of our own hands, and how many of the stones will remain in place on the eve of 1911, who knows? Of one thing I feel pretty confident, if I do all the things I aim at doing, and do not do all the others I wish to leave undone, at the end of 1911, I shall have made about 15 casts and shall have caught no fish. Already I begin to think I might have constructed a better, or at any rate an easier path.

W. R. GILBERT.

HUNTING IN MENDOCINO.

[By Arthur H. Dutton]

For many years Mendocino county, California, has been regarded, and rightly, as a sportsmen's paradise, so plentiful is the game, there, and so varied. In the past its comparative inaccessibility has closed it to all city hunters save those with the means and the energy to visit it. It is only within recent years that the railroad has gone even as far as Ukiah, and now it is running only to Sherwood. Between Sherwood and Shiveley there is a gap of about 110 miles of country, traversed only by country roads, and those not of the best.

Dr. W. Fuller Sharp.

Green Lodge Limit of Sprig and Mallard.

The result of this comparative isolation has been the freedom of game from the wholesale slaughter that it suffers in more accessible sections. Predatory animals, indeed, have been far more destructive of deer than has man, and the same general rule applies to other game animals and birds. The fish with which the streams abound have scarcely been touched by any save the natives.

Under these conditions it is not surprising that Mendocino county should offer to the sportsmen, both hunter and angler, a rare field for his favorite pastime.

Naturally, deer are the most prized of the game. Deer are to be found in practically all the mountain ridges and valleys. If anything, they are increasing in numbers, for the very simple reason that the settlement of the country has been followed by the extensive destruction of mountain lions, wild cats and other foes to deer. These, as already said, are more destructive of deer than man. Then, too, more and more of the landowners are posting their land, which also tends to protect game of every kind.

Besides deer, the essentially game animals of the county comprises tree squirrels in great numbers, and cotton-tail rabbits. One cannot leave the county road without encountering tree squirrels in the nearest woods. They offer more sport than most people think, too. Try to get a bag of them and see.

Bear are not so numerous as formerly. They have been killed off in the regions near towns and villages and are now rarely to be found save in the more remote mountain fastnesses. Sometimes, especially in winter, both black and "red" bear, will approach close to civilization, in the hope of picking up some food, scarce in the hills at that season of the year.

Mrs. W. W. Richards.

"Waiting for an incomer."

The same thing is true of mountain lions, which are ever on the alert for a lamb or other flesh food. Wild cats are still quite numerous, even near such places as Sherwood, Laytonville and other centers of rather

thickly settled rural districts. It is not an unusual thing by any means to run suddenly into one, right in the center of a mountain trail nor far from the county road. A good dog will generally dig them up if they are around and is pretty apt to hold them at bay, for these cats will not run from a dog.

Whatever may be said about the decrease of quail in other parts of the State, it is not true in Mendocino county. Both mountain and valley quail are thriving there. This last season, according to the consensus of reports, valley quail were more numerous than for some years past. Mountain quail are quite as numerous as for many years past, although somewhat more wary. Doves are plentiful. Wild pigeons seem to follow no rules. They come and go. For a few days or even weeks they may appear in thousands in a given locality, from which they will suddenly disappear, to re-appear at an indefinite time.

While not a genuine duck region, ducks of many kinds visit Mendocino county during their migrations, and some even remain throughout the year. There are cases on record where mallards remained in the Eel river region during the breeding season. Occasionally wood duck may be encountered, but they are very rare.

After the first heavy rains of the autumn, the quinnat

change. Here a little line branches off through the redwood district. The train running on it carries a passenger car, which goes to Sherwood. At the latter place there are a couple of good country hotels, and a store where all supplies needed, including the ammunition for all standard weapons, may be obtained.

From Sherwood it is really unnecessary to take further conveyance, for excellent hunting and fishing may be found within easy march of that place. There are cabins and farmhouses within just about the right distances of one another to afford refreshment and supplies of the kind they can furnish at the proper intervals. The country around here is beautiful and the scenery varied.

There are many places like this where headquarters may be made, such as Potter Valley, Bell Springs, Cummings, Covelo, Laytonville, and others, all in the midst of fine hunting grounds.

In the summer, when the roads are in good shape, there is an automobile service between Sherwood and Shiveley, which makes transportation swift and comfortable. After the heavy winter rains set in, however, the roads become atrocious in most parts and transportation is rough and uncertain. Sometimes they are so bad that the mails have to be carried on horseback, no stage being run and

Our game law's lack—

A shorter season for snipe.

salmon come up the many creeks from the sea. The numerous tributaries of the various forks of the Eel river are favorite spawning grounds for "black" salmon, as well as for steelhead, and the runs are generally heavy. The trout are shy of the fly, however. They have so much natural food that they are not to be tempted greatly by the angler's fly, no matter how alluring.

In a word, with this summary, it may be seen that Mendocino county is one of the finest hunting grounds in the State. While not virgin soil exactly, it has not been tilled to anything like the extent that other counties have, and, for reasons already explained, game is on the increase just now, rather than the reverse.

With the completion of the link of the Northwestern Pacific railroad between Willits and Shiveley, this great hunting region will be made accessible to the city hunter with greater ease than at present but even then there are remote corners of the county where game may be depended upon to linger and increase and multiply for years to come. There are regions in the county where one may go for miles without encountering a vestige of civilization beyond perhaps, a fence or a trapper's cabin; regions where the only thoroughfares are deer and cattle trails. The county is rugged and mountainous, although with many clearings between the denser woods.

Just now, the way to reach the heart of the county is to take train to Sherwood. A train leaves San Francisco at about 7:30 a. m. each day and goes to Willits, the last point on the main line, without

at other times they are quite impassable. It is well to bear these things in mind in preparing for a trip to Mendocino in winter.

Hob-nailed boots are absolutely necessary for Mendocino county hunting, owing to the steep ridges that have to be traversed. In the winter time, heavy underwear should be worn, as it often is freezing cold. If salmon fishing in the winter is to be engaged in, high rubber boots should be carried along, for wading in the streams. In the summer time, a hunter may equip himself like a soldier in the field, in heavy marching order, with knapsack, canteen and the light field mess kit, and with this outfit he may travel anywhere sleeping in abandoned cabins or even in the woods in the night time, for, while the winters are cold, the summers are warm. The outfit may be left at the day's headquarters during the hunt. A few groceries are all that need be carried in the knapsack, as fresh vegetables, eggs, and the like may be obtained from the occasional farmhouses, and the hunter should be able to supply himself with fresh meat and fish.

If good hunting, a healthful country, and a thoroughly enjoyable time are desired, Mendocino county is one of the best places to find them.

Classy Photography.—W. J. Street, who furnished the four pictures of feathered game in this issue, has the reputation of being the most artistic photographer of still life fish and game subjects on the Pacific Coast.

AUSTRALIA'S WILD FOWL.

To sit down and write a few lines upon my antipodean researches is nothing new, but to encroach upon the space reserved to my old friend De Witt is something of a novelty. As most of your readers are aware, in 1888 I was appointed one of a board of five commissioners to represent the United States at the Melbourne Centennial Exposition. My companion du voyage was Lieutenant Adolph Marix, U. S. N., who had been appointed secretary of the commission. We arrived there on the 29th of June, which is a winter month, and stopped on the way at a small town the name of which I have just now forgotten, but it is about one hundred miles from Melbourne, and we ran into the metropolis in just 1 hour and 40 minutes, which was faster than I had ever ridden on a train before.

A brace of dainty teal—
Regulate the market sale.

The train stopped there, according to the timetable, "ten minutes for refreshments," so Marix and I got off for a Scotch highball. While there along came a lad of about 18 and he had nine ducks that he had shot that morning. Neither of us had ever seen any ducks like them before. On inquiring the names of the bird he said:

"That big duck is a blue wing; those two are teal; those two are buffaloes; that fellow over there is a mountain duck, which you seldom see here; and the other three are wood duck." On inquiring further, he told us that he had shot them on a billy-bong (what we call a slough in this country) that made out of the Goulborn river, about two miles away from the town. After we had got the commission fairly organized by the election of John T. Morgan (Consul-General at that time) as president, Marix as secretary and myself as superintendent, we let a lot of contracts for fitting up the portion of the building reserved for America, and then prepared for a day's duck-shooting on the Goulborn marshes. Taking the train at 3 p. m., we reached the cover about 4:40 and got 11 head for the two guns, and at the next morning's shoot, got 17 more, and reached the station at 4:45, just in time to board the express train for Melbourne. Our bag consisted of nine buffalo ducks, two blue wings, six wood ducks, five teal, two spoonbills and four jack snipe.

The largest of all Australian ducks is the birch-wing. He is almost pure white with yellowish spotted wings, as you have sometimes seen on a "pile" gamecock. This bird is migratory, but is more frequently killed in New Zealand and Tasmania than on the continent. In Tasmania he is called the "brass back" and in good flesh will weigh quite four pounds.

The next largest duck is the blue wing, a big fellow quite as large as our canvasback, and, to my notion, second to A. vallisneria alone as a table bird. If you have seen the little cinnamon teal that is found in and around San Diego, you can form a correct idea of these magnificent big birds, for their

plumage is almost identical. The blue wing has yellow bill and legs.

The buffalo is a black-bodied duck with a yellow head and neck, but black bill and legs. I am confident that in the winter of 1864-5 I shot a duck exactly similar to this bird in the lagoons about Mazatlan and Altata in Mexico. A good day's bag in the Victorian marshes generally shows from 45 to 50 per cent of this species.

All the ducks in Australia are migratory except the mountain duck and the wood duck. The former very seldom comes down to the marshes and rarely goes in large flocks. It is easier to find forty buffalo in a flock than six mountain ducks. The latter is a most beautifully plumaged bird and in some respects resembles our domestic Muscovy. His wings and back are of a rich greenish black with a white ring about his neck, while his breast is a beautiful shade of

bronze. He is the longest bodied duck I ever saw, longer than our sprig-tail, which is the longest body we have, when his weight is considered.

The wood duck is found along all the streams and, as its name would imply, builds its nest in a tree. Its plumage is different from anything we have, the body being feathered like that of a Plymouth Rock chicken, while the head and neck are of a rich chocolate hue. I brought over two pairs of these birds in 1890, with some mares that I bought for Hon. S. J. Rose. One pair I sold for \$20 to a man in Oakland and the other pair I gave to Harry Rose. Fearing that they might get away from Rosemeade, I clopped a wing of each. They had only been at Rosemeade two days when a fox terrier pup, worth about six bits, killed both birds. The wood duck is the smallest of the Australian ducks except the teal, which is coal black with a green tip to his wings.

Of bay-shore birds, such as we have in America, Australia has a few varieties. The big Spanish curlew is absent, as is also the marbled godwit, commonly called the marlin. The smaller godwit that is known as the Hudson godwit, or "jack curlew," is found everywhere, as is also the sickle-billed curlew, which the Long Island bay-men called the fiote when I was a boy. The dowitcher, so plentiful on the San Mateo and Alviso marshes fifty years ago, is found everywhere on swampy land in Australia, but the golden plover and the black-breasted gray plover, of which I once shot eight of a single afternoon on the marsh when Henry Walsh was in charge of the thoroughbred department at Palo Alto, are not found in Australia at all.

In their stead, I found a plover that is found nowhere else in the world. The cock bird has spurs, not on his legs, but on his wings, and people say that they fight as desperate battles as the ring-necked pheasants, but I never saw any evidence of it. The spur-winged plover is a very toothsome bird. I shot six of them one afternoon at Laveas Lake in New South Wales, but they were all torn so badly that it was impossible to preserve the skins.

The great and beautiful bird of this class in Australia is what they called the silver-maned curlew. He is in reality an ibis, like the ones I used to shoot down in Mexico in 1864, but he has what the Mexican birds did not have, a beautiful silvery mane, coming out at the base of the brain and extending down the neck for about seven inches. I spent a whole day at Boort trying to get a shot at one, but he was too wary for me. Hearing of my ill-luck in this respect, Mr. James Umphelby of Sydney sent me the skin of one, which I, in turn, sent to the Smithsonian Institute by one of my fellow commissioners. He forgot to take it out of his trunk on his arrival home and a year later, when he went into the trunk to get it out, the moths had eaten all the feathers off the neck and breast. This bird when fully grown and standing quite erect, is about sixteen inches tall and has a sickle-shaped bill of about five inches in length.

The avocets, so abundant about San Diego in your State, are even more so in Australia. They eat all kinds of small fish and I cannot say I fancy them for the table. Down at Sorrento, on the bay, about forty miles below Melbourne, there were great quantities of them. But the funny birds there, to my notion, were the cross-bills. About a mile below the wharf at Sorrento, a point of rocks juts out into the bay and that was one of my favorite walks while there. You would see one of these little cross-bills pick a mussel off the rocks and then fly up in the air about twenty feet, when he would let it drop on the rock and break the shell. If you saw the same bird fly up in the air again with his precious find and let it drop a second time, it was because the shell did not break at the first attempt. These little cross-bills will wade into water four inches deep to pull mussels off the rocks; and there were rocks there (we call them crows in this country) that used to sit on the trees at Rocky Point and watch the cross-bills catch mussels. As soon as the bivalve struck the rock on being let fall, the big rock would pounce down on the poor little cross-bill and take it away from him.

The cross-bill is plumaged very much like the avocet save that the avocet has a splash of claret color on his breast while the cross-bill's breast is a pure white. The avocets are also more gregarious than the cross-bills. I have seen as high as forty of the former in a flock but never more than six or seven of the latter. Hunger must be a man's only excuse for eating either of these birds, but it was a great source of amusement for me to sit on the rocks and watch their antics, for I spent nearly every Sunday down at Sorrento after the warm weather began.

I do not know whether my good old friend, Mr. E. P. Coles is alive now or not, for it is nearly twenty-one years since I last visited Melbourne. He kept a taxidermist's shop on Swanston street between Collins and Latrobe; and there it was that I secured the fine collection of Australian birds that I brought back here in January, 1889. This collection, I regret to say, was destroyed by a big conflagration some four or five months ago. The student of natural history found something very interesting in a collection of bird skins which cost me less than sixty dollars, but I fear that collection is not now likely to be duplicated.

THOS. B. MERRY.

Portland, Dec. 6th, 1910.

With the ground covered with snow, hunters report the best shooting in years throughout Spokane and neighboring counties. The Little Spokane, Chat-taroy and Little Pend Oreille regions are particularly infested with deer, according to reports. W. K. Vensel and H. W. Sterner bagged a deer each near Chat-taroy on Thanksgiving Day, while B. Wilcox had similar luck on the Little Pend Oreille.

Harvey McMurchy, Dave Thom, Phil B. Bekeart.
Ingleside Trap Grounds, 1908.

A large buck with a fine pair of antlers wandered into the town of Deer Park, Wash, northeast of Spokane, and sauntered through the business districts while the citizens were getting their guns ready. The animal stopped in front of the town grocery store and nibbled at a crate of cabbage on the porch. The buck escaped before any of the nimrods could get a rifle in action. It appeared to be tame, and is supposed to have been driven into the haunts of men by hunters.

THE RIVALRY OF ROD AND GUN.

Early spring, always a time of contrast, suggests one of the most alluring choices of alternatives of life and sport in the open air. Shooting is practically over. Which is the better, sport with gun or sport with rod? Which would be the one to choose, if one only might be chosen? Which gives the surer return for the time and money? Perhaps the last is the real question to ask, for it embraces the others. The pleasure of expectation may be great, and the pleasure of active enjoyment greater;

On the San Lorenzo.
A Critical Moment.

but they are both contained in the pleasure of memory, and memory besides embracing can greatly heighten expectation. Indeed, half the pleasure of doubt and hope would vanish if there were not memories of doubts once before scattered and hopes fulfilled.

If one were to try to set down some of the memories of a number of years' experience with rod and gun in open air, what a vivid, crowded procession it would be! It would begin, for the shooter perhaps, with an August sun hot on peat hag and blueberries and bracken, with the scent of heather and the sea in the wind, that most intoxicating of all draughts of air; setters ranging the broad flank of the hill, and brown wings whirring over the brow. Those even wings and that level flight—who that has seen it does not remember the first day in which he stood on a Scotch moor in an October wind behind the dead, grey, writhen heather wood and piled peat of his butt, and watched the silent, dotted cover dipping into the hollows, breasting the ridge, and rising at the butt with all the rush and glamour of sudden attack? That is a picture which endures; but there are quieter pictures not less haunting. Not every owner of partridge ground in England cares to walk up his birds if they can be driven, but those who care only for driven birds lose one of the happiest of all memories of September; an air touched with ice at the cockcrow and warm only in the sun,

Harry Golcher and His Limit.

tard fields in full flower, humming with bees from a hundred hives; and the steady, ordered wheel of the line of dogs and men—it is surely a form of shooting which can be despised only by those who have no ideals higher than a comfortable seat and a stream of birds overhead. That is by no means the as all September air should be; cabbages spilling rainpools over your boots, and dust from the stubble drying them in the next field; the scent of mus-

least admirable method of shooting partridges or pheasants either, regarded as a means of testing a man's capabilities of killing his birds quickly and well, but it does not fulfill quite all the conditions which to some of us make up the chief pleasure of shooting. A very well known shot has been heard to express the opinion that the finest kind of partridge shooting he could conceive was on a particular estate where the guns stood in a large grass field and birds ever coming from a fresh direction. That gave an opportunity for an extraordinary display of brilliant shooting, and shooting of that kind, too, is to be had when a large head of pheasants can be driven away from home and flushed so that they will fly high and fast to get back to it, if possible over a valley or dip in the ground. There is a wonderful zest which belongs peculiarly to those fortunate days when all goes well, when the partridges turn into grey balls of feather almost as the finger

his waders, and the sudden check of the tightened line, the bending rod, the screaming reel. Has the shooter anything quite like that? Is there, indeed, anything in shooting which is quite like the intoxicating excitement of playing a heavy fish in broken water, when you cannot tell what sort of hold you may have, and how far it is safe to press him? Of fishing to be had anywhere, the fight of five minutes or half an hour with a clean-run salmon must be the finest fight of all. But it is not necessarily the memory of the fight which is the insistent impression of an angler's pleasure. Beyond the tingling moments of the actual hooking and holding his fish, because he follows his craft only in autumn and winter, cannot hope to equal in variety and charm. Only the angler can call up vision after vision of mornings and evenings in May, changing from the blue upright to the white moth to entice the grossest and wisest from the tree roots of a trout

Sentiment all sportsmen feel—
Conserve the valley quail.

touches the trigger, and when the pheasants collapse with the complete inertness which shows the shot placed exactly right, and not, as on less happy days, just six inches wrong. These are moments to remember, no doubt; but there is somewhere a sameness about them, a lack of that chance and wildness which belongs to other days; to those rare and unforgettable occasions, for instance, when frost, or snow, or wind on other hills and in other valleys have filled one particular stretch of bogland with snipe. Of all birds that fly the snipe with the flash of his white breast in the wind, the zigzags he cuts in blue air, the glowing green and crimson of the mosses where he thrusts his bill, the long odds he offers you that he will not be at home when you want him, the wild chance that he may be there in hundreds, and the essential difficulty of killing him, is the bird which can add most to records of good fortune in shooting.

If those are a few of the memories which belong to the happy shooter, what is there for the fisherman? In some ways, surely, more. For the shooter may be so occupied with the actual use of his gun that he may find little else to see, and to carry away with him. But the fisherman can hardly help receiving on the retina of his brain picture after picture of life and motion in open air, visions of quiet waters in green fields, of tumbling falls, racing weirs, and sunlight changing on rock and tree and lake and woods. He may even now, perhaps, when the Scotch and other salmon rivers have opened for another season, and he, perhaps, cannot join the fortunate ones, be thinking of some of the sights and sounds of many seasons back. He will remember every rock, every ripple in every well-known pool; the dark water, clear as tea, rushing over the smooth grey and pink and slaty stones of the broken river bed; the spuming olive falls roaring down to a deep and brimming pool, of inky blackness; he will feel again the icy swirl of the current against

stream. He can remember long summer afternoons spent by the olive level of some broad water in which moved grand black bass; or fall days in whistling winds when the merry green barrel of a float dived to the pull of great pike, yellow flanked, sharp snouted, and of an infinite obstinacy. Twilight in autumn mornings when his tiny quill sailed in a ring over the eddies of a roach-swim; evenings when the thin painted cork, light and slender, ducked after the striped forms of fighting perch; winter noons when the cocked "pale olive" was sent floating over the carefully marked grayling; all those are his memories, of every month and every season and of every country. If they are to be compared with what the shooter's diary can hold of pleasure and disappointment, of failure and success, what is to be the decision? It cannot be final; it may readily enough vary with expectation or with satiety. The shooter who has laid aside his guns and has not yet felt the tug of his first spring salmon may well believe that he had better turn fisherman for the rest of his days. Six months hence he may be guessing at imaginary allowances for the twistiest of partridges. And perhaps he would enjoy neither sport quite so keenly if he had not the annual chance of contrasting it with the other.

COME TO STAY.

Since the Ellery Arms Co. have located at 48-52 Geary street, the fact has been made apparent daily to many sportsmen, that it is a most convenient thing to know that innumerable odd lines and pieces, small but important when you want them "right off" can be supplied off-hand by a sporting goods house that can fit you out "for Alaska or the tropics" without going outside for a single article.

In firearms, fishing tackle, outing goods, ammunition, etc., etc., as manufacturers and outfitters, we invite sportsmen to call and be convinced.

A COAST FIELD TRIAL IDYL.

Editor Breeder and Sportsman: Pursuant to your request, I write you concerning the history and progress of the field trial sport in California, and some of my recollections concerning the great dogs who have run at our trials. I had the pleasure of contributing an article to your initial number, and am pleased after the lapse of so many years to again contribute to your columns.

The Pacific Coast Field Trial Club was organized in August, 1883, in my offices at Sacramento, and since that time has never failed to give an annual trial, our next commencing January 23, 1911, being our twenty-eighth renewal. When compared with the subsequent trials, our first and second suffer some by comparison, chiefly because of some crudity in the judging and further because of the increased percentage of really good dogs among the starters.

The Pacific Coast Club is the second oldest in existence in America, the Eastern being the oldest, having been organized two years before ours. As a clean, manly, healthful, unselfish, outdoor sport, field trials has very few equals and no superiors. The sport has always been in the hands of generous, whole-souled, liberal, fraternal gentlemen, coming from all walks of life, and among whom manly, upright traits of character and considerate treatment of their fellows is the standard of judgment.

There has been produced in California more great setters and pointers, compared with the number bred, than any other state in America. We have produced two that won championship honors in the great trials on the other side of the Rockies, against the pick of the whole country, namely, the pointer Champion Senator P. and the English setter bitch, Peach Blossom. Mr. Terry's great dog, Champion Kilgariff, and his great bitch, Ladylike, also won honors in Eastern trials against large fields of competitors. Last year Mr. Considine's brilliant bitch, Kil's Viola, was placed in two different trials in the East. Mr. Terry's splendid bitch Linda also won a place at the Manitoba trials four years ago in a field of starters containing the best in America and Canada. Among the other truly great dogs whose performances have been confined to this coast I would name chronologically as they occur to my mind: Sweetheart, Sunlit, Sirius, Salina, Countess Noble, Betsy Mark, Harold, Point, Doctor Daniels, Champion Sam's Bow, Cuba of Kenwood, Cuha Jr., Peach Mark, Starlight, Terry's Lady, Rowena, Valiente, Kil's Blue Belle, Champion Belle Fontaine, Spot's Rip Rap, Shasta Queen, Schreiber's Lassie and Champion Petronella (pointer bitch). Many other fine dogs have competed and won, but these that I have enumerated, as nearly as recollection serves, complete the list of those in the "first flight."

That splendid sportsman, Mr. J. E. Terry, stands first, I think, among the winning owners. His dogs have won eight Derby stakes which is a world's

California club was never in such a healthy condition before, as now, and its next trials, to be held next month, promises to be as good as any ever given by the club.

It is with regret that I state that I am the only charter member remaining in the club, and it is with pleasure that I recount that I missed but one trial since its organization, by reason of being occupied by official duties which could not be neglected. Among the staunch, reliable, never failing present members of the club are W. S. Tevis and three sons, Lloyd, Lansing and Gordon; H. A. Jastro and F. E. Tegler of Bakersfield, J. E. Terry and F. J. Ruhstaller of Sacramento, J. W. Considine of Seattle, J. M. Kilgariff, S. Christianson, E. Courtney Ford (secretary-treasurer), Honorable Carroll Cook, William

Hon. Charles N. Post.

The Dean of the Pacific Coast Field Trial Sportsmen.

Schreiber and J. W. Flynn of San Francisco, A. A. Moore Jr. of Berkeley, H. L. Betten of Alameda, William Dormer of Oakland, J. H. Schumacher and W. G. Kerckhoff of Los Angeles, J. G. Roberts and Elmer Cox of Madera.

The future of the sport on this coast is very encouraging, as new and enthusiastic accessions to the ranks are being constantly received. The most fashionable and best lines of setter and pointer blood grace our kennels, and the fascination and friendly rivalry that each yearly contest produce among the trial contestants, seems to be taking a stronger hold on sportsmen as time goes by.

Wishing you the compliments of the approaching holiday season, and still greater success for your admirable and influential journal, I remain,

Sacramento, Cal.

C. N. POST.

THE NOTABLE WINNINGS OF 1910.

The shooters on the coast who are now enjoying duck and quail shooting can hardly appreciate the large number of lovers of the gun who have joined the trap shooting ranks throughout the Middle West and East where game has become scarce.

The promotion of trap shooting is being carried on and encouraged by the Interstate Association, members of which are the leading gun and ammunition manufacturers. Five handicap tournaments of national importance are given each year in five different sections of the country. The classic, as is known, is the Grand American Handicap.

It is the aim and desire of every trap shooter to win the Grand American Handicap, the national importance of which is greater than the Grand Prix held each year at Monte Carlo.

This year, the shooter to annex this honor was Mr. Riley Thompson of Missouri, making a perfect score by breaking 100 targets straight from the 18 yard mark.

It is a significant fact that this remarkable shooting was done with U. M. C. STEEL LINED SHELLS, also that U. M. C. STEEL LINED SHELLS were used by the winners of every Interstate Handicap during both 1909 and 1910. Fifty per cent of these handicaps were also won by amateurs using Remington guns. Thus THE UNION METALLIC CARTRIDGE COMPANY AND REMINGTON ARMS CO. can justly feel proud of the many victories won by amateurs using the U. M. C.-REMINGTON combination.

On the Pacific Coast there are probably more shooters using Remington guns than of any other make and U. M. C. STEEL LINED SHELLS have demonstrated their superiority by nearly every one who have used them. A neat booklet has just been published telling of the actual experiences of shooters in all parts of the world using Remington guns, which will be mailed to any one sending his name to J. G. Heatb, San Francisco, Sales Manager, 12 Geary street, San Francisco, Cal.

GOOD SPORT ON HUMANE LINES.

Editor of Breeder and Sportsman: Dear Sir—I have been asked to contribute a sketch for the Christmas number of your interesting and instructive paper and while I fully appreciate the compliment conferred, yet I feel so unequal to the task of doing any subject I may take in hand full justice that it is with reluctance, born of apprehension, that I make the attempt.

If I were competent to master my theme I would joyfully write and tell my fellow sportsmen of the United States, Canada and Mexico of the varied and many beauties and glories of California, but as I could at best only re-iterate what thousands of others have said before, and never hope to stand on the same plane with any but the most mediocre ones, I will regretfully confess, confine myself to a subject with which I am at least more familiar and try to forget for the time being the splendors that surround me on every hand by land and by sea, by sky and air, by mountain and forest, by stream and raging torrent, and say and proclaim it aloud, that it is good to live in California.

During many years of constant wandering over the greater part of this entire continent and having always had a penchant for shooting, I naturally have noted and remembered, the different spots visited as regards the opportunities offered where one might find game shooting within a reasonable distance from the large centers of population. I must say that San Francisco and Los Angeles stand pre-eminently alone in that respect so far as duck shooting is concerned, especially when the duration of the open season is taken into consideration and while some seasons may, and do, favor certain localities even on the very best preserves to the detriment of others, yet the general average when summed up is something wonderful, after duly considering the number of guns on each of these artificial preserves, as well as the frequency of the shooting at any given spot. I have no figures at hand to even approximately arrive at the number of men who go shooting once or twice every week from San Francisco and Los Angeles and who do most of their work within 50 miles of these centers, but I am quite safe in saying that no two cities of equal population can approach such a turnout, and it is quite natural to infer that unless a remuneration in the way of bags is forthcoming, even the most ardent among this army of sportsmen would soon tire of the sport, for after all, there is a limit to even those who have the greatest amount of feu sacre among us.

Personally I am indebted beyond my power of reciprocation, to several gentlemen here and in Los Angeles for having invited me to their private grounds, and I take this opportunity of publicly thanking them for the many favors conferred, for after all it does not consist altogether in the shooting, but in the whole-soul camaraderie and hospitality with which a guest is received and treated that remain

Steady to Wing.

record for one owner, and I think with one exception, each Derby winner has been one of his own breeding.

Never in all the years of its existence has there been an intimation of unfair dealings between the club and its patrons, nor an imputation of bias or influenced decisions on the part of its judges.

While indulging in this retrospect, I cannot refrain from sadly referring to the splendid, lovable sportsman whom the grim reaper has taken from our ranks, but whose memory is still dear to the hearts of their confreres who remain. In that regretted list appears the names of Austin Sperry, Thomas Bennett, J. G. Edwards, Ike N. Aldrich, W. W. Van Arsdale, H. H. Briggs, P. D. Linville, H. C. Chipman, R. T. Vandervort, Gen. G. B. Cosby, Ramon Wilson, George Crocker, Fred W. Webster, Henry Borgwort, E. C. Lechner, Frank H. Jermy and Will A. Houghton.

Among the non-resident gentlemen who have served as judges at our trials are some of the most prominent patrons of the sport in the world, having judged field trials from Manitoba all down the circuit to Mississippi, among whom were Thomas Johnson of Winnipeg, Manitoba; Col. Arthur Merriman of Memphis, Tennessee; C. W. Wilson of Pittsburgh, Pennsylvania; W. J. Baughn of Ridgville, Indiana; H. C. Humphrey of Indianapolis, and Frank Satterthwaite of New Jersey.

The popularity and progress of this delightful sport is shown by the fact that while there were but two clubs in existence in America when ours was organized, there are now about thirty such organizations, all holding successful trials annually. The

Point Judge!

fixed on his heart and mind long after all counts of game heads haggard have vanished from his memory. And while on this subject I must cheerfully and thankfully include one of the most thorough sportsmen of Portland, Oregon, to whom I am indebted for the very best duck shooting I have seen in many, many years. All I can say, and devoutly hope, is that these men, who rate another on his merits rather than by the size of his purse, may live many years to enjoy their favorite pastime in which they excel and to dispense the hospitality with such prodigal hands that none but the basest ingrate could ever forget them.

The marked change that has come over the advance guard of today's sportsmen in the way of guns, is quite remarkable, for while some years ago the old trusty 10 bore was the duly recognized duck gun, today we see a very large proportion of 16s and even 20s doing such excellent work that it seems like crushing a butterfly on a wheel to go to wider gauges. In Los Angeles where no guns other than double barrels are used—all others being barred at the duck preserves—we see men pulling down such tall ducks with these small bores that it really is a treat to behold, and while the gauge of a man's gun has nothing to do with his character, yet of one thing we may all be certain, and that is, that no game butcher has ever been known to advocate the use of a small bore gun, for with it he cannot shoot fast enough, nor cover so much space as he could with large clouds of shot poured in a stream after each fleeting bird. Laws can be passed limiting the number of birds a man may bag in one day, but no

law has so far been made that will limit the number he may cripple, and there's the pity of it all, for it is a most distressing sight to see birds shot at such ranges that if hit at all a wound is the inevitable result, when the innocent victim must linger and die of starvation, or be mercifully killed by some animal more humane than the man who wantonly injured it.

In California, as in all the other States, game is not so abundant as it was years ago, therefore the more need there is of greater protection and one way to protect game is to avoid shooting at such distances as only chance kills can be made. To hear the fusillade that is poured into a flock of ducks so high in the air that nothing but the merest acci-

RIFLE SHOOTING IN UNIVERSITIES AND COLLEGES.

In spite of the efforts of the National Board for the Promotion of Rifle Practice, a Board created by an Act of Congress for the purpose of promoting rifle shooting among the citizens of the United States, and the National Rifle Association of America, to promote and foster rifle practice among the colleges and universities, very little progress has been made toward making rifle shooting one of the recognized sports of our educational institutions.

The fact that there is very little of the spectacular to this game and that rifle matches do not attract spectators, the presence of which, undoubtedly en-

when baseball and rowing are the center of interest. As the college athletic bodies do not appropriate any funds for rifle team expenses, the cost of attending the competitions must come out of the pockets of the individual members of the team.

Gallery work is a much simpler proposition from every standpoint. The ammunition is cheap, and there is seldom any difficulty in getting a place wherein to shoot and the work is all carried on at the home range.

The indoor work was begun in 1908 when the "Forest, Fish & Game Society of America" donated a trophy for the college teams to compete for. The first match was held in 1908 in New York City, and teams competed from Yale, Harvard, Columbia, Cornell and George Washington University, with Columbia the victor. The following year the conditions were changed so that the trophy could be competed for on home ranges. This brought in a lot of Western teams and the trophy went to the Pacific Coast by the victory of the State College of Washington. This year the trophy was brought back to the East by a victory of the Massachusetts Agricultural College. There were seventy-two college and university teams in the competition and scores were unusually high.

It is noticeable, with the exception of the Columbia University, that nearly all of the leading teams were from colleges having a military department. Neither Harvard or Princeton took part in the competition and Yale was twelfth on the list.

One of the features of this indoor shooting is the inter-collegiate league which was instituted with a great deal of success last winter. The conditions of the shooting in the league are the same as the championship match and those colleges entering teams in the league are at considerable advantage over those who do not, as it gives them several months of preliminary practice before the championship event is shot off.

This league shoot has brought about a discussion as to the fairness of having military and non-military colleges shooting on the same basis, and the Captain of the Columbia University Rifle Club (Mr. J. A. Baker, Jr.) has presented to the National Rifle Association a trophy to go to the team making the best record in the League matches from those representing colleges and universities not having military departments, so that the intercollegiate league for 1911 will have two trophies to compete for, in addition to silver medals to the members of the winning team and bronze medals to the members of the second team.

Circular letters have been sent to all of the colleges and universities of the country by the National Rifle Association with a view of organizing the intercollegiate league for the coming winter. Entries closed on December 1st and on that date the league schedule was arranged on the basis of the number of entries in.

Colleges that wish to enter the league series may do so by addressing Lieut. Albert S. Jones, Secretary, National Rifle Association of America, Hibbs Building, Washington, D. C.

A Gun Hospital.—Bill Price is the director-general at No. 636 Market street, San Francisco, where many local sportsmen send their guns for an overhauling. Guns are regularly shipped to Price from many Coast points—his reputation as an expert gunsmith and good sportsman is deservedly known and appreciated far and wide.

The Copper Kettle Club.—This sportsmen's club is located at No. 636 Market street—next to Price's gunshop. Bill hired a club room for the boys to get more room for himself. This is the only known club that uses four deuces in a double pedro pack—in counting points, each player invariably claims low, after every deal.

Mr. Gil Haliwell, the well known Boston terrier fancier, offers some high class puppies for sale. See announcement.

The Oldest Pigeon Shooting Club in the United States. Stege Grounds, 1910.

dent can kill one, is such a sad commentary on true sportsmanship, that one often wonders why men who at other times are kind hearted and charitable enough, should display barbarous traits, for it is just as cruel to take such chances, as it would be to stick pins in a bird and yet no one would think of doing that.

The small bore gun helps to teach a man to shoot straight and not to depend on a large volume of shot to bring down his quarry—not to the stream of lead that can be fired at it, something after the fashion of turning a hose on a yelping dog—and anything that serves to make better shots of us is naturally to be desired.

So, all in all, since our bag limits are getting smaller, game getting scarcer, let us hope craving for slaughter is lessening and we are gradually becoming content with fewer birds. Whether it is because we can't get more, or because we don't care for so many, matters but little, the fact remains that the small bore gun is educating men to steadier and more accurate holding and shooting, to say nothing of imparting a certain amount of satisfaction and pleasure, all of which make up a sum total greatly to be desired contributing as it does to the true meaning of the word sport.

A CHANGE WITH THE SELBY SMELTING & LEAD COMPANY.

It is with regret that we learn that one of our old friends, Mr. John B. Chace, has recently resigned as sales manager of the Selby Smelting & Lead Company of this city, in order that he might accept a very attractive offer from the Sperry Flour Company. His place is taken by Mr. William B. Stadtfeld, who has been with the Selby Company for many years, and with his thorough knowledge of the business and many friends in the trade should be very popular in his new capacity.

While this company, in addition to smelting and refining, exploits many lines, probably our readers know them best by their loaded shotgun cartridges which have been so popular with the shooters on the Coast for over twenty years. We understand their new "hanger" will be ready for distribution by the first of the year and look forward to it with interest.

F. G. Bills.

DU PONT HANGER.

One of the most artistic and neat hangers issued in recent years is the "Infallible" smokeless powder reminder issued by the Du Pont Powder Co., Wilmington, Del. The subject is one that appeals to a sportsman—a pair of mallards "jumping" from a tule-fringed "feeding hole," natural as life, a familiar episode that awakens a thrill with any devotee of the shotgun who has ever hunted mallard ducks. "Infallible" is absolutely waterproof. Best for trap and field shooting. The dense powder for shotguns.

Du Pont Smokeless is a bulk powder that for years past came out in the lead at every important trap shoot in the United States—1910 was no exception to the rule.

A Notable California Breeding.—Valverde Kennels' Champion V. Sapphire is the dam of Wellesbourne Jade, by Ch. Anfield Model. Jade is mentioned by Walter Reeves, of London, England, who judged at Philadelphia recently, as being one of the best he ever saw. "Had she been in coat," he said, "I would unhesitatingly have given her the special for best collie in the show." She beat the Westminster K. C. winners bitch and also the last Crystal Palace winning bitch.

Along the banks of the Pend Oreille river, bears are thick. From Clarke, Wash., northwest of Spokane, it is reported that 39 bears have been killed so far this season. The animals are not as fat as usual at this time of the year. Coons are reported to have made raids on the hen houses of farmers in that district with good effect, and that to eradicate them several old-fashioned coon hunting expeditions have been organized. Last week an even dozen coons were killed or captured in that section including a "possum," an animal unknown to the west. No one knows where it came from.

'Steard of attendin' chnrch,
Murdock went fishin' fer perch—
Of a Sunday.
His top fence rail perch
Broke short with a lurch.
Then, after a search,
He was buried fr'm the church—
Of a Monday.

A party of hunters, including A. L. Dunlap, E. Huckle, B. A. Bellnap, Bert Hoskins and father, have just returned from Huckleberry mountain, north of Spokane. Dunlap shot a large buck and thinking he was dead went to the deer, setting his gun down. With knife in hand he took hold of the buck's horns and as he did so the buck jumped to his feet and charged. Dunlap, on the upper hillside, grabbed his horns and pushed the huck down the hill far enough so he could get his gun. He shot again and killed the animal.

SMALL BORES AND SINGLE TRIGGERS.

The most prominent feature in connection with the gun proposition this fall lies in the fact that the demand for small bores has just about tripled. The present day sportsman is finding that he can take a 20 gauge, bored as we bore them and made as we make them and can do almost any kind of work under the sun which he may desire. He finds his ability to kill with this gun is equal to the 12 gauge. A good many sportsmen use the 20 gauge Smith gun at the trap and when it comes to field use there is simply nothing like it. The status of the case is this. We did not take a 16 gauge, cut it down a little and call it a 20 gauge, but we began at the foundation and built up. Of course this took a year and a half but when we got through with it we had a gun which was simply perfect in balance and superb in outline. The result has been most gratifying to the present day sportsman and we have been simply swamped with 20 gauge orders this fall although we made a very large stock to take care of what we supposed would be the natural increase in the business. It looks to us as if this proposition was going to make a new era in the double gun business.

As to the automatic ejector we simply wish to say that the demand for the Smith ejector has always been good. It never has been phenomenal but has been a steady growth and also a steady increase because of the great simplicity of this particular feature of our gun. You no doubt know the Smith ejector has less parts in it than the regular hammerless and we cannot imagine anything simpler than this.

As to the one-trigger we wish to say we tested this for three years in our factory before we allowed one to leave it. The mechanism is not dependent on friction, pneumatics or anything of that kind but is based on a purely mechanical principle and hence it must work and work every time. Page 26 of our catalog illustrates and fully describes this mechanism. It does exactly what we say it will and does it every time.

There are 3772 Hunter one-triggers in use today, each one guaranteed for five years, never doubles, never balks.

For a descriptive and artistically illustrated catalog mail request to the Hunter Arms Co., Fulton, N. Y.

THE PETERS CALENDAR FOR 1911.

A dog picture is about the only kind that appeals to shooters of all classes and in all sections of the country alike, and desiring to offer their friends throughout the United States and Canada a subject which will be thoroughly appreciated from Maine to California, The Peters Cartridge Company have prepared a calendar for the year 1911, the chief feature of which is a pair of English setters by the famous

artist, Muss-Arnolt. Both dogs are on a point, and the whole scene is so natural and familiar that it will recall to mind many a delightful day afield. A copy of the calendar will be sent as usual to any address upon receipt of ten cents in coin mailed to The Peters Cartridge Company, 608 Howard street, San Francisco; 98 Chambers street, New York; 321 Magazine street, New Orleans, or "Cincinnati, O."

Bloomshury Gladiator, acknowledged by expert fanciers to be one of the best bull terriers on the Coast, is, we understand, ready for a purchaser. It will be no mistake to buy this dog.

THE HIGHEST TRAP SHOOTING AVERAGE FOR 1910.

Trap shooting, which is a well-organized branch of American sport, is engaging more and more attention. There are many papers having departments devoted to this sport, while some few are given up almost wholly to the discussion of matters pertaining to it.

The American people have an inherent love for firearms, and have long been called a nation of sharpshooters. In the early days, the game supply of this country was thought inexhaustible, and the American pioneer depended upon his rifle largely for his daily sustenance. With the rapid growth of the country in population, the game has been gradually disappearing, which has necessitated laws for its regulation, and this has resulted in open and closed sea-

E. F. Forsgard.

sons for the shooting of game. To indulge himself in his favorite sport and to keep his muscles and eye in shooting trim, the resourceful follower of Nimrod established the sport of trap shooting.

For several years past, records have been kept of the scores made by regular shooters at the traps, and the winning of the high average for the year has been the goal of many an aspiring shooter. With the advent of the "registered tournament" idea, the records assumed a more authentic basis, and the winning of high average under registered tournament conditions received what may be considered as official sanction.

For the last two years the official high averages has been won by Charles G. Spencer, of St. Louis, with a Winchester repeating shotgun and Winchester factory loaded shells. This year the conditions governing this average were different and did not cover the shooting of as many targets as formerly, nor was it an entire year's shooting. While this official average was not won with Winchester guns or shells, the highest average for the year in registered tournaments was won with a Winchester repeating shotgun and Winchester factory loaded shells in the hands of E. F. Forsgard, of Waco, Texas, he having made the unprecedented average of 98 per cent for 4895 targets, which was a greater number of targets than figured in the official average; hence his performance is all the more creditable. Moreover, his shooting was done under all sorts of conditions and on all sorts of grounds; not always under the ideal conditions that existed at the Interstate tournaments.

A form of trap shooting that calls for the greatest skill and the best shooting equipment is the shooting at "doubles" and the winner of the official season's average for "doubles" is therefore worthy of great credit. This man is F. G. Bills, of Chicago, and his average was 90 per cent, made with a Winchester repeating shotgun and Winchester factory loaded shells.

Both Mr. Forsgard and Mr. Bills are prominent American trap shooters and have been among the leaders in this sport for some years. As they may confidently be expected to know something about guns and shells, their use and endorsement of Winchester guns and shells should carry great weight. Certainly their work, which has culminated in their winning the high averages above mentioned, shows they have skill of the highest order.

A POPULAR SPORTSMEN'S EMPORIUM.

The stock of Golcher Bros., No. 510 Market street, San Francisco, has the reputation among Coast sportsmen of being up to date in every line of sportsmen's requirements. The Clabrough gun has a most enviable reputation for the past 30 odd years as a field and duck gun and also as a trap gun, particularly on live birds, par excellence. The firm carries all standard makes of fire arms and ammunition. Their stock of fishing tackle can not be excelled west of New York. Every line of outing goods and a line of innumerable sundries go to make up a long established business that has always been in the front rank with sportsmen.

Drink Jackson's Napa Soda.

JOTTINGS.

THE MOST MONEY paid for a trotting horse this season is \$20,000 which is reported to have been paid Mr. W. E. D. Stokes, proprietor of Patchen Wilkes Farm, Lexington, Kentucky, for his world's champion filly Miss Stokes, holder of the best record ever made by a yearling trotter, 2:19¼, and also holder of a two-year-old record of 2:09¼ made this year. Lon McDonald, the well known trainer, negotiated the purchase, and he is said to have been acting for David M. Look, a New York millionaire merchant. When it is considered that Miss Stokes is the greatest colt trotter of the age, inasmuch as she broke all records as a yearling and then trained on to a record better than 2:10 as a two-year-old, and is now engaged in thousands of dollars worth of stakes to be trotted by the three-year-olds of 1911, the price paid for her is within reason. Should she be able to win three or four of her best engagements next year she will not have cost her new owner much as she will be able to win all or nearly all he paid for her. She is a daughter of Mr. Stokes' great stallion Peter the Great 2:07¼ and her dam is Tillie Thompson by Guy Wilkes 2:15¼, second dam Eva by Sultan and third dam Minnehaha, dam of the great Beautiful Bells, and herself the dam of eight standard trotters. Eva is nearly a full sister to Beautiful Bells as Sultan, her sire, is a son of The Moor, sire of Beautiful Bells. Tillie Thompson is registered in Vol. 16 and it is there stated that she was bred by Patchen Wilkes Farm. Eva was bred by the late J. W. Mackay of Virginia City, one of the founders of the Postal Telegraph Company and a member of the firm of Flood & Mackay of the old Comstock bonanza days. Miss Stokes has been a sensational trotter from the first and when she was being broke by Ed Willis, the colored trainer of Mr. Stokes' farm, all those who saw her said she was a phenomenal trotter, and several said she was capable of taking the world's yearling record months before she was given the trial. After she trotted as a yearling in 1909, she was prepared for a faster mile in 1910, and while she got into the 2:10 list she was capable of a faster mile and it was said that 2:07 would not have been her limit had she been prepared and sent out to do her best. If she has no bad luck she will surely be one of the sensational three-year-olds of 1911.

"THEY CROSS WELL EITHER WAY" said the late Martin Carter to me one day when speaking of a combination of McKinney and Nutwood Wilkes blood that had proven successful in several instances, and since that breeder's death I have often thought of the remark he made. Martin Carter was probably the greatest practical student of pedigree in the trotting horse that California has produced since the late L. J. Rose. He was a man of wealth who had the time to devote to the study of breeding theories, and he was a practical man who knew that theory alone never accomplished much. He had bred Nutwood Wilkes 2:16½ and had faith in him, but he never permitted himself to believe that this son of Guy Wilkes was the acme of breeding.

"I don't know whether he will ever sire a two-minute performer," said he one day, "but some of his daughters and sons should produce two-minute record holders if they are mated with the proper sires and dams." No person on earth would have been better pleased than he over the mile in 1:59 made by Nutwood Wilkes' son, Copa de Oro, at Phoenix last November, even though he did not breed this great pacer. In 1908 Mr. Carter bred his pacing mare Georgia B. 2:12½ to McKinney and the result of this mating was Miss Georgia. The following year the late John M. Gardner, of Los Angeles, sent his McKinney mare My Miracle to Nutwood Wilkes and the result was Tidal Wave. It was when Miss Georgia was three and Tidal Wave two years old that Mr. Carter made the remark that the McKinney and Nutwood Wilkes blood crossed well "either way." They were both getting work in the hands of his trainer and he had seen them both show a two-minute clip. Since then Miss Georgia has taken a record of 2:08½ and Tidal Wave one of 2:06¼ pacing. Others that represent the blending of the blood of McKinney and Nutwood Wilkes are the great trotter San Francisco 2:07¼ now one of the principal stallions at Walnut Hall Farm. He is by Zombro, son

of McKinney out of a mare by Nutwood Wilkes. Then there is Lady Mowry 2:09¼ by McKinney out of a Nutwood Wilkes mare and many others that have not yet got into the 2:10 list but will.

But the colt that would have warmed the cockles of Martin Carter's heart is Wilbur Lou 2:19½, the world's champion colt trotter. He bred this precocious youngster and the colt has proved that the mating of Kinney Lou 2:07¾ and Louise Carter (3) 2:24 was no mistake. Wilbur Lou is by a son of McKinney and his dam is by a son of Nutwood Wilkes. He has the blood of Geo. Wilkes, Director and Nutwood in his veins, and these three sires, with Electioneer, were often referred to by Mr. Carter as "the big four" of trotting sires.

THERE IS A NOTE OF WARNING to the many horsemen in California who race their trotters and pacers for small purses at non-association tracks and get bars instead of records, in a case handed down by the Board of Review of the National Trotting Association at its last meeting. It seems that Frank Lang, of Barton, Vermont, owner of the mare King-

Star Pointer 1:59¼—Foaled 1889, Died 1910.

sey Girl had started her on a non-association track in races where time was not taken. Afterwards he raced the mare on association tracks and won with her. She was protested and in the investigation before the Board of Review it was learned that she started in slower classes at the regular meetings than the time she made in the races where the time was not taken. The Board ordered her owner to return the winnings for proper distribution. There have been several non-association meetings in this State in recent years where no time was taken or announced, and this has usually been done to avoid records or bars, but it is very dangerous business, as should a horse winning a race at such a meeting be protested at a regular meeting later on, the National or American Association would order an investigation and the testimony of reliable persons who were present when the time was suppressed would be taken and duly considered in the matter. It is far better for all driving clubs to race strictly according to rule, and to do this they should take out membership in one or the other parent associations.

RULE 57 READS: "When a race is made to go in harness it shall be construed to mean that the performance shall be to sulky." On an Eastern track last year in a harness race the horse that won pulled a cart and was duly protested. The Board of Review sustained the protest. Moral: Be sure your horse is hitched to a sulky next year if you want to retain the money you win, otherwise an order may be made on you to pay it back.

BUDD DOBLE makes the suggestion that California breeders who own young mares by his stallion Kinney Lou 2:07¾ will make no mistake in mating them with The Bondsman in the spring and when the foal comes they can say: "There is a foal by the sire of the world's champion three-year-old colt out a mare by the sire of the champion yearling colt." And outside of this fact why should not the cross be

an excellent one for speed of the early and extreme kind? The Bondsman belongs to the Baron Wilkes family which is now known from one end of the country to the other as the futurity winning family, while Kinney Lou is one of the brightest stars in the McKinney family. It has already been proven in the east that the blood of McKinney and Baron Wilkes makes a good mixture, and there is no reason why California breeders should not make a trial of it next season. There are some well bred daughters of Kinney Lou owned in this State and the opportunity to mate them with such a stallion as The Bondsman should not be overlooked. As The Bondsman is owned in Oregon, he may not be brought to California again after this year, and it is a long distance to send mares from here up to Hood River, where The Bondsman's future home will be.

OLD STAR POINTER 1:59¼, the first two-minute harness horse and the hero of many a hard fought battle in actual races and against the watch, died last week in Tennessee aged 21 years. It was on August 28th, 1897, at Readville, Massachusetts, when the big son of Brown Hal circled the track in 1:59¼, lowering the record of 2:00½ made by John R. Gentry the year before at Portland, Maine. Gentry was a trotting bred pacer, but Star Pointer belonged to the famous Hal family of Tennessee and many were the controversies that ensued between the theorists as to whether the pacing bred pacer or the trotting bred pacer was the faster and gamer horse. As a sire Star Pointer has since outranked John R. Gentry as he has eight 2:10 performers with records from 2:04½ to 2:09¼ while Gentry has but four with records from 2:08½ to 2:10. In the fall of 1905, Chas. De Ryder while on a trip east leased Star Pointer and brought him to Pleasanton, California, where he was kept in the stud until last spring when he was returned to his owner, who located him

in Tennessee. The first mare bred to Star Pointer in California was Grey Witch by Nutwood Wilkes, owned by the late Martin Carter. She was mated with the champion in October and dropped a filly the following September, 1906. Trix, that wonderful brood mare owned by James W. Marshall, of Dixon, was among the mares bred to the two-minute horse and the stallion Sirius Pointer (2) 2:18, that was such a close second to Jean Valjean last summer in 2:10, will doubtless give Star Pointer a 2:04 or better pacer in 1911. Grace Pointer, the three-year-old filly that won so many races for De Ryder over east this year taking a race record of 2:09¼, is another of Star Pointer's get, and Pointer Belle 2:17½ fastest two-year-old pacer of 1910, and winner of the Breeders' two-year-old futurity this year, is another.

Star Pointer was a grand looking big horse, standing 16 hands, and during his sojourn at Pleasanton would show all the fire of his youth when taken on the track for exercise. He has left quite a large family of young pacers here in California, nearly all from highly bred mares and they will make a lot of 2:10 pacing history during the next few years. Mr. James A. Murphy, who owned Star Pointer, has expressed his intention of having the stallion's remains prepared and presenting the same to the Chicago University. Taxidermists are now very skillful in the preparation of animals of all sizes, and mount them in a manner that is very life-like. As the first two-minute harness horse Star Pointer's skeleton would have a deep interest for naturalists as well as horsemen.

Horsemen who have visited Stockton this fall say the track there is one of the best in the State. Harvesting a crop or hay off it regularly during the last few years has improved it for racing over. Arrangements have been made however, by which it will not be plowed up this winter, but will be kept in shape for working horses on.

NOTES AND NEWS

A Merry Christmas and a Happy New Year.

May the season be one of prosperity to all our readers.

Start off right with the new year by making an entry in the Occident Stake.

There are five or six trains each way every day between San Francisco and Pleasanton.

There is about \$40,000 in sight for the three-year-old that can win all the big futurities next summer.

Mamie Redmond 2:19½ now one of the broodmares of Hemet Farm, is a full sister to John A. McKerron 2:04½.

Robert J. Wilson, of Springfield, Ohio, has already booked twenty-five mares to Nutwood Wilkes 2:16½ for next season.

Nancy Hanks 2:04, is not expected to produce another foal, as she is now in her 25th year and has been barren since 1907.

The stewards of the Grand Circuit will meet on the first Tuesday after the first Monday in January to arrange dates for 1911.

About the best advice to give new comers to the harness racing game is to study the rules of racing during the winter months.

Mack Thistle is the name of a full brother to Independence Boy 2:03½ that will be out next season and they say he is a hummer.

Dan Patch is the name of a champion Shire stallion that was recently sold for \$10,000. Perhaps there is something in a name after all.

Homer Davenport was a buyer at the Old Glory sale, of trotting bred brood mares. He will cross them with his Arabian stallions.

Colorado E. (3) 2:04½ won \$18,755 last season, and got first money in every race but the Kentucky Futurity, the richest of all the stakes.

The Great Western Circuit is out with its dates for 1911 and has hung up nearly a half million dollars for the trotters and pacers to race for.

The Grand Rapids \$10,000 purse next July will be for 2:12 trotters. As the meeting is early in the season the list of starters should be large.

Hugo Smith of Seattle has lost by death his good broodmare Lenmetta by Norcat. She was in foal to Blue Peter 2:16, son of Peter the Great.

Baron May 2:07½, the fastest of the get of Baron Wilkes is out of the Electioneer mare Nelly May, next dam old Lady Ellen by Carr's Mambrino.

Kinney Lou 2:07½ will make the season of 1911 at Hemet Stock Farm, birthplace of his world's champion yearling trotting son Wilbur Lou 2:19½.

Miss Jerusha 2:08½, one of Zombro's new 2:10 performers, is wintering well and will be out for the money again in 1911. Lou Childs has her at Spokane,

Columbus, Ohio, will give its two weeks' Grand Circuit-Great Western Circuit meeting again in 1911, with \$100,000 in purses and stakes to trot and pace for.

The principal part of this issue of the Breeder and Sportsman is devoted to shooting and fishing. The stallion number of this journal will be issued in February.

Mr. H. E. Armstrong of the Pleasanton Training Track, accompanied by Mrs. Armstrong, is visiting their former home at Cathlamet, Washington, during the holidays.

The New England trainer, Walter Cox, believes he has a crackerjack pacer in Capitola 2:12½, by Oratorio, and believes that he stands a good chance to win the C. of C.

Louise Carter (3) 2:24, dam of Wilbur Lou (1) 2:19½, is in foal to Geo. W. McKinney 2:14½, and will be again mated with Kinney Lou, sire of Wilbur Lou, in the spring.

The youngsters by Pricue Ansel at Woodland Stock Farm that are just now getting their first lessons are a very promising lot. They all seem to show speed as soon as bridle wise.

The six-beat race won by Demarest averages a quarter of a second slower than the six-heat race won by Spanish Queen, so the mare holds the record for that sort of a race.

Lou Dillon's two-year-old filly, full sister to Lou Billings (3) 2:08½ is to be bred to Justice Brooke (2) 2:09½ by Barongale 2:11½. Both will be three-year-olds in the spring.

Nine sons and daughters of Sidney Dillon entered the standard list this year. His percentage of new standard performers out of the number starting is probably as great as any sire.

The Occident stake closes January 1st. Remember, this stake is for foals of 1910 to trot in 1913. It costs \$10 to nominate. Make your entry with Secretary J. A. Filcher, Sacramento.

Kinney Lou 2:07½ has six new standard performers this year, which is a good showing for this son of McKinney, especially as the world's champion yearling colt trotter was one of them.

Dick Wilson is very sweet on the two-year-old filly Ruby Light 2:19½ by Aerolite 2:11½ out of Bertha, dam of five in 2:10. He expects her to make a good showing as a three-year-old next season.

Endurance, strength and speed are not developed by violent usage, but rather by prolonged and systematic exercise. Development is a slow process and is associated with perfect condition.

Trix, the dam of Mona Wilkes 2:03½, Moortrix 2:07½, Aerolite (3) 2:11½, etc., was bred to Demonio 2:11½ last spring and the resultant foal will be a full brother or sister to Mona Wilkes 2:03½.

We believe Carlotta Wilkes dam of Carlokin 2:07½ trotting, and Inferlotta 2:04½ and Mary Dillon 2:06½ pacing, is the only mare that has produced three with records below 2:08 that are not all pacers.

The Chicago sale was a big success and the prices were very good. A McKinney brought the highest figure, \$4600. A yearling sister to Zolock 2:05½ brought \$1000. The McKinneys averaged over \$700.

Silver Haw, the dam of Helen Stiles 2:09½ is expected to drop a foal by Alconda Jay in the spring. Her two-year-old by Bon Voyage is owned by Geo. Stickle, of Angel's Camp, and is said to be a fine prospect.

Don't miss naming your colt in the Occident Stake for foals of 1910, to trot as three-year-olds in 1913. Entries close January 1st with Secretary J. A. Filcher, of the California State Agricultural Society at Sacramento.

Walter Janvier, of New York City, purchased at the Old Glory sale for parties in Copenhagen, Denmark, the three-year-old trotting colt Cortella, trial 2:10½, by Todd 2:14½, dam Cortellene by Gambel (3) 2:30, son of Abdell 2:23.

The green pacing mare Sirena S. in Dick Wilson's string at Pleasanton, is by the Bondsman and out of Peek-a-boo, dam by Minor Eel, trial 2:08, the fast green pacer that was recently purchased by Geo. H. Estabrook of Denver.

East, west, north and south, from Maine to California, and from Oregon to Florida, they are all saying that the county fair is the hope of harness racing and that good harness racing will make the county fair a success.

There is little doing on the stadium track these days, the driving clubs having taken a vacation during the winter season, which up to this time has been very much like spring. However, rainy weather and muddy roads may be expected any time.

F. H. Holloway, superintendent of Hemet Stock Farm, and trainer and driver of the world's champion trotting yearling colt, was head trainer for the Chino Ranch many years ago when the stallion Woolsey by Electioneer was the premier sire there.

Dr. E. J. Weldon of Sacramento, owns one of the very handsomest trotting mares in California—Expedio (3) 2:14½, record made in the Occident stake this year in which she won second money. She is by F. E. Wright's handsome stallion Lijero 2:15½.

Alconda Jay should be well patronized this year. His colts now being broken are a grand lot of youngsters and will surely make a fine showing when raced. Alconda Jay represents the Baron Wilkes-Jay Bird cross, than which there has nothing better been produced thus far.

The average value of horses in the United States in 1900 was, according to the census of that year, \$44.61. Then the automobile came in use and after ten years the average value of the horses in this country is \$108.19. And yet we hear some people say the autos are destroying horse values.

Just before the horses owned by Geo. H. Estabrook were put on the train to go to Denver, Gus Macey made another purchase, buying the five-year-old pacer Pickles 2:11½, from A. E. Hundley & Son of Danville, Ky. Pickles is a bay mare by Bill Sayre, dam by Regal Wilkes. She was bred by Mr. Hundley, and during the season just closed was trained by Will Owings and showed a lot of speed.

A sale of pure bred Shire mares was held at the well known Truman farm, Bushnell, Illinois, last week and the handsome average of \$726 was made. The top price was \$2000 paid for the mare Coldham Surprise that was second in the aged class at the International Stock Show. She is six years old.

In Canada three days a week is the limit of a light-harness race-meeting, hence the ice carnivals in Montreal and Ottawa will commence on Thursday and end the following Thursday, Sunday and Monday being omitted. The same plan may be adopted at the meeting in Buffalo (Fort Erie track) next August.

Next year, under the existing rules of the parent trotting associations, no three-year-old can race in hobbles. After next year no four-year-old will be permitted to wear the straps in races. Two years after the hobbles are barred. Trainers should get rid of them now and be ready when the change comes.

The Riverside Driving Club usually holds a general business meeting some time during or near the holidays, and there will be a meeting held within a short time by the club. The lease on the track will expire on January 2, and the negotiations for a new lease will be one of the matters to come up at that meeting.

Among the 40 trotters which left New York for Europe on an outgoing steamship a few days ago were Teasel 2:06½, by Allan Downs; Bon Vivant (3) 2:10½, by Bon Voyage; Icelander 2:10½, by Red Heart; Arlissa 2:17½, by Red Medium; Effie Worthy 2:20, by Axworthy, and Bourbon McGregor 2:15½, by Robert McGregor.

Ed Geers is riding some merry miles at Memphis these days. That he has some pretty fair material for the slow stakes is evidenced by miles from 2:08 to 2:10 by several members of his stable, including Eva Cord (3) 2:23½ and Gordon Todd by Todd 2:14½. The Hugenot, own brother to The Abbot 2:03½ and The Abbe 2:04, is trotting miles around 2:13.

The members of the San Jose Driving Club met last week at the rooms of the Chamber of Commerce and elected officers for the coming year as follows: Joseph Kiernan, vice-president; W. D. Whitehead, second vice-president; J. Villar, third vice-president; J. J. Montevello, treasurer; E. W. McCracken, secretary; Frank Thomey, L. Hanks and H. Imhof, sergeants-at-arms.

Alex Davidson of Phoenix, Ariz. has sold to Al Russell of Minot, S. D., the two-year-old pacing filly Lillian Greene 2:24½, by Col. Greene, son of Zombro 2:11, dam Lillian Zolock, by Zolock 2:05½, granddam by St. Vincent 2:13½. This filly won two races at the recent Phoenix meeting and not only stepped a half-mile in one race in 1:06½, but paced an eighth in the same beat in 15 seconds.

As a rule the most valuable brood mares, that is, the ones most successful in producing trotters have been of medium size. There are exceptions, however. Miss Russell, one of the most valuable of all the great brood mares stood 16 hands. Beautiful Bells was 15-2 hands high; Green Mountain Maid 15 hands, Alma about 15.1, Estabella about 15 hands, Clara a little under 15 hands, and Minnehaha only 14.3.

The Peter the Greats brought the money at the Old Glory sale. Eva Tanguay (2) 2:16½, now three years old, brought \$4900; Melva J. 2:10½, \$2000; Petrovna (3) \$1250; Peter Ashland, yearling, \$1700; Twilight Maiden \$775; Alianza, yearling, \$750; King Peter 2:22½, lame, \$500; Bird Peter (2) lame and injured in cars, \$170. A total of \$11,375 for the six sound horses. A half sister to Peter the Great, also sold for \$2000.

Feeding horses as a commercial enterprise for market has become a great industry. Nearly all the agricultural experiment stations have conducted feeding operations and issued bulletins on the best compound rations for finishing thin horses for sale. In nearly every horse breeding community either the professional feeders or the general farmer who has a few surplus horses conduct special feeding operations as a financial enterprise.

The man who is not a good judge of horses and has no love for them, but is a judge of cows and likes dairying, will be more likely to make money in dairying than in raising horses. But the man who has a natural fondness for horses and is a good judge of horse stock will derive both pleasure and profit in breeding good horse stock provided he starts right, keeps his salls fairly trimmed and sells when he gets fair offers so as to prevent his stock from accumulating and becoming a burden.

In early closing stakes the initial fee should be made as light as possible. When a poor owner has three or four horses he wishes to enter, the tax comes heavy. Of course if he is well known secretaries may carry him along, but the inevitable pay day comes. The promoters of Futurities have found a nominal entrance at the start is the best, and it looks as if the same rule will apply in the early closing stakes. Make the initial payments as low as possible compatible with safety to the associations.

There is in training in Schuyler Walton's string at Fresno, a yearling colt by Athasham 2:09½ that is well staked and looks to be of stake class as he has been a quarter in 40 seconds, the last eighth in 19 seconds. This is a good showing for a yearling that was not trained any until October. Mr. D. L. Bachant, owner of Athasham, has two other yearlings that are showing good speed. There is no doubt that the Athasham colts will show up well in the near future.

A man goes to a race track at two o'clock, the time the races are announced to begin; he gets into the grand stand and buys a program; then he patiently waits for the horses. At 2:30 a man gets into the starter's stand and rings a bell, a few minutes later the horses come out for the first heat. A little later three men go to the judges' stand. The starter again rings the bell and the horses begin to score. About 3 o'clock the word "go" is given. The spectators have been kept an hour waiting for the sport. And then the managers wonder why the sport is not popular. Just stop and think.

The American Horse Breeder rightly says: "If proprietors of papers could realize the ridiculous light in which their publications are made to appear, by their incompetent reporters, who exaggerate the prices of noted horses that change hands, to at least four times the actual amount paid, they would not publish such absurd statements. They reflect seriously upon the judgment of the purchaser, and are a positive injury to the trotting breeding industry." The great trouble is that owners and others interested in the deals impose upon the reporters and get them to print absurd figures, thus thinking to boost the game.

Nearest McKinney 2:14¼ trial 2:11, although a horse with but very limited opportunities is beginning to be heard from as a sire of speed. His two-year-old One Better, has a record of 2:24¼ and a public trial of 2:14; Bahe McKinney, a two-year-old trial of 2:21; The Demon, a record of 2:29¼; Just Mac, a record of 2:24½, Jane a trial of 2:31 as a two-year-old and Dr. B. a trial of 2:27. As all these trials were made in public they are authentic. Nearest McKinney is a very handsome horse and is by McKinney 2:11¼ out of a mare by Nearest 2:22, brother to John A. McKerron 2:04½. He is owned by S. V. Barstow, San Jose.

The driving clubs at San Bernardino, Riverside and Hemet work together and there is the best of feeling between the members. At the meeting held at Hemet last June the three clubs cast lots for the dates of the various holidays of the year, on which to hold meets, in order to avoid conflicting with one another. Riverside drew Thanksgiving day, San Bernardino received Christmas Day and Hemet obtained New Year's day. Consequently, the horsemen associated with the three clubs will take part in the races at San Bernardino on Christmas and also be in evidence when the events are pulled off at Hemet a week later.

Kinney de Lopez, the remarkably fast young son of Kinney Lou 2:07¾, dam by that great race horse and sire Direct 2:05½, will make the season of 1911 at San Jose Driving Park, in charge of his owner, Mr. Budd Dohle. As Kinney de Lopez is a fast colt trotter, and his sire has sired the world's champion yearling colt trotter, and his dam is from a family of colt record holders, he can be expected to sire fast youngsters. He is one of the best formed trotters in California, and his gait is as near perfection as is ever attained by a trotting horse. Mr. Dohle will shortly make an official announcement in regard to the season to be made by Kinney de Lopez in the columns of the Breeder and Sportsman.

The sale of fifty head of Shire mares from the Bihler ranch held by Fred H. Chase last Monday evening was very successful. From \$250 to \$300 was the regular price obtained for every mare in the lot unless too young to work, or old or crippled. There were very few of these, but they brought the average down to a little over \$200. The principal buyer was the Coronado Beach Company of San Diego, this company buying seventeen head. The sale was a very successful one, buyers being numerous and prompt. Of the fifty head sold forty went to the country. These mares were not registered but were fairly well bred, although not very large. The sale shows that there is a good demand for work stock.

Some of the papers are starting anew the old controversy as to whether a driver has a right to lay up a heat. There is not a year passes but instances can be seen where drivers lose races and their own and the public's money by trying to win every heat. We know of one case where, after winning the first two heats of a race, being raced by a different horse each time, the driver found his horse very tired and was advised by the owner and all his friends to lay up the next heat unless he got off well. He was cut off at the start of the third heat, his horse made a break and was a hundred yards behind at the quarter pole when he got him back on his feet. He forgot about the advice he had received and started to try and win the heat and race. He made up a lot of ground, drove his horse as hard as he could and was beaten two lengths. After that his horse was all in and was distanced the next heat. Query: Did he throw away the owner's money and the public's money honestly or foolishly, or both?

GREATLY PLEASED WITH PHOENIX.

Chas. A. Durfee, who made such a successful campaign this year with Helen Stiles 2:09¾. Happy Dentist 2:05¾, and Dr. Leeco 2:11¼ is most enthusiastic in his praise of the management of the last meeting of the year, held at Phoenix, Arizona. In an interview with a representative of the Breeder and Sportsman the other day Mr. Durfee says they have a modern, up-to-date racing plant at Phoenix, with every convenience for the benefit of visiting horsemen, and also proper and comfortable accommodations for the public, who attend the meetings in large numbers. "It is my opinion," said Mr. Durfee, "that with a continuance of their principles and business methods as exemplified at their last meeting, they have the brightest future for success and prosperity. It was my pleasure to meet President H. E. Campbell, also Treasurer A. L. Moore and Commissioner E. R. Pirtle, not forgetting their live and energetic secretary Shirley Christy, all of whom I found among the very best I ever met in the business. If the directors and managers of the harness racing game in California would wake up and take a few lessons from the meetings held in neighboring States it would not be necessary for the owners here to go out of the State to campaign their horses. If \$3,000, \$5,000 and \$10,000 purses can be successfully given in Phoenix, Salem and Portland, the same can be done in California where we have the best climate and everything more favorable for racing than any State in the Union. All it requires is energetic work, and up-to-date business methods in the boards of control to again place the harness racing game in the front rank in California. I want to say, regarding Phoenix, that never at any place in my experience was more liberal and business-like treatment accorded the horsemen, and I can assure the management of the fair that it was certainly appreciated, and we will all be pleased to visit them again in the future."

PRESIDENT TAFT LOVES A GOOD HORSE.

President Taft was among the first subscribers to the recently organized Washington (D. C.) Riding Club, notwithstanding the fact that he was generally credited with not being favorably inclined toward horseback sport. When President Roosevelt made his exit from the White House word was passed around that Mr. Taft would take his daily airing in an automobile. But such is not the case.

The President has been a most enthusiastic horseback rider, and seldom fails to take his daily ride, which is considered the best exercise he could possibly take to preserve his health. Starrett, the President's favorite saddle horse, is a golden sorrel, standing 16 hands high and weighing 1280 pounds. This horse came from the vicinity of the Virginia Hot Springs.

Gen. Clarence R. Edwards, who accompanies the President on these rides, was on the lookout for just such a horse for many months, before he finally succeeded in securing the kind he most desired. There are two other fine riding horses in the White House stables—Tate and Greenhrier. They are also from Virginia and stand 16 hands high, weighing 1250 and 1300 pounds, respectively.

President Taft is greatly interested in the plan of holding horse carnivals throughout the country, and at the Washington horse carnival last December he was among the first to arrive and the last to leave the grounds.—Philadelphia Record.

WEBSTER RODE A MORGAN HORSE.

Here is an extract from a letter written in 1851 by Daniel Webster to his friend Mr. Blatchford:

"Morgan is here, and when I am in the saddle on his back, I am far from being motionless. The Morgan horse is a cross between a Normandy horse, now spread all over Canada, and the English blood horse; it has the sloping hip, and strong shoulder, and crooked hind leg, and broad shin of Normandy, with the spirit of the English hunter. Its chef d'œuvre is best performed in a single wagon. In two respects he resembles the Narragansett horse, to wit, he has a broad spread nostril, and great breadth between the eyes; the line from the top of his head along his mane and back to his hips is nearly straight; on a level road, therefore, his draught is parallel to the surface of the ground. Whereas a horse, who carries his head very high, though the ground be level, is constantly pulling up hill. So much for Morgan and a dissertation on horses. If you wish to see a perfectly graphic thing on such a subject, turn to Walter Scott's description of Lord Marmion's horse flying from Flodden Field."

Pacers that can heat 2:10 are as thick as fleas these days: Harrie Jones, of Rushville, Indiana, predicts he will have one of the fastest green pacers out in 1911 in the green mare, Mary Manners, that he trained the past season, and has in his stable at this time. With a limited amount of work in 1910, not expecting to race her, he worked her three miles in 2:10 with a last half in one of them in 1:01¾, a quarter in :30. She is one of the best mannered mares he says he ever drove. She goes free legged, wears nothing but a pair of quarter boots. She was sired by Gambrel 2:10, dam by Raven Wilkes 2:15¾, second dam by Baron Posey 2:21¼. She will be named in several of the big stakes in 1911.

Provide clean, dry heds and never allow a horse to lie on bare boards or stand in wet manure.

BOARD OF APPEALS, AMERICAN TROTTING ASSOCIATION.

In the proceedings of the Board of Appeals, American Trotting Association, which met in Chicago December 6th and 7th, 1910, the following cases of interest to Pacific Coast horsemen, were heard and decided:

No. 4514.—The American Trotting Association, Chicago, Ill., versus F. E. Burton and A. H. Scofield, San Francisco, Cal. Citation to appear, per order in case No. 4453.

At a meeting of the Board of Appeals in December, 1909, it was conclusively established that the horses "Ned Wilkes" and "Collis H." entered and driven in races by F. E. Burton and A. H. Scofield, of San Francisco, Cal., were each entered out of class and under names to which they were not entitled by virtue of former public performances, in short, that the horses were ringers so far as class, description, etc., were concerned.

Messrs. Burton and Scofield were cited to appear at the present meeting of the Board and show cause why they should not be penalized. They did not appear and made no answer or defense, and it was ordered that F. E. Burton of San Francisco, Cal., and A. H. Scofield of San Francisco, Cal., be expelled.

No. 4739.—E. A. Reichel, Great Falls, Montana, George W. Ford, Santa Ana, Cal., and F. B. Ward versus Jos. F. McGuire, Denver, Colo., Al. Russell, Minot, N. Dakota, and "Lee Crawford" and "Daybreak." Protested winnings, 2:10 trot, Boise, Idaho, October 13, 1910.

This was a case involving more money than any other case coming before the Board, as the horses protested "Lee Crawford" and "Daybreak" were winners of \$1,500 in the 2:10 trot at Boise, Idaho. The grounds of protest were that both horses were at the time of the race and less than ten days prior to the race, either wholly or partially in the ownership or control of Jos. F. McGuire, of Denver, Colo., but the evidence which was very thorough and complete conclusively showed that whereas until Sept. 19th, 1910, the horse "Lee Crawford" had been in charge and control of McGuire under a contract with the owner, the contract was that on that day transferred with the consent and written agreement of the owner to Al. Russell, who controlled, drove and started the horse from that date and accounted to the owner for his winnings, and that from that date Jos. McGuire had no control over him or interest in his winnings until he was returned to Denver late in the fall. Ordered, that the protest be overruled and moneys paid in accordance with the summary and decision of the judges of the race.

The death occurred in this city on Thursday last week, after a short illness, of William R. Van Keuren, who for years has been an efficient and respected member of the San Francisco police, being a corporal of that body at the time of his death. In his younger days in New York State, William Van Keuren was quite a prominent horseman and trained and drove in races at many of the county fairs in the northern part of that State. He had been a member of the San Francisco Police for about fifteen years, and for a long time handled the heavy wagon traffic coming on and off the Oakland creek route boats. He never lost his love for horses, and once owned the fast pacing mare Mattie B. 2:15 by Alex Button and matined her, afterwards breeding her to Searchlight and Ned McKinney. He was one of the most efficient officers on the force and was highly esteemed by all his associates. He leaves a wife, a son and daughter to mourn his loss. His death occurred at the family residence, 412 Cole street, and the funeral was largely attended.

Turbine, with twenty of the mares bred to him nominated in Pacific Breeders' Futurity No. 11, won third prize of \$35 for his owner, Mr. Reuben Clark of Monticello, Napa county. Turbine has been unknown to fame thus far, but his owner has pushed him out into the limelight by nominating in this stake a score of mares bred to his horse. Turbine was bred by Mr. A. B. Rodman of Woodland and is by Tube Rose 2:25 (son of Falrose 2:19 and Mischief by Brown Jug) dam Lady Armington by Anteeo 2:16½, second dam Abbotine by Abbottford, third dam Lena Bowles by Vick's Ethan Allen. The sire and dam of Turbine both trace directly to Electioneer in the sire line, and both to daughters of Williamson's Belmont in the female line, and there are crosses to Flaxtail, Nutwood, Geo. M. Patchen, A. W. Richmond, Woodford Mamhrino, Ethan Allen and other good sires.

Several men picked up good bargains at the Old Glory sale last week. One from the Maritime Provinces bought a two-year-old by Cochato (2:11½) for about \$500. A Kentucky horseman later in the week asked George W. Leavitt to see the purchaser of the Cochato and buy the animal if he could do so for \$700, and say to him that the offer would be held open six weeks provided the animal was all right at the end of that time. Mr. Leavitt complied with the request, but the purchaser smiled and said he had already refused an offer of \$800.

In the early care of the colt we must be careful to accomplish two things. We must keep him growing rapidly and we must be getting him used to being handled, so that when he is put to harness later he will have confidence in his master.

PACIFIC BREEDERS FUTURITY NO. 11

Tenth Renewal of This Stake Closed With 413 Mares Nominated.

Mares Bred to Carloklin 2:07½ Most Numerous and His Owner Gets First Prize of \$100.

A splendid showing has been made in the tenth renewal of Pacific Breeders' Futurity, otherwise known as stake No. 11. No less than 413 mares, mated with 114 stallions, have been nominated in this stake which has a guaranteed value of \$7250. Of this guaranteed amount \$250 is set aside as a sort of side stake to induce stallion owners to secure the nomination of an many mares as possible and it has worked well. The success of any stake depends on a large entry list and every reasonable inducement offered those who own mares or the stallions to which they were bred, to aid in swelling the list, generally gets results. Stallion owners are often entirely negligent of calls made on them to furnish lists of mares bred to their horses, that the owners may be solicited to nominate them in this stake, but when prizes are offered for the stallions best represented, the lists are more promptly furnished and owners of mares are therefore more easily reached by letters and circulars requesting them to make nominations in the stake.

Stake No. 8 of the Pacific Breeders' Futurity was the first of the series which had this added feature of premiums to stallion owners, and it received the largest number of nominations in the history of the stake, 416 mares being named.

A peculiar coincidence is that the stallions winning the first four prizes in stake No. 8 were represented by the same number of mares as the stallions winning the first four prizes in stake No. 11.

In stake No. 8, W. G. Durfee's stallion Del Coronado was first with 39 representatives, and in stake No. 11 Mrs. L. G. Bonfilio's stallion Carloklin is first with 39. Mr. W. A. Clark, Jr.'s stallion Bon Voyage was second in stake No. 8 with 22 representatives, and he gets second prize this year again with the same number. Expressive Mac won third prize in stake No. 8 with 20 of the mares bred to him nominated, and this year Turbine, a horse few horsemen will recognize as he is comparatively unknown, stands in third place also with 20 mares that were bred to him in 1910 nominated in the stake. Fourth prize went to Wallace's Strathway in stake No. 8 with 19 of his mares nominated, and this year F. E. Alley's young horse Bonaday gets fourth money with the same number. Kirkman's Stonewall was fifth in the stake for foals of 1908 with 18 mares, and Rush & Haile's Demonio sixth with 17 mares. In stake No. 11 Palite has the fifth prize with 17 mares, and Demonio again gets the sixth prize with 16 mares, against 17 that represented him in stake No. 8.

In addition to the six prize winning stallions this year, Dan Logan, Prince Ansel, Gen. J. B. Frisbie and Geo. W. McKinney are each represented by ten mares in the stake, Nearest McKinney by nine, Alconda Jay by eight, Jim Logan, Tom Smith, Bon McKinney, Best Policy and Palo King by seven, Copa de Oro, Red McK, and Zombroneer by six, Zombro, Iran Alto and Athasham by five, Black Hall, Lijero, G. Albert Mac, Zombro colt, Jules Verne and Nuristo by four each, while Ingoma, Montbaine, Kinney Lou, Robert Direct, Highland C., Prince McKinney, Ponderay, Cinco and Evergets are each represented by three mares.

Of the remaining 75 stallions that are represented in the stake twenty-five are represented by two mares and fifty by one each.

The six prize winning stallions are the following:

Stallion.	Owner.	Mares Nominated.	Prize.
Carloklin 2:07½	Mrs. L. G. Bonfilio	39	\$100
Bon Voyage 2:12¾	W. A. Clark, Jr.	22	50
Turbine	Reuben Clark	20	35
Bonaday 2:27½	F. E. Alley	19	25
Palite	E. D. Dudley	17	20
Demonio 2:11¼	Rush & Haile	16	20

Following is a complete list of the mares nominated in stake No. 11, with the names of their owners and names of stallions the mares were bred to in 1910:

Owner.	Mare.	Stallion Bred To.
J. Aker	Lily Ash by Derby Ash	Jim Logan.

Entries on Which Third Payments of \$5 Each Were Made December 1st, 1910.

R. E. Allen's Baroness Bonnie by Baron Wilkes, foal by Zombro.
D. L. Bachant's Maud Sears by Wayland W., foal by Athasham.
D. L. Bachant's Corinne Neilson by Clarence Wilkes, foal by Athasham.
Mrs. S. V. Barstow's Aunt Joe by Iran Alto, foal by Nearest McKinney.
Mrs. S. V. Barstow's Mrs. Weller by McKinney, foal by Alto Express.
C. B. Bigelow's Lucy B. by Alex. Button, foal by Prince Ansel.
J. N. Blair's Louise by Welcome, foal by Demonio.
I. L. Borden's La Belle Altamont by Altamont, foal by Barney Bernato.
Alex's Brown's Laurens by Mendocino, foal by Prince Ansel.
Alex Brown's Lottie by San Diego, foal by Prince Ansel.
Alex Brown's Arista by Nushagak, foal by Prince Ansel.
Frank H. Burke's Wanda by Eros, foal by Bon Voyage.
C. A. Canfield's Mamie Elizabeth by Red Regent, foal by Walter Barker.
C. A. Canfield's Chloe by Conifer, foal by Walter Barker.
C. A. Canfield's Dixie W. by Zolock, foal by Walter Barker.
J. M. Clark's Bird by Falrose, foal by Dirose.
J. M. Clark's Diabline by Diablo, foal by R. Ambush.
S. H. Cowell's Dione by Eros, foal by Kinney Lou.
S. H. Cowell's Charmion by Nutwood Wilkes, foal by Henry Nutwood.
L. B. Daniel's Dorothy Tenant by Clay, foal by Sir John S.
L. B. Daniel's Nocha by Nushagak, foal by On Voyage.
R. L. Draper's Lady Halpet by Gerome, foal by Copa de Oro.
Thos. J. Draid's Blancheward by Onward, foal by Alconda Jay.
E. D. Dudley's Bee Stirling by Flash, foal by Palite.

E. D. Dudley's Paprika by Oro Belmont, foal by Palite.
E. D. Dudley's Truth by Searchlight, foal by Carlokin.
John F. Heenan's Miss Valentine by Bayswater Wilkes, foal by De Oro.
I. L. Borden's Hester McKinney by McKinney, foal by Barney Barnato.
E. H. Nason's June by Athadon, foal by Silente.
T. S. Glide's Fannie G. by Nutwood Wilkes, foal by Aerolite.
T. S. Glide's Josephine by Nutwood Wilkes, foal by Palite.
H. H. Helman's Electress Wilkes by Nutwood Wilkes, foal by Alconda Jay.
H. H. Helman's Lady Mowry by McKinney, foal by Alconda Jay.
H. E. Coil's Director Maid by Director, foal by Iran Alto.
John Hogan's Sally M. by Rinaldo, foal by San Felipe.
John Hogan's Babe by Count Lionel, foal by Kinney De Lopez.
Hemet Stock Farm's Mamie Redmond by Nutwood Wilkes, foal by Geo. W. McKinney.
Hemet Stock Farm's Muriel C. by Nutwood Wilkes, foal by Geo. W. McKinney.
Hemet Stock Farm's Louise R. by Sterling McKinney, foal by Geo. W. McKinney.
Hemet Stock Farm's Lady Zombro by Zombro, foal by Geo. W. McKinney.
Hemet Stock Farm's Fiesta by Bob Mason, foal by Geo. W. McKinney.
W. J. Irvine's Ever Green by McKinney, foal by McKena.
M. C. Keefer's Nellie K. by Nutwood Wilkes, foal by Prince Ansel.
E. S. Knowlton's Lucy Hermit by Hermit, foal by Silk Cloud.
J. W. Marshall's Trix by Nutwood Wilkes, foal by Zolock.
J. W. Marshall's Ramona by Demonio, foal by Palite.
Ray Mead's Carrie B. by Alex. Button, foal by Kinney Lou.
W. J. Miller's Lulu Mc. by Arthur Wilkes, foal by Dan Logan.
J. E. Montgomery's Effie Logan by Durfee, foal by Zolock.
C. H. McFeeley's Diana by Diabect, foal by Bon Voyage.
Dana Perkins's Zaya by Baybird, foal by Stam B.
Dana Perkins's Princess Eulalie by Tom Benton, foal by Stam B.

James Rae, Jr.'s Much Better by Charles Derby, foal by Nearest McKinney.
Charles A. Biggs's The Blonde by Strathway, foal by Carlokin.
A. W. Schwartz's Lorenzo Girl by Monterey, foal by Iran Alto.
A. L. Scott's Cora by Ira, foal by Bon Voyage.
W. A. Shippee's Clara E. by Moses S., foal by Derby Direct.
C. A. Spencer's Noraine by Nushagak, foal by Prince Ansel.
John Suglian's Hazel Mac by Director, foal by Tom Smith.
L. H. Todhunter's Zombowette by Zombro, foal by Nobage.
L. H. Todhunter's Zombella by Zombro, foal by Nobage.
Vendome Farm's Eva B. by McKinney, foal by Nearest McKinney.
F. W. Wadham's Johanna Treat by Thos. Rysdyk, foal by Carlokin.
Geo. L. Warlow's Cora Wicksham by Junio, foal by Athadon.
Geo. L. Warlow's Narcola by Athadon, foal by Stanford McKinney.
Geo. L. Warlow's Soisette by Guy McKinney, foal by Stam B.
Geo. L. Warlow's Donnagene by Athadon, foal by Athadon.
G. W. Whitman's Violet by Abbottsford, Jr., foal by Star Pointer.
M. L. Woy's Cora Dell by Junio, foal by Tom Smith.
Wright & Donnelly's Iadora by Jas. Madison, foal by Tedd.
J. W. Zibbell's Kate Lumry by Shadeland Onward, foal by Tom Smith.

Lizzie Dillon, the filly by Sidney Dillon, owned by William Hogoboom and Chas. Bowman of Walla Walla was the undefeated three-year-old pacer of the northwest this year. After but six weeks work she paced the Walla Walla track in 2:11 last spring. The firm also owns the mare Rapidan Dillon 2:12 1/4 one of the best bred Sidney Dillon mares living that they purchased from Mr. J. H. Bohon, of Los Angeles, this summer. They will race her next year and then breed her to their stallion Prince Axworthy.

HEMET STOCK FARM.

The veteran horseman Budd Doble, who for several years has been a resident of San Jose, went down to Hemet Farm a few days ago and arranged for his stallion Kinney Lou 2:07½ to make the season of 1911 there. It was on the Hemet Farm that Kinney Lou's now famous yearling, Wilbur Lou 2:19½, was foaled, and Mr. W. F. Whittier, proprietor of the farm, has arranged with Doble for Kinney Lou to be bred to a number of the farm's best mares in the spring.

Mr. Doble says that Hemet Farm is as near a perfect stock farm as any place he ever saw, and he has seen all the principal breeding farms of the world. Green feed and water are both abundant, while the climate is unsurpassed anywhere. Think of cutting seven crops of alfalfa hay during one year from fields in which the horses are pastured part of the time. Yet this is done at Hemet Farm every year. The half mile track on the farm is one of the best appointed in the country and the stables neat, roomy and complete in every particular. Unlike most California breeding farms, the mares at Hemet all foal in specially prepared, clean, roomy box stalls, mare and foal getting every necessary attention. Mr. Doble was greatly pleased with Wilbur Lou, the champion yearling colt, and says he looks his greatness. He is a grandly made chestnut colt with star and left leg white half way to hock—in color and markings very much like Mr. Doble's fast green trotter Kinney de Lopez. The story of Wilbur Lou's training and naming is thus told by Mr. F. R. Holloway, Superintendent of Hemet Stock Farm, who trained and drove this world's champion to his record.

"Wilbur Lou was named after my only boy, Wilbur, and for the colt's sire, Kinney Lou. I buried my only boy on the first day of October and then shipped the colt to Phoenix. I had been up night and day for three weeks with my child, hence the colt was very short of work when he left Hemet, and was not up to a record-breaking mile when he started the first time. He had only been 12 miles in 2:20 and better and his first record mile was his sixth mile in 2:30 or better. Two of these miles he worked here at home over the half mile track and four at Phoenix. After he landed at Phoenix I worked him two slow workouts. The first time his best mile was in 2:35 and the next workout the fastest mile was in 2:34. The next workout I dropped him down and stepped him one mile in 2:26. His next work, three days later, was slow, then three days from that time I dropped him down again to a mile in 2:24½. Then his next work was slow again, and then it rained and he missed his work. He had to start on Monday and when Monday came I simply started for a good stiff jog work so as to get him ready for another trial later in the week, and consequently went to beat 2:30½ in order to drop him into the list, being afraid it might rain during the week and prevent his starting again. He went away slow, first eighth in 19 seconds, then he flattened out and reached the half in 1:12 and made the mile in 2:23 all alone, no prompter or anything to encourage him in the least.

"On Friday I started him against the stallion record for his age. Mr. William Duffee drove a prompter. We got away fast and stepped down to the half in 1:08½. He was going good and strong, but knowing how short he was in his work I was afraid he could not last and took him back, which was a mistake, for he finished strong in 2:19½. I know if I had let him alone he would have beaten Miss Stokes' mark by a good margin."

This is Mr. Holloway's own story of the training and marking of a champion, and his estimation of the colt is borne out by every horseman who saw Wilbur Lou's performance at Phoenix. It has been stated that Mr. Holloway is an amateur driver, but this is an error, as while he has not made a profession of race driving he has trained harness horses for twenty years. He was head trainer at Chino Ranch (the home of Woolsey, full brother to Sunol 2:08¼) in its palmy days, although he did not do the racing but stayed at home and developed the colts. He also worked colts for P. W. Hodges for a time, and has worked trotters for several other trainers and stock farms since. At present Mr. Holloway is a very busy man, as besides being superintendent of the Hemet Stock Farm, he is president of the board of trustees of the city of Hemet, president of the Hemet Driving Club and manager of the Hemet Livery Stables.

That fast trotting and handsome stallion Geo. W. McKinney 2:14½ is still the head of Hemet Farm and both Mr. Holloway and the farm's owner, Mr. Whittier, have great faith in him as a sire of speedy as well as handsome horses. Geo. W. McKinney got one new trotter in the list this year, Lena Lowe 2:25½, which makes five trotters and one pacer to his credit, the latter with a mark of 2:09¼, and until the last year or two he has absolutely no opportunities that could be called such. His colts out of all kinds of mares can all trot, and there are several that can enter the list at any time. They are breaking a hunch of his weanlings now that are out of good mares and they all show class. Mr. Holloway says they expect to have a good yearling by him in 1911.

There are some grandly bred mares on the farm, including Louise Carter (3) 2:24, the dam of Wilbur Lou, and the mare Mamie Redmond, that is a full sister to John A. McKernon 2:04½.

There are also young stallions by Geo. W. McKinney, Nutwood Wilkes, Bon Voyage and Kinney Lou out of first class mares, so the farm is well equipped in the best blood in the land.

THE BONDSMAN'S FASTEST PERFORMERS.

How the Dams Were Bred Whose Foals by Him Have Trotted in 2:10.

For those who like to study the blood lines of 2:10 trotters, we have prepared the following material pedigrees of the foals by The Bondsman that have records of 2:10 or better. The stallion Camera has no record but his trial mile in 2:10 was in public.

Colorado E. (3) 2:04¾.

(World's champion three-year-old trotter)

Dam, Flossie McGregor by Jay McGregor, son of Jay Hawker and a mare by Robert McGregor; second dam Black Bess by Wellington, son of Kentucky Prince and a mare by Etban Allen 43; third dam Strathliene 2d, by Strathmore, son of Hambletonian 10 and a mare by North American; fourth dam, Pathenie by Mambrino Patchen, son of Mambrino Chief and a thoroughbred mare by Gano.

The Plunger (4) 2:07½.

Dam Mary C. by Wilton, son of George Wilkes and a mare by Hambletonian 10; second dam Mary Brown by Egbert, son of Hambletonian 10 and a mare by Messenger Duroc; third dam Annie Brown by Ashland Chief, son of Mambrino Chief and a thoroughbred by Imp. Yorkshire fourth dam Mrs. Cluke by Pilot Walker, son of Capt. Walker, fifth dam, Cluke mare, untraced.

Grace Bond (3) 2:09¼.
(Winner Kentucky Derby)

Dam Grace Boyd by Ashland Wilkes, son of Red Wilkes, and Daisy B. by Administrator; second dam Oneida 2:17 by Florida, son of Hambletonian 10 and a mare by Volunteo; third dam Lady Ham by Mambrino, son of Edward Everett and a mare by Mambrino Chief; fourth dam Molly by Ashland, son of Mambrino Chief and a thoroughbred mare by Imp. Margrave; fifth dam by Mambrino Britton; sixth dam by Todhunter's Sir Wallace.

Vaughton 2:09¼.

Dam, mare by Valdemer, son of Harold and Vasar by Belmont 64; second dam untraced.

Camera, Trial 2:10.

Dam Lilly McGregor by Robert McGregor, son of Major Edsall and a mare by American Star; second dam Maggie M. by Alcyone, son of Geo. Wilkes and Alma Mater by Mambrino Patchen; third dam Lady Emma by John Dillard, son of Indian Chief and a mare by son of Jackson's Whip; fourth dam by Williams' Denmark.

MATINEE AT SAN JOSE.

Last Sunday was a bright, warm day and a good attendance enjoyed the matinee races at the Driving Park.

The feature of the day was the winning of the 2:25 pace by Henry Helman's three-year-old filly, Airfie D., by Demonio. This filly was only taken out of pasture four weeks ago, and although she had not been a mile in her work since better than 2:30, the ease with which she won the second heat in 2:22 gave the impression that she could have beaten 2:20 considerable if necessary to win. She has a nice way of going and is bred well enough to go fast, as she is by the great sire of pacers, Demonio, out of a mare by Prince Airlie, a well-bred son of Guy Wilkes, and next dam by the great Nutwood. If she meets with no bad luck she is quite liable to become another member of "2:10 Henry's" exclusive list of fast record performers.

The 2:20 pace furnished a hot contest between the pacer Lady San Jose and John Christensen. The roan trotter by Kinney Lou stepped both heats better than 2:20.

The next matinee will be held on New Year's Day, weather permitting. Summaries:

3:00 class, mixed.
Lady Patrone, b. m. Guidon (Patrone) 1 1
Miss Tuttle, ch. m. p. (Cuicello) 2 2
Up Lup, gr. g. (Parks) 4 3
Bonnie Alice, b. m. (Whitehead) 3 4
Time—2:39½, 2:42.

2:18 class, mixed.
Carrie B., b. m. p., Alex Button (Mead) 3 1
Sidmont, b. g. (Cuicello) 2 2
Kiss Kee Dee, b. g. (Ferri) 1 3
Time—2:29¾, 2:27½, 2:26½.

2:25 class, pace.
Arlie D. (3), b. f., Demonio (Helman) 1 1
Lady Rea, b. m. (Whitehead) 2 2
Judy C., blk. m. (Montevaldia) 3 3
Billy L., b. h. (Landers) 4 4
Time—2:25, 2:22.

2:20 class, mixed.
Lady San Jose, b. m. p. (Cuicello) 1 1
John Christensen, ro. g. t. (Theurkauf) 2 2
Ishmael, b. g. p. (Montgomery) 3 3
Princess Lou, blk. m. p. (Montevaldia) 4 4
Time—2:18½, 2:19.

"UNIVERSALLY USED."

Mr. M. Holleran of Albany, N. Y., states: "I have known of and used Quinn's Ointment for many years. It has given universal satisfaction and I cheerfully recommend it to all horsemen. Quinn's Ointment is universally used by leading breeders and horsemen throughout the United States." For curbs, splints, spavins, windpuffs and all blemishes, use Quinn's Ointment. If cannot obtain from Druggist, address W. E. EDDY & CO., Whitehall, N. Y. Price, \$1.00, delivered.

To groom the horse well after hard work does not only clean the skin, but it prevents various parasitic diseases of the skin.

A HIGH CLASS STALLION.

When breeders are looking for a horse to mate their mares with they should take more than one thing into consideration. It is all right, if you are in the racing game, to breed for speed alone, but if you cannot afford to discard all the foals that fail to show speed, regardless of price, then you should look for a stallion that has size, disposition, good conformation and good breeding, as well as speed, as no matter how good your mares are you cannot expect to get a majority of foals that will trot in 2:10. Among the stallions that will be in service in California in 1911 Lijero 2:15½ has as many good qualities as any horse we know of, and that he will prove one of the most successful sires in the State is a foregone conclusion. In the first place, as speed is always first with a breeder of trotters, he is a very fast race horse. He raced Helen Stiles to an eyelash in 2:11 at San Jose last August and about half the crowd thought he won the heat. He was right there again in 2:10¾ and after that invincible mare went north he won every race he started in getting a record of 2:15½ in a jog. In the second place he is a very handsome horse, of grand proportions, splendid size and one of the best gaited trotters living. In the third and last place he is most royally bred in lines from which he inherits these good qualities from several different sources. He is of the Electioneer line on his sire's side, being by that good 2:10 sire James Madison, he by Anteo, he by Electioneer. His dam Hilda, dam of three in the list, is by Nutwood, the greatest sire of broodmares that ever lived, his second dam is by Volunteer 55, a great sire, his third dam is by American Star, who sired the dam of Dexter 2:17¼ that champion of the old days, and his fourth dam is by a thoroughbred horse Wildair, son of Gray Messenger. There is no better blood than is shown in Lijero's pedigree. There is size, style, speed and good looks in every strain and this is the reason he has those qualities and can impart them to his get.

As a sire he has had but little opportunity in the stud thus far as he has been kept for his owner's own driving, and last year's three-year-old stake filly Expedito 2:14½ is one of his first crop of foals, of which there were only two. Her extreme beauty, fine proportions, yet great substance and power caused her to be the most admired three-year-old out last year, and her showing in the Occident Stake where she won second money and beat that fast colt Donasham 2:13¼ the third heat in 2:14½, was one of the features of the campaign of 1910. There are others of his foals as handsome as Expedito, in fact his get are all noted for beauty as well as size, substance and speed. By referring to our advertising columns the pedigree of Lijero will be found tabulated to the fourth remove. He will be in service at the low price of \$30 at Agricultural Park, Sacramento, during the season of 1911. Lijero is owned by that genial and popular horseman Frank E. Wright, whose address is 318 K street, Sacramento.

PROMISING YOUNG ZOMBRO FILLY.

Provo, Utah, December 1, 1910.

Mr. George T. Beckers, 3727 South Figueroa Street, Los Angeles, Cal.:

Dear Mr. Beckers: I hear you are back in sunny California again with the great Zombro. I remember that in the spring of 1909, when I delivered Baroness Bonnie, by Baron Wilkes, to you to be bred to Zombro, you expressed to me that you could hardly wait until this mare produced a colt from Zombro. How the time does fly. The result of the mating of Zombro and this mare is a beautiful filly that is the best trotter I have ever owned, though she is but nine months old; and she is going to be given the chance that her breeding and individuality merit. I have to-day shipped her to Gus Macey of Denver, with instructions to break and handle her, and if possible give her a mark of 2:30 or better next year, and get her ready for her two-year-old futurity engagements.

I shall always be interested in Zombro and his produce, and any time you know of anything sensational, let me hear from you.

Yours very truly,

R. E. ALLEN.

ANSWERS TO CORRESPONDENTS.

Geo. W. Fraser, Pinole.—Pole Star was sired by McKinney 2:11¼, dam Mountain Hare by Young Venture.

E. R. Holmes, Oakland.—The race won by Eric, bay gelding by Richard's Elector, at Petaluma in 1894 was a seven heat affair and the heats were in from 2:15½ made by Dudley in the first heat, to 2:20 the time of the last heat won by Eric. Baywood won two heats and was second every other heat but the first.

R. J. Kirk, Dinuba.—Your colt is not eligible to registration. If your McKinney mare is given a trotting record of 2:30 or better, or produces a foal that takes a record of 2:30 or better she can be registered and then any of her foals that are by registered trotters can be registered.

When the army stables of France were ventilated the mortality from glanders was reduced sixty per cent. The constant supply of fresh air was credited as the contributory agency in promoting the recovery of many of the equine patients afflicted with the malignant and contagious disease.

THE 'ROMANCE' OF THE ORLOFFS.

The story of the Orloff breed of trotters takes us back to those barbarous times, a hundred and thirty years ago, in Russian affairs when, by what was nothing but an ignominious coup d'état, the princess who became known as Catherine the Great was elevated to the throne of the Czars. It is a strange fact that it was on account of the events that transpired in connection therewith, and of the prominence obtained by one of the principals taking part in these affairs, that posterity became indebted for the Orloff trotter.

It was the poor idiotic Peter, who did not seem to have had a friend, who was so unceremoniously hustled out of the way to make way for the unscrupulous Princess Catherine. This was effected solely by the three individuals: Catherine's favorite attendant, the Princess Tarakanoff, who hatched the plot; Catherine's lover, Gregory Orloff, who swayed the military—and who was not slow to see the advantage to be derived by setting his mistress on the throne, and Alexis Orloff—the devoted brother to Gregory—who completed the work that made the new ruler at last feel that her crown rested securely on her brow.

It is with the latter, Alexis, we have to deal. We shall, therefore, as shortly as possible relate the three achievements that but for a horse would only have had interest to the historian of empires and states.

At a favorable moment Peter was seized and borne to prison. Catherine was dragged actually from her bed and bundled with her maid into the first hack that could be secured by the faithful Alexis. Picking up, on their way, Catherine's terrified hair-dresser—who imagined his mistress was being rushed to Siberian exile and not an imperial throne—the mean cortege proceeded under the escort of Alexis as secretly as possible. Reaching the city limits, it was handed over to the care of Gregory—apprehensive and solicitous for the safety and success of his soon to be imperial mistress and his coup. In this undignified manner Catherine entered the palace between dark and dawn, and thus ascended by the back stairs thereof the throne as Empress of all the Russias.

Peter was shortly afterward strangled to death by the inhuman grip of the iron hand of the terrible Alexis, who made the act a boast, as illustrating his powers of barbarous muscular strength. He could break iron bars over his bare arm as one might pipe stems.

For his part in this affair Alexis was ennobled. He was also made first admiral of the fleet, though he had never set foot on a ship in his life. But the wonderful ability of the man was conspicuously proved by that very fact. He was sent in 1772 on an expedition to destroy the maritime power of the Turks, which, with the assistance of his Scotch admirals, he most effectually did. He displayed, curiously, "chivalrous and magnanimous forbearance" toward the Turkish commodore, which the latter, on being restored, acknowledged in a very tangible manner.

Alexis received from his vanquished foe the gift of the Barb horse Smetanska. This animal became the progenitor of the two celebrated breeds of Orloffs—trotters and saddle horses. Smetanska's skeleton is preserved, "reverently," it is remarked, in the Orloff Museum today.

The wonderful powers of this horse were at the time, of course, unknown to Alexis. If they had, and he been so desirous of their possession, he would, it is imaginable, have thought it no wrong to have heaped himself to the animal without asking.

It will be seen how in the above the advent of Smetanska in Russia was a result of the equivocal relations existing between the occupants and escort of that common hack we have described as being driven under cover of night to the secret entrances of the palace on the eventful night of Russia's one coup d'état.

The third and last incident of Alexis' career which we here write down to further illustrate his character is even more horrible.

There was during these high-handed times living in Rome a young Princess, Anna Patronia, daughter of the late Empress Elizabeth by her favorite Razumoffshurg, whom she had married in a temporary fit of penitence. Now that Peter was surely out of the way this young Princess became a sudden disturber to the place of the great Catherine. What suggestion was more natural than the getting this Princess out of the way? Alexis was commissioned to carry out the scheme.

With the glory of his recent naval victories fresh in the minds of men he visited Rome. He was introduced to the helpless young Princess. Apparently each was smitten with "the charms of person" of the other; for both were described as being possessed of these in remarkable degrees. To make an intensely tragical story short, Alexis obtained the love of Anna, married her, carried her on board his ship and there handed her over to her murderer. Such was the terrible end to the "iridescent dream" of this sweet, innocent Princess! The bare, brutal truth is more remorseless than embellished fiction.

For this distinguished service to Catherine's state Alexis was further rewarded.

These personal incidents in the life of Alexis Orloff would have had no interest for us had he not been the only breeder in Russia who attained a fame as such outside his native country. On returning to his newly acquired possessions he settled down to a quiet life—to reap the reward of his "faith-

fulness" to his sovereign. His own acts gave him never a qualm; he excused them on the plea of "the exigencies of state." The noble house of Orloff and the noble race of equines of the same name still flourish.

Smetanska, from a Danish mare, got Volcan, who became the sire of Barss, also from a Danish mare.

Barss exhibited extraordinary trotting powers. All the modern trotters of Russia trace their descent to him and to daughters of Smetanska, out of English and Arah mares.

Count Orloff also obtained from England two sons of Eclipse, two sons of High Flyer, and the winners of the St. Leger in 1792 and of the Derby in 1794, Tartar and Doedalus; besides many others. It is curious that the country of Smetanska himself should have been overlooked in making these additions of stallions.

The race became a distinct type in about thirty years. Since that period all attempts to improve the breed by fresh blood in the male line has failed. But mares from various sources have been more successfully experimented with; and this explains negotiations of the former Czar with Senator Stanford for the interchange of a certain number of American trotting mares for Orloff stallions.

Count Alexis was most unwilling to sell any of his best sires. He provided in his will that none be disposed of after his death. It was not till 1845 that the prohibition was removed. The Government secured from his daughter and heiress the Krenowaya stud. Now it is calculated there are no fewer than sixteen hundred private studs in Russia, with six thousand stallions, from which the Orloff trotters are produced.

The trotting performances of these horses are remarkable, considering their environment. The best time on record does not seem to show the same progressiveness among them as among the American trotters, so far as speed is concerned. The Orloff do not seem to gain the perfection of their powers till they are eight or nine years old. They are large horses, generally of a brown color, the next commonest collar being gray, which color is on the increase; may be "imitating" the white-clad landscape. They are "fast," according to old-fashioned European notions, with a scooting action of the forelegs not very admirable to Western eyes. This peculiar action may be, however, particularly calculated for sledge driving. It does not appear that these horses at all come up to the mark which is required for a first class equipage either in London, Paris or New York.

It is likely that, under the existing conditions, the Orloffs have reached as high perfection as it is possible for them to attain. Sledge driving, long stakes and hard treatment seem to be their lot. For these purposes they have become remarkably fitted. Transportation will ever be mainly carried on in Russia by horses, hence the Orloffs fill a large place in the national economy. The Government has become interested in the protection of the breed from deterioration or spoilation.

One strain of American trotters exhibits a similar course of breeding to that which laid the foundation of the Orloffs through Barss above mentioned. We refer to the line descending from the American Andrew Jackson. He was by young Bashaw, by First Consul, by Grand Bashaw—imported from Tripoli by Mr. Joseph C. Morgan. Grand Bashaw and Smetanska were both Barbs.

Mr. H. C. Merwin, in his interesting "Road, Track and Stable," tells us that some years ago there was on exhibition at a State fair in central New York, near the former home of Henry Clay, an exhibition of Orloff trotters. Many farmers who saw these Russian horses protested at what they considered an imposition. "There are not foreign horses, they are nothing but Clays," was their criticism.—R. C. A. in Rider and Driver.

The veteran trainer and driver W. O. Foote, known on the Grand Circuit as the "Tall Texan," writes the Trotter and Pacer from Bonham, Texas, where he is now located, to the effect that he has bought the old fair grounds at that place and will convert it into a stock farm. He states that he has the best mile track in the State, and the best lot of colts that ever came into his hands. The head of his stud is the fashionably bred young stallion Governor Francis, who took a three-year-old record of 2:14½ and a seven-year-old record the past season of 2:08½. M. Foote believes that Governor Francis will trot in 2:05 or 2:06 next year, harring accidents. He contracted the mountain fever in going to Phoenix, Arizona, this fall, and was unfitted for racing, being so weak that he could not carry his clip. Mr. Foote adds that he may give a fair there next season.

Lady Maud C., by Chitwood and out of Noretta by Norris (the Nutwood-Electioneer combination) now holds her share of world's records. At the recent meeting held in Phoenix she won a dash race against Minor Heir and George Gano in 2:01½, which is the world's race record for pacing mares, displacing the 2:01¾, held jointly by Citation and Ecstacy. In addition to this record Lady Maud C. holds the half-mile track record of 2:05¾ for pacing mares and with her own brother Hedgewood Boy, holds the world's record of 2:02¾ to pole. Then she shares with The Broncho the honor of holding the world's record for a three-heat race by a pacing mare. In addition to that her record of 2:00½ against time is the best ever made by a pacing mare "out in the open," that is without a front runner or wind shield.

THE POLO PONY.

It costs money to get together a bunch of fairly good polo ponies. Like high class runners or first class trotters, the pony that will stand hard work and that has speed and racing sense is very hard to find.

"We have seen the whole process in India," says a writer in Bailey's Magazine. "When first played there a polo pony was country bred, quick, handy and very easy to ride. Tournament play found them out, and they were discovered to be shifty and cunning under pressure, and above all, unable to bear the strain of a fierce finish to a close match. They cost from 150 to 350 rupees.

Then came the Arabs, and they, too, had their day. They used to come up to us in trucks from Bombay at an average of 400 rupees apiece, and if one in ten became a tournament pony we were lucky. The periods of play were shortened, the length of matches contracted; but the standard of tournament play grew more and more exciting and the Arab had to go.

"The Arah never was a weight carrier; he is very apt to cross his legs and come down if hustled, and he has now been displaced in India by the Waler, the New Zealander and the English pony, at about 2500 rupees apiece. Now this is exactly in brief the process that has gone on in England, except that we do not need to import our ponies and are able to breed them for modern polo.

"The English polo pony has ousted his rivals, so greatly has he improved; he carries weight better, is faster and yet is a great deal better balanced and handier than he was, and he has practically displaced all others, the few first-class Americans and Argentines that survive being rather an evidence for than against the supremacy of the English pony. How much the English pony has improved may be seen from the fact that whereas at one time in first class tournaments Arabs, Argentines and Americans might be seen on equal terms with English ponies, now only a very few of the best of these herds can hold their own in first class polo.

"If now we go to analyze the principal sales of ponies that we know of during the last year we shall find that, excluding all ponies (and there were a good many) that fetched less than 50 pounds, we are able to trace 165 ponies which sold for an aggregate of 19,183 pounds, the average price being 116 pounds, 5 shillings. Of these ponies, fifty-eight brought to their sellers from 100 to 500 guineas, averaging a fraction over 206 pounds. Of the 165 ponies 107 were sold from 50 to 90 guineas, making a total of 7329 pounds, or an average of 68 pounds, 10 shillings for pony. Of all these ponies all but a very few were English or Irish, the American, Argentine and Arab ponies not amounting to 5 per cent of the whole.

"But it may be said that the prices in the first class were raised by the American purchases last year and by the demand for forty or fifty first-class ponies for the international matches. I do not think, however, these purchases made a great deal of difference or that the average price in any year for the best class of ponies would fall much below 200 guineas. The price of ponies is in no way enormously high, and unless the game falls off in popularity, of which, of course, there are no signs at present, the market prices of the three classes will probably not vary much from the present rates for some time to come."

A tapering shape of the head—that is, tapering towards the muzzle—is a most attractive feature and characterizes all well-bred horses, says an English exchange. It is particularly pronounced in thoroughbreds and in horses nearly so, as well as in the Arab. The profile of horses' heads varies considerably, and the way in which it is shaped, perhaps, more than any other point, imparts individuality to them. The line of the face, from forehead to muzzle, may be straight, or more or less so, or it may be dish-shaped somewhat; or there may be a curve to the other direction, imparting convexity to it, and when this last is at all marked we get the so-called Roman-noses. In some horses, further, the forehead is found to be prominent, it, so to speak, bulging out at the eyes and above them. That decidedly detracts from the appearance of the head, giving it a heavy look and spoiling its gracefulness of contour. Although a straight profile undoubtedly looks the best, a slight dishing of the nose is by no means objectionable, as it does not in the least impair the good shape of the head or its looks. Such a slightly dish-shaped face is to be seen in plenty of thoroughbreds. A Roman nose, or any tendency thereto, on the other hand, is not liked; at any rate, not in horses of light breed, because it does not look particularly well in them. It certainly imparts an unduly pronounced cast of feature, and a head of this kind seems to lack in refinement as compared with a straight or slightly concave profile. But, unpleasant though this feature is usually considered, it is widely held among horsemen that the fact of a horse being Roman-nosed is an indication that the animal is of a tough, strong constitution and good wearing sort. So far as regards English-bred horses there may be some truth in this theory, but it does not apply to the horses of foreign extraction which are imported in this country. These frequently have a Roman nose, yet such are, nevertheless, not found to be an exception to the rule that foreign-bred horses generally prove themselves more or less soft; at least, in regard to Continental breeds.

THE CHICAGO SALE.

Good prices were realized at the first day's sale the Chicago Horse Sale Company when Auctioneer George A. Bain sold 100 head of trotters and pacers, the majority of which were young horses. The offerings were for the main part in poor condition and not ready for the sale ring and the prices received, under these circumstances, were very satisfactory. The first horse sold was Klatawah (3) 2:05½, the holder of the world's record for three-year-olds, who changed owners for \$675, being purchased by M. J. Lane, Elwood, Ill. He was looking well for a fifteen-year-old horse and should be a good sire for many years to come. Although the prices received were not very large they were good considering the class of the offerings.

Acton, the fast unmarked son of Allerton 2:09¼, brought the top notch at the second day's sale, he being knocked down to Frank Lackey, Redmond, Ind., for \$1700. He is one of the fastest trotters ever gotten by his sire and a very handsome one. Glacier B. 2:15, record made this year over a half-mile track, brought the next best figure, \$900, being secured by E. J. Weil. Much better prices were realized than on the opening day as the quality was considerably higher.

Fifteen head of McKinnies brought a total of \$10,550 at the third day's sale, the average being slightly over \$700. The fast and beautifully bred three-year-old filly, Arona McKinney, brought the top price, \$1600, being knocked down to W. R. Cox of New Hampshire for a Boston patron. The next best price was \$1000 for Zell McKinney, a yearling out of Gazelle 2:11½ by Gossiper 2:14¾ and the dam of Zolock 2:05¼, Zephyr 2:07¼, etc.

Frank Caine of Galesburg, Ill., paid the top price on Thursday for the roan stallion, Merriman, an own brother to Codero (4) 2:09¾. Although he has no record, he is credited with a trial of 2:12½ and cost his new owner \$1000. The next best prices were paid for Wilber the Great and Farmer Spears, two and three-year-old stallions who each brought \$500. Very good prices were realized for the days offerings.

Good prices were received on Friday for the offerings on this day. The best price of the day was paid for the four-year-old trotting mare, Flashlight 2:19¾ by Red Medium, who was sold to Lu Green, Jr., for \$700. She is a beautifully bred mare as her dam was Dazzle by the former champion Stamboul; second dam the famous Lightning 2:11 by Alcantara. Her record was obtained in the fifth heat of a race over a half mile track and she was purchased by the owner of her sire.

Auctioneer George A. Bain sold 500 head during the five days auction of the Chicago Horse Sale Company in Dexter Park Pavilion, December 12th to 16th. The sale was the thirty-second one held by the company and good prices were received when the character and condition of the animals are taken into consideration. The feature consignment of the sale was that of the Empire City Farms, Cuba, N. Y., who sold fifteen three-year-olds and under for an average of over \$700. The best price received was \$4600 for Arona McKinney, the star of the Empire City lot. The company will hold its next sale the week of February 20, 1911.

The horses sold for \$300 or over during the five days were the following:

Maxine Elliott, bl. m. (5) by Tekmar 2:22¼; dam Jeffry by Ross Wilkes; Otto Zapel, Chicago, \$410
May C. 2:20¾ br. m. (6) by Guideway; dam Lottie McGregor by Robert McGregor 2:17½
W. J. Nelson, Litchfield, Ill. 300
The Delegate 2:24, b. h. (5) by In Fact 2:26¾; dam Taffeta 2:29¾ by Artisan 2:18¾. E. Corless, St. James, Minn. 410
Klatawah 2:05½, b. h. (15) by Steinway 2:25¾; dam Katie G. by Electioneer. M. J. Lane, Elwood, Ind. 675
Annie Allendale, br. f. (2) by Baron Dillon 2:12; dam Annie Banahan 2:16 by Moko. Melvin Fiske, Curlew, Iowa 450
Pastime, b. h. (4) by Oratorio 2:13; dam Zenda Wilkes by Guy Wilkes 2:15¾. P. H. Curley, Boston, Mass. 400
Glacier B. 2:15, bl. h. (10) by Bob Mac; dam L. E. W. by Clark Chief, Jr. E. J. Wiel, Chicago 900
Alation, ch. h. (8) by Allerton 2:09¼; dam Stray Moments 2:28¾, by Nutwood 2:18¾. Frank Lackey, Redmond, Ind. 1750
Momentous, b. m. (7) by Oratorio 2:13; dam Stray Moments 2:28¾ by Nutwood 2:18¾, H. B. Rhea, Pittsburg, Pa. 390
Ruth W. 2:20¾, br. m. (8) by Rex Princeton 2:17¾. John Williams, New Orleans, La. 325
Katherine Direct, ch. f. (3) by Rirect Hal 2:04¾; dam Kitty Powers 2:15¾ by Charleston 2:12¾. George P. Connell, Chicago, Ill. 330
Judge Phillips, br. h. (6) by Liberty Chimes 2:22½; dam Nelly Simmons by Simmons 2:28. W. J. Nelson, Litchfield, Ill. 375
Lady Rhea 2:20¾, gr. m. (7) by L. J. Sutton; dam Hattie B. by Don J. Robinson, L. Schneider, Chicago, Ill. 435
Director Moquette 2:25¾, br. h. (6) by Moquette (4) 2:10; dam Winnie Director by Director 2:17. W. B. Taylor, Sedalia, Mo. 300
Kobold, b. b. (6) by Grattan 2:13; dam Mamie Bell by Robert McGregor 2:17½. W. H. Chapin, Chippewa Falls, Wis. 310
Golden Girl 2:32½, b. m. (6) by Zombro 2:11; dam Amber by Confer. A. C. Pennock, Cleveland, Ohio 400

Pearl Pick 2:12¾, b. m. (6) by Silkwood 2:07; Cella Belmont by Allie Wilkes 2:15. Williams & Smith, Buffalo 320
Elated 2:23¼, b. g. (7) by Exalted 2:07¾; dam Kerana by Kennett 2:36. D. J. Fenelon, Ripon, Wis. 575
Arona McKinney (2) 2:27¾, br. f. (3) by McKinney 2:11¾; dam Barona by Baron Wilkes 2:18. Walter R. Cox, Manchester, N. H. 4600

Simetimes, br. g. (5) by Ferenzi Boy; dam Phallwood by Woodfield. C. Bean, Terre Haute, Ind. 475

Governor Horace White has sent a letter to the New York State Fair Commission congratulating it on the payment to the State of about \$70,000. The Governor in his letter offers several comments regarding the future of the fair. He says in part: "The object of the State Fair is not to make money but to serve as a great educational institution for the enlightenment and wholesome enjoyment of the people of the State. I do not underestimate the importance of conducting the fair in a careful, business-like way. But it seems to me that the results for the past year justify the commission in a somewhat more liberal policy for the future—liberal to its patrons and its exhibitors."

NEARLY A HALF MILLION DOLLARS.

The Great Western Harness Circuit Hangs Up Purses for 1911.

Chicago, Dec. 17th.—The Great Western Circuit for 1911 was organized here to-day and purses totaling \$456,000 will be given by the members. Fort Wayne and Terre Haute were dropped from the circuit, and Muskogee, Oklahoma, was taken into membership. It is the only half mile track on the entire circuit.

The schedule of meetings and the money offered makes the Great Western the biggest harness circuit ever organized, and is as follows:

Joliet, Ill., July 4th-8th, \$6000.
Decatur, Ill., July 10th-15th, \$12,000.
Grand Rapids, Mich., July 17th-22d, \$35,000.
Kalamazoo, Mich., July 24th-29th, \$40,000.
Detroit, Mich., July 31st-August 5th, \$40,000.
Cleveland, O., August 7th-12th, \$38,000.
Peoria, Ill., August 14th-19th, \$15,000.
Galesburg, Ill., August 21st-26th, \$15,000.
Joliet, Ill., August 28th-September 2d, \$10,000.
Hamlin, Minn., September 4th-9th, \$30,000.
Milwaukee, Wis., September 11th-16th, \$25,000.
Columbus O., September 18th-30th, \$100,000.
Springfield, Ill., October 2nd-7th, \$25,000.
Muskogee, Okla., October 9th-13th, \$10,000.
Dallas, Tex., October 16th-28th, \$20,000.
El Paso, Tex., October 30th-November 3d, \$10,000.
Phoenix, Ariz., November 6th-11th, \$25,000.

PATENT RIB HORSE SHOES.

There can be seen at the office of the Breeder and Sportsman samples of a new horse shoe invented and made by William O'Brien, of Woodland, who has sent us the following letter in regard to them:

Editor Breeder and Sportsman: Dear Sir—I am sending you a pair of my new Rib Horse Shoes that I thought would be of interest to you and the horsemen coming into your office. I have shod the trotter and runner for the past thirty-five years, and was with the Palo Alto stock farm as shoer under the late Charles Marvin, also with Oakwood Park stock farm at Danville, and in my day I have shod for all the great trainers and drivers. To the horse fraternity I am better known as "the daisy horseshoer" and have had the experience that few shoers ever get. I have worked for years to get a shoe that will do away with faulty gaits and have perfected what is known as the "Patent Rib Shoe," and one glance will show you that here is a shoe that the horsemen have been looking for, and can be used on the trotter, the work horse and the running horse. For the trotter this shoe does away with the grabs, square toes and the shoe filed on the side for speedy cutting, and has all these virtues in one shoe. It is so constructed that it fits the foot all around and still the trotter has the grab to hold. The rib is so constructed as to do away with scalping and forging, and has the roll that nature intended the horse should have when traveling, thus doing away with all the above faulty actions of the trotter. For the work horse they do away with the heavy toe calks and heel calks, also the rubber pad as the horse will not slip on pavements when wearing this shoe. The runner not only has the grab when wearing it, but the shoe will surely prevent speedy cutting and its construction is a great aid to the runners that are inclined to go down on their heels behind.

The shoes are made in weights from 1½ ounces up to any weight, and the horses that they have been used on seemed to travel like different animals.

Respectfully,

WILLIAM O'BRIEN,

"The Daisy" Horseshoer,
Woodland, Cal.

We invite horsemen to visit the Breeder and Sportsman office and inspect this new invention.

The trainer of today has the trotting colt handed to him by a breeder, so that his task is to shoe the colt so as to offset any faulty construction tending to make the colt hit himself when going at top speed, and to getting the colt into the proper physical condition to carry his speed not only one mile but several miles. The trainer has a task to accomplish the latter, for he has to compete with men as clever as himself and a colt has to be in rare physical condition to go two, three, four or perhaps five miles, at the speed necessary nowadays in order to win any of the great colt stakes.

WHAT WILL BE THE FUTURE FENCE POST?

With the great strides conservation of our natural resources is making, the question of fence posts plays a much more important part than one would at first think. You have noticed the destruction of sapplings and small trees as used for this purpose, and it seems only a question of time before some laws may be passed prohibiting the cutting of unmatured trees. With the many facilities now offered by publishers by the United States Government in recent issues and wire fence manufactures bulletins for the teaching of the construction or manufacture of concrete posts by the farmers themselves, it would seem they would be used more, but for farmers inexperienced in the manufacture of concrete and those not caring to make their own posts, the American Steel Post Company's patented Carbo Steel posts are gaining rapid favor as they are not so costly as concrete and last indefinitely. It would appear that all steel posts will be very largely used in the future as more attention is paid to the design, but we can at present see no chance for improvement in Carbo steel posts as manufactured by the Los Angeles concern.

THE FARM

BETTER DAIRY METHODS.

Cheap milk production should be the theme of every dairyman. The cow, the food and the care are the main channels to this end and all should be studied. Neglecting any one will mean loss. The cow should be a dairy animal and knowing that to keep her means expense, and net profits should come through her production over and above the cost of feed and care. The cow is the first and most important channel for milk production. It costs at the least from \$25 to \$35 to feed a cow one year and her care will cost close to \$25, making the total cost about \$60 and to reduce this without lowering the production means good feeding and care. The cow that produces 125 pounds of butterfat a year will return \$31.25 for butterfat at twenty-five cents a pound, \$8 for skim milk, \$5 for a calf and \$10 for fertilizer, making \$54.25 in total. Such a cow, it will be seen, can make little or no profit. The price of the calf is low, but it is quite the average for the country over and only purebred stock can make a better showing on values of calves. Such a cow would hardly cost \$30 to feed and no doubt her care would be less than \$25 a year, but the profit if any would be very small and her keeper would be doing very poor business. It may be said that it is not necessary to keep such cows and of course it is not, but we must remember that two-thirds of the cows of the country are of the 135-pound kind and so long as this is true, there is need for improvement. The feeding of the cow is neglected fully as much as the kind of cow and in nine cases out of ten the cow is underfed and not supplied for food necessary for her greatest profit. Good feeding means supplying the animal with required nutriment at the least possible cost. The roughage is of the most importance and should be produced on the farm. Alfalfa, silage and roots should be the principal crops of this kind and the manure from the yard will insure large yields. I consider the silo of the greatest importance in reducing the feed bill and this forage with alfalfa hay should make up at least two-thirds of the bulk of the feed given. For grain and mill stuff, the price should determine what feeds to choose and here a knowledge of feeding is required. In general corn, bran and oil-meal will be found the best and cheapest. The grain should be given in amounts consistent with the animal's ability to handle the food. In general they should have what they will eat up clean and not gain in body weight. A dairy cow should not be fattened, although she should be kept in good condition. Here in the west milk can be produced more cheaply than in any other section of our country, but I am free to say I believe it is not being so produced principally because it is made a side issue and does not receive the care and study required to make it pay. With business methods, applied to dairying and study given the cow, her feed and care, the land of alfalfa, beans and grain can produce milk at the lowest cost and greatest profit. There are two great fields in which our dairy-men can make improvement—to raise the annual production of our cows and to improve the quality of products. Perhaps the most important is the first and could the annual product of the American cow be advanced a few pounds of butter per annum, it would bring a vast fortune to our producers. This improvement is going on rapidly and promises to accomplish much in the next few years. Better care of the stock we now have would increase the annual production thirty per cent and this wise selection of the young would in a short time double the output.—A. L. Halker in Field and Farm.

"I would put into each district school in the State apparatus for testing the germination of seed corn and a Babcock test for milk," said Dean H. L. Russell of the College of Agriculture of the University of Wisconsin, addressing the State Teachers' Association at Milwaukee last week. "The primary trouble with agricultural teaching in rural schools is not the subject matter but the way in which the subject is presented. The teacher too frequently has not absorbing interest or sympathy with the subject and fails to arouse the interest of the boys and girls who have more practical knowledge about agriculture than the teacher is able to impart. "Bring the boys and girls into contact with something in terms of their common every day life. In February or March have the students bring samples of seed corn and test out each sample after having made a general study of corn seed. Simple methods of testing seed corn have been universally successful in arousing the active interest and co-operation of young people. The college of agriculture in 1908 conducted 20 young people's grain growing contests and over 3000 young people received pure seed. In 1910, 50 contests were held and seed was distributed to about 20,000 young people. "I would have every rural teacher trained in the operation of the Babcock milk test, and have her secure through the scholars samples of milk from each of the cows represented in the herds of the parents. The testing of herd samples as done at the local creamery or factory is of little value compared to the testing of the yield of the individual cow. Securing data on the weight of the product, together with the per cent of butter fat, enables the farmer to compute whether the animal is profitable or otherwise. Children of 10 to 12 years are intensely interested in practical things if they can be allowed to do something in connection with this work. "In my judgment, if every rural child could be taught these fundamental principles, it would invest the subject of agriculture with a dignity which does not now obtain, and would do more to keep some of the bright boys and girls interested in the further developing of farming than anything else."

The right way to make beef at the least cost and most profit to the producer, says J. W. Ingham, is to keep the animals growing rapidly and constantly all the time from birth until a year to fifteen months old, and then send them to market. They should bring more per pound than older heaves because better. Veal (the flesh of calves from six to eight weeks old) brings more than any other fresh meat in market, unless it be "pot house lambs," and there is no good reason why the flesh of yearlings should not bring more than the patriarchal beef of the oxen and superannuated cows.

For Sale

THE BLONDE 2:20

trotting race record

Sister to Strathmont 2:12½, pacing race record, by Strathway; dam by Altamont.

BAY WEANLING FILLY

by Carloklin 2:07½; dam The Blonde 2:20. Entered in Stakes. Out of her seven dams in three generations of tabulation, five are Great Brood mares, another has record of 2:20 and the other is grandam of two in 2:20.

SAFE FOR ANYONE TO USE.

NOTHING BUT GOOD RESULTS.

Have used GOMBAULT'S CAUSTIC BALSAM for more than 20 years. It is the best blister I have ever tried. I have used it in hundreds of cases with best results. It is perfectly safe for the most inexperienced person to use. This is the largest breeding establishment of trotting horses in the world, and use your blister often.—W. H. RAYBOND, Prop. Belmont Park Stock Farm, Belmont Park, Mont.

We guarantee that one tablespoonful of Caustic Balsam will produce more actual results than a whole bottle of any liniment or spavin mixture ever made. Every bottle sold is warranted to give satisfaction. Write for testimonials showing what the most prominent horsemen say of it. Price, \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use.

WOODLAND CREAMERY ANNUAL REPORT.

The annual meeting of the stockholders of the Woodland Creamery was held last week, with a good representation present. The real business of the meeting was the consideration of Secretary Musgrove's report which shows the corporation to be in a very healthy condition.

The election of officers resulted in no change from the present official representation. H. E. Coll will again be the president; Syl Lawson, the vice-president, with E. S. Farnham, D. Farnham, J. H. Harlan, H. L. Button and T. B. Gibson as directors. Following is the secretary's report:

Woodland, Cal., Dec. 10, 1910.
To the Directors and Stockholders of the Woodland Creamery:

Gentlemen:—As your secretary I beg leave to submit this, my third annual report, covering a period from December 1, 1909, to December 1, 1910. During the last fiscal year there has been received at the Creamery 1,225,428 pounds of cream, with an average test of 32.9 per cent, making a total of 403,335 pounds of butter fat received for the twelve months.

Starting with a balance of \$1880.92 at the close of last year's business the books show as follows:

The following disbursements have been made during the year.

To 8 per cent dividend paid Dec. 15, 1909, \$792.00.

To expenses for year \$15,465.44.

To patrons \$130,955.03.

The past year has been a very good one for the creamery. Business has been very prosperous. To your patrons you have paid as high, if not the highest, price, 34 cents, of any creamery doing business in this part of the State and to your stockholders you will pay a dividend of 7 per cent net on their holdings.

During the year you have added to your equipment one new Wizard ripener, one Pasteurizer (Farrington), and one new starter can (Victor), all of the best makes, besides having painted the creamery inside and out and keeping up all the necessary repairs on the plant. There are no debts outstanding other than the regular monthly bills for November, which are included in this report and the city taxes. County taxes for this year are paid and also is all insurance.

During the year 62.7 drums of fuel oil were sold at a profit of \$1.00 per drum besides other items that go to make up the amount of the stockholders' fund, thus allowing you to pay a dividend without taking a cent from the price of the butter of the patrons.

During the past year all bills and expenditures have been carefully examined by the directors and they have been untiring in their efforts to make the creamery the success that it has been. All the employees, both in the creamery and on the wagons, have given good and efficient service that has gone far to make a successful year.

It is to be regretted that the dairymen of Woodland and the surrounding country are not more loyal toward this local enterprise. The Woodland Creamery, ever since I have been connected with it, now about eight years has never failed to pay a better price than outside concerns, has given a

fairer test and has always treated its patrons fairly, but yet a portion of the dairymen seem to think that it is better to patronize some concern from the outside, apparently overlooking the position in which they would be placed were it not for the fact that your local concern is the price maker, and all other creameries here figure on what you pay.

Were it possible to have all the cream produced in this section made up at your creamery the price of making could be reduced as the output increased and the benefit would go to the patron, but it is hard to convince some people that this is the case. They seem rather inclined to believe that cutthroat competition is their only salvation and fail to see that they are working against their own best interests, instead of trying to get in new enterprises of unknown value it would be far better to see and give loyal support to that which all know is good. Respectfully submitted,

J. D. MUSGROVE.

An investigation at the Iowa Experiment Station to discover the influence of the age of sows upon their prolificacy and the weight and growth of the pigs they produced gave some interesting results. It was found, for example, that fifteen sows bred at eight or nine months averaged seven and two-thirds pigs per litter, while 14 sows about 24 months old averaged nine and six-tenths pigs per litter, and aged sows averaged ten and six-tenths per litter. Pigs from the younger sows weighed on an average 2:39 pounds per pig; from the two-year-old sows 2:63, and from the aged sows 2:61 pounds. When about six weeks old the pigs from the young sows made an average daily gain of .32 pounds, while the pigs from the two-year-old sows gained .40 pounds. No data is given on the gain of the pigs from the aged sows.

DIVIDEND NOTICE.

THE GERMAN SAVINGS AND LOAN SOCIETY (The German Bank), (member of the Associated Savings Banks of San Francisco), 526 California street, Mission Branch, 2572 Mission street, near 22nd; Richmond District Branch, 432 Clement street, between 5th and 6th avenues.

For the half year ending December 31, 1910, a dividend has been declared at the rate of four (4) per cent per annum on all deposits, free of taxes, payable on and after Tuesday, January 3, 1911. Dividends not called for are added to the deposit account and earn dividends from January 1, 1911.

GEORGE TOURNY, Manager.

The Market Street Stable

Is A No. 1

Reinforced Concrete Building

Up-To-Date in every respect.

WE CATER TO THE BEST
AND GUARANTEE SATISFACTION.

C. B. DREW

Stated in another way, it was found that the two-year-old sows farrowed 24 per cent more pigs than the young sows, while the old sows farrowed 30 per cent more. The weight of the pigs from the two-year-old sows was 9 per cent greater than that of the young sows, while the pigs from the old sows were 12 per cent larger than from the young sows. The pigs from the two-year-old sows made a more rapid gain than those from the young sows, amounting to 26 per cent. In each instance the older sows farrowed more pigs per litter, heavier pigs at birth, and their pigs made the most rapid growth after birth.—From Sobern's "Swine in America."

WANTED.—Black Percheron stallion, three or four years old; must be registered and a high-class individual in every respect. Answer, giving height at withers, height at coupling, girth, size of bone below knee, whether he has been in service or not and with what result; send photograph besides giving remarks on general conformation and appearance, whether broken to harness or otherwise. Must be absolutely sound and good-tempered. State lowest price delivered in San Francisco. Address R. M., Breeder and Sportsman.

I Want to Sell

Ray o' Light 2:08 1/4

His register number is 46270. He is by the great Searchlight 2:03 3/4, his dam is Carrie B. 2:18, dam of Ray o' Light (3) 2:08 1/4, Lovelock (2) 2:19 1/4, Ishmael 2:21, by Alexander Button; his second dam is Carrie Malone, full sister to Klatawah (3) 2:05 1/2, Chas. Derby 2:20 (sire of 8 in 2:10), etc.; his third dam is Katie G., dam of 6 in list, by Electioneer; his fourth dam Fanny Malone by Niagara, son of Mambrino Chief 11, and his fifth dam Fanny Wickham, thoroughbred.

Ray o' Light won the two-year-old and the three-year-old Breeders' Futurity. He took a two-year-old record of 2:13 1/2, a three-year-old record of 2:08 1/4, and paced a trial of 2:06 as a four-year-old.

He is one of the best dispositioned studs I ever saw, and I believe would make a great guideless pacer. He is a sure foal-getter and his colts, although all babies as yet, are very fine-lookers.

I will take cash or an approved negotiable note in payment for Ray o' Light, and will sell at a great sacrifice if he is sold at once. I have other business and cannot devote my time to horses. He is absolutely sound and was foaled in 1905. Look up his race record and write me at once. I want to sell and will price him low.

FOR SALE—PRINCE DEL MONTE 51341

a magnificent 3-year-old colt by

KINNEY LOU 2:07¾.

sire of

Wilbur Lou (1) 2:19¾, world's champion yearling trotting colt.

First dam, Princess Bessum 2:29¾, by Egyptian Prince 1431 (son of El Madhi 2:25¾ and Egyptienne 2:18, by Mambino King); second dam, Carrie Malone, dam of three in 2:30 and full sister to Klatawah (3) 2:05½ and Chas. Derby 2:20 (sire of Jim Logan (3) 2:05½, world's record for three-year-old pacers), by Steinway (3) 2:25¾, sire of six in 2:10; third dam, Electioneer's greatest producing daughter, Katy G., dam of four in 2:20 and seven in 2:30; fourth dam, Fanny Malone, granddam of eight in 2:30, by Niagara, son of Mambino Chief 11; fifth dam, Fanny Wickham, famous 10 and 20 mile trotting mare by Herold (thoroughbred); sixth dam by Imp. Trustee; seventh dam by Imp. Barefoot; eighth dam by Sir Archey; ninth dam, Floriel mare, dam of the great four-mile race horse Boston; tenth to eighteenth dams all thoroughbreds.

Prince Del Monte was foaled March 17th, 1907, is a handsome chestnut, 15¾ hands high, a splendid individual, absolutely sound, and a trotter; good-headed and good-gaited. With little real training, has been a mile in 2:24, a half in 1:09 and a quarter in 33 seconds. Kinney Lou has no better bred foal and none that should trot any faster in 1911 than this colt if the right man gets him. For further information and price, address HENRY IMHOF, San Jose, Cal.; R. D. Tully Road

FOR SALE

A Great Bon Voyage Stake Prospect.

Bon Bonita, foaled March 31, 1909, is a beautiful bay filly of fine size and perfect conformation, sired by the great stake-winner and sire of stake-winners, Bon Voyage (3) 2:12¾, dam the great brood mare Carrie B. 2:18 (dam of the greatest racing three-year-old of 1908, Ray of Light (3) 2:08¼, Lovelock (3) 2:19¾, matinee record 2:15, and Ishmael 2:21) by Alexander Button 2:26, a great sire; second dam, Carrie Malone, dam of three in the list, and full sister to Klatawah (3) 2:05½, and Chas. Derby 2:20 (sire of Jim Logan (3) 2:05½, world's record for three-year-old pacers), by Steinway (3) 2:25¾, champion three-year-old trotter in his day, and sire of six in 2:10; third dam, Electioneer's greatest producing daughter, Katy G., dam of four in 2:20 and seven in 2:30; fourth dam, Fanny Malone, granddam of Maud C. 2:14¾ and seven others in 2:30, by Niagara, son of the great Mambino Chief 11; fifth dam, Fanny Wickham (thoroughbred), famous long-distance trotting mare, by Herold; sixth dam, by Imp. Trustee; seventh dam, by Imp. Barefoot; eighth dam, by Sir Archey; ninth dam, Floriel mare, dam of Boston, the greatest four-mile race horse that ever lived; tenth to eighteenth dams all thoroughbreds.

Bon Bonita is nicely broken to harness, never worked and never shod, kind and gentle, and a pure-gated trotter and absolutely sound; one of the very best Bon Voyages in the world. She is a great stake prospect, and it should be remembered that she will not have to race against any of the get of Bon Voyage, as she is his only living yearling.

When her racing career is ended she will be an exceptionally valuable brood mare, as she represents, on both sides, the blood of the immortal Electioneer, the world's greatest Racing and Producing Family. She is entered and paid up in all of the California and Oregon stakes.

For price address RAY MEAD, San Jose Driving Park, San Jose, Cal.

DENATURED ALCOHOL IN SOLID

FORM. Cleveland Special Dispatch.

A well-known Wheeling, W. Va., chemist has succeeded in producing chunks of denatured alcohol in crystal form by means of a small infusion of certain acids whereby crystals of an alkaloidal nature very closely resembling phylogenically the effects of ethyl alcohol distilled from sawdust. The method employed and the results obtained are somewhat similar to the crystallizing of rock candy or that of Saccharine containing as it does 350 times the sweetening strength over that of cane sugar, so this alkaloidal crystallized alcohol contains many times the strength over the ordinary denatured fluid alcohol; they will yield 194 proof denatured alcohol with a greater heating and cooking power for stoves than gasoline, and it is absolutely non-explosive.

A sample can containing 50 solid cubes, 1 stove and the secret formula how simple it can be made at home, will be mailed to you, postpaid, on receipt of \$5.00. Address

Every Horse Should Be Clipped in Season

It is the wise thing to do for the clipped horse not only is easier to clean and looks better, but clipping does much to make him immune from coughs, colds and the usual ills that come to a horse from standing in a coat of long, wet hair after any hard exertion. The perspiration evaporates quickly from the clipped animal and leaves him dry. On cold days a blanket when he stands keeps him comfortable.

The Best Clipping Machine the World has ever Seen is the Stewart Ball Bearing Enclosed Gear Machine

It is the easiest turning, fastest clipping and most enduring of all machines. The materials in it are all of better quality, the workmanship is superior. All file hard cut steel gears, protected from dust and dirt and running constantly in oil. It couldn't be better for twice the money.

STATE AGRICULTURAL SOCIETY.

OCCIDENT STAKE OF 1913

Trotting Stake for Foals of 1910.

Entries close January 1, 1911.

To be trotted at the California State Fair of 1913. Entries to close January 1, 1911, with J. A. Filcher, Secretary, at the office in Sacramento. One hundred dollars entrance, of which \$10 must accompany nomination; \$15 to be paid January 1, 1912, \$25 to be paid January 1, 1913, and \$50 thirty days before the race. The Occident Cup, of the value of \$400, to be added by the Society. Mile heats, three in five, to harness. First colt to receive cup and six-tenths; second colt, three-tenths; and third colt, one-tenth of the stakes. Five to enter, three to start. A horse not winning a heat in the first three shall not start for the fourth heat unless said horse shall have made a dead heat; but horses so ruled out shall have a right to share in the prize according to their rank in the summary at the close of their last heat. Otherwise N. T. A. Rules to govern.

Nominators are not held for the full amount of entrance in case colt goes wrong; only forfeit payments made, which relieves you from further responsibility, and declares entry out.

The stake of 1913 should receive a large entry, and be very valuable. Every breeder should enter in it.

Remember the Date of Closing is January 1, 1911.

H. A. JASTRO, President.

J. A. FILCHER, Secretary,
Sacramento, Cal.

New Edition of John Splan's Book

"Life With the Trotter"

Price, \$3.00, Postpaid.

"Life With the Trotter" gives us a clear insight into the ways and means to be adopted to increase pace, and preserve it when obtained. This work is replete with interest, and should be read by all sections of society, as it inculcates the doctrines of kindness to the horse from start to finish.

Quinn's Ointment
Will Make A Horse Over;

will put sound legs under him and will save him from the cheap hawker and trader. It is the standard cure for Spavins, Curbs, Splints, Windpuffs and all the various lumps and bunches of like kind. Keep it always on hand and you will be prepared when trouble comes. Leading horsemen everywhere know it and use it.

Mr. H. H. Clark, Fredonia, N. Y., writes: "The bottle of Quinn's Ointment purchased from you about two years ago removed a curb and thoroughpin and did it for good. My horse's leg is as smooth as ever."

Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write for circulars, testimonials, etc.

W. B. EDDY & COMPANY, WHITEHALL, N. Y.

Hotel St. Francis

Union Square, San Francisco

Under the Management of James Woods.

FACING THE BEAUTIFUL PARK, IN THE heart of the city, which is the theater of the principal events of all the famous festivals of San Francisco, this hotel, in environment and atmosphere, expresses most pleasantly the comfortable spirit of old California. ¶ The royalty and nobility of the Old World and the Far East, and the men of high achievement in America, who assemble here, contribute to the cosmopolitan atmosphere of an institution which represents the hospitality and individuality of San Francisco to the traveler. ¶ The building, which marks the farthest advance of science in service, has now the largest capacity of any hotel structure in the West, and upon completion of the Post Street annex will be the largest caravansary in the world.

¶ While the service is unusual, the prices are not.

SPOHN'S Holds the Fort

750,000 Spohn Guns

IN 1910 were turned on an invading Microbe Army of millions, billions, yes trillions, and destroyed the invaders, held the fortification and made Horsedom a safe habitation for the Equine Family. Every bottle a gun; every dose in a bottle a charge; every charge a destroyer of incalculable numbers of Disease Germs.

A battery of science and reason against abnormal conditions.

The relief from suffering of the Horse, the Dog, the Sheep, the Domestic Fowls and all Pet Animals, with SPOHN'S, is a greater force than all the Humane Societies combined, and goes hand in hand with these organizations.

SPOHN'S is a cure of all forms of Contagious or Infectious Diseases; as Distemper or Strangles, Pink Eye, Influenza, Epizootic, Catarrhal Fever, Shipping or Acclimatization Fever, Sale Stable Distemper, and Nose and Throat Diseases. In Dog Distemper there is absolutely nothing to equal it. Cholera among poultry may easily be cured with the medicine. SPOHN'S as a preventive of all these maladies is always reliable.

For females during the period of gestation it is safe under all conditions.

SPOHN'S is the most extensively used and largest selling veterinary specific in the world, and in the sixteen years on the market, has saved from loss by sickness and death, an amount of money, to the live stock breeders, owners and handlers, that runs to such large figures that they are staggering.

SPOHN'S will hold the fort of your live stock interests if you will station it behind the breast works, for it has able and true commanders.

SPOHN'S is put up in 50c and \$1 size bottles, \$5 and \$10 the dozen. Sold by all good druggists and barnes dealers, or delivered by the manufacturers on receipt of price. All the wholesale druggists in U. S. A. and in Canada handle this remedy. A booklet containing a dozen good formulae to compound family and stock medicines, will be mailed free to any one who will write asking for same.

Arrow and Nitro Club Steel Lined Shot Shells

Shooters are everywhere awakening to the advantages of the steel lining in U M C Arrow and Nitro Club Shells—the shells that have won every Interstate Handicap event in the past two years.

The steel lining improvement, as used in U M C Arrow and Nitro Club Shells, has been adopted by the leading shell manufacturers of Europe. It protects the powder from moisture, insuring uniform loads under the most severe weather conditions, and adds to the strength of the shell.

Sold by all first-class dealers. Do not accept a substitute. Communicate with us if your dealer does not carry U M C or Remington.

WINCHESTER REPEATING SHOTGUNS.

Of the repeating shotguns on the market, the Winchester is the only one that has the endorsement of the U. S. Ordnance Board as being safe, sure, strong and simple. Besides this, it has the practical endorsement of over 450,000 users. If you are thinking of buying a gun, look well to the reputation of the Winchester. No gun has had the varied experience or stood the hard practical tests that the Winchester has. Although no better gun is made, it is quite inexpensive. Price one at your dealers.

**I Want to Sell****Ray o' Light 2:08 1/4**

His register number is 46270. He is by the great Searchlight 2:03 1/4, his dam is Carrie B. 2:18, dam of Ray o' Light (3) 2:08 1/4, Lovelock (2) 2:19 1/4, Ishmael 2:21, by Alexander Button; his second dam is Carrie Malone, full sister to Klatawah (3) 2:05 1/2, Chas. Derby 2:20 (sire of 8 in 2:10), etc.; his third dam is Katie G., dam of 6 in list, by Electioneer; his fourth dam Fanny Malone by Niagara, son of Mambrino Chief 11, and his fifth dam Fanny Wickham, thoroughbred.

Ray o' Light won the two-year-old and the three-year-old Breeders' Futurity. He took a two-year-old record of 2:13 1/2, a three-year-old record of 2:08 1/4, and paced a trial of 2:06 as a four-year-old.

He is one of the best dispositioned studs I ever saw, and I believe would make a great guideless pacer. He is a sure foal-getter and his colts, although all babies as yet, are very fine-lookers.

I will take cash or an approved negotiable note in payment for Ray o' Light, and will sell at a great sacrifice if he is sold at once. I have other business and cannot devote my time to horses. He is absolutely sound and was foaled in 1905. Look up his race record and write me at once. I want to sell and will price him low.

E. S. TRAIN,

Santa Cruz, California.

It Works While They Work

No need to let your horses "eat their heads off" on account of Spavin, Curb, Ringbone, Splint, Bony Growths or Lameness. Kendall's Spavin Cure cures them while the horses work. It's the old reliable cure, used by horsemen and farmers for the past forty years with greatest success, curing horses without "laying off."

KENDALL'S SPAVIN CURE

will save you big money some day—if you have it ready.

Bert Perrin, of Shoshone, Wyo., writes:

"I have used Kendall's Spavin Cure for the last two years, and have cured several Spavins and Splints, also one Ringbone. It has never failed to reduce swelling and lameness in the joints of my stock, and I consider it more useful than any other horse liniment ever made."

Ask your druggist for Kendall's. Price \$1.00 a bottle; 6 for \$5.00. Don't take a substitute. Also, get the valuable book, "Treatise on the Horse," from your druggist, or write to

THE HOLIDAY NUMBERS of the turf and agricultural journals that have reached us are not only very beautifully gotten up from a typographical and artistic standpoint, but they are replete with interesting and statistical reading matter that are the delight of the breeder and owner these long winter evenings.

The Horse Review of Chicago, always in the lead of publications devoted to the harness horse, has a very striking cover by Robt. L. Dickey, depicting the offering of a Christmas wreath to a weanling in a snow covered field by a pair of cute children while the youngster's dam looks on with evident satisfaction. There are articles by J. L. Grohmann, David Culross, Chas. Tanner, Walter Moore, William G. Layng, Dr. J. C. McCoy, C. T. Harris, Volunteer, Marque and others. Mr. Layng has written the history of Childe Harold, the Australian Hambletonian, and it is an interesting story. Messrs. H. K. Devereaux, Murray, A. G. Leonard, John E. Madden, J. J. Markey, J. C. McCoy and H. T. White have written a symposium on The Trotting Hall of Fame, in which each selects ten trotters and tells why he thinks they are "the ten greatest trotters of all time." "Volunteer," contributes an article on "The great colt trotters of 1910," that is not only beautifully worded but contains the tabulated pedigrees of all two, three and four-year-olds that entered the 2:10 list during the past season, and of the California yearling wonder, Wilbur Lou 2:19½. There is enough for a whole winter's study in this article with its tables and tabulations. Dr. McCoy's article on "What blood and what individuals shall we use to improve the trotting breed?" is also an ably written and valuable treatise on the subject of breeding for speed. John Trotwood Moore's poem "The Choir of the Seraphim" is a Christmas gem.

The American Horse Breeder, of Boston, has the most beautiful cover page of the season. It is a reproduction in colors of a study of three equine heads by its staff artist, Duntley, and is well worth framing. No more striking picture ever graced the front page of a turf journal, and each head is a portrait, true to life. Some of the best written and most interesting articles of the season are contained within the 75 pages of this splendid number. Among the tributors are Frank S. Billings, M. D., who writes on Evolution of the Horse; T. L. Quimby, who has written very entertainingly on "Blonde and Brunette, the dam and grandam of Uhlán"; "Algernon" contributes an article on Mambrino Patchen-American Star Blood in the 2:10 Trotters that is worth studying; "Some Commentaries on Current Events" is the title of an article by H. K. Devereux of Cleveland that contains many excellent ideas and suggestions; S. W. Parlin, the venerable editor of the paper, contributes an article, with statistical tabulations entitled "Nutwood and His Descendants." Other contributors are E. H. Hoffman, Hamilton Busbey, Geo. W. Leavitt, Henry C. Merwin, W. J. Carter, Joseph Collins and the versatile Wilbur Duntley, who besides being an artist of merit, is also a writer of good stories, a playwright and an all round writer on horse topics. The American Horse Breeders' holiday number is second to none.

The Trotter and Pacer of New York, has a very artistic cover page by Toman and the entire 70 pages of the issue are filled with most interesting matter relating to the harness horse. "Needed Reforms in Trotting" by Mr. Frank J. Kilpatrick has an especial interest to that gentleman's many friends on this coast. Mr. Kilpatrick writes in his usual outspoken and frank manner and the suggestions he makes are solely for the benefit of the sport he

loves so well. He has some warm praise for the stadium track in Golden Gate Park and suggests something like it for Central Park in New York.

The Breeders' Gazette, of Chicago, the leading journal of America devoted to the breeding farm animals, is the most artistic and beautifully printed of all the holiday numbers. The illustrations are real works of art and the photographs reproduced are gems.

The Horseman and Spirit of the Times of Chicago, one of the oldest of the trotting horse papers, gets out a very handsome number filled with special articles by the best writers on harness horse affairs in the country.

The Rural Spirit of Portland, Oregon, is not far behind any of its eastern contemporaries. It has issued a splendid Christmas number of 116 pages, profusely illustrated and containing articles from many able pens. The cover is a very handsome thing and the typographical and press work excellent, while the advertising patronage is large though fully deserved.

The Horse World, of Buffalo, with the heads of Colorado E. and The Harvester to embellish its cover, has also gotten out a handsome edition for the holiday season. The press work on the half-tone engravings is especially fine, and the entire number is a credit to the compilers and publishers.

The Pacific Homestead, a farm journal published at Salem, Oregon, has also printed a very creditable holiday number with cover in colors and containing 90 pages of interesting matter and beautiful half-tone engravings.

All the holiday publications that have reached our desk during the past week are a credit alike to editorial staffs and printers.

THE following telegram sent out by the Associated Press has been printed in nearly all the daily journals throughout the country and several of the turf-papers have given it space.

Washington, D. C., Dec. 17.—One result of the Hughes anti-racing bill, that was probably not contemplated either by Governor Hughes or his friends in the New York legislature, was brought to light today at a hearing before the house committee on agriculture when it was asserted that not enough riding horses could be found anywhere in the United States to supply the cavalry of the United States army.

Mr. Wilson, secretary of agriculture, Brigadier General James R. Aleshire, quartermaster general of the army, and Representative Augustus O. Stanley, of Kentucky, made statements to the committee. All were in favor of some government action to stimulate the breeding of riding horses. Mr. Stanley declared that since the passage of the Hughes bill in New York several long established breeding farms in his State had gone into bankruptcy, and that the business of breeding riding horses was languishing everywhere. Secretary Wilson agreed with him.

Brigadier General Aleshire declared that the army needed only 1700 new horses every year, but could not find them. He recalled the time when the army bought riding horses for \$125, but said that now it could not get them for \$150. Messrs. Stanley and Wilson suggested that the government give the department of Agriculture money and authority to introduce fine stallions throughout the country free of charge and allow the army the option of purchasing the foals at a good price.

The above is mostly rot. The trouble met by the government in buying horses for its cavalry is owing to the fact that it will not pay the market price for the animals it wants. City dealers will pay more for the horses that come up to the government requirements than Uncle Sam will. The plan to introduce stallions throughout the country at the expense of the government, whose services shall be free to breeders who will agree to sell the produce to the army at a stipulated price will require a very large appropriation to carry it out. If this money were added to the prices the government will pay for the 1700 horses it needs every year that number would be forthcoming. Instead of asking congress to buy and maintain a lot of stallions to sire \$150 horses, it would be much better and doubtless much cheaper for the government to raise the price it will pay for the horses it needs to \$200. An increase of \$50 each in the prices paid for 1700 horses would amount to \$85,000 per annum. It is safe to say that the purchase and maintenance of the stallions proposed would cost the government twice that amount every year.

Lon McDonald states that the reported purchase of Miss Stokes (1) 2:19¼, (2) 2:09¼, by David M. Look, of New York City, from W. E. D. Stokes, is without foundation. He says that Mr. Look made Mr. Stokes an offer of \$10,000 for the filly, which was refused, but Lon has made arrangements whereby he will have the great yearling and two-year-old in his stable and will race her in her three-year-old engagements. He will also have Sue D. (2) 2:15¼, which is now a three-year-old and is said to have stepped a mile in 2:06½ in her race against Colorado E. at Lexington.

SEVEN MILLION DOLLAR HORSE TRADE.

It is easy to say that the horse business is dead, but when it comes down to actual figures, the horse is still a surprisingly active animal. The latest statistics of the Department of Commerce and Labor at Washington giving the exports and imports of the United States for the ten months ending with October, show that in that period there have been exported from the United States—that is bought by foreign purchasers—27,518 horses valued at \$3,829,250. For the corresponding ten months of 1909, the exports of horses from the United States were 19,705, valued at \$2,775,722. The increase in the horse trade for the ten months of this year now elapsed amounts therefore to 1,053,523, and at the rate we are going total exports of horses for the twelve months ending with December will largely exceed four million dollars. Canada is by far our best customer for horses the number of American horses sold to Canada this year having been nearly 25,000, valued at something over three million dollars.

While foreign buyers are taking so much of our valuable horse flesh, the United States itself has been a large customer of other countries during the year, and for the ten months ending with October had imported 9511 horses valued at \$2,771,599. These imports came from England, Belgium, France and Canada. France alone having sent us 2424 horses valued at \$1,022,440. We bought horses to the value of \$461,121 from the United Kingdom, Belgium sold us animals to the amount of \$523,363, while Canada accounted for \$699,742. An import and export horse trade which is now running at the rate of seven million dollars a year is an industry not to be sneezed at. In the above figures no mention is made of the export mule trade, which has amounted so far this year to \$776,493.

WHITE MARKINGS OF HORSES.

In regard to white legs in general, irrespective of the question of breed, they are, as doubtless most horsemen have observed for themselves, much more commonly seen on the hind legs, or one of them, than in front. And when they occur upon the fore limbs they are also almost always—in fact, it may be said practically always—found to be present behind. It is quite exceptional to see a white marking in front without there being any on one or both the hind legs as well. Thus, white markings behind are prevalent enough without corresponding ones in front, the reverse of this is not the case, and there is clearly some definite philological reason for this fact why the hind legs are so much more liable to show white markings than the fore ones, though the explanation of it is still obscure. Similarly, when markings are present both behind and in front, those on the hind limbs are usually the more extensive.

It is also found that there is a very definite connection between the coat color of horses and the frequency with which white markings occur. Thus, the latter are by far the most commonly associated with the chestnut color. And not only are they the most prevalent in chestnut horses, but it is also, of course, a well-known fact that the markings are apt to be more extended in nature in the case of this color than in that of any other. Chestnut, therefore, apparently possesses, so to speak, a special affinity for these markings. Bay ranks next as regards the degree of frequency with which white markings appear in horses of this color, although it comes a good way behind chestnut in this respect. Then follows brown, while they are met with least frequently among black and roan-colored horses.

The theory is sometimes put forward that in mating together sire and dam which both have conspicuous white markings on their legs, the tendency is for these to assume a more extensive character in the progeny than is the case in either of the parents. This theory cannot, however, be substantiated and may be pronounced to be untenable, although occasionally instances, of course, occur in which it is borne out. But one is not justified in deducing a generally applicable rule from these latter.

These markings are of a highly hereditary nature, and must prove to be transmitted to the offspring; probably even more so in the case of the sire than in that of the dam, though conclusive scientific proof in support of this latter theory is not available, but it is a commonly observed phenomenon. On the other hand, there are some cases in which stallions with white markings habitually sire whole-colored foals.

Henry M. Jones, the well known trainer, will handle a string of horses during the coming season for Sterling R. Holt, the Indianapolis, Ind., turfman. Mr. Holt's main possession (or rather the horse in which at the present, he is centering his main hopes) is the good two-year-old filly Fleeta Americus. She is by Rex Americus, dam Lizzie V. by American Boy. Mr. Jones had charge of this fast filly during the year just closing and she has shown enough to warrant his belief that he will be one of the stars of the Grand Circuit in 1911. She has been a mile in 2:13¼ and a half in 1:03¼, the last quarter of this half being negotiated in 31 seconds. She has never been paced and Henry Jones thinks that this makes her performances all the more remarkable. She is entered in all the Futurities and is expected to capture her share. Jones will train four or five horses for Mr. Holt.

KINNEY DE LOPEZ 2:23.

When Budd Doble went to Red Bluff in 1902 and purchased Kinney Lou, he believed he had purchased a stallion that would not only show extreme speed and race well, but one that would make a successful sire. He took him across the mountains the following year, gave him a record of 2:07½ in a race, won over ten thousand dollars in purses, and gave him the record of the fastest green trotting stallion up to that time. Since Kinney Lou has been in the stud he has sired ten standard performers, six of which took their records this year, and one of which is Wilbur Lou 2:19½, the world's champion yearling colt. Mr. Doble has arranged to have Kinney Lou make the season of 1911 at Hemet Farm, the home of Wilbur Lou, but he has retained at San Jose a son of Kinney Lou that he believes is fully able to duplicate the great record of his illustrious sire both on the track and in the stud. We refer to Kinney de Lopez 2:23.

Kinney de Lopez is a beautiful dark chestnut horse foaled in 1905. He comes as near being a model trotter in conformation, size, disposition and breeding as any stallion in California and there is no reason why he should not succeed as a sire. Kinney de Lopez has never raced, but he was started at the Breeders' meeting at San Jose last year for a standard record, and trotted in 2:23 so easily that every person who witnessed the performance knew that he could have trotted well below 2:20 had it been desirable to have given him such a mark. His gait is perfect, while his disposition to go and determination to stick to the trot, make him as near the ideal trotting sire as one would wish to see.

In his breeding he combines the blood of families that are the most illustrious in trotting horse history. His sire Kinney Lou 2:07½ has already proved his worth on the track and in the stud. He was the champion new performer of his year and has since sired the champion yearling colt. The dam of Kinney de Lopez is by that great race horse and sire Direct 2:05½, sire of fourteen with records below 2:10, and another with a mark in that notch. Direct is the grandsire of many 2:10 performers showing that his blood is breeding on through both sons and daughters. The second dam of Kinney de Lopez is Kate Chapman, a mare by Naubuc, one of whose daughters bred to Direct produced Directly 2:03¼, still holder of the world's two-year-old pacing record of 2:07½. The third dam is a daughter of Geo. M. Patchen Jr. 31, a sire that gave good bone, soundness and racing qualities to his produce and did as much to improve the blood of California trotting stock as any horse even brought here. His fourth dam was by Vick's Ethan Allen, a son of the great Morgan horse Ethan Allen 43, and his fifth dam was Fanny Bassford. We believe Kinney de Lopez is entitled to registration in the Morgan Register, as he traces to the founder of that breed through the dam of his sire and through his own dam. He is certainly of the best Morgan type and as he is of fair size as well as having beautiful conformation and fine action, he will make an ideal sire. He will be in service at San Jose track at \$35 for the season or \$50 to insure. For further particulars address Budd Doble, San Jose.

LOW PRICES FOR HORSES.

N. A. Richardson, administrator of the estate of Pen Davies, deceased, sold several young horses and some farming implements at San Bernardino on Saturday, December 17th. The horses brought very low prices. Following is a list of those sold and prices obtained:

Gelding, 2 years old, by Blackamoor, dam Dolly by Conn's Billy, bought by H. E. Webster for \$35.

Gelding, black, 3 years old, by Izalco, dam Ruhy H., by Bawswater Wilkes, to George W. West for \$85.

Mare, bay, 10 years old, by Del Norte, to J. Ingelhardt for \$61.

Mare, sorrel, 5 years old, by Exchange, to W. M. Purvis for \$98.

Gelding, bay, 7 years old, by On Stanley, dam Dixie S. 2:24, by Zolock, to George W. West for \$45.

Mare, dark bay, 7 years old, by Zolock, dam by Artist, to T. K. Lyman for \$120.

Mare, bay, 4 years old, by Exchange, dam Ella T., by Benrow (throughbred) to J. M. Case for \$51.

F. W. PERKINS BOOKS FIRST MARE.

Willows, Cal., Dec. 20, 1910.

Breeder and Sportsman:—I was the first man to book a mare to The Bondsman for the season of 1911. I booked Rose Trix by Corbett Wilkes, dam Trix, dam of seven, by Nutwood Wilkes, when The Bondsman was knocked down to Mr. McCann.

Respectfully, F. W. PERKINS.

There are about 350 horses, including many yearlings and weanlings, now at the Kentucky Trotting Horse Breeders' Association track. The trainers, however, have not been able to do much good with them under the existing weather conditions.

Gus Macey having bought Pickles, pacer, with a record of 2:11½, announces that he is through buying for the present, as he has close to fifty-seven varieties already.

If you have colts to break, do not try to teach them too much at once. Be sure that the colt understands the first lesson before you attempt another one.

CHRISTMAS PAPERS PLEASED SAM GAMBLE.

San Francisco, Dec. 27, 1910.

Editor Breeder and Sportsman—I am confined to my room, not feeling at my best, and have been reading the various handsome and interesting Christmas turf journals that I had asked a friend to procure for me. In your Christmas number as well as the others, I found many an item that pleased me so much that they brought new energy to me. Among them was the success of S. S. Stiles with his great mare Helen Stiles 2:09¼. I have seen some of Mr. Stiles' belongings that I envied him, but I do not envy his success, but rejoice in his bringing forward such a great trotter (as I have been informed) and selling her for a handsome price, to say nothing of her as a good money producer. I have never had the pleasure of seeing Helen Stiles but once and that was at her age of seven months; she then, all in all, made a deep impression on my mind. I do love at all times to see any person, friend or foe, own a star trotter, and the next of my friends that I would like to see own one are Geo. Stickle of Angels, and the Tuttle Bros. of Rocklin, California.

Another item in your journal that pleased me was in regard to William O'Brien, better known by me as "the Daisy." I found him years ago not only a "Daisy" at the forge and anvil, but a natural mechanic as well. I was informed a few years ago that Mr. O'Brien had died, but I now gladly learn through you that he is the same "Daisy" and master mechanic of old, and very much alive. I wish him a long and happy life and much success with his new invention, his patent rib shoe.

Still another item gladdened my heart and that was Mr. Holloway's account of the phenomenal performance of Wilbur Lou, yearling record 2:19½. This for various reasons. First, I have been for years a strong believer that, all things being equal, and in spite of all the phenomenal speed that has been shown by both young and old horses in recent years, that twenty mares will produce here in California, a greater number of high speed money winning trotters, than the same number of mares will produce in any other part of the globe. And I have not overlooked my favorite State of Kentucky, nor the fact, and it is a fact, that great speed has been produced in various States, and that blood, brain, hard labor and education are important factors. Later on, caring for, and campaigning about from place to place is a great help toward development of high speed both in young and old horses. I have been criticised by many good judges for this belief, but what has once been done can be done again, and the records for all ages were at one time credited to the horses produced in California.

Second, I have always taken it upon myself as being instrumental in getting the late Mr. McCord to breed his good mare Mary Lou to McKinney, and I recall that evening when from 5 p. m. to 2 a. m. our talk lasted through a French dinner, a performance at the theatre and on the street under the gas light, over that good mare's produce to come. I have seen Mary Lou, her dam and grandam, and those who knew them best will agree with me that all were blessed with good qualifications such as are found in the producers of high speed. Yet for all I have never yet seen Kinney Lou.

Third, I owned and bred Wilbur Lou's third dam, also owned his fourth dam. They too were blessed with the qualities that are now known to produce good goods. The same may be said of the sire and dams of Lou Billings (3) 2:08¾. To me it is not to be wondered that they have all produced high speed, and with such genealogy and qualities found in them there will be a link missing somewhere if they fail to breed on to a still higher rate of speed and establish a family of their own. The only requirements now needed as to their future and the true facts of my above statements is time and good judgment, and the written declarations of my friends the late Messrs. McCord, Kimball and Polhemus.

A prosperous new year to all men and good young and old horses.

SAMUEL GAMBLE.

TAKING A HORSE'S PULSE.

The pulse is due to an automatic expansion and relaxation in the wall of an elastic tube—the artery—caused by the jets of blood pumped into those vessels by means of a force pump—the heart. Each stroke of the heart is equal to one pulsation—viz., a rising and falling of the arterial wall. In health, the average number of pulse beats per minute is about 36 to 40. The larger the horse the slower or fewer the number of beats per minute.

A very good place to take the pulse is at the underside of the jaw. By rolling the tips of the fingers about a little, they can be brought on to the blood vessel. Don't press too firmly, nor yet too lightly. The animal must be kept still and quiet. In point of importance the "character" of the pulse must be the best guide. That is to say, the blood vessel may impress us as feeling hard, soft, full, quick, small, wiry, regular or irregular.

These are niceties which require practice before they can be fully appreciated. In pleurisy, the pulse will be found beating about 80 times per minute (depending upon the stage of the disease), hard, wiry and irregular. In pulmonary apoplexy, it may be beating 120 times per minute. When properly taken, it forms a valuable means of ascertaining the nature and progress of disease.

FATHER POWER IS HOME AGAIN.

Every horseman who has visited Pleasanton knows Father Power, the honored priest who has charge of a large parish in the Livermore Valley, and whose love for a good horse is so well known. Father Power often visits the Pleasanton track to see the horses at work, and has bred a number of good ones himself. He was a very intimate friend of the lamented Monroe Salisbury and they spent many happy hours together when the latter was alive, in discussing the breeding and training of trotters. The following from the last issue of that newsy and excellent country weekly, the Livermore Herald, will be read with much interest by the many horsemen who regard Father Power as their friend:

"Rev. Father Power returned Wednesday evening from a six months' visit to his boyhood home in Ireland. He had a pleasant trip but was nevertheless glad to be home again. He is confirmed in the belief that California is the best section of the whole world and that the Livermore Valley is the best part of California.

The reverend gentleman found the condition of Ireland, particularly the agricultural section, to be vastly improved since his last visit. The landlord and the landlord's hated agent are no longer factors in the rural life of the Emerald Isle. The farmers now own three-fifths of the island and in most cases where the farmer rents at all it is from the County Council, which has taken over the land from the absentee owner and leases it to farmers at a moderate rental. There is only about half the population in Ireland that was on the census rolls of sixty years ago. This works some hardships on the shopkeepers but it is a good thing for the farmers as they are enabled to increase the size of their holdings and as they are very prosperous the condition of trade generally is improved. The farmers get prices for their produce and livestock which would make our own farmers, even in the recent fat years, green with envy. The farmer is living better, dresses better and lives in better houses and is more content than ever before in Ireland's history. The farmers there have their troubles, too, and strange to relate it is in the line of labor. We have been accustomed to think that the harder conditions of the old countries would make labor plentiful and cheap and docile but the reverse is true in Ireland. The best class of common laborers have sought foreign fields. Skilled labor is organized into unions and conditions are about the same as here.

Father Power spent most of his time at Carrick-on-Suir, but he made three trips to England, one to France and one to Portugal. He was in Lisbon, at the time of the revolution and witnessed some of the exciting scenes of that troublous period. He witnessed another sensational scene in London when the suffragettes make their famous attack on Prime Minister Asquith. Father Power says that the 'votes for women' movement has taken a wonderful hold on England but that in his opinion the women are still a long way from securing their 'rights.' He found Socialism rampant in England, France and Portugal. He was glad to return to a country where conditions are more normal and where if these radical beliefs exist they are expressed in a more temperate way."

VERY SENSIBLE ADVICE.

The Western Horseman says: "The harness race horse business is often, very often, referred to as a 'hard game,' and yet there is as much 'easy money' made in the business as in about any other legitimate business one can think of. True, there are many good profits missed, and many good dollars thrown away in connection with the trotting horse business, but these things are not legitimate parts of the business, but often self invited incidents thereof.

"The main source of loss in this business is a lack of personal attention to the business on the part of the man having the money invested, but nearly as great a source of loss, or lack of profit, is the average holder's disinclination to sell when he has a good chance to sell, and at a handsome profit. The main trouble with many people who breed, or incidentally own trotting and pacing horses is the 'get rich quick' idea, i. e., make a 'lot of money' on a single animal.

"It is wonderful how many men, when they get hold of a fairly good race prospect, right away get into their heads that their horse can beat any and all other horses 'in their class' a city block and get all the money 'next year.'

"When the average man gets hold of this kind of a horse there is usually no such thing as inducing him to sell, at least at nothing less than at a fabulous price which no one will pay, the ultimate result of which is, in at least ninety cases in every hundred, that the race prospect which might have been cashed in at from \$2000 to \$6000 is finally sold for less than so many hundred.

"If men would raise and sell light harness horses as they raise and sell hogs and corn, or if they would 'deal' in such as they deal in dry goods, lumber and coal, or even millinery, which is 'powerfully close' to a 'get rich quick' proposition, buy and sell on an average margin of profit, the trotting horse industry would soon lose its name of being a 'pretty hard game.'"

Bingen's dam is to be bred to Willis, the own brother to Czarevna (3), 2:07, and Grace (3) 2:08.

DAMS OF FAST COLTS.

The proprietor of one of the leading stock farms of the country, when recently importuned to buy a certain broodmare, is reported to have refused to purchase on the grounds that the mare was no longer young and stated that he was desirous of breeding early speed. His contention was that the way to produce futurity-winning colts was to breed them from young mares; that the matrons with the weight of years would fail to be as successful in the production of fast youngsters as those of more tender years.

A famous statesman once said that the only way to judge the future was by the past, and the history of the star two and three-year-old colt trotters hardly hears out the contention of this breeder. Just as a test I have investigated the ages of the dams of the three two-year-old trotters and the nineteen three-year-old trotters which have taken records of 2:10 or better, and find that in the case of the two-year-olds the figures are all in favor of the older matrons, the average age of the dams of those three when the colts were foaled being 15.3 years, while the average age of the dams of the nineteen three-year-olds when the colts were foaled is 10.1.

Native Belle, with a two-year-old record of 2:07½, is the world's champion of her age, and her dam, Yellow Belle, or Julia D. C., as she is named in the official records, produced her when she was fifteen years old. Miss Stokes, with a two-year-old record of 2:09½, was foaled when her dam, Tillie Thompson, was fifteen years old, while that great broodmare Expectation, dam also of Major Delmar 1:59½, was sixteen years old when she foaled the world's champion two-year-old colt, Justice Brooke 2:09½. It is a peculiar coincidence that the dams of the three two-year-olds which have beaten 2:10 should have produced these speed marvels at practically the same age.

The three-year-olds show no such uniformity in their dams. The mothers of these nineteen 2:10 three-year-olds, when the colts were foaled, ranged in age from three years to twenty. The believer in young dams can find much to bolster his argument in the fact that Flossie McGregor, dam of the world's champion three-year-old Colorado E. was but four years old when she produced that wonderful performer.

As before stated, Native Belle, which this season, as a three-year-old, reduced her record to 2:06½, the world's record for three-year-old fillies, was foaled when her dam was fifteen years old. Carpet, the dam of General Watts 2:06½, which, until dethroned by Colorado E., was the king of three-year-olds, produced the son of Axworthy when but five years old.

Miss Pratt produced The Leading Lady 2:07, former queen of three-year-old fillies, when she was ten years old. Orianna, the only mare to produce two 2:10 three-year-olds, was eighteen years old when she foaled Czarevna 2:07½, whose record in a race is the fastest by a three-year-old filly, and nineteen years old when Grace 2:08 winner of the last Kentucky Futurity, was produced.

Virginia Reynolds, dam of Baroness Virginia 2:08½, winner of the Kentucky Futurity in 1909, was ten years old when her famous roan filly was foaled. Ho mora, dam of Fantasy (3) 2:08½, the first three-year-old to beat 2:10, and which for several years was the champion of her age, was eight years old when the famous daughter of Chimes first saw the light.

That famous matron Paronella (dam also of that wonderful old race horse Country Jay 2:07½), produced Kentucky Todd 2:08½, three-year-old champion colt for three weeks, when twelve years old. The trotting queen, Lou Dillon 1:58½, when nine years old foaled Lou Billings, which took a record of 2:08½ the past season.

The Harvester, now the stallion champion, which took a three-year-old record of 2:08½, was foaled by Notelet at the age of six years. Operetta was fifteen years old when she foaled that wonderfully game filly Soprano (3) 2:08½. The fast little black filly Emily Ellen 2:09½, was foaled when her dam, Morning Bells, was seven years old.

Grace Boyd was but three years old, the youngest of all the twenty matrons named, when she produced Grace Bond 2:09½, victor in one of the most desperately contested Kentucky Futurities ever raced. Gypsy Dark foaled Susie N. 2:09½, when but four years old, while that great broodmare Santos (also dam of Peter the Great 2:07½, was twenty years old when she produced J. Malcolm Forbes 2:09½, she being the oldest to produce a 2:10 three-year-old.

Komura was but five years old when she foaled Binvolta 2:09½. Betty B. H. was six years old when George Todd 2:09½, was foaled, and Emma T. produced Miss Abdell 2:09½, a Kentucky Futurity winner, when she was fifteen years old.

These figures prove nothing in particular and more than that there can be no set rule as to age in breeding no more than there can be in blood lines; Futurity winners some times come from the most unexpected sources, while the breeder who appears to be justified in expecting to breed a champion is more frequently than not doomed to disappointment. If winners could be bred from a formula, that element of chance which makes the game worth while would be lacking.—Tom Gahagan in Western Horseman.

M. E. McHenry, as trainer, and John H. Shults, as owner, will make a combination that is hard to beat. McHenry has been somewhat anxious to get back to the trotters and it will be a pleasure to all concerned to again have him among the regulars.

COUNTIES COMMITTEE MEETING.

Definite arrangements have been made for the program of the Semi-Annual Counties Committee meeting of the California Development Board, Oakland, January 6th and 7th. The response from the various county organizations throughout the State indicate that the attendance will be large.

There seems to be a revival of the boosting spirit in many of the counties that have apparently been dormant of late, and the delegates from those sections are receiving instructions to attend the various addresses, to take part in the discussion of the topical questions so that on their return they will be brimming over with ideas on what is being done in counties, in the matter of promotion.

The counties meetings of the past have been very useful in bringing about a uniformity of policy, and a co-ordination of efforts among the many organizations in this State.

The organizations of more recent origin can learn at that time the methods by which they can make use of the facilities of the larger organizations, such as the California Development Board in the way of speakers and the hospitality of the Oakland Chamber of Commerce, who will be the hosts, is a thing well known. A banquet has been arranged for the evening of the 6th, where the discussion will naturally center on the Panama Exposition feature of development, and such things as automobile excursions, trips of both pleasurable and informing nature have been fully arranged for.

The program includes the following men whose reputations need no further comment:

Morning session, 10 a. m. Call to order by chairman.

Address of welcome, Mayor Frank K. Mott.

Response on behalf of the Counties Committee.

Appointment of the Committee on Resolutions.

Appointment of Committee on Credentials.

Addresses: "The Statement of the Task Before Us," Robert Newton Lynch; "Good Roads and Development," Governor James N. Gillett; "Manufacturing and Development," Frederick J. Koster.

Topical Discussion: "Transportation and Development," Wm. R. Wheeler; "Relations of Civil Bodies to Transportation in the Control of Term Franchises and Wharves," Dr. Geo. C. Pardee.

Afternoon Session, 2 o'clock. Theme, Organized Efforts.

"Educational Facilities and Development," Dr. Benjamin Ide Wheeler; "Advertising," Chas. W. Hornick; "Colonization Efforts," James Horsburgh, Jr.; "Chambers of Commerce"; "Fairs and Expositions," J. A. Filcher; "Soil Development," Col. John P. Irish.

Evening session, 6:30 o'clock. Banquet by Oakland Chamber of Commerce. Theme: "The Panama-Pacific International Exposition as a Means of California Development."

Saturday, January 7th, 10 a. m. Sight seeing excursions, conducted by the Oakland Chamber of Commerce.

RELATIONSHIP AMONG HORSES.

Relationship in the equine family is reckoned differently than in the human family among well posted horsemen. In the human family children of the same father and different mothers, also those of different fathers and the same mothers are called half-brothers or half-sisters or half-brother and sister according as the sex is male or female. No distinction is made in relationship between children of the same father and different mothers, and those of different fathers and the same mother.

Among horses such animals only as are from the same dam and by different sires are known as half-brothers, half-sisters, etc. This plan was adopted so as to enable persons to distinguish readily and briefly or without explanation between animals by the same sire and different dams and those from the same dam but by different sires. Most of the popular stallions get from five to ten times as many foals as are produced on an average by a single brood mare. Rysdyk's Hambletonian 10, for instance, got upwards of 1300 foals, one of which was the world's champion Dexter 2:17½. If the sexes were evenly divided there were upwards of 650 of each sex. Without the distinction above named there would have been less than six hundred and fifty half-brothers of Dexter 2:17½.

The terms brothers in blood, etc., is properly applied to such animals as are by the same sire and are from mares that are full sisters. For instance, the noted stallion Robert McGregor 2:17½ was by Major Edsall 2:29 and his dam was Nancy Whitman, by Seely's American Star 14. Lady Whitman 2:30 was a full sister of Nancy Whitman. A colt or filly by Major Edsall 2:29 and from Lady Whitman 2:30 would be a brother or sister in blood of Robert McGregor 2:17½. The blood lines of the two would be identical. Widow Machree 2:29 was by Seely's American Star 14, but her dam was from different ancestors than the dam of Nancy Whitman and Lady Whitman. A foal by Major Edsall 2:29 and from Widow Machree 2:29 would have been bred in similar lines to Robert McGregor 2:17½, but would not have been a brother or sister in blood of Robert McGregor 2:17½.—American Horse Breeder.

Temperament has a commercial value in the horse-breeding industry. Farmers should breed for reliable dispositions, as well as soundness and symmetrical conformation, if they expect to realize top market prices for their horses.

THE EARLY CLOSERS.

What is to be done with the early closing events? It gets monotonous to see two or three horses go clean down the line and take them all. What George Gano did last year and The Abbe this, are but samples of what occurs every year. In spite of the largeness of the purses they are robbed of supporting interest for there can be no excitement in seeing a race when the greenest of outsiders knows who the winner will be, harring accidents, before the race starts. It is a difficult question to solve. There are probably a score of owners and trainers now on a still hunt to get another Dudie Archdale or George Gano to capture the rich early closing events of 1911. They stimulate the breeding business and in this respect the big early closers do good. But how about the other horses which are compelled to race for place money clean through the season? How about the public who wish to see good races? They are surely the most important interests to consider. There can be no getting away from the fact that when the drivers in a race know that it is a foregone conclusion that one horse outclasses the field they will not drive their horses to the utmost limit in a vain effort to beat him and will be content to fight for the places. This eliminates the winner as a factor in the race, and the sole interest is in the battle for the place money. It has been suggested that the winner of a big race should be handicapped, but this is hardly practicable under present conditions. A very able secretary stated recently that if all the associations would agree, he would be willing to abolish the entire system of early-closing purses so that it would be impossible for one horse to make a clean sweep of the big purses.

We think the original Detroit plan with regard to the Merchants' and Manufacturers' \$10,000 stake was good. There was a consolation purse of \$2,000 for horses that started in the M. & M., and were not in the money. We would extend this idea. In a \$10,000 stake we would make the consolation \$4,000 and allow all horses to start in it except the first and second.

Another good plan would be in these very large stakes for the secretaries on the high line to agree to grade them. For instance, Grand Rapids could lead off with a \$10,000 stake for 2:25, Kalamazoo might follow with one at 2:20, and Detroit one at 2:15, Cleveland might follow with one at 2:12 and the next meeting with one at 2:10. After that there need be no reduction as a 2:10 trotting class will usually provide a good race unless some phenomenally fast horse is in. If there is such a one, like The Harvester or Uhan, he will still have to put up a respectable race, as there will always be enough horses to give him a contest in the homestretch.

The experience of the past year has shown the large number of eligible three and four-year-old trotters. The three-year-olds raced principally in the futurities, and the four-year-olds in the regular class races. We believe that a series of races for these ages, early-closing events, would be very popular. The three-year-olds could be for the 2:20 class. These races would not occur till the last week in July or the first week in August, when they should be ready for the fray. There were a large number of good three-year-olds which were not quite good enough for the futurities that would gladly jump into a four-year-old class, and this could also be arranged on a sliding scale. At the opening meeting it could be for a 2:20 class, at the next for a 2:17 class and at the next for a 2:12 class. As for the three-year-olds, people were always fond of seeing young trotters and there is generally a good contest.

There are two early closing events which would surely be popular with owners, for it would give them a chance to earn some extra money. Let the associations in the Grand and Great Western circuits give \$1,000 or \$2,000 purse handicaps for both trotters and pacers, or for a novelty there might be a good handicap for trotters and pacers combined in the purses of time allowance for the trotters. It is not a question of gait. The idea is the race, and a field of eight or ten trotters and pacers well handicapped should make a good race. No doubt at the winter sessions many suggestions of value and many new ideas will be evolved. The leaders of trotting sport have a golden opportunity. Thoroughbred sport has been totally eliminated in many States. The people love racing and if the leading trotting associations will meet the case, the trotting meetings will attract them.—The Horseman.

H. F. Howard, a former Kentuckian, has leased Ingalls Park, at Joliet, Illinois, and intends to give it a prominent place on the trotting horse map. The Great Western circuit already has granted the track two dates for 1911 and it will have the honor of opening that circuit Fourth of July week. A sale pavilion has been built recently, and it is the intention to make this famous mile track a wintering place for the trotting horse and a spring training ground that can be surpassed by few tracks in the country for its efficient equipment and all necessary conveniences. Magnus Flaws of Chicago will take up his residence there in the spring and will act as secretary of the sale company and the racing and fair association.

It is reported that Tommy Murphy will train Silent Brigade (2) 2:10½, and race him in his Futurity engagements, which include The Stock Farm Purse, the Matron, the Western Horseman and the Kentucky Futurity. The new owner of the colt is Gen. Brayton Ives.

NOTES AND NEWS

A Happy New Year.

Let's have a circuit in 1911.

What track will claim the first date?

The early meeting collects the most entrance money.

California horsemen are shaping their horses for the North Pacific Circuit. That always goes.

The stallion number of the Breeder and Sportsman will be issued Saturday, February 25th.

Fred Ward of Los Angeles made a visit to Chicago during the big auction sales this month.

It is time action of some sort is taken in regard to arranging for a California circuit of harness racing.

The stewards of the Grand Circuit will meet at Buffalo January 9th, when dates and purses will be announced.

Bingara is the sire of 180 colts, all of which, save one, are bays or browns. The one exception is gray, as are his first three dams.

The Occident Stake for foals of 1910 to trot in 1913 closes January 1st. Send your entries to Secretary Filcher at Sacramento.

Substitutions in Pacific Breeders' Futurity No. 10, for foals of 1910, can be made when the next payment is due in April, 1911, but not later.

The supposedly green pacer, Lady of the Lake, raced this year by H. C. Van Winkle, Waterloo, N. Y., is Susie Hal 2:12½. Horse and man are now on the expelled list.

James Y. Gatcomb has announced a \$2500 futurity for Audubon Boy trotters and pacers, foaled in 1912. Mr. Gatcomb, by the way, has moved his horses from Columbia, S. C., to Macon, Ga.

Hon. Ben F. Rush, senator from Solano county in the California Legislature, has been in the city this week. He reports a fine crop of yearlings at the Suisun Stock Farm by Demonio 2:11¼.

The foals of 1910, that are already nominated in Pacific Breeders' Futurity No. 10, are also eligible to be named in the Occident stake which closes January 1st, and also in the Stanford stake which does not close until the first of next June.

The total winnings of Emily Ellen (3) 2:09¼ were \$16,577.45. This puts her at the head of money winning three-year-old trotters of the year. Colorado E. 2:04¾ ranking second with \$16,475 to his credit. Mr. Look has booked Emily Ellen to Peter the Great 2:07¼.

W. W. Shuit, superintendent of William Bradley's Ardmear Farm, Raritan, N. J., turned over to the Fasig-Tipton Company the entire list of mares and youngsters which are scheduled to be sold at the coming Midwinter sale. The special catalog is now in preparation.

Holiday matinees are being held at many tracks in the southern part of California. The tracks all over the State are in good shape for fast work, as the rainfall is very late in getting started this season. A big storm is due now and may be looked for at any time.

S. S. Stiles, of Oakland, who has been confined to his bed with a severe illness, is gradually improving and hopes to be around again soon. His many friends among the horsemen wish him a happy new year, and hope he may raise another trotter as good as Helen Stiles 2:09¼.

The securing of an appropriation for district fairs from the Legislature which meets next month will not be a difficult proposition if those most interested will agree on a reasonable bill and work harmoniously to have it passed and to have the Governor sign it.

Eleven head of racehorses, valued at \$16,600 and harness, hoots, etc., worth \$550 were lost by fire at the Lake county track at St. Joseph, Mo., Nov. 9. The total loss is estimated at \$21,600. Nine other horses in another barn were saved by being removed from barn B, which was also burned. The heaviest losses will be by L. B. McCarger, Louis Huff, Fred Carman and Lieutenant Thomas Van Natta. The horses were being wintered at the track and the origin of the fire has not been learned. Mr. McCarger lost seven head, among them Kewanee Riley 2:08, Ottawa Boy 2:12¼, Maybelle and Miss Constantine.

H. K. Devereaux, president of the Grand Circuit, today issued a call for a national convention of all horsemen to meet in Buffalo on January 9th. The object is said to be "the betterment of all trotting interests, whether track managers, owners or trainers." The Pacific Coast should be represented at this convention.

Frank S. Gorton, who died in Chicago two weeks ago, was once the owner of the noted trotting stallion Tommy Britton 2:06½ and of the famous pacer Directly 2:03¼. As a breeder Mr. Gorton never carried on a very extensive plant, but his Gretna Farm, near Chicago, was, at one time or another, the home of many noted trotters and pacers.

Miss Lotta Crabtree announces that with the sale of Sonoma Girl she is through with the trotting turf and will never own any more fast horses. This means also that her brother, Jack Crabtree, who was manager of the Crabtree stable, will not henceforth be seen at any of the trotting meetings save occasionally perhaps, as a spectator.

Charles James has added the pacer Jerry D. 2:17½ to his string at Pleasanton, and will get him ready to race in 1911. On the first of January he will bring Reina Directum in from the Santa Rita Farm, where she has been at pasture for several months, and put her in condition to win more cups for her owner, S. Christenson.

The case involving money in the M. & M. of 1910 on the protest of W. J. Andrews will not be heard by the Board of Review until May, Andrews not being able to attend the December session. The claim made is that the judges did not properly apply the rules when they placed Henry H. ahead of Myrtle Grannet in a heat, Andrews alleging that Henry M. pacing during a greater part of the last half mile.

M. E. Sturgis of New York, a prominent figure at practically all the Grand Circuit meetings and one time owner of many fast performers, among them the champion Dan Patch 1:55¼, is said to again be in the humor of entering the game, if Myron McHenry decides to devote his time to barnass affairs. It will be recalled that Mr. Sturgis disposed of his stable when McHenry went to the runners.

Several owners of mares at Salinas are considering the making up of a car load of mares to be sent to Hemet, Cal., this year to be bred to Kinney Lou 2:07¾, sire of the world's champion yearling colt trotter. Kinney Lou is very popular at Salinas, and by the breeders joining together and shipping the mares before they foal they will save freight charges and run little chance of injury.

San Juan 2:22½ the fast and handsome son of Nutwood Wilkes and Alice McKinney, that was entered on the Great Western Circuit last season, but owing to a severe illness was unable to start, is again back in his old stable at Napa where he has many admirers. After a light season in the stud he will again be put in condition to race and will doubtless take a low record.

H. W. West, fire chief of Greenfield, O., and an ardent fancier of the light harness horse, is at present using in his department a pair of geldings by a son of the good trotting sire, St. Vincent 2:13½ and out of a percheron mare. They are full brothers, five and six years old, weighing a trifle over sixteen hundred pounds, with speed of a surprising nature and action that is unsurpassed. As a result of Chief West's ability, this team is about as well trained as can be found in any department in the country.

The firm of M. Newgass & Son has temporarily at least retired from business at the Chicago horse market. This is one of the oldest horse commission firms of Chicago and for years has done an immense business in handling draft horses. The transfer of Louis Newgass to New York to manage the eastern coach horse department of the firm left the management of the Chicago business with William Newgass, whose poor health has compelled the present retirement from business.

Death claimed last week two prominent Ohio trotting horse owners. J. E. French, of Cleveland, was the breeder of Jack McKerron 2:07¼, and at one time owned Sunland Belle, p., 2:08¼. He was also the father-in-law of Harry K. Devereux. Fred S. Miller, of Elyria, was the owner of Maxine 2:09¼, and bred her to John A. McKerron. He also at one time owned Imogene 2:11¼ and other horses he drove in matinees.

The King of England has nominated a lot of thoroughbred colts and fillies in the stake races to be run next year at Epsom, Newmarket, Ascot and other meetings, and it is thought that he will unfurl the purple and scarlet racing colors of his father at these meetings in April. There are other indications, too that he will follow in the footsteps of his father, the late King Edward, in giving encouragement in every possible way to horse breeding and to riding and driving. He has become the patron of the International Horse Show to be held in London on June 14 to 24, and it is said that he will shortly give practical expression to his wish that only horse-drawn carriages be used by those attending the royal reception and other functions.

An enterprising down East trotting association issued two sets of entry blanks. The first contained very liberal conditions, while the second were very stringent. When they attempted to enforce the latter, the horsemen who had entered on the first entry blank made a decided kick and the National Trotting Association sustained the horsemen and decided that the owners and drivers were entitled to race under the first set of conditions.

Dr. E. J. Weldon of Sacramento will send his good mare Expedito (3) 2:14½ to Chas. De Ryder at Pleasanton next week. Expedito is by F. E. Wright's handsome stallion Lijero 2:15½ and is herself one of the handsomest trotting mares in California. She took her record in the third heat of the Occident Stake of 1910 and should make a very fast four-year-old trotter, as she has all the qualifications of a game race horse.

In the Louisiana Futurity for three-year-old trotters raced at Shreveport, November 7, Silent Dale, a son of Silent Brook, won easily over the rest of the field, trotting the final heat in 2:24¼. Silent Dale is owned by the Dixie Stock Farm, Marksville, La., and is of the bluest blood, being sired by Ondale 2:23½, out of Esther Brook, by Silent Brook 2:16½, his second dam being a daughter of King Rene 1278, third dam by Homer 1235.

The matinee races to be given at the Hemet Stock Farm on Monday, January 2, 1911, promise to be very interesting and will undoubtedly attract a large crowd of people to Hemet. The Hemet Driving Club will spare no pains to make this the best matinee in the history of the association. Wilbur Lou, the world's champion yearling stallion; Kinney Lou, sire of Wilbur Lou; Geo. W. McKinney and many other fine horses will be on exhibition, besides there will be some fast tryouts.

A Kentucky breeder of thoroughbreds owns a stock farm in the blue grass region, one boundary of which is formed by a railroad track. Among the horses quartered at the farm was a certain high-priced quince, which after repeated trials had dismally failed to make good. The horse's owner was disgusted with the animal as a performer, but thinking his progeny might make good, decided to keep him for breeding purposes. However, like their sire, the stallion's first crop of yearlings proved to be failures, and one day when the Kentuckian's overseer announced that the high-priced lemon had been killed by an engine, the horseman immediately began suit against the railroad. The court awarded the Kentuckian a handsome verdict, which he commented upon as follows to a friend: "After all, when it comes down to cases, I guess the best way in the world to improve the breed of thoroughbred runners is to cross them with a good railroad locomotive."

Senator James A. Bailey was the most extensive buyer of brood mares and fillies at the Old Glory Sale. Judging from the number and quality of the purchases, Senator Bailey must be contemplating the enlargement of his breeding operations, which were already of very large proportions. The mares he bought were mostly record mares, but always with a notable ancestry back of them. Prodigal 2:16 is about the only really great living sire of the Mambino family, and he has placed his name among the great sires of his time. So many of his daughters are now owned by his owner, that it has come to the time when another stallion is almost a necessity on this farm which probably accounts for the purchase by him of the three-year-old colt Morgan Axworthy, by Axworthy 2:11½, son of Axtell 2:12, dam Kinglyne (own sister to Bingen 2:06¼), by May King. This colt is, of course, untried, but his blood lines, with its strong Electioneer line, its three crosses to Almont, make him an ideal colt so far as his ancestry is concerned to use as a cross for daughters of Prodigal.

FITTING HORSES FOR SALE.

Time spent in fitting a horse for sale pays out in satisfaction to the owner and the buyer is almost always willing to pay to get it with the animal that he purchases. One can cut down on the feed a great deal if he increases the grooming. Never show an animal until his mane is well brushed out. The same care should be spent on the tail. The bone on the leg will show a great deal cleaner and flatter if the hair on the fetlock and all over is curried so as to lay down well. It is always well to practice showing a horse a few times before you take him out. A little patience and a few cracks with the whip will soon teach him what you want of him. If you show a pair hitched, shorten the inside checks so that they can be handled better. Then they respond more quickly to the lines, and they cannot handle their heads in a sloppy, lazy manner.

In showing a pair to halter, do not stand between them, as they can be handled far better by tying the halter strap of the one to the halter of the other. Then they show up as a team and not as two single animals. When handling a single horse, grasp the halter where you can handle him. When the animal stands, get hold of the strap that goes just beneath the throat. Then he can be made to hold his head just where you want it. Make him keep his feet together. If he does not, give him a little whip crack. It is not likely to hurt and will help appearances wonderfully.

RIVERSIDE HORSES WIN FOUR RACES.

The matinee held by the horsemen of San Bernardino, Riverside and Hemet on Monday, Dec. 26th. at Riverside track was largely attended. Nine horses were entered from Riverside, seven from San Bernardino, and one from Hemet. The events resulted as follows:

The first event, the 2:40 mixed, was won by Prince Valentine, G. M. Carrigan of Riverside, owner, Time, 2:40.

Following this was the 2:30 trot, which was won by Dark Streak, owned by W. E. Webster of Riverside. Time, 2:35.

The third event was the 2:16 pace. This was taken by On Bly, owned by James Campbell of San Bernardino. Time, 2:17½.

In the free-for-all trot Buster Wilkes, owned by A. N. Lemm of Riverside won in 2:17½. Mr. Lemm's horse has been worked but a short time and made a phenomenal record, defeating Bolock in two straight heats in 2:19 and 2:17½.

The cart race for thoroughbreds was taken by Tallaran, the property of Truman F. Hoagland of San Bernardino, making a mile in 1:52.

The 2:25 pace was captured by Lady L., owned by N. M. McKaughan of Riverside. Time, 2:35.

The 2:25 trot was taken in 2:21 by Mabel Van, owned by F. Van Tress of San Bernardino.

In the fourth event Monk, owned by H. Eigenbrodt of Riverside, had intended to attempt to lower the track record of 2:09½, but the track was heavy and the wind was blowing quite briskly, so this event was called off.

The next meeting of the Tri-Club association of horsemen will be in Hemet next Monday.

AN OREGON 39-YEAR OLD.

There is a horse owned at Portland, Oregon, that will be 39 years old next March if he survives the winter, and he has every prospect of doing so. His name is Autocrat and he was bred by Chas. S. Dole, Crystal Lake Farm, Illinois. He was sold to Simeon G. Reed, Portland, Oregon, in 1876, and to William Sherlock at Reed's dispersal sale in 1883.

As frisky as a spring lamb, and as gentle, the old pet of the Sherlock family, once the pride of William Sherlock, who died 10 years ago, roams at will in a large vacant lot in the rear of the row of residences just north of Washington street, on Twenty-first street, eats the best that can be had for him and receives the attention of all the members of the family.

This horse, once a very fast animal, has not felt the touch of a rein, nor the pull of a tug for 10 years—not since his owner, William Sherlock, tied him in the stall for the last time. The day after the remains of Mr. Sherlock were removed to the cemetery, "Autocrat's" shoes were pulled off, and he was turned loose in his field.

"If that horse should be taken away from us, I know he would die very quickly," said Miss Huber, a member of the family, "and it is our hope that he will die before it becomes necessary to send him away."

Nature has been very good to Autocrat. It has preserved his teeth and kept him from disease, but it could not prevent the old chestnut animal from turning gray in a few spots. Many people remember the old horse as one of the fastest that ever traveled the roads through the city when driven by his owner, and even now it is not a few people who think to slip a lump of sugar in their pockets for the horse as they pass the pasture where he loafs and lives a happy, careless life—if that is a part of horse life.

Autocrat is a bit particular about who enters his little yard. When a stranger attempted to photograph him the other day he kicked up his heels like a young colt, tore around the field as if to impress one with his bravery and then approached the photographer in the hopes that there would be a lump of sugar for him.

Twenty-nine years of service won this horse 10 years of rest and care, and according to every member of his old owner's family, he will have the same care 10 years more if he lives.

MAY BUY STOCKTON TRACK.

Stockton, Dec. 21.—The final step to recover the famous old Stockton race track property southeast of this city was taken today when District Attorney G. F. McNoble referred the many documents in connection with the cases to Attorney-General Webb for an opinion. For years there have been numerous actions to restore the property to the public, but invariably there has been some technicality on which the cases have been referred back to the trial court for a rehearing.

Recently a compromise was agreed upon, and the Board of Supervisors was asked to purchase the property for the county, which will have complete control of the same and give the old-time fairs each year, providing assistance can be secured by an appropriation from the State through the Legislature.

District Attorney McNoble is of the opinion that the Supervisors can purchase the land, but he wishes the Attorney-General to pass upon the papers in question. Action has already been taken to revive the country fair.

Drink Jackson's Napa Soda.

THE ROADS OF ENGLAND.

There was something statesmanlike in the foresight that suggested to the invading Romans the idea of building permanent roads into the remote corners of the provinces they conquered, wilderness though many of them were. Our own age yields tribute to the great pioneer railway builders of our Western country, and to them civilization owes a debt through their subjugation of distance, and in their bringing of wide stretches of fertile land, otherwise inaccessible, within the reach of commerce. There is something ever more picturesque in the pathway that the Roman army cut through hill and forest, as it stretched its iron hand out over almost all Europe. It was much more than a "blazed trail." Great highways were constructed leading from one point of vantage to another in such manner that the supremacy of the imperial city reached out through these open arteries to the provinces and kept the confines of her empire secure. The old Roman roads in Britain have not yet passed out of use, but remain still as monuments to the Roman genius for conquest, and as object lessons to those who have builded in after years.

Many European countries seem to have fallen heir to this heritage. Travelers from America remark this as one of the first impressions of their visit. The long, level stretches of straight country road in France tell very plainly of the value that is set there upon the commercial advantage of ease and safety of locomotion upon the public highways. In Scotland and England the roads are equally as good, even though the twists and turns in them remind one of the tracks of sheep across a pasture field. He must have his wits about him, who would follow the intricacies of a cyclist's road map. But though direction may be difficult, the roads are one with the beauty of the rural landscape and one with the stability of the energies of the British people. The conviction grew upon me that herein the country possessed a permanent asset, and one that proved a very important factor in its prosperity. It is a question of wider significance than we think.

The first impression is one of delight in journeying through the country. The hedges have had their turn or bloom. The blackberries, the hawthorn, the wild rose and the honeysuckle appear in blossom one after the other, and in the spring time make the whole air fragrant. Now and again, by the grounds of a mansion of a large estate, the hedges change to brick walls, higher than a man's head, which leave the passerby in wonder at the gardens and groves which lie within. Beyond the walls lies the open stretch, with the green fields on either side, and farther on is a meadow, where the skurry of the rabbits to their burrows brings a stranger to his feet to watch them. At a turn of the hedge, we enter a wood, and the sunlight through the trees remains in the imagination as a memory that will not pass.

But it is of the roads themselves I have to speak. They are built as those of city streets. The foundation is of broken stone. Two years ago I saw the old men at work with their hammers, cracking the stone by the roadside. A slow and tedious job it seemed to be, but the square, neat piles gradually grew as the hours passed, for these old-timers had the knack of the thing, and the merry clip, clip of their hammers usually told its tale. This year there were fewer of them, the power crusher having largely come into use. The crushed stone is carted from the mill to the roadside, and left in recesses placed at intervals for the purpose. In past years, after being carefully laid, this was largely worked into a solid roadbed by the traffic, but now steam rollers are used. The heavy stone, however, is not now needed so much as formerly, except in construction. Much of the work at present consists in dressing the surface with a light layer of fine stuff, which is frequently laid down solely in the tracks left by the cart wheels, or perhaps I should say by the motor cars. The rubber tires have a habit of sucking away the lighter material of the surface layer, and thus distinct tracks are gradually worked into the roadbed. When these are formed, the rain, instead of running off to the side, trickles down these channels, and further destroys the surface. On this account, a special tax is being placed on motors, and an effort is being made to have part of this revert to the municipalities for use in road improvement.

The work on the roads is under control of the counties, and a special tax is levied for the purpose. The counties own their own machinery, and employ their own foremen and gangs of men. These men, with their steam rollers, carts, sprinklers, etc., we saw at work in gangs all over the country. They dress the road wherever it is necessary, leaving the surface slightly rounded from side to side to shed the water. They also trim the turf at the edges, and cut channels to the ditches, as occasion may require.

These roads are of immense advantage to the country districts, and bring them within much more convenient access of markets. Buyers of farm produce, of whatever kind, find no difficulty in covering large sections of the country in a day, which fact in itself is a very great stimulus to business. I myself traveled seventy-five miles in a day, on a visit to different stock farms, and this would not be considered a big day's work. Our own country falls far short of such facilities for travel, and we have the greater need, since distances are greater, and railway lines much farther apart. There is encouragement to producers and breeders in knowing that their farms can be easily reached, and many remote and outlying farms would come into this category through the

medium of good roads. Further, with travel made easy, the townspeople go much more into the country, and take a large trade with them, and indirectly create a greater demand for all that the country yields. Continual regret is expressed at the isolation of life on the farm. It would be a revelation to many to see how much real social enjoyment there is in the country districts of the Old Land, and how much evidence there is of it in the traffic upon the roads. Walking, driving, bicycling, motoring—each plays its part; and when travel is made a pleasure, people are brought nearer together. I know of men that wheel nineteen miles to business in London on a Monday morning, after having spent the week-end in the country. The week-end holiday is one of the great recreations of the English people, and city life and country life thus join hands.

One other thing I noticed: well-kept roads have given a stimulus to the production of better horseflesh. A farmer is almost ashamed to appear with a dirty carriage and a shabby looking horse. His pony and trap are usually very smart and trim, and he takes a pride in them. His cart horse, even, has something of the gentleman about him. And so the story goes. I need not speak of mail delivery, access to school, obtaining of provisions and carriage of goods to market. This I will say, that, other things being equal, a remote country district can have few things more conducive to prosperity than the easy access which is given to it through good roads.—
—M. S. Arkell.

THE PREHISTORIC HORSE.

In a lecture delivered at Edinburgh, Scotland, recently Professor Cossar-Ewart said: "Engravings and paintings suggested that towards the close of the early Stone Age at least four distinct types of horses ranged over Western Europe. Some of those engravings gave a striking portrait of the wild horse, which still survived in Mongolia. Bones from Pliocene and more recent deposits supported the conclusions arrived at from a critical study of the paleolithic engravings and colored drawings. In addition to fossil bones belonging to a horse with a coarse head but slender limbs, as in the wild horse of Mongolia, bones and teeth had been found at Salubre, to the north of Lyons, in the elephant bed at Brighton and elsewhere, which belonged to a robust race almost identical with the stout, broad-browed, modern, long and low Iceland ponies—to a race probably as well adapted for a forest life as the wild horse of Mongolia was adapted for a 'steppe' life. Other fossil and sub-fossil bones, more especially bones from the Siwalik hills or India, afforded evidence of the existence in Pliocene times of a fine-limbed horse, measuring not less than 15 hands at the withers, which, but for the face being strongly deflected on the cranium, differed but little from Stockwell, Persimmon and other thoroughbreds, with a marked prominence between the eyes, such as are found in certain Arab and Indian strains." The lecturer also referred to the evidence found of a fine-limbed race, which included the Celtic pony, though only from 12 hands to 13 hands high, in prehistoric times, which contributed to the making of modern as well as ancient racehorses, more especially to the finer kinds of desert Arabs.

SMALL HANDICAPS.

An erroneous idea has got abroad that a trotting handicap to be a success must have a large purse in order to attract the horses. The first big handicap was for \$50,000 and was practically a failure because it had too many entries and the best horses were never able to get through the field in front of them. It has been demonstrated that such a handicap can not be made to pay, for neither a large entry list nor a good gate will meet the enormous expense.

The next big handicap which was also at Boston, was for \$15,000, and was a success. The Kentucky Trotting Association tried them, but Secretary Wilson did not find them a success. The purses were \$5000 each. We think the reason which militates against them is that the purses have been too large and that they should not be early closing events. There is no reason on earth when free-for-all horses are willing to trot for purses of \$1000 or \$2000 why they should not be eager to earn money in a handicap for the same amount. Handicapping is a new thing on the American trotting turf, and we probably have not got it down to a fine point yet, but we generally succeed in what we undertake and the handicap system will be one of the popular races of the meeting. The idea of the handicap is sportsmanlike and should appeal to all horsemen. It aims to put the 2:00 horse and the 2:30 horse on an absolutely equal basis, leaving to the uncertainties of the race to find the actual winner. If we could imagine a perfect handicap and the horses all in equal condition, with drivers of equal ability, the horses should all finish together. Of course these conditions never occur, but in England a dead heat between three horses has occurred, which showed good handicapping. Our class system is supposed to bring all horses equal to the post, but it fails in many cases and especially in the early closing events which experience proves often goes to one horse who has been carefully positioned. George Gano, The Harvester last year, The Abbe and Dudie Archdale this year are brilliant examples.—
Horseman.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT.

RANDOM NOTES.

[By Loch Laddie.]

It often happens that well intentioned sportsmen will wait until about a month before the opening of the season before getting a dog. This eleventh hour delay depending on making a purchase from some dealer to supply them with an animal suitable to their requirements. This subject has been written on before but it cannot be justly considered out of place again, for the month of October is generally the time when the disposition of the greatest number of canine friends are made.

Some will meet with success and others will meet with disaster, principally for two reasons. First, the lack of the purchaser's ability to handle the dog, and one thing more important possibly than the former—is not putting your dog deal on a business basis. Very few kennels will send out a dog on approval during the shooting season. You can't blame them for the reason especially that many unscrupulous persons who did not care to be hardened with the keeping of a dog were perfectly willing to put up the express fees for a tryout—a mere subterfuge on their part to obtain a few days of the season's shooting over a dog, and the only expense would be the express rates both ways on the dog. When through, return it to the dealer as not up to expectations or too slow, or the opposite. So it would not be wise to wait until the last moment, for no matter what price you and the dealer may have agreed upon, I believe you are entitled to a trial before paying your money for an animal which may not be to your liking in the least and then again the average business man must generally almost steal the few hours he gets in the open season. These may be the only opportunities to give the dog a trial, and a personal trial may be of more satisfaction than the approval of all the professional trainers on earth.

Credentials of your good intention, that you actually want to buy a dog, should have sufficient influence on a dealer of reliability to give you a fair trial prior to accepting your money. And one who has the goods to deliver will not hesitate when your integrity is vouched for.

The usual time allotted for a trial, three days, is too short, and personally I believe more satisfaction would result to both sides interested if you were not to try the dog for three days after receiving same. For a dog is not at home to his new environments until then, and also the change of master is a factor not to be ignored. His affection for his old owner remains with him for some time and until you have won this it is not always right to expect the highest performance the dumb beast is capable of until the affection for his first master has been transferred to you.

Like human beings, some dogs are quicker to adapt themselves to new environments than others, and a little affection lavished on him between the time you take him out of a crate and put him down afield will not be wasted, for if you have gained his confidence he will try to show you quickly what kind of performance he is capable of.

Avoid cheap dogs. Dogs of standard breeding, like standard goods, have their regulated price and to expect to get a dog of fashionable breeding and of high class field qualities under \$100 is almost an impossibility. Certainly the handler can't come out even. Don't let pedigree alone influence you, but demand performance with it.

Certain dogs shine under certain conditions, and it is not always well to boast of the accomplishments of your dog when he is worked in a strange country, for he is liable to go wrong, and environments unfamiliar to him might take away your opinion of his good qualities. Often dogs fail to shine conspicuously in strange territories, and the peculiarity of their going might possibly be affected by the quail country you are hunting in. So much so is this the case that one should refrain from forming an opinion of a dog's performance when he is hunting in strange territory. A dog that is continually worked in open country where the cover is scarcely ever over shoe-top deep naturally thinks it an easy job to skip merrily over the fields and never strikes cover heavy enough to force him to check his easy-going gait. Put this same dog down in rank bottom cover where the corn is of strong growth, some half blown down, swales of rank plum and ragweed that tower above his head, open spots of green-briar, sedge and blackberry confront him. Of course his natural ambition encourages him to go at the pace he is accustomed to and he breasts these obstacles until he soon tires, and naturally then his ability to find birds is largely eliminated. The dog trained under these conditions knows exactly how to go through all this and save himself, but also has the knowledge of where birds ought to feed and the most likely places to find them. In warmer days this change of hunting grounds from light to heavy cover seems to affect setters more than pointers, and the usual accompaniment of burr patches makes life miserable for a setter until he becomes callous to these pests. But some dogs have a faculty of never being affected by a change, and

many a bold setter will work in a burr patch until he is bleeding before he would condescend to rid himself of one of these pests. Yet the change of locality and the difference in a dog's work is not so noticeable until a dog that is accustomed to the surroundings and one that has never been there before are put down together. Though the case is often reversed, the home dog usually has the best of it.

For several years the writer has had a hitch staying over in the bottoms. While a fair worker, I never considered her in the same class with the stud dog here on the highlands. One week I went down to see her, taking the service dog with me, expecting to show the bitch what real work was. I was very sorely disappointed; the old dog never had a look-in at the game with the bitch. To use a cant phrase, she worked rings around him and found over two-thirds of the coverts and singles. The dog, a big 60-pound setter, could not keep near the bitch, which only weighs 35 pounds. Yet in the uplands the bitch had no chance of a covert find with him. There conditions were reversed and the big fellow was slow to learn how to hreast the rank swamp growth when the bitch set a fast pace for him.

The demand for excessive speed in a shooting dog is not quite so great as before and extremes of range are not such desirable points in dogs as formerly, and the desire for a shooting dog to closely emulate his illustrious brother of the trial world is waning into a demand for a thing of utility. Speed is a fine thing, but an excess of it often worse than none. The average sportsman likes to go for birds and spend a few hours shooting, and his desire to see a dog run is overbalanced by the desire to see the dog secure something.

Speed with great bird sense and stanchness is an admirable quality, and a slow dog does not compare with him, but let him possess only the attribute of speed and lack in the last two essentials, and he falls rapidly below the standpoint of a good shooting companion. The combination of speed, bird sense and thorough stanchness is to me the highest type of a field dog, for even though apparently so fast as to appear exaggerated on that point, his great bird sense will make all kinds of conditions easy to him. But men who are accustomed to close-working dogs and slow at that, can not quickly get away from the idea that a fast dog must necessarily run over game. He is so accustomed to cautioning a slow dog that this idea becomes second nature with him, and until he puts the two together and finds that the fairly fast dog will accomplish more than his pottering companion, he is always nervous in anticipating a voluntary flush. Many fast dogs can give hair-raising exhibitions of how to snap up coverts and singles stanchly and it is a treat to watch them pick up point on birds without resorting to painful over-caution. But if he lacks in bird work, the most important point, then the slow-going dog has him beaten.

Writers in various papers have predicted that the practice of having pointers and setters do the retrieving will soon be obsolete. They set forth the idea that at least two dogs should be taken to the field, a pointer or setter to do the bird work, and a spaniel or straight-bred retriever to follow at heel for the purpose of finding. The theory on which these writers base their arguments is that many otherwise valuable dogs are hacked badly by holding them up to retrieve dead birds.

In many cases this is very true, especially so for a young dog who dislikes to be held up to hunt dead. Possibly the field trials have been more to blame than anything else for putting the ban on retrieving. In field trials the dog is expected to do only one thing—bunt and find birds stanchly—and the faster he does this and the greater amount of ground covered, in proportion will be his chances of gaining place. But the average man, who gets only a few birds each year, or rather a few days to hunt in, wants birds; he not only wants a dog that will find birds, but find the dead birds also and retrieve them. Possibly, he is limited to one dog, and the nearer that dog fills the requirements of a combination dog the better he is suited.

It is a matter of great convenience to have a good dead bird finder and retriever combined, for the colors of birds, even in open fields, blend so closely with the surrounding herbage that it is an extremely difficult matter to find a bird unassisted by a dog, even when one thinks he has marked the spot carefully. You may hunt and hunt and vow persistently that he fell just where you said he did, but careful search fails to reward your efforts with the bird. How many times have you been certain that you killed your bird instantly, only to have the dog show that you were wrong? Sometimes a fast-flying bird, whose wing is suddenly shattered by shot, drops as though he is perfectly dead, and when you go to find him both you and the dog have a busy time trying to capture a swift-running cripple.

Another occasion when a retriever is invaluable is after a bird seems to be merely feathered; you watch carefully his flight and he hurtles off to cover a quarter of a mile away, when he suddenly drops into

a rank growth of blackberry and green briar, almost impenetrable by man. Had you not a retriever the chances are the bird would be lost. Many a miry hole forms the resting place for a dead bird, so that when one considers the necessity of having a retriever, we hope it will never become a fault in a dog to find for his master.

ECHOES FROM THE NORTHWEST.

[By August Wolf]

The first action taken by the Spokane Protective Association for the purpose of having new laws enacted at the coming meeting of the Washington legislature, occurred November 30 when the committee appointed by the association met with the Spokane county members of the legislature.

Al Weismann, S. S. Drew, superintendent of the Little Spokane hatchery; J. A. Uhlig, game warden, and Judge Richardson, will represent the association and urge the passage of laws that have been drafted by the committee.

The most important law that is desired by the Spokane county anglers is one that will require all irrigation companies to put screens at the head of all ditches in the State. It is claimed that a large number of fish are destroyed each year by getting into the ditches. A law to regulate the use of salmon eggs was discussed by the committee at the meeting. The protective association is in fine condition and it is expected that there will be over 300 new members in the organization before the season opens next year. Over 5,000,000 fry will be placed in the lakes and streams by the association during the coming year.

Harry Madden, J. Perkins and J. Jensen of Metairie Falls, north of Spokane, together with several friends, have returned from a trip to Sullivan Lake, having been successful in securing a deer apiece. They report seeing from 50 to 75 deer on their travels, but as they had each secured the number allowed by law they did not molest the remainder. Jensen secured one weighing 270 pounds when dressed, which was of the mule deer variety. The heads have been sent to Spokane for mounting.

Driven by a coyote a frightened deer ran into the city of Walla Walla, Wash., southwest of Spokane, November 26, its tongue hanging out and nearly exhausted. Running into the grounds of the S. P. Wright home the animal started to drink from a brook which runs through the Wright yard, but, startled by some one on the street, ran suddenly and colliding with a wire fence, broke its neck, dying instantly. The deer was seen from several places outside of town and apparently came from the Dry creek region. E. J. Cantowin, who saw it before it reached the city, says the coyote was then chasing it.

Big game is more plentiful in the Blue mountains, southwest of Spokane, this fall than for 20 years, according to settlers in the Oregon buttes, Tukanon and Jim creek districts. Forest Ranger W. H. Kendall, in charge of the Wenaha reserve, says 25 deer have been killed in the reserve in the last three weeks. Bears are being killed in large numbers on the Tukanon, Turkey Tails and Goman's, no less than a dozen having been slain in the last fortnight by Dayton hunters. Several cinnamon bears, which heretofore have been scarce in the Blue ranges, have been killed this fall. The rapid increase of wild animals in the last few years is unexplained. Wolves, cougar, lynx and wildcats are growing more numerous every year and the trapping industry has been revived, several men now being camped for the winter with trapping outfits.

Calvin A. Lunceford, foreman under the Board of Public Works, who died in Minneapolis, November 16, was buried in Spokane. Mr. Lunceford was a well-known citizen, prominent in mining circles and a lover of outdoor life. He was actively engaged in trying to preserve the fish and game of the country about Spokane, and had taken steps to have many districts protected which gradually were being depleted of fish. He had finally arranged with the farmers of the Rock Lake district that no shooting should be done about the borders of the lake, and had had an agreement made by which the shores of the lake should be kept free from hunters. He leaves a wife and two sons, Gordon, aged 13 years, and Wallace, aged 10 years, living at 828 Knox avenue, Spokane.

Bear hunters in the Clearwater valley, southeast of Spokane, are reveling in the best sport in years, following the devastating forest fires on the reserve above Kooskia. The flames in August drove bears and deer to the open spots along the Clearwater river, and after finding feeding grounds the animals did not leave. Victor Olson, with a single-shot 25-20 rifle, killed a brown bear and her two cubs, three miles from Stites, Idaho. Deer are particularly plentiful in the meadows along the south and middle forks of the Clearwater. The open season closes January 1.

Wild geese are invading the wheat fields of the Horse Heaven country, west of Spokane. Joe Barclay of Spokane and a party of friends from North Dakota enjoyed a goose hunt in that district, the bag was a large one.

WHAT THE TUNA CLUB HAS DONE.

What tuna fishing in the Catalina waters is and what the Tuna Club has done for Southern California is aptly described by Professor Chas. F. Holder in an interview which took place following his receipt of a telegram from Avalon one day which read:

"Brodie, 126 pounds, two hours and 5 minutes; C. G. Conn, 110 pounds, 6 hours and 5 minutes."

"To the layman," said Professor Holder, "this conveys no special meaning, but to the anglers of the world it means that the leaping tuna had begun to bite and that two 'workmen' had succeeded in taking the king of game fishes with tackle so light that the story seems more impossible. It meant that Mr. Conn of Elkhart had fought a tuna for six hours without let up, and that Mr. Brodie of Los Angeles had pulled in his fish in two hours. The Associated Press dispatches telling this story, created interest all over the world, as the Tuna Club has among its 400 or 500 members, representatives among the anglers of almost every large city.

It is interesting to note how a fish can attract attention to a state. The Moa bird made New Zealand famous, seals called attention to Alaska. Tigers occur to one in thinking of India, and, as it would be very difficult to find any one in the East, or in England who is not familiar with the leaping tuna, and the Tuna Club, it is fair to assume that this fish had something to do in making Southern California famous, as it is known all over the world as an angling center. A well known railroad man of the East told me that the tuna had made Southern California famous, he gave the climate second place. This may be the experience of some, but it is an easy matter to demonstrate that this single fish has done more to attract attention to Southern California than all the combined efforts of the professional advertisers put together.

There is something remarkable in the fascination this fish has had for every one and there is not a paper, journal, or magazine in this country, England, Germany or France that has not devoted space to descriptions of this remarkable fish and how it has been caught by members of the Tuna Club in Southern California waters. Dozens of hooks contain accounts of it in this country and England, and the two big catches of last season started the interest anew.

Thousands of anglers have tried their skill and muscles against the fish, and have gone down before it. Tiger and elephant hunting is a bagatelle to it in the estimation of Mr. John Campbell Downes, who has tried both; dozens of men have been laid low by the tuna. Two men have been killed outright by exhaustion from playing the fish and others have given up in despair and cut away from the fish after having been towed miles to sea. It is sport for men with nerve and grit, and red blood in their veins, men who enjoy sport with a spice of uncertainty, and danger in it, and who have a little dash of the bull-dog "hanging on" quality, and in sixteen years of the graphic history of the Tuna Club, during which it is estimated thousands of men have tried it, expending thousands of dollars, not over twenty-five members of the club have won the little blue hutton of the club, which tells that they have taken a leaping tuna of 100 pounds or over. Under the club rules hundreds of men have made the pilgrimage from England and camped on the trail of this will-of-the-wisp of a fish to win that hutton, and in all the history of angling there is nothing just like it, as the fish rarely gives up and when it does it dies in the instant of heart failure. Many a time when pushing the fight to the limit of my strength and almost beaten, I have felt the rush of the fish suddenly stop and up it turned, coming in at the end of the two or three hour fight, stone dead.

The leaping tuna, or tunny as it is there called, means the living of many fisherman in the Mediterranean, but in California it means the bringing of large sums to the entire Coast, and is of as much value to all California as to Santa Catalina anglers. No where in the world is a fish so valuable as a State asset as here, as by means of it the truth regarding our wonderful fishing has gone all over the world, and in all probability the Tuna Club is better known in London and New York, than in Southern California. We are apt to pass by sport and especially angling, as a mere pastime, but the sea anglers of the world bring a vast sum to Southern California every year and the amount of money they spend in fares from London and New York in hotel bills in Pasadena, Los Angeles and Avalon, in launches at \$10 per day, in rods at \$50 and \$75, in reels from \$20 to \$75, in lines costing \$5 or more, would astonish the layman. There are among our Southern California anglers some whose fishing tackle runs up into the thousands. We underestimate the value of the sport in California, but the state of Maine, estimates, and proves that its sportsmen bring into it over five million dollars annually, and I venture the statement that our sea fishing alone brings over three million into this State every year that finds its way all along the Coast. If the actual sum total expended in sport in California could be collected annually, the sum total would astonish even the thousands of economists. Tuna fishing as followed by the Tuna Club is not exactly a poor man's sport, and your real angler is a prolific spender of money. I recall the statement of one Englishman who came to California to catch a leaping tuna, although I very carefully advised him that the chances were that he would not see one, he did not see one, but I laid out for him an angling trip

which he followed, and this one angler spent over two thousand dollars on his fishing trips. The trip I outlined for him began at New York, then to Florida for certain fishes including the amber jack, then to Aransas Pass for tarpon, to Santa Catalina for yellow-tail, white sea bass and a possible tuna. From here he went to San Clemente, thence to the coast cities of Coronado, Santa Barbara, fishing for trout in San Antonio canon, at Seven Oaks, then to Monterey and Capitola for salmon, then to Tahoe, Truckee, then Feather River, Klamath to Oregon, to Vancouver for sea salmon, and to make a long story short, he fished Canada to the St. Lawrence, and ended up with the landlocked salmon at Lake St. John, which I sent him to at the suggestion of Dr. Henry Van Dyke.

He fished entirely around the continent, spending six months in this country, and expending a large amount of money, and best of all was delighted. This gentleman received every attention. At my request the Southern Pacific had their agent call on him in London before he started and everywhere in this country he was the recipient of some attention and in touch with men who were interested that he should have a good time, and a successful trip. You will naturally wish to know why I went to so much trouble for a perfect stranger, and I am glad to explain, as many people believe that anglers do not take life very seriously, and that angling clubs are merely associations for killing fish. But on paying some attention to this angler, I was, as president of the Tuna Club merely carrying out the work of the club. We have a written agreement with all the first-class Eastern clubs and the British Sea Anglers' Society of London, to aid all the traveling members in every way. Thus if I should go to England fishing or any member of the Tuna Club I would receive every attention, and be shown the best fishing in the country. We do this as a matter of courtesy and Mr. Preston Locke our New York corresponding secretary is ready to give any information. We also have members in London and in every city in this country ready to aid members in getting the best out of a pleasure trip to this coast. So you will see that even the angling clubs are doing something for the Pacific Coast. Last summer the Tuna Club of Avalon has had visits from men from all over the world, and its trophies valued at several thousand dollars and the "stories" one hears there are among the attractions of the State.

The Tuna Club was not organized to enable its members to kill fish. I had the honor of founding it myself and our object was to establish a high standard of sport and see that the fishes of the State received protection and that adequate laws were passed. It is the general impression that it is impossible to exhaust the sea fisheries, but there never was a greater mistake, and in New Orleans the fishes of the gulf have been so depleted that they are going to stop all fishing for two years. Up to six years ago the tuna was here in great numbers, and fine sport was had, but for some time they stopped biting, and but few have been taken for six years, though they have been seen every year.

I caught the first large tuna, weighing 180 pounds, I fought it for over four hours before I brought it to gaff, during which time it towed me about 12 or 13 miles. It gave me the struggle of my life and I have a high respect for the big fish. I did not recover from that fight for four or five years. I could not believe that a larger fish could be taken, we all thought it the limit for the line, a 21 thread affair, with a breaking strain of 42 pounds, but Col. C. P. Morebous of Pasadena took a 251-pounder in the same time, my consolation being that Pasadena still held the record. This magnificent fish hangs in the Tuna Club of Avalon, a gift of Col. Morebous, and it is well worthy a visit to see, what is, without question, the most remarkable catch in the annals of sea angling, the line being a mere thread. In those days the fisherman who took the largest tuna became president of the Tuna Club, and the night the big fish came in I stepped out of office and Colonel Morebous came in, and a banquet celebrated the event, at which we had a big tuna, haked whole and brought in after the fashion of the time of the old Romans, when boar's head was hurled in by several men.

The histories of the individual catches of these fish would make a remarkable story that would hardly be believed; some anglers were towed thirty miles. Two men played a tuna fourteen hours and lost him. Many men have been taken from the boat, and one victim who declared that he was dying was waited on by the committee of the club, and the nurse and Doctor Ayres of Pasadena, braced him up, while he was given the blue hutton. The committee of the Tuna Club experienced the relief that even if the angler did die, it would be a solace and comfort in his last moments to know that he had the "blue button." A small tuna tipped our boat over a mile from shore, and we had to swim a long distance, yet Jim Gardner of Pasadena, my boatman, saved my life.

Col. Stevens of Los Angeles took his wife out fishing and a tuna leaped over her head. Another leaped over the boat of Mr. Berry of Pasadena, and one night when fishing with Col. Morebous, the tunas flushed the flying fish, and one struck me in the neck nearly knocking me overboard. The funny and laughable incidents connected with the sport if they could be collected would make interesting reading; but the feature of chief interest is the fighting power of the fish, its quality of never giving up. I have been one of three men who in five hours, taking turns, could not wear out a 125-pound tuna.

It towed us half way across the Santa Catalina channel we were out of sight of Avalon, and expected to have to land at San Juan Capistrano when picked up.

Judge Beaman of Denver, Colo., was towed almost to San Pedro from Avalon, and Mr. Dickinson of New York fought a fish for nine hours.

Mrs. Walter Raymond is, I hear, the only lady who has the blue button and that she values it is evidently the fact that she wears it. She was the first lady to take a tuna. Mrs. Dickinson, Mrs. Berry and two others also succeeded.

I once ran across a Frenchman in the toils of a tuna, he could not move it, and had been working for hours; his hands were cut, he had lost several finger nails and was in a deplorable condition, yet he would not give up. When I ran along side to ask him if he wanted any help, he said, "The man that invented this tuna fishing ought to be shot," then his boatman told him that I was the inventor and he looked as though he would like to carry out the suggestion. He ultimately lost the fish in a rage at the wounds he received from the handle of the reel. Two days later he committed suicide. Whether this had anything to do with the tuna I do not know.

The return of the leaping tuna to the Catalina waters will bring anglers from all over the world to California, and during the past six years, members of the club have wandered over the globe trying to find leaping tunas. Mr. Earnescliffe tried them at Malta, Mr. Searls has been at Newfoundland, Mr. Affalo went to Maderia and fished, but remarkable to relate none of the anglers have been able to take a tuna with rod and reel at any place but Santa Catalina island, and even here the ground is from Avalon to Long Point, about four miles. The secret is that Catalina is exactly suited to the sport, the water being smooth.

The active work of the Tuna Club has had the support of some of the best known men in America. President Roosevelt, President Cleveland, Professor David Starr Jordan, Gifford Pinchot, Dr. Henry Van Dyke, are all honorary members of the club, and at the honest anglers convention, started by the Tuna Club held in New York, and presided over by Henry Van Dyke, all these men voiced the sentiment of reform that has actuated the Tuna Club, and gave its principles the promise of their hearty and continued support.

No one should try to catch a tuna unless in robust health and with some training as an angler, as it is a curious fact that big and strong men have been completely worn out in a two hours contest with the fish. The secret of the difficulty lies in the fact that it is a fight or a battle, in one round and no rest. There is no "time" called, no rest, no breathing spell, but one big round of from one to four or six or ten hours, as it happens. If you are in condition for that sort of a battle, I commend tuna fishing as a glorious sport, but if you are not in good condition, it is a waste of time, and a humiliation, as the big racing fish will wear your muscles down, your heart out, and escape, as fresh as ever after fighting you and towing your heavy boat for hours.

Mr. Streeter of Pasadena, secretary of the Tuna Club has introduced the methods of the Tuna Club in Texas, he founded the Aransas Pass Tarpon Club, and the movement for fair play to game fish and humanitarian methods has gone around the world.

In England they take their sport much more seriously than we do. The British Sea Anglers Society of London is a most serious institution. It has rooms in London, and on a big board are posted daily the angling conditions of the fishing stations all over the kingdom, for the benefit of members. They have lecturers, weekly meetings, and are a power for good fellowship and good game and fish laws. Nearly every prominent nobleman in the United Kingdom is an honorary vice-president of this extraordinary fishing club. By virtue of my office as president of the Tuna Club, I am an honorary vice-president of this British club, and their president is an honorary member of the Tuna Club. Every year I receive an invitation to the annual banquet, which is always presided over by some noble lord, who is supported by his royal highness the duke of— etc., all this may strike some Americans as humorous. That mere angling should be so profound and heavy, but there is another deal to it. Sport conserved, means millions of pounds to England and they know it. More than that it means health, natural health, and the best advice I could give any man, no matter what his profession would be to make a business of sport, join a club, golf, tennis, Tuna Club, The Anglers' Rod and Reel Club, croquet, baseball, riding, join anything that will take you out of doors a part of every day. Americans take life too seriously. We should play as a business proposition, as the most pitiable thing on earth is the man who has worked like a dog for years to save up money to enjoy life when he grew old, but then finds that he has lost the power of enjoying anything but work. Take your sport, your fishing, riding, golf, as you go along, and you will be sure of it. We live in the most desirable part of the world for such enjoyment, and I sometimes think we do not appreciate it.

Chris Johnson's recent catch of a 27-pound striped bass in San Antonio slough will most probably entitle him to the San Francisco Striped Bass Club "high hook" medal for the 1911 season.

Drink Jackson's Napa Soda.

SPORTSMEN PAY A LARGE LICENSE FUND.

Hunting licenses in this State run one year from July 1st until June 30th following. Resident citizens of California pay \$1, non-residents \$10, and aliens \$25.

Hunting licenses were first issued in 1907. Since which time the receipts have been:

1907-08\$118,427
1908-09 113,470
1909-10 126,734

The receipts for 1910-11, up to date, are approximately \$93,883 (\$14,217 sold by Fish Commission in San Francisco, \$76,666 remitted by County Clerks to State Treasurer.)

County Clerks (to whom is paid a fee of 10 per cent for handling licenses in their respective counties) settle with the State Treasurer every quarter. Just what the total sale of hunting licenses will be cannot be definitely ascertained until the books for the fiscal year are closed. It is believed the total will exceed that of last year. Figures published in the Breeder and Sportsman about six months ago show that over 40,000 hunting licenses were issued to sportsmen in the bay counties alone.

It is believed that the license law is evaded to quite a degree. Possibly not more than one in five go out with a license—that is taking the area of the whole State into consideration. Incidentally, it might be mentioned nearly every hunter, the ones who buy licenses, is a devotee of angling. There are thousands of anglers, however, who do not use shotgun or rifle. There are no licenses issued to the individual angler sportsman. The market fishermen, however, pay a license, \$2.50 for each man of a boat's crew, one or more.

In the bay counties territory it is a safe estimate to say that at least 50,000 sportsmen—including quite a number of sportsmen—follow recreation with rod and gun and are interested in matters pertaining to rod and gun.

The system of disbursements of the fish and game fund is one that can be followed in every detail. Since John Pease Babcock was appointed chief deputy (August 15th) a new set of books has been prepared and every item of receipt and expenditure can be readily traced.

The Commission settles with the State Treasurer every month. Current expense funds are kept in a local bank. Daily deposits of all receipts are made and the various funds are kept separate.

Every voucher of expense is first sent to the State Board of Examiners for approval, then to the State Controller and Governor for signatures before being presented for payment.

The new system of bookkeeping only goes back to about July 1, 1910. Prior to that time all expenditures were also readily followed. A recent expert examination of the books for a period of several years passed showed the disposition of every sum received.

The twenty-first biennial report of the Commission will be issued about the end of December. The State Printer has the final proofs in hand. This report will practically cover the last four years.

The books of the Fish and Game Commission are always ready for the inspection of any sportsman or citizen.

"STYLE" IN DOGS CHANGE.

"Even the dogs are subject to fashion, and the favorite at present is the kind that can be tucked into an overcoat pocket or carried in a lady's handbag. Now we want a waistcoat pocket dog—one about the size of a watch."

Such was the declaration of a London dog fancier when he heard of the discovery in West Australia of dogs which are no bigger than rats. If the new dog can be imported for the London market, fanciers say that it is sure of popularity.

The waistcoat pocket dog would make a hit, said another fancier, and high prices would prevail. It is surprising how fashions in dogs change. Here are some of the important dates of the different fashions:

1820—Spitzbergs.
1840—King Charles spaniels.
1850—Italian greyhounds.
1860—Black and tan terriers.
1865—Mexican "hairless" dogs.
1870—St. Bernards.
1880—Collies.
1890—Pug dogs (still in demand).
1900—English sheep dogs.
1906—Bulldogs and dachshunds.
1907—Pomeranians, King Charles spaniels, Pekinese and Japanese.

The 1907 style was the toy dog. They had to have long wavy hair, be very small, and have a foxy expression, with bright eyes and sharp noses. The prices varied from \$10 to \$200 and more, according to size. These rat size dogs would bring a good price. The probability is that they will not have pretty fur and if their tails are like those of rats ladies will not like them. Another point against them is that they feed on lizards and ground vermin.

With American fanciers fox terriers, Bostons, Airedales and bull terriers have each had a strong following for the last three years. Collies are still in the swim.

Tom Barclay, of Spokane, a Selby representative, spent last week in this city.

WESTMINSTER KENNEL CLUB JUDGES.

The list of judges selected for the 25th annual bench show of the Westminster Kennel Club show in New York, February 13-16 inclusive, as announced in a communication of Mr. James Mortimer, are the following:

Dr. E. Lester Jones, Culpeper, Va., bloodhounds, American foxhounds and American foxhound packs.
E. H. Moore, Melrose, Mass., St. Bernards.
G. F. Eggert, New York, Great Danes.

George Ronse, New York, Russian wolfhounds.
J. Willoughby Mitchell, New Rochelle, N. Y., Irish wolfhounds, retrievers, Chesapeake Bay dogs, whippets, Scottish terriers, Skye terriers, Dandie Dinmonts, black and tan (Manchester) terriers, Schipperkes, Yorkshire terriers, toy black and tan terriers and the miscellaneous class.

Henry S. Spackman, Philadelphia, Scottish deerhounds.

Henry S. Kelley, Stamford, Conn., greyhounds.
Robert Vicary, Newton Abbot, Devon, Eng., English foxhounds and English foxhound packs, fox terriers, Irish terriers and Welsh terriers.

E. Berwind Chase, Philadelphia, pointers and English setters.

Louis Contoit, Mount Kisco, N. Y., Gordon setters and Irish setters.

Goxhill Tatters,

A Dandy Dinmont terrier winner of fourteen championships.

Lance Farewell, Toronto, Ont., sporting spaniels.
H. T. Peters, Islip, L. I., Beagles, old English sheep dogs and sheep dogs of the Maremes.
F. L. Hauptner, Philadelphia, dachshunds.
Col. Robert McEwen, Byron, Ont., collies.
Chas. D. Bernheimer, New York, poodles.
Edward L. Tinker, East Setauket, L. I., chow chows.

John W. Minturn, Great Neck, L. I., Dalmatians.
A. Albright, Jr., Eatonville, N. J., bulldogs.
W. L. Barclay, Chestnut Hill, Pa., Airedale terriers.
W. Freeland Kendrick, Philadelphia, bull terriers.
Richard H. Hunt, Portchester, N. Y., French bulldogs.

George F. Parker, Hasbrouck Heights, N. J., Boston terriers.
B. W. Powlett, Abergavenny, Monmouthshire, Eng., West Highland, white terriers.

Mrs. Reginald F. Mayhew, Clifton, S. I., Pomeranians, English toy spaniels, Japanese, Pekinese, pugs, Maltese terriers, Griffons, Truxellois, Chihuahuas and Italian greyhounds.

Entries close January 26th with James Mortimer, superintendent, 801 Townsend Building, 1123 Broadway, New York.

Ballywater Avic,

Lady Dunleath's Irish water spaniel dog.

Clarence Nauman, looking greatly improved in health, gave the Copper Kettle Club a pleasant surprise by dropping in last Saturday.

Hugh E. Poston of the Peters Cartridge Co. left this week for a two months' trip in the northwestern territory.

Northern spoonbills have been coming in to the Alameda marsh ponds in the vicinity of Alvarado and Mt. Eden for a week past.

APPELLATE COURT DEFINES TRESPASS.

A decision of interest to sportsmen, involving the right of hunters to pursue game on the lands of private owners was handed down in the Third District Court of Appeal last week, and incidentally reverses the decision of the Napa County Superior Court in the case of Edward H. Forestier against Frank Johnson and others.

The lower court found in favor of Johnson. The original case involved the alleged trespass of Johnson and others, for the purpose of hunting, on premises owned by Forestier in Napa county and known as "Fly bay." Forestier purchased his land from the State and had adequate title.

The contention was that Forestier had no right to keep hunters from going on the land to hunt on Fly bay, which was classified as navigable water.

In handing down the decision, which was concurred in by Judges Hart and Chipman, Judge Burnett held the issue involved was similar to the former case of Kellogg against King, where it was held that "the wild game of the State belong to the people in their sovereign capacity, and is not subject to private dominion to any greater extent than the people through the legislature may see fit to make."

Yet, says Judge Burnett, under section 656, civil code, while wild birds are within a person's enclosure, "he has such rights in them as entitle him to protect them from invasion by those not authorized to be there, and any person violating such rights is as much a trespasser as though entering unbidden the plaintiff's dwelling."

STEELHEAD ANGLING.

Steelhead angling conditions in the Russian river near Duncan's Mills up to a fortnight ago were a bit quiescent. The sport is reported to have been improving daily during the past week, but at that it was not within a league of what the experienced steelhead anglers desire and anticipate. Providing the fair weather holds for a week or more, and a light rain falls in the interim, then the promise of royal sport may be redeemed.

At present the river is teeming with steelhead trout, large and small. The fish can be seen jumping all about the surface of the river. So numerous are the trout that anglers in the boats have been frequently splashed by the leaping steelheads. Notwithstanding the large numbers of these trout in the pools, for some reason they did not take the anglers' lures except at odd intervals. A few large fish have been taken and quite a number of small ones, particularly the one to three pound grilse, but no catches in comparison to what the evident supply in the river should or could furnish have as yet been reported. Within five or six miles of the mouth of the river, it is stated, shrimp by the millions were in the water—possibly the trout had found the crustaceans ample for their appetites for the time being. At all events, one recent Sunday, although the trout were jumping lively in the Austin and "Lone Tree" pools, and "barrels of roe" were temptingly offered on barbed hooks, there was a baffled and disgusted bunch of anglers that left for the city on the returning train.

Nearly all of the large steelhead, as well as the grilse, caught were found to be females full of roe. The grilse this season are game and full of fight. The table condition of the fish has not been of the best. The river is full of dead leaves, brush and other stuff that has imparted a decayed woody flavor to the water and does not improve the flesh of the fish. Hence, a rain that will clean out the river, but not create a prolonged freshet, will be of benefit. After a heavy storm it generally takes a week to ten days for the river to offer favorable angling conditions.

Two weeks ago a Duncan's Mills' resident landed four large fish Monday and two more Tuesday. The "Doctor" caught a nineteen-pounder the same morning. A local angler caught five steelhead running from twelve to fifteen pounds during both days. Wednesday a dozen big fish were landed. Louis Gotthelf two weeks ago caught a fifteen and a half pound trout, besides a number of grilse. Frank Marcus caught eight grilse one day. W. J. Street also was in the grilse collection game. Most of the fish taken were caught on an all-copper No. 5. One happy circumstance in favor of the anglers is that there is a plenty of rowboats at Duncan's Mills. About twenty boats were added to the original flotilla, with the result that the competition between the boatmen cut down prices.

Professor E. H. Gilbert of Stanford University was at Duncan's Mills for several days and studied conditions, examined the steelhead caught, collecting numerous specimens for comparison and research in the history and habits of a variety of the trout family that has been for years the subject of much discussion and argument.

Valley Pistol Shooters.—The Bakersfield Revolver Club was formed last week with a membership of fourteen. The new organization promises to have a large membership. Beginning New Year's day, weekly shoots will be held on the rifle range. The members are C. E. Smith, W. W. Hatton, L. W. Baker, C. P. Wilkes, H. S. Davenport, A. J. Welter, W. C. Scott, H. Cohn, Emil Lutz, Ed Gruener, R. F. Zinnamon, Ed Thompson, Fred E. Borton and J. C. Pascoe.

SUDDEN WHIMS OF HORSES.

"You never can tell what a horse is going to do if you place him in unfamiliar surroundings," remarked a horseman of experience at a luncheon during the recent National Horse Show. "Take the case of Mr. Winau's Willy 2:07½, supposed to be one of the best trained horses in the world.

"If any trotter had better manners on the race-course than Willy he has never been seen in this country and during the entire campaign of the Grand Circuit this year from Kalamazoo to Lexington no horse excited more admiration. He was a living tribute to the patience of his trainer and driver, Al Pennock.

"Pennock taught Willy to go without any of the unnatural rigging many trotters wear upon their heads, an open bridle with a side check being his only equipment, and in scoring for a start there was never any question about Willy. He was always ready; in fact he waited upon the others, having been trained to start European fashion from a standstill. At a word from Pennock he would be in full flight in a few strides and while he did not win as many races as some of the other campaigners he acquitted himself creditably and was pronounced, as I have already said, the best broken horse out this year.

"Yet on the opening day of the exhibition when he was shown in the ring in the novice class for roadsters, a competition in which it was virtually conceded that he would win the blue ribbon, he behaved so badly and showed such faulty manners that the judges had to eliminate him. Pennock drove too.

"It might have been explained away if somebody else held the reins, but Pennock, the man who loves the horse as he does one of his children and who will talk to you by the hour about his Austrian trotter—Willy was bred in Austria with an American trotter as his father—was there to soothe him with his voice and give him confidence with the rein. All to no purpose; it was Willy's day to play the fool and he played it with a vengeance.

"You all know the way the show children behave when they are put on exhibition in company. Willy appeared to know that it was the first time his American owner, who has lived abroad for many years, had exhibited any horses in America and he behaved accordingly. It may have been the music, the crowds or the decorations of the arena that upset the horse, but at any rate it was something that puzzled Pennock and surprised all those who were familiar with the horse, his training and general reputation for deportment.

"Every now and then we read in the newspapers of somebody being injured and sometimes killed in a runaway accident. Frequently the horses have been carriage horses with reputation for sedateness. Something frightened them and away they went in a mad, unreasoning flight, blind to everything and turning out for nothing once they got under way. Such a team was responsible for the death of Austin Corbin, the father of Manhattan Beach, some years ago.

"I had a friend, who owned a black mare that he had driven on the road for years. Night or day she was safe, apparently, and one of his little girls had been in the habit of driving her in the country every summer. My friend had a place in Westchester county and one evening in returning from Morris Park after the races—he dined at the clubhouse and left for home about 9 o'clock—this mare suddenly bolted and ran away. She became utterly unmanageable and near West Farms ran headlong into a trolley car, broke her neck and put her owner in the hospital for a month.

"Not long ago a Western farmer while digging potatoes with a machine lost two children through his team running away. They were horses that had been used regularly for years and had given no evidences of unreliability. This day he took his two youngest children into the field with him and while they were at play the horses started across the field, their owner having dismounted to look at the diggers, which had become clogged in some manner. The little ones were run over and killed.

"It is any odds that both youngsters had fondled and perhaps fed those very horses time and again. Any man who handles horses habitually will bear me out when I contend that it is always well to be on your guard with them."

"What do you think should be done to a man who sends horses to the sales ring and fails to announce that they are unsafe? I am speaking now of the known runaway, and you know there are many such on the market every year," asked a member of the party.

"Electrocution," was the reply, "would not be half severe enough penalty, in my opinion, for any such man. I have known of cases where men have sold horses known to be dangerous and there have been many suits for heavy damages growing out of them. As a young man I had a narrow escape from catching a tartar. Fortunately for me a richer man than I was got the experience, but it was a lesson to me just the same and I have always profited by it.

"I had a road horse that could trot close to 30 that was as handsome as they make them. He was a golden sorrel and folks had to turn in the street and look after him, he was so commanding. He wasn't big but he made you think he was with his high head and splendidly carried tail. He was by a Fear-naught sire and out of a thoroughbred mare.

"One day at an auction sale in the old American Horse Exchange I saw a mate for him. This horse was brought into the arena on a halter and I should have been suspicious of his manners when I saw

that. The horse was consigned by a man from the interior of New York State and he hung at \$200.

"I offered \$225 and it was any odds that I would get him, but finally from a remote portion of the gallery there came a voice which said 'Thirty.' That made up my mind that I would go to \$300 for the horse and bid \$250 in the hope that my twenty-dollar raise would drive out my competitor. There was another wait and the auctioneer was calling 'Third and last time,' when 'Fifty-five' came from the unknown upstairs.

"'Seventy-five,' I called, and it looked good again till the eleventh hour when 'Eighty' was bid from the gallery.

"'Three hundred!' I shouted, and was walking out where I could see who was bidding against me when a newspaper man approached me laughingly.

"'Guess who is jumping you \$5 a crack; Russell Sage,' he said.

"We were in a position by this time where we could see the aged speculator, who, by the way, was very fond of a good roadhorse. It was a study to watch him. He eyed Peter C. Kellogg, the auctioneer, and only bid the extra 'and five' when it was absolutely the last call.

"'Do you want him, Uncle Russell?' I shouted.

"I knew the financier personally and when he nodded affirmatively I threw up both hands and told Kellogg that I was through. I wasn't burdened with this world's goods those days and some of the reporters had some fun with Uncle Russell the next day, about the poor man jumping the old financier \$20 a throw, and the millionaire coming back with a tardy \$5 bid.

"Two days later I met a representative of the Kellogg firm and he began laughing as soon as he saw me.

"'You're the lucky chap,' he remarked. 'You remember the gelding Russell Sage bought? The old gentleman paid us by check and took him home that afternoon. The day was ideal for a spin through the park. He accordingly hooked the gelding up to a brand new Brewster wagon, and with his man beside him they started up town.

"'The park policeman who saw the performance says that no bronco that Buffalo Bill ever brought to these parts could buck higher or kick harder, and there wasn't anything left of the wagon worth removing when he got through with it. The policeman saved the men from serious injury perhaps by seizing the horse by the head when he began operations. He had proceeded quietly for a mile or more and then without warning showed the devil that was in him.'

"'What became of the horse?' I asked.

"'Oh, he's back in the horse exchange with a badly skinned pair of hind legs and he will go to somebody if he only brings 15 cents at the next regular sale if his owner doesn't show up and take him away.'

"'His owner?' I said. 'Didn't Mr. Sage buy him without a guarantee and doesn't he own him?'

"'The man fixed me with a plying stare and then remarked: 'You evidently never did business with Mr. Sage. When we presented his check for collection the next day after the sale payment had been stopped. You never caught him asleep at the switch.'"—N. Y. Sun.

THE PERFECT AMERICAN SADDLE HORSE.

The most desirable points in American saddle horses are what are known as saddle gaits, therefore the most important of which the walk, says a writer in Colman's Rural World, has as wide a range of excellence as the faster gaits of trotting and running. The average rate of speed at which horses walk in harness or under saddle is probably no more than three miles an hour, while a really good walker can cover five, and in rare cases six miles, under saddle. Being the easiest gait on both horse and rider, such horses will make wonderful journeys without distress. What is known as the fox trot is also a very desirable gait and easily taught most horses by urging them slightly beyond a walk, and when they strike the right gait hold them to it; it is a trifle faster than a walk, and a near approach to a single foot.

Nearly all saddle horses will take a few steps to this gait when changing from a walk to a trot, but will not keep it unless trained to it. The speed differs from seven to eight miles an hour. Horses will learn to like the gait, and it is an easy one for the rider, and, next to the walk, the best long-distance gait. Single-footing is nearly the same as the fox-trot, and is an exact intermediate between the walk and the trot, each foot appearing to move in a sort of go-as-you-please manner, and, considering that it is an exceptionally easy gait for a rider, and that an average single-footer will cover nine or ten miles per hour, it is worthy of cultivation. The rack and pace are nearly alike, the only difference being in the former the hind foot reaches a trifle in advance of the fore foot on the same side, while at the latter gait the feet on each side move exactly together—a purely lateral motion. Either the rack or the pace is much more desirable than the trot under saddle, and the pace is at least as fast, if not faster, than the trot. In addition to possessing all the above saddle gaits, the model saddle horse should be level-headed, courageous and kind and should be an active and easy mover at any gait and have a sensitive mouth, respond readily to the touch of the bridle rein, be sure-footed, able and willing to trot, gallop or run, as required, and, above all, sound upon his legs and perfect in the wind.

EXTREME SPEED DEVELOPMENT.

General Watts, owner of the erstwhile three-year-old trotting champion, General Watts 2:06½, takes the detroning of his stallion by Colorado E., like a true sportsman, and has nothing but words of praise for the new champion. What General Watts has to say on present day speed development will be read with interest by all.

"When I saw the two and three-year-olds going those fast miles last fall," said General Watts, "I felt like this good year of 1910 would be one of greater progress in light harness racing, and that 2:06½ would be reduced as the record for three-year-old trotters. I had confidence in my horse's capacity and I decided to let him make a season this spring and to hold him from racing for another year, and I now have the feeling that he will progress to higher distinction.

"I do not think any man knows the limit of speed that is yet to be carried for a full mile. A few years ago no one expected to see a 2:00 horse, and even after that degree of speed had been reached, there were expressions of serious doubt if we would ever see a horse that could trot a mile better than 2:00 out in the open and without a wind shield. The mighty Uhlman has passed that mark under those conditions. It is my belief that what one horse has done another can do. There was never a man so great whose place, when he dropped out, was not filled by another. We find that this is true among statesmen, warriors, rulers and in all of the vocations of mankind. So why, I argue, does not the rule apply and hold good in the case of the race horse.

"A few years ago it was a great question whether or not a horse possessed the lung power essential to the carrying of speed beyond the 2:00 mark in trotting. Uhlman has demonstrated that he possesses such lung power, and what Uhlman possesses we may expect other horses to possess. I predict that we will see one or more other horses trotting below the 2:00 mark within the next twelve months.

"I attribute this marked progress in the lowerings of records, by aged and young horses, to improved training methods; to the importance given to having the highest and best types of tracks, as well as men to manage them, and to the improved blending of blood lines. And, in my judgment, we are in the midst and not at the end of a wonderful development of speed.

"Not so many years ago a 2:10 trotter was regarded not only as a piece of property of great value, but as an unusual luxury. That record now fails to excite a little more than passing comment, and I forecast that the very near future will see the 2:00 trotter not standing alone as a single exception in the harness world, but a fact that will be as easy of accomplishment as was the 2:10 trotter twenty years ago."

"THE BIT IN THE TEETH."

The runaway horse in story books, as in most of the veracious and detailed accounts given in the daily press, invariably "takes the bit between his teeth" as a preliminary measure. It would be interesting to know how he does this. He obviously cannot get it between his molar teeth (grinders) unless both his cheeks are silt up from the corners of his mouth, and if the check straps be the right length it is equally impossible for him to get it down to the level of his incisors (nippers), and there are no teeth in between! Thus perishes another hoary-headed superstition!

What does happen is that through steady, unremitting tension on the reins the bars of his mouth become numbed and impervious to pains; this enables him to set his jaw firmly, put the whole weight of his head on the bit and successfully resist anything short of one horse-power at the other end of the reins. This is the reason why when run away with one should never try to recover control by steady pulling, but should always short, sharp pulls with intervals of complete relaxation between them.

Although it is always advisable to drive a new horse, temporarily at least, with the bit to which he has been accustomed, providing that he goes satisfactorily in it, it is never safe to assume that it is the best possible one for him. This assumption, which is general, is responsible for much trouble that might be obviated. It is surprising to note how complete and radical a change of bit may be made not only with impunity but with advantage, if only the change be in the right direction.—Outing.

A BIT OF MODEL HIGHWAY.

The Los Angeles Times describes a road between El Monte and Pomona, Cal., as "without doubt as fine a stretch of country road as can be found in the United States." It is interesting to know the process by which this super-excellent highway was built and the following description is supplied by the Times:

"After the roadway is graded and all depressions filled, the earth is packed hard with a steam roller, and then a layer of crushed rock is laid on it, the pieces averaging several inches square. On this is spread a layer of considerable finer rock, and then comes a third and last layer of very fine rock. These are pressed firmly together with a heavy steam roller, and then thoroughly saturated with crude petroleum. Lastly, the roadbed is covered with a layer of rock dust as fine as powder, and then smoothed and packed many times again with the steam roller. The result is a road as smooth and firm as any asphalt paved city street, and one that with a little care is practically indestructible."

THE FARM

TREATING HOG CHOLERA.

(By Dr. A. T. Peters)

There is probably no disease that is of such economic importance to the stockmen as the one now under consideration. Hog cholera is really not a new disease. It was reported by the Bureau of Animal Industry in Ohio as early as 1833 and then made its way to other States along the line of commerce, until today it has invaded nearly every part of this country where swine are grown. The losses from this disease are very large. Every State loses annually many thousands of dollars from this disease.

Unfortunately, the symptoms of hog cholera are not constant. It is therefore very difficult for the best informed to positively diagnose hog cholera from symptoms. Hogs that suffer from other causes, especially intestinal troubles, present symptoms that very closely resemble those of hog cholera. The symptoms are, usually great weakness, drowsiness, and constipation, followed by diarrhoea.

The animals lie quietly in a corner, huddling together, usually hiding the head in the litter. The hair becomes harsh and dry. The eyes become watery and locomotion becomes weak and irregular, with imperfect control of the hind legs, resulting finally in paralysis. The skin around the flanks and forelegs may become purple, the skin of the ear frequently becomes inflamed and in the later stage has a scabby appearance and may result in part of the ear falling off. The animals refuse to move when disturbed and are more or less lifeless. There is usually a loss of appetite, but in some cases the appetite may not be affected.

In chronic cases there is a rapid emaciation which is accompanied by extreme nervousness or paralysis of the hind limbs. The cough is usually short and hacking. In the chronic case we usually find diarrhoea a few days before death. There is considerable redness around the nose, ears and abdomen, and this usually increases as death approaches. These symptoms may vary and therefore it may become necessary to await the post mortem and bacteriological examinations before making a final diagnosis.

The post mortem examination reveals the most important changes in the large intestines. The mucous membrane of the large and small intestines is red and swollen and is dotted with dark yellow and black ulcers, which are so deep that they may penetrate the walls of the intestines. The pancreas is swollen and somewhat caseous. Ulcers are found on the tongue and larynx. In some cases the lungs are inflamed. The spleen is enlarged, soft, and gorged with blood. It may be many times as long as the normal spleen. The lymphatic glands are usually affected. The kidneys are usually the seat of extensive hemorrhagic changes.

Chronic cases of hog cholera are distinguished from tuberculosis by the fact that in hog cholera the diphtheritic patches in the intestines do not calcify but become caseated on the edges, and dry and brittle in the center, while ulcers in tuberculosis calcify.

When the respiratory organs are the seat of the disease, the pleural cavity will contain a greater or less quantity of serum, which in some instances will be flaky as a result of coagulation. The pleura may present all the characteristic appearances of pleuritis. In some cases the lungs become hepatized to a greater or less extent. The exudate found in the air cells and bronchial tubes will vary in color and usually presents a frothy appearance. The trachea and larynx frequently present inflammatory appearances. The pericardium which covers the heart is almost always found congested and contains more or less serum. The lymphatic glands are usually involved. Usually two kinds of pneumonia are found, lobar and catarrhal.

The nature of the lung disease will depend to a large extent on how the

virus gained entrance. If it entered by way of air tubes it is more likely that we shall have a bronchial pneumonia. If it entered the lung tissue through the circulation, then we shall have more or less scattered pneumonia.

For hog cholera there is no sure cure, and therefore preventive measures should be used. A great deal of good can be done by good sanitary regulation and by good feed. Feeding balanced rations that supply all the nutriment that the animal requires will aid in warding off these diseases. It is of great importance to remember that the disease is caused by distinct germs and is highly contagious; therefore one should bear in mind that they can be warded off by preventing the bacteria from gaining entrance on the premises, and for this reason one should avoid visiting on a farm where he has any suspicion that hogs are dying from one cause or another, and above all should avoid purchasing a hog or hogs from a herd in which animals have recently died, for in that way he will bring the disease on his farm.

Animals should not be thrown into streams, and the streams should be carefully guarded so that they will not be a source of spreading this disease through a great part of the country. It is known that virus can be carried on feed, implements and shoes and clothing of the attendants who are taking care of the hogs. Dogs, huzzards and the like can carry this disease. A dog from a neighbor should not be allowed on the farm when there is any suspicion of hog disease on the farm.

As soon as the disease is noticed in a herd it is well to divide the herd carefully into two or more groups. In this way you may check the disease and not lose more than one group and prevent it from occurring in the rest of the herd. It is needless to say that these pens should be kept thoroughly clean using such disinfectants as lime water or corrosive sublimate.

When an animal has died the carcass should be immediately burnt.

DEVELOPING A DAIRY HERD.

In developing a pure-bred dairy herd, first select your foundation. It will be wise to move carefully, selecting well-grown, thrifty, promising cows and heifers of approved type, and of the milk and flesh form; but not rejecting an otherwise desirable animal because she happens to be of the milk form, nor refusing to buy because the owner of the herd will only allow you to select from among his best cows by your paying him well for the privilege.

Any dairy cow needs a rest of sixty days before parturition and will yield more milk per year by reason of such rest. If Holstein-Friesian cows are fed much grain at drying-off time, it is difficult to get them dry; but when once dry, grain should be fed in reasonable quantity to get them in good condition at calving time, and to form a good udder. From five to eight pounds of grain per day will usually be found sufficient before calving, watching the udder carefully to guard against harm; and when the animal has recovered her appetite after parturition, she can usually start in with ten to twelve pounds per day. Keep the cow comfortable both before and after parturition, using plenty of bedding and the card and brush. See to it that she has water in plenty.

Milk three times daily from the start, and at nearly equal intervals—5 a.m., 1 p. m. and 8 p. m. being convenient hours—recording the weight of each milking. Feed the grain ration by weight, feeding as often as the cow is milked, and increasing it slowly till the cow is on full feed. Cases differ, but one to one and one-half pounds will usually be found a sufficient daily increase. Keep the feed box or manger perfectly clean; removing at once any feed left uneaten, and reducing the next feed proportionately. Fifteen to eighteen pounds of grain per day for a heifer, and 20 to 34 pounds for a full-aged cow will usually be all that a novice should feed, though after gaining experience he may safely feed more; but it is only the cow or heifer making a very large record that needs so much. The appetite for grain may

be checked by feeding more of coarse feed. The experienced feeder will begin his test when he knows the cow is reaching her best; but the novice had better begin about ten days after calving.—Holstein-Friesian Register.

GOMBAULT'S CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

DENATURED ALCOHOL IN SOLID FORM.

Cleveland Special Dispatch. A well-known Wheeling, W. Va., chemist has succeeded in producing chunks of denatured alcohol in crystal form by means of a small infusion of certain acids whereby crystals of an alkaloidal nature very closely resembling physiologically the effects of ethyl alcohol distilled from sawdust. The method employed and the results obtained are somewhat similar to the crystallizing of rock candy or that of Saccharine containing as it does 350 times the sweetening strength over that of cane sugar, so this alkaloidal crystallized alcohol contains many times the strength over the ordinary denatured fluid alcohol; they will yield 194 proof denatured alcohol with a greater heating and cooking power for stoves than gasoline, and it is absolutely non-explosive.

A sample can containing 50 solid cubes, 1 stove and the secret formula how simple it can be made at home, will be mailed to you, postpaid, on receipt of \$5.00. Address

PETERS .22's

("The Semi-Smokeless kind.")

BROKE ALL PACIFIC COAST RECORDS

In the 1910 Medal Competition of the Golden Gate Rifle and Pistol Club, at the Shellmound Range, distance 50 yards and Standard American Target, with .22 pistol, Mr. J. E. Gorman made

Ten Scores of 98---980, Out of a Possible 1,000. Breaking All Known Records.

During the year Mr. Gorman shot 86 scores, with a general average of 94½, as follows: Ten 98's, thirteen 97's, thirteen 96's, nine 95's, sixteen 94's, eleven 93's, six 92's, six 91's and two 90's,

A Total of 8149 out of 8600

In the Bull's Eye Competition at the regular meet of the Shellmound Rifle and Pistol Club, December 4, 1910, Mr. L. S. Hawxhurst broke the Pacific Coast Record with a .22 rifle, scoring 79 bull's eyes out of 81 shots, in which is included a run of

42 Consecutive 3-inch Bull's Eyes, Off-hand, at 50 yards.

These scores were made with PETERS .22 Long Rifle Cartridges, loaded with the famous KING'S SEMI-SMOKELESS POWDER.

WHY COWS WON'T GIVE MILK.

There has quite a good deal been said on the subject which is certainly of far-reaching importance. A cow that persists in not giving down her milk is practically worthless, as it is only a matter of a short time before she will go dry. A contemporary says: "To overcome the habit of cows holding up their milk it is necessary to refrain from exciting the natural obstinacy of the animal by any disturbing influence. Many will have noticed the sly, determined way in which the cow that has been ill-used looks back sideways at the milker. She shows by every action and the stolid determination of the set eye that she is refusing to "give down" her milk. But let a woman, tender with the cows, and apt to speak pet words and fondle the animal by a gentle touch, go to milk a cow, and there is no trouble; or a man who is ready with kind words and gentle touch, and it will rarely, if ever, happen that there is any trouble of the kind. There may be possibly an exception with some inexperienced heifer at first milking, when she does not understand what is wanted of her. She must be taught by kind, gentle and patient training this unfamiliar part of her business and then she will not hold up her milk."

PRODUCTION OF BABY BEEF.

R. B. Cushing of Illinois is a believer in the Hereford as the most profitable animal for the production of baby beef. In a letter on the subject in the Indiana Farmer, Mr. Rush says: Each beef breed will give good results if pushed to early maturity, and I think it depends on the individual who is growing these animals more than the breed, if satisfactory results are obtained. However, it has been my experience that the Herefords are the most docile and easily handled of any of the beef breeds, and also as hardy as any other breed, besides they will make as early development as any of them, thus I am inclined to favor them somewhat myself. I believe the production of early maturing beefs to be the most remunerative in the growing of beef of any kind. In fact when beef cattle are kept over three years there can hardly be other than loss, in my opinion. Why breeders and feeders will keep animals to four or five years of age before sending them to the block is with me an unsolved question. However, in the majority of cases the trouble lies in not knowing the cost of production. No matter if farmers do generally dislike to keep accounts of the farm they can at least quickly figure the value of their foders, grasses, hay and corn consumed and thus come somewhere near knowing the actual gain. In most cases the labor of handling and the manure produced need not be taken into account, for my experience has been that the manure produced is fully equal in value to the labor bill. I have found the Herefords to be the best of rustlers and will lay on fat and flesh from food of poorer

quality than some of the other breeds, though of course when given the best of care and feed they certainly are a great surprise in making their development. It is a pleasure to handle these animals, or at least has been so with me, to see them so quickly respond to good care is enough to add increased enthusiasm. They are a little larger of bone than other breeds, but it has repeatedly been shown that they can be made to dress out as much if not more than the best of any other breed. Because of the peculiar characteristics of developing stout, sound hodies on short legs and maturing early it is hut nat-

ural that the meat is fine grained and well marbled. The fat generally is well distributed throughout the meat, and on that account is in great demand by the better trade in the large cities. Who is there who does not prefer tender, juicy meat to some thing from a cannor or the average beef, and are willing to pay the difference, too?

Since the Hereford is not a specialized milk cow, it is well to leave the calf with the cow all the time, but of course if the dam is not dry by seven months the calf should be weaned. Calves in winter when only a week old will often be noticed nibbling at hay, or if out on winter pasture will be seen nibbling at grass. After a month old they should be given a little grain—crushed corn with a little oil meal mixed, then the next summer if the pasture is good let the calves have a little more grain.

In the winter there should be a variety of hays and fodders for best results. Well cured fodder is a cheap roughage to use in connection with richer foods. Where the feeder has a silo, which we should have, the fodder may be siloed. The feeding is more easily done and the animals make even better gains than on the cured fodder. When good clover hay is not available of course more grain must be fed. Oats is generally considered as only fit grain for horses, but I have found that they can very profitably be fed to all kinds of stock, and especially those that are put on forced feeds, as baby beeves. This grain is the best corrective that there is.

Calves that are forced from the beginning are liable to scour, but this can be checked by feeding oats. Oil meal is another feed that may be fed profitably and is another splendid corrective and tones the entire system. While corn is among the cheapest grain and will make the best gains there are places where corn cannot be grown, at least profitably, and in such cases such feeds as barley and wheat bran may be used to advantage. The one great object in feeding this kind of stock is to force from start to finish. At first naturally they require plenty of muscle and bone forming foods, that later they can be finished and fattened rapidly.

DAIRY BREEDS.

It has been said that there is more in the dairyman himself than in the kind of cows he keeps. There is much truth in this, for the man who runs any kind of business has the making or breaking of that business. Some men will make a failure with good cows under the best of conditions, while others will make a success under adverse conditions.

However, there is some difference in breeds of dairy cows for meeting special needs. Some dairymen are situated to make the most money in selling whole sweet milk to the general trade, while some can make more by selling whole sweet milk to private or special trade, and others sell the cream or butter only.

There is a difference in the breeds of dairy cows for producing milk of high and low cream content. There is also a difference in the size and physical nature of the animals for consuming feeds and for grazing on scant and luxuriant pasture.

For supplying whole milk to the general trade, with medium cream richness, the Holsteins are perhaps the best for the purpose, as they give relatively large quantities of wholesome milk and with sufficient cream content to meet the demands of the general trade and of the pure food laws. Also, the dairy man who grows pigs and hogs in connection with his dairying, selling the cream or butterfat, and keeping the skim-milk at home, can perhaps make more money with Holsteins under average conditions than with other breeds that give richer milk. There is also another good thing to be considered with the Holsteins, and that is, although the milk is relatively low in butterfat or cream, yet the cows give enough additional milk in quantity to make the total butterfat capacity of one of these cows equal, and sometimes greater, than that of the Jersey or Guernsey. That is, a Holstein cow will make about as much butter in a year as a Jersey of equal breeding and feeding, and where

skim-milk is an item for young animal feeding the Holstein is worth more.

The Holstein cow is a large and slow-moving cow, a heavy feeder, and she is adapted to level and rich farms where forage is luxuriant and traveling easy. To do her best, she is rather too heavy for hilly and rough land where pasture is thin.

The Jersey and Guernsey are perhaps the best breeds for butter production where the skim-milk is of but slight consequence. They also are the best breeds for whole milk or cream for private trade where richness of the products is the main consideration and where "fancy" prices are paid for extra rich milk and cream. They are considered by most persons to be more beautiful cows than animals of the larger breeds. The Jersey is perhaps the most beautiful of all dairy cows, and the calves are the most charming and beautiful little animals of all bovines. The Jerseys and Guernseys are good foragers on a variety of pastures, yet they will do their best only on the best pasture and with heavy stall feeding on a variety of products especially adapted to milk production.

The Ayrshire cows have been bred and reared for generations on hilly and rough land where pastures are thin, hence this breed is best adapted to hilly and rough land. The Ayrshire cow will travel over many acres of pasture daily to secure her feed, and give a full flow of milk at night, while some of the other breeds in walking as much during the day would give a very low yield.

There is, of course, a difference in the breeds of dairy cows. There is also a wide difference between individuals of the same herd. But, after all, where good individuals of a good breed are kept the highest general results come through good feeding and treatment of the individuals. Do not change or stand back on the breed simply because your farm may be hilly or flat. Heavy breeds may do even their best on hilly land if the pastures are made to grow luxuriant grasses and other forage plants, and the cows are sheltered and fed well. Make your pastures as rich as they can be, and the cows will thrive on them.—H. H. Shepard.

The farm should have on it all the good stock it will keep and the help you have can give the proper care. The well bred, profitable kind of horses will do the same work—except more of it—that the scrubs are now doing. It is just as cheap and much more profitable to have pure bred beef cattle instead of common stuff. If you are milking a few cows and selling the cream you can have, if you will, cows which produce five or six times as much milk as scrubs. You can have pure bred hogs which make pork cheaper than scrubs, and you can sell a sow or a boar for breeding purposes. A few sheep will help things along. Not one of these improved kinds of live stock will in any way prevent or interfere with the growing of wheat or corn for market which may just now have your undivided attention. Think this over. Resolve to get a few animals of better than common stock next year. The good ones increase rapidly and soon you'll have all you can keep.

All the money to be made in breeding horses is not made in breeding drafters. There is equal opportunity for the farmer who elects to rear a good family driver. If you want a hard job try to buy a family driving horse. You would most likely go to some of the towns where drivers are used. You find many horses for sale but they will not meet your requirements. You'll find a lot of people looking for just the kind of a horse you want, too.

DIVIDEND NOTICE.

THE GERMAN SAVINGS AND LOAN SOCIETY (The German Bank), (member of the Associated Savings Banks of San Francisco), 526 California street, Mission Branch, 2572 Mission street, near 22nd; Richmond District Branch, 432 Clement street, between 5th and 6th avenues.

For the half year ending December 31, 1910, a dividend has been declared at the rate of four (4) per cent per annum on all deposits free of taxes, payable on and after Tuesday, January 3, 1911. Dividends not called for are added to the deposit account and earn dividends from January 1, 1911.

GEORGE TOWNY, Manager.

Get Your Stallion's Picture

IN THE

Stallion Number

OF THE

Breeder and Sportsman

WHICH WILL BE PUBLISHED

Saturday, February 25, '11

It will have a handsome cover in colors, contain many illustrations and be replete with matter interesting to breeders and horsemen.

IF YOU OWN A STALLION

don't fail to advertise him in this number, as an advertisement in this issue will reach every owner of a good mare on this Coast, besides having an extensive circulation throughout the United States, Australia and the Hawaiian Islands.

IF YOU OWN A MARE

you will find this number interesting and valuable, as it will contain the stallion announcements, giving particulars as to description, pedigree, terms, etc., of all the best stallions on the Coast, and from these announcements you can decide on what stallion will nick best with your mare.

EVERY ONE INTERESTED IN HARNESS HORSES

will be interested in reading this number, as it will contain statistics, news, and articles that will make it entertaining reading and valuable to preserve as a work of reference.

AS AN ADVERTISING MEDIUM

not only for stallions, but for general advertisers who wish to reach the Horsemen, Horse Breeders, Farmers and those who are interested in Field Sports, it will be particularly valuable.

OWNERS OF STALLIONS

who wish illustrations of their horses to appear in this issue should have photographs prepared without delay and send in their orders for space. Write for price and particulars to

The "OLD RELIABLE" Parker Gun

Wins for the Eighth Time

THE GRAND AMERICAN HANDICAP
Score of 100 Straight from 19 yards.

At Chicago, Ill., June 23, 1910.

Mr. Riley Thompson of Cainsville, Mo., made this record, which has never before been equaled in this classic event.

The PARKER GUN in the hands of Mr. Guy V. Deering, also won the Amateur Championship at Chicago, June 24, scoring 189 x 200, shooting at 160 singles and 20 doubles.

SMITH GUNS

HUNTER ONE-TRIGGER

WEATHER conditions aren't always at their best in the "blind" or in the skiff. That's when you don't want your gun to balk or double.

YOU CAN easily wear gloves if you shoot with a Hunter One-Trigger. And without "fiddling." It won't balk—because there is no friction to make it balk. And it won't double—because there is no second trigger to get tangled up in your glove.

The very newest Hammerless Smith Gun is the 20-Gauge Hunter One-Trigger. Weighs only 5½ to 7 lbs. Just the finest gun that can be made at the low price. Write for free Catalog to-day.

Isn't He Worth Saving?

QUINN'S OINTMENT

ABSOLUTELY CURE
SPRAINS
WIND PUSTS
REMOVES QUINNS

Why trade off or sell at a beggarly price a good horse just because he "goes lame," "throws a curb" or develops some other "blemish"? There is nothing in the way of Spavins, Curbs, Splints, Windpuffs or Bunches which will not yield readily and permanently to treatment with

QUINN'S OINTMENT.

Dr. E. H. Davenport, a prominent physician of Sheridan, Ind., writes: "I have used a number of remedies for the removal of curbs, splints, thickened tendons and tissues generally, but for long at different times, and say without hesitation that it is the only reliable remedy of the kind I have ever tried." Price \$1.00 per bottle. Sold by all druggists of West by mail. Write for circulars, testimonials etc.

UMC

Arrow and Nitro Club Steel Lined Shot Shells

Shooters are everywhere awakening to the advantages of the steel lining in U M C Arrow and Nitro Club Shells—the shells that have won every Interstate Handicap event in the past two years.

The steel lining improvement, as used in U M C Arrow and Nitro Club Shells, has been adopted by the leading shell manufacturers of Europe. It protects the powder from moisture, insuring uniform loads under the most severe weather conditions, and adds to the strength of the shell.

Sold by all first-class dealers. Do not accept a substitute. Communicate with us if your dealer does not carry U M C or Remington.

WINCHESTER

Repeating Rifles For Hunting.

A rifle that is intended for hunting should be a repeater. It may be operated by hand or automatically, but it should be a repeater. Winchester Repeating Rifles are made for hunting and have been used by experienced hunters for decades. They are made in eleven different models and in calibers suitable for every kind of hunting, from the smallest to the largest game extant. Whatever your ideas may be, you will find a Winchester to suit. Send for free catalog, illustrating and describing all guns and ammunition made by the
